Mr. HOLLAND. It will be noted, Mr. President, that the highest number of seasonal farmworkers of all types employed in the United States from the period November 1959 through October 1960 was 1,316,000, the figure for October 1960. This total included 823,000 domestic workers who were not migrants and 236,000 foreign seasonal farmworkers, leaving a total of 256,000 domestic migrant workers during that month. The highest number of domestic migrants during the period covered was 293,000 in July 1960.

Mr. President, the fact is that the total number of migrant workers is so much under the figure of 3 million that someone must have taken the figure out of thin air and tried to state the number of workers, seasonal farmworkers of all types, plus their families, or to give some other approximation of a much larger figure than the number of migrant workers, that I am unable to understand where the figure could have come from. However, it appears several times in this deplorable film; and has been seized upon several times by the reporters in Great Britain. It is a complete misrepresentation of the number and of the size of this problem in our Nation's life.

Mr. President, the next article was published in the London Daily Mirror of March 22, 1961, and is headed "Brilliant." It reads:

"Harvest of Shame" on the BBC last night was a brilliant exposure of an American problem.

This Ed Murrow report showed the hopeless lives of 3 million farmworkers and their families in the United States with appalling sincerity.

Can anyone find a reasonable answer as to why Americans, understanding this problem and understanding the serious falsifications which are in the film, could ever have given their consent to sell the film for presentation to the some 50 million people, or perhaps 60 million people, who would have had the chance to see it when it was shown on the British Broadcasting Network?

Mr. President, the next of the clippings from the British press is entitled "Sordid Living—U.S. Harvest Migrants," and was published in the London Daily Telegraph of March 22, 1961. I ask unanimous consent that the entire article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SORDID LIVING—U.S. HARVEST MIGRANTS

A raw, harsh picture of the poverty in which some 3 million American farmworkers live was presented in the documentary "The Harvest of Shame" on BBC television last night. With brutal reality it depicted the lives of the migrant farmworkers who travel the country to bring in the harvest.

Ed Murrow, the commentator, drew bitter comparisons between the treatment of these workers and cattle, pointing out that cattle traveled in better conditions than the migrants. Even horses had more capacious quarters.

Wages are pathetically low. One Negress described how she spent almost 9 hours in the sun picking beans for a mere dollar while four children waited at home to be fed. But despite the sordid conditions there seemed little despair among the workers.

One farmer described them as "the happiest people on earth" with no worries and thoroughly enjoying their lives of freedom. While the film tended to emphasize the sordid side of their lives the workers themselves brought a balance to the production with their resignation and contentedness.—P.J.K.

Mr. HOLLAND. Mr. President, I read this one sentence from the article, which is so completely out of line with the facts, but which has its inception obviously in portions of the film of which I have complained twice before on the floor, and which I have branded as false:

Wages are pathetically low. One Negress described how she spent almost 9 hours in the sun picking beans for a mere dollar while four children waited at home to be fed.

This refers to Mrs. Alean King. Contrary to the statement in the film that she has 14 children, she has 7 children living and 7 who are dead, two having been stillborn. Her husband has been a permanent seasonal employee at a sugar

mill where he now receives a salary of $83.50 per week during the season. The prevailing base minimum rate for picking beans in the area is 60 cents a hamper. Most workers have little difficulty picking two hampers or more an hour. If Mrs. King earned only a dollar for a day's work, she either was not working very hard or she was in a very unusual situation.

Again, it seems incomprehensible to me that anyone claiming to be an American could have been a party to this monstrous outrage.

The next article was taken from the London Daily Mail of March 22, 1961. It is headed "Peter Black's Teleview." I ask unanimous consent that the entire article be printed at this point in the RECORD as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EXHIBIT G

PETER BLACK'S TELEVIEW

Although the Americans as a whole are no better at self-criticism than anybody else, they are extraordinarily ready to hear people tell them about their faults.

Ed Murrow startled and shocked America last year with his exposure on TV of the conditions in which the 3½ million migrant workers of America live. Indeed, as BBC viewers saw in "Harvest of Shame" last night, it is a startling and shocking story.

For these dollar-a-day workers are technically as good Americans as any other. They are not like the Sicilians or the Irish, helpless victims of an economically disintegrated Europe. They are citizens of a huge, rich, and unified country.

According to Murrow, the Eisenhower regime allotted $6,500,000 to preserve migrant bird life, but failed to implement the $3,500,000 budget for the education of the children of these workers.

It's all very curious. After all America was built on the idea of equality of opportunity. How can it tolerate this pitiful anomaly?

The explanation that makes most sense is that the Americans cannot take the first step of acknowledging that this equality of opportunity is a myth.

Mr. HOLLAND. Mr. President, there are three items I should like to read from that article. Readers of the RECORD can see the whole article for themselves but I shall not take the time of the Senate to read it. I have just placed it in the RECORD. The first item reads:

Ed Murrow startled and shocked America last year with his exposure on TV of the conditions in which the 3½ million migrant workers of America live. Indeed, as BBC viewers saw in "Harvest of Shame" last night, it is a startling and shocking story.

Mr. President, it is a startling and shocking story. The trouble is it simply does not happen to be true. It is in that regard that a lasting disservice was done to our country, and a false picture given to the good people of Great Britain, our greatest ally.

The next item reads:

For these dollar-a-day workers are technically as good Americans as any other.

The phrase I resent there is "dollar-a-day workers." There still is not any such group among migrant workers. They are not only well employed, but they have to be employed, in my State, in competition with those who go to the tourist hotels, restaurants, and other operations, at the same time, which are catering to the some 11 million people who visit our State at the precise time of the year when the migrant workers are working in Florida.

The conclusion that these are dollar-a-day workers arises from one of the falsities which is incorporated in the film, and to which I have called attention in an earlier discussion both by reading the words of the telecast and by pointing out how no person who viewed the film could have gained any other reasonable conclusion than that which was gained by the commentator, Peter Black, who, I am certain, was trying to correctly advise the readers of his great newspaper, the Daily Mail, of the facts as he saw them portrayed in that film.

The third of his conclusions which I believe is particularly ugly is this:

According to Murrow, the Eisenhower regime allotted $6,500,000 to preserve migrant bird life, but failed to implement the $3,500,000 budget for the education of the children of these workers.

It's all very curious. After all, America was built on the idea of equality of opportunity. How can it tolerate this pitiful anomaly?

Mr. President, there are other articles which I feel certain will be received from time to time. These five or six are the ones which reached me this morning. They were taken from the daily press in London on the morning after the showing of the film, except as to the first, which was taken from the schedule of BBC offerings for that period, showing the offering for that particular day.

Many statements have already been made in the press at home about this matter, and there will be ample time to comment on them later. Editorials have been written by very competent, very dedicated editorialists, who undoubtedly have been misled into thinking that this film is true.

I noticed several editorials and columns today, to which I shall refer on another occasion. For an editorialist sitting in an ivory tower in a great city like New York or Washington to assume that a film of this kind is true, when it is not true; for him to write editorials expressing the considered opinions of great newspapers, of great informers of the public as to what is taking place; and to produce editorials which are predicated upon a false premise, and which therefore must state a false conclusion, is, I think, a most unfortunate occurrence. I shall dwell on these matters later.

The point now remains that an American institution, the Columbia Broadcasting System, wholly dependent upon the generosity and the grace of our country in granting television and radio privileges has done a thing of this kind, knowing, or having every right to know, and having had every chance to be advised of, the falsity of various things which were included in the film.

It is very easy to say, "Let the sin be on their head." I am not thinking of that. They are responsible, and will have to be responsible, not only to their own consciences, but to the consciences of the American people. What I am deeply concerned about is that a great people who are our kinsmen and our friends and closest allies should have been subjected to that kind of misleading showing, narrated by the very man who was that very day sworn in as head of the U.S. Information Agency, and shown over his protest and strenuous opposition, when everyone who was familiar with the contents of the film should have known that the results would be disastrous to us and our country, and that our cousins in Britain would get a false and an even worse opinion of us than they have ever had in the past—and sometimes I think they have not, indeed, had too favorable an opinion of us even in the past.

Mr. President, it is tragic when the love of money or the love of notoriety or the love of power—I do not know what it is that has caused the action—makes it possible for the heads, the managers, and the directors of so great an institution of information, the Columbia Broadcasting System, to sell this film for production in the United Kingdom.

Mr. President, later we shall have more to say about this matter. Today, I wish to put this much into the RECORD.

Today is Friday. The film was shown in Britain on Tuesday night. The newspaper clippings I have placed in the RECORD are from newspapers which were published on Wednesday morning; and the clippings arrived here just as fast as airmail could bring them.

Mr. President, I think there is ample in this showing alone to make every Senator wonder what we have come to, when we cannot rely upon the existence of exacting responsibility on the part of Americans who head great and supposedly responsible organizations such as the Columbia Broadcasting System.

LEGISLATIVE PROGRAM

Mr. KUCHEL. Mr. President, I should like to inquire of the distinguished majority leader about the business of the Senate next week.

Mr. MANSFIELD. Mr. President, in response to the question asked by the distinguished acting minority leader, I wish to state that it is the intention to bring up, on Monday, certain nominations; also Senate bill 107, the so-called San Juan-Chama project bill, which passed the Senate—unanimously, I believe—last year; and the supplemental appropriation bill, which today was reported to the Senate by the chairman of the Appropriations Committee, the senior Senator from Arizona [Mr. HAYDEN].

Mr. KUCHEL. Both of them will be taken up on Monday, will they?

Mr. MANSFIELD. That is the intention.

It is further my understanding that the Finance Committee will, on Monday, consider the extension of the Sugar Act, and will very likely report it on Tuesday. It is our hope to bring it up Wednesday and complete action on it, through conference, on Thursday.

It is the intention, if we pass the proposed legislation announced for Monday, to go over from Monday to Wednesday. If the proposed legislation is not passed, we will meet Tuesday.

There will not be any token sessions next week, so I think the Senate ought to be on notice that we will be doing business until the afternoon or evening of Thursday next, and the Senate can anticipate returning to do business by the following Monday.

Mr. KUCHEL. I thank the Senator.

Mr. MANSFIELD. Mr. President, in further response to the question raised by the distinguished acting minority leader, I should like to point out that there is on the calendar just one bill, S. 107, the so-called San Juan-Chama project bill. There is before us on the Executive Calendar just one nomination. So I would express the hope that the appropriate committees would see to it that all the legislation that is before them for consideration will be reported to the Senate, if that is the desire of the committees concerned, so the Senate can act on all important measures.

I understand, of course, that there are difficulties attached to some of the bills. Further hearings are needed. It is my understanding the Senate Labor and Public Welfare Committee is waiting for the House to complete action on the minimum wage bill. I would hope that soon thereafter the Labor and Public Welfare Committee of the Senate will take up for consideration the bill reported to it by the subcommittee, so we can bring it to the floor for consideration.

I would hope also, after the recess, we could get to the aid to education bill, which I understand has been completed so far as hearings are concerned, in the subcommittee, and should follow the minimum wage bill for consideration, in that order.

Mr. KUCHEL. I thank the Senator. In connection with the item remaining on the Executive Calendar, namely, the nomination of Raphael M. Paiewonsky to be Governor of the Virgin Islands, could the Senator indicate on what day next week that nomination might be before the Senate for debate?

Mr. MANSFIELD. Monday.

Mr. KUCHEL. I thank the Senator.

OFFERING OF PRAYER BY REV. GEORGE J. BACOPULOS

Mr. KEATING. Mr. President, the Senate has been distinctly honored today with the presence of Rev. George J. Bacopulos, director of interchurch relations, Greek Orthodox Archdiocese, of New York City.

It is particularly significant that Father Bacopulos appeared here today when we realize that March 25, 1961, marks the 140th anniversary of Greek independence.

The impact of Greek philosophy, literature, art, and politics has contributed immeasurably to the American way of life and to our patterns of government.

The contributions of modern-day Greece to the world community is substantial and widespread. Our two nations stand against the tyranny of communism.

Greece's efforts in working toward the goals of NATO and her stand against Communist aggression are known by all.

Millions of Americans have come to this Nation from Greece. They have made good Americans. The ties of friendship and cooperation between our two nations are greatly strengthened and enhanced by these ancestral bonds. The future of American relations with Greece is bright indeed.

I think it is appropriate to call attention to the anniversary in connection with the inspirational prayer which Father Bacopulos gave us this morning.

Mr. KUCHEL. Mr. President, I share the sentiments and the feelings which were so well expressed by the distinguished Senator from New York with respect to our visitor this morning, the representative of the Greek Orthodox Church, in the expressions which he used in the prayer opening today's session of the Senate.

AWARD OF YOUNG AMERICAN MEDALS FOR BRAVERY

Mr. KUCHEL. Mr. President, yesterday the Senators from Georgia and the Senators from California and Representatives of the Georgia and California delegations in the House of Representatives were invited to a unique and moving ceremony at the White House. There the President presented to a young lady from San Francisco, Calif., and to a young man from Brunswick, Ga., Young American Medals for Bravery.

Under a law which the Congress adopted several years ago, a panel, headed by the Attorney General of the United States, makes recommendations for the award to young Americans for bravery.

Senators perhaps will remember the story of almost unbelievable gallantry and intrepidity which was reported in the press in the spring of 1959, when a young school girl in my State, swimming with young friends in the bay off San Francisco, saw there were sharks in the area. Her young friend told her to swim back to shore. She started to do so, but looked around and saw him being attacked by a shark. With utter and complete disregard for her own safety she turned and swam back to her friend. One of his arms had been nearly ripped off at the shoulder by a shark. She nevertheless was able, with great effort, to bring him in to the shore, where, regrettably, he passed away shortly thereafter.

The President awarded Miss Shirley Frances O'Neill of San Francisco one of the two Young American Medals for Bravery.

It was rather thrilling and moving, Mr. President, for us to listen also to the comments of the Attorney General of the United States with respect to the recommendation for a similar award to Mr. Donald Eugene McGregor of Brunswick, Ga. This young man was working as the first mate on a charter fishing vessel which came across another craft in distress, having run aground. With no thought of his own personal safety he left the vessel to which he was attached and went to the craft which was in distress. Subsequently, in a sudden squall, that craft turned on its side and began breaking up. The people on the vessel, including two young children, were placed in lifejackets, except the father, who had a small cushion seat preserver. Mr. McGregor assisted the members of the family in their endeavor to reach an island some 3 miles away, and when the group was halted by the current he was able to swim to the shore, and by running and swimming along the shore he reached a shrimp boat, which radioed for help. He then returned to aid the family, which had reached the island when the tide had changed. By virtue of his splendid efforts, a rescue was completed approximately 12 hours after the vessel had run aground.

The President of the United States, in awarding the medals, indicated the pride of the Nation with respect to the attributes of courage and of selflessness. He spoke eloquently, I think, Mr. President. It is a mark to which all of us pray we collectively and individually may aspire. Surely it was a unique occasion to see the families of these two gallant young Americans, including the two young children who were rescued by the young man from Georgia, given recognition by the Chief Executive of our land for episodes of gallantry which will live in the history of this Nation.

ADJOURNMENT UNTIL MONDAY NEXT

Mr. KUCHEL. Mr. President, as a further mark of respect to the memory of the late Senator James E. Murray, I move, pursuant to the previous order, that the Senate stand in adjournment until noon on Monday next.

The motion was unanimously agreed to; and (at 3 o'clock and 22 minutes p.m.) the Senate, pursuant to the previous order, as a further mark of respect to the memory of the late Senator James E. Murray, adjourned until Monday, March 27, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 24, 1961:

NATIONAL LABOR RELATIONS BOARD

Gerald A. Brown, of California, to be a member of the National Labor Relations Board for the remainder of the term expiring August 27, 1961.

Gerald A. Brown, of California, to be a member of the National Labor Relations Board for a term of 5 years expiring August 27, 1966.

U.S. DISTRICT JUDGE

Reynaldo G. Garza, of Texas, to be U.S. district judge for the southern district of Texas, vice James V. Allred, deceased.

U.S. ATTORNEYS

W. Arthur Garrity, Jr., of Massachusetts, to be U.S. attorney for the district of Massachusetts for a term of 4 years, vice Elliot L. Richardson.

DEPARTMENT OF THE AIR FORCE

Joseph Scott Imirie, of New York, to be an Assistant Secretary of the Air Force.

IN THE ARMY

The following-named officers to be placed on the retired list in the grades indicated under the provisions of title 10, United States Code, section 3962:

To be general

Gen. Carter Bowie Magruder, O15155, Army of the United States (major general, U.S. Army).

To be lieutenant generals

Lt. Gen. Emerson Charles Itschner, O15516, Army of the United States (major general, U.S. Army).

Lt. Gen. Robert Milchrist Cannon, O16163, Army of the United States (major general, U.S. Army).

Lt. Gen. Thomas Leonard Harrold, O16051, Army of the United States (major general, U.S. Army).

Lt. Gen. Gordon Byrom Rogers, O15620, Army of the United States (major general, U.S. Army).

Lt. Gen. John Albert Dabney, O16602, Army of the United States (major general, U.S. Army).

The following-named officers under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in rank as follows:

Lt. Gen. Guy Stanley Meloy, Jr., O16892, Army of the United States (major general, U.S. Army), in the rank of general.

Maj. Gen. Andrew Thomas McNamara, O17324, U.S. Army, in the rank of lieutenant general.

Maj. Gen. John Knight Waters, O18481, U.S. Army, in the rank of lieutenant general.

Maj. Gen. Hugh Pate Harris, O18518, Army of the United States (brigadier general, U.S. Army), in the rank of lieutenant general.

U.S. ATTORNEYS

Raymond J. Pettine, of Rhode Island, to be U.S. attorney for the district of Rhode Island for a term of 4 years, vice Joseph Mainelli.

U.S. MARSHAL

Olin N. Bell, of Missouri, to be U.S. marshal for the eastern district of Missouri for a term of 4 years, vice Omar L. Schnatmeier.

U.S. ATTORNEY

John F. Quinn, Jr., of New Mexico, to be U.S. attorney for the district of New Mexico for a term of 4 years, vice James A. Borland.

U.S. MARSHAL

Anson J. Anderson, of North Dakota, to be U.S. marshal for the district of North Dakota for a term of 4 years, vice Harry R. Tenborg.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 24, 1961:

DEPARTMENT OF THE INTERIOR

Frank P. Briggs, of Missouri, to be Assistant Secretary for Fish and Wildlife, Department of the Interior.

INTERSTATE COMMERCE COMMISSION

John W. Bush, of Ohio, to be an Interstate Commerce Commissioner for the remainder of the term expiring December 31, 1964.

William H. Tucker, of Massachusetts, to be an Interstate Commerce Commissioner for the remainder of the term expiring December 31, 1967.

U.S. COAST GUARD

The following U.S. Coast Guard officers for promotion to the permanent rank indicated in the U.S. Coast Guard:

To be rear admirals

Capt. Donald M. Morrison
Capt. Ned W. Sprow
Capt. Irvin J. Stephens
Capt. James A. Alger, Jr.

COAST AND GEODETIC SURVEY

Subject to qualifications provided by law, the following for permanent appointments, to the grades indicated, in the Coast and Geodetic Survey:

To be lieutenant commanders

Edwin K. McCaffrey
Richard H. Houlder

To be lieutenants

Robert W. Franklin
Sidney C. Miller
Ronald M. Buffington

To be lieutenants (junior grade)

Clifford W. Randall	Arthur H. Goldberg
David F. S. Galloway III	Paul D. Montjoy, Jr.
	Charles H. Nixon
Renworth R. Floyd	Melvin E. Jones
Richard I. Greene	John T. Maldari
Richard F. Dudley	Melvin J. Umbach
Joe P. Pennington	Ernest E. Brown
Robert L. Sandquist	Meinrade H. Schilly
Jerome M. Slackman	Anthony J. DeLuzio
James S. Midgley	Jim L. Piter
Claude B. Carter, Jr.	J. Austin Yeager
James G. LaBastie	W. Paul Yeager
John M. Doherty	John D. Bossler
Larry L. Wilkerson	James H. Blumer
Billy M. Keltner	Charles W. Mathisson

To be ensigns

Richard P. Bertocchi	William C. Page
Paul A. Chernoff	Palmer W. Randall
Jimmy D. Clark	Richard L. Sampson
Albert T. Fulco	Dewaine Seets
Frederick P. Kapinos	Horstas A. Uzpurvis
George Mavridis	

NATIONAL AERONAUTICS AND SPACE COUNCIL

Edward C. Welsh, of Virginia, to be Executive Secretary of the National Aeronautics and Space Council.

WITHDRAWALS

Executive nominations withdrawn from the Senate March 24, 1961:

EXPORT-IMPORT BANK OF WASHINGTON

Tom Killefer, of California, to be First Vice President of the Export-Import Bank of Washington, which was sent to the Senate on March 13, 1961.

James Smith Bush, of Missouri, to be a member of the Board of Directors of the Export-Import Bank of Washington, which was sent to the Senate on March 13, 1961.

HOUSE OF REPRESENTATIVES

FRIDAY, MARCH 24, 1961

The House met at 11 o'clock a.m.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Isaiah 32: 17: *The work of righteousness shall be peace; and the effect of righteousness, quietness and assurance forever.*

Eternal God, our Father, whose presence follows all our days, inspire us to carry on faithfully and without fear when our lives are filled with strain and stress.

May our minds and hearts be touched and transfigured, quickened and purified by Thy divine spirit that we may be more courageous in the great adventures of faith and more diligent in discharging the duties of our high calling.

Grant that we may seek to cultivate a healing sympathy for all who are disturbed and dismayed by the vicissitudes of life and enable them to experience the wonder of Thy grace which never forgets or fails and never forsakes.

Draw us nearer to Thyself in love and loyalty for then shall we be nearer to one another in the unity of spirit, the joy of insight and the sacrament of service.

In Christ's name we pray. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Ratchford, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and a joint resolution of the House of the following titles:

On March 22, 1961:

H.R. 4510. An act to provide a special program for feed grains for 1961; and

H.J. Res. 289. Joint resolution relating to the time for filing a report on renegotiation by the Joint Committee on Internal Revenue Taxation.

On March 24, 1961:

H.R. 4806. An act to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes.

SUBCOMMITTEE ON NATIONAL PARKS

Mr. RUTHERFORD. Mr. Speaker, I ask unanimous consent that the Subcommittee on National Parks be permitted to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

THE LATE HONORABLE JAMES E. MURRAY

The SPEAKER. The Chair recognizes the gentleman from Montana [Mr. OLSEN].

Mr. OLSEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. OLSEN. Mr. Speaker, Montana has sent some great men to Washington, D.C., who have contributed greatly to the general welfare and the progress of the Nation. One of the greatest of these men was James E. Murray, for a quarter of a century U.S. Senator from Montana. He died yesterday at his home in Butte, Mont. All of us who knew him mourn his passing.

However, we rejoice in the many living monuments to his memory. Living in the law of these United States of America are many monuments to the memory of former Senator Murray. He was a great apostle of the New Deal. He pioneered the old frontier of social security, public housing, public power, and fair employment standards.

I think it is a great tribute to his work in the Congress and to his colleagues that they erected so well that upon the foundation laid by them in the social and economic field, we are today building and extending.

I think it is significant that in the last weeks and days we have been talking of a floor under the price of the farmer's products and a floor under the wages of the wage earner, and that in no instance has there been any contention to destroy the progress of the past; but that in every instance there were offered proposals to extend and improve upon the pioneering work of such men as Senator Murray. He championed always the cause of the underdog.

I know, too, that there are proposals on both sides of the House of Representatives, proposals on both sides of the U.S. Senate, new proposals for health insurance, new proposals for Federal aid to schools. In both of these fields James E. Murray was a pioneer.

There is a great lesson in his life for me and I think for all of you, my colleagues. His program of good deeds for his fellow man lives on to perpetuate fond memories of him and his good life. Those who opposed his programs, those who opposed progress, leave no living monuments, and they are forgotten.

I recollect out of the Good Book the Christ on the Mount of Olives in the discourse to his Disciples, that when He was hungry He was fed, thirsty, He was given drink, naked, He was clothed, a stranger, He was taken in, in prison He was visited, sick, and He was ministered to. James E. Murray was one who did administer unto the Lord. I am sure he was one of whom the Lord spoke when He said that on judgment day there would be divided the sheep on the right and the goats on the left, "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me." Such a one was James E. Murray.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. OLSEN. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I would like to express my appreciation to the gentleman for his eloquent tribute to a great American. I think Senator Murray was one of the finest friends the American workingman, particularly the miner of America, has ever had in the Congress of the United States. He was a giant among statesmen who labor here in Washington. I know that his many friends join in expressing their deepest sympathy to his family.

Mr. OLSEN. I thank the gentleman.

Mr. Speaker, the following article concerning James E. Murray appeared in the Washington Post this morning, Friday, March 24, 1961:

EX-SENATOR MURRAY, NEW DEAL APOSTLE, DIES IN MONTANA

(By Rasa Gustaitis)

James E. Murray of Montana, one of the pioneers of the New Deal and a stanch fighter for the underdog during a powerful 26-year career in the Senate, died yesterday in the mining city of Butte, where his political lifework began. He was 84.

For a quarter of a century Senator Murray worked for social security, public housing, public power, fair employment standards, health insurance, and Federal aid to schools.

He retired last spring after first filing for nomination to a fifth 6-year term and then withdrawing, to be replaced by Democrat LEE METCALF of Helena.

At least two of Senator Murray's major projects—a bill for the independent development of the Missouri Valley Authority and the Full Employment Act of 1946, have been called the foundation stones in the postwar plans of liberal Democrats.

He was the sponsor of bills for social security-financed health insurance, battling fiercely with the American Medical Association. He championed the statehood bills for Alaska and Hawaii.

During his last session in the Senate, the controversial Murray-Metcalf bill for Federal aid to education, which was close to that of the present administration, came to a vote in the Senate and failed.

Senator Murray was considered by labor to hold a near-perfect voting record. In 1951 the Congress of Industrial Organizations presented to him the Philip Murray Award as "one of the country's outstanding liberals."

Conservation was an area he was concerned with throughout his career. In 1958 he wrote a Christmas Eve letter to President Eisenhower, warning that the United States was "rapidly losing out to the Communist leaders in the vital area of river development which is prerequisite to economic, industrial, military, and national strength."

This same interest also made him a longtime defender of Washington's parks, especially Rock Creek Park, against superhighways. He also introduced a bill to preserve Lafayette Square as a national historic site.

Senator Murray has been described as a "soft-spoken, gentle, and modest soul utterly devoid of the bluster and brass one finds on Capitol Hill." Yet his eyes, set under a broad brow in his sensitive face, were known to glint with anger as he fought for his social measures.

When he retired, he was chairman of the Senate Interior Committee, high-ranking member of the Labor and Public Welfare Committee, and a member of the Senate Democratic policy committee. His tenure was exceeded by only three persons, and in age only Senator Theodore Green, Democrat of Rhode Island, who was 92, surpassed him.

He was born in Canada and graduated from the New York University Law School, was admitted to the Montana bar in 1901 and since then had maintained a law practice in Butte.

The Senator is survived by five sons, Federal Judge William D., Butte; Charles A. Murray, who served as his administrative assistant; James A., Edward E., and Howard A. Murray.

Mr. Speaker, I ask unanimous consent that all Members who may desire to do so may extend their remarks at this point in the RECORD regarding the late James E. Murray.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mrs. PFOST. Mr. Speaker, I rise to add my voice to those honoring the memory of the late James E. Murray, the former Senator from Montana, whose lifework on behalf of the American people added a distinguished chapter to the saga of American politics.

The late Senator Murray, whom I knew and respected as a personal friend, passed away yesterday in the mining city of Butte, Mont., at the age of 84, where his brilliant career in politics began at the turn of the century.

He was a pioneer in the field of social legislation. He worked diligently for many years on behalf of social security, public power, fair employment standards, health insurance, education, and housing. It was through his efforts on the Senate side that statehood bills for Hawaii and Alaska were finally approved by that body.

But most of all, and particularly for us of the Northwest, he stood as a longtime fighter in the cause of conservation. On a number of occasions, I had the opportunity to work with him in this field and I know how deeply he felt about conservation in terms of the present and the future for America. He championed such causes as the Tennessee Valley Authority and he was long an ardent spokesman for proper river development. In fact, his farsighted bill for the independent development of the Missouri River under a Missouri Valley Authority was hailed as one of the foundation stones in the long-range program of liberal Democrats.

Senator Murray was a friend of the people. His efforts in social legislation have benefited millions of Americans, and will continue to do so as a living monument to his greatness and historic stature. He walked this earth with quiet dignity and it is a better place for his having been here.

He will be remembered as one of the truly great men of this era—a man dedicated to public service in the finest tradition.

Mr. ASPINALL. Mr. Speaker, yesterday the Nation lost one of its great men—former Senator James E. Murray of Montana—whose life was filled with achievements in public service. It was with sadness and a deep sense of personal loss that I heard of his passing. It was my privilege to work closely with him on problems and legislation involving our Western States. There was a fine working relationship between the Senate Committee on Interior and Insular Affairs of which he was chairman from January, 1955, to the time of his retirement last January, and the House counterpart committee which I am privileged to chairman.

Jim Murray's achievements lie in many fields. I am most familiar with his achievements in those fields in which our two committees have jurisdiction and responsibilities.

Jim Murray's name will always be associated with the development and expansion of the West. He recognized the importance of our natural resources and fought for their conservation. By his influence in the Congress, he translated his concern for our resources into national policies.

He devoted hard work and constant effort in seeking to promote the wise use of our forest and range resources. He insisted on the submission to the Congress of long-range programs. He showed a constant interest in resource management and sponsored legislation to accelerate reforestation programs. He fought for adequate appropriations for development of our national forests.

There was no greater friend or supporter of our Federal reclamation program than Jim Murray. He constantly and continually fostered legislation having as its purpose the expansion of this program and the establishment of sound policies. He recognized the great contribution of these developments to a strong national economy. He supported flood control programs and full development of our water resources for all purposes including electric power. He authored the legislation which set in motion an extensive national study of our water resources and their relationship to our national needs.

During the last several years that the domestic mining industry has been in dire circumstances, Senator Murray recognized that something should be done to stabilize the industry and he fought vigorously to promote the industry's interests.

The residents of our 49th and 50th States owe Jim Murray a debt of gratitude for his great efforts in their behalf. He was an ardent advocate of statehood and it was due in large measure to his influential leadership that Alaska and Hawaii were admitted to the Union.

He was a great friend of our Indian citizens and he labored tirelessly in their behalf.

He recognized the needs of our future generations for recreational areas and sponsored legislation which established the Outdoor Recreation Resources Review Commission to study this problem.

Jim Murray's many and great contributions to this Nation will long be remembered and will serve as inspiration for future generations.

Mr. BATTIN. Mr. Speaker, I would like to join in the remarks of my friend Mr. OLSEN, of Montana, and pay tribute to the late Senator James E. Murray, of Montana. The Senator had a long and distinguished tenure of office and worked hard for the people of Montana and the Nation. For some 25-odd years the people of our great State elected him to represent their interests. He distinguished himself in many ways and was well respected by all who knew him. I was not always in accord with his views but never have I questioned his intentions. After a long and full life he has been called to a new life. With the knowledge of a full and useful life we bid him goodby and to his remaining family I extend my personal sympathy.

Mrs. HANSEN. Mr. Speaker, as a Member of Congress from Washington, one of Montana's western neighbors, I should like to join the Honorable ARNOLD OLSEN, of Montana, in paying tribute to the late Honorable James E. Murray.

He was one of the West's and this Nation's greatest statesmen who not only served the people of his own State but of all States with great courage.

Mr. GEORGE P. MILLER. Mr. Speaker, former Senator James Murray was as rugged as the mountains of his beloved Montana and as sturdy and constant as those mountains in the interests of those things in which he believed.

Jim Murray fulfilled Kipling's definition of "A Man." "He could walk with kings, yet not lose the common touch."

Jim Murray was unselfish and dedicated. From the heights of great wealth he charged into the battle on the side of the "little people." He was on the side of the aged, the sick, and the poor.

Senator Murray's long and continuing fight to improve education is now about to meet with success. He pioneered in this field and the America of the future will be the beneficiary of his dogged determination to bring a high level of education to all of our people. In this he followed in the footsteps of the great Jefferson.

We all remember the vigorous and intelligent fight he made to bring medical services to all the people at a price within their reach.

Senator Jim has passed on but he has left to his beloved America a rich and valuable heritage.

Mr. PATMAN. Mr. Speaker, I am grieved in the passing of my beloved friend and coworker, Senator James E. Murray. He was a statesman of this generation who has left a lasting beneficial effect upon his country, upon the work of the Congress, and of the Government. His championship of great causes has lifted us toward possible democratic achievement which can assure a continuing high level of accomplishment in behalf of mankind.

It was my good fortune to become intimately acquainted with Senator Murray when we shared sponsorship for the establishment of the Small Business Committees whose record has been so outstanding over the years since 1940.

Both of us had been struck with the tremendous and rapid growth of corporations to a point where their power was crushing the very life out of the Nation's main street businesses and independent factories which had been the seedbed of individual competitive enterprise. The work of our predecessor, the Temporary National Economic Committee, under the leadership in this House of our revered fellow Texan, Hatton Summers, had shown us the dangerous extent of the concentration of economic power which was no minor cause of the great depression. In that depression business failures were mounting by the hour as one firm after another lost its lifetime savings and shut its doors.

It was then that Franklin D. Roosevelt looked with such favor on the efforts of Senator James E. Murray and myself when we launched the proposal to establish a select committee in each House of Congress which would champion the rights of small business in those chaotic days.

The Congress chose to place confidence in our proposals and we began our work. Then came the war, and with it the efforts of the giant corporations to set up their own way of handling war contracts and war goods, and of determining the ways in which civilian enterprise and needs would be met.

Again, Senator Murray and I joined forces, and the Smaller War Plants Corp. came into being after our Small Business Committee hearings had proven the need for special consideration. The splendid record of many thousands of small and independent businesses during the war is lasting testimonial to the foresight of the Congress in acting upon our proposal.

There followed the establishment of the Small Business Administration as a continuing service agency for small and independent businesses. We are only now becoming aware of its importance as it is infused with new and vigorous leadership. For this agency is an essential aid to small business in its struggle to survive and grow in a world surrounded by powerful corporate bodies and in a market characterized by managed prices and monopoly practices.

So much for the leadership of our good friend Senator James E. Murray in behalf of small and independent business—the historic source of our economic strength and power today. For, as he so well said on more than one occasion, if we ever allow independent business to disappear, we will lose the force of new enterprise, new ideas, new investment and new leadership so necessary to preserve and strengthen competition in our economy.

But Senator James E. Murray's interests are catholic. He was a great and dedicated humanitarian. He came into the U.S. Senate during the depression and had been Montana's director of public works before that. He was intimately aware of the plight of jobless people during this time. He early teamed with others of us in the antidepression program of our great President Franklin D. Roosevelt to meet the needs of these people. He was one with us in developing the public works program which gave these people jobs and the earnings from endeavors which have ever since proved useful, building schoolhouses, roads, sewers, water systems, forest and other conservation practices.

The Senator knew whereof he spoke when he pleaded for a continuing public works effort to develop and conserve our dwindling national resources. For he came from the great West, from Montana where the Big Muddy had been draining the rich topsoil from the land and carrying it southward into the Mississippi for generations. It was natural that Senator Murray should study our successful experience in the Tennessee Valley and propose his Missouri Valley Authority as a result. I was among those who shared his enthusiasm for river basinwide development programs, and while he did not accomplish all he started out to do, he quickened the interest of the Nation in this approach which will never end until the resources of our river valleys are treated as a unity just as nature itself intended they should be.

Senator James Murray and I discussed many a time the inadequacies of our monetary policies and banking practices, the excessive high interest rate which was slowing down investment and home building, and making impossible the con-

servation practices that alone will prevent us from being a have-not nation. He and I shared the same views concerning the necessity of establishing a national economic budget and the Council of Economic Advisers. The Full Employment Act of 1946 came out of the deliberations of our committees probably more than from any other source. I need not tell this Congress what the enactment of that law has meant and will mean in the future for the welfare of this Nation and its people. As chairman of the Joint Economic Committee, I am reminded over and over again of the statesmanship Senator Murray displayed in first advocating passage of the law underlying this entire sphere of government.

So much for the Senator's public achievements. There were many more. But the recital all comes to the same point, the lifetime service of a farsighted man dedicated to the public service, working constantly in behalf of his Nation and his people. We will long remember him as a man, as a kindly and unassuming friend, as a leader of fearless courage and practical liberalism. He is in the great tradition of great Americans.

Mr. DINGELL. Mr. Speaker, all who knew him and millions who owe a debt of gratitude to the late Honorable James Murray mourn his passing.

As the son of one who cosponsored with Jim Murray and pioneered much legislation to benefit and improve the lives of our sick, aged, infirm, and as one who admired, revered, and respected a great leader in liberal causes from my young boyhood, I feel his death with particular keenness.

The monument which Senator Murray built in his long life will endure in the hearts of his people, in the great legislation he sponsored, and in the good he did for millions. Medical care, hospitalization, social security, conservation of wildlife, woods, waters, the public lands, and our other priceless resources bear the stamp of his great character, of his devotion to the public wealth, and of his hard work for these and other great causes.

I pray that this great champion of liberal causes will find the peace and rest in the arms of his Creator which great endeavors have so richly merited. May he rest in peace and may his memory shine on in the minds and hearts of the people of America who he served so long and well.

Mr. O'NEILL. Mr. Speaker, it is with a deep sense of personal loss that I add my tribute to the late James E. Murray of Montana, a splendid public servant and a revered former Member of the U.S. Senate.

I have always sincerely admired his magnificent courage, his abiding interest in the less fortunate of our land, and his warm pleasant manner. He was truly a gentleman and yet a tremendous fighter for those things he believed to be right. As a Democrat I am more than proud of the wonderful record of accomplishment which he leaves behind him. Our country was fortunate to have a man of his ability and charm to grace the Congress of the United States and it is a better place for his having shared himself with us. To his sons, their families, and his many, many friends I extend my heartfelt sympathy.

Mr. HARDING. Mr. Speaker, I want to join with the other Members of the House today in expressing my regret at the passing of the grand old man of the Senate Interior Committee, Senator Murray, of Montana.

The fact that our neighboring State of Montana sent him to the Senate for five consecutive terms indicates their high regard and affection for Senator Murray.

The Senator was known particularly for the Full Employment Act of 1946 and his bill for the independent development of the Missouri Valley Authority.

And in the West we revered him as a strong exponent of timber, reclamation, and mining development.

To Senator Murray also goes the credit for proposing a Senate committee to deal exclusively with the problems of small business which was later duplicated in the House. These committees were vital in saving many small businesses from bankruptcy during the 1940's.

Few leave behind them such a distinguished record of public service. We will miss him.

Mr. PATMAN. Mr. Speaker, I am inserting herewith a statement by Mr. Dewey Anderson concerning the passing of Senator James E. Murray, of Montana. It is as follows:

Senator James E. Murray's death ended a career of singular effectiveness. He had the rare ability of being able to entertain new ideas, and associating with people who generated them.

In a day when all too few Senators had staffs and let them have their heads, Jim Murray welcomed outside help and knew how to use it. The result was a record which put him up alongside such great and long remembered Senators as George Norris, Robert Wagner, and the senior Bob La Follette. He is among these men for another important reason. He put his good mind and tenacity of will to work on major issues of public concern and sought no early or easy victory.

Look at the record—he and his associates developed the Full Employment Act of 1946 all the way from a nebulous idea to its enactment into law. Walter Lippmann gave it high place as probably the most significant piece of domestic legislation in this generation. Because of the prominence given the pronouncements of the President's Council of Economic Advisers established under this law, we now see an administration translating into public policy sound economic principles concerning fiscal and monetary practices than can lead to recovery and growth of the Nation.

It was Senator Murray who called in Morris L. Cooke and a number of us to shape up the Missouri Valley Authority proposal, modeled after the TVA. While it ultimately failed of passage, the hearings, writings, and speeches it produced implanted the conservationists' idea of the unity of a river valley so that no agency of Government can any longer ignore all its potentialities. Such was the soundness of his approach that the proposal for comprehensive river valley development does not die despite the interstate compacts and efforts of rival development agencies to keep their domains separate. His espousal of the MVA resulted in a quickening of the efforts of the Army Engineers and Bureau of Reclamation to develop the great dams on the main stem of the Missouri.

Senator Murray's first venture in a broad field of interest which he maintained to the end of his life was as founding father of the Small Business Committee. As a wealthy capitalist, he had been hurt by the ruthlessness of corporate big business and banks during the depression. So, on coming to the Senate, he took a great interest in our work in the TNEC. His conversations with me turned on the need for special consideration of independent and small business.

The resolutions to establish the select committee followed, and at one stage it was my pleasure to work directly with him as his committee secretary. The Small Business Committee was responsible for the fact that small business made such a singular contribution to the war effort. In the creation of the Smaller War Plants Corporation, and subsequently in the Small Business Administration in which Senator Murray was joined by others, the way was found for saving literally thousands of independent businesses from failure.

The list of "firsts" for Senator Murray was long. Not only in laws enacted, but also in pointing the way to the future. When the first postwar recession hit and youth suffered much unemployment, he got agreement from the Government agencies and the President to seek reestablishment of the Civilian Conservation Corps on a permanent basis, something which Senator HUBERT HUMPHREY is likely soon to see accomplished.

He teamed with Senator Robert Wagner and Congressman John Dingell in their pioneering effort to provide health and hospital insurance.

As chairman of the powerful Labor and Education Committee, he steered a statesman's course between conflicting interests, and prevented passage of the vicious Hartley predecessor to the Taft-Hartley law. When that measure appeared inevitable, it was James Murray and Senator Claude Pepper who cut it back in the committee and on the floor of the Senate, then established a watchdog committee to observe its operations and lead to its amendment. Senator Murray never became reconciled to the Taft-Hartley amendment of the Wagner Act which he regarded as the Magna Carta of labor.

As chairman of the Interior and Insular Affairs Committee, Senator Murray maintained his lifelong concern about natural resources. His sponsorship of the wilderness bill has placed him in the highest ranks of conservationists.

Right up to the very end of his public career, Senator Murray was receptive to new ideas and the champion of new causes. He saw the need of preventing recessions, and urged the strengthening of the role of the Council of Economic Advisers in this direction, something already underway in the new administration.

In the last year of his life, Senator Murray offered a bill to establish a Council of Resource and Conservation Advisers to plan for the wise development, use and conservation for future generations of our dwindling natural resources. It was endorsed by a large number of Members of Congress, accepted by the Democratic Party and its candidates and is now before the Congress for action.

No circus showman, Senator Murray performed his great feats of leadership through day-by-day application to his tasks, and through the chairmanship of a thinking group of people, who clustered around him well knowing that what they had of merit to offer this unassuming man would receive his attention and stand a better than fair chance of becoming law. As one of that

group, I gladly pay tribute to this effective public servant.

Mr. McCORMACK. Mr. Speaker, last Thursday, a friend of mine for many years died in Butte, Mont. He was one of the most famous liberal Members the U.S. Senate has ever had, and his name was James E. Murray. He represented his State in the Senate for more than a quarter of a century.

Though the Senator spent most of his life serving Montana and the United States, he was born May 3, 1876, in Canada on a farm near St. Thomas, Ontario. His parents, who were Irish immigrants, were Andrew James Murray and Anna Mary (Cooley) Murray. In 1897, when the Murrays moved to Butte, the Senator's uncle, whom the Senator was named after, sent "Young Jim" to New York to study law. The young Canadian became an American citizen, took his LL.B. at New York University Law School in 1900, and an LL.M. in 1901. After graduation, the Senator returned to Butte, which in those days was one of the roughest towns of the West, and started to practice law. A couple years later, in 1905, he married the former Viola E. Hogan, who is now deceased, and raised a large family.

The Senator's first elective office was county attorney of Silver Bow County; he was elected when 30 years old, and served from 1906 to 1908. For the next two decades, the Senator, always a retiring man, led that sort of life. As his uncle grew older, the Senator handled more and more of his affairs, and eventually inherited his uncle's wealth, which was largely in mining investments.

Though a man of means, Senator Murray was a liberal who strongly supported New Deal legislation. His first formal political job was chairman of the Montana advisory board of the Public Works Administration in 1933. He was first elected to the U.S. Senate in 1934 to fill the unexpired term of the late Senator Thomas J. Walsh, and soon achieved fame as the author and champion of social welfare legislation that aided factory workers and small businessmen alike.

In 1938, he led a vigorous fight for the Fair Labor Standards Act, and in 1946, he sponsored the Full Employment Act of 1946, which Walter Lippmann called "one of the most significant enacted by Congress in this century." He worked for a higher minimum wage, aid to farmers, and Federal assistance in public health. He sponsored the Indian Sanitation Act of 1959, was a strong backer of a Youth Conservation Corps, and was coauthor of the Murray-Metcalf bill, during the 86th Congress, for Federal aid to education. He was also stanchly for public power legislation and conservation and was publicly critical of the Eisenhower administration's reclamation programs.

Murray was a close friend of organized labor while in the Senate. In 1947 he voted against the Taft-Hartley Act and in 1959 voted against the McClellan "bill of rights" to the labor reform bill. In 1951, the Congress of Industrial Organizations presented to him the Philip Murray Award as "one of the country's outstanding liberals."

When he retired from the Senate in January, he was chairman of the Senate Interior Committee, a high-ranking member of the Labor and Public Welfare Committee, and a member of the Senate Democratic Policy Committee.

Montana, the land where the Great Northern Plains and mountains meet, will long remember this quiet, purposeful man.

CALL OF THE HOUSE

Mr. VAN PELT. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ROOSEVELT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 26]

Ashley	Findley	Miller, N.Y.
Bow	Gray	Rabaut
Buckley	Harvey, Ind.	Thompson, La.
Cahill	Kilgore	Watts
Celler	Landrum	Wright
Coad	McDonough	Zelenko

The SPEAKER. On this rollcall 413 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

BUDGET AND FISCAL POLICY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 120)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

I. BASIC FISCAL POLICIES

This administration intends to adhere during the course of its term of office to the following basic principles:

(1) Federal revenue and expenditures levels must be adequate to meet effectively and efficiently those essential needs of the Nation which require public support as well as, or in place of, private effort. We can afford to do what must be done, publicly and privately, up to the limit of our economic capacity—a limit we have not even approached for several years.

(2) Federal revenues and expenditures—the Federal budget—should, apart from any threat to national security, be in balance over the years of the business cycle—running a deficit in years of recession when revenues decline and the economy needs the stimulus of additional expenditures—and running a surplus in years of prosperity, thus curbing inflation, reducing the public debt, and freeing funds for private investment.

(3) Federal expenditure and revenue programs should contribute to economic growth and maximum employment within a setting of reasonable price stability. Because of the limits which our balance of payments deficit currently places upon the use of monetary policy, especially the lowering of short-term interest rates, as a means of stimulating economic growth and employment, fiscal policy—our budget and tax policies—must assume a heavier share of the responsibility.

(4) Each expenditure proposed will be evaluated in terms of our national needs and priorities, consistent with the limitations and objectives described above and compared with the urgency of other budgetary requirements. We will not waste our resources on inefficient or undesirable expenditure simply because the economy is slack—nor, in order to run a surplus, will we deny our people essential services or security simply because the economy is prosperous.

(5) As the Nation, its needs and their complexity continue to grow, Federal nondefense expenditures may also be expected to increase, as predicted by a 1960 Bureau of the Budget study, and as indicated by the nearly 45 percent increase from fiscal 1953 to fiscal 1961 in expenditures other than national security. But we must not allow expenditures to rise of their own momentum, without regard to value received, prospective revenues, economic conditions, the possibilities of closing out old activities when initiating new ones, and the weight of current taxes on the individual citizen and the economy. It is my determined purpose to be a prudent steward of the public funds—to obtain a dollar's worth of results for every dollar we spend.

II. THE FISCAL 1961 BUDGET INHERITED BY THIS ADMINISTRATION

While this message is concerned primarily with the budget for fiscal 1962 now before the Congress, necessary perspective and background are supplied by a reexamination of the fiscal 1961 budget, adopted by the Congress last year, reviewed in my predecessor's January budget message and inherited in its final stage by this administration.

When originally submitted in January of 1960, the fiscal 1961 budget showed a surplus of $4.2 billion. By the time of the midyear budget review, the estimated surplus had shrunk to $1.1 billion. In the final budget message in January, it was estimated to be less than $80 million. Without any change in substantive content or policy, that budget upon later examination proved to be substantially out of balance. These changes reflect the recession—induced decline in revenues as well as the difficulty always present in making budget and economic forecasts. The January restatement of the 1961 budget, simply in terms of its own programs and estimates and without regard to any new decisions or policies by this administration:

Optimistically estimated fiscal 1961 tax revenues by assuming a much rosier economy;

Unrealistically assumed that the Congress would enact a record, though nec-

essary, postal rate increase totaling some $843 million a year in time to take effect April 1 and provide $160 million additional in the current fiscal year;

Substantially underestimated the normal flow of defense expenditures under the then existing policies and commitments by at least half a billion dollars; and

Similarly underestimated the amount of funds which would be required to pay unemployment benefits to ex-servicemen and Federal employees, to meet the demand for authorized veterans' housing loans, and to fulfill the existing commitments of the Export-Import Bank.

The deficit thus inherited by this administration for fiscal 1961, augmented by the essential antirecession and national security steps already taken or recommended to the Congress, is now estimated to total over $2 billion (in contrast with the $4.2 billion surplus originally predicted). But it must be remembered that fiscal 1961 is clearly a recession year, with all of the consequent effects upon both revenues and expenditures. The deficit of nearly $12.5 billion in fiscal 1959 serves as a recent reminder of the difficulties of balancing the budget in a recession year.

III. BALANCING THE BUDGET FOR FISCAL 1962

On January 30 I made the following pledge to the Congress:

"A new administration must of necessity build on the spending and revenue estimates already submitted. Within that framework, barring the development of urgent national defense needs or a worsening economy, it is my current intention to advocate a program of expenditures which, including revenue from a stimulation of the economy, will not of and by themselves unbalance the earlier budget."

This message is designed to review my recommended budgetary revisions within the framework of that pledge. Omitting any increase in the defense budget too urgent to be denied by budgetary restrictions, and assuming that our review of the economy late in April does not require either a reduction in taxes or additional increases in expenditures, enactment of the new nondefense programs and appropriations I have transmitted will not unbalance the budget previously submitted by my predecessor:

If the Congress enacts or continues in effect all the revenue measures requested in that earlier budget, or preferably the alternative measures that I am requesting to achieve the same amount of revenue;

If that earlier budget contained accurate estimates of the revenue to be produced by those measures, based on accurate assumptions about prospective economic conditions;

If the Congress enacts no spending measures committing the executive branch to outlays in excess of those requested; and

If the earlier budget contained accurate estimates of those expenditures which must necessarily be incurred in fiscal 1962 under existing commitments covered by that budget, regardless of congressional or Executive decisions—for example, entirely apart from any policy changes, a large proportion of the Department of Agriculture budget depends upon the effects of economic, crop and weather conditions which must be predicted in advance.

I have already indicated in my message on the state of the Union that my predecessor's budget for fiscal 1962 "will remain in balance only if * * * an earlier and sharper upturn in the economy than my economic advisers now think likely produces the tax revenues estimated." Nevertheless the present message, and the fiscal 1962 budget revisions it summarizes, are based upon a commitment of balancing revenue and expenditures under an assumption that the January predictions with respect to these four conditions are a valid starting basis for a new administration.

The point I wish to stress in this message is that any budgetary unbalance at the close of fiscal 1962 will not be the result of any nondefense programs I have submitted, for they have been carefully limited to a pattern of expenditures no greater than the revenues estimated by the earlier budget, as supplemented by those additional revenues which enactment of this program can reasonably be expected to stimulate, according to Treasury estimates, in fiscal 1962. Other measures I have requested—such as improvements in unemployment compensation, highway construction, social security, and health insurance for the aged—are all accompanied by their own self-financing provisions. In short, new defense recommendations aside, should there be a deficit in 1962, it will be the consequence of the overestimation of revenues and underestimation of expenditures in the January budget, and not the result of new policies or programs proposed by this administration.

In summary, the total expenditures estimated in the January budget were $80.9 billion. My proposals, apart from defense, will add about $2.3 billion for a total of $83.2 billion. The effects of my economic program on the economy would be reflected in additional revenues of about $900 million which, added to the January budget figures, would make a total of $83.2 billion of receipts, and leave the budget in balance.

At the same time, it would be unrealistic to fail to recognize that the January budget estimate of receipts was overoptimistic. Based on a more realistic economic outlook and including the effect of my economic proposals, it appears more likely that the revenues for fiscal year 1962 will be about $81.4 billion. However, as the economy returns to satisfactory high levels of economic activity, the position of budget balance will be restored. Indeed, given full recovery, the present tax system would generate revenues substantially in excess of the proposed levels of budget expenditure. This, then, is the revised budget—apart from defense additions—that I now present to the Congress:

A budget that is in balance in terms of my pledge of January 30;

A budget that is likely to be in deficit unless economic conditions rapidly improve to meet the levels predicted in the January 16 budget;

A budget that would be in surplus if the economy were operating at or near full potential.

IV. OMISSIONS AND ASSUMPTIONS IN THE PREVIOUS BUDGETS FOR FISCAL 1962

For fiscal 1962, however, the January budget submitted by my predecessor assumed a higher rate of economic activity during this calendar year than is presently in sight, and thus a balanced budget. As already stated, that earlier budget and its assumptions are necessarily the starting point for a new administration. It was on this basis that I made to the Congress on January 30 the commitment quoted earlier in this message.

But before any new programs or budget increases could even be considered by this administration—and wholly apart from the overly optimistic economic assumptions of the January budget—we found upon a closer scrutiny of that budget that it omitted provision for substantial expenditures for which that administration was committed, and was based upon fundamental policy and program assumptions which neither this administration nor the Congress could possibly accept, and which had to be altered at considerable cost to what little budgetary leeway remained.

For example:

(1) The previous administration committed itself, as we have also, to extend $100 million in assistance to Chile for reconstruction and rehabilitation in the wake of a devastating earthquake. But no estimate of expenditures to meet this commitment was included in the budget.

(2) The earlier budget recommended, as I do also, the construction of a new $114 million linear electron accelerator for high energy physics research. But appropriations to initiate this project were not specifically recommended in the budget.

(3) The earlier budget based its estimate of expenditures for the Department of Agriculture's Commodity Credit Corporation on the assumption that price supports on every major commodity would be reduced to the lowest level permitted by law—reductions which were never formally recommended by the then Secretary of Agriculture, which would never be permitted by the Congress and which would have been absolutely ruinous to our farm economy. Without having to actually take such a move, the earlier budget assumed a reduction of cotton price supports from 75 percent to 70 percent of parity, a reduction of milk from 80 percent to 76 percent, rice from 75 percent to 70 percent and peanuts from 78.6 percent to 75 percent. Compared to the average levels of the last 5 years, which indicate how far the former Secretary of Agriculture was actually able and willing to push supports down when in office, these recommendations are down some 9.3 parity points for cotton, 5.5 for peanuts, 2.4 for milk and 7.9 for rice.

(4) The earlier budget recommended a program of Federal aid to public

schools, limited to aid for construction. But, under a highly unusual fiscal proposal, the budget itself included practically no expenditures for this activity. Instead it proposed that States and localities float loans which Federal taxpayers would help pay off through installment payments of school bond interest as well as principal over the next 30 years.

(5) Similarly, aid to higher education was contained in the earlier program, as in mine. But again the effect on that budget was deferred by the device of a 20- to 35-year period of installment payments.

(6) The earlier budget assumed, completely contrary to our urban and economic needs, congressional termination of the Federal farm housing loan programs; no new authority for low-income housing; a cutback in veterans' and college housing loans; and no expansion in urban renewal. In short, before funds could be found to finance new and urgently needed housing programs, merely meeting the needs of existing programs required further additions to the budget.

(7) The Federal Government, under the previous administration as well as this, has an obligation to meet the educational needs of Indian children on reservations. The fact is that several thousand such children in New Mexico, Arizona, and Alaska have been without any schools at all—but wholly inadequate funds to meet this obligation were included in the earlier budget.

(8) The earlier budget proposed that the Congress would cut back sharply on its program for constructing airports, on the electric and telephone loan programs of the REA and on the loan programs of the Farmers Home Administration. I do not believe the Congress would have or should now cut back these essential programs, and I have recommended their expansion.

V. CHANGES IN THE FISCAL 1962 BUDGET

This message is not intended to present a wholly new budget. For reasons already stated that is not possible for this fiscal year. Nor is it intended to propose any new programs or expenditures in the nondefense area. With but a few exceptions, the items covered by this message and the attached table have been previously communicated, with full explanation, to the Congress. This message is primarily intended to share with the Congress my review of the nondefense changes in Federal activities and expenditures already recommended to meet our Nation's needs.

The funds previously recommended for each department and agency have been scrutinized as carefully as time would permit, from the viewpoint of both the needs of the Nation and the adequacy and efficiency with which these needs are being met. With the exception of the national defense program, that review is now largely complete, and the new programs and amendments resulting therefrom have been transmitted to the Congress or will be shortly.

As already emphasized, these changes of themselves will not unbalance the earlier budget; i.e., their cost in fiscal 1962, assuming the accuracy of the previous expenditure estimates, will be covered by the revenue previously estimated and the new revenues generated by the program. But despite this restraint and the further limitations imposed by the assumptions or omissions already mentioned, these changes nevertheless represent what we regard to be advances in areas of high priority. While the entire list is summarized on the attached table, among the most significant are the following:

Aid to education: The largest single increase is in the field of education. Our educational needs have become too urgent to overlook. The Federal Government must do more to help finance improvements in this field—both for elementary and secondary education, and for higher education.

Funds for scientific research: My recommendations, largely in the form of amendments to the 1962 budget, provide a series of increases for scientific research—for oceanography, for high energy physics, for saline water conversion, for medical research, for National Science Foundation grants for basic research and science education, and for various other purposes. These increases reflect my strong belief that advances in scientific research are of the utmost importance to the growth of our economy, to the welfare of our people, and to the preeminence of our scientific achievements, and my conviction that the Federal Government must of necessity play a sizable role in supporting such research.

Health: I have proposed significant measures to strengthen, improve and lower the cost of health care—with self-financed health insurance for the aged under social security at a net savings to the budget, assistance to medical schools and students, and grants to the States for expanded community health services and facilities.

Housing and community development: I have recommended enactment of a program designed to greatly strengthen urban renewal and other existing programs, and add needed new authority in such important areas as moderate-income housing, rehabilitation and improvement of existing housing, and the preservation of open spaces. We are also obliged to increase Federal assistance for local airport construction. The additional expenditures thus entailed, in my judgment, are necessary in our Nation's future.

Area redevelopment: The tragedy of our chronically depressed areas, and the enormity of their challenge to our economy, require no less than the very reasonable program for aid to depressed areas which I have recommended and which I am confident that the Congress will soon enact.

Natural resource development: It is not economical to be foolishly wasteful rather than prudently conservationist toward the country's natural resources. I have proposed modest but symbolic increases in funds for conservation and development of forests and public domain lands, for the national park system and seashore recreational areas, and for navigation and flood control activities; and reprograming of other funds will permit additional reclamation activities.

Agriculture: In the field of agriculture we propose to move vigorously in a wholly new direction, to alter fundamentally the pattern of the Nation's agricultural economy with an eventual reduction of governmental outlays. Meanwhile, in the short run, it is necessary to take various actions which will increase the 1962 expenditures over those seriously understated in the January budget, as already discussed. The increases are for price supports, Rural Electrification Administration and Farmers' Home Administration loans, the school lunch program and special milk program, and surplus food distribution at home and abroad. These expenditures will raise farm income and increase the use of our surplus agricultural commodities.

Veterans: I am recommending that the Congress enact a selective increase in compensation rates for veterans with the more severe service-connected disabilities, to offset rises in the cost of living since the last increase in 1957 and to adjust rates in some categories which are out of line. My budget estimates include provisions for this purpose.

Budgetary transfer authority: To achieve greater effectiveness and savings in the use of the taxpayers' funds, the heads of the several Government departments and agencies should have the authority to exercise some flexibility in the course of a fiscal year to meet new situations or changing circumstances. Therefore, I am asking the Congress, in enacting appropriations for each department and agency, to provide the necessary authority for the transfer of a modest amount or percentage of the funds and personnel available to an agency head for operating expenses, to be used only as needed to meet unforeseen high-priority requirements, and to be controlled by the Bureau of the Budget through the regular budgetary apportionment process. In this way, the funds appropriated by the Congress can be utilized with the utmost efficiency.

VI. FEDERAL REVENUES

Mention has already been made of the revenue estimates for fiscal 1962 and the necessity for congressional enactment of all measures necessary to produce those revenues. My earlier message on highways contained recommendations for the user taxes needed to assure a satisfactory rate of progress on highway construction at levels previously recommended by my predecessor. This administration will not permit funds for this program to be diverted from general revenues. Other tax recommendations, designed to stimulate modernization of plant and equipment, and to achieve greater tax equity without any material change in overall revenues, will be contained in a subsequent message.

Three additional points are more appropriately contained in this message:

(1) Postal rates: The January budget submitted by my predecessor called for an additional $843 million in postal revenues to eliminate the deficit in that Department's operations. Such an increase must be effective July 1 to close the gap between postal expenditures and postal revenues; and, building on the previous budget, this administration's budget requires an equal amount. I urge the Congress to close this gap; and I have directed the Postmaster General to review carefully and intensively all services and activities of the Post Office with a view toward improving efficiency and reducing costs.

(2) Tax enforcement: I want to reemphasize my earlier request to the Congress for additional funds for the Internal Revenue Service. More and better qualified agents can both increase the collection of Federal revenues and help curb corruption in and out of Government, racketeering and organized crime.

(3) The debt limit: My predecessor's message in January, even in assuming balanced budgets in both fiscal 1961 and 1962, pointed to the seasonal pattern of tax collections as necessitating another increase in the debt limit. The permanent debt limit of $285 billion, presently exceeded, has been superseded by a temporary limit of $293 billion which expires next June 30.

Inasmuch as the Federal debt will exceed $285 billion on June 30, a new increase in the ceiling will be required before that date.

I urge the Congress to enact an increase that will provide sufficient flexibility to permit sound management of the debt and of our budget expenditures. I am delaying the specific recommendation until early May so that we may have the advantage of the very latest estimates of revenues and expenditures.

CONCLUSION

This message reviews the current budget outlook and describes my philosophy concerning budget and fiscal policy. We seek to achieve the vigorous and sustained growth of the economy that will make possible a balance in the Federal budget. If we use our fiscal resources wisely, we can make tangible progress toward the achievement of our national and international objectives. Toward this end, I ask the cooperation of the Congress and the American people.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 24, 1961.*

FAIR LABOR STANDARDS AMENDMENTS OF 1961

Mr. ROOSEVELT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3935) to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 3935, with Mr. WALTER in the chair.

The Clerk read the title of the bill.

Mr. KEARNS. Mr. Chairman, I yield 15 minutes to the gentleman from Michigan [Mr. GRIFFIN].

Mr. GRIFFIN. Mr. Chairman, the time has been very short since we were notified late yesterday of the intention on the part of the gentleman from Oklahoma [Mr. ALBERT] to offer a new substitute.

In that brief time, I had an opportunity to examine the so-called Albert substitute as it appeared in the RECORD this morning. It is clear that some details have been removed from controversy. But, the difference in basic philosophy between the committee and the Ayres bill is still with us.

I was pleased to note that the Albert amendment removes an exemption from the committee bill, which would have provided, in effect, that local truckdrivers who are members of the Teamsters Union would be exempt from overtime coverage, but the local truckdrivers who choose not to belong to the Teamsters Union would be covered by the law. This was a particularly bad feature of the committee bill, as it was reported from the committee. It would have put coverage or exemption of the Fair Labor Standards Act, for the first time, upon the basis of whether employees choose to belong to a union or not to belong to a union.

Two principal and major issues still remain to be resolved, Mr. Chairman. First of all, should the coverage of the Fair Labor Standards Act be extended into the retail and service fields and, if so, should it be extended on a dollar volume basis; and, secondly, granting that an increase in the minimum wage to $1.15 can be justified at this time, does it make sense and is it sound public policy to write into the law an escalator clause which will automatically hike the minimum wage to $1.25 an hour 2½ years from now. In considering these two basic questions, I believe we should look back, for a moment, and recall the basic philosophy that underlies the Fair Labor Standards Act.

One of the leading proponents of the original Fair Labor Standards Act was the then Senator Black, later Mr. Justice Black of the U.S. Supreme Court.

In 1937, on the floor of the other body, he said:

> I believe it was the prevailing sentiment of the committee, if not unanimous sentiment of the committee that businesses of a purely local type which serve a particular local community, and which do not send their products into the stream of interstate commerce, can better be regulated by the laws of the communities and of the States in which the business units operate.

Those of us in Michigan, where manufacturing is a major part of the economy, are concerned about the wage level and working conditions of manufacturing enterprises in other States because the goods we produce compete with goods manufactured in other States. On the other hand, the local drugstore is competing with the drugstore down the block on Main Street or across the street, it is not competing with drugstores in Arkansas, California, or New York. This basic line of distinction was adopted as part of the underlying philosophy of the Fair Labor Standards Act.

Mr. SANTANGELO. Mr. Chairman, will the gentleman yield for a question?

Mr. GRIFFIN. Not now, but later if I have time.

It should be kept in mind that without extending regulation into all sectors of the economy, exempted segments such as retailing and service are, nevertheless, indirectly affected by the fact that the Federal law does apply to manufacturing.

If the committee bill or the Albert substitute becomes law, Congress will be laying the foundation for extending Federal wage-hour controls to every segment of the economy, large and small.

Recently, Secretary of Commerce Hodges appeared before a House subcommittee and testified, in part, as follows:

> I am for the dollar volume the way it is put because I think that you can get a bill that way and I think it will cover that many people. I think if you put it down at a very lower figure, you will get that many more people against it and they will be fighting it.
>
> Mr. AYRES. Aren't those people who will be fighting it fighting it on the basis that they would be affected and, just like everything else, if it doesn't affect you, you are for it, but what concerns many of us very deeply is, as Mr. Suffridge said, according to his point of view, this is a step in the right direction. You have a million dollars this year, $500,000 the next year, $250,000 the next year, and then eventually you are covering every little corner grocery in all of the States of the Union.
>
> Secretary HODGES. Mr. AYRES, I will accept your position on it.

The basic philosophy of the Ayres bill is different. The Ayres bill proceeds on the theory that Senator Black was correct when he said that retail and service businesses of a purely local type which serve a particular local community should not be controlled by the Fair Labor Standards Act.

But whether a retail business is purely local and serves a local community can not be determined simply on a dollar volume basis. The theory of the Ayres bill is that if there are businesses in the retail field which are not purely local in character, and which perhaps should be subject to Federal control, they are the chain-type retail stores operating across State lines.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. Not at this time, but later.

Purely local businesses which are managed and controlled locally are subject to local influences and local policies. On the other hand, the multistate chain retail operations are controlled by absentee management. Dollar volume is

not a meaningful standard. It is an arbitrary, unfair, and discriminatory standard. Applying such a standard would mean that a retail establishment locally controlled and locally managed on one side of the street doing a given volume of business will be covered, while his competitor across the street, locally controlled and locally operated, will not be covered.

In the RECORD this morning there appears information placed there by the gentleman from Michigan [Mr. O'HARA]. He has set forth lists of businesses that would be covered under the Ayres bill, a long list of stores that would be covered, and a much shorter list of large stores, such as J. L. Hudson in Detroit, for example, which would not be covered under the Ayres bill. Let me say that the large stores locally owned and locally controlled, doing a million dollars or more, in almost every case are paying in excess of the minimum wage, and if they are not they are the very enterprises in the retail field which are subject to union organization.

In the last analysis, so far as extension of coverage is concerned, a question of basic philosophy is involved and is at stake; the issue is whether or not we should adopt legislation today which will lay the groundwork for ultimately extending Federal wage and hour controls to all segments of the economy.

Assuming that an increase in the minimum wage to $1.15 per hour can be justified now, and I believe it can, we must also decide today whether it is wise public policy to write into a law an escalator provision which will automatically increase the minimum wage to $1.25 an hour, not today, or next year—but 2½ years from now.

The advisability of such an escalator provision was under consideration in this House last year at a time when the economic situation, I might say, was much brighter than it is today. Then the Department of Labor said:

> Unless economic conditions are very favorable, substantial increases in the committee bill might well result in substantial curtailment of employment.

As recently as January 19, of this year, just before he left office, the then Secretary of Labor Mitchell, who certainly cannot be described as an ultraconservative, transmitted to the Congress the annual report of the Department of Labor which is required under section 4(d) of the Fair Labor Standards Act. In part, it says this:

> The Department concludes it would be unwise to adopt another increase in the minimum wage with an impact greater than that of the $1 rate, because of the danger of substantial curtailment of employment. It was estimated that an increase to $1.10 or $1.15 would have an impact similar to that of the increase from 75 cents to $1.

These are some statistics that I think are worth having in mind when we look at this difficult question.

During the period between 1950, when the 75 cent an hour minimum wage went into effect, and 1956, when the $1 minimum wage went into effect, with a wartime economy, the average hourly rate in manufacturing rose by 32 percent. It is interesting to note that since 1956 the average hourly rate in manufacturing has risen by only 19 percent.

Since 1956, when the $1 minimum rate went into effect, the cost of living has gone up 11 percent. Since 1956, the output per man hour of productivity has gone up by 13 percent.

I think these figures give some idea as to why it makes sense at this time to support an increase in the minimum wage of 15 percent to $1.15. Now, we have no crystal ball to look into the future 2½ years. We have no way of determining now whether an increase to $1.25 can then be justifiably supported. I would say this, as far as I am concerned, coming from a northern high wage State, if $1.25 minimum wage could be justified now, I am in favor of putting it into effect now. However, all responsible authorities, including Secretary of Labor Goldberg, agree that an increase to $1.15 an hour, only, can be justified at this time or in the foreseeable future. In a letter to the House committee the Secretary of Labor specifically requested that we not go any further than $1.15 at this time, and he specifically requested the $1.25 increase be postponed for 2 years and 4 months after the bill becomes law. If, as Secretary of Labor Goldberg requests, we should not raise the minimum to $1.25 until nearly 2½ years from now, then I do not think we should write it in the bill at all, and we should go only to $1.15 at this time.

During the last week President Kennedy called together his new Advisory Committee on Labor-Management Policy. He has made a number of statements indicating that he is concerned about holding the line on wages and prices. He has indicated a considerable concern about the dangers of setting off a wage-price spiral. Well, if we are sincere in that objective, then I do not think it is very good public psychology to write into a law today an escalator provision which provides for $1.25 nearly 2½ years in the future.

What would this do? Well, it would do nothing now for the low paid, unorganized employee who gets less than $1.25 per hour. It would, however, provide a psychological peg for those union leaders who seek to use the wage-hour law as the base for demanding higher wages up and down the line. Such irresponsible action would contribute to a general cost-price push.

Once such an escalator provision is written in, sure, we could take it out. But let us face it. Regardless of the economic circumstances, 2½ years from now, it would be very difficult, if not impossible politically, to take it out, even though it might be wise public policy at that time to do so. Would it not be much sounder and wiser to put the $1.15 into effect and delay further action until the next Congress. If the economy can absorb it, then we should put the $1.25, or even more, into effect, if it makes sense at that time.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I would like to say that I am in thorough agreement with the gentleman from Michigan in connection with this escalator clause, but I would like to ask him about a statement made by the President of the United States last night at a press conference. I did not have the opportunity to see the telecast, but according to this morning's paper he made two statements, and I wonder if the gentleman would care to comment on them. He said:

> I find it difficult to know why anyone would oppose seeing somebody by 1963 paid $1.25 in interstate commerce.

And at a later point:

> I think that anyone who is paid less than that must find it extremely difficult to maintain themselves and their families.

My question is whether that is the issue, whether we are talking about the amount sufficient to maintain a family; and if that were the issue, whether we might not well consider an increase beyond $1.15. I should like to have the gentleman comment on that statement.

Mr. GRIFFIN. Mr. Chairman, I think the gentleman has made a very good point. Many of the arguments on this issue obviously have been emotional arguments which are not based upon reason. Yesterday, as the gentleman from New Jersey [Mr. FRELINGHUYSEN] indicated, the President said that he did not see how a person could maintain a family on $1.25 per hour.

But that is not the issue with which we are faced here today. If that is to be the basis upon which we are legislating the minimum wage, then I agree that obviously a family cannot be supported decently on $1 or even $1.25 per hour. If that is the basis upon which we are legislating, then perhaps the minimum wage should be raised to $2.25 per hour.

The fact is that we are legislating on the lowest wage that can be paid under any circumstance to the marginal worker, the unskilled worker, the newcomer to the labor field, the oldster, the wife who works part time to supplement the family income, and the person who cannot get a job any place, if the minimum wage is boosted too high.

Mr. JONAS. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I yield to the gentleman from North Carolina.

Mr. JONAS. I have a question along the line of that asked by the gentleman from New Jersey [Mr. FRELINGHUYSEN]. I intended to ask this question later in the debate, but I think this is a good time to clear the matter up. The New York Times and the Washington Post of today quote President Kennedy as having stated in his news conference last evening as saying that he found it difficult to understand why anybody should be paid less than $1.25 an hour if he worked for any business "which makes over $1 million a year."

My question is, does the bill in providing for a $1 million test refer to $1

million of net income, which would be implied from President Kennedy's statement quoted in the press today, or does the bill say $1 million in gross sales?

Mr. GRIFFIN. It is gross sales.

Mr. JONAS. Is there not a wide difference between "making a million dollars" and having gross sales of a million dollars?

Mr. GRIFFIN. Very definitely there is. I can only assume that the President must have misspoken when he made that statement. But there is a very great difference.

Mr. Chairman, while emotional arguments may have great political appeal, we must not legislate on that basis. I believe that we should bring the minimum wage up to date. I am for an increase to $1.15 an hour. But at the same time we should be careful not to push too far, for if we do we will be legislating inflation, we will be legislating further difficulties with respect to the balance-of-payments problem, we will be legislating an upward thrust in the wage-price spiral, we will be legislating unemployment at a time when unemployment is already recognized to be our most serious domestic problem.

Let us keep in mind that an increase of any amount in the minimum wage means nothing to the worker who is unemployed. So long as the Government cannot legislate, or cannot guarantee, a man a job, neither can the Government guarantee that man a wage—even a minimum wage.

Mr. SANTANGELO. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I yield to the gentleman.

Mr. SANTANGELO. I was very much interested in the gentleman's assertion that we should have competition between the States so far as the minimum wage is concerned. I was interested to know whether in the gentleman's great State of Michigan they have a statutory minimum wage for employees in the retail trade.

Mr. GRIFFIN. We do not at the present time; perhaps we should have such a State law. I will say that, comparatively, the retail employees in our State are well paid, particularly in the large retail businesses that gross over $1 million, the only ones which would be covered under the committee bill; stores such as the J. L. Hudson Co., Crowley & Miller, and so forth.

Mr. SANTANGELO. Does the gentleman contend that 65 cents an hour is being well paid? Or is it $1 an hour?

Mr. HOFFMAN of Michigan. In our State Walter Reuther and Gus Scholl fix the wages. They fix them so high that our manufacturers and those who meet a payroll can no longer do business.

Mr. SANTANGELO. The gentleman knows there is no minimum wage in Michigan.

Mr. ROOSEVELT. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. HOLLAND].

Mr. HOLLAND. Mr. Chairman, the real issue before this House is not the raising of minimum wages. I only wish it were.

The real issue is whether in this Nation—the richest in the world—we can afford to allow millions of our fellow citizens to continue to live in abject poverty for reasons over which they have no control.

These citizens—and their wives and children—are no less deserving of a decent standard of living than you or I.

Actually, the bill before us does not raise the wages at all. It merely tries to keep the poorest of our neighbors from falling still further behind in their already critical conditions of poverty. This is because—in recent years—we have witnessed a relentless increase in the prices these unfortunate people must pay for the necessities of life, and, at the same time, growing unemployment threatens even their own low-paid jobs.

We must remember, too, that the recession serves as an albatross around the necks of these poor souls, for as long as millions of able-bodied men are rusting in forced idleness, there is no chance that economic forces will permit the wages of these unfortunate people to rise.

Many arguments have been raised against attempts to help these people by raising their minimum wages. All of these arguments are known to be false. In fact some have been exposed as fallacious for nearly 200 years.

One such argument is that higher wages cause unemployment.

Only yesterday, the President's Council of Economic Advisers released an exhaustive study to show how untrue this old argument is.

The study shows absolutely no correlation between wage rates and unemployment. For example, average hourly wages in the printing and publishing industry are $2.77 per hour—the fourth highest of all industries. Yet, this industry's unemployment rate is only 3.6 percent, or 19th out of the 21 leading industries in the Nation.

On the other hand, hourly wages were only $1.56 in the clothing and textile industries while the jobless rate in this industry was 10.5 percent, the second highest of the 21 leading industries.

I could go on quoting similar statistics and refuting, over and over again, the old wornout arguments against extending the hand of help to the unfortunate, but time does not permit. Besides, we are not dealing in statistics and ratios and theories anyhow, even though all of these support the need for raising minimum wages.

We are dealing with human beings, with men like you and me, with wives and children and hopes for their future.

There is no more reason why industries should be allowed to pay starvation wages in exchange for the hard work of their employees than there is reason for coal companies to send children down into the pits to work, as they once did, or for railroads to operate without any safety devices to protect their workers against serious accidents.

When child labor laws were being debated, management people claimed they would go out of business unless they could continue to employ children for a few pennies a day. But, the laws were passed and the industries survived and grew.

When safety legislation was being debated, these same old arguments were raised again, but, the laws were passed, and again the industry survived and became stronger than ever before.

Now we are faced with a similar situation, a bill to raise the minimum wage by 25 cents an hour, barely enough to offset the rising prices of the last few years, and to extend its coverage to a few more of those whose conditions are not unlike those whom Victor Hugo, in his famous novel of the French Revolution, referred to as Les Miserables, the "miserable ones."

Are we going to take this opportunity to help the helpless?

Or, are we going to follow the paths of least resistance and let someone else, meaning no one else, worry about these millions of our fellow Americans?

I think we can do better.

We can pass this minimum wage bill which is, as its title indicates, a minimum. It is barely that.

We not only can pass this bill—we must pass it—or else forever regret our failure to do what it was within our power and grasp to do; that is, to toss at least a few crumbs from our great storehouse of wealth to those unfortunates for whom an author once said: "There, but for the grace of God, go I."

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. HOLLAND. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. I want to congratulate the gentleman from Pennsylvania [Mr. HOLLAND] on the able address he has made. One of my pleasures in serving here in the Congress has been the friendship that has developed between the gentleman from Pennsylvania and myself. He is one of the great progressives of all the years I have served in the Congress.

Mr. HOLLAND. I thank the gentleman.

Mr. KEARNS. Mr. Chairman, I yield 15 minutes to the gentleman from Arizona [Mr. RHODES].

Mr. RHODES of Arizona. Mr. Chairman, most of us here have given the legislation before us a great deal of thought and study. We have been over this ground in the 86th Congress and we were promised in the election campaign last fall we would have to go over it again in the 87th Congress. The same arguments in support of raising minimum wages and extending coverage into every corner of private enterprise are being repeated and the criticism and objections which were brought out last year are being raised with equal insistence today. A year ago I was convinced that to raise the minimum wage and to extend its coverage would have harmful effects upon the Nation's economy. I was also convinced that to do so would damage rather than benefit the individual men

and women being considered. It would reduce employment and raise the cost of living, wiping out some businesses and increasing inflation. What was true a year ago is true today. But, Mr. Chairman, the economic condition of the country is not as vigorous today as it was a year ago. What was unwise then, and the Congress apparently considered it unwise by rejecting the bill, would be even less wise now. It is inconceivable to me that anyone who is aware of the economic soft spots in the country can give serious consideration to a bill which may create more soft spots. I hope the economy is now at the point of an upswing, and I know every Member here hopes that this is the situation. But, we cannot be sure. It is certainly no time to give the economy another kick backward. With the unemployment problem facing men and women in many parts of the country, what justification is there for raising wages by legislative fiat and creating more unemployment?

There can be no doubt at all that unemployment may come from this bill if it becomes law.

I have had scores of letters come across my desk in the past several weeks from businessmen—most of them small businessmen—with figures from their own books showing that they will be forced to lay off employees if we pass this bill.

Economic logic alone will tell you that to increase the cost of labor by any amount at all will not add a single job to a payroll anywhere in the United States, but it may force employers all along the line of marginal operations to curtail or go out of business.

Mr. Chairman, the bill before us today does even more damage to the economy than increase unemployment. It will also increase the cost of living and add to the corrosive effects of inflation, cutting a little deeper into the limited and fixed incomes of millions of people.

The initial cost to industry alone for a $1.25 minimum wage with extended coverage would be nearly $2 billion. But this is only the beginning. As low wage jobs go up to $1.15 or $1.25, wages on up the scale are put under pressure to be raised also. This is particularly true when the cost of goods and services for wage earners has been forced up. By the time the rippling effect of this bill has gone clear through the national economy, the cost of labor for everything we produce would be substantially increased.

Such an increase in the cost of labor at this time would have serious effects upon the cost of every product on the American market. This would be bad enough as it affects the ordinary American consumers. But it would be much worse than that.

We all know we are faced with a serious problem in balance of payments and an outflow of gold, caused by the inability of American products to compete with lower-cost foreign products on the world market. For years we have been pricing ourselves out of the world market in just this way—by jacking up the production costs of what we want to sell faster than we increase efficiency and improve production methods. We end up with goods costing so much to produce that they can be undersold even in our own markets.

And now we are considering legislation which would give the whole process another big push. This bill, if it passes, will set off a chain reaction upward in the cost of labor throughout the entire national economy.

The New York Herald Tribune described the situation several weeks ago in an editorial:

> The proposed 25 percent boost would have an enormous cumulative effect on the total wage bill. Differentials have to be maintained, which means an upward adjustment for higher-paid workers as well. This means higher prices, another kick for the inflationary spiral, tougher competition from foreign imports, a further competitive handicap for American exports. It inevitably means that marginal workers will lose jobs and marginal firms will be forced out of business.

I cannot believe that any Member of the House wants this to happen. The bill under consideration may seem like good politics, but it is bad economics. And in the end it is bad faith to the millions of American wage earners who would be having a few cents put into their pockets on one side, and the same few cents compounded being taken out on the other side.

Mr. Chairman, the minimum wage as it was passed back in the thirties was intended to be that wage on which a man could support his wife, himself, and two children, the average American family, at a subsistence level. I assume that is still the philosophy of the minimum wage. If it is, then we have gotten far afield as far as determining the proper level of the minimum wage is concerned, because in comparing the cost of living when the minimum wage was originally adopted with the cost of living today, by interpolation you find that the proper minimum wage would be somewhere between 96 cents and a dollar. The minimum wage, as you know is now $1 an hour.

I would suggest that the appropriate committee of this House ask that the Secretary of Labor or some other person designated by the President, or some authority set up by the Congress itself, conduct a survey to find out, if we are still going to use this philosophy, what the proper minimum wage should be in this day and time.

Perhaps a mere mathematical extension does not tell the truth. If it does, then the minimum wage right now is adequate. If it does not, we certainly should find out about it, and enact a proper minimum wage.

I am eager to have a minimum wage which will allow the average family to support itself at a level which will maintain health. I do feel if we are going to change the rules of the game, as I think we have, we had better redefine the rules, then come up with a decent formula, a formula which makes sense, to determine what the minimum wage should be. Certainly trying to legislate wage increases does not make any sense economically. The only way you can have a real wage increase is by increasing the production of the Nation. That is what I want to do, and I think all of the Members of the House want to do that. But this type of legislation has gone far afield from the type of legislation it was intended to be. If we are not careful we can by the continued abuse of this legislation not only hurt the economy but hurt the very people we are striving to help—those on the lowest rung of the economic ladder.

Mr. ROOSEVELT. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey [Mr. DANIELS].

Mr. DANIELS. Mr. Chairman, I strongly support the minimum wage bill to raise the standards and broaden the coverage of the Fair Labor Standards Act.

The enactment of legislation in this area is long overdue. It is now almost 23 years since Congress passed this law to extend the frontiers of social progress. Congress invested the law with a noble purpose—to eliminate from the channels of interstate commerce labor conditions detrimental to minimum standards of living.

Both in terms of the minimum wage it provides and of the employees who come under its protection, the present act is inadequate as a means for carrying out this purpose. A full-time employee working 40 hours a week, 52 weeks a year at the present minimum wage of $1 an hour has an annual income of only $2,080. I know that I do not have to tell you gentlemen how far this sum will go toward the support of a workingman and his family today. But I would like to cite some interesting and enlightening statistics for the benefit of those of my colleagues who think that we should not improve this law substantially.

In the fall of 1959, the Bureau of Labor Statistics estimated that a modest level of living in Washington, D.C., for a family of four required an income of $6,147 a year. The cost of living in many other cities is even larger. It is apparent, therefore, that the present minimum wage does not insure even a bare minimum existence.

It is also apparent, Mr. Chairman, that this law must be broadened to cover many additional workers so that our lowest paid workers who now have no minimum wage protection whatsoever will be given some measure of protection.

I would call your attention to the fact that during all the years that have elapsed since this law was passed its coverage has never been extended. In 1955, when the minimum wage was increased to $1 an hour, nothing was done about extending the law's protection to additional workers. In 1949, when the minimum was increased from 40 cents to 75 cents an hour, the coverage of the act was actually cut back. This retraction in the number of workers covered produced the inequitable result of not only denying a wage increase to those most in need of it but deprived many workers of the minimal floor under the wages that they previously had.

Mr. Chairman, I have had a study and compilation made of the minimum wage

laws of the several States of our Union and the minimum runs from a low of 15.6 cents per hour in one State to $1.50 an hour in another State.

The failure of some States to enact any law and of other States to update their antiquated and practically useless State laws, has made it imperative for this House to act. I desire at this point to offer this compilation as part of my remarks.

Mr. Chairman, I cannot urge too strongly that we proceed without delay to approve the bill reported by the House Labor Committee. We have already had too much debate and too little action in this area for too long a period of time. I think it is time that we took effective action.

The compilation referred to is as follows:

Minimum wage status of 50 States, District of Columbia, and Puerto Rico

State	Type of law	Employees covered	Basic minimum
Alaska	Statutory	Men, women, and minors	$1.50 an hour.
Alabama	No law		
Arizona	Wage board	Women and minors	46 to 60 cents an hour for retail and laundry.
Arkansas	Statutory	Females	15.6 cents an hour ($1.25 a day).
California	Wage board	Women and minors	$1 an hour for major trades.
Colorado	do	do	60 cents to $1 an hour by orders for laundry, retail, public housekeeping, and beauty service.
Connecticut	Statutory (also wage orders)	Men, women, and minors	$1 an hour.
Delaware	No law		
Florida	do		
Georgia	do		
Hawaii	Statutory	Men, women, and minors	$1 an hour.
Idaho	do	do	75 cents an hour.
Illinois	Wage board	Women and minors	No orders in effect.
Indiana	No law		
Iowa	do		
Kansas	Wage board	Women and minors	No orders in effect.
Kentucky	do	do	20 to 50 cents an hour for major trades.
Louisiana	do	Females	No orders in effect.
Maine	Statutory	Men, women, and minors	$1 an hour.
Maryland	No law		Do.
Massachusetts	Statutory (also wage orders)	Men, women, and minors	
Michigan	No law		
Minnesota	Wage board	Women and minors	60 cents to $1 an hour by orders for laundry, retail, amusement, and public housekeeping.
Mississippi	No law		
Missouri	do		
Montana	do		
Nebraska	do		
Nevada	Statutory	Females	$1 an hour (87½ cents, under 18).
New Hampshire	Statutory (also wage orders)	Men, women, and minors	$1 an hour.
New Jersey	Wage board	Women and minors	31.3 cents to $1 an hour by orders for beauty, restaurant, laundry, and retail.
New Mexico	Statutory	Men, women, and minors	75 cents an hour (65 cents service).
New York	Statutory (also wage orders)	do	$1 an hour.
North Carolina	Statutory	do	75 cents an hour.
North Dakota	Wage board	Women and minors	55 to 75 cents an hour by orders for manufacturing, laundry, drycleaning, telephone, public housekeeping, and retail.
Ohio	do	do	25 to 90 cents an hour by orders for laundry, hotel, restaurant, and beauty culture.
Oklahoma	do	Females	(Law inoperative.)
Oregon	do	Women and minors	50 cents to $1 an hour for major trades.
Pennsylvania	do	do	65 cents to $1 an hour by orders for laundry, hotel, restaurant, and retail.
Rhode Island	Statutory (also wage orders)	Men, women, and minors	$1 an hour.
South Carolina	No law		
South Dakota	Statutory	Females	$12 to $15 per week (by population).
Tennessee	No law		
Texas	do		
Utah	Wage board	Women and minors	75 cents to $1 an hour by orders for retail, laundry, drycleaning, and restaurant.
Vermont	Statutory (also wage orders)	Men, women, and minors	$1 an hour.
Virginia	No law		
Washington	Statutory (also wage orders)	Men, women, and minors	Do.
West Virginia	No law		
Wisconsin	Wage board	Women and minors	75 to 85 cents an hour (65 to 75 cents under 16) for major trades.
Wyoming	Statutory	Men and women	75 cents an hour.
District of Columbia	Wage board	Women and minors	57 cents to $1.10 an hour for major trades.
Puerto Rico	Statutory (also wage orders)	Men, women, and minors	$1 an hour.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. DANIELS. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. The gentleman clarified one point that I was going to ask him about, I now know which bill he at least is advocating. He suggested that we should approve the committee bill. As I understand, from what developed late in the day yesterday, the Democratic leadership has abandoned the Roosevelt bill and has decided to take the so-called Albert substitute. I wonder if the gentleman has any idea what is in the Albert substitute. At what point is anyone on your side going to demonstrate how that bill might have more advantages than the bill the gentleman prefers?

Mr. DANIELS. I have not had an opportunity to examine the Albert bill, but I propose to do so.

Mr. FRELINGHUYSEN. Is the gentleman proposing to vote against the Albert bill, if there should be an opportunity?

Mr. DANIELS. I cannot answer that question until I have an opportunity of examining the bill.

Mr. FRELINGHUYSEN. Time is running out, I may say to the gentleman. Nobody has had an opportunity to examine it.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. ROOSEVELT. Mr. Chairman, I yield such time as he may desire to the gentleman from Connecticut [Mr. GIAIMO].

Mr. GIAIMO. I recognize, Mr. Chairman, that my task here is a formidable one. I rise to challenge the greatest of all vested interests; those of the mind. I have listened closely as some of my colleagues express fears about moving ahead, continuing and broadening our tried and tested and, I add, successful minimum wage program. I have heard some pretty shopworn ideas expressed in the process.

John Galbraith, in his book, "The Affluent Society," warns us that "because economic and social phenomena are so forbidding and because they yield few hard tests of what exists and what does not, they afford to the individual a luxury not given by physical phenomena. Within a given range, he is permitted to believe what he pleases. He may hold whatever view of the world he finds most agreeable or otherwise to his taste."

I submit, Mr. Chairman, that unfortunately, some of my colleagues, in their attempts to scuttle the President's program have indulged in such an intellectual luxury. I rather think that if a visitor who knew nothing of modern history were to walk into the gallery and listen to some of the intellectual cliches being voiced in this debate, he would readily believe that the Fair Labor Standards Act is a figment of some radical imagination; that it threatens to

tear asunder the framework of our Government; that it threatens to destroy a system of 50 separate and independent States by imposing upon them a national Government with powers over interstate commerce; and that we have learned nothing since the dismal economists of the 19th century put pen to paper.

Ideas that resist change, that give excuses for political indolence, are always comfortable ideas and readily acceptable. The President asks us to try our thoughts as one would test his muscles on a trampoline, but instead, we are forced to loll on an overstuffed mattress of tired phrases and pet cliches originated years and even a century ago. Perhaps they had vitality at one time, but today, they are tiresomely irrelevant.

The Fair Labor Standards Act was conceived 23 years ago, and it has proven to be very much in keeping with American concepts of governmental power and responsibility. It is constitutional; it has worked; it has increased purchasing power; it has placed a floor under the lower economic groups in our society; it has helped prevent dire poverty and gross economic inequalities in our generally affluent Nation; it has been extended and improved by Republican and Democratic administration alike, and this administration is now asking that we but take the next logical step toward affording the minimum benefits of this tried and tested program to those of our citizens who have thus far been ignored by it.

Contrary to arguments being made here, the President's proposals are not unconstitutional or subversive to our way of life. This Nation is not a confederation of 50 independent States. This Congress, when it exercises the constitutional powers of a national legislature, does so in behalf of the people of this great Republic. We are representatives of these people. We come here to further their interests. I, for one, resent the implication that we are akin to some foreign power, beholden to no American, greedily usurping the power of the people. We speak for the people, and judging by the last national election and by recent public opinion polls, the people like the Fair Labor Standards Act and they want to see it extended. I, for one, intend to speak up for the people of our age and against the dead ideas paraded about on this floor disguised as so-called States rights.

The justification for minimum wage legislation today, as it was 23 years ago, is twofold:

First. Minimum wage legislation recognizes that the existence of low wages tends to debase the living standards of workers enjoying higher wage levels and acts as a drag upon the economy. Substandard wages, in the words of the act, constitute an unfair method of competition in commerce and interferes with the "orderly and fair marketing of goods and commerce."

Second. It attempts to raise the standard of living of those who are at the bottom of the economic ladder and tries to provide these with a minimum standard of living.

Regarding the first, gentlemen, I have heard it said on this floor that wages and hour conditions are matters of purely local concern. This is a convenient and comfortable thought. Everyone wants to be let alone to do as they please. But we are one nation; our trade and commerce among the States is free and open. It is a simple matter to say that the wages paid in Mississippi should be no concern to the people in Connecticut, but can this be true? The depressive competition we in New England meet from the sweatshops of other areas is as much our concern as the flow of cheaply produced foreign goods into America. We in New England have done a fairly good job of providing our low income workers with minimum wage and working conditions, and we have over the years, increased employment, but we have had to do it in the teeth of unfair competition from regions which drag as an anchor chain upon our Nation's economy. Do you say that the existence of substandard labor in America is no concern to us? When the foot is cancerous, is this no concern to the brain?

In certain areas, efforts to exploit the American worker at the expense of our national economy and the just labor standards of other regions, have been made quite obvious.

The insidious influence of unfair competition among regions and localities is illustrated by a letter from a mayor in a small southern town to a New England manufacturer, reported in the CONGRESSIONAL RECORD, volume 101, part 3, page 4169: "Then our wonderful labor," the mayor writes, "98 percent native born, with lower average hourly industrial wages, 6 to 9 cents below other Southern States and from 50 to 95 cents below Northern States."

I submit, gentlemen, this letter underscores the fact that industries competing on the basis of sweated labor are not only out to drag down high wage areas outside of the South, but will just as readily, if given the chance, undercut neighboring towns and cities which already are victims of low wage rates and substandard living conditions.

In a study printed in the CONGRESSIONAL RECORD of April 26, 1955, Dr. Sar A. Levitan, economist with the Legislative Reference Service, wrote:

> It should be stressed that increasing the minimum wage would not effectively limit the competitive forces within the economy. Labor costs account only for about a third of total manufacturing cost and the substandard rates form only a minute fraction of total costs in American industry. Substandard wages do not appear to be a proper factor in a dynamic, free, and competitive American enterprise system.
>
> All people of good will welcome the economic opportunities that new industry is bringing to the people of the South. Defense needs make industrial dispersion desirable. National welfare would, however, require that industrial dispersion should bring with it the blessings of our high standards of living to all the sections of the country. Sound economic growth for the Nation as a whole cannot depend upon "runaway" industry from high-wage areas which reestablish the same business on a substandard wage level elsewhere.

A second justification for adopting the President's program is that it will raise the standard of living for those who are at the bottom of the economic scale and try to provide them with a minimum standard of living.

In his news conference yesterday, the President said:

> I find it difficult to understand how anybody could object to paying anybody who works in a business which makes over $1 million a year $50 a week by 1963. I think anyone who is paid less than that must find it extremely difficult to maintain themselves and their families.

What the President says is obvious. And yet, it appears, there are gentlemen in this House who would do nothing about it although, according to a Bureau of the Census report published in June 1958, 36.3 percent of our farm and nonfarm families had a total money income of less than $4,000 per year. The 1960 economic report of the President reveals that there are 7.6 million families and single individuals with incomes under $2,000 per year and the number of low-income families is growing. From 1956 to 1958, the number of families with incomes less than $2,000 per year increased twice as fast as the total number of American families.

Hold this statistic, and ponder it in the light of another: That in 1960, the Department of Labor estimated that an average of $6,130 a year is needed by a worker to support a family (wife and two children) at a "modest but adequate" standard of living in major American cities on the basis of prices in the autumn of 1959.

We are in danger of creating the anomalous situation of poverty existing in the midst of affluence, and I say this is a threat to our classless American society. This substandard condition existing side by side with wealth is the real menace to our way of life, not the Fair Labor Standards Act.

What is the cost of this poverty amidst plenty? In terms of social disorganization and frustration among our lower income citizens, the costs can never be measured except indirectly in our budget for courts, jails, police, social workers, and so forth. The correlation between crime and poverty has not been proven, but the greater prevalence of crime among low-income groups has been established.

We will pay in other ways for ignoring the low-income worker. During the 1957–59 biennium, Connecticut taxpayers alone put up $16,901,117 to defray general assistance costs exclusive of administration. This money was paid out to aid destitute families in a State that has a decent minimum wage. I wonder what the cost in public welfare, relief, and human suffering can be in other areas.

We are paying for substandard conditions every day in terms of poor health and medical care. An editorial in the New York State Journal of Medicine for September 15, 1949, stated it quite plainly:

> What keeps the great majority of people well is the fact they can't afford to be ill.

The proportion of persons who see no doctor during the year is three times as high for families with incomes below $1,200 as for those over $10,000, while less than one in five families with incomes

below $1,000 has any health insurance. The cost to our communities will appear again and again in public hospitals, clinics, and free medical care for people who are not being paid a human wage.

I consider it a very minimum wage—

The President said yesterday.

We are talking about a standard for fellow Americans, and millions of them, and I must say I think that it is in the public interest to pass that bill as closely as possible to the House committee bill.

Gentlemen, the President can never be more right. I urge you to consider carefully the cost of not passing an adequate bill this year. Is your State, your community, is America willing to ignore progress and pay the consequent price?

Mr. ROOSEVELT. Mr. Chairman, I yield 15 minutes to the gentleman from Iowa [Mr. SMITH].

Mr. SMITH of Iowa. Mr. Chairman, I would like to address myself primarily to the so-called jurisdictional or constitutional question. I really do not think it amounts to what has been raised here at all, but I would like to clarify it a little bit to remind the Members of some of the things that I am sure they already know.

Of course, this rests under article I of section 8 of the Constitution, which provides that Congress shall have the power to regulate commerce among the several States. Of course, we all know when you say "regulate," you mean either help to turn it on or turn it off; anything that increases or decreases either one. It does not mean stoppages only. In 1938, when the act was passed, it applied to those persons engaged in competition necessary to the production of goods for commerce.

Now, under this definition there were, of course, several Supreme Court cases, the outstanding one, the leading one, being the Darby case. Under the Darby case the Supreme Court not only held that the Court had the power to go as far as it did in the 1938 act, but it also went forward and said that Congress could even regulate intrastate commerce if it wanted to, so long as it acted within the purview of the doctrine that there was a substantial effect upon interstate commerce.

I am talking now about things that are strictly intrastate. This 1938 act did not do that but the Supreme Court said Congress could do that if it wanted to.

After this, of course, there were several more cases, but it was firmly established that the Congress had acted fully within the purview of the commerce clause. Then along came the Labor-Management Relations Act of 1947 which amended the National Labor Relations Act. This act, of course, is more commonly known as the Taft-Hartley law. The Taft-Hartley law went far beyond anything that had previously been done in extending the jurisdiction under the commerce clause. It went so far as to say that you can even regulate activities that tend—and I stress "tend"—that tend to affect the flow of commerce. It would be thought that this was just as far as anyone could possibly go in stretching the interstate commerce clause and to date I think it is as far as anyone has gone.

As the gentleman from Georgia said yesterday, the National Labor Relations Board found that their jurisdiction was so extensive under this particular provision that they would not exercise all the jurisdiction that had been given to them. So they established a dollar-volume standard, or some dollar-volume standards, saying that they were not going to exercise all the jurisdiction that has been given to them in every case. They said, "We are just going to assume that in retail cases, where it is under $500,000 of annual gross volume, there is not enough for us to bother with. We are not going to exercise the jurisdiction we have in that case. This is the dollar-volume test by an agency—not by the Congress, but by an agency."

It has been clearly shown, I think, in several court cases that the jurisdiction or the practical judgment is a matter that is clearly within the authority of Congress and can be determined by the Congress only; but they went ahead, anyway, and determined as an agency how far they should go.

Now we find in the Landrum-Griffin Act that this has been approved, that we have approved an agency's determining their own jurisdiction. All we have said is that they cannot go above $500,000, they have got to exercise their jurisdiction down to that point. We are leaving it up to them how much lower they want to go in volume or anything else. There is not any specific definition or category. But we have left it to an agency in that act how far they want to go in exercising this jurisdiction.

In this committee bill and in the Albert bill we do not leave it to some agency downtown to determine how far they want to go to exercise their jurisdiction. We write it squarely in the law. The Congress exercises the plenary power they have in determining just what jurisdiction we want. That is the biggest difference between the Landrum-Griffin bill and the particular act that is before us now. We do not leave it to an agency as it was under the Landrum-Griffin Act. We do it right here. We say it is $1 million a year. We are not going to extend our jurisdiction beyond that. We know we have the jurisdiction to go way beyond that, but we are not going any further than that. That is the biggest difference between the two acts.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I wonder whether, as a member of the subcommittee which developed the committee bill, the gentleman would enlighten me as to whether he is going to support the so-called Democratic leadership bill, the Albert bill, or the committee bill? I wonder at what point anybody is going to discuss what is in the Albert bill. We have almost completed general debate on the committee bill, and there has been no mention of what is in the Albert substitute.

Mr. SMITH of Iowa. As to which bill I am going to support, I will say that I have not had the opportunity yet to hear the gentleman's very enlightening statement that I am sure he will make soon. I want to hear that before I make my judgment.

Mr. FRELINGHUYSEN. I am certainly not planning to make any statement on the Albert bill. I am waiting for the sponsors of that proposed legislation to explain what is good in it. I have not had the time to examine it, just like the gentleman from New Jersey [Mr. DANIELS]. I think the whole matter ought to be recommitted to our committee for consideration of the various substitutes. Then we could bring it back to the House for its consideration.

Mr. SMITH of Iowa. I think it has been in the RECORD and there has been adequate opportunity to read the RECORD while we have been sitting here.

Mr. FRELINGHUYSEN. Mr. Chairman, which bill is the gentleman planning to back?

Mr. SMITH of Iowa. I will determine that after I hear the gentleman's arguments. I am sure he will enlighten us.

Mr. FRELINGHUYSEN. My arguments will not be on that bill.

Mr. GRIFFIN. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Michigan.

Mr. GRIFFIN. Mr. Chairman, first of all let me say that I have been very greatly interested in the gentleman's presentation on the so-called constitutional question. As for me, although I realize that there are many Members of the House on both sides of the aisle who feel that there is a real question of constitutionality involved, I have not put my argument on that basis.

In fact, I am inclined to agree with the gentleman that the present Supreme Court would probably not say that the bill was unconstitutional. I think the question is more one of public policy, how far the Federal Government should go and into what areas.

Let me also address myself briefly to a statement made about the 1959 act, the so-called Landrum-Griffin bill. At the time that bill became law, there were many of us who thought that Congress should adopt standards at that time for application by the National Labor Relations Board. There was not enough agreement as to where that line should be drawn or on what basis it should be drawn, and standards were not adopted. But we did have agreement on one point: that if the National Labor Relations Board is going to decline jurisdiction over a labor dispute, there should be some place for the litigants to go. I do not interpret the 1959 act as putting any approval on standards used by the National Labor Relations Board. We did not pass on the appropriateness of those standards. We said only that there should be a forum; and that if the National Labor Relations Board fails to take jurisdiction of a case, for any reason, then the State will take jurisdiction. In the 1959 act we did not adopt the dollar-volume test used by the National Labor Relations Board; we did not approve or disapprove of it. Tomorrow,

if the Board chooses to do so, it could change its standards, but not because of anything in the Landrum-Griffin Act. In the 1959 act, we said only that the Board could not retreat and refuse to take jurisdiction of a case which it would have handled prior to the 1959 act. Will the gentleman agree with that?

Mr. SMITH of Iowa. I agree with that last statement of the gentleman as he states it. I am glad to hear the gentleman say he thinks there is no argument as to what jurisdiction this Congress has in this field under the interstate commerce clause between the two bills. It is just a matter of how far you want to go. Under the bill I understand the gentleman is supporting, how far we are going is determined according to where the stores are located.

Mr. GRIFFIN. There is lots of controversy among the Members on that issue. I am not putting my argument on that basis. I think it is more a question of what is wise policy for the Federal Government in this particular field.

Mr. CURTIS of Missouri. Mr. Chairman, a point of order. The gentleman has mentioned the name of a Member of the other body.

The CHAIRMAN. Will the gentleman from Missouri specify the words he wants taken down?

Mr. CURTIS of Missouri. The reference was to Senator GOLDWATER by his name.

Mr. ROOSEVELT. Mr. Chairman, may I point out that the gentleman from Iowa never mentioned the name of the Goldwater store in Arizona.

Mr. AYRES. Mr. Chairman, I make the point of order that the gentleman from California did mention the name of Senator GOLDWATER. I would like to have his words taken down.

Mr. HOFFMAN of Michigan. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Mr. HOFFMAN of Michigan. Mr. Chairman, inasmuch as so many are coming in from the outside and from the cloakrooms, I ask unanimous consent to withdraw my point of order.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. ROOSEVELT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. ROOSEVELT. Mr. Chairman, do I correctly understand that the rules of the House do not prevent a Member from mentioning a Senator's name as long as he does not mention it in a derogatory manner?

The CHAIRMAN. It is the understanding of the Chair that under the rules of the House, the name of a Member of the other body may not be mentioned in any fashion.

Mr. ROOSEVELT. Then, Mr. Chairman, I ask unanimous consent that my words be expunged from the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. CURTIS of Missouri. Mr. Chairman, I made a point of order.

The CHAIRMAN. The gentleman will state it specifically.

Mr. CURTIS of Missouri. The specific point of order is that the words of the gentleman in reference to GOLDWATER, which was obviously to Senator GOLDWATER, be taken down.

Mr. SMITH of Iowa. Mr. Chairman, may I point out that I merely mentioned the name of the Goldwater Department Store in Arizona. I did not mention anybody's name whatever.

The CHAIRMAN. For what purpose does the gentleman from New York [Mr. POWELL] rise?

Mr. POWELL. Mr. Chairman, a point of order. The gentleman from Missouri is out of order because he just mentioned the name of Senator GOLDWATER.

Mr. HOFFMAN of Michigan. Mr. Chairman, I make the point of order that it is now in order to read the words.

Mr. CURTIS of Missouri. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CURTIS of Missouri. Should not the gentleman from Iowa take his seat while the words are being taken down?

The CHAIRMAN. If the gentleman from Missouri insists the Chair will ask the gentleman from Iowa to take his seat.

The Clerk will report the words to which objection is made.

(The Clerk reported the words objected to.)

The CHAIRMAN. The Committee will rise.

Accordingly the Committee rose, and the Speaker resumed the chair.

Mr. PELLY. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. We must first have the report from the Committee of the Whole House on the State of the Union.

Mr. KEOGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 3935) to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes, certain words used in debate were objected to and on request taken down and read at the Clerk's desk, and he herewith reported the same to the House.

The SPEAKER. The Clerk will report the words objected to.

(The Clerk reported the words objected to.)

Mr. PELLY. Mr. Speaker, a point of order.

The SPEAKER. The Chair is ready to rule on the point of order.

The Chair thinks that a reference to a Member of the other body by name is a violation of the rules of the House, and so holds.

Mr. ROOSEVELT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ROOSEVELT. Would it be in order at this time to ask unanimous consent that the gentleman from Iowa be allowed to proceed in order?

The SPEAKER. It would.

Mr. KEARNS. Mr. Speaker, I object to that.

The SPEAKER. Let the Chair first state the request.

Is there objection to the request of the gentleman from California that the gentleman from Iowa be allowed to proceed in order?

Mr. CURTIS of Missouri. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CURTIS of Missouri. The ruling means that these words will be stricken from the RECORD?

The SPEAKER. If a motion is made to strike them from the RECORD.

Mr. CURTIS of Missouri. I would make such a motion and then I would not object.

The SPEAKER. The question is on the motion.

The motion was agreed to.

The SPEAKER. Is there objection to the request of the gentleman from California that the gentleman from Iowa be allowed to proceed in order?

There was no objection.

The SPEAKER. The Committee will resume its sitting.

The CHAIRMAN (Mr. WALTER). The gentleman from Iowa will proceed in order.

Mr. SMITH of Iowa. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SMITH of Iowa. Is it in order to say that this has been a long day due to the fact that there are three Senators in the other body named Long?

The CHAIRMAN. That is not a parliamentary inquiry.

The gentleman will proceed in order.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Pennsylvania.

Mr. DENT. What is the name of the chain of stores in the State of Arizona that the gentleman was referring to?

Mr. SMITH of Iowa. I think that was all I did, was to mention their names.

Mr. DENT. What is the name of the chain?

Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DENT. If a trade name or the name of a product bears the same name as a Member of the Senate, are we forbidden from mentioning that particular product or chain or store, or whatever the item may be?

The CHAIRMAN. The Chair will pass on that question when it arises. The Chair may say that the gentleman's inquiry is not a parliamentary inquiry.

The gentleman from Iowa [Mr. SMITH], will proceed in order.

Mr. SMITH of Iowa. Mr. Chairman, now as to the bill I was referring to, we

all know that in this bill it determines how far we are going to exercise our jurisdiction according to the number of stores that happen to be located in two or more States.

Let me give this as an example: Suppose I own two stores in Pennsylvania that sell rocks picked up in Gettysburg, and I own three stores in Arizona that sell petrified rocks picked up in Arizona. I have five stores in two States. There is no interstate commerce, there is no commerce between the two stores. I am the owner. I am covered under the Ayres bill. What kind of a basis is this? It is stretching the interstate commerce clause far beyond any degree it has been stretched before. It is the Ayres bill that stretches the interstate commerce clause farther than it has even been stretched before. May I say to the gentleman from Nebraska and the gentleman from Indiana, who indicated they did not want to vote for a bill that regulated wages at all, that they can vote for the Ayres bill. It does not regulate wages. There is no basis in the bill that requires the carrying of any of these goods across State lines. In the committee bill and in the Albert bill it is required that one or more employees in the establishment must be working on goods produced for commerce or handled in interstate commerce. That is a primary and preliminary requirement. This, of course, has been litigated many times, and we are clear as to what it means. It goes ahead and says: even though an employe or employees handled these goods, we are not going to regulate it unless you do more than a million dollars in volume of sales a year. It seems to me that the bill which tortures the interstate commerce clause, that stretches it far beyond any point it has been stretched before, is the Ayres bill or the Kitchin bill. These are the bills that go into new fields rather the bill that is before us as the committee bill, or the Albert bill.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Pennsylvania.

Mr. DENT. As I understand the gentleman's discussion, he holds that a chain of stores with five or more in the chain operating in two or more States, regardless of volume of business, would be covered under this act?

Mr. SMITH of Iowa. That is the Ayres bill. We may take an example from the record of many department stores. We had better not name them. Anyway, there are a number of department stores that do hundreds of millions of dollars of business that are not covered, while a lot of other little businesses are covered.

Mr. DENT. I was trying to bring out the point of the chain. If the chain operates in two States or more, regardless of volume of business, they are covered. Here is a chain in the State of New York by the name of H. C. Bohok with 185 stores doing a business of $160 million. Would they be covered?

Mr. SMITH of Iowa. Yes.

Mr. DENT. The gentleman says they would be covered?

Mr. SMITH of Iowa. No, If they do not have any stores in another State even though they move goods in interstate commerce.

Mr. DENT. Take Wiebolds in Chicago with 11 stores; would they be covered? They only operate in Illinois.

Mr. SMITH of Iowa. If they only operate in Illinois, they would not be covered.

Mr. DENT. The three stores the gentleman referred to in Arizona, the Goldwater stores, would they be covered?

Mr. SMITH of Iowa. They would not be covered.

Mr. DENT. They do a volume of $6 million.

Mr. AYRES. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Ohio.

Mr. AYRES. Would you mind telling us what the average wage of these Goldwater stores in Arizona is?

Mr. SMITH of Iowa. I do not know the average wage, but I do know that it is not true that all big chains pay over the minimum wage.

Mr. AYRES. For the RECORD I would like to say that this particular chain referred to paid far above the minimum wage that you are proposing in the Albert bill.

Mr. SMITH of Iowa. I would like to point out that I did not ask that your words be taken down, mentioning the name of the store. I do not know how much all of these chains pay in wages, but we did have plenty of evidence before the committee that they did not all pay more than $1 or more. I think the average was 78 cents, as I recall it. But, the argument is not whether or not we are stretching the commerce clause; it has been stretched before, further than we ever want to use it in this kind of a bill. The only argument is where is the cutoff? In the committee bill and the Albert bill we cut off at $1 million volume, and in the Ayres we cut off according to where the store is located.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Ohio.

Mr. HAYS. Did I understand the gentleman to say that there is a chain of stores owned by a member of the other body which is exempt from this bill?

Mr. SMITH of Iowa. I do not know who runs them. I just mentioned that there is a chain of stores in Arizona that does a multimillion dollar business that is exempt.

Mr. HAYS. That is the same store that the gentleman from Ohio mentioned, the Goldwater store, previously?

Mr. SMITH of Iowa. Yes.

Mr. AYRES. Mr. Chairman, if the gentleman will yield, there are other chains, F. W. Woolworth, Sears, Roebuck, and Montgomery, Ward.

Mr. HAYS. I just thought you might want to take my words down. I thought I was an expert in getting around this. Now the name is in the RECORD.

Mr. SMITH of Iowa. Mr. Chairman, I yield back the remainder of my time.

Mr. KEARNS. Mr. Chairman, I yield 10 minutes to the gentleman from Michigan [Mr. HOFFMAN].

ON THE WIDE AND EASY, BUT DESTRUCTIVE, ROAD TO BUREAUCRATIC DICTATION

Mr. HOFFMAN of Michigan. Mr. Chairman, being a victim myself, permit me to express my deep sympathy for the gentleman from California [Mr. ROOSEVELT]. He has worked long and very closely with some who know about this type of legislation. I have heard him in committee. If anyone in the House ever made a more earnest effort to write a worthwhile bill, it has been my misfortune not to have met him.

We may not have a thought in common. Nevertheless, sincerely I feel sorry for him, because, after all his work, all his effort—and this is not uncommon, either—the party organization throws him overboard. So, here he is robbed of the sponsorship of a bill accepted by the committee, and here we are, and what the vote will be on some are in doubt.

To me, it does not matter, because it is not my intent to vote for any bill of this nature.

The bills to fix the minimum wage, maximum hours, follow the trend of much of the legislation enacted by the Congress in the last few years. Whether characterized as the New Deal, the Fair Deal, or the New Frontier, the professor's dream, the taxpayer's nightmare, whatever may be the purpose, the inevitable result of this type of legislation is to destroy our national independence,[1] our security, our opportunity for collective advancement, the protection of person and property guaranteed by the 5th and 14th amendments as well as the freedom of the individual.

Coming to Congress in January of 1935, one of my convictions was that adherence to the principles of the Declaration of Independence, the Constitution, and the Ten Commandments, together with the newness of our country and its natural resources, had given us the opportunity to establish, and we had established, a government which had not only given to our citizens the best form of government yet devised, but the then greatest opportunity for the exercise of individual freedom, the greatest degree of prosperity, anywhere existing.

Until recent years, throughout the world, our flag, the Stars and Stripes, was ever viewed as a symbol which guaranteed freedom and, by the exercise of a reasonable degree of individual initiative, financial security. It was ever beckoning to our shores the oppressed of other lands. Here in the melting pot of the world, the product was a free, self-governed people.

Disregarding the admonition of Washington to avoid entanglement in the affairs of other nations, we have, step by

[1] In the city of Paris on Sept. 3, 1783, that David Hartley, for the King of England; Benjamin Franklin, John Adams, and John Jay for the United States, signed their names to a treaty of peace between Great Britain and the United States, making the Thirteen States forever independent. That independence, so dearly won, was surrendered when we joined the United Nations—a group of 99 nations, each with 1 vote, equal to our own—although many number less in population or ability to contribute to the common good than some of our States.

step, but ever consistently and continuously, surrendered a part of our national sovereignty, some degree of our freedom of action as a government and as individual citizens, until today we no longer are an independent nation, a free people.

Our voluntary membership in the United Nations, in other international organizations and programs, has so involved us that no longer are we free to act independently as a nation.

Our national sovereignty, our independence, is so circumscribed by agreements with other nations that no longer can we protect our citizens from imprisonment or death in other lands; no longer can we declare or avoid war; no longer are our tax dollars levied or used to protect the future interests of our own people. We pay tribute to, submit to the blackmailing demands of other nations.

To Washington bureaucrats, the thinking of the intellectuals seems to be that, because of the progress we have made in various fields, we must forget the old, adopt the new. Do something—whether the result be good or bad. Scientists must be encouraged, even though we are now told, that if war comes, because of their discoveries and knowledge, civilization—if not all life itself—will be destroyed. A glorious end to scientific progress?

Some advocates of the New Frontier, though they accept the saying, "Dust thou art, to dust returnest, was not spoken of the soul," forget that the desire for freedom and security never dies. That the determination to be free, which carried the children of Israel out of Egypt, across the Dead Sea, and to 40 years in the wilderness, is still with us.

Down through the centuries, in India and in China, overpopulation and unemployment were solved by starvation.

We sometimes solve the problems raised by a growth in population by a war which kills off the most capable and promising.

The Chinese and Indian systems, from a dollar standpoint, are perhaps less costly. Under their practice the less fit die—that is the end—there are no justifiable but burdensome demands of dependents or pensioners for future generations to meet.

One result of surrendering our national sovereignty is that today we are at the threshold of war, no longer privileged to determine whether we go in or stay out. Yesterday the press told us, if quiet diplomacy fails tomorrow's sun may see us, without any action on our part, in another war.

The morning press tells us there is a rumor that our ships and the marines are already on their way to the Far East. This situation where we are unable to shape our own course toward peace or war has arisen because we have already committed ourselves to the orders of a one-world organization, to an all-out effort to save the world in a manner selected by others.

In days gone by when Britain was the mistress of the seas, it was her proud boast that the sun never ceased to shed its light on the flag of the British Empire.

Today, as one result of our disregard of Washington's warning, it might be said that in every land and sea throughout the world there lies what is left of an American who gave his life in a futile effort to make the whole world free. Regretfully it may be added that our heroic efforts have tended toward curtailing our own freedom.

The foregoing is cited because and only because our foreign policy is similar to, in one respect at least, our domestic policy of which this bill is a part, similar in that the trend is always toward a lessening of our national security, the curtailment of the freedom of the individual, an end to the basic thinking for which some of us assumed our forefathers fought, some died.

With the New Frontier came the acceptance of the political philosophy of the intellectuals, primarily the Harvard and other professors. This old, old thinking that a share-the-wealth program, more money in circulation, all activities controlled by a central government and its bureaucracy, would solve all our ills, has been sold to us by charming personalities who forget or ignore past experience—the lessons of history.

Another disturbing factor is that for some years the Supreme Court has been rewriting our Constitution which some intellectuals loudly insist is outmoded, unfit as a guide for present-day activities.

A few days ago, 250 so-called instructors, professors in higher institutions of learning [2] seemed to think that it was wrong to interfere with those who would, exercising their right under the first amendment, advocate the overthrow of our Government—even though violence might be necessary—that it was wrong to refuse to give opportunity for free speech to those who wished to support the proposition of the Communists that there is no God, that religion is a fraud, that priests and ministers are hypocrites. Let us give thanks that the House, when the issue came before it the other day, repudiated that thinking, supported the Committee on Un-American Activities, by a vote of 412 to 6.

We recently had a new translation of at least a part of the Bible.

The merit of the Ten Commandments has been called in question. The 10th states in part:

> Thou shalt not covet thy neighbor's wife * * * nor anything that is thy neighbor's.

The seventh is:

> Thou shalt not commit adultery.

And while no doubt every member of the Supreme Court adheres to those admonitions, the Court nevertheless has announced, apparently under the 1st and 14th amendments, that through the use of motion pictures it is permissible to portray "acts of sexual immorality * * * as desirable, acceptable, or proper patterns of behavior." [3]

Though the eighth commandment is clear in its statement, "Thou shalt not steal," the Supreme Court held that inasmuch as it was an established union practice it was lawful to compel one who wished to drive across the State line into New York with a load of merchandise which he intended to sell, to pay tribute to a union for that right, privilege.[4]

Another disturbing thought was the action of a few days ago when the House authorized the Secretary of Agriculture to incur obligations payable in cash up to $500 million without any action by our Appropriations Committee.

Unauthorized spending has made many fearful. Today's Chicago Tribune carries an objection by our colleague, the gentleman from Michigan [Mr. FORD], of the Appropriations Committee, to the purchase by the Air Force of planes costing $12 million without having first sought the approval of the Committee on Appropriations, the people's watchdog, charged with guarding their tax dollars.[5]

And so it was that during the past few weeks I have been questioning my early training and my present thinking, ventured back once more into the past, reread some of the books of my childhood days.

First, "The Story of Liberty," written in 1879 and which carried a chain of events through some 500 years beginning with the signing of the Magna Carta at Runnymede on June 15, 1215, and on down to the settlements at Jamestown on May 13, 1607, and Plymouth on December 21, 1620. It was a tale of deter-

---

[2] They sought to lend credit, give some weight, to their conclusions by advertising their connection with colleges or universities, thus giving the false impresison they were giving currency to the thinking of the institution itself. Contact with these colleges or universities discloses that few, if any, of the students accept the professors' views.

[3] *Kingsley International Pictures* v. *The Regents of the University of the State of New York*, 360 U.S. 684.

Concurring opinion of Mr. Justice Frankfurter (p. 692): "Whatever one's personal preferences may be about such matters, the refusal to license the exhibition of this picture, * * * can only mean that that enactment forbids the public showing of any film that deals with adultery except by way of sermonizing condemnation or depicts any physical manifestation of an illicit amorous relation. Since the denial of a license by the board of regents was confirmed by the highest court of the State, I have no choice but to agree with this Court's judgment in holding that the State exceeded the bounds of free expression protected by the 'liberty' of the 14th amendment."

[4] It should be added that Justice Roberts and Justice Jackson took no part in that decision, and that Chief Justice Stone, dissenting, wrote: "It is no answer to say that the guilt of a defendant is personal and cannot be made to depend upon the acts and intention of another. Such an answer if valid would render common law robbery an innocent pastime" (315 U.S. 521, 540).

[5] Chicago Tribune, Mar. 24, 1961: "Members of a House appropriations subcommittee have accused the Air Force of bypassing Congress in awarding a $12 million contract for jet planes to carry Government officials.

"Representative GERALD R. FORD, JR., Republican, of Michigan, called the purchase of the jets 'a gross example of absolute disregard of committee procedure.' He said the subcommittee looked into some jet procurement problems last year and 'here they go, without any justification, and decide they are going to buy six more.'"

mination, of courage, and of a victory finally won, an early victory establishing a few of our fundamental rights.

Again I read as in the days of long ago "The Boys of '76," which gave a little something of the trials, the hardships, the suffering, and the deaths, which apparently were necessary to establish our independence as a nation. our freedom as individuals, priceless treasures which we have since lightly surrendered not to greater armies or navies or force, but to forked, eloquent tongues of politicians who through words have accomplished what Britain's Navy failed to do in 1812, yielded to the payment of a tribute to which the Barbary pirates could not force us to contribute even one penny.

Picked up "Old Times in the Colonies" which carried an outline of the progress of ideas, gave information as to how and by what means freedom and liberty thrived.

Turned once more to "Building the Nation," written in 1882, which carried a picture of how our young Nation thrived and grew powerful, its people prosperous, because of adherence to principles carried in the Constitution and the matchless courage, endurance, and the thrift practiced by our people.

Worried, thinking of the future of my country, of the welfare of my children, my grandchildren, my great-grandchildren, I reached the conclusion that I just could not go along with measures which, in my judgment, tended to destroy our national sovereignty, the freedom of our people.

In my humble judgment, the pending legislation tends toward that end.

Legislation of the type now pending before us was introduced on May 24, 1937, after President Franklin Delano Roosevelt sent to us a message in which he wrote:

> One-third of our population, the overwhelming majority of which is in agriculture or industry, is ill nourished, ill clad, and ill housed.

Hearings were held and one purpose of the legislation, as stated in the bill, was the attempt "in a modest way to raise the wages of the most poorly paid workers and to reduce the hours of those most overworked"; to assist the worker "whose wages will not meet bare living costs and whose health is depleted through long hours of work and undernourishment, causing them to become a liability on their communities."

While supposedly remedial legislation has been on the books since 1938, a period of 22 years—it has contributed not at all toward a solution of the basic problem as is evidenced by the fact that, during the last campaign, we were told by candidate, now President, Kennedy, that 17 million people in the United States went to bed hungry every night.

While all support the purpose, favor the objective, it is obvious that raising wages, limiting hours of work has not, will not enable the American worker to purchase the current standard of living unless we fix the price of commodities and services he must purchase.

None seems willing to accept that proposition. Eventually, unless we are willing to live under a dictator or a bureaucracy, supply and demand—although harsh results may sometimes follow—must control our commerce, and legislation preventing the exploitation of the worker, protecting his health, must be enacted. In my judgment, those are the remedies.

Mr. FRELINGHUYSEN. May I ask the gentleman from Michigan what bill he refers to when he mentions "this bill?" We have before us the committee bill. We have the majority leader saying yesterday he felt the fight today would be between the so-called Albert bill and the Ayres bill. I wonder which bill he thinks we are primarily concerned with, and which is he directing his remarks to?

Mr. HOFFMAN of Michigan. In fairness and justice I think—it is only an opinion, although many of us appear to state facts when all we have is just an opinion—I assume that inasmuch as the gentleman from California now on the floor, who has spent so much time, so much earnest, patriotic effort in drafting a bill, I would think we should consider the Roosevelt bill, H.R. 3935, the bill reported by the committee, and, if the gentlemen want to offer a substitute, all well and good.

The gentleman being here when I spoke previously, permit me to again express the utmost sympathy for him, commend him because he so gracefully and uncomplainingly accepted this leadership—to me, unfair discrimination—I will not say lack of courtesy, but accepting the course which they thought necessary in order to get a bill.

I would like to know what is in the latest revised offering if I am going to vote for it, and I am not—what is in the yet unoffered bill, in the Ayres bill, the Kitchin bill, and the Albert bill, and any still to come. But just as a matter of passing interest, I would like to know what is in the next bill we may have before us.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. ROOSEVELT. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey [Mr. JOELSON].

Mr. JOELSON. Mr. Chairman, I rise in support of H.R. 3935. We have had a Fair Labor Standards Act now for 23 years. When that law was enacted, the conditions of the American worker in this country were miserable conditions, and he despaired and he was dispirited. I heard my predecessor at this microphone ask what this type of legislation could do for this country. Now I respect the Member who just spoke before me. He is many years my senior. He is a man of deeply held convictions. But, if I have read my history of the thirties correctly, it seems to me these great social programs of the 1930's put the American people back on their feet again and stopped them from listening to the siren songs that come from Moscow. It is the type of program that has made America great. But this is an old program. It does not face up to the need of our times any more. It needs to be extended and it needs to be improved and it needs to be revised. We must cover additional people. I do not think there is anyone who in good conscience can say to himself that a wage of $1-an-hour is inflationary. I think that when we say that in America we cannot afford to pay a man $1 or $1.25 an hour, we are betraying what we have come to know as the American dream. These are falsely technical arguments of people who are opposed to the basic concept of the Fair Labor Standards Act itself. They are afraid to go backwards because they know it is politically ruinous, but they refuse to go forward. I say we have a good bill before us. We have an effective bill. I know my colleague from New Jersey is going to ask me what bill I am talking about so I yield to him to ask me.

Mr. FRELINGHUYSEN. I would like to ask the gentleman from New Jersey, and I am reluctant to interrupt his very fine presentation, how he feels about the various labor bills before us. Can he enlighten us or can anyone on his side enlighten us about the specific provisions in that bill which has been called the Democratic leadership bill? The majority leader, as I am sure the gentleman knows, said that he undoubtedly expected the fight to be between the Albert bill and the Ayres bill, which would by implication repudiate the Roosevelt bill. I just wonder whether he knows what is in the Albert bill? Can he give us some idea of what it contains and his ideas about it?

Mr. JOELSON. I am speaking in favor of the Roosevelt bill, which I think is a fine bill. If I feel that it cannot pass I will take the next best bill I can get. I think you are, perhaps, concerned that we are going to get any bill at all.

Mr. FRELINGHUYSEN. I would like to see some bill passed, but I am beginning to have doubts in view of the fact that we do not even seem to know what is in the so-called majority bill. There has not been any discussion of its provisions in this body.

Mr. JOELSON. I am talking about the Roosevelt bill.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. JOELSON. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. Mr. Chairman, I just want to call to the attention of the gentleman from New Jersey the fact that there is a summary of the bill, as introduced by the majority whip, at page 4685 of yesterday's CONGRESSIONAL RECORD along with the full text of the bill. I think it is inaccurate to say that there has been no discussion on this floor of what has been in the Albert proposal.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman from New Jersey yield for a question?

Mr. JOELSON. I think I have yielded quite a bit of my slightly allotted time, and this being my maiden speech, jI would like to finish it on my own terms.

I merely want to conclude by saying that the arguments that have been raised against the bill are false and technical. We cannot regard $50 a week take-home pay for the average head of

an American family as inflationary in America. We cannot say that putting purchasing power into the hands of the American people will cause unemployment. This is a good and effective bill.

Mr. Chairman, I yield back the balance of my time.

Mr. KEARNS. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio [Mr. ASHBROOK].

Mr. ALGER. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield.

Mr. ALGER. Mr. Chairman, I appreciate the gentleman's yielding. I simply want to join with my colleague the gentleman from Michigan [Mr. HOFFMAN] in his earlier statement and say that in my opinion the whole bill is unconstitutional. The imposition of Federal minimum wage is unconstitutional. I, too, have listened to the debate so far and intend to listen to the remainder of it. I also intend to try to make the bill as good as possible with regard to preserving the rights of our individual citizens, and then finally to vote against this proposal because in my opinion it is not constitutional.

I thank the gentleman for yielding.

Mr. ASHBROOK. I would say to the gentleman from Texas that I, too, have listened to every bit of the debate. I would say, Mr. Chairman, that listening to all of it and all the different points of view I certainly would not find myself able to say that anyone has misstated an opinion. I believe, however, it is my duty to point out that there is a great difference between opinions and misstated facts. I found it very difficult during the campaign to believe that Candidate Kennedy, now President Kennedy, who had as a Member of Congress served on the Committee on Education and Labor, and later as a Member of the Senate-sponsored minimum wage legislation, would not make what I consider to be a misstatement of opinion, but rather a misstatement of fact; in fact, I, being in the newspaper business, realize that sometimes we do not always properly report a man and I was inclined during the campaign to give him the benefit of the doubt.

Last night, however, Mr. Chairman, with my own eyes I witnessed the television playback of the press conference, and with my own ears I heard the very words which I would like at this point to read into the RECORD. I think it is significant because our President, having a forum, as he has, to project his views to all the people, should while having the greatest latitude for opinion, at the same time be very careful in making factual misstatements, which I believe were made last night; and I refer particularly to this statement:

> I find it difficult to know why anyone would oppose seeing somebody by 1963 paid $1.25 in interstate commerce and in the new coverage we're talking about businesses which make over $1 million a year and I find it difficult to understand how anybody could object to paying somebody who works in a business which makes over $1 million a year by 1963 $50 a week.

Mr. Chairman, I would point out the fact that in two instances our President used the phrase "makes $1 million" and has made what I think all of us would agree to be a misstatement of facts, a misstatement of facts which would lead many people to ask: "What is wrong with taking $1.25 an hour from these millionaires?"

Quite the opposite from what is stated, this bill does not talk about $1 million in the sense of profit, but rather in the sense of gross sales. I am a small businessman. I am talking about businesses that do anywhere from $50,000 to $100,000 gross a year. The bill in its reference to dollar volume refers to a $1 million gross and not that the firm earns or makes $1 million. I therefore, would like to see this point corrected, because I think it is wrong to leave with the American people the impression that it is being taken from people who are making $1 million net a year.

Mr. MEADER. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Michigan.

Mr. MEADER. Does the gentleman know whether or not the average retail sales organization makes about 1 percent on its gross sales?

Mr. ASHBROOK. I would think it would be a little bit higher than that, but I know it is a low percentage.

Mr. MEADER. If the percentage is 1 or 2 percent, then on a business which grosses a million dollars a year there would be a profit of $10,000 a year?

Mr. ASHBROOK. Yes.

Mr. MEADER. In the sense of making a profit, is that correct?

Mr. ASHBROOK. I would think you would have to sell well over a hundred million dollars of goods a year to make $1 million.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from California.

Mr. HIESTAND. For the record, and I am sure the Members will appreciate this, it is a well established fact by experience and statistics that large chains and large stores not only make more dollars than small stores, but they actually earn a greater percentage of sales than smaller stores. I have a couple of figures here. I shall not ask to have them all put in. For R. H. Macy & Co. their net earnings are 1.4 on sales. That is to say if R. H. Macy & Co. had gross sales of $1 million it would be earning 1.4 percent, $14,000. The average of 24 big companies, 2.7, the average of 35 chainstores, food, 1.3. I could name a lot of individuals or wholesalers and jobbers, 1.7. For chains other than food, 2.9. These are averages.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. KEARNS. Mr. Chairman, I yield the gentleman an additional 2 minutes.

Mr. ASHBROOK. Mr. Chairman, I thank the gentleman.

I would like to add one last point. As I have listened to all of this debate it has been interesting to find out those who consider themselves to be friends of the small businessman. I would only leave the question in each of your minds as to the comparison between the bills. If you were a planner or person seeking to usurp local and intrastate commerce and the right of State legislatures, which way are you going to get to the small businessman, the man who grosses $50,000 or $100,000, a purely local business? Is it going to be through the dollar volume test, or is it going to be through the test of five or more stores in two or more States? I suggest we all can answer that question very simply, Mr. Chairman.

I would say, as a member for two terms of the Ohio Legislature, and serving on the Labor Committee, I found that our legislators are competent to act in this field; I find that they will, if the need is brought before them, and if the facts are shown to merit it, vote for minimum wage legislation. I oppose the effort to extend minimum wage coverage into purely local business. To me that is one more step toward economic and political dictation of our lives.

Mr. ROOSEVELT. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I am about to yield to the gentleman from North Carolina [Mr. KITCHIN] for the purpose of discussing the Kitchin-Ayres bill. I would like to point out to my friends on the other side, of course, this is coming out of the time of the proponents, and if he should need more time I hope the gentlemen on the other side will take care of it.

Mr. AYRES. I think we can cooperate. Will the gentleman from California have any objection if we put a speaker on before Mr. KITCHIN?

Mr. ROOSEVELT. No. I have no objection.

Mr. KEARNS. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. CURTIS].

Mr. CURTIS of Missouri. Mr. Chairman, I think this is the time to try to develop some of the basic and economic philosophies behind the minimum wage bill. First, I may say I personally believe that the minimum wage law has proven to be a very valuable economic tool. I am very fearful if we change the basic theory behind it we might damage something that has proven to be quite valuable.

Second, I think the amount of the minimum wage is something that we should constantly adjust as our economy moves forward in increased productivity. The last time I was in somewhat of disagreement with my own administration on the amount. It is always a question of difficult evaluation. I felt $1 was justified and the administration thought 90 cents was a more realistic figure, I am not at all sure but what they might yet have been right. But, there is an area for honest disagreement.

The point I am getting to is the basic philosophy itself, and the gentleman from Michigan [Mr. GRIFFIN], developed that to some degree in referring to the statement of Secretary of Commerce Hodges.

Yesterday I referred to the statement of Secretary Goldberg on page 25 of the hearings, to which I will call attention again, and I am going to direct a question to the chairman of the subcommittee, the gentleman from California [Mr. ROOSEVELT], to find out his

interpretation of this philosophy, because I think it is very basic. Mr. Goldberg stated:

> In fact, protection under the present law is denied to some 20 million men and women in private industry, but I also realize that we have to progress step by step, somewhat haltingly, to achieve the act's original purpose.

Now, that implies—and I suggest it probably is the philosophy of Secretary Goldberg and possibly of the gentleman from California [Mr. ROOSEVELT], that this should be a complete coverage, and the only reason we are not there now is because you cannot take it all at one bite, the people will not stand for it, or because we have to move slowly. But, there is quite a bit of difference in basic philosophy from complete coverage and the philosophy that I suggest lays behind the basic law.

Is it the philosophy of this administration, as the gentleman understands it, from the testimony of the Secretaries of Commerce and Labor, to move eventually to complete coverage at the Federal level?

Mr. ROOSEVELT. I would have to say to my good friend that I do not believe that is either the philosophy of the present administration or the philosophy of the gentleman from California. I think the philosophy that the Secretary of Labor was referring to was the necessity of moving forward as circumstances obviously make it necessary, as we have seen from the time we started with a minimum wage of 15 cents and then up.

Mr. CURTIS of Missouri. Not the amount, because I agree. I am talking about coverage; whether it is to cover everyone.

Mr. ROOSEVELT. And also that it obviously is quite right and proper, as I think I expressed yesterday, that when you have a change in the economic conditions, which means the largest number of workers who used to be engaged in industry or commerce, now are in white collar or blue collar work, particularly in the retail services; that if these people have been creating an economic pocket where they are suffering from getting wages below a decent minimum wage, that it is proper and within the authority of the Congress under the basic act of 1938 to reach into that field. However, that would not imply that either Congress or any individual felt that that included everybody but only those who specifically obviously needed the protection of the act.

Mr. CURTIS of Missouri. Then, I suspect my observation is correct, because I think everyone in the lowest brackets would need it. So, there is no limit.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield for one further observation?

Mr. CURTIS of Missouri. Certainly.

Mr. ROOSEVELT. I am sure the gentleman is supporting the Kitchin-Ayres amendment. Now, the Kitchin-Ayres amendment would also extend coverage into this field, and if the gentleman's remarks are accurate, then they would imply the same thing, because some future Congress can do that, also.

Mr. CURTIS of Missouri. The only reason I can support the Kitchin-Ayres bill above the Roosevelt bill is at least it uses the same recognized standards of measuring interstate commerce, but in directing my attention to the economic features I must confess that I have not heard evidence here or in the hearings before the Joint Economic Committee that would lead me to believe that this additional coverage is necessary to accomplish the purpose of raising all wages in our labor market whether covered by the minimum wage law or not.

Now if I may direct myself to what I believe is the original theory behind the minimum wage coverage, and what I think is a good theory still, it is that we cover a substantial portion of the labor market. What is substantial is always subject to review and discussion, but a substantial portion, on the theory that if we cover a portion of the labor market, the rest of the labor market is thereby uplifted and affected through what has been referred to as the rippling effect.

The rippling effect has its impact in two ways; one, within the industry itself by continuing the wage differentials, so that we go up above the floor to much higher wage scales, up into $3 and $4. And the second is in the area of noncovered employment.

It is pointed out on page 180 and 181 of the hearings where there is a discussion and a quotation from the Labor Department on the rippling effect. Let me read from page 181.

> The Labor Department further pointed out that the $1 minimum had a wage-boosting effect even in industries not covered under the law: "Some of the workers to whom the act does not apply obtain rates of $1 or more as a result of the Federal minimum rate's effect in labor markets."

Then it goes on to point out that Gov. Averell Harriman of New York said this to the legislature—and this is quite important:

> Within the past year, legal minimum wages have been increased in 6 of the 10 industries covered by minimum wage orders. We estimate that some 150,000 employees had their wages increased as a direct result of these orders, and that an additional 450,000 received increases as an indirect consequence of the order.

That is 3 times the number. All economic studies that I have seen in this area indicate that this rippling effect is an accurate thing. It does work and it has the basic advantage of preserving flexibility in this system. If you go, as I see it, into this complete coverage concept you are going to build into this system a rigidity that will badly damage it and prevent it from having this very desirable effect.

The second basic philosophic concept I want to call attention to—and this gets down into semantics, to a large degree—is this. This is a minimum wage. The concept was minimum, not average. It was not a concept of what a man and wife and children need to support themselves. And I must disagree with my friend from Arizona [Mr. RHODES], in presenting that point of view. I have heard that philosophy. But I think anyone reading the history or examining the economic theory behind it realizes that what we are talking about, of course, is a floor. And the floor, of course, applies to that which is the minimum; the person who is the new entrant, if you please, although we have created some flexibility which I think is desirable, for apprenticeships. But essentially it is the first entrant into the labor force or the person who is working, let us say, to supplement the income of the rest of the family, the 18-year-old. It is a minimum. And I think it is wrong when people refer to the dollar or the 90 cents or when it was 40 cents, by asking what are really ridiculous questions—who can live with a family on this amount of money? Because the answer, of course, is that no one can. It was never intended to be that. But by putting in a floor we did create a device, an economic tool which raised the living standards of people above the minimum, above the floor so they would have enough wages to support a family.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. CURTIS] has expired.

Mr. ROOSEVELT. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. CURTIS of Missouri. I thank the gentleman.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield to me?

Mr. CURTIS of Missouri. I yield.

Mr. ROOSEVELT. May I simply point out to the gentleman that with much of the last part of his remarks I agree. I think he will also agree that no one wants to keep any part of our economy living in the cellar. They ought to come up to that floor.

Mr. CURTIS of Missouri. That is correct; but it is the rippling effect, I might say to the gentleman, that does exactly that.

Mr. ROOSEVELT. May I call the gentleman's attention to the January 1961 report of the Secretary of Labor, which, incidentally, was not the report of the present administration but of the previous administration. On page 18, in paragraph 4, the next to last sentence in the first paragraph reads:

> More frequently, the higher paid workers received no increases on the effective date of the new minimum, or received increases of less than 25 cents, resulting in a narrowing of occupational differentials. In subsequent years, occupational differentials tended to be partially restored.

Mr. CURTIS of Missouri. That is correct, but the gentleman will notice the key words "on the effective date." It really takes a year or so for this wage differential actually to expand again. But it certainly and inevitably has that result. I wanted to point out this, too, if I may. The area where we have unemployment the greatest, where the average is 17, 18, and 20 percent, is in the unskilled, semiskilled, new, and untrained labor force group. That is exactly the area that would be most damaged, because we do have an unemployment effect whenever we raise the

minimum wage; and I am in favor of the $1.15, I might say.

Mr. ROOSEVELT. The narrowing of the gap was also tremendously affected by the productivity which the people who got that minimum wage as well as other segments of society were able to bring about. Therefore, the actual minimum wage increase was not responsible for that.

Mr. CURTIS of Missouri. It is the productivity increase that has achieved this. It is productivity increases in our economy alone that permits us to raise the minimum wage rate from time to time. For that very reason the escalator clause in the Roosevelt bill or any escalator clause in any minimum wage law violates the basic economic concept contained in the law. We can only raise the minimum rate after we have achieved economic success, not before. Raising the rate before we have had productivity advance to justify it will damage our economy through inflation and unnecessary unemployment.

I hope 28 months from now our economy will have advanced to the point where we can raise the rate to $1.25 an hour, but it is a cruel and dangerous thing to fool our people into thinking that we can do it now through blind appeal to the humaneness that we all possess.

Mr. HIESTAND. Mr. Chairman, I make the point of order that a quorum is not present.

Mr. ROOSEVELT. Will not the gentleman withdraw that? We are trying to get through, and that only delays the whole House.

Mr. HIESTAND. I do not think a quorum is present.

The CHAIRMAN. The Chair will count.

One hundred and eleven Members are present, a quorum.

Mr. ROOSEVELT. Mr. Chairman, I yield 15 minutes to the gentleman from North Carolina [Mr. KITCHIN].

Mr. KITCHIN. Mr. Chairman, at the outset let me thank my good friend from California for affording me this opportunity to at least further confuse the issue if it is not already totally confused.

Mr. Chairman, I have joined with my colleague on my left, my good friend, Mr. AYRES, in sponsoring a bill that we feel is a moderate approach to what is apparently required at this stage of the game as a minimum wage amendment. I would like to say at the outset, too, that in joining a so-called coalition with the gentleman on the left, there have been certain disparaging remarks made about the gentleman from North Carolina, which I am thickskinned enough to understand why they are made and thickskinned enough to at least accept them at face value. But, I want to straighten the record at this particular point.

Last year when this particular subject was up for debate, the gentleman from North Carolina and the gentleman from Ohio offered practically the same bill, but I was not at that particular moment, as I am at this particular moment, put in the position of opposing the leadership on my side of the aisle. This is, indeed, an embarrassing situation, but it does not in any sense of the word or by any stretch of the imagination change my basic philosophy when it comes to protecting the integrity of constitutional government in the United States. I am going to pursue the course I pursued last year and try to at least present the facts, as I see them—or maybe I should qualify that and say—I will try to express an opinion, rather than to labor upon the subject of facts, because I am not an expert in the labor law; I am not an expert economist; I am not a member of the committee; I am not assuming a position of any authority when it comes to either constitutional law, the technical provisions of the Fair Labor Standards Act or the technical provisions of what is now called our modern-day economics.

I would like to say at the outset, however, that in this particular subject I am not ignorant from the standpoint of ordinary commonsense and what I feel is the best for my country. There is going to be offered by my colleague, the gentleman from Ohio [Mr. AYRES] from the minority side, what is commonly called the Kitchin-Ayres bill or the Ayres-Kitchin bill or whatever you want to call it—when we get under the 5-minute rule and when we get to that particular point. But, so many statements have been made with reference to jurisdictional questions, I would like at least in my humble way to express an opinion as regards jurisdiction and the constitutional question. In debate on the concept offered by the committee last year and again this year and the Roosevelt bill, which is the committee bill, and in the concept that is offered in the substitute bill that will be offered by the gentleman from Oklahoma [Mr. ALBERT] which he filed on yesterday, there have been criticisms saying that the Kitchin-Ayres concept in including these chain operations operating in interstate commerce is not a particular factor because they are not an interstate commerce enterprise proposition, retail establishment or whatever you want to call it—I say it is an interstate business.

I would like to say at this particular point that under both the concept of the Roosevelt bill and the concept of the Albert bill, and I hope to ask some questions about that in a little while, the jurisdiction of the Federal Government is assumed by certain prerogatives established within the statute itself, if these bills are passed, which is all-embracing. It throws a complete tent over our total economy and then exempts under a jurisdictional section those that do not come up to a certain dollar volume test. They say just because a chain operation operates in two or more States that that does not constitute interstate commerce. Let me say this, not being an expert on constitutional law, that probably the Kitchin-Ayres concept is skating on thin ice when we bring in this particular concept, but, if we are skating on thin ice by this particular interpretation, I am frankly and honestly of the opinion that we have not as yet fallen through into the cold waters of total Federal economic control as we would be under any other concept heretofore offered.

We are at least carrying our particular interpretation of the interstate clause down to an operation which involves operation in two or more States. You may say that we are arbitrary. Perhaps we are. You might ask: Why not one or more stores operated in two or more States? Why not two or three? The answer is we had to get a cutoff somewhere and want to make it reasonable in its relationship to retain merchandising.

That, of course, is arbitrary. But let me say to you, Mr. Chairman, that as far as the interstate operation under the original act is concerned, the concept of the Kitchin-Ayres bill is, we think, on safe ground. Why?

The gentleman who preceded me, I believe, made a comment with reference to the flow of goods in interstate commerce or the operation of employees in handling goods. That was the prime criterion and the basis upon which the original act was brought to the floor in 1938.

But here we have an operation in two or more States, most of the operations having a central buying service, most of whom have central warehouses out of which they take this merchandise, carry it across State lines, put it into inventories in stores in other States. Here we have an operation that not only is operating under the laws of State A but is also operating under the laws of State B, and possibly State C; that are going out of the State in which they originated, to take advantage of tax cutbacks, tax writeoffs, and other advantages of the laws of another State that enter into a chain operation. These are taken advantage of generally by a chain operation, and there are many other economic facets. When these companies move inventories across State lines they cease to become, in my opinion, someone who is in the operation of a simple ordinary retail establishment whose goods flow into his establishment, then into the community by sale to the consumers; on the contrary we have a chain operation under our bill operating to a great degree moving their goods in interstate commerce. Not only their goods, but also they move their auditors in interstate commerce. They control the employment of employees in all their units for a central control. In this respect may I say, Mr. Chairman, that I think we are approaching more nearly the real concept of the Fair Labor Standards Act of 1938 than the concept that would allow the Federal Government to assume jurisdiction over our total economy just because somebody happens to be fortunate enough, or unfortunate enough, to make a dollar volume of "blank" dollars. Today they are assuming a dollar volume of $1 million. Next year may be less.

But let us look at it from another viewpoint. Consider an owner, a proprietor, or an employer, operating with an efficiency greater than that of a competitor. Let us look at it from the viewpoint of the employees who are employed

within the confines of these establishments: Here are employees employed in store A whose proprietor or owner has been a progressive man who advertises, who has remodeled his store front, who has up-to-date, modern merchandising services, and has largely by these particular means done a million-dollar or more business in gross volume. His employees come under the act in the concept of the Roosevelt bill.

Store B across the street is not progressive. The proprietor has not put on a new store front, has not adopted modern merchandising methods, does not advertise. He grosses less than $1 million. His employees would be penalized under the committee bill.

So we must also consider the rights of the employees at the same time we are talking about the rights of the proprietors.

The chainstore owner, the chain operator, the big operator, can protect himself, he can narrow his employment down, he can put in a cashier up front and discharge other employees, he can put a larger price on his merchandise and let the consumer take the shock of his burden. But what about the employee who is going to be transferred out of a job because of this unreasonable proposition?

Mr. Chairman, something has been said with reference to the amendment by the Albert bill, that there will be a cutoff or an exemption for retail establishments that do not gross over $250,000. I will ask about it in a minute.

I want to announce now that in the Kitchin-Ayres bill, when it is offered on the floor when we get under the 5-minute rule, there will be contained an exemption, where each of the establishments in an enterprise meeting this five-store, two-State test, that do not gross in excess of $250,000 per establishment will be exempt. We will talk about that when we get to consider the bill under the 5-minute rule.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from California.

Mr. ROOSEVELT. Is there a copy available of this newest change in the Kitchin-Ayres bill?

Mr. KITCHIN. It has just become available; yes.

Mr. ROOSEVELT. I would appreciate it if the gentleman will give me a copy.

Mr. KITCHIN. I will.

Mr. Chairman, I would like to talk for a moment if I have time left, on the Albert bill. I would like to speak a moment about the accelerated wage rates in the Albert concept, and in the committee concept. I cannot stress this too strongly, Mr. Chairman, that we are now dealing in an accelerated future rate and its future impact on the economy about which we know very little. As a matter of fact, we not only cannot anticipate what our economy is going to be 2½ years hence when this $1.25 will go into effect, we cannot even understand the impact upon our economy at the present time.

We have at the present time more unemployment, according to the labor statistics, than we have had in the past 20 years. It is paradoxical to me how we can raise the minimum wage and still create more jobs. I can say definitely it will not do that in my section of the country. It will cause more unemployment.

With reference to how it is going to affect the economy at the present time I tell you there was this week a meeting by those Members of the Congress who are interested in the textile industry of our country. They are determined to try to get the President of the United States to do something about setting quotas by country and by category. It is again paradoxical to me that we say in one breath the wage differential on foreign imports is killing our local industries by creating a wage and price differential we cannot compete with, and in another breath say that we ought to raise the minimum wage to $1.15 and in 2½ years to $1.25.

The CHAIRMAN. The time of the gentleman has expired.

Mr. AYRES. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. KITCHIN. I thank the gentleman.

I would like to ask the gentleman from Oklahoma if he will answer a question or two.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from Oklahoma.

Mr. ALBERT. By way of a preliminary statement may I ask that the gentleman from California yield the gentleman such time as I may use. I want to state that there is no personal feeling involved in this matter so far as the leadership is concerned with reference to my friend, who knows the esteem in which I hold him personally, a man I know to be a man of integrity and one of the finest and most distinguished Members of the House.

I realize my own lack of qualification in this matter. I am not a member of the committee. I am not a great constitutional lawyer, and there is a lot I do not know about labor legislation. But I do want to assure my friend that his attitude on this measure does not change the attitude of myself, and I think I speak for everyone that I know of with respect to our personal regards for him.

Mr. KITCHIN. I thank the gentleman very sincerely. Now, I assume from that that I should ask these questions of the chairman of the subcommittee. Would you rather the questions be directed to the gentleman from California or some member of the committee?

Mr. ALBERT. It will be satisfactory with me for you to interrogate the gentleman from California, since the basic principles of my bill, with substantial exceptions, are in his bill.

Mr. KITCHIN. I thank the gentleman. First, I should like to make a statement and have the gentleman from California follow me on this, and if the statement is incorrect, will the gentleman interrupt and clarify the situation?

In the Albert bill, I call attention to the gentleman from California, on page 4 something new has been added; something new that I simply do not understand, and I do not believe a large portion of the membership of this body understands, and I am bringing it up at this particular time because I think when we get under the 5-minute rule we will have so little time to try to understand the new provisions of this particular concept. On page 4, in the paragraph under the definition of "Enterprise engaged in commerce" and then going to line 5, here is the qualification I would like to inquire about:

> If not less than 25 per centum of the annual gross dollar volume of business (exclusive of excise taxes at the retail level which are separately stated) of such enterprise is made from sales or services which require, or depend on, shipments of goods in commerce or engagement by employees in commerce or in the production of goods for commerce.

Now, may I ask this question? I am assuming that this would embrace a retail establishment if it meets the dollar volume test and does not come under the $250,000 exemption. If it is a mercantile establishment making in excess of $1 million gross, that the interstate commerce definition here, where it says "depend on" would include this example:

A mercantile establishment in Nashville, Tenn., which meets the other test, orders goods that are manufactured in the State of Tennessee; he orders these goods from Memphis, from Knoxville, from Chattanooga, but those goods are put on the L. & N. Railroad, or whatever common carrier it takes to ship those goods from those points of origin to destination, and it is under a waybill, and that particular railroad, as you know, is controlled and it is in interstate commerce, I would ask the gentleman if less than 25 percent of that stock of goods came from within the State of Tennessee by means of an interstate commerce carrier, that this would not bring him within the definition "depend on" interstate commerce?

Mr. ROOSEVELT. I would say to the gentleman that after consulting—because I knew that this question would be raised—with the distinguished attorneys who had a hand in drawing this from the Department as well as from the staff of the committee that such an interpretation would be wrong, and I think it is important that we now clarify it for the legislative record.

Mr. KITCHIN. May I ask the gentleman from California, in clarifying this, if he would give us his opinion as to what "depend on" means in this particular section.

Mr. ROOSEVELT. I not only will tell the gentleman what is my opinion but the opinion of those who drew it. It is the intent of those who drew it, and we want it clearly understood, that that shall be interpreted as meaning that actually goods must be ordered from out of State, must cross State lines and then be resold and become a part of the volume of business of the concern. Is that clear, sir?

Mr. KITCHIN. Yes. But here I put the words "depend on" in. Is not that

covered in the language "of such enterprise is made from sales or services which require, or depend upon, shipments of goods in commerce ——"

Now, eliminating the words "depend upon," the gentleman's illustration is covered in those two phrases, is that correct?

Mr. ROOSEVELT. In our opinion they are not. I am not a lawyer, but I think we can make it completely legislatively clear that that is not the intent. The intent is solely that it shall mean that it depends upon goods which have actually crossed State lines in getting into the establishment from which they are sold.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman.

Mr. HIESTAND. May we then say that this clause exempts no other establishment?

Mr. KITCHIN. I assume that question is directed to the gentleman from California [Mr. ROOSEVELT].

Mr. HIESTAND. That is correct.

Mr. ROOSEVELT. I do not quite understand the gentleman's question.

Mr. HIESTAND. Can we not say that it exempts no other institution doing, say, $1 million gross volume?

Mr. ALBERT. Mr. Chairman, will the gentleman yield to me?

Mr. KITCHIN. I yield to the gentleman.

Mr. ALBERT. I think it should be crystal clear that this is an exemption over and above the $250,000 per establishment, over and above the $1 million gross enterprise exemption.

Mr. ROOSEVELT. That is correct.

Mr. KITCHIN. I understand that clearly and if I could speak for the rest, I assume the rest do. Can the gentleman from California give me out of his great experience an illustration of any mercantile establishment which would not meet the interstate commerce test under this particular 25-percent depend-upon clause? Can the gentleman name an establishment, a retail store, that would not come under the provisions of this act?

Mr. ROOSEVELT. Yes, sir; I believe I can. There are certain stores in the city of Los Angeles which primarily, wholly sell summer goods, garments which are made in the garment trade, the garment industry of the city of Los Angeles. Their volume is well over $1 million. However, in this instance they would not be covered because they do not get 25 percent of their goods for sale across State lines. What they sell is made within the State of California, practically all of it.

Mr. KITCHIN. Under that particular illustration that the gentleman has drawn, I will ask him if he is still of the opinion, and his counsel with whom he has discussed this, that this particular store operating in Los Angeles, if the goods they order from within the State of California are carried into Los Angeles by a common carrier, they would not meet this 25-percent depend-upon clause test?

Mr. ROOSEVELT. If they stayed wholly within the State of California, as long as they did not cross State lines, it could not be counted in the volume that had been made as at least a part of that 25 percent.

Mr. KITCHIN. When the time is right, will the gentleman consent to the deletion of the words "depend upon" from this particular act?

Mr. ROOSEVELT. No, sir; I do not think I could, because our attorneys tell us that this is the proper way to get at the goods crossing State lines. If you took that out, you would be eliminating the requirement that they must cross State lines. And I could not agree to that.

Mr. KITCHIN. I might say that I am not a technician, but speaking only as a country lawyer and interpreting statutes, I would say that the words "depend upon" go much further than counsel with whom the gentleman has consulted apparently think. And until counsel would be willing further to explain this—and I hope it will be further explained when we continue the debate under the 5-minute rule—I trust he will be willing to substitute other words so as to get these words "depend upon" out of this particular bill.

Mr. ROOSEVELT. May I just make the point that I think it is clear from the colloquy that we have had between ourselves, but if the gentleman can bring to us before we consider the bill under the 5-minute rule additional words to make it clear, I am sure we would be happy to consider it, because that is our intention.

Mr. KITCHIN. We will dismiss that for the time being.

I should like to ask one more question with reference to the Albert bill. I am referring especially to section 17 of the act itself. As I recall, this was also in the bill the gentleman from California sponsored, in the bill that is now before the House. In section 17 there was the proviso under the original law involving injunctions that was injected into the act in 1949, as I recall, that read as follows:

Provided, That no court shall have jurisdiction, in any action brought by the Secretary of Labor to restrain such violations, to order the payment to employees of unpaid minimum wages or unpaid overtime compensation or for an additional equal amount as liquidated damages in such action.

The Albert bill and the Roosevelt bill delete that proviso and give the Secretary of Labor the authority to go in and in injunction proceedings take the action away from the original litigant—the employee in these circumstances—and prosecute the act for the employee. Do I understand it is in the new bill, too?

Mr. ROOSEVELT. It is in the new bill, but for this reason, that the Secretary's testimony, if the gentleman will read it, pointed out that in many, many instances where there was an unwillingness to pay the wages found to be due, where because of various situations the employer could bring pressure upon the employee so that there was no way to get it to the employee, the Secretary felt that in fairness to that employee where this had been already adjudicated as being necessary, he should go in and establish a way of getting the money back to the employee to whom it was due.

Mr. KITCHIN. So the same provision is in the Albert bill that was in the Roosevelt bill in connection with the injunction provision?

Mr. ROOSEVELT. That is right.

Mr. KITCHIN. I thank the gentleman.

Mr. KEARNS. Mr. Chairman, I yield 14 minutes to the gentleman from New York [Mr. GOODELL].

Mr. ROBISON. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman from New York.

Mr. ROBISON. May I say to my colleague from New York that I have been following the remarks of the gentleman from North Carolina with considerable interest because as this debate has progressed it seems to me the only formula on which a majority of us might be able to agree would be in some combination of the five and two, or the interstate commerce test, with the unlimited $250,000 cutoff feature. I introduced such a bill yesterday. It is H.R. 5888.

Mr. GOODELL. May I say the gentleman from New York has made a very great contribution to the solution of this problem.

Mr. BECKER. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman from New York.

Mr. BECKER. I wonder if the gentleman would tell me what bill they are discussing before the House, whether it is H.R. 3935 or the various bills introduced by the gentleman from California [Mr. ROOSEVELT] since H.R. 3935, or whether we have been discussing the Albert bill here in the last 15 or 20 minutes. Just what bill are we discussing now? There are many deviations in this bill and I have not the faintest idea which bill we are discussing, before we get to reading the bill under the 5-minute rule. Will the gentleman tell me?

Mr. GOODELL. It appears we are discussing them all. I am going to try to clarify that point.

Mr. BECKER. I wish the gentleman would. I do not know which bill we are working on.

Mr. GOODELL. Mr. Chairman, in checking the committee bill, the Roosevelt bill, against the Albert bill, when we got a copy of it, there appear to be 17 changes made in these bills. I think it is very important that we understand just exactly what these changes involve.

May I ask the chairman of the subcommittee, Mr. ROOSEVELT, some questions about this Albert bill. I assume the gentleman is the correct person to whom to address these questions.

Leaving aside the dollar-volume figure, can the gentleman conceive of any store which would not be covered by this language on page 4 of the Albert bill which, among other things, the gentleman from North Carolina [Mr. KITCHIN] quoted including the words "sales or services which require or depend on shipments of goods in commerce."

Mr. ROOSEVELT. I would say to the gentleman, I already answered that question and given a specific example.

Mr. GOODELL. I have consulted with some of the attorneys who have worked a long time on this labor act. They tell me they feel the language, which you have now included on page 4 is actually more expansive than the language you had before because these words "which require or depend on shipments of goods in commerce" are just about as broad as you can get them. It includes virtually everything. Frankly, I think you could include my own residence, my home, because I think most of the goods in my home probably came through commerce and depend on it by this language. I well recognize that you have other exemptions stuck in here on a dollar volume basis, but I am talking about this key question which we have been discussing here for so long as to the extent of the commerce power of the Federal Government and how far we should apply it under this law.

Mr. ROOSEVELT. I would say to the gentleman, that attorneys can always disagree, but I also know we have made legislative history on the matter, which, to me, makes it very clear as to the intent of the authors of the bill and those who have cooperated in putting it together.

Mr. GOODELL. May I say the history of these labor bills is that you make a legislative history and then the Labor Department goes about expanding their power just as far as it can go. There is a very good illustration of that in this little controversy we had earlier this week about the distinction between service and retail establishments when the Labor Department since 1938 have by official bulletins and otherwise distinguished service from retail establishments and listed service establishments, specifically including hotels and motion picture theaters. Then this week or last week the Labor Department made the statement that they have never distinguished them. I do not think we ought to write legislation on this floor which depends on the discretion of the Secretary of Labor to limit the jurisdiction of the Federal Government.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman from California.

Mr. ROOSEVELT. I would agree with the gentleman. If I thought that, I would not be wanting to insist on this language. However, if the situation should ever arise that the gentleman has pointed out, I think we would do exactly what the gentleman, or rather what the gentleman from Ohio [Mr. AYRES] and the gentleman from North Carolina [Mr. KITCHIN] have done—they would take the necessary legislative action to make it clear. If that situation arises, we would be forced to do so. However, I can see no possibility of that at this time.

Mr. GOODELL. Yesterday at the very last moment, this bill was introduced.

Mr. ROOSEVELT. The gentleman would agree that the other bills were introduced at almost the same last moment, would he not?

Mr. GOODELL. Oh, no; you mean the substitute bill?

Mr. ROOSEVELT. Mr. AYRES, and Mr. KITCHIN's last substitute bill.

Mr. GOODELL. The substitute bills have been exactly the same from the beginning with one exception. When the Labor Department started running away from its own history, officially documented for 22 years, we decided we had better not leave discretion with the Secretary of Labor in this field and we had better pin him down in the act itself. That was the main change made.

Mr. ROOSEVELT. They did not submit it for the committee's consideration.

Mr. GOODELL. The committee has considered this in the past and so has the Labor Department.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman from California.

Mr. HIESTAND. Returning to this clause on page 4 "which require or depend on shipments of goods in commerce", that clearly includes purchases as well as sales. The purchases of goods may have been in Los Angeles, referring to the example that has been used here, but those goods may have been made in New York, and it clearly enters interstate commerce under that definition. Can we say that this clause is put, since it is all-inclusive and will exempt nobody—can we say it is put in just as a meaningless gesture?

Mr. GOODELL. I have a suspicion along that line because we have had so much discussion about intruding the Federal Government into places it does not belong that they have come up with a clause which purports to limit the intrusion of the Federal Government and actually probably does not limit it at all. As a matter of fact, it may expand it. But yesterday when this substitute bill was introduced I said to the gentleman from California that there was some language that had not been considered by either our subcommittee or the full committee. I quoted it to him. It was the words "require or depend on shipment of goods in commerce." The gentleman from California responded, and I quote him:

> May I first point out to the gentleman from New York that if he will look at the committee bill he will find reference to "per centum across State lines" in many parts of the bill before us. Therefore, it has been considered and it is not a precedent.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield.

Mr. ROOSEVELT. Does the gentlemen remember the part of the bill which had these words in it:

> Any employee employed by an establishment which qualified as an exempt retail establishment under clause (2) of this subsection and is recognized as a retail establishment in the particular industry notwithstanding that such establishment makes or processes at the retail establishment the goods that it sells: *Provided*, That more than 85 per centum of such establishment's annual dollar volume of sales of goods so made or processed is made within the State in which the establishment is located.

That is the same principle.

Mr. GOODELL. I do not think it is the same principle. You have that same clause in section 13(a)(2) and in 13(a)(4) which the gentleman just quoted. These are the provisions relating to 50 percent of sales made within the State. In 13(a)(4) the language reads "85 per centum of goods made or processed within the State." There is a big difference in the clauses there between sales made within the State and sales or services which require, or depend on, shipments of goods.

Mr. ROOSEVELT. What we are talking about here is the percentage of goods that crosses State lines. The reference in this section is to interstate commerce.

Mr. GOODELL. The gentleman will concede, then, that the phrase "which require or depend on the shipment of goods in commerce" does not appear in any Federal statute and does not appear in the committee bill.

Mr. ROOSEVELT. I cannot tell; I have not examined all the Federal statutes. It is not in my bill.

Mr. GOODELL. If I may say so, that clause "which require or depend on shipment of goods in commerce" is going to be wide open to court interpretation, and they are going to legislate a completely new field of Federal jurisdiction as a result of it; and the very meager legislative history that we are able to make on this floor will not restrict that jurisdiction significantly.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I appreciate the points the gentleman has raised. I would like to call attention to the fact that we have now spent almost 6 hours in debate on this and other bills, and there has as yet, been no particular discussion of the new Democratic leadership bill, the Albert bill. As the gentleman from New York has pointed out, this bill substantially changes the committee bill, and is differentiated from the Roosevelt bill or any other that is up before us, and I fail to understand how we can get to this stage of the discussion without some advocacy of what presumably we will be expected to vote on, and be asked to approve in a very short time.

Mr. GOODELL. I thank the gentleman from New Jersey. I share his frustration; and I might say that just a few moments ago the gentleman who introduced this bill, the gentleman from Oklahoma [Mr. ALBERT], made the statement that it contains the basic principles of the committee bill, but that there are substantial exceptions. We have had no discussion here about what the "substantial exceptions" are. They have not been considered in committee, and we are dealing with a very complicated and new clause. We should understand what is included within the scope of this expansive language.

I am very fearful of it.

Mr. FRELINGHUYSEN. As members of the committee and as Members we are entitled to know what is in the bill, and what changes are being proposed. I would like to ask someone who is sponsoring the Democratic leadership bill

whether there is any truth in the teletype announcement that "House Democratic leaders made a new concession today and picked up the support of an influential southern Congressman for their drive to pass a trimmed-down version of President Kennedy's minimum wage bill" by agreeing to delete and exempt all laundry workers from coverage. Is that true or not; and is it not about time we had discussion of it?

Mr. GOODELL. One of the things that troubles me most about this whole procedure we have been following is that it is apparent now that instead of writing minimum legislation we are vying as to who can make the most concessions to special interests who want to get out. We are not writing good legislation.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman from California.

Mr. ROOSEVELT. Of course, it depends entirely on who is doing this type of activity, because, as our distinguished majority leader pointed out, when the Landrum-Griffin bill came out, it was brought on the floor at the last minute. When the Kitchin-Ayres bill was up last year for consideration we had the same situation. But this year when it happens to be the Democratic leadership that is doing it, gentlemen across the aisle do not like it so much. But this is part of parliamentary procedure, and I think the gentleman knows that. We will be able to discuss it under the 5-minute rule. It will be thoroughly debated. I might also point out to the gentleman if he is at all worried about the use of the language, he might go through and read, for instance, on page 40 of our committee bill, wherein Puerto Rico and the Virgin Islands sections are set out. We definitely talk about production of goods for commerce, where they appear, or in any enterprise engaged in commerce or the production of goods for commerce.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. KEARNS. Mr. Chairman, I yield the gentleman an additional 5 minutes.

Mr. ROOSEVELT. Let me complete my statement. I think that the gentleman very conveniently always forgets when he says we can go out and apply it to all business, that there are specific limitations, and I emphasize the limitation of $1 million as well as the $250,000 cutoff.

Mr. GOODELL. That is my very point, the point I tried to make here, and I think it is a point every Member of this Congress should understand. When you come right down to it, the only reliance you have on keeping these smaller local operations out of Federal control is your volume sales in dollars and as soon as you start moving that figure down they are all coming under it. In this Albert bill you have now introduced it is exactly the same thing; it is not changed. It depends on the volume of sales in deciding whether the Federal Government has Federal jurisdiction or not, and it will not protect our local industries from the Federal invasion we are concerned about as a basic principle.

May I say that I have consulted very good labor lawyers on this point, men whose names would be known to a good many Members here, and they have told me that in their opinion the language which you have added here, putting it on the basis of shipments in commerce, may very well expand jurisdiction, not contract it. That is the type of thing which needs careful analysis in committee hearings.

May I say to the Members of this House that, in my opinion, the Albert bill is merely an attempt to divide and conquer. The obvious objective of the gentlemen who are presenting the committee bill is to expand Federal jurisdiction as far as they can. They are willing to make any concession today in terms of special exemptions, in terms of exclusions, in terms of the size of the dollar volume test. What they are going to do as soon as they get this principle of Federal jurisdiction established is move those exemptions out of the picture, bring down the dollar volume until every local enterprise is covered by this law. Perhaps I misstate your motivations, and I would be happy to have you speak on them on your time, if you will.

But, my main point remains that whether those are your present motivations or not, all you need do, if we accept this bill, is to reduce the dollar volume figure to accomplish that precise result of putting all our purely local enterprises under Federal jurisdiction. I will have to fight that as long as I have breath to stand here and argue about it.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman for Oklahoma.

Mr. EDMONDSON. I just wondered if the gentleman would not also recognize the fact that "25 percent of whose volume depends upon goods in interstate commerce" is also an important distinction present in this language.

Mr. GOODELL. I do not think it is an important distinction. The point is, if you say "depends on," it virtually brings in everything; as I say, the things in my own home.

Mr. EDMONDSON. Is the gentleman seriously contending that there are no retail outlets that do not depend on 25 percent moving in interstate commerce? I am thinking of the retail outlets on the highway, for instance, selling local products, such as fruits and pottery and things of that kind. You see them constantly on the highway.

Mr. GOODELL. You are putting this in the discretion of the Secretary of Labor, and I cannot think of any broader language than the words "depend on commerce." He will expand this as far as he can. They will send a wage-and-hour man into this man's place of business on the highway and say, "Where did you purchase this merchandise?" and force him to make an inventory of where he got it, if it came from in or out of the State, and the merchant will have to prove that he bought more than 75 percent of his merchandise within his own State. Now, that is not the kind of a situation we want.

Mr. ROBISON. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROBISON. Mr. Chairman, coming from the great State of New York, whatever extension of the Federal minimum wage and hour laws we may now decide to make into the retail field will be of no particular effect in my home district. We presently have a statewide $1 minimum wage law, which minimum has been in effect in our larger cities for several years insofar as the retail trade is concerned.

However, I recognize that few States in this Union are as progressively minded as is New York, and I am inclined to believe that the Federal Government has a proper concern in this problem. It is our duty, as I see it, in determining what extension to make of coverage, to make sure that we do not do violence to the constitutional limits of that concern.

Although the matter has been hotly disputed by the proponents of the committee bill, H.R. 3935, it is my judgment that the philosophy which is therein embodied; namely, that the only thing necessary to justify Federal minimum wage and hour law intervention into the retail and service fields is that such an enterprise do a certain dollar volume of gross business a year, sets up both an arbitrary and an unconstitutional standard. It is a standard that potentially could and, if we decide to use it, undoubtedly would wipe out all State jurisdiction over labor standards in a few more years.

As I have studied this issue of extension therefore, I have concluded that the five-and-two or interstate commerce test that was embodied in the original Kitchin-Ayres substitute, so-called, is much more preferable. Perhaps it could be said that it, too, is in a sense an arbitrary standard as of course it is, but nevertheless it does seek to limit Federal control over wages to what most of us have always considered to be interstate commerce, as the gentleman from North Carolina [Mr. KITCHIN], has just explained it, and so there is little wonder that it has captured the imagination of those of us who have sought to do just that. What that test fails to recognize, however, is that regardless of ownership one store must compete with the store next door, and that, at least on the level of small business, retailing is essentially a local proposition which cannot be separated into national versus local ownership.

As the various proposals spread before us began to narrow down to the committee bill and the Kitchin-Ayres substitute, it seemed to me more and more that the only formula upon which a majority of us might possibly agree would be a combination of the five-and-two test of the substitute with some sort of a gross dollar-volume cutoff. Accordingly, earlier this week I introduced my own bill, H.R. 5719, which embodied the bistate test in conjunction with the exemption of those retail outlets of a

chain of less than 15 stores that did less than $250,000 business a year, lifted out of the committee bill.

Further study of the problem convinced me that this, too, was not the answer I sought, and that there was no real justification for limiting that dollar cutoff to the smaller chains, so on yesterday I introduced the same measure but without the less-than-15-store standard. That new bill is H.R. 5888, and I regret that, with so many of us burdening the printer with our last-minute thoughts on this complex problem, copies of it are not now available, but I am delighted to now note that the proposal I have made may now become the new Kitchin-Ayres substitute and that it will receive serious consideration.

Mr. ROOSEVELT. Mr. Chairman, I take great pleasure at this time in yielding 5 minutes to the gentlewoman from the State of Washington [Mrs. HANSEN].

Mrs. HANSEN. Mr. Chairman, President Kennedy, while a Member of Congress, said:

> When we permit the growth of a depressed class numbering millions whose members cannot afford the bare necessities of life, we pay a heavy price. We undermine the general prosperity of the Nation which rests upon consumer purchasing power, we promote the spread of slums, of crime, of disease, of all ills that grow from hopeless poverty.

Let us direct our attention to the actual human beings the President was talking about. They are not statistics but real people with real problems. The Bureau of Labor Statistics found, in 1959, that it required over $5,000 a year to maintain a family at a modest level of living. Yet all that we legally require, under the present $1 minimum, is that covered workers be paid at a rate which yields an income of less than half of this amount.

Over a million workers in manufacturing industries now earn less than $1.15 an hour, and about 804,000 of the employees who would be newly covered by the bill are paid less than $1 an hour. We don't know how they manage. Either they are living on inadequate diets, postponing urgent medical treatment, or skimping on other necessities that most of us take for granted. The vicious cycle of substandard existence is made up of many elements, and each element is aggravated by others. Deprivations in areas of diet, health, housing, clothing, and education have a snowballing effect, and the end result is that it becomes more and more difficult for the victim to lift himself out of his depressed state.

The one important common denominator that we find in these situations is low income. In a very real sense, this is the key to the whole problem. People who live in slums and who exist on substandard diets don't do it for pleasure. They would prefer—and this is what actually happened when minimum wage protection was applied in the past—they would prefer to pattern their lives more closely after the accepted American standard, and abandon that poverty which breeds slums, crime, and disease.

It would be unrealistic to maintain that the present bill will entirely remove the evils I have been discussing. Poverty has many causes, and must be fought on many fronts. It is equally clear, however, that the problem is sufficiently critical to the Nation's future—to the future of those free institutions we cherish—that we must not hesitate to take a step, even if small, to help us achieve our goal.

Mr. ROOSEVELT. Mr. Chairman, I yield such time as he may consume to the gentleman from Washington [Mr. MAGNUSON].

Mr. MAGNUSON. Mr. Chairman, I rise in support of the committee bill, H.R. 3935, which would extend Federal minimum-wage protection to some 4,311,000 workers presently not covered by such protection. Under this bill, coverage is extended to include five categories of enterprises engaged in commerce or the production of goods for commerce.

May I point out that we are dealing with a minimum wage; that is to say, a wage floor upon which the actual wages paid to workers in covered industries may rest, but below which it may not fall. Although in some areas the minimum wage allowable becomes the actual wage paid to workers, this ought not to be the case, for the amount specified as a minimum wage—in this case $1.25—is to be considered a bare minimal subsistence wage. Between 1956 and 1960, the Consumer Price Index rose by 11 percent. The real product per man-hour in the private sector rose by 13 percent during the same period. Thus, even were the escalator provisions lacking, the proposed increase would raise the minimum real wage only to a point comparable to that of 1956.

In a recent editorial, the New York Times noted that "the establishment of a minimum wage for those unable to protect themselves is a long accepted and necessary function of the Federal Government." Here it seems proper to note especially that a minimum wage is most important to those workers who are not sufficiently organized to protect themselves, workers whose capacity to produce entitles them to a living wage but whose condition of employment precludes their demanding it.

Even the $1.25 figure falls below that which would be necessary to meet what the Bureau of Labor Statistics and the agencies of the various States have designated as ample to maintain a "modest but adequate" level of living, even for a single person, and far below that necessary for the support of a family. In Seattle, for example, the Bureau sets the wage needed to support a family of four at $6,562, while that of a single person—female—stands at $3,005.

The effects of the proposed increase are not expected to be adverse to industry. Past experience has shown that such increases have tended to stimulate rather than depress business. Retail employment in the State of Washington in 1959—the year the minimum wage was raised to $1 per hour for the retail trades—increased by 4.5 percent and increased an additional 3 percent the following year, almost twice the rate of employment increase in other industries in the State. Despite warnings by those who opposed minimum-wage legislation in 1956, the Wage and Hour Administrator afterward informed Congress that of the 2,100,000 employees affected, less than 2,000 were discharged or otherwise adversely affected.

By the provision for a base annual volume of sales of not less than $1 million marginal industry is exempted specifically from coverage under the bill. Special protection is provided further for the marginal worker. While oppressive child labor expressly is prohibited in the bill, specific exemption is made in favor of the employment of full-time students at less than minimum rates in retail establishments on two conditions: First, that the work fall outside school hours, and second, that the employment not be of a type normally given to full-time employees. In addition—under section 14—the Secretary of Labor is permitted to make special provision for the employment of learners, apprentices, or of individuals whose earning capacity is impaired by age or physical or mental deficiency or injury. This exemption has been included in the bill to avoid the curtailment of opportunities for employment for those who possess a capacity to produce without entering directly into the competitive labor market.

As a further cushion to the business community, an escalator provision has been included in the bill. Accordingly, those already covered by minimum-wage legislation will receive an increase to $1.15 during the first and second years after the effective date with an increase to $1.25 thereafter. Those workers newly covered will receive a minimum of $1 the first year, with subsequent increases each year reaching the standard $1.25 after the third year.

Another result of the enactment of minimum-wage legislation well might be a leveling effect upon the national wage structure. In Seattle and other areas of the country where the trade unions have long been active, where the working force has developed high technical skills, and where labor's bargaining position is relatively better, living standards and wages have been elevated proportionately. Thus, these areas are placed at a competitive disadvantage with some other areas of the country which possess an abundance of unskilled or semiskilled labor, where producers are able to make a profit only at the ultimate expense of employees to whom they pay a bare subsistence wage. By raising the rate and extending the coverage of the minimum wage, the committee bill may produce a more equitable balance in the national industrial complex, while raising the standard of living for presently ill-compensated workers and encouraging a higher degree of competence.

Mr. ROOSEVELT. Mr. Chairman, I yield 1½ minutes to the gentleman from Colorado [Mr. ROGERS].

Mr. ROGERS of Colorado. Mr. Chairman, I asked recognition for the purpose of getting an interpretation of the two bills we have before us for consideration. On page 42 of the Roosevelt

bill there is reference to enterprises, hotels, motels, restaurants, or hospitals, and the same definition is included in the Albert bill. What I want to know is, would this apply to dude ranches, seasonal operations such as we have in the State of Colorado, which operate for only 3 to 6 months of the year?

Mr. ROOSEVELT. In my opinion, both the section the gentleman referred to, and on page 20, line 24, the seasonal exemption, as I understand those operations, would apply to them.

Mr. ROGERS of Colorado. What the gentleman refers to is in the Albert bill on page 20. It refers to any employee employed in an amusement or recreational establishment that operates on a seasonal basis. It is exempt because it is recreational?

Mr. ROOSEVELT. I believe the gentleman is correct. It would be construed as a recreational institution.

Mr. ROGERS of Colorado. I thank the gentleman.

Mr. ROOSEVELT. Mr. Chairman, I yield as much time as he may consume to the gentleman from New York [Mr. ANFUSO].

Mr. ANFUSO. Mr. Chairman, we have heard many reasons for improving the minimum wage offered by labor and enlightened businessmen. We have also heard the reasons why certain trade federations oppose the modest improvements contained in the Labor Committee's bill. It is time we considered the views of consumers. Often the trade federations, stating their opposition to this legislation, attempt to speak for the consumer. They argue that the modest minimum wage improvements would be inflationary and therefore contrary to the interests of the consumers.

I think it would shed considerable light if we listened to the consumers themselves on this point, rather than the spokesmen for industry.

In looking over the hearing record of this Congress and past Congresses, I am struck by the fact that not one single consumer organization has come forward to oppose minimum wage improvements. On the contrary, several organizations representing consumers voiced strong support of the legislation this year and in past years. These groups completely rejected industry's inflationary arguments.

One of the very strong points they make is to point out that the impact on total U.S. payrolls of the proposed legislation would be very slight. This is a very important concrete point to keep in mind.

In the first year after enactment, the Labor Committee's bill would add $550 million to the buying power of low-income families. This figure represents a minute increase in relation to total U.S. payroll today—merely one-half of 1 percent of total wages and salary payments. During the subcommittee's hearings, the spokesman for the National Consumers League stated:

> We do not believe that wage increases of this magnitude would have an inflationary impact.

She went on to point out that—

> experience in the States shows that even larger proportional increases in wages have been offset without difficulty because of the increased efficiency they have stimulated.

The lack of inflationary effect of past minimum wage increases is borne out by the intensive study made by the U.S. Department of Labor after the increase of the minimum wage from 75 cents to $1 an hour in 1955. The Department reported to the Congress that there were no noticeable effects on either the wholesale or consumer price levels.

And what about the effects of minimum wage on the retail trade industry? A detailed study was made by Prof. Arnold Tolles, of Cornell University, when New York State issued a minimum wage order for $1 an hour for the retail trade several years ago. Professor Tolles found in interviews at 50 retail food stores in New York State that "none of the managers of these stores reported any increase in consumer price markup as a result of the increased minimum wage."

He paid particular attention to 42 stores where the minimum wage order had an especially large impact. In those stores he found that "only 5 of the 42 store managers even claimed that prices to consumers had been raised because of the wage order. Professor Tolles concluded flatly that "There was no evidence that the wage increase contributed to price inflation."

No evidence whatsoever exists from past experience that the cost of minimum wage improvements were passed along in toto or in large part to the consumer. But let us assume for the moment that this were to occur. The total increase of the Nation's price levels would be less than 1 percent—less than 1 percent. This is hardly inflation. But, as I have said, not even this minute increase will occur.

The consumer groups also point out several other important economic factors which obliterate completely the inflation hobgoblin. For example, they point to the fact that the increased purchasing power resulting from the improvements in the minimum wage would be placed in the hands of low-income people who will use the additional money to buy food, clothing, and other necessities of life.

These types of goods are in excessive supply today and have been for some time past. Therefore, rather than bidding up prices by competing for scarce goods, low-income people, helped by this bill, will actually relieve the Nation of the burden of many stockpiled agricultural surpluses. And they will give a needed stimulus to the clothing and textile industries.

It is much to the consumer witnesses' credit that although they have proved no price increases will result from the minimum wage increase, they have categorically stated that they would not mind paying somewhat higher prices because they "do not want a bargain at the expense of the men and women who produce the goods we buy." That is what the consumer witnesses told the subcommittee, "we do not want a bargain at the expense of the men and women who produce the goods we buy."

I think we would do consumers a great injustice if we were to take the trade associations' word that substandard wages protect consumers from price increases. I think the evidence the consumers themselves have offered is conclusive that they are not the narrow-minded, self-interested group the opposition to H.R. 3935 would like us to believe.

I therefore urge my colleagues to follow the urgings of the consumer witnesses and approve the committee's minimum wage bill.

Mr. ROOSEVELT. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. COHELAN].

Mr. COHELAN. Mr. Chairman, we have heard a lot about the inflationary effects of higher minimum wages. Our Chamber of Commerce friends insist that if wages are raised, business must increase prices or lay off workers. They generally ignore the great benefit which the economy derives from the minimum wage by stimulating improvement in industrial efficiency.

I am glad to say that our experience in the past has proved the Chamber of Commerce to be wrong. What are the actual facts, as established by the Labor Department studies? The facts are that the number of layoffs following the increase in the minimum wage to $1 in March 1956—layoffs which could be attributed to the higher minimum wage—was negligible. And what happened to the prices of commodities produced in industries where workers received wage increases because of the increase of the minimum wage to $1? The Labor Department study shows that between January 1956 and January 1957, the index for prices of commodities produced in low wage industries rose less—2.6 percent—than the index for all commodities which rose 4.5 percent.[1] The Labor Department report goes on to say:

> During the longer run period, January 1956 to January 1960, there was virtually no increase in wholesale prices of products of low-wage industries while the increase in the index for all commodities was 6.6 percent.

The low-wage industries which produce these products were able to adjust to their increased wage cost without raising prices. As a matter of fact, by mechanizing and generally improving their operations, these industries have placed themselves in a stronger economic position. This was proved during the 1958 recession and is being proved again today by the fact that they have not suffered as much as the high wage industries.

Mr. ROOSEVELT. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. RYAN].

Mr. RYAN. Mr. Chairman, I hope this House will give approval to H.R. 3935. There is abundant evidence of an urgent need for this legislation. For some years the Congress has considered proposals to amend the Fair Labor Standards Act. During the last Congress the failure of Congress to resolve the differences in conference resulted in

[1] Nineteen hundred and sixty report by Secretary Mitchell submitted January 19, 1961. Report submitted to the Congress in accordance with the requirements of sec. 4(d) of the FLSA, p. 20.

frustrating the will of the majority, which had passed different versions of this legislation. We are obligated, it seems to me, to the many segments of our population who are deprived of the protection of the Fair Labor Standards Act to take action, and to take action now, to extend the benefits of this humanitarian legislation. Rising living costs and increased productivity justify this long-overdue legislation. Increased wages for thousands and thousands of workers means increased consumer spending and greater economic growth, which should help bring the Nation out of the recession.

H.R. 3935 represents a constructive advance. I would have preferred that we have a minimum wage of $1.25 now, not 2 years from now. This would yield approximately half a billion dollars increase in wages the first year instead of $240 million, which is now expected. I also believe the coverage should be extended to workers not included. Few of us stop to consider that 22 years after the Fair Labor Standards Act became law only about one-half of the American workers are protected under it.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. RYAN. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Is it not the understanding of the gentleman from New York that the Democratic leadership has abandoned H.R. 3935 for the so-called Albert substitute? As I understood it, the majority leader yesterday said the fight today would be between the Albert bill and the Ayres bill. Presumably the Roosevelt bill has been abandoned. Is that not the gentleman's understanding?

Mr. RYAN. As I understand the situation, we are now debating H.R. 3935, and that is the bill to which I am addressing my remarks. I should like to point out there are millions of workers in restaurants and hotels and motels who are not covered. We also have the situation, which has been dramatically brought to public attention, of migrant workers throughout the country who are not covered. These are matters to which I hope we will address ourselves in the future.

Mr. Chairman, now for a moment I should like to make a few observations regarding those provisions of this bill which deal with Puerto Rico and the Virgin Islands. I believe it is well known that the Fair Labor Standards Act has a special provision for these areas and provides a means of setting minimum wages in the different industries there. There are special tripartite industry committees composed of representatives of employers, employees, and the public, who are appointed by the Secretary of Labor, which hold meetings and review the evidence and recommend minimum wage rates in the industries. This provision was written into the law in recognition of the peculiar conditions found in Puerto Rico and the Virgin Islands. However, past experience has shown that whenever Congress raised the minimum wage, corresponding wage revisions in Puerto Rico and the Virgin Islands lagged behind—not because the local employers were not able to meet the higher rates, but purely due to administrative difficulties. It takes time to get people to agree to serve on the committees. It takes time to get committees to meet after they are appointed. It takes time for the committees to hold hearings and to reach decisions and for final orders to be entered and to become effective. Thus, after minimum wage rates become effective for the mainland, Puerto Rican industries sell their goods on the mainland and compete with firms in every State of the Union and obtain a competitive advantage. But, more importantly, their employees do not receive equal treatment with employees in comparable industries in the States.

H.R. 3935 seeks to remedy this defect. But, at the same time, it does it in a judicious manner. It provides for the same automatic percentage increases in the existing minimum wages in Puerto Rico and the Virgin Islands as are provided in the States—15 percent for the first 2 years, then 10 percent. But, at the same time, it safeguards against possible inequity by providing that the Secretary of Labor can convene tripartite review committees to reexamine the floor which would otherwise be imposed on the industry by the percentage increases. The review committees after the examination of evidence, may recommend a wage to supersede the percentage increases, provided, of course, such wage does not exceed the stateside minimum.

I commend this section to the Members of this body.

I believe H.R. 3935 is a constructive step forward.

We have heard prophecies of doom from those who oppose the basic concept of minimum wage legislation ever since the fair labor standards law was enacted in 1938. With each proposal for an increase in the minimum or an extension of coverage, no matter what the economic circumstances of the time, dire predictions blossom forth. This opposition is rarely, if ever, directed to the merits of the legislation; it seems to be merely opposition to change, voiced by those of tired ideas. Abundant experience under this legislation has proven it to be most salutary. As we move forward into the 1960's, let us turn deaf ears to false prophets. We have tarried long enough; the time to amend the Fair Labor Standards Act is now. The way to do it is the measure before us—H.R. 3935. And I urge my fellow Members to support this legislation.

Mr. KEARNS. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. JENSEN].

Mr. JENSEN. Mr. Chairman, I learned early in life that the only fair way, the best way, yes, the American way, to insure for oneself the most permanent progress, promotions and thus an increase in wages, was for me and all wage earners to do a little more each day than my boss expected me to do. That, Mr. Chairman, was the position taken years ago by an overwhelming majority of our wage earners and which lent greatly to the upbuilding of our free private enterprise system which made our Nation the freest, the strongest, and the greatest nation on the face of this earth.

However during the past almost three decades, and since the powerful union labor czars have forced private industries who employ a total of around 14 million men and women to pay a wage, generally speaking, not commensurate with productive worth to their employer, all of which was forced through strikes and intimidation, to the end that the employer was obliged to agree to such demands or close their doors, sometimes for long periods and too often permanently, the final result being to so greatly increase the cost of manufactured goods to the point that the price is so high on such produced goods as to stifle the purchase of such goods, and, impossible to compete with much foreign imports, produced by much lower paid wage earners.

Hence as time goes on this problem multiplies itself by leaps and bounds. You may ask why Congress does not do something about it. Congress has earnestly tried, by adopting the Taft-Hartley Labor Relations Act and the Landrum-Griffin bill, but the facts are, most of the horses had already been stolen before the barn door was closed. Now we have before this House a minimum wage bill which seeks to force millions of free private enterprise businesses under Federal domination even to a greater degree than all the Federal burdens they are already carrying on their overloaded shoulders.

Mr. Chairman, our Founding Fathers never intended that the Federal Government interfere in the relations between employer and employee, when they established for America our free private enterprise system of government. There is no question Mr. Chairman that, if the bill now before the House is made law, thousands upon thousands of our smaller retail and service establishments will be forced to do one of three things: (1) Sufficiently reduce the wages of their present employees whose wages are now more than $1.25 per hour; (2) fire a sufficient number of their present employees in such numbers as to hold their total wage costs to the present level, or (3) the employer has yet that great and free American privilege of closing shop.

Therefore, I shall most certainly vote against this bill, which I am sure if made law, will be greatly detrimental to millions of our wage earners and employers alike.

Mr. KEARNS. Mr. Chairman, I yield 6 minutes to the gentleman from Ohio [Mr. AYRES].

Mr. AYRES. Mr. Chairman, it has been my privilege to be a member of the Committee on Education and Labor since 1957. During this time I have been a member of the subcommittee handling minimum wage legislation. In the past 4 years, I have attended 149 hearings on this legislation. The bulk of those hearings, of course, were held prior to this Congress. However, the information we gained under the leadership of our late colleague, Mr. Kelly of Pennsylvania, and under the leadership of Congressman LANDRUM of Georgia, and during this brief span under the chairmanship of the gentleman from California [Mr. ROOSEVELT], I do feel we have

adequate information to discuss and to pass this legislation.

However, I am more concerned in the last few minutes than I was previously. There is no doubt if the House understood clearly and specifically what was in the so-called Kitchin-Ayres substitute, they would pass it this year the same as they did last year. I felt that if we were to pass this legislation it might possibly be changed in conference. However, this has just come across the ticker tape, and I quote:

The Kennedy administration called today for House passage of a compromise bill which would raise the minimum wage to $1.25 in 2 years, but limit new coverage to 3.8 million more workers. Labor Secretary Goldberg announced the administration position in a statement which he said had the President's approval but—

And this is the most important part—

Goldberg indicated the President still hoped to achieve the administration's objective and an extension of the coverage to 4.3 million workers through Senate action and a Senate-House compromise.

This makes it more important than ever that the concept contained in the Ayres-Kitchin amendment pass this House; otherwise, we have nothing to bargain with in the conference. You talk about the $1 million test; there is no doubt in my judgment but what the other body would lower that to $500,000, and then we would be in conference deciding whether we could agree on some figure between $500,000 and $1 million.

I think the Secretary of Labor has made it very clear as to what his position will be.

What is the basic issue? The basic issue is whether or not the Congress of the United States is going to blanket every business in this country under a dollar volume test or confine extended coverage to interstate commerce. Actually there is not any argument over the rate at this time, and I am not one of those who is going to be critical of the President for what he said last night on television. I think it was a misunderstanding on his part, but he has been saying the same thing so often—and I am glad that the House has finally advised him about it. You heard yesterday what he said in New York on October 19, 1960. These are his exact words:

We fought in the last Congress for a bill to provide $1.25 minimum wage for restaurant employees, retail services and all the rest. Mr. Nixon says it is extreme. I do not think $1.25 an hour for someone who is working in a business which makes $1 million a year is an extreme wage.

Since last October he has been saying this, and it was only natural that he should say it the same way last evening, but I think we all understand that the test is gross volume in dollars.

However, we are not talking about $1.25 for these workers; we are talking about $1.15. That is all there will be under any of these bills that are proposed before the Congress now. It will be 2½ years before $1.25 will become effective, and I know it is the concensus of a great many Members, including myself. Should my people send me back 2 years hence and conditions warrant it, one of the first bills I introduce will be to increase it to $1.25.

The real issue is, how are we going to determine the expansion of this bill. What do we consider? What is fair and equitable? We extend coverage to strictly the interstate retail establishments. We have then a formula within the Constitution.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. KEARNS. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. AYRES. Mr. Chairman, under the amendment that will be offered only those employees working for an employer who is operating five or more establishments in two or more States will be covered and, then, even under that concept those establishments in an enterprise doing less than $250,000 will be exempt. This exempts the small operator even though he might have a number of establishments. We felt that was the only fair thing to do. We thought of doing it last year. Both Mr. KITCHIN's amendment and mine include this provision. Other than that, this is almost an identical bill that this House passed last year by a vote of 211 to 203. Being honest with yourself, if you supported this proposition last year, if you agreed with this concept of interstate commerce, frankly I do not know how you can in clear conscience reverse your position by dollar volume coverage. When the bill is offered a more detailed discussion will be made under the 5-minute rule.

Mr. ALGER. Mr. Chairman, will the gentleman yield?

Mr. AYRES. I yield to the gentleman from Texas.

Mr. ALGER. Mr. Chairman, I must say to the gentleman I am impressed by what he has said here and by what the gentleman from North Carolina stated. Some of us, regardless of the difference in various areas, at least, I am, are concerned about any type of minimum wage at this time, not because we are unaware of the fact we want people to have as much income as they can get, but because of the economic situation.

Does not the gentleman think those of us who are opposed to any minimum wage, in trying to bring out a bill, might get behind the gentleman's version because it is economically more sound than the alternatives offered by the other side, and protect the freedom of the individual worker and, for that matter, help the workers by not causing more unemployment because of the coverage going too far on the other side?

Mr. AYRES. I thank the gentleman. He is absolutely right. As I pointed out, if you don't adopt the Ayres-Kitchin approach to the interstate commerce concept and cover those with five units in two or more States, then we have nothing to argue about in conference except how much broader you will make it.

Mr. ALGER. In good conscience we could support the Kitchin-Ayres bill and then again, in our own dedicated belief, oppose that bill in the final analysis?

Mr. AYRES. That is correct.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. AYRES. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I wish to congratulate the gentleman for a very able presentation. He has stated what he feels is the major issue. I wonder if the gentleman would not agree with me also that perhaps there is also what might be called a subsidiary issue. Are we not being asked to buy a pig in a poke? We have used up almost 7 hours of general debate. Yet there has been no discussion on one of the major alternatives presumably to be presented. Under the 5-minute rule, perhaps, we may have discussion on the Democratic leadership bill. I think one minor issue is why we have not had that kind of discussion up to now.

Mr. AYRES. I agree with the gentleman that under the 5-minute rule the bill should be explained.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. AYRES. I yield to the gentleman from California.

Mr. ROOSEVELT. The definition of a retail establishment which is in section 2(a) of the revised Ayres-Kitchin bill it seems to me can lead to absurd results. If there are five establishments, each one of which does 75 percent retail selling, under your bill all employees are covered. However, if there were four establishments selling 75 percent or more at retail, and one establishment selling 65 percent retail, then there would be no coverage; is that not correct?

Mr. AYRES. I yield to the gentleman from New York [Mr. GOODELL] to answer that question.

Mr. GOODELL. Yes, that is correct.

Mr. ROOSEVELT. There we have a typical picture of the results under the Ayres-Kitchin bill.

I want you all to understand that, that one out of the five could go to 65, and then all of the five would be exempt from the bill.

Mr. GOODELL. I think the example is rather absurd. The definition of a retail establishment that is in the present law is that they must do 75 percent of their business at retail and not wholesale. Of course a wholesale establishment is not counted in the five-and-two test.

Mr. AYRES. Mr. Chairman, it is very apparent that the gentleman from California has not had any experience in the retail field from the example he tried to draw.

Now, I have been asked why the gentleman from North Carolina [Mr. KITCHIN], and I introduced as an amendment a slightly different version than the bill that passed the House last year. The basic reason for that change was the propaganda that was going out against the bill.

On March 17, 1961, I, as well as every other Member of Congress, received a letter signed by Mr. ROOSEVELT, Mr. SMITH, and Mr. PUCINSKI in which they made wild claims about what was covered in the bill. Many of you received wires from motion picture operators, Western Union operators, and hotel

clerks asking just what the bill did do. On page 2, line 17, of the amendment and from there on through, you will find listed those enterprises that are exempt, and we will discuss this in more detail under the 5-minute rule.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. AYRES. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. On page 4649 of yesterday's RECORD there is a list of about 30-some-odd million-dollar concerns including the Higbee Co., of Cleveland, with $52 million business, and the Fischer Co., of Cleveland with $98 million, with the statement that these are not covered in any way by your minimum wage proposal; is that right?

Mr. AYRES. I do not believe the Fischer Co. operates in interstate. None of those two would be covered. The average rate paid by Fischer is $1.06 and the average rate paid by Higbee is $1.26. And, I believe, they are both organized and pay overtime.

Mr. EDMONDSON. Are these concerns, along with others, excluded from the operation of your bill?

Mr. AYRES. Any store operating strictly intrastate would be exempt, and they should be.

Mr. EDMONDSON. I thank the gentleman for making this point clear in his bill.

Mr. ROOSEVELT. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. SANTANGELO].

Mr. SANTANGELO. Mr. Chairman, I rise to support the Albert amendment—H.R. 5900—which is going to be substituted for the Roosevelt bill. I do so because I feel that it is very necessary to our country to have an increase in minimum wage to $1.25 in two steps and also to extend coverage and grant a $1 minimum for that segment of our population which does not have the purchasing power today. The Albert bill will cover about 4 million people. It will cover most of the retail organizations.

It was said many years ago that when the snows melt you see the dirt, and after 8 years of snow we have seen the dirt, and we find today that we have 5½ million unemployed; 7.6 million families earning less than $2,000 and, mind you, 21 million throughout our land not protected by the Federal minimum wage law.

President John Kennedy said in his message to the Congress on February 7 that our Nation can ill afford to tolerate the growth of an underprivileged and underpaid class, and substandard pay leads necessarily to substandard living conditions, hardship, and distress.

Mr. Chairman, this bill is sound from an economic point of view. This bill will give purchasing power to those who need it, those who desperately need it to buy the necessities of life. This bill will equalize the competitive conditions throughout the States and, remember this, this bill will eliminate the subsidies to those organizations in the States that do not have minimum wage laws.

I notice that the minority Members in the minority report to the committee bill made a statement in opposition to the bill. They said on page 63 that the States have made substantial progress in this field as indicated by the fact that at the present time 33 States, Puerto Rico, and the District of Columbia have some type of minimum wage law.

What does that mean? It means that we have 17 States in these United States without a minimum wage law. We have no protection for the working people of the United States because the States have not acted, and they are not covered by Federal minimum wage laws. Yes; you have five States with provisions for minimum wage boards, yet these five States have never acted and have never covered the workers in those States.

Yes, we have the great State of Arkansas with a minimum wage law for skilled labor at 16 cents an hour, with the braceros coming in from Mexico and working at 50 cents an hour, which some people consider to be a high wage for imported labor.

I was very pleased to see that North Carolina, the State of one of the authors of the Kitchin-Ayres bill, in January 1960, finally, after so many years, passed a minimum wage law of 75 cents an hour with extensive exemptions throughout the State of North Carolina.

I am happy to see that the State of Ohio, the State of the gentleman from Ohio [Mr. AYRES], has a minimum wage law of 75 cents an hour with many exemptions in that particular State. I have in the past demonstrated my interest not only for the laboring man in the city but also for the farmer. I was a member of the New York State Legislature and a member of the joint commission on labor and industrial conditions. While a State senator I introduced a bill which became law for a $1 minimum wage in the State of New York, because the people required that assistance in order to pay for the necessities of life.

I say to those people in States which do not have these minimum wage laws that they are paying more money in relief, through aid to dependent children and old-age assistance because there is no minimum wage law. You are not giving these working people the money that comes from the profits gained from their labor. You would rather permit them to be supported by the Federal Government through some Federal program of relief—perhaps old-age assistance or aid to dependent children—than raising their minimum wage.

Take the State of Alabama. They spent $5 million plus on Federal assistance, and they have no minimum wage law. There are the States of Florida, Georgia, Indiana, Delaware, Iowa, Maryland, Michigan, Mississippi, and Missouri, from which comes the gentleman from Missouri [Mr. CURTIS], with no minimum wage law. And yet we have almost $20 million that is spent there for aid to dependent children.

Nebraska has no minimum wage law, and one of the Members said they spent $2½ million for aid to dependent children.

We have South Carolina and Tennessee and Texas and Virginia. Yes, I would like to refer to Texas. I was down there recently speaking in Dallas, Tex., in the district represented by Mr. BRUCE ALGER who opposes the wage bills. There is no minimum wage law in the State of Texas and over $100 million are paid in welfare benefits to old-age people and over $18 million there for aid to dependent children. I set forth herein a table, a list of States without statutory wage laws and what their residents receive in welfare assistance:

Fiscal 1959

	Old-age assistance	Aid to dependent children
States without minimum wage laws:		
Alabama	$37,372,000	$5,906,000
Florida	29,888,000	16,537,000
Georgia	42,004,000	13,530,000
Indiana	13,525,000	10,276,000
Delaware	626,000	1,359,000
Iowa	19,618,000	8,458,000
Maryland	4,411,000	8,142,000
Michigan	33,107,000	24,204,000
Mississippi	23,851,000	7,565,000
Missouri	56,182,000	20,343,000
Montana	3,795,000	1,920,000
Nebraska	8,121,000	2,560,000
South Carolina	12,438,000	5,549,000
Tennessee	22,679,000	15,097,000
Texas	100,120,000	18,463,000
Virginia	5,750,000	7,452,000
West Virginia	6,852,000	16,846,000
States with low minimum wage:		
Arkansas (16 cents)	23,791,000	4,661,000
Kentucky (40 cents)	20,729,000	13,795,000
5 States which have statutory minimum wage laws creating wage boards which have never acted:		
Illinois	43,880,000	38,808,000
Louisiana	69,611,000	21,825,000
Kansas	16,461,000	5,889,000
Maine	5,788,000	4,421,000
Oklahoma	51,075,000	15,962,000
North Carolina passed a minimum wage bill in 1960.		

Why can you not support a minimum wage law which will give the underprivileged the opportunity to earn sufficient to purchase those things which will permit them to raise their children in dignity?

You come here and say, this bill violates the interstate commerce provision and that minimum wages must be regulated by the States. And yet 40 percent of the States have not acted. I say to you that the States which have not acted have put a stain, a dark stain upon their State escutcheon, a badge of unconcern. You must protect the workers, because once you give them the purchasing power you will make the wheels of business go round, you will stimulate the business by increasing the workers' purchasing power. Without that purchasing power we may have to take care of the underpaid workers' children through these relief programs.

This legislation is for the benefit of this country, it is for the benefit of the working people and their families. The people of my district by a poll have indicated that they want extended coverage. Seventy-five percent of my constituents have indicated they favor an increase in minimum wage to $1.25 per hour and extended coverage for new groups at $1 per hour. We should go forward with a minimum wage law in other areas such as hotel, motel, and restaurant workers. Perhaps there are some constitutional objections—and I do

not press the point. But I say this legislation is a must for the people of America. You must support the Albert bill in order to protect the people of America. I urge its passage.

Mr. DOMINICK. Mr. Chairman, will the gentleman yield?

Mr. SANTANGELO. I yield to the gentleman from Colorado.

Mr. DOMINICK. The gentleman said you need the bill we are now considering because the States do not have minimum wages, and where they do not have minimum wages, this is where we have to raise unemployment compensation, aid to dependent children, and other things. Then the gentleman said that New York State under his leadership put a minimum wage law on the books. Is it not true that New York State, under the recent Unemployment Act that we have just passed, gets the largest amount of unemployment compensation of any State in the country, and out of the hides of other States, some of which have no minimum wage coverage?

Mr. SANTANGELO. We have the largest population. We do not have any residence requirement laws. The people come in to earn a living and we cannot let them starve. We lose our industries to those States which pirate them from us because of the cheap wages, and we lose industry. It goes to Mississippi and South Carolina and other States who have no minimum wage laws. We have taken care of our own indigent. We pay 20 percent of the Federal taxes of this country, and we support our own burden.

Mr. KEARNS. Mr. Chairman, I have no further requests for time.

Mr. ROOSEVELT. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, in concluding this debate, may I first express to my colleagues, and I think we all have it in mind, our deepest appreciation of the high level on which this debate has been carried on. There are deep disagreements on this issue, but I think the House can congratulate itself on a well-ordered but most serious and most intense discussion of the issue.

I think it would be well to point out at this time that the Democratic Party since 1938 has undertaken the primary responsibility for forwarding the basic issues of minimum wage legislation, that it has made advances in the legislation in the most temperate and responsible manner, and that we are now faced with the opportunity under the leadership of the President and the leadership of this House in discussing and presenting a bill which will be a most moderate increase and extension of the Fair Labor Standards Act. I can only say truthfully that I believe as we begin discussion of such substitutes or amendments as may be offered it would be fair to point out that all of these substitutes are by nature those which have had to be made in a relatively short time but that they are basically founded on the committee bill.

I trust and believe that those on this side of the aisle will have the opportunity to be joined by those on the other side of the aisle who recognize the inequities which I believe will be brought out under the debate under the 5-minute rule in the Kitchin-Ayres bill, and at the same time will recognize that the decisions which have been reached by the leadership in presenting their bill, by Mr. ALBERT, with the changes that we have made on this side, against perhaps the better judgment of some of the members of the committee, represent a sincere effort to meet those sincerely and deeply held views of those Members on our side who are troubled by some of the interstate commerce concepts involved and some of the coverage concepts involved, and that we have made concessions in order to try to bring together the clearest picture that can be established of a moderate and yet effective measure.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. ROOSEVELT. I yield to the gentleman from Indiana.

Mr. HALLECK. I thank the gentleman for his statement, which I think probably clarifies the existing situation. Do I understand correctly from what he has just said that the committee has now abandoned the bill reported by the committee, and that the controversy has now shifted to that between the bill introduced late yesterday evening by the gentleman from Oklahoma [Mr. ALBERT] and the so-called Ayres-Kitchin substitute?

Mr. ROOSEVELT. I believe the gentleman has asked whether we have abandoned the committee bill. The committee never abandons a bill. It discusses it before the Committee of the Whole, and then it makes the necessary adjustments. In this instance I believe you will find that the majority of the committee most certainly will be in support of the gentleman from Oklahoma [Mr. ALBERT] when he presents his substitute.

Mr. HALLECK. I think that is a very fair statement. Will the gentleman permit me to say just one further word?

Mr. ROOSEVELT. I yield to the gentleman from Indiana.

Mr. HALLECK. Of course, perhaps, the word "abandoned" is not quite too right word and maybe it is a little too harsh, but in the final analysis if those on the committee and on the majority side who are in charge of this legislation now propose to support the Albert substitute, as introduced late yesterday evening, instead of the committee bill, then language, as we speak it out in Indiana, seems to me to indicate that the committee bill has been abandoned.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. ROOSEVELT. I yield to the majority leader, the gentleman from Massachusetts.

Mr. McCORMACK. Of course, the statement of the gentleman from Indiana does not convey the correct situation, and what they might say in his part of Indiana might not be said in some other part of Indiana. The fact remains that the first test will come between the two substitutes. The effort is being made by the committee recognizing the honest differences of opinion that exist among Members who support minimum wage legislation. Therefore, the Albert substitute bill is offered in the Committee of the Whole. That in no sense means an abandonment. That is simply a matter of recognizing the honest views of those who support a minimum wage. So far as I am concerned, I respect those who are opposed to any minimum wage. They are honest in their views. But, to those who favor a further extension of minimum wage legislation and favor an increase in the amount and also an extension of the coverage, I think the Albert substitute represents a point of view that both those who believe the legislation should go farther and those who believe the committee bill goes too far can agree upon and support the substitute and have it adopted, and then, if adopted, it becomes the bill, as passed by the House of Representatives.

Mr. ROOSEVELT. Mr. Chairman, I certainly thank the distinguished majority leader for his very clear description of the situation.

Mr. Chairman, in conclusion because the position of the administration has been brought into question, may I read the statement of the Secretary of Labor on the pending minimum wage bill. It reads as follows:

> Yesterday at his news conference, President Kennedy called for passage of a minimum wage bill "as close as possible" to the one proposed by the administration and reported by the House Education and Labor Committee. It is the judgment of the House leadership that the realistic way of achieving this objective is for the House to pass the substitute bill that has been introduced by Mr. ALBERT, of Oklahoma.
>
> The President has every confidence in the House leadership and in their legislative judgment.
>
> The administration, therefore, joins with the leadership in urging that Mr. ALBERT'S substitute be adopted by the House.

Mr. JOHNSON of Maryland. Mr. Chairman, will the gentleman yield?

Mr. ROOSEVELT. I yield to the gentleman from Maryland.

Mr. JOHNSON of Maryland. Mr. Chairman, in analyzing the several bills proposed to amend the Fair Labor Standards Act, I am gratified that the bill introduced by the distinguished Member from Oklahoma [Mr. ALBERT] returns canning and processing exemptions to the present law from the 12 to 12 modification of the committee bill. This is extremely important to my district, and I am sure to many districts throughout our Nation.

The committee bill would reduce from 28 to 24 the number of weeks during which the fruit and vegetable processing and canning industry is exempt. I failed to find any reasons reached for this proposed change, nor have I heard any reasonable explanation for proposing to cut back the exemptions for the fruit and vegetable processing and canning industry but not for other related agricultural industries.

Congress in 1938 recognized that the assumptions upon which overtime was based were not applicable to industries that could not control the hours of the day or months of the year when the raw product would become available for processing. The processing industries are typically located in rural areas where all available labor is employed during the harvesting and processing season.

In recognition of these facts, Congress established exemptions from the overtime requirements of the act applicable to processing industries; one, providing a 14-week overtime exemption up to 12 hours a day or up to 56 hours a week for employees employed in an industry found by the Administrator to be of a seasonal nature. The canning of perishable or seasonal fresh fruits and vegetables has been determined to be in industry of a seasonal nature; two, provided in section 7(c) in the second part for a 14-week overtime exemption for employees employed in first processing of canned fruits and vegetables, handling, slaughtering or dressing poultry or livestock, first processing in the area of production of certain other agricultural commodities.

In many areas of the country, canners and processors who pack several fruits and vegetables need the full 28 weeks of exemption presently granted in the act. If they are obliged to pay penalty overtime for 4 of these weeks, many canners and processors may be forced to reduce their purchases of raw products and cut back the number of operating hours, thereby adversely affecting growers and canning plant employees.

I know that every processor and canner in my district and throughout the Nation expresses their appreciation to those who understand their problem in this vital matter.

Mr. ROOSEVELT. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. Pursuant to the rule, the Clerk will now read the substitute committee amendment printed in the reported bill as the original bill for the purpose of amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fair Labor Standards Amendments of 1961".

Mr. AYRES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. AYRES: Strike out all after the enacting clauses and insert the following: "That this Act may be cited as the 'Fair Labor Standards Amendments of 1961.'

"DEFINITIONS

"SEC. 2. (a) Paragraph (f) of section 3 of the Fair Labor Standards Act of 1938 is amended by inserting after 'Agricultural Marketing Act, as amended),' the following: 'the processing of shade-grown tobacco for use as cigar wrapper tobacco by agricultural employees employed in the growing and harvesting of such tobacco, which processing shall include, but shall not be limited to, drying, curing, fermenting, bulking, rebulking, sorting, grading, aging, and bailing, prior to the stemming process,'.

"(b) Paragraph (m) of section 3 of such Act, defining the term 'wage', is amended by inserting before the period at the end thereof a colon and the following: *'Provided,* That the cost of board, lodging or other facilities shall not be included as a part of the wage paid to any employee to the extent it is excluded therefrom under the terms of a bona fide individual contract or collective bargaining agreement applicable to the particular employee'.

"(c) Section 3 of such Act is further amended by adding at the end thereof the following new paragraphs:

"'(p) "Secretary" means the Secretary of Labor.

"'(q) "Enterprise" means the related activities performed (either through unified operation or common control) by any person or persons for a common retail business purpose, and includes all such activities whether performed in one or more establishments or by one or more corporate or other organizational units but shall not include the related activities performed for such enterprise by an independent contractor: *Provided,* That within the meaning of this subsection, a local retail establishment which is under independent ownership and control shall not be deemed to be other than a separate and distinct enterprise by reason of any arrangement, which includes, but is not limited to, an agreement (1) that it will sell, or sell only, certain goods specified by a particular manufacturer, distributor, or advertiser, or (2) that it will join with other such local establishments in the same industry for the purpose of collective purchasing, or (3) that it will have the exclusive right to sell the goods or use the brand name of a manufacturer, distributor, or advertiser within a specified area, or by reason of the fact that it occupies premises leased to it by a person who also leases premises to other retail or service establishments.

"'(r) "Enterprise engaged in commerce or in the production of goods for commerce" means any enterprise which has five or more retail establishments and which operates such establishment in two or more States.

"'(s) "Retail establishment" shall mean an establishment 75 per centum of whose annual dollar volume of sales of goods is not for resale and is recognized as retail sales in the particular industry, but shall not include an establishment which is primarily a service establishment such as (but not limited to) hotels, motels, restaurants (including lunch counters, cafeterias, and drive-ins), caterers, hospitals, laundry or drycleaning establishments, motion picture theaters, amusement or recreational establishments, parking lots, beauty or barber shops, and repair shops.'

"INVESTIGATIONS OF EFFECTS OF FOREIGN COMPETITION ON EMPLOYMENT

"SEC. 3. Section 4 of such Act is amended by adding at the end thereof the following new subsection:

"'(e) Whenever the Secretary has reason to believe that in any industry under this Act the competition of foreign producers in United States markets or in markets abroad, or both, has resulted, or is likely to result, in increased unemployment in the United States, he shall undertake an investigation to gain full information with respect to the matter and shall make a full and complete report of his findings and determinations to the President and to the Congress.'

"SPECIAL INDUSTRY COMMITTEES FOR PUERTO RICO AND THE VIRGIN ISLANDS

"SEC. 4. Subsection (a) of section 5 of such Act is amended by inserting after the words 'production of goods for commerce' wherever they appear, the following: 'or employed by a retail establishment of an enterprise engaged in commerce or in the production of goods for commerce.'

"MINIMUM WAGES

"SEC. 5. (a) (1) Section 6(a) of such Act is amended by inserting after the word 'who' in the portion thereof preceding paragraph (1), the words 'in any workweek'.

"(2) Paragraph (1) of section 6(a) of such Act is amended to read as follows:

"'(1) not less than $1.15 an hour, except as otherwise provided in this section;'.

"(3) The first sentence of paragraph (3) of section 6(a) of such Act is amended to read as follows:

"'(3) if such employee is employed in American Samoa, in lieu of the rates provided by this subsection or subsection (b), not less than the applicable rate established by the Secretary of Labor in accordance with recommendations of a special industry committee or committees which he shall appoint in the same manner and pursuant to the same provisions as are applicable to the special industry committees provided for Puerto Rico and the Virgin Islands by this Act as amended from time to time.'

"(b) Subsection (b) of section 6 of such Act is amended to read as follows:

"'(b) Every employer shall pay to each of his employees who in any workweek (1) is employed by a retail establishment of an enterprise engaged in commerce or in the production of goods for commerce, as defined in section 3(r), and who, except for the enactment of the Fair Labor Standards Amendments of 1961, would not be within the purview of this section, or (ii) is brought within the purview of this section by the amendments made to section 13(a) of this Act by the Fair Labor Standards Amendments of 1961, wages at the rate of not less than $1 an hour.'

"(c) Subsection (c) of section 6 of such Act is amended by changing the period at the end thereof to a colon, and adding the following: *'Provided further,* That the Secretary shall within sixty days after the enactment of the Fair Labor Standards Amendments of 1961 appoint a special industry committee in accordance with section 5 to recommend the highest minimum wage rate or rates, in accordance with the standards prescribed by section 8, not in excess of the applicable rate provided by subsection (b), to be applicable to such employee in lieu of the rate prescribed by subsection (b). The rate or rates recommended by the special industry committee shall be effective with respect to such employee upon the effective date of the wage order issued pursuant to such recommendation but not before sixty days after the effective date of the Fair Labor Standards Amendments of 1961.'

"MAXIMUM HOURS

"SEC. 6. Subsection (a) of section 7 of such Act is amended by inserting after the word 'who' the words 'in any workweek'.

"WAGE ORDERS IN PUERTO RICO AND THE VIRGIN ISLANDS

"SEC. 7. (a) Section 8 of such Act is amended by inserting after 'section 6(a)' wherever such words appear the following: 'or in section 6(b), whichever may be applicable'.

"(b) Subsection (a) of section 8 of such Act is further amended by inserting after the word 'industries' where it appears in the first sentence the words 'or retail establishments of enterprises'; and by inserting after the words 'production of goods for commerce' where they appear in the second sentence the following: 'or by any retail establishment of an enterprise engaged in commerce or in the production of goods for commerce.'

"CHILD LABOR PROVISIONS

"SEC. 8. Subsection (c) of section 12 of such Act is amended by striking out the period at the end thereof and inserting in lieu thereof the following: 'or in any retail establishment of an enterprise engaged in commerce or in the production of goods for commerce.'

"EXEMPTIONS

"SEC. 9. (a) Clause (1) of section 13(a) of such Act is amended to read as follows: '(1) any employee employed in a bona fide executive, administrative, or professional

capacity, or in the capacity of outside salesman (as such terms are defined and delimited from time to time by regulations of the Secretary, subject to the provisions of the Administrative Procedure Act, except that an employee of a retail establishment shall not be excluded from the definition of employee employed in a bona fide executive or administrative capacity because of the number of hours in his workweek which he devotes to activities not directly or closely related to the performance of executive or administrative activities, if less than 40 per centum of his hours worked in the workweek are devoted to such activities); or'.

"(b) Clause (2) of section 13(a) of such Act is amended to read as follows: '(2) any employee employed by any retail or service establishment (except a retail establishment in an enterprise engaged in commerce or in the production of goods for commerce, other than such a retail establishment which has an annual dollar volume of sales (exclusive of excise taxes at the retail level which are separately stated) of less than $250,000), more than 50 per centum of which establishment's annual dollar volume of sales of goods or services is made within the State in which the establishment is located. A retail or service establishment shall mean an establishment 75 per centum of whose annual dollar volume of sales of goods or services (or of both) is not for resale and is recognized as retail sales or services in the particular industry; or'.

"(c) Clause (13) of section 13(a) of such Act is amended to read as follows: '(13) any employee or proprietor in a retail or service establishment which qualifies as an exempt retail or service establishment under clause (2) of this subsection with respect to whom the provisions of sections 6 and 7 would not otherwise apply, engaged in handling telegraphic messages for the public under an agency or contract arrangement with a telegraph company where the telegraph message revenue of such agency does not exceed $500 a month; or'.

"(d) Section 13(a) of such Act is amended by changing the period at the end thereof to a semicolon and adding the following: 'or (16) any employee employed by a retail establishment who is employed in connection with a lunch counter, restaurant, or cafeteria in such establishment; or (17) any employee of a retail gasoline establishment; or (18) any employee of an establishment which is primarily engaged in the business of selling automobiles, trucks, or farm implements.'

"(e) Section 13(b) of such Act is amended by changing the period at the end thereof to a semicolon and adding the following: 'or (6) any employee employed as an announcer, news editor, or chief engineer by a radio or television station the major studio of which is located in a city or town of one hundred thousand population or less, according to the latest available decennial census figures as compiled by the United States Bureau of Census, except where such city or town is part of a standard metropolitan area as defined and designated by the Bureau of Census, which has a total population in excess of one hundred thousand; or (7) any employee employed by a retail establishment of an enterprise engaged in commerce or in the production of goods for commerce whose minimum rate of wages is governed by section 6(b) of this Act; or (8) any employee employed in a bona fide local retailing capacity (as such term is defined and delimited from time to time by regulations of the Secretary, subject to the provisions of the Administrative Procedure Act).'

"EMPLOYMENT OF STUDENTS

"SEC. 10. Clause (1) of section 14 of such Act is amended by striking out 'and' after 'apprentices,' and by inserting after 'messages', the following: 'and of full-time students outside of their school hours,'.

"STUDY TO SIMPLIFY AND REMOVE INEQUITIES IN AGRICULTURAL HANDLING AND PROCESSING EXEMPTIONS

"SEC. 11. The Secretary of Labor shall study the complicated system of exemptions now available for the handling and processing of agricultural products under such Act and particularly sections 7(b)(3), 7(c), and 13(a)(10), and shall submit to the second session of the Eighty-seventh Congress at the time of his report under section 4(d) of such Act a special report containing the results of such study and information, data, and recommendations for further legislation designed to simplify and remove the inequities in the application of such exemptions.

"EFFECTIVE DATE

"SEC. 12. The amendments made by this Act shall take effect upon the expiration of one hundred and twenty days after the date of its enactment, except as otherwise provided and except that the authority to promulgate necessary rules, regulations, or orders with regard to amendments made by this Act, under the Fair Labor Standards Act of 1938 and amendments thereto, including amendments made by this Act, may be exercised by the Secretary on and after the date of enactment of this Act."

Mr. AYRES. Mr. Chairman, the committee amendment as just heard is almost identical with the Kitchin amendment which passed this House last year. The only major change is that under the amendment we have just heard read all of the enterprises in a chain doing less than $250,000 annual gross business are exempt. The increase is to $1.15 per hour for those employees who are currently covered. The newly covered employees will be those who are employed by the employer operating five or more establishments in two or more States. Those employees will receive a minimum wage of $1 per hour with no provision for overtime. It is estimated that the newly covered would number approximately 1.4 million. The reason I feel that the committee should adopt this amendment is that it is the only thing that can prevent the Federal Government from eventually covering every enterprise under the Fair Labor Standards Act in the United States.

The testimony we heard before the committee on the so-called dollar volume test was that $1 million is entirely too high. Mr. Suffridge, president of the Retail Clerks Union, testified that the starting point should be $500,000. Secretary Hodges testified that in his judgment it could happen that eventually there would not be any dollar test at all; every enterprise would be covered.

Secretary Goldberg has just issued a statement in which he says that the President hoped to achieve the administration's objective in an extension of coverage to 4.3 million workers through Senate action and a Senate-House compromise.

Mr. Chairman, if the committee does not accept the Kitchin-Ayers approach insofar as the interstate concept is concerned, in my judgment the House and the Senate conferees will agree on a dollar volume less than $1 million that the House passes, because in my judgment the other body will pass the $500,000 figure. So, we go to conference with nothing to discuss except lowering it from $1 million to some figure between $1 million and $500,000. I do not think that the Congress of the United States, at least the House of Representatives, wants to give the Federal Government the right to determine minimum wages over those enterprises that are strictly intrastate.

Mr. Chairman, I hope the committee will adopt the amendment that has been offered. Two hundred and eleven Members of this House voted for an almost identical bill a year ago when the gentleman from North Carolina [Mr. KITCHIN] offered the amendment.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. AYRES. Mr. Chairman, I ask unanimous consent to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. KITCHIN. Mr. Chairman, will the gentleman yield?

Mr. AYRES. I yield to the gentleman from North Carolina.

Mr. KITCHIN. Would the gentleman agree with me that those who supported the bill last year were supporting the bill under worse economic circumstances by far than we are asking support for the measure this year?

Mr. AYRES. That is absolutely right. Last year, according to the Department of Labor, there were less than 4 million unemployed. This year I believe the current figure is 5½ million.

Mr. KITCHIN. As a matter of fact, does not the gentleman agree with me, according to the statement by the Department of Labor, that we have the highest unemployment at this particular time than we have had for the past 20 years?

Mr. AYRES. That is exactly correct.

Mr. KITCHIN. I will ask the gentleman if, under the Kitchin-Ayres concept at this time, it is not a better bill by far, including the exemptions that have been added, than was voted on the floor of this House last year.

Mr. AYRES. It is a much better bill, in my judgment, I will say to the gentleman from North Carolina. It is a more equitable bill, because after working with this thing for over a year you learn how to perfect it and protect the employees and employers alike.

Mr. KITCHIN. I thank the gentleman.

Mr. ALBERT. Mr. Chairman, I offer an amendment as a substitute for the amendment offered by the gentleman from Ohio [Mr. AYRES].

The Clerk read as follows:

Amendment offered by Mr. ALBERT of Oklahoma as a substitute for the amendment offered by Mr. AYRES of Ohio.

Strike out all after the enacting clause and insert in lieu thereof the following: That this Act may be cited as the "Fair Labor Standards Amendments of 1961".

DEFINITIONS

SEC. 2. (a) Paragraph (f) of section 3 of the Fair Labor Standards Act of 1938 is amended by inserting after "Agricultural Marketing Act, as amended)," the following: "the processing of shade-grown tobacco for use as cigar wrapper tobacco by agricultural employees employed in the growing and harvesting of such tobacco, which processing

shall include, but shall not be limited to, drying, curing, fermenting, bulking, rebulking, sorting, grading, aging, and baling, prior to the stemming process,".

(b) Paragraph (m) of section 3 of such Act, defining the term "wage", is amended by inserting before the period at the end thereof a colon and the following: "*Provided*, That the cost of board, lodging, or other facilities shall not be included as a part of the wage paid to any employee to the extent it is excluded therefrom under the terms of a bona fide collective-bargaining agreement applicable to the particular employee: *Provided further*, That the Secretary is authorized to determine the fair value of such board, lodging, or other facilities for defined classes of employees and in defined areas, based on average cost to the employer or to groups of employers similarly situated, or average value to groups of employees, or other appropriate measures of fair value. Such evaluations, where applicable and pertinent, shall be used in lieu of actual measure of cost in determining the wage paid to any employee".

(c) Section 3 of such Act is further amended by adding at the end thereof the following new paragraphs:

"(p) 'American vessel' includes any vessel which is documented or numbered under the laws of the United States.

"(q) 'Secretary' means the Secretary of Labor.

"(r) 'Enterprise' means the related activities performed (either through unified operation or common control) by any person or persons for a common business purpose, and includes all such activities whether performed in one or more establishments or by one or more corporate or other organizational units but shall not include the related activities performed for such enterprise by an independent contractor: *Provided*, That, within the meaning of this subsection, a local retail or service establishment which is under independent ownership and control shall not be deemed to be other than a separate and distinct enterprise by reason of any arrangement, which includes, but is not limited to, an agreement (1) that it will sell, or sell only, certain goods specified by a particular manufacturer, distributor, or advertiser, or (2) that it will join with other such local establishments in the same industry for the purpose of collective purchasing, or (3) that it will have the exclusive right to sell the goods or use the brand name of a manufacturer, distributor, or advertiser within a specified area, or by reason of the fact that it occupies premises leased to it by a person who also leases premises to other retail or service establishments.

"(s) 'Enterprise engaged in commerce or in the production of goods for commerce' means any of the following in the activities of which employees are so engaged, including employees handling, selling, or otherwise working on goods that have been moved in or produced for commerce by any person, if not less than 25 per centum of the annual gross volume of its sales of goods (exclusive of excise taxes at the retail level which are separately stated) is of goods which were produced outside the State where the sales occurred; and if not less than 25 per centum of the goods, materials, and supplies which are annually used or worked on, in providing its services, were produced outside the State where the services were performed:'

"(1) any such enterprise which has one or more retail or service establishments if the annual gross volume of sales of such enterprise is not less than $1,000,000, exclusive of excise taxes at the retail level which are separately stated;

"(2) any such enterprise which has one or more establishments engaged in laundering, cleaning, or repairing clothing or fabrics if the annual gross volume of sales of such enterprise is not less than $1,000,000, exclusive of excise taxes at the retail level which are separately stated;

"(3) any such enterprise which is engaged in the business of operating a street, suburban or interurban electric railway, or local trolley or motorbus carrier if the annual gross volume of sales of such enterprise is not less than $1,000,000, exclusive of excise taxes at the retail level which are separately stated;

"(4) any establishment of any such enterprise, except establishments and enterprises referred to in other paragraphs of this subsection, which has employees engaged in commerce or in the production of goods for commerce if the annual gross volume of sales of such enterprise is not less than $1,000,000;

"(5) any such enterprise which is engaged in the business of construction or reconstruction, or both, if the annual gross volume from the business of such enterprise is not less than $350,000;

"(6) any gasoline service establishment if the annual gross volume of sales of such establishment is not less than $250,000, exclusive of excise taxes at the retail level which are separately stated:

Provided, That an establishment shall not be considered to be an enterprise engaged in commerce or in the production of goods for commerce, or a part of an enterprise engaged in commerce or in the production of goods for commerce, and the sales of such establishment shall not be included for the purpose of determining the annual gross volume of sales of any enterprise for the purpose of this subsection, if the only employees of such establishment are the owner thereof or persons standing in the relationship of parent, spouse, or child of such owner."

INVESTIGATIONS OF EFFECTS ON EMPLOYMENT OF FOREIGN COMPETITION

SEC. 3. Section 4 of such Act is amended by adding at the end thereof the following new subsection:

"(e) Whenever the Secretary has reason to believe that in any industry under this Act the competition of foreign producers in United States markets or in markets abroad, or both, has resulted, or is likely to result, in increased unemployment in the United States, he shall undertake an investigation to gain full information with respect to the matter. If he determines such increased unemployment has in fact resulted, or is in fact likely to result, from such competition, he shall make a full and complete report of his findings and determinations to the President and to the Congress."

SPECIAL INDUSTRY COMMITTEES FOR PUERTO RICO AND THE VIRGIN ISLANDS

SEC. 4. Subsection (a) of section 5 of such Act is amended by inserting after the words "production of goods for commerce" wherever they appear, the following: "or employed in any enterprise engaged in commerce or in the production of goods for commerce."

MINIMUM WAGES

SEC. 5. (a) (1) Section 6(a) of such Act is amended by inserting after the word "who" in the portion thereof preceding paragraph (1), the words "in any workweek".

(2) Paragraph (1) of section 6(a) of such Act is amended to read as follows:

"(1) not less than $1.15 an hour during the first two years from the effective date of the Fair Labor Standards Amendments of 1961, and not less than $1.25 an hour thereafter, except as otherwise provided in this section."

(3) The first sentence of paragraph (3) of section 6(a) of such Act is amended to read as follows:

"(3) if such employee is employed in American Samoa, in lieu of the rate or rates provided by this subsection or subsection (b), not less than the applicable rate established by the Secretary of Labor in accordance with recommendations of a special industry committee or committees which he shall appoint in the same manner and pursuant to the same provisions as are applicable to the special industry committees provided for Puerto Rico and the Virgin Islands by this Act as amended from time to time."

(b) Subsection (b) of section 6 of such Act is amended to read as follows:

"(b) Every employer shall pay to each of his employees who in any workweek (i) is employed in an enterprise engaged in commerce or in the production of goods for commerce, as defined in section 3(s) (1), (2), (3), or (5) or by an establishment described in section 3(s) (4) or (6), and who, except for the enactment of the Fair Labor Standards Amendments of 1961, would not be within the purview of this section, or (ii) is brought within the purview of this section by the amendments made to section 13(a) of this Act by the Fair Labor Standards Amendments of 1961, wages at a rate not less than $1 an hour.

"(2) if such employee is employed as a seaman on an American vessel, wages at not less than the rate which will provide to the employee, for the period covered by the wage payment, wages equal to compensation at the hourly rate prescribed by paragraph (1) of this subsection for all hours during such period when he was actually on duty (including periods aboard ship when the employee was on watch or was, at the direction of a superior officer, performing work or standing by, but not including off-duty periods which are provided pursuant to the employment agreement)."

(c) Subsection (c) of section 6 of such Act is amended to read as follows:

"(c) The rate or rates provided by subsections (a) and (b) of this section shall be superseded in the case of any employee in Puerto Rico or the Virgin Islands only for so long as and insofar as such employee is covered by a wage order heretofore or hereafter issued by the Secretary pursuant to the recommendations of a special industry committee appointed pursuant to section 5: *Provided*, That (1) the following rates shall apply to any such employee to whom the rate or rates prescribed by subsection (a) would otherwise apply:

"(A) The rate or rates applicable under the most recent wage order issued by the Secretary prior to the effective date of the Fair Labor Standards Amendments of 1961, increased by 15 per centum, unless such rate or rates are superseded by the rate or rates prescribed in a wage order issued by the Secretary pursuant to the recommendations of a review committee appointed under paragraph (C). Such rate or rates shall become effective sixty days after the effective date of the Fair Labor Standards Amendments of 1961 or one year from the effective date of the most recent wage order applicable to such employee theretofore issued by the Secretary pursuant to the recommendations of a special industry committee appointed under section 5, whichever is later.

"(B) Beginning two years after the applicable effective date under paragraph (A), not less than the rate or rates prescribed by paragraph (A), increased by an amount equal to 10 per centum of the rate or rates applicable under the most recent wage order issued by the Secretary prior to the effective date of the Fair Labor Standards Amendments of 1961, unless such rate or rates are superseded by the rate or rates prescribed in a wage order issued by the Secretary pursuant to the recommendations of a review committee appointed under paragraph (C).

"(C) Any employer, or group of employers, employing a majority of the employees in an industry in Puerto Rico or the Virgin Islands, may apply to the Secretary in writing for the appointment of a review

committee to recommend the minimum rate or rates to be paid such employees in lieu of the rate or rates provided by paragraph (A) or (B). Any such application with respect to any rate or rates provided for under paragraph (A) shall be filed within sixty days following the enactment of the Fair Labor Standards Amendments of 1961 and any such application with respect to any rate or rates provided for under paragraph (B) shall be filed not more than one hundred and twenty days and not less than sixty days prior to the effective date of the applicable rate or rates under paragraph (B). The Secretary shall promptly consider such application and may appoint a review committee if he has reasonable cause to believe, on the basis of financial and other information contained in the application, that compliance with any applicable rate or rates prescribed by paragraph (A) or (B) will substantially curtail employment in such industry. The Secretary's decision upon any such application shall be final. Any wage order issued pursuant to the recommendations of a review committee appointed under this paragraph shall take effect on the applicable effective date provided in paragraph (A) or (B).

"(D) In the event a wage order has not been issued pursuant to the recommendation of a review committee prior to the applicable effective date under paragraph (A) or (B), the applicable percentage increase provided by any such paragraph shall take effect on the effective date prescribed therein, except with respect to the employees of an employer who filed an application under paragraph (C) and who files with the Secretary an undertaking with a surety or sureties satisfactory to the Secretary for payment to his employees of an amount sufficient to compensate such employees for the difference between the wages they actually receive and the wages to which they are entitled under this subsection. The Secretary shall be empowered to enforce such undertaking and any sums recovered by him shall be held in a special deposit account and shall be paid, on order of the Secretary, directly to the employee or employees affected. Any such sum not paid to an employee because of inability to do so within a period of three years shall be covered into the Treasury of the United States as miscellaneous receipts.

"(2) In the case of any such employee to whom subsection (b) would otherwise apply, the Secretary shall within sixty days after the enactment of the Fair Labor Standards Amendments of 1961 appoint a special industry committee in accordance with section 5 to recommend the highest minimum wage rate or rates, in accordance with the standards prescribed by section 8, not in excess of the applicable rate provided by subsection (b), to be applicable to such employee in lieu of the rate or rates prescribed by subsection (b). The rate or rates recommended by the special industry committee shall be effective with respect to such employee upon the effective date of the wage order issued pursuant to such recommendation but not before sixty days after the effective date of the Fair Labor Standards Amendments of 1961.

"(3) The provisions of section 5 and section 8, relating to special industry committees, shall be applicable to review committees appointed under this subsection. The appointment of a review committee shall be in addition to and not in lieu of any special industry committee required to be appointed pursuant to the provisions of subsection (a) of section 8, except that no special industry committee shall hold any hearing within one year after a minimum wage rate or rates for such industry shall have been recommended to the Secretary by a review committee to be paid in lieu of the rate or rates provided for under paragraph (A) or (B). The minimum wage rate or rates prescribed by this subsection shall be in effect only for so long as and insofar as such minimum wage rate or rates have not been superseded by a wage order fixing a higher minimum wage rate or rates (but not in excess of the applicable rate prescribed in subsection (a) or subsection (b)) hereafter issued by the Secretary pursuant to the recommendation of a special industry committee."

MAXIMUM HOURS

SEC. 6. (a) Subsection (a) of section 7 of such Act is amended by designating such subsection as subsection (a)(1), by inserting after the word "who" the words "in any workweek".

(b) Section 7 of such Act is amended by adding at the end thereof the following new subsection:

"(h) No employer shall be deemed to have violated subsection (a) by employing any employee of a retail or service establishment for a workweek in excess of the applicable workweek specified therein, if (1) the regular rate of pay of such employee is in excess of one and one-half times the minimum hourly rate applicable to him under section 6, and (2) more than half his compensation for a representative period (not less than one month) represents commissions on goods or services."

WAGE ORDERS IN PUERTO RICO AND THE VIRGIN ISLANDS

SEC. 7. Subsection (a) of section 8 of such Act is amended by inserting after the word "industries" where it appears in the first sentence the words "or enterprise"; and by inserting after the words "production of goods for commerce" where they appear in the second sentence the following: "or in any enterprise engaged in commerce or in the production of goods for commerce".

LIMITATIONS ON REPORTS REQUIREMENTS

SEC. 8. Section 11(c) of such Act is amended by adding at the end thereof the following new sentence: "If an employer has filed with the Secretary a written assurance (in such form as the Secretary shall prescribe) that he is complying with the provisions of this Act, the Secretary shall not require such employer to make any other written report to him pursuant to this subsection unless he has reason to believe, on the basis of complaints made to him or on the basis of other information he considers reliable, that such employer has violated or is violating this Act."

CHILD LABOR PROVISIONS

SEC. 9. Subsection (c) of section 12 of such Act is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "or in any enterprise engaged in commerce or in the production of goods for commerce."

EXEMPTIONS

SEC. 10. Subsections (a) and (b) of section 13 of such Act are amended to read as follows:

"(a) The provisions of sections 6 and 7 shall not apply with respect to—

"(1) any employee employed in a bona fide executive, administrative, or professional capacity, or in the capacity of outside salesman (as such terms are defined and delimited from time to time by regulations of the Secretary, subject to the provisions of the Administrative Procedure Act, except that an employee of a retail or service establishment shall not be excluded from the definition of employee employed in a bona fide executive or administrative capacity because of the number of hours in his workweek which he devotes to activities not directly or closely related to the performance of executive or administrative activities, if less than 40 per centum of his hours worked in the workweek are devoted to such activities); or

"(2) any employee employed by any retail or service establishment, more than 50 per centum of which establishment's annual dollar volume of sales of goods or services is made within the State in which the establishment is located, if such establishment—

"(i) is not in an enterprise described in section 3(s)(1), or

"(ii) is in such an enterprise and is a hotel, motel, restaurant, hospital, or school for physically or mentally handicapped, or gifted, children, or

"(iii) has an annual dollar volume of sales (exclusive of excise taxes at the retail level which are separately stated) which is less than $250,000.

A 'retail or service establishment' shall mean an establishment 75 per centum of whose annual dollar volume of sales of goods or services (or of both) is not for resale and is recognized as retail sales or services in the particular industry; or

"(3) any employee employed by any establishment (except an establishment in an enterprise described in section 3(s)(2)) engaged in laundering, cleaning, or repairing clothing or fabrics, more than 50 per centum of which establishment's annual dollar volume of sales of such services is made within the State in which the establishment is located: *Provided*, That 75 per centum of such establishment's annual dollar volume of sales of such services is made to customers who are not engaged in a mining, manufacturing, transportation, commercial, or communications business: *Provided further*, That neither the exemption in this paragraph nor in paragraph (2) shall apply to any employee of a hotel, motel, or restaurant who is engaged in laundering, cleaning, or repairing clothing or fabrics where such services are not performed exclusively for such hotel, motel, or restaurant: *Provided further*, That this exemption shall not apply to any employee of any such establishment which has an annual dollar volume of sales of such services of $250,000 or more and which is engaged in substantial competition in the same metropolitan area with an establishment less than 50 per centum of whose annual dollar volume of sales of such services is made within the State in which it is located; or

"(4) any employee employed by an establishment which qualifies as an exempt retail establishment under clause (2) of this subsection and is recognized as a retail establishment in the particular industry notwithstanding that such establishment makes or processes at the retail establishment the goods that it sells: *Provided*, That more than 85 per centum of such establishment's annual dollar volume of sales of goods so made or processed is made within the State in which the establishment is located; or

"(5) any employee employed in the catching, taking, propagating, harvesting, cultivating, or farming of any kind of fish, shellfish, crustacea, sponges, seaweeds, or other aquatic forms of animal and vegetable life, or in the first processing, canning or packing such marine products at sea as an incident to, or in conjunction with, such fishing operations, including the going to and returning from work and loading and unloading when performed by any such employee; or

"(6) any employee employed in agriculture or in connection with the operation or maintenance of ditches, canals, reservoirs, or waterways, not owned or operated for profit or operated on a share-crop basis, and which are used exclusively for supply and storing of water for agricultural purposes; or

"(7) any employee to the extent that such employee is exempted by regulations or orders of the Secretary issued under section 14; or

"(8) any employee employed in connection with the publication of any weekly, semiweekly, or daily newspaper with a circulation of less than four thousand the major part of which circulation is within the county where printed and published or counties contiguous thereto; or

"(9) any employee employed by a motion picture theater; or

"(10) any individual employed within the area of production (as defined by the Secretary), engaged in handling, packing, storing, ginning, compressing, pasteurizing, drying, preparing in their raw or natural state, or canning of agricultural or horticultural commodities for market, or in making cheese or butter or other dairy products; or

"(11) any switchboard operator employed by an independently owned public telephone company which has not more than seven hundred and fifty stations; or

"(12) any employee of an employer engaged in the business of operating taxicabs; or

"(13) any employee or proprietor in a retail or service establishment which qualifies as an exempt retail or service establishment under clause (2) of this subsection with respect to whom the provisions of sections 6 and 7 would not otherwise apply, engaged in handling telegraphic messages for the public under an agency or contract arrangement with a telegraph company where the telegraph message revenue of such agency does not exceed $500 a month; or

"(14) any employee employed as a seaman on a vessel other than an American vessel; or

"(15) any employee employed in planting or tending trees, cruising, surveying, or felling timber, or in preparing or transporting logs or other forestry products to the mill, processing plant, railroad, or other transportation terminal, if the number of employees employed by his employer in such forestry or lumbering operations does not exceed twelve; or

"(16) any employee of an establishment primarily engaged in the preparation or offering of food for human consumption who is employed in connection with the preparation or offering of food or beverages for human consumption by such services as catering, banquet, box lunch, or curb or counter service, to the public, to employees, or to members or guests of members of clubs; or

"(17) any employee employed in an amusement or recreational establishment that operates on a seasonal basis; or

"(18) any employee employed by a retail or service establishment which is primarily engaged in the business of selling automobiles, trucks, or farm implements.

"(b) The provisions of section 7 shall not apply with respect to—

"(1) any employee with respect to whom the Interstate Commerce Commission has power to establish qualifications and maximum hours of service pursuant to the provisions of section 204 of the Motor Carrier Act, 1935; or

"(2) any employee of an employer subject to the provisions of part I of the Interstate Commerce Act; or

"(3) any employee of a carrier by air subject to the provisions of title II of the Railway Labor Act; or

"(4) any employee employed in the canning, processing, marketing, freezing, curing, storing, packing for shipment, or distributing of any kind of fish, shellfish, or other aquatic forms of animal or vegetable life, or any byproduct thereof; or

"(5) any individual employed as an outside buyer of poultry, eggs, cream, or milk, in their raw or natural state; or

"(6) any employee employed as a seaman; or

"(7) any employee of a street, suburban or interurban electric railway, or local trolley or motorbus carrier, not included in other exemptions contained in this section; or

"(8) any employee of a gasoline service station; or

"(9) any employee employed as an announcer, news editor, or chief engineer by a radio or television station the major studio of which is located in a city or town of fifty thousand population or less, according to the latest available decennial census figures as compiled by the United States Bureau of the Census, except where such city or town is part of a standard metropolitan area as defined and designated by the Bureau of the Census, which has a total population in excess of one hundred thousand; or

"(10) any employee of an independently owned and controlled local enterprise (including an enterprise with more than one bulk storage establishment) engaged in the wholesale or bulk distribution of petroleum products if (A) the annual gross volume of sales of such enterprise is not more than $1,000,000 exclusive of excise taxes, and (B) more than 75 per centum of such enterprise's annual dollar volume of sales is made within the State in which such enterprise is located, and (C) not more than 25 per centum of the annual dollar volume of sales of such enterprise is to customers who are engaged in the bulk distribution of such products for resale; or

"(11) any employee whose minimum rate of wages is governed by section 6(b) of this Act."

EMPLOYMENT OF STUDENTS

SEC. 11. Clause (1) of section 14 of such Act is amended by striking out "and" after "apprentices," and by inserting after "messages," the following: "and of full-time students outside of their school hours in any retail or service establishment: *Provided*, That such employment is not of the type ordinarily given to a full-time employee,".

PENALTIES AND INJUNCTION PROCEEDINGS

SEC. 12. (a) Section 16(b) of such Act is amended by adding at the end thereof a new sentence as follows: "The right provided by this subsection to bring an action by or on behalf of any employee, and the right of any employee to become a party plaintiff to any such action, shall terminate upon the filing of a complaint by the Secretary of Labor in an action under section 17 in which restraint is sought of any further delay in the payment of unpaid minimum wages, or the amount of unpaid overtime compensation, as the case may be, owing to such employee under section 6 or section 7 of this Act by an employer liable therefor under the provisions of this subsection."

(b) Section 17 of such Act is amended to read as follows:

"INJUNCTION PROCEEDINGS

"SEC. 17. The district courts, together with the United States District Court for the District of the Canal Zone, the District Court of the Virgin Islands, and the District Court of Guam shall have jurisdiction, for cause shown, to restrain violations of section 15, including in the case of violations of section 15(a)(2) the restraint of any withholding of payment of minimum wages or overtime compensation found by the court to be due to employees under this Act (except sums which employees are barred from recovering, at the time of the commencement of the action to restrain the violations, by virtue of the provisions of section 6 of the Portal-to-Portal Act of 1947)."

STUDY OF AGRICULTURAL HANDLING AND PROCESSING EXEMPTIONS

SEC. 13. The Secretary of Labor shall study the complicated system of exemptions now available for the handling and processing of agricultural products under such Act and particularly sections 7(c), 13(a)(10) and 7(b)(3), and shall submit to the second session of the Eighty-seventh Congress at the time of his report under section 4(d) of such Act a special report containing the results of such study and information, data and recommendations for further legislation designed to simplify and remove the inequities in the application of such exemptions.

EFFECTIVE DATE

SEC. 14. The ammendments made by this Act shall take effect upon the expiration of one hundred and twenty days after the date of its enactment, except as otherwise provided and except that the authority to promulgate necessary rules, regulations, or orders with regard to amendments made by this Act, under the Fair Labor Standards Act of 1938 and amendments thereto, including amendments made by this Act, may be exercised by the Secretary on and after the date of enactment of this Act.

The CHAIRMAN. The gentleman from Oklahoma [Mr. ALBERT] is recognized.

Mr. KITCHIN. Mr. Chairman, there has been a long change in this amendment, as I understand it, on page 4, particularly beginning at line 5, through line 11, and I ask unanimous consent that the Clerk read that language again.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk reread the language referred to.

Mr. FRELINGHUYSEN. Mr. Chairman, I ask unanimous consent that the gentleman from Oklahoma [Mr. ALBERT] may proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ALBERT. Mr. Chairman, the amendment which I have offered is a substitute, as I think everyone knows, for the Ayres substitute. The provisions of the amendment are identical with those of H.R. 5900 which I introduced yesterday and which is shown on page 4405 of yesterday's RECORD, with one exception, which the gentleman from North Carolina [Mr. KITCHIN] pointed out in his unanimous-consent request and which has been reread. This one exception grew out of the colloquy between the gentleman from North Carolina and the gentleman from California [Mr. ROOSEVELT] with respect to the meaning of the so-called "depend on commerce" clause found on page 4, and by a change in the substitute on page 4, line 5, we have undertaken to make it very clear that 25 percent of the gross volume of sales are of goods produced outside the State where sold and that with respect to services 25 percent of the goods, materials, and supplies used in providing such services were produced outside the State where the services were performed. The substitute, therefore, would cover only such enterprises making sales of $1 million per year and only where it met the 25-percent test and only where it has employees engaged in handling, selling, or working on goods moved in commerce. I repeat, Mr.

Chairman, that this was worked out after we had consulted with the gentleman from North Carolina and after the colloquy between him and the gentleman from California.

Mr. Chairman, it is with reluctance that I offer a bill in view of the tremendous amount of work which the committee has done on this proposal. Members of this great committee on both sides of the aisle have put a lot of hard effort into this job. Everyone knows that the distinguished gentleman from California [Mr. ROOSEVELT] is the author of the basic proposal contained in the Albert substitute. The proposal which I have offered, however, does contain also substantial and important amendments.

Mr. Chairman, with respect to employees covered by existing law this substitute leaves the provisions of the committee bill unchanged. The minimum wage for such employees for the first 2 years would be $1.15 an hour. After 2 years the minimum wage would be $1.25 an hour. Presently covered employees would be entitled to time and one-half for overtime after 40 hours as in existing law.

With respect to newly covered employees, the substitute contains amendments both to the committee bill and to the Ayres substitute. First of all, newly covered employees will not be subject to the escalation clause. The minimum wage will be $1 an hour and remain at that figure. No newly covered employees will be subject to the overtime provisions of the law.

The bill also contains the Fulbright amendment. It eliminates the objections raised by small chains to the discriminatory "5 and 2" provision contained in the Kitchin-Ayres substitute. While my amendment covers retail and service enterprises having gross sales of over $1 million a year if 25 percent of the goods and services are in interstate commerce, the Fulbright amendment then removes from coverage any establishment when such a $1 million enterprise itself has gross sales of less than $250,000. These annual dollar volume standards are $350,000 in the case of construction enterprises.

I would like now to make a statement with respect to the differences between this bill and the committee bill.

First, the Albert bill would change the definition of enterprises engaged in commerce or in the production of goods for commerce contained in the committee bill so that the specified enterprises meeting the various dollar volume tests, including gasoline service establishments would be covered for minimum wage purposes if (a) not less than 25 percent, and so forth; and if (b) the enterprise has employees—not just one—engaged in commerce or in the production of goods for commerce. The committee bill does not contain a like percentage test for interstate commerce activities of the enterprise.

Second, it extends coverage to employees in any gasoline service establishment having gross annual sales of $250,000 or more. Committee bill extends coverage to employees in enterprises having gross annual business of $1 million or more. However, committee bill would exempt any retail gasoline service establishment in an enterprise having not more than 15 establishments, if such establishment has an annual sales volume of less than $1 million.

Third, the Albert bill would provide a minimum wage of $1 for newly covered employees, effective 120 days after enactment. Committee bill would advance this rate to $1.05 1 year from the effective date, to $1.15 2 years from such date, and to $1.25 3 years from the effective date.

Fourth, it would not require the payment of overtime compensation to newly covered employees. Committee bill would not require payment of overtime to such employees during first year after effective date. However, overtime compensation at 1½ times employees regular rate of pay would be required for most newly covered employees after 44 hours during second year, 42 hours during third year and 40 hours thereafter.

Fifth, it would not change the present act's overtime exemption with respect to seasonal industries and the first processing, and so forth, of certain agricultural and horticultural commodities. Under the committee bill the 14-week seasonal industry exemption under which overtime payment is not required except for work in excess of 12 hours a day or 56 a week would continue. It would also provide a 14 workweek exemption—with same hours of work limitation as referred to above—for the first processing, canning, or packing of perishable or seasonal fresh fruits or vegetables and for the first processing in the area of production of any agricultural or horticultural commodity during seasonal operations. If an employer qualifies for both exemptions he would be eligible for an aggregate of 24 weeks in any calendar year of which not more than 12 weeks may be of unlimited hours and 12 weeks of limited hours.

Sixth, the bill preserves the existing minimum wage and overtime exemption under the act for employees of hotels, motels, restaurants, and hospitals, as does the committee bill, and, in addition, exempts from the new coverage employees of schools for physically or mentally handicapped, or gifted children.

Seventh, it would provide a minimum wage and overtime exemption under the act for employees of any retail or service establishment in an enterprise having a gross annual business of $1 million or more, if the establishment has an annual volume of sales of less than $250,000. Committee bill would exempt employees of retail or service establishments in such an enterprise, if the enterprise has not more than 14 such establishments and the establishment has an annual volume of sales of less than $250,000, or, in the case of a retail gasoline service establishment, $1 million.

Eighth, it would exempt from the act's minimum wage and overtime provisions any employee of a retail or service establishment which is primarily engaged in the business of selling automobiles, trucks, or farm implements. Under the committee bill, employees of such establishments would be exempted from the act's overtime requirements only, and office employees of such establishments would not be entitled to this exemption.

Ninth, this bill would provide an overtime exemption for employees of certain independently owned and controlled local enterprises engaged in the wholesale or bulk distribution of petroleum products. Such an enterprise will qualify for the exemption if its gross annual volume of sales is less than $1 million, more than 75 percent of its sales are made within the State in which the enterprise is located, and not more than 25 percent of its annual sales are to customers engaged in the bulk distribution of such products for resale. The committee bill would provide a similar exemption but limit its application to delivery employees of establishments having annual sales of less than $1 million. Under the committee bill, there is no limitation as to interstate sales. However, the exemption would be defeated if more than 10 percent of the establishments' annual sales are to customers engaged in using such products in operations, other than agriculture, in which goods are produced for commerce. The Albert bill does not contain such limitation.

Tenth, the Albert bill would not contain a provision similar to that of the committee bill which adds an overtime exemption for certain drivers or drivers' helpers making local deliveries pursuant to a collectively bargained agreement which provides pay for such employment on the basis of trip rates or other delivery payment plan.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. ALBERT. I yield to the gentleman from Michigan.

Mr. FORD. Mr. Chairman, I am not clear about this percentage criteria. May I ask, if a business qualified under this formula last year but does not this year, how is it going to be handled administratively? Once a business is under the 25 percent percentage figure, is that in perpetuity or just what is the criterion?

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield to me to answer?

Mr. ALBERT. I yield to the gentleman from California.

Mr. ROOSEVELT. I think perhaps I can answer the gentleman's question by referring to the testimony before the committee, in which that specific question was asked not only as to this point but as to other points; for instance, if a business had less than a million dollars in a certain period and then more than a million dollars, at what point would the Department consider it either covered or not?

He stated that that minimum would be based on the last quarter concerned.

Mr. FORD. The last 3 months?

Mr. ROOSEVELT. That is correct.

Mr. FORD. The last 3 months before the violation, or the last 3 months of the year?

Mr. ROOSEVELT. It would be revised every quarter.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

(By unanimous consent (at the request of Mr. VINSON), Mr. ALBERT was

permitted to proceed for 5 additional minutes.)

Mr. ALBERT. I think the gentleman from California has answered the question. This provision would be subject to the same provisions for determining coverage as affect other provisions of the bill.

Mr. FORD. Has this particular point been discussed on the floor? Can we have some legislative history so it will be clear cut? We do not want any wide-open authority to be given to the executive branch of the Government.

Mr. ROOSEVELT. The Department has made it clear it will continue to operate under this bill, as it has since 1938, and apply the same procedures.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. ALBERT. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. In view of the question about the legislative history of this proposal, may I ask just how we developed this particular bill? According to the press, there were two members of the House Committee on Education and Labor involved in the development of this legislation. I wonder if the gentleman from Oklahoma can indicate whether or not that is correct, and if so, who else did participate in the development of the bill?

Mr. ALBERT. I will yield to the gentleman from Illinois.

Mr. PUCINSKI. In answer to the question of the gentleman from Michigan, I would like to refer to the testimony of Secretary Goldberg on page 50 of the transcript.

Mr. FRELINGHUYSEN. This is not answering my question.

Mr. ALBERT. I am taking the responsibility on my own, after having consulted with members of the Committee on Labor and the Labor Department and the leadership, for this bill.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. ALBERT. I yield.

Mr. ROGERS of Colorado. Reference is made in the gentleman's statement to the fact that it would cover filling stations which have an operation in interstate commerce, so to speak. As the gentleman knows, in many of the oil-producing States, and mine is one, they have production within the State, refining within the State, and the sale within the State. If that is true, would the filling station and the oil jobbers that have retail sales be covered by this act, or would they be exempt?

Mr. ALBERT. I will answer the gentleman by saying that if 25 percent of the goods under the language of the bill were produced outside the State and were sold it would be within the provisions of the act, otherwise it would not be.

Mr. ROGERS of Colorado. But if it was all produced within the State, refined within the State, and sold within the State, then it would not be under it?

Mr. ALBERT. That is correct, if the establishment sold nothing but petroleum products.

Mr. ROGERS of Colorado. If on the other had we have pipelines bringing oil from an outside State into a State and it is refined within the State and then distributed to the filling stations, they would be under the act?

Mr. ALBERT. I think that is a fair statement.

Mr. ROGERS of Colorado. So then we have one group under the act and another group not under the act; is not that right?

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. ALBERT. I yield to the gentleman from Arkansas.

Mr. HARRIS. Does the gentleman have any information as to what percentage of the total sales of service stations would be in the nature of let us say tires and various appliances, supplies and so forth, other than the gasoline itself?

Mr. ALBERT. I do not, but I yield to the gentleman from California [Mr. ROOSEVELT] to reply to the gentleman.

Mr. ROOSEVELT. On that point, the testimony will show that approximately 35 percent of the revenue of the average gasoline station comes from what is known as TTA.

Mr. HARRIS. Then that means that practically all of the service stations throughout the United States will come under the provisions of the bill?

Mr. ROOSEVELT. No, because the bill specifically requires that stations do at least $250,000 annually in addition to the 25 percent test.

Mr. HARRIS. Yes, I recognize that that is true.

Mr. WHITENER. Mr. Chairman, will the gentleman yield?

Mr. ALBERT. I yield to the gentleman from North Carolina.

Mr. WHITENER. The gentleman has referred to retail establishments and to dollar volume. In my part of the country, there are certain department stores which operate certain departments within the store under a lease arrangement.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

(By unanimous consent (at the request of Mr. WHITENER) Mr. ALBERT was granted permssion to proceed for 5 additional minutes.)

Mr. WHITENER. I was pointing out, Mr. Chairman, that in some of these large department stores, certain departments are operated by lease arrangements with an entirely different concern. For instance, a department store may have a jewelry department which is leased out to a corporation from some other part of the country. Now in computing the dollar volume of business of the retail establishment, as the Secretary would do, is it contemplated in this legislation that the dollar volume of any separate concern operating within the walls of a retail department store or in that retail esablishment would be used as the basis for figuring?

Mr. ALBERT. The bill uses the terms "enterprises" and "establishments". Enterprise applies to the total operation and establishment applies to the specific, individual shop, store or what have you.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. ALBERT. I yield to the gentleman from California.

Mr. ROOSEVELT. I would also point out on page 3 of the bill, and incidentally, this also appears in the Kitchin-Ayres bill, you will find on line 20 that amongst those who are exempted, there is this provision:

> That it will have the exclusive right to sell the goods or use the brand name of a manufacturer, distributor, or advertiser within a specified area, or by reason of the fact that it occupies premises leased to it by a person who also leases premises to other retail or service establishments.

That definitely takes care of the situation that the gentleman is inquiring about.

Mr. WHITENER. In other words then, it is correct that the leased operation, so to speak, would be a separate retail establishment, separate and apart from the store in which it is located?

Mr. ALBERT. There is no question about that.

Mr. KITCHIN. Mr. Chairman, will the gentleman yield?

Mr. ALBERT. I yield to the gentleman from North Carolina.

Mr. KITCHIN. I wonder if the gentleman from Oklahoma would answer this question for me. We have been talking of, and I think the gentleman made a very good point with reference to the oil production in the State distributed to fuel stations within the State. I think the gentleman has answered this question correctly. The second section of this new language, however, says—"if not less than 25 percent of the goods, materials and supplies which are annually used or worked on in providing its services were produced outside the State where the service is performed." Will the gentleman answer this question? Is it not reasonable to assume that any filling station, even though the oil was produced in the State of Colorado and was transported to the filling station in Colorado—but there we have again a percentage of the equipment, the pump and the tanks and so forth that are used in connection with dispensing the service—would you say, therefore, that that would come under the bill?

Mr. ALBERT. I would call that "sale of goods" and the criterion would be whether the goods were produced outside of the State where it is sold.

Mr. KITCHIN. Then what does this section providing that not less than 25 percent of the goods, materials and supplies and so forth mean?

Mr. ALBERT. It applies to service enterprises and establishments. Then the service at the filling station, such as changing automobile tires, switching batteries, charging batteries, making use of tools to repair automobiles, the pumps to pump out the gasoline; do those things incidental to performing this service come under this last clause?

I would say that was such an incidental part of the business of retail selling that it would not be a part of the business or enterprise.

Mr. KITCHIN. If the gentleman would yield further, I would say it is not

an incidental part of the legislation we are trying to pass here today, and I am endeavoring to get an explanation, if I can, from someone, of this last section: "Or 25 percent of the goods, gasoline, supplies," what that means. Can the gentleman explain that?

Mr. ALBERT. I will say to the gentleman that I think it is intended to relate to those establishments which perform a service type enterprise as distinguished from retail stores and sales enterprises.

Mr. KITCHIN. Will the gentleman yield further?

Mr. ALBERT. It is conjunctive. We have tried to write this language in a manner to cover the questions raised by the gentleman with respect to the words "depend on," and we have divided it into two parts: First, with respect to the goods; and, second, with respect to services.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. HALLECK. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Indiana is recognized.

Mr. HALLECK. Mr. Chairman, during the entire consideration of this very important measure I am quite sure everyone has performed as a person of good will. There certainly has been no recrimination, no harsh words, and I would say probably a considerable degree of careful consideration without extreme partisanship. As far as I am concerned I want the debate to continue that way.

We now have before us the committee bill as reported by the committee and upon which most of the debate proceeded; a substitute offered by the gentleman from Ohio [Mr. AYRES], which substitute has been thoroughly debated and considered; and now we have a brand-new substitute which was introduced late yesterday evening, copies of it available only this morning, a substitute already changed in what I understand to be very material respects from the bill which was introduced yesterday evening.

Mr. POWELL. Mr. Chairman, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. POWELL. The date of the Ayres bill is March 22. The date of the Albert bill is March 23.

Mr. HALLECK. I had expected to touch on that in a couple of minutes. Let me say to the gentleman that the Kitchin-Ayres bill was acted upon in the House of Representatives last summer and carried here in the House of Representatives. It was thoroughly debated at that time, and except for a few minor changes that everyone can understand, it is the same proposition we had here last year, and there is nothing new or novel about it.

If ever I was convinced that the Ayres substitute should be adopted I am convinced of it now after the discussion I have just heard about this new substitute. Some of us believed yesterday before we got the new bill that the whole matter ought to be recommitted to the committee for further consideration and to report out a measure that the committee really wanted us to adopt.

Now, the committee has apparently abandoned that bill, and, as I say, we have a brandnew bill. I would be for recommitting this bill right now were it not for the fact that we do have before us the Ayres substitute which has been thoroughly considered and adopted once by the House of Representatives. If it was good last year, then I say it is just as good this year.

Obviously, this whole field is controversial. I was here when the first bill was enacted, and it was controversial then. The increase in 1955 under President Eisenhower was controversial, but we brought that change about, and, as I say, last year we have an increase in the minimum wage and extension of coverage. May I say, before I go any further, that after the Kitchin substitute was adopted in the committee I voted for it. It provided for a 15-cent increase and an extension of coverage in the interstate commerce concept. It was not my fault it did not become law last summer. I wish now that it had become law at that time, but it did not.

Last year when we considered the matter there was grave concern about the economic consequences. There is that same concern today. Let me address myself to a few of the people who may for one reason or another have some objection to the Ayres substitute.

First of all, there are some who feel they ought to vote for a 25-cent-an-hour increase right now. May I just say with all respect to the committee and everybody concerned that the increase as of now to 25 cents has been abandoned. This is a 15-cent-increase bill. Reference has been made to the effective date of the 25 cents as coming in 2 years. As I read the substitute offered by the gentleman from Oklahoma the 25-cent increase would become effective 4 months and 2 years from the date this should become law, if it does become law.

So I say to you people who feel that you ought to have 25 cents right now, vote for the 15 cents, then we will be back—I hope some of us will be back—in the next Congress. Every Congress likes to raise the minimum wage. So let us leave that for the next Congress. I do not know what the economic situation might be in the country. It might be such as to not dictate such an increase.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

(By unanimous consent (at the request of Mr. HALLECK), he was allowed to proceed for 5 additional minutes.)

Mr. HALLECK. Mr. Chairman, on the other hand it might be well that the Congress would determine that an increase above the 10 additional cents an hour should be had in the next Congress. So I believe it would be the better part of wisdom to leave to the next Congress that final determination, because, may I say again, the bill presently before us will give to the people presently employed and covered under the act an increase of 15 cents, which will apply for the next 2 years and 4 months after the law becomes effective.

There are some here who think it is a mistake to have any minimum wage bill at all, or any fair labor standards bill; there are some here who think that we should not increase the minimum now or extend the coverage. To those who feel that way, I say that in all my career here I have felt it my duty if I thought something was bad to improve it as best I could in the consideration of it on the floor of the House. If I thought a proposal offered as an amendment or a substitute would improve what I otherwise thought was bad legislation, I have supported it. I know once in a while we might be tempted to keep something just as bad as possible, according to our likes, or the likes of the people we represent, in order to vote against it, but I do not believe that is good statesmanship.

So, may I say to those who believe that nothing should be done here in this direction, you ought to support the Ayres substitute because, in my opinion, it is a well-thought-out, well-conceived, desirable piece of legislation which represents a real advance not only in the amount involved but in the coverage.

Now, to those people who think nothing should be done, it is their privilege to register their approval or disapproval of whatever finally comes on for a vote, but certainly I do not believe that position should be taken now.

This really is a peculiar situation that confronts us; the committee having reported a bill that I thought was substantially agreed upon; a substitute having been prepared, not prepared just in the last few days but a substitute carefully thought out and prepared a long time ago. All of the debate has proceeded on the Kitchin-Ayres substitute as against the committee bill. Well, as far as I am concerned, let it stay there.

Now, the vote will come first of all, of course, on the Albert substitute as against the Ayres substitute. I think that we ought to go right back where we started; turn down the Albert substitute, adopt the Ayres substitute presently before us, and then when we go back in the House we will have the vote between the Ayres substitute and the committee bill.

At I say, the 15-cent increase was apparently determined upon not just by me but by the top people in our present administration, who apparently now agree with the contention of the last administration, that the circumstances in the country at this time would only justify a 15-cent increase, and that is provided here.

Now, it has been argued so much that I do not like to belabor the point, but the Ayres substitute does cling to the principle of interestate commerce, and I, for one, want to have it stay right there. I do not want to bring every statehouse, every county courthouse and every city hall to Washington, and I think it is high time that we began to pay some attention not only to the responsibilities but the rights of the States in these various matters. If the people in the States should, through their legislatures, want a minimum wage for intrastate commerce, let them have it,

that is their right, but let us not try to write it from Washington.

Now, as to this substitute that has been offered by the gentleman from Oklahoma—and, incidentally, as I said yesterday, there is no person in this body from whom I have a higher respect. He has complete integrity. He said he offers this bill on his full responsibility. Well, that is good enough for me. But, of course, we understand now that apparently it has not only his blessing but the blessing of the administration, the blessing of the majority leadership, and, I assume, of the members of the committee, but it presents here new and novel provisions that I do not think should be adopted.

Mr. Chairman, let us stick with something that has been tried and proved.

Mr. VINSON. Mr. Chairman, I offer an amendment to the Albert substitute.

The clerk read as follows:

Amendment offered by Mr. VINSON to the substitute offered by Mr. ALBERT:

On page 4, strike out lines 17 through 22 and renumber the following paragraphs accordingly.

Page 17, beginning in line 1, strike out "except an establishment in an enterprise described in section 3(s)2."

Page 17, line 9, strike out "commercial."

Page 17, beginning with the quotation marks "provided further".

In line 16, strike out everything down through "located" in line 23.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. VINSON. Gladly.

Mr. ALBERT. Mr. Chairman, personally I would be delighted to endorse and to accept the amendment that the gentleman has offered.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield to the gentleman from California.

Mr. ROOSEVELT. Mr. Chairman, I, likewise, am glad to accept the amendment.

Mr. VINSON. I thank these two distinguished gentlemen. Let me say merely that this amendment takes out of the bill the provisions with respect to laundries.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield to the gentleman.

Mr. BOGGS. This is a blanket exemption; it takes out all classes of laundries?

Mr. VINSON. Exactly; under the Federal law today laundry establishments are not included. The Albert substitute includes them. My amendment takes all of them out from the different sections of the bill.

Mr. BOGGS. Including such places as linen supply?

Mr. VINSON. That is correct.

Mr. BROOKS of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield to the gentleman.

Mr. BROOKS of Louisiana. The gentleman's amendment on page 17 relates also to laundries; does it not?

Mr. VINSON. It relates to laundries wherever laundries are referred to. We are washing laundries clean out of the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. VINSON].

The amendment was agreed to.

Mr. GOODELL. Mr. Chairman, I move to strike out the last word.

Mr. KITCHIN. Mr. Chairman, will the gentleman yield to me?

Mr. GOODELL. I yield to the gentleman.

Mr. KITCHIN. Mr. Chairman, I would like to clarify a position that I have taken here. I do not mean to be argumentative about this matter at all. The gentleman from Oklahoma [Mr. ALBERT] knows that I made an effort to assist in clearing up language in the Albert bill, as referred to in this particular section that we have been talking about. I am frankly of the opinion, Mr. Chairman, that instead of clearing up that particular section, we have done it a grave disservice, which I deeply regret. I am afraid that somewhere along this line we may accidentally, if this bill becomes a section in the statute, make it a little bit more ambiguous than even the phrase "depend upon."

Mr. GOODELL. I thank the gentleman and I agree with him. I think with this language here, although it is well intentioned, that we just hop from the frying pan into the fire. I would like to ask the gentleman from Oklahoma [Mr. ALBERT] with reference to this language which he has now substituted on page 4, the commerce language, this question. You have here in the second clause the words "25 percent of the goods, materials and supplies which are annually used or worked on in providing those services," come from out of the State.

As an example, take a shoestore which got most of its shoes from out of the State, 25 percent or more. That is covered regardless of its size, except for this dollar volume test. Now, how about a shoe repair store? You have here, goods worked on. Are you going to have the wage and hour people go in and find out where these shoes were made that the shoe repairman works on?

Mr. ALBERT. No.

Mr. GOODELL. That is the language you have here, I think.

Mr. ALBERT. I do not think so.

Mr. GOODELL. "Goods, materials, and supplies which are annually used or worked on in providing the services," I quote.

Mr. ALBERT. With respect to service establishments this clearly has no reference to goods that are worked on for customers. Such goods could not have any possible bearing upon the subject. I will say to the gentleman that that is part of the legislative history; there is not any question about that.

Mr. GOODELL. I am glad to have the gentleman's clarification, but the words in your bill are "used or worked on." Do I take it you are going to go into a shoe repair store that is covered and, if the dollar volume is brought down, find out about the hammers and nails, where they were made, and so on? These are the things the shoe repairman works with.

Mr. ALBERT. In all fairness, I believe that this is reaching the point of the ridiculous. Does the gentleman know of any shoe repair store where there is a volume of business that would justify bringing it under the provisions of this bill, a million-dollar annual shoe repair business?

Mr. GOODELL. Let me say to the gentleman I have no faith in the dollar-volume exemption because it is made clear by the advocates that they will reduce this down to include everybody, as quickly as they can. This language which you have depending on the original interstate commerce clause in the original Albert bill is probably making it worse. I thoroughly deplore writing this kind of language. I frankly wonder, to get down to the most ridiculous, if you would go to a veterinarian and find out where the dogs and cats are produced that he is going to work on. It is about that bad, I think.

Mr. O'HARA of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield.

Mr. O'HARA of Michigan. I am privileged to serve with the gentleman from New York on that committee. The gentleman from New York is too good a lawyer to defend seriously some of the arguments he has made here. He knows that for over 50 years the Supreme Court has been refining its decisions as to what constitutes commerce. These are well-defined legal principles which we have been dealing with for many years. They will apply in this act as well as in any other.

Mr. GOODELL. May I say to the gentleman we are not talking about what the Supreme Court has defined the commerce clause to be, we are talking about the way you are applying the commerce power to this legislation. We are writing new legislation in here over essentially local enterprises, I am afraid. You have given a pragmatic $1 million limit admittedly so you can say that all these little shoestores and others are presently out, but the intention of the advocates is clear, they are going to move that $1 million limit down. That takes us back to what you have put in here about what is commerce. You have said "all materials and supplies used or worked on." I think it will get to a ridiculous stage.

Mr. O'HARA of Michigan. We use the word "commerce," and they have to be goods moved in commerce, but that term has been defined over the years by the courts. It is no different than any other use of the word "commerce." It is the same as in the Labor Relations Act or in other of our many statutes which are based on the power of the commerce clause.

Mr. GOODELL. These words "that are worked on" are brand new. You just put them in here to try to get something different than what you had before. If we have this kind of a bill, it will be thrown out in the conference and you will be back to the dollar-volume sales, because it will be so ridiculous that when you get to conference they cannot accept such language. You are merely bypassing this House so they can come back here with a dollar-volume sales test for us.

Mr. POWELL. Mr. Chairman, I wonder if we can get unanimous consent

that all debate on this amendment and the substitute cease at 5 o'clock?

The CHAIRMAN. Is this on the Ayres amendment and all amendments thereto?

Mr. POWELL. That is correct, Mr. Chairman.

The CHAIRMAN. Is there objection?

Mr. FRELINGHUYSEN. Mr. Chairman, I object.

Mr. POWELL. Mr. Chairman, I ask unanimous consent that all debate on the Ayres amendment, and all amendments thereto close at 5:15 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. JONAS. Mr. Chairman, reserving the right to object, how much time would that give those of us who are not members of the committee and who have not had an opportunity to participate in this debate?

The CHAIRMAN. The time would be divided equally among those who indicate their desire to speak.

Mr. JONAS. Yes, Mr. Chairman, but how much time would that give to each Member?

The CHAIRMAN. It depends on how many indicate a desire to be heard.

Mr. JONAS. Mr. Chairman, the Members who desire to be heard are standing.

The CHAIRMAN. The time to be allotted to each Member would be roughly 2½ minutes.

Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. FRELINGHUYSEN].

Mr. FRELINGHUYSEN. Mr. Chairman, I said yesterday I thought the way this substitute had been presented to the House made a travesty of the legislative process. I still feel it was a tardy unveiling, and even now little has been unveiled. This is a poor way to legislate, and even more earnestly as the result of today's developments. In 7 hours of debate on this bill we received only a few reluctant answers to some specific questions with reference to the Albert amendment which is now before us. We should have had a detailed explanation, including full discussion of the differences between the Albert and the Roosevelt bills.

We are entitled also to know who specifically developed this legislation. There is an article in today's newspaper giving the names of the participants in the meeting which developed this proposal. Included were two members of the Education and Labor Committee and some members of the administration including the Secretary of Labor. I think we are entitled, at least, to that information.

Furthermore, we are entitled to know more about the differences between this bill and the committee bill. This has been very sketchily presented just now. We need also to know the reasons why these differences have been incorporated in this amendment. For instance, why has the definition of "enterprises" been changed? Why is there no escalation clause with respect to newly covered employees? Why are seasonal workers treated differently under this Albert proposal?

In conclusion, Why is it necessary for us to bypass the regular process of discussion in an effort to come up with an agreed compromise? This discussion should, of course, take place in the appropriate committee. Since this was not done, we should at least have thoroughly discussed the Albert bill during the debate just completed. What has taken place here on the floor today is proof positive that we have no real alternative but to accept the Ayres substitute. The majority leadership and indeed Secretary of Labor Goldberg himself, have in effect repudiated the Roosevelt bill. I certainly hope we pass the Ayres substitute.

The CHAIRMAN. The Chair recognizes the gentleman from Florida [Mr. HERLONG].

Mr. HERLONG. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HERLONG, of Florida, to the amendment offered by Mr. AYRES, of Ohio:

Page 2, line 5, strike out the period and add the following: "and in the case of fruits and vegetables includes (1) transportation and preparation for transportation, whether or not performed by the farmer, of the commodity from the farm to a place of first processing or first marketing within the same State, (2) transportation, whether or not performed by the farmer, between the farm and any point within the same State of persons employed or to be employed in the harvesting of the commodity.

Mr. PUCINSKI. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. PUCINSKI. Mr. Chairman, I make a point of order against this amendment on the ground that it is not germane and would like to be heard on my point of order.

Mr. O'HARA of Michigan. Mr. Chairman, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Michigan.

Mr. O'HARA of Michigan. Mr. Chairman, if the Chair is prepared to hear the gentleman from Illinois, the gentleman has yielded to me and I would like to state part of the gentleman's objection.

The amendment offered by the gentleman from Florida attempts to amend not the act before us, but Public Law 78, under which migrant labor is brought into the country, and the other act of Congress under which the U.S. Employment Service is established.

An exemption already exists under the Fair Labor Standards Act, exempting agricultural labor from the application of the Fair Labor Standards Act, and this is an attempt to amend not the Fair Labor Standards Act, but other acts passed by various Congresses.

The CHAIRMAN (Mr. WALTER in the chair.) The Chair is ready to rule.

This is unquestionably an amendment to the Fair Labor Standards Act. It specifically refers to the Fair Labor Standards Act.

The Chair overrules the point of order.

The gentleman from Florida is recognized.

Mr. HERLONG. Mr. Chairman, I hesitate to take the time of the Committee at this late hour to present an amendment which may seem to some of you relatively insignificant. This amendment was to have been offered by the gentleman from Texas [Mr. KILGORE], but he is ill today and of course could not be here. Believe me this amendment is of great importance to all of us in the fruit and vegetable areas of the United States.

Mr. Chairman, the definition of "agriculture" in the Fair Labor Standards Act of 1938 includes, among other things, "harvesting of any agricultural or horticultural commodities." This definition has now been interpreted by the Wage-Hour Division of the U.S. Department of Labor not to include the transportation of agricultural commodities from the farm to the place of canning, packing, or processing, and further, to not include the transportation of the harvest crew to the harvest site unless such transportation in either case is performed by the farmer or an employee of the farmer. The amendment would insure that the transportation of the harvest crew to and from the farm and the transportation of the just-harvested commodities to the first place of packing or processing within the same State would be included within the agricultural exemption. Such transportation was assumed to be exempt since they were an integral part of agriculture and particularly harvesting, until interpretations by the U.S. Department of Labor held otherwise.

The legislative history of the original bill shows clearly that the handling or hauling of fruit or vegetables in their raw or natural state were exempt and this is to clarify what is felt is an erroneous construction of the original act and amendments.

(By unanimous consent Mr. GROSS yielded his time to Mr. GOODELL.)

Mr. GOODELL. Mr. Chairman, I rise in opposition to this amendment.

We have included, actually, in all of the bills that are before us a provision for a report from the Secretary of Labor next year on the seasonal exemptions that are in the present Fair Labor Standards Act. This is a very complicated act, and I am afraid that any amendment adopted on the floor will be injurious. I am fearful of the effect such amendments might have on the entire act as the situation now stands.

We will have a report next year from the Secretary of Labor advising us as to what he recommends can be done in the seasonal field. Members of the committee on both sides of the aisle recognize there are inequities here but we should not adopt any amendment offered on the floor of this nature when it is so complicated.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. GOODELL. I yield to the gentleman from California.

Mr. ROOSEVELT. Mr. Chairman, I want to agree with the statement the

gentleman has made. He has stated the situation well. I hope all Members realize there is in the Albert bill, as well as in the committee bill, a particular provision for a study of this complicated matter, and that we will get in this report the whole problem next year.

Mr. GOODELL. I trust the gentleman from California inadvertently omitted saying that it is in the Kitchin-Ayres bill also.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. HERLONG].

The question was taken; and on a division (demanded by Mr. HERLONG) there were; ayes 105, noes 109.

Mr. HERLONG. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. HERLONG and Mr. KITCHIN.

The committee again divided and the tellers reported that there were—yeas 161, nays 133.

So the amendment was agreed to.

Mr. VANIK. Mr. Chairman, I want to take this opportunity to urge this committee to report out a minimum wage of $1.25 per hour with the broadest kind of coverage.

My district is principally an area of workers, a great many of whom would be affected by this legislation because we have many industries that are paying less than this minimum wage. So we are as vitally affected as any other section of the country.

If the 75 cents per hour minimum wage was determined as reasonable by Congress in 1949, certainly $1.25 per hour is a reasonable minimum wage today. The rising cost of living demands this increase in the minimum. This is more than a question of economics, it is a question of morality. It is a question of morality that each and every Member of this body must face.

We must avoid damage to America by sectionalism. It is tragic to see one part of America competing with another when the competition between regions in America is not in the quality of the product—but in the differential that may exist in labor costs. It is competition at the expense of the living standards of workers and it thereby becomes unfair. Production regions in America should compete on the availability of resources, utility services, skills and markets, but never on the basis of cheap-labor forces. This kind of labor competition could sap the strength of the country.

An effective minimum wage law provides the best curb against the interstate flight of industry from established industrial centers to the cheap low-wage areas of this country. This law provides the best form of insurance against the reckless "pirating" of industry which would otherwise prevail, setting State against State, community against community and eventually divide the Nation against itself.

Mr. WHARTON. Mr. Chairman, we have listened patiently during several hours of debate on the so-called minimum wage bill. This title obviously is a misnomer, and if the Federal Trade Commission were to pass on a label of this nature, I suspect that they would have something to say about misrepresentation and fraud. The primary purpose of this legislation is to extend coverage beyond the accepted bounds of interstate commerce and invade the jurisdiction of the individual States. Every Member on the floor today recognizes this proposal as a "foot-in-the-door" and "camel's-nose-under-the-tent" to regulate and increase all wages. In some quarters any bill of this nature will be blamed for another round of inflation, although I regard it as the effect of inflation rather than its cause. Inflation emanates from the top and not the bottom of the totem pole. I wish that all of our Members might have had some experience as a small businessman, as I have had; and it would also be helpful if they had been employed by a large corporation and belonged to a labor union. I am told that certain labor contracts, especially in the textile field, are based upon the minimum wage that this body provides for interstate commerce; and while I question the wisdom of that, the fact remains that this type of legislation is becoming more or less an institution with us.

I have accordingly assured my labor constituents that I would extend due consideration to minimum wage laws under interstate commerce, and the present bill may well represent the major labor legislation for the present session of Congress. I am receptive to any proposal to keep that minimum wage in line with the cost of living; that means an increase at this time, and I do not think there is much question about the future of inflation under the present administration.

Now as to this proposal for a new and distorted concept of interstate commerce, I think the authors of the present legislation are trying to downgrade the intelligence of our membership. The establishment of a new definition of interstate commerce is important and ought not to be included in a minimum wage bill as a collateral matter. Personally, I feel that there are some things that can well be left to the judicial branch of our Government; and while they have already gone far afield in their definition of this particular question, I think it would be well to bear with them a while longer. Under the amendments which are to be offered here today, I intend to support a minimum wage increase for interstate commerce only, consistent with the increased cost of living; but if an extensive coverage is included which invades the field already covered by our State laws, then the proponents of the present legislation will have defeated a minimum wage proposal.

Mr. HOLTZMAN. Mr. Chairman, during the course of this debate on the minimum wage bill, I would like to take this opportunity of indicating my support of H.R. 3935, the bill which has been reported by the House Committee on Education and Labor. I had previously introduced similar legislation, and had voted for the measure which was brought to the House floor last year. Unfortunately the bill died in conference.

I am hopeful that we will be able to enact a satisfactory bill this year—one which will raise the minimum wage to $1.25 per hour eventually, and extend the coverage. The last time the minimum wage was raised was in 1955—6 years ago—when Congress raised the minimum to $1 per hour, with no extension of coverage. We have a labor force in this country of over 70 million, and of those less than one-third are protected and covered by the Fair Labor Standards Act. The wage-hour law was first put into effect in 1938, and since that time, although we have been successful in raising the minimum wage, we have not met with success in our efforts to extend coverage to the remainder of the labor force.

President Eisenhower had previously asked for a limited expansion of coverage, and in his last state of the Union message this year had again asked for expanded coverage and a "moderate adjustment" of the minimum wage. President Kennedy in his message to the Congress on February 2 pointed out that the labor force was rising by 1.5 percent each year, and advocated an increase in the minimum wage to $1.15 per hour, with an increase to $1.25 within 2 years. He proposed new coverage for several million workers in the retail trades and services, and H.R. 3935 brings these provisions to the House floor for consideration.

At the present time, with lingering unemployment, and with the continued upward spiral of living costs, the recommendations contained in H.R. 3935 are certainly not extreme. There is no doubt about the fact that the minimum wage, despite the increase of 1955, has failed to keep up with the cost of living. Unemployment figures for the past several years have been tragic, and have been showing a steady increase, the seasonally adjusted rate standing at 6.8 percent in February of this year. Unemployment increased by 300,000 in February, to 5.7 million.

The proposed increase and expansion of coverage would put a more realistic floor beneath current wage levels and would improve the standards of living, the morale and the productivity of many of our workers; and at the same time would prevent the exploitation of many of our substandard, seasonal low-wage workers.

The enactment of this bill would provide a much-needed incentive, and would stimulate the national economy and growth.

Mr. RHODES of Pennsylvania. Mr. Chairman, it seems that whenever minimum wage legislation comes up for consideration, its opponents claim that it will intensify whatever economic problem the Nation faces at the time. Last year there was much concern about inflation, and it was asserted that any improvements in the Fair Labor Standards Act would lead to higher prices and an inflationary spiral. The fact that the increase in the minimum wage to $1 did not result in increases in prices of the products of low wage industries was conveniently overlooked.

This year, since our major economic problem is unemployment, it is not at

all surprising that opponents of H.R. 3935 assert that any increase in the minimum or expansion of the act's coverage would result in more unemployment. Again, the facts are conveniently overlooked.

When the minimum rate was raised to $1, there was no decrease in the level of employment and no increase in the amount of unemployment. Even in the South, where the impact of the minimum was greatest, unemployment did not rise, as is shown by studies made by the Department of Labor. These studies also show that in low wage communities employment increased rather than decreased. I emphasize, in these communities employment rose during the period of adjustment to the minimum wage. It is true that in some individual plants a few workers were laid off, as happens year in and year out whether or not the minimum rate is changed. But in these communities business generally improved, stimulated no doubt by the added purchasing power brought about by the $1 minimum rate.

The minimum wage increase which is now proposed would have a smaller impact than the increase to $1, and there is no reason whatsoever for expecting that its enactment will add to unemployment. On the contrary, this and other measures proposed by President Kennedy will stimulate the economy and aid in economic recovery.

Mr. PHILBIN. Mr. Chairman, I hope and urge that the House will adopt a fair, vital, forward-looking minimum wage bill.

While it is true that the present parliamentary situation is somewhat confused, there is still ample time and opportunity for the House as a whole to find the right kind of a solution that will mark another forward step in the long, painful struggle for social justice, and that will ensure fair, decent treatment for many low-standard workers throughout the Nation.

The committee has labored long and diligently on this important bill, and it is entitled to great credit for its valuable work. In view of the various proposals now pending before the House, it will be necessary for us to try to agree upon some measure that will reflect the best possible results for all those who will be affected by this legislation.

The amendment in the form of a substitute which has been presented by the distinguished gentleman from Oklahoma [Mr. ALBERT] would seem to be a very ably prepared, comprehensive measure which carries out sound progressive ideas regarding hourly rates, and also provides reasonable coverage while preserving those exemptions which the House has traditionally favored.

I want to compliment the gentleman from Oklahoma for his fine work in so speedily and ably assembling and bringing forth this bill as a solution to the complex parliamentary situation facing us.

In this kind of legislation, it is difficult to satisfy all the various groups that will be affected by it. All the House can do is to work its will, and do its very best, to get a bill that will adequately carry out the objectives of social progress, social gain, and the welfare of working men and women. These desirable objectives when measured against our industrial needs and the general prosperity will bring decent, helpful results, not only for individuals and business but for the economy as well.

I have long favored and supported appropriate legislation in behalf of our working people, and I can clearly see that measures of this kind, if they are properly drafted with due concern for local and group needs, are capable of bringing inestimable benefit to the Nation.

To be sure, it is a most commendable objective to lift the standards of the less favored and the less fortunate among us, and if we can in some substantial degree, achieve this result with the present measure, we may feel that our efforts have not been in vain, and that we have contributed something that will make the lot of the average worker easier, the prosperity of the country brighter and broader, and our future destiny as a great free enterprise society placed on firm foundations.

It will be a great satisfaction and privilege for me, indeed, to support a minimum wage bill that will provide fair labor standards for large segments of the American people.

Mr. DONOHUE. Mr. Chairman, the declared policy written into the original Fair Labor Standards Act is "to correct, and as rapidly as practicable, to eliminate labor conditions detrimental to the maintenance of the minimum standard of living necessary for health, efficiency, and general well-being of workers."

I doubt very much that there are any here who seriously dispute that policy; there are indeed many here who sincerely differ about the ways and means by which this accepted policy can be best extended at this time. Our challenge and duty today is, then, to exercise the fullest measure of study, patience, and tolerance in working together for legislative agreement on a bill to further project our basic policy of advancing the general welfare of workers in the present economy while conscientiously endeavoring to insure its impact upon all industries and individuals is as equitable as we can humanly make it. I hope our discussion here will proceed with mutual understanding and deference so that we can fulfill our duty.

In determining our action on this measure it seems to me primary consideration should be granted to such fundamental factors involved as the advanced living costs affecting the average American family in our modern economy, the essential need of placing more purchasing power in the hands of those who will surely spend it, thus accelerating recession recovery, and implementing the basic objective of moving our economy ahead to meet the Russian challenge, as the President recommends.

The authoritative statistics presented to us show that last year there were some seven and a half million families in this country who had incomes less than $2,000 annually, this in the most prosperous country in the world. It has been expertly estimated that the average family needs a minimum of between $4,000 and $5,000 a year to live at the barest level of respectability.

Let us further realize it has been 6 years since the last minimum wage was approved by the Congress, and the Department of Labor has revealed that, with the advanced livings costs in the intervening period, even raising the minimum wage immediately to $1.25 would only provide a third of what is presently required to maintain a modest but adequate standard of living for the average worker.

These and other statistics recited here are, in my opinion, impressively convincing and should influence our decision in favor of improving the structure of our general wage system and the national economy.

It is our proud boast that the standards of ordinary family living under the American system are the best and highest in the world. We are engaged in a desperate struggle with Communist Russia for survival and the elements of that challenge more and more seriously involve the economic factor.

Under the dedicated and inspiring leadership of our great President, John F. Kennedy, let us prove that our proud boastings are a reality and let us move the economy of this country forward in keeping with our destiny of freedom, progress, and leader of the civilized world.

Mr. LINDSAY. Mr. Chairman, I support a $1.25 minimum wage bill and expanded coverage. It is my intention, therefore, to cast my vote for the committee bill and against the substitute bill, which is a flat $1.15 bill with less coverage.

An adequate minimum wage is not a vehicle for Government regulation of industry nor should it be. The goal of any minimum wage legislation should be to afford a minimum standard of living and a healthy atmosphere for competitive industry without turning loose the long tentacles of Government that could strangle the efforts and ingenuity of a free economy.

The bill before us providing for an increase to $1.25 and extending coverage to certain retail and service industries by means of a dollar volume test is both realistic and sound. Competitive advantage based on substandard wages will be reduced. Less efficient businesses will seek to offset any increased labor costs by improvement of production methods. Greater productivity will increase purchasing power, relieve localities of unemployment claims, and go a long way toward enabling workers receiving substandard wages to gain a reasonable standard of living.

In my view there should be no argument as to the propriety of the dollar volume test. The committee bill presents no severe departure from the traditional concepts of commerce and production for commerce. An enterprise engaged in activities affecting commerce is by no means a novel test. Nor is the dollar volume test so applied. Such a test has been sustained by the courts over and over again—witness the Taft-Hartley Act and the Landrum-Griffin Act. There is no dubious scheme here to include enterprises unrelated to each

other, for only those industries bound by a common chain of business can be related. Furthermore the legislative record written thus far is most explicit on that point. Conversely the interstate commerce test of the substitute bill strikes me as being quite arbitrary. It predicates coverage on businesses which have five or more outlets in two or more States. This can result in the anomalous circumstance of the marginal small business being covered and a large big-dollar volume competitor being exempted.

I am not persuaded by the argument that the economic impact of a minimum wage increase will be unfavorable. The history of the Fair Labor Standards Act does not bear out such a contention. The increased labor costs to the employers have been adequately offset by other internal improvements geared to greater production. This benefits the employer and the employee. Higher minimums in the past have not increased unemployment.

Lastly, a realistic $1.25 minimum wage bill is badly needed for it will certainly help to reduce runaway industry. This is serious in New York and it is equally serious in many sectors of the Nation. We cannot continue to provide a climate that produces less than minimum standards of living, reduced purchasing power, runaway industry, unfair competitive advantage and heavy drains on local communities for welfare assistance.

We can go a long way toward improving such conditions by enactment of a sound minimum wage bill. The prescription has been written. I hope that we can resolve our differences on coverage extensions and provide new ingredients for a healthier economy by enacting this bill.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. PUCINSKI].

Mr. PUCINSKI. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PUCINSKI. Mr. Chairman, it is unfortunate that the tactical situation in the House or fair labor standards legislation is such that in order to make progress many of us are compelled to support a substitute bill which does not provide the extent of coverage the committee originally proposed. It is also lamentable that the retail clerks of America will not receive the additional benefits they are entitled to if the other body fails to improve this legislation. I believe the RECORD should include at this point a telegram sent to the President by James A. Suffridge, international president, Retail Clerks Association:

President JOHN F. KENNEDY,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The officers and members of the Retail Clerks International Association vigorously protest the substitution of the Albert bill for the original administration minimum wage proposal.

The Albert bill freezes the minimum at $1 per hour for newly covered employees; makes no provision for overtime and is otherwise grossly deficient. The Albert bill would write into Federal law an unprecedented, unfair and long-term discrimination against millions of retail workers in wage rates and overtime protection. In no respect does the Albert bill carry out the basic provisions of the original administration proposal, espoused by you as U.S. Senator and incorporated in the Democratic platform. We cannot believe that the action taken at the meeting attended by Secretary Goldberg and others, at which time the gross dilution of the administration bill was agreed to, could in any way meet your longstanding convictions on increased coverage.

The Retail Clerks International Association cannot possibly support the Albert bill, since the bill is basically discriminatory.

Your immediate personal intervention is vital and urgently requested. We urge you to take steps immediately to maintain your basic principles on increased coverage on behalf of the millions of retail employees and that these employees be treated not as second class employees, but that they be accorded the same basic treatment as presently covered workers.

Mr. Chairman, I ask unanimous consent that I may yield the balance of my time to the gentleman from Massachusetts [Mr. MCCORMACK].

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

Mr. MASON. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard. The Chair recognizes the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Chairman, I take this time because I am concerned as a result of the colloquy between the gentleman from Michigan and the gentleman from California with reference to the determination of the Department of Labor with respect to when gross sales will be calculated. I understand from the gentleman from California that this determination will be made every 3 months or once a quarter; is that correct?

Mr. ROOSEVELT. The gentleman is correct.

Mr. JONAS. May I say, Mr. Chairman, that my concern is based upon this fact. You are going to require that employers determine each quarter what their gross sales have been, and then you are going to have four different wage rates per year per establishment covered by this bill. Employees will not know from quarter to quarter how much money they are making, nor will employers know from quarter to quarter what their labor costs will be or what price they will have to ask for their goods.

The CHAIRMAN. The time of the gentleman from North Carolina [Mr. JONAS] has expired. The Chair recognizes the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Chairman, I ask unanimous consent that I may yield my time to the gentleman from North Carolina [Mr. JONAS].

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois [Mr. SPRINGER]?

There was no objection.

Mr. JONAS. I ask the gentleman from California, is that not true? Will not that impose a heavy burden upon every employer covered by this act to make a new determination every 3 months of what his wage scales are to be; and will not that require him to change the cost of the product he makes and will not that result in complete confusion?

Mr. ROOSEVELT. The answer is "No," because in the Albert bill there is the same requirement to file one statement that you are in compliance with the provisions of the act. And as long as you are in compliance you do not have to file the other statements to which the gentleman is referring.

Mr. JONAS. I know, but if I as an employer have gross sales on an annual basis of $1 million, and if during 3 months of that time I do not have sales that equal that pro rata amount, I would be in a different situation for that quarter.

Mr. ROOSEVELT. That is as the law is today. The Labor Board for years has handled this problem.

Mr. JONAS. But the law today is not based upon a dollar volume of sales, so the problem I cite cannot come up today.

The CHAIRMAN. The time of the gentleman from North Carolina [Mr. JONAS] has expired. The Chair recognizes the gentleman from California [Mr. SHELLEY].

Mr. MCCORMACK. Mr. Chairman, will the gentleman from California [Mr. SHELLEY] yield to me?

Mr. SHELLEY. I am happy to yield to the gentleman from Massachusetts.

Mr. MCCORMACK. Mr. Chairman, I am sorry that my friend, the gentleman from Illinois [Mr. MASON] objected a moment ago. He arrived on the floor of the House at the last minute, to vote in the last teller vote, which was all right. So he did not know what was going on prior to that. Nobody objected to others transferring their time. I make no further comment than that.

Mr. Chairman, I listened to the remarks of the distinguished gentleman from Indiana [Mr. HALLECK]. I think he made a very fair statement about the legislative situation. I thoroughly agree with him and the other Members who have talked about the high level of this debate. Certainly the debate on this very important, and I realize, very controversial bill has been on a very high level, which reflects great credit upon the Members of the House, sitting as we are in Committee of the Whole.

There are a few observations I want to make.

To all Members on both sides who believe in minimum wage legislation and a further increase and a further extension, I respectfully submit that the compromise offered by the gentleman from Oklahoma [Mr. ALBERT] should be supported. I agree with the observations made by the gentleman from Indiana [Mr. HALLECK] that those who oppose any minimum wage legislation should vote along the lines that he indicated, but on the other hand those who favor minimum wage legislation should vote for the Albert amendment without regard to what side of the aisle we sit on.

You and I all know that progress is made through reasonable compromise.

The Albert amendment is a reasonable compromise. There are some here who feel that the committee bill did not go far enough. There are others who feel that it went too far. I submit that the Albert amendment represents a reasonable compromise for which those who support minimum wage legislation can vote, even if in some respects it goes further than some think it should go, and in other respects some feel it does not go far enough. So I urge that the amendment is reasonable, certainly, and I hope the substitute will be agreed to.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. HOSMER].

Mr. HOSMER. Mr. Chairman, I had a question for the gentleman from California [Mr. ROOSEVELT] with respect to a constitutional aspect. There will not be time to answer it, but I do want to pose the question.

In the gentleman's memorandum of constitutionality, he said that the $1 million test would be ample to insure that the enterprise would have sufficiently substantial impact on interstate commerce to be well within the scope of constitutionality. That I grant. I am disturbed about the fact that the Constitution and the legal system have always required that the laws apply equally and that equal protection of the laws be granted. Therefore, if you have one firm doing a million-dollar business, and another firm next door in the identical business that is just as much in interstate commerce but doing $900,000 worth of sales, what happens to equal protection? Both as to the second firm and its employees?

The CHAIRMAN. The Chair recognizes the gentleman from South Carolina [Mr. HEMPHILL].

Mr. HEMPHILL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HEMPHILL, of South Carolina, to the substitute offered by Mr. ALBERT, of Oklahoma: On page 16, line 17, strike out paragraph (iii) of paragraph (2) of section 10(a). Amend section 10(a) by adding a new paragraph:

"(iii) is situated outside of the boundaries of a standard metropolitan statistical area as now delineated and now defined by the Federal Committee on Standard Metropolitan Statistical Areas under the direction of the U.S. Bureau of the Budget."

Mr. HEMPHILL. Mr. Chairman, I take this time because on yesterday I discussed here the fact that the impact of this legislation on the rural areas of this country is something which has not been explored as far as I can determine. The standard metropolitan statistical area is an area usually in which a city has 50,000 or more, or two contiguous counties have 50,000 or more people. All I am trying to do is the same thing the Albert substitute has done on page 22 with reference to radio operators. I am saying instead of the 50,000, which may affect the rural or farm store operator, that we exempt the rural areas, take in the cities where the cost of living is higher and the wage scale is higher, and let those people outside the cities where the wage scale and the cost of living and the variety of operation are altogether different and altogether cheaper have a chance under this legislation.

Let this House vote on this. Then, if the rural areas are affected, and unemployment results, your vote for or against will determine your interest in the welfare of the people of the rural areas.

I am sympathetic to every small merchant. How he makes a living is a mystery, almost, for the small merchant works harder, and has more problems than any business or workingman I know. He must work long hours to make it.

His judgment must be good on what to buy and sell.

He has many taxes others do not have.

His operation varies as his demands, his opportunities, his locale, his custom differentiates.

He is not only our merchant, he is our friend, neighbor, and pillar of our community. I salute his efforts, now and in the past. I intend to help him.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. DENT].

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. DENT. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. Mr. Chairman, I am very much in favor of H.R. 5900 which, if enacted into law, will amend the Fair Labor Standards Act of 1938, as amended, to provide additional coverage for millions of men and women primarily employed in our large retail and service industries. In addition, those people now covered by the law will become entitled within a three year period to a minimum of $1.25 an hour.

As my record in the House over the past 4 years will show, I have consistently advocated a minimum hourly wage of $1.50, which to my way of thinkink is a just and fair figure; and is based on my knowledge of the average family's expenses and living conditions as they exist today and as far back as 4 years ago in our city of Philadelphia.

In the United States today there are approximately eight million men and women who are working for less than $1 an hour—and this is not right. With today's sky-high prices, I do not know how many of our families exist when their take-home pay is from $30 to $40 a week. I personally know of families living in my district in south Philadelphia who are barely getting by on a weekly paycheck of $35. This to me is not living—it is struggling to exist. These people do not have steaks, chops and chicken. They eat soups, potatoes and rice, drink powdered milk and use other substitutes for good wholesome food. Of course, where the man and wife both are working, home conditions are somewhat better—but leave a lot to be desired.

Why should big business continue to grow richer through the honest toils of its underpaid employees. Why should some clip coupons and reap dividends when the less fortunate worker has to fight to keep alive. It is not fair to the wage earner or right that his children must suffer.

Recently the AFL–CIO urged the Congress to expedite the President's 12-point economic program and in an effort to improve the program recommended a $1.25 minimum wage at once, rather than in steps over a 3-year period. I wholeheartedly concur with this proposal because it would give our economy the shot in the arm it needs to spiral upward. It would immediately put extra money in the pockets of the wage earner. It would buy more and better food and, in general, would raise the living standards of our American workers.

Our present economy demands at least $1.25 hourly minimum wage. Our workers are entitled to it. I stand with them and urge that H.R. 5900 be enacted into law.

Mr. DENT. Mr. Chairman, I know this amendment and know exactly what it does and have given it a great deal of study because we had it before us in the subcommittee. One of the basic faults with this type of coverage is that it does not take into consideration the soundest of all economic values, and that is the ability to pay, because it takes into coverage all of the communities that are included in a statistical metropolitan area. Under the latest census reports, an entire county or an entire area of three or five or six counties may be considered a metropolitan area.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina [Mr. HEMPHILL] to the substitute amendment offered by the gentleman from Oklahoma [Mr. ALBERT].

The amendment was rejected.

The CHAIRMAN. The Chair recognizes the gentleman from Maryland [Mr. JOHNSON].

Mr. JOHNSON of Maryland. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Maryland to the substitute amendment offered by Mr. ALBERT: Page 18, strike lines 9 through 17 and insert in lieu thereof:

"(5) any employee employed in the catching, taking, harvesting, cultivating, or farming of any kind of fish, shellfish, crustacea, sponges, seaweeds, or other aquatic forms of animal and vegetable life, including the going to and returning from work and including employment in the loading, unloading, or packing of such products for shipment or in propagating, processing (other than canning), marketing, freezing, curing, storing, or distributing the above products or byproducts thereof;".

Page 21, strike lines 19 through 23 and insert in lieu thereof:

"(4) any employee employed in the canning of any kind of fish, shellfish, or other aquatic forms of animal or vegetable life, or any byproduct thereof;".

Mr. JOHNSON of Maryland. Mr. Chairman, H.R. 5900 proposes to amend the present fishery exemptions of the act by elimination of the exemption pertaining to all onshore operations. Generally, this would repeal the present exemption of such operations as packing, propagating, processing, marketing, freezing, curing, storing, and distribution of fish, shellfish, seafood and their byproducts.

When the Fair Labor Standards Act has been under consideration and in respect to all marine legislation generally,

Congress has been alertly aware of the uniqueness of the fishing industry and has exercised extreme caution in dealing with it.

No understanding of the present problem is possible without a rather full knowledge of the legislative history of these exemptions. I will not undertake to review the extensive record of these exemptions in the body of this statement, but I call your attention to statements already on record in the printed hearings of the House and Senate committees of Congress on this subject. The first of these statements is that of R. E. Steele, representative of the National Fisheries Institute, Inc., delivered before the House of Representatives Committee on Labor on November 6, 1945. The second is the statement of John A. Fulham, representative of the National Fisheries Institute, Inc., before the Senate Committee on Labor and Public Welfare on April 29, 1948.

It is clear from the legislative history of these amendments that Congress has always recognized that the fisheries industry is beset with three important characteristics that distinguish it from the normal pattern of industrial activities. These factors are variance and unpredictability of the catch, the perishability of the product, and the exposure to foreign competition. It is also clear that Congress has viewed offshore and onshore activities as a single integral operation at least up to the point that perishability of product was no longer a factor and has undertaken to give both phases of these interdependent activities broad exemption from wage and hour control.

To remove the present exemptions applicable to onshore operations would be about as injurious to the fishing industry as cutting off one of your two legs. Both onshore and offshore operations are closely interwoven and are completely interdependent one on the other. Both phases of activities are affected by the same basic factors of variance of catch, perishability of product, and foreign competition which are the very foundation of the exemptions. These factors are just as much with us today as they were in 1938 and 1949, when the present fisheries exemptions were considered. Scheduling of fishery operations is just as difficult as ever. The circumstances of the catch and subsequent processing and marketing of fishery products is as diverse and complex as the colors of Joseph's coat. The onshore and offshore activities relating to each type and species of commercial fish and marine life have their own peculiar characteristics. And even within the same species, such as shrimp, there are variables of size and color that control the commercial value and distinguish the end use of the catch.

The second characteristic of high perishability of product is the same as before. Almost without exception, all species of fish and marine life are highly perishable and must be expeditiously and carefully handled so long as a state of perishability is present. Here, I wish to point out that in respect to a very substantial part of the catch, this factor of perishability continues right on through to final consumption of the product. To illustrate, if you will refer to page 11 of Fishery Leaflet 393, exhibit A, showing the disposition of the 1958 catch amounting to 4,716 million pounds round weight, 31.4 percent or 1,483 million pounds went to market in a fresh or frozen state. Canning accounted for 26.3 percent or 1,242 million pounds. Only 1.9 percent or 88 million pounds went into cured fish. The remaining 40.4 percent, amounting to 1,903 million pounds, went into by-products and bait.

There is then the third and equally significant factor against domestic wage control for the fisheries. This is the matter of exposure to foreign competition which threatens the very existence of the domestic fisheries. The U.S. fisheries industry is in a precarious position. Many operators have already been forced out of business and, no doubt, many others will follow.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

The question is on the amendment offered by the gentleman from Maryland [Mr. JOHNSON] to the substitute amendment offered by the gentleman from Oklahoma [Mr. ALBERT].

The question was taken; and on a division (demanded by Mr. JOHNSON of Maryland) there were—ayes 79, noes 196.

So the amendment was rejected.

The CHAIRMAN. All time for debate on the Ayres amendment and all amendments thereto has expired.

Mr. JENNINGS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JENNINGS to the substitute amendment offered by Mr. ALBERT: On page 25, delete lines 6 through 15, and substitute the following:

"EFFECTIVE DATE

"SEC. 14. The amendments made by this Act shall take effect upon the expiration of one hundred and twenty days after the date of its enactment, except as otherwise provided in such amendments; except that the authority to promulgate necessary rules, regulations, or orders with regard to amendments made by this Act, under the Fair Labor Standards Act of 1938 and amendments thereto, including amendments made by this Act, may be exercised by the Secretary on and after the date of enactment of this Act and except that the Secretary may, upon proper application from an employer with a term contractual agreement with the Federal Government, suspend the applicability of this Act as it applies to such employer until such contract expires but for no longer than one year after the date of enactment."

Mr. POWELL. Mr. Chairman, the committee accepts the amendment.

Mr. HALLECK. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. HALLECK. The point of order is that all time for debate has expired and nobody may be recognized.

The CHAIRMAN. The gentleman is correct.

The question is on the amendment offered by the gentleman from Virginia.

The question was taken; and on a division (demanded by Mr. JENNINGS) there were—ayes 167, noes 158.

So the amendment was agreed to.

The CHAIRMAN. The question is on the Albert substitute to the Ayres amendment.

Mr. POWELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. POWELL. Mr. Chairman, is that as amended by the Vinson amendment?

The CHAIRMAN. It is the substitute as amended.

Mr. POWELL. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. ALBERT and Mr. GOODELL.

The Committee divided and the tellers reported that there were—ayes 185, noes 186.

So the substitute was rejected.

Mr. MARTIN of Nebraska. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MARTIN of Nebraska as a substitute for the amendment offered by Mr. AYRES: Strike out all after the enacting clause and insert:

"That section 6(a)(1) of the Fair Labor Standards Act of 1938 is amended by striking out 'not less than $1 an hour' and inserting in lieu thereof 'not less than $1.15 an hour'.

"SEC. 2. The amendment made by the first section shall take effect upon the expiration of one hundred and twenty days after the date of the enactment of this Act."

The CHAIRMAN. The question is on the substitute amendment offered by the gentleman from Nebraska [Mr. MARTIN].

The amendment was rejected.

The CHAIRMAN. The question now is on the Ayres amendment.

The question was taken; and the Chairman announced that he was in doubt.

Mr. POWELL. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers the gentleman from Ohio, Mr. AYRES, and the gentleman from California, Mr. ROOSEVELT.

The Committee divided, and the tellers reported that there were—ayes 206, noes 162.

So the amendment was agreed to.

The CHAIRMAN. The question recurs on the committee amendment as amended by the Ayres amendment.

The committee amendment as amended was agreed to.

The CHAIRMAN. Under the rule the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. WALTER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 3935) to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes, pursuant to House Resolution 239, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule the previous question is ordered.

The question is on the amendment.

Mr. POWELL. Mr. Speaker, on this I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 216, nays 203, not voting 12, as follows:

[Roll No. 27]

NOT VOTING—12

Buckley	McDonough	Thompson, La.
Kilday	Miller, N.Y.	Tollefson
Kilgore	Rabaut	Whalley
Landrum	Sheppard	Wright

So the amendment was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Kilgore for, with Mr. Rabaut against.

Mr. Landrum for, with Mr. Buckley against.

Mr. Miller of New York for, with Mr. Sheppard against.

Until further notice:

Mr. Kilday with Mr. McDonough.

Mr. Thompson of Louisiana with Mr. Tollefson.

Mrs. CHURCH changed her vote from "nay" to "yea."

Mr. PASSMAN changed his vote from "yea" to "nay."

Mr. BREEDING changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. HIESTAND. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. HIESTAND. I am, Mr. Speaker.

The SPEAKER. The gentleman qualifies. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. HIESTAND moves that the bill, H.R. 3935, be recommitted to the Committee on Education and Labor.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

Mr. POWELL. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 196, nays 224, not voting 11, as follows:

[Roll No. 28]

NOT VOTING—11

Buckley	McDonough	Thompson, La.
Kilday	Miller, N.Y.	Whalley
Kilgore	Rabaut	Wright
Landrum	Sheppard	

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Rabaut for, with Mr. Kilgore against.

Mr. Buckley for, with Mr. Landrum against.

Mr. Sheppard for, with Mr. Miller of New York, against.

Until further notice:

Mr. Kilday with Mr. McDonough.

Mr. Thompson of Louisiana with Mr. Whalley.

Mr. MACHROWICZ changed his vote from "nay" to "yea."

Mr. LIPSCOMB and Mr. HOFFMAN of Illinois changed their vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. HALLECK. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 341, nays 78, not voting 12, as follows:

[Roll No. 29]

NOT VOTING—12

Buckley	McDonough	Sheppard
Kilday	Mason	Thompson, La.
Kilgore	Miller, N.Y.	Whalley
Landrum	Rabaut	Wright

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Rabaut for, with Mr. Kilgore against.

Until further notice:

Mr. Buckley with Mr. Mason.

Mr. Landrum with Mr. McDonough.

Mr. Kilday with Mr. Miller of New York.

Mr. Sheppard with Mr. Whalley.

Mr. EDMONDSON changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks in the RECORD on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. GILBERT. Mr. Chairman, a cruel and vicious blow was struck against millions of underpaid and unprotected workers of our Nation when the minimum wage legislation which the President requested was defeated in the House of Representatives.

I would have preferred a direct increase in minimum wage to $1.25 now, and in January of this year reintroduced

my bill which so provided. However, the committee bill, H.R. 3935, embodied the President's proposals, and while it represented a compromise, it was felt that it was the best bill on which we could hope to get favorable action. The bill would have provided much needed relief not only to workers, but also would have given the economy of our Nation a boost. Increased wages make possible increased spending by consumers, thus benefiting all segments of our economic structure.

At the last moment, in order to avert defeat, a second compromise bill was offered by the House leadership, for which I voted, and when this was defeated by the Republican-southern Democratic coalition, all hopes for even a reasonable, moderately helpful bill fled. In order to provide at least some assistance to our underpaid workers, which they must have in order to exist in view of present all time high living costs, I was forced to vote in favor of the Republican-backed bill, which is totally unrealistic and unsatisfactory to me. The bill, which raises the minimum wage to only $1.15 for the 24 million employees now covered and which would grant coverage to only 1,400,000 workers formerly uncovered, does not begin to correct the tragic predicament of the vast majority of our workers.

For years, there has been overwhelming evidence of the need for strong, equitable, humanitarian minimum wage legislation, and necessary amendments to the Fair Labor Standards Act have been long overdue.

The scaled-down coalition substitute which we were forced to accept, is in my opinion, a betrayal of the workers of our country, and is a grave disappointment to me. The House of Representatives has failed in its duty to the many millions who have looked to us for the assistance they sorely need. It is hoped that the Senate will come to the rescue and pass a much more satisfactory bill, so that when a new minimum wage bill is passed in its final form, by the Congress, it will more nearly approach the kind of legislation which our workers merit and to which they have long been entitled.

PROGRAM FOR NEXT WEEK

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, I take this time for the purpose of inquiring of the majority leader as to the program for next week.

Mr. McCORMACK. Monday is District Day, and there is one bill, H.R. 258, increase in sales tax.

On Tuesday we will take up the Treasury-Post Office Department appropriation bill for 1962.

Thereafter, if rules are reported out of the Committee on Rules, we will take up S. 1, the distressed areas bill; H.R. 5742, the Reorganization Act, extending the powers of the President; H.R. 5723, providing housing loans for veterans. I understand the Committee on Rules is meeting on Monday.

Mr. HALLECK. I thank the gentleman.

ADJOURNMENT OVER

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CALENDAR WEDNESDAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the call of Calendar Wednesday of next week be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

SERIOUS IMPORTS PROBLEM

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Speaker, on yesterday, following up my many efforts in behalf of the textile industry and other industries plagued and threatened by an increase in the flood of cheap foreign imports, I communicated with both the President and the Cabinet Committee on Textiles which he had previously appointed, urging that immediate attention be given to the serious plight of the textile industry and other affected industries.

I pointed out to the President and the Cabinet Committee the very serious conditions that have been developing over a period of time in textiles, and also affecting other industries, as a result of the flood of cheaply produced foreign imports.

I am fully convinced that the President is not only aware of these conditions but is anxious to relieve them, and I hope that administrative action may be taken at highest executive levels in the very near future to set up quotas on these products on a country by country and category by category basis, and take every other action that can feasibly be taken at this time to prevent the further deterioration of American industrial strength that is causing widespread unemployment and contributing greatly to the gold imbalance.

Over a period of years we have witnessed the tragic decline of the textile industry, which in my section of the country has been virtually driven to the wall by low, substandard competitive conditions in some other sections of the country and also by the huge flow of cheap foreign imports.

There are many who believe that legislative action is needed to correct conditions facing the textile industry and other industries arising from the operation of current reciprocal trade laws.

I have personally been of the opinion for a long time now, and I speak as a friend and supporter of constructive foreign trade and friendly intercourse with other nations, that the best way to correct these threatening conditions would be to restore the control over foreign trade and commerce coming into this country to the Congress, where the Constitution placed it.

If for any reason, this course is not followed, then the reciprocal trade laws certainly should be drastically revised to reflect unfavorable developments in the world that have come from huge foreign grants by this Government, that have permitted many countries to build factories that are fully equipped with most modern machinery paid for out of our foreign grants, operated by American know-how, producing goods that are marketed with the advice and help of American marketing experts, that are sold in the markets of the world in competition with our own and brought into this country to impose unfair, cutthroat competition on American industries and cause widespread unemployment and add to the gold imbalance.

I strongly feel that legislative measures are required and should be considered and adopted this year, because I do not believe that the suffering industries of this country can wait for relief until the expiration of the reciprocal trade treaties laws in 1962, without suffering additional destructive lethal blows from foreign competition.

I think we have another instance here of the effect of apathy, procrastination, and delay in tackling a situation which, if continued much longer, could be devastating to many industries and many American workers and their families.

Beyond any question of doubt, as I see it, foreign imports have been one of the major factors in the present recession and unless they are checked, they will continue to be even a greater factor as time goes on. They have also been a major factor in the gold imbalance, which is giving us all so much deep concern these days.

We are told that reciprocal trade is an integral part of our foreign policy and national defense. While I recognize the value of foreign trade, I cannot accept the thesis that it is necessary for good foreign relations and adequate national defense for this Nation to sacrifice its national interests, weaken its industrial prosperity, invite widespread unemployment and depression in many areas, in order to enjoy good relations with friendly nations, and in order to effect the best possible national defense for this country.

I am not at all persuaded this is a very sound policy. In fact, I think if we act on these assumptions, in time the consequences to our economic system, national prosperity, and welfare could well be devastating.

I recognize with full respect the views of those who differ from this opinion and

I also recognize that at the present time, there are powerful forces within the country that would vigorously oppose any change in reciprocal trade laws. However, it is also my opinion that the public sentiment in this country is rapidly moving toward the view that something needs to be done, and done now, to correct a condition which is greatly threatening the economic welfare of the Nation. Since that is so, I can conceive of no more appropriate forum than the Congress where effective and urgently needed remedies could be, and should be, found.

I do not want anyone to assume that my position indicates that I oppose foreign trade because I have pointed out many times before that I am a strong advocate and champion of constructive foreign trade and support it in the Congress at every opportunity. But it is my strong feeling that unless something is done real soon to bring relief to an increasing number of American industries and workers that are greatly threatened by foreign imports, additional and perhaps irreparable damage will be done to our great American economic productive machinery of which we are so proud and which, in the last analysis, must be not only the basis of our prosperity at home, but also the basis of any worthwhile defense and security system for this country and the free world.

I again strongly urge that the President and his Cabinet Committee give early and intensified attention to the very serious problems growing out of foreign imports, and accelerate action designed to prevent further deterioration of American industrial strength and the employment of our fellow citizens.

FEED GRAINS BILL

Mr. LATTA. Mr. Speaker, I ask unanimous consent that the gentleman from Minnesota [Mr. QUIE] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. QUIE. Mr. Speaker, when President Kennedy appointed as his Secretary of Agriculture a man from my State, Minnesota, many of us expected—I think with understandable justification—that midwestern crops would be treated on an equal basis with southern crops. However, it now appears that the South has a great deal more influence in the Department of Agriculture than the Midwest.

We recently passed a feed-grains bill which permitted the Secretary of Agriculture to establish the price support on corn at a level above 65 percent of parity, as he deemed advisable. The Secretary of Agriculture chose to set the price support at 74 percent for corn, a far cry from what people had been led to expect from an administration which, during the campaign had promised 90 and 100 percent of parity. I am not criticizing the level at which he set corn price supports, but I am criticizing the fact he has set grain sorghum support at 78 percent of parity.

According to the law, eight factors were to be taken into consideration in determining the price support which the Secretary would set for grain sorghum and other feed grains in relation to corn. I will designate those eight factors: First, the supply of the commodity in relation to the demand therefor; second, the price levels at which other commodities are being supported and, in the case of feed grains, the feed values of such grains in relation to corn; third, the availability of funds; fourth, the perishability of the commodity; fifth, the importance of the commodity to agriculture and the national economy; sixth, the ability to dispose of stocks acquired through a price-support operation; seventh, the need for offsetting temporary losses of export markets; and eighth, the ability and willingness of producers to keep supplies in line with demand.

Those, then, were to have been the eight factors taken into consideration in determining the price support which the Secretary would set for grain sorghum in relation to corn. That raises the next question, Were those factors taken into consideration?

Quoting from the Secretary of Agriculture release number 4083, issued on March 22, it is clear that the Secretary has not taken the eight factors into consideration for grain sorghum:

> After considering these factors, the support prices for barley, oats, and rye were set directly at the feeding value in relation to corn, and the support price of grain sorghum was set at 90 percent of the feed value in relation to corn.

Therefore, the Secretary set supports on oats of 74 percent, barley at 74 percent, and rye at 69 percent according to law, but completely disregarded the other seven factors when he set grain sorghum price supports.

The relationship of price-support level of grain sorghum to the price support level of corn will be 90.2 percent in 1961. This has never happened before, as can plainly be demonstrated by the figures for the last 10 years showing the relationship of the grain sorghum support price as a percentage of the support price for corn.

Grain sorghum price as a percentage of corn price

1950	71.3
1951	77.5
1952	83.2
1953	84.9
1954	78.8
1955	63.1
1956	73.5
1957	74.4
1958	75.2
1959	76.0
1960	84.4

We can determine from these figures that for the period of 1950–55 the grain sorghum price as a percentage of the corn price averaged 76.5 percent, and for the period of 1955 to 1960, the average percentage was 76.3.

Since both cotton and wheat are in similar programs, I might also note in closing—to the interest of producers from the Midwest—that the Secretary has seen fit not to change the wheat support price of 75 percent of parity but has raised cotton supports to 82 percent.

HIGHWAY REVENUE BONDS IN LIEU OF INCREASED TAXES

Mr. LATTA. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. OSTERTAG] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. OSTERTAG. Mr. Speaker, the Federal Interstate and Defense Highway System will provide a 41,000-mile network of superhighways throughout the country to move the ever-growing amount of vehicular traffic swiftly and safely. But at this moment there is a need to reexamine the financing provisions for the program because insufficient revenue is becoming available to meet the costs of the program. President Kennedy has told us that an additional $900 million a year must be made available if the program is to be kept on schedule and reach completion in 1975. To provide these moneys, the President has urged Congress to extend certain gasoline taxes and increase other taxes on diesel fuel, tires, tubes, and trucks.

When the need for additional funds first arose 2 years ago, I was opposed to increasing the special gasoline and automotive taxes which are earmarked for the Federal highway trust fund. Instead, I recommended the issuance of highway revenue bonds to provide for the needed funds. My position remains the same, and for that reason I introduced on yesterday a bill to permit the issuance of such bonds by a Federal-Aid Highway Corporation, which is created by my legislation. To retire these bonds, the legislation provides that the existing gasoline and automotive taxes be extended several years beyond their present cutoff date of 1972. The extension would be at present levels and of 4 or 5 years duration.

This method would make unnecessary any increase in the present highway taxes. It would also prevent diversion of certain highway taxes from the General Treasury into the fund for this highway program, as is now proposed. This diversion would reduce the revenues available to the General Treasury and place a heavier burden on the Federal budget.

My proposal would assure that the necessary funds would be available to continue construction of the Interstate Highway System as scheduled. There no longer would be the threat of a financial crisis occurring every few years.

With this proposal, the users of our highways would continue to bear the cost of the construction of this Interstate System. This was the original intent of Congress in authorizing this program.

The Federal-Aid Highway Corporation would be headed by a Board of Directors

composed of the Secretary of Commerce, the Secretary of the Treasury, and a third person designated by the Secretary of Treasury. The corporation would be subject to the provisions of the Government Corporation Control Act.

Mr. Speaker, I believe my plan to be the best solution to the problem that has developed in connection with the national interstate and defense highway program, and I hope it will receive favorable consideration by my colleagues.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. KILDAY, for the remainder of the week, on account of official business.

SPECIAL ORDER GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to Mr. ZABLOCKI, for 1 hour, on Tuesday, March 28, on the subject of the United Nations and Red China.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. PUCINSKI, his remarks in Committee of the Whole today and to include extraneous matter.

Mr. SANTANGELO (at the request of Mr. LATTA) his remarks in Committee of the Whole today and to include extraneous matter and tables.

(The following Members (at the request of Mr. LATTA) and to include extraneous matter:)

Mr. LANGEN.
Mr. FINO.
Mr. CAHILL.
Mr. PELLY.

(The following Members (at the request of Mr. HARDING) and to include extraneous matter:)

Mr. DINGELL in two instances.
Mr. MULTER.
Mr. GALLAGHER.
Mr. TUCK.
Mr. BURKE of Massachusetts.
Mr. BOLAND.
Mr. MONTOYA.
Mr. DANIELS.
Mr. MCCORMACK.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 176. Joint resolution to provide for the reappointment of Dr. Jerome C. Hunsaker as Citizen Regent of the Board of Regents of the Smithsonian Institution.

ADJOURNMENT

Mr. HARDING. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 5 minutes p.m.), under its previous order, the House adjourned until Monday, March 27, 1961, at 12 o'clock noon.

CONTRACTUAL ACTIONS, CALENDAR YEAR 1960, TO FACILITATE NATIONAL DEFENSE

The Clerk of the House of Representatives submitted the following reports for printing in the CONGRESSIONAL RECORD pursuant to section 4(b) of Public Law 85–804:

DEPARTMENT OF DEFENSE,
Washington, D.C., March 15, 1961.

Hon. SAM RAYBURN,
Speaker of the House.

DEAR MR. SPEAKER: In compliance with section 4(a) of Public Law 85–804, reports of contractual actions taken in calendar year 1960 to facilitate the national defense are enclosed herewith.

Table I shows that 290 actions with an estimated cost of $14,469,000 were approved under authority of this act. This number includes 19 actions for which the cost cannot be estimated because the Government's liability is contingent on the occurrence of an accident, such as a nuclear explosion. A total of 141 cases, in which claimants had requested $6,668,000, were denied in their entirety.

Included in the summary table and listed separately in table II are actions whose actual or estimated potential cost to the Government exceeds $50,000 each. Although it is not possible to estimate the cost of the contingent liability cases, for the purpose of this table each such case is assumed to have a potential cost of more than $50,000. The 41 actions listed in table II account for $13,882,000, or 95 percent, of the total value of all cases approved in 1960.

Sincerely yours,

THOMAS D. MORRIS,
Assistant Secretary of Defense (Installations and Logistics).

TABLE I.—*Summary report of contractual actions taken pursuant to Public Law 85–804 to facilitate the national defense, January–December 1960*

TABLE II.—*List of contractual actions with actual or potential cost of $50,000 or more taken pursuant to Public Law 85-804 to facilitate the national defense, January–December 1960*

Name and location of contractor	Actual or estimated potential cost	Description of property or service	Justification
Amendments without consideration:			
Army:			
A.R.F. Products, Inc., River Forest, Ill.	$145,568	Countermeasure receiving sets	To make equitable adjustment compensating contractor for loss incurred because of numerous modifications which substantially delayed performance under contract.
Blaw-Knox Co., Pittsburgh, Pa.	1,965,934	Construction of Atlas missile launch complexes.	To compensate contractor for actions of Government which induced him to enter into contract and suffer a loss.
Canadian Commercial Corp., Ottawa, Canada	3,812,288	Divisional area type communication system configurations.	To compensate contractor for increased costs resulting from numerous changes in specifications and delays in receiving Government-furnished property.
Republic of Turkey, Ankara, Turkey	1,000,000	Construction of arsenals in Turkey	Classified.
Navy (none).			
Air Force:			
El Encinar de los Reyes, S.A., Madrid and Zaragoza, Spain.	1,584,910	Lease of housing units	To cover increase in contractors costs because of action taken by Spanish Government to increase wages.
Urbanizadora Santa Clara, S.A., Seville, Spain	601,218	do	Do.
Universal Services, Inc., Seattle, Wash.	80,000	Operate dining halls and kitchen at Cooke Air Force Base.	To compensate contractor for loss incurred because of substantial decrease in number of meals served as compared to Government estimated requirement which was basis for contractor's bid.
Correction of mistakes:			
Army:			
Philco Corp., Philadelphia, Pa.	451,957	Radio sets	Contractor based bid on nontransistorized material, when transistorized material was required. Government had constructive knowledge of mistake.
Navy:			
George W. Kneass Co., San Francisco, Calif.	77,574	Motor minesweepers	To correct mistakes in computing direct labor hours subject to labor escalation clause.
Magnavox Co., Fort Wayne, Ind.	153,053	Radio receivers and spare parts	To correct mutual mistake of failing to give effect to amendments for specification changes and additional units.
Air Force:			
Curtiss-Wright Corp., Wood-Ridge, N.J.	233,591	Spare parts and tools	To compensate contractor for overshipment of spare parts and tools used by Government.
Perfection Steel Body Co., Columbus, Ohio	88,372	Utility type trailer	To compensate contractor for mistake due to inadequate Government specifications.
Westinghouse Electric Corp., Pittsburgh, Pa.	1,900,000	Electronics and various other equipment.	To correct a number of prime and subcontracts from which there were erroneously omitted provisions for allowing as overhead an appropriate prorated portion of general research costs.
Formalization of informal commitments:			
Army:			
Federal Republic of Germany	872,532	Operation of German segment of petroleum pipeline.	Not practicable to use normal procurement procedures because of urgent need for services.
France	132,733	Operation of petroleum pipeline	Do.
Navy:			
Asiatic Petroleum Corp., New York, N.Y.	67,535	Petroleum products	To reimburse contractor for petroleum delivery in Laos ordered by Government officer against expired master contract.
General Motors Corp., Allison Division, Indianapolis, Ind.	531,000	Turbojet engines	To reimburse contractor for additional engineering work performed at informal request of responsible Government officials.
Air Force:			
General Electric Co., Cincinnati, Ohio (on behalf of Curtiss-Wright Corp., Wood-Ridge, N.J.).	90,305	Parts for jet engines	To reimburse Curtiss-Wright, through General Electric Co., the prime contractor for value of parts which were delivered direct to the Government following a partial termination.
Contingent liabilities:			
Army: Atomic Energy Commission, Washington, D.C.	(1)	Nuclear core components	To permit AEC to include in contracts awarded for the benefit of the Department of Defense, a clause indemnifying contractors against claims arising out of nuclear radiation connected with contract work.
Navy:			
Atomic Energy Commission, Washington, D.C. (5 actions).	(1)	Reactor core assemblies	Do.
General Dynamics, Electric Boat Division, Groton, Conn. (6 actions).	(1)	Nuclear submarines	To indemnify contractor against liability on account of claims for death or injury or property damage arising out of nuclear radiation connected with contract work.
Newport News Shipbuilding & Drydock Co., Newport News, Va. (2 actions).	(1)	Nuclear aircraft carrier, nuclear submarine.	Do.
Ingalls Shipbuilding Corp., Pascagoula, Miss. (2 actions).	(1)	Nuclear submarines	Do.
Lockheed Aircraft Corp., Sunnyvale, Calif.	(1)	Polaris missile	Do.
Lockheed Aircraft Corp., Marietta, Ga.	(1)	Cargo airplanes	To indemnify contractor against loss by fire or personal property at Government-owned plant. Because of size of plant and wooden-roof construction, contractor is unable to obtain adequate fire insurance.
New York Shipbuilding Corp., Camden, N.J.	(1)	Nuclear submarine	To indemnify contractor against liability on account of claims for death or injury or property damage arising out of nuclear radiation connected with contract work.
University of California, Berkley, Calif.	(1)	Irradiation services	Do.
Air Force:			
Lockheed Aircraft Corp., Marietta, Ga.	(1)	Cargo airplanes	To indemnify contractor against loss by fire of personal property at Government-owned plant. Because of size of plant and wooden-roof construction, contractor is unable to obtain adequate fire insurance.
Societe Des Transports Petroliers Par Pipeline, North Africa Air Force bases.	(1)	Operate pipeline	To indemnify contractor against 3d party liability claims in excess of 10,000,000 New French francs (approximately $2,000,000) in the event of gaseous explosion or fire.
Other: Army: Raytheon Co.	93,000	NATO Hawk facilities	To acquire and install on contractor's property plumbing, ventilating and other nonseverable facilities. Government's ultimate cost may be less than $93,000 since contract provides for ultimate disposition by Government.

[1] The amount of this liability cannot be estimated since it is contingent on the happening of the event described in the justification column.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
Washington, March 13, 1961.

The SPEAKER,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: There is forwarded herewith the annual report for the calendar year 1960 of the National Aeronautics and Space Administration of contractual actions taken pursuant to Public Law 85-804 (50 U.S. Code 1431-1435).

Sincerely yours,

PAUL G. DEMBLING,
Acting Assistant Administrator for Congressional Relations.

ANNUAL REPORT OF THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

CONTRACTUAL ACTIONS TAKEN PURSUANT TO SECTION 4 OF PUBLIC LAW 85-804 (50 U.S. CODE 1434)

During the calendar year 1960 the Contract Adjustment Board of the National Aeronautics and Space Administration granted relief in three cases presented to it under this statute. The total amount of the relief granted in the three cases is $33,623.80. Two of the cases involved correction of mistakes, and the third, the formalization of an informal commitment, as follows:

Type of action	Actions approved			Actions denied
	Number	Amount requested	Amount approved	
Correction of mistakes	2	$592.77	$592.77	0
Formalization of informal commitments	1	33,031.03	33,031.03	0
Total	3	33,623.80	33,623.80	0

U.S. ATOMIC ENERGY COMMISSION,
Washington, D.C., March 14, 1961.

Hon. SAM RAYBURN,
Speaker of the House of Representatives.

DEAR MR. SPEAKER: Pursuant to the provisions of Public Law 85-804, approved August 28, 1958, this is to respectfully notify you that the Atomic Energy Commission had no activities to report for calendar year ending December 31, 1960, under the aforementioned law.

Sincerely yours,

DWIGHT A. INK,
Assistant General Manager.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

710. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1962 involving an increase in the amount of $22,390,000 for the Corps of Engineers—Civil of the Department of the Army (H. Doc. No. 121); to the Committee on Appropriations and ordered to be printed.

711. A letter from the Secretary of the Army, transmitting the semiannual report of the Department of the Army contracts for military construction awarded without formal advertisement covering the period July 1 through December 31, 1960, pursuant to Public Law 86-500; to the Committee on Armed Services.

712. A letter from the Director, Office of Civil and Defense Mobilization, Executive Office of the President, transmitting a report entitled "Report on Borrowing Authority" for December 31, 1960, pursuant to the Defense Production Act as amended; to the Committee on Banking and Currency.

713. A letter from the adjutant general, United Spanish War Veterans, transmitting the proceedings of the stated convention of the 62d National Encampment, United Spanish War Veterans, held in Milwaukee, Wis., September 4-8, 1960, pursuant to Public Law 249, 77th Congress (H. Doc. No. 122); to the Committee on Veterans' Affairs and ordered to be printed with illustrations.

714. A letter from the chief scout executive, Boy Scouts of America, transmitting the 51st Annual Report of the Boy Scouts of America (H. Doc. No. 119); to the Committee on Education and Labor and ordered to be printed with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SAUND: Delegation of the Mexico-United States Interparliamentary Group. Report pursuant to Public Law 86-420 (Rept. No. 197). Referred to the Committee of the Whole House on the State of the Union.

Mr. POWELL: Committee on Education and Labor. H.R. 4104. A bill to amend title II of the Vocational Education Act of 1946, relating to practical nurse training, and for other purposes; with amendment (Rept. No. 199). Referred to the Committee of the Whole House on the State of the Union.

Mr. GARY: Committee on Appropriations. H.R. 5954. A bill making appropriations for the Treasury and Post Office Departments, and the Tax Court of the United States for the fiscal year ending June 30, 1962, and for other purposes; without amendment (Rept. No. 200). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WALTER: Committee on the Judiciary. H.R. 1523. A bill for the relief of Kazimiera Marek; without amendment (Rept. No. 198). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSEN of Minnesota:

H.R. 5917. A bill to amend the Federal Seed Act, as amended, with respect to screenings of seed; to the Committee on Agriculture.

By Mr. ANDREWS:

H.R. 5918. A bill to authorize the acquisition of land for a national wildlife refuge at Walter F. George Dam and Reservoir project, Alabama; to the Committee on Public Works.

By Mr. ADAIR:

H.R. 5919. A bill to repeal the excise tax on amounts paid for communication services or facilities; to the Committee on Ways and Means.

By Mr. BOLAND:

H.R. 5920. A bill to provide for the establishment of Cape Cod National Seashore; to the Committee on Interior and Insular Affairs.

By Mr. COLLIER:

H.R. 5921. A bill to amend title II of the Social Security Act to increase the amount of outside earnings permitted each year without deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. HORAN:

H.R. 5922. A bill to authorize a survey and investigation with respect to the relocation of the Ferry County Highway, paralleling Lake Roosevelt, Columbia Basin project; to the Committee on Interior and Insular Affairs.

By Mr. KARTH:

H.R. 5923. A bill to amend paragraph 1774 of the Tariff Act of 1930 with respect to the importation of certain articles for religious purposes; to the Committee on Ways and Means.

By Mr. MASON:

H.R. 5924. A bill to provide revenue from an excise tax uniformly applied to end products of manufacture; to the Committee on Ways and Means.

By Mrs. MAY:

H.R. 5925. A bill to simplify, consolidate, and improve the authority of the Secretary of Agriculture with respect to loans to farmers and ranchers, and for other purposes; to the Committee on Agriculture.

By Mr. MULTER (by request):

H.R. 5926. A bill to provide for the distribution of motor-vehicle tires, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PERKINS:

H.R. 5927. A bill to amend the Federal Water Pollution Control Act to provide for a more effective program of water pollution control; to the Committee on Public Works.

By Mr. THOMSON of Wisconsin:

H.R. 5928. A bill to amend the Public Health Service Act to protect the public from unsanitary milk and milk products shipped in interstate commerce, without unduly burdening such commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. WILSON of California:

H.R. 5929. A bill relating to documentation and inspection of vessels of the United States; to the Committee on Merchant Marine and Fisheries.

H.R. 5930. A bill for the relief of certain defense-related company employees who performed services during 1955, 1956, and 1957; to the Committee on Ways and Means.

By Mr. BURKE of Massachusetts:

H.R. 5931. A bill to encourage the establishment of voluntary pension plans by self-employed individuals; to the Committee on Ways and Means.

By Mr. COOLEY:

H.R. 5932. A bill to amend the Home Owners' Loan Act of 1933, to permit Federal savings and loan associations to invest in or lend to business development credit corporations; to the Committee on Banking and Currency.

By Mr. FARBSTEIN:

H.R. 5933. A bill to amend section 333 of title 38, United States Code, with respect to the application of presumptions in cases of service-connected tuberculosis; to the Committee on Veterans' Affairs.

By Mr. FISHER:

H.R. 5934. A bill to limit and prevent certain concerted activities by labor organizations which interfere with or obstruct or impede the free production of goods for

commerce or the free flow thereof in commerce, and for other purposes; to the Committee on Education and Labor.

H.R. 5935. A bill to provide for tariff import quotas on sheep, lambs, mutton, and lamb; to the Committee on Ways and Means.

By Mr. HALPERN:

H.R. 5936. A bill to amend title 38, United States Code, to provide vocational rehabilitation, education and training, and loan guaranty benefits for veterans of service after January 31, 1955; to the Committee on Veterans' Affairs.

By Mr. MOULDER:

H.R. 5937. A bill to amend the Interstate Commerce Act with respect to the rule of ratemaking where competition between carriers of different modes of transportation is involved; to the Committee on Interstate and Foreign Commerce.

By Mrs. PFOST:

H.R. 5938. A bill to authorize civil actions for the review of administrative determinations as to the use of lands of the United States for grazing purposes to be instituted in judicial districts in which such lands are situated, and for other purposes; to the Committee on the Judiciary.

By Mr. TEAGUE of Texas (by request):

H.R. 5939. A bill to amend chapter 35 of title 38, United States Code, to provide that after the expiration of the Korean conflict veterans' education and training program, approval of courses under the war orphan's educational assistance program shall be by State approving agencies; to the Committee on Veterans' Affairs.

H.R. 5940. A bill to amend section 1632(c) of title 38, United States Code, to raise to $400 the ceiling upon the combined amounts of education and training allowance plus compensation which may be received by veterans receiving apprentice or other training on the job; to the Committee on Veterans' Affairs.

By Mr. TOLL:

H.R. 5941. A bill to amend the U.S. Information and Educational Exchange Act of 1948 to provide for counseling and other assistance to foreign students attending colleges or universities in the United States; to the Committee on Foreign Affairs.

By Mr. DERWINSKI:

H.R. 5942. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to deduct tuition expenses paid by him for the education of his children through the 12th grade; to the Committee on Ways and Means.

By Mr. WIDNALL:

H.R. 5943. A bill to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas; to the Committee on Banking and Currency.

By Mrs. MAY:

H.R. 5944. A bill to extend for 4 years the temporary provisions of Public Laws 815 and 874, 81st Congress, which relate to Federal assistance in the construction and operation of schools in areas affected by Federal activities; to the Committee on Education and Labor.

By Mr. GARY:

H.R. 5954. A bill making appropriations for the Treasury and Post Office Departments, and the Tax Court of the United States for the fiscal year ending June 30, 1962, and for other purposes.

By Mr. JAMES C. DAVIS:

H.J. Res. 341. Joint resolution designating the week of May 14–20, 1961, as Police Week and designating May 15, 1961, as Peace Officers Memorial Day; to the Committee on the Judiciary.

By Mr. FINO:

H.J. Res. 342. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. SCHWEIKER:

H.J. Res. 343. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. REUSS:

H.J. Res. 344. Joint Resolution authorizing the President of the United States of America to proclaim September 17 of each year General von Steuben Memorial Day for the observance and commemoration of the birth of Gen. Friedrich Wilhelm von Steuben; to the Committee on the Judiciary.

By Mr. WILSON of California:

H. Con. Res. 208. Concurrent resolution to officially recognize San Diego, Calif., as the birthplace of naval aviation; to the Committee on Armed Services.

By Mr. O'HARA of Illinois:

H. Res. 232. Resolution expressing the sense of the House of Representatives that April 15, 1961, be recognized as African Freedom Day; to the Committee on Foreign Affairs.

By Mr. PELLY:

H. Res. 233. Resolution relating to the fiscal policies of the United States; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. LANE: Memorial of the Commonwealth of Massachusetts, memorializing Congress to repeal the 10 percent excise (luxury) tax on telephone service; to the Committee on Ways and Means.

By the SPEAKER: Memorial of the Legislature of the State of Alaska, memorializing the President and the Congress of the United States relative to the construction of the Crater-Long Lakes division of the Snettisham hydroelectric power project; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Massachusetts, memorializing the President and the Congress of the United States to reduce the eligibility age of persons entitled to old age benefits under the Social Security Act to 62 years; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Massachusetts, memorializing the President and the Congress of the United States to repeal the 10 percent excise (luxury) tax on telephone service; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States to take action to establish youth camps within the national forest areas; to the Committee on Education and Labor.

Also, memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States to give favorable consideration relative to the employment of John A. Martinez as a page in the House of Representatives or the Senate of the United States; to the Committee on House Administration.

Also, memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States relative to requesting the Bureau of Reclamation and the Army Corps of Engineers to begin immediate construction of Los Esteros Dam and Brantley Dam; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States to amend the Federal Mineral Leasing Act to provide for the distribution of income from the leasing of Federal lands for oil, gas and other minerals to all States wherein lands are leased thereunder on an equal basis; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States to take legislative action to correct certain inequities existing in the distribution of public lands in the State of New Mexico and in the restrictions placed on the sale, leasing and use of proceeds from State lands; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States to extend educational benefits to veterans who entered or who enter military service after February 1, 1955, and to extend educational benefits to all who enter so long as the provisions of the draft law exist; to the Committee on Veterans' Affairs.

Also, memorial of the Legislature of the State of Texas, memorializing the President and the Congress of the United States urging immediate enactment of legislation enabling the sugar industry to increase production in the United States to grow additional sugarbeet and cane crops for the refinement of sugar; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H.R. 5945. A bill for the relief of Fouad Youssef Sarraf; to the Committee on the Judiciary.

By Mr. BURKE of Kentucky:

H.R. 5946. A bill for the relief of Sgt. Katherine S. Searcy; to the Committee on the Judiciary.

H.R. 5947. A bill for the relief of Dr. Mehmet Arik and Sevim Arik; to the Committee on the Judiciary.

By Mr. COLLIER:

H.R. 5948. A bill for the relief of George Cozadinos; to the Committee on the Judiciary.

By Mr. FARBSTEIN:

H.R. 5949. A bill for the relief of Tom Siu Chong; to the Committee on the Judiciary.

By Mrs. GRANAHAN:

H.R. 5950. A bill for the relief of Bill Joseph Gordon, Jr.; to the Committee on the Judiciary.

By Mr. HARDY:

H.R. 5951. A bill for the relief of Pouran Pourseynal; to the Committee on the Judiciary.

By Mr. McSWEEN:

H.R. 5952. A bill for the relief of Concetta Aurora Cordaro; to the Committee on the Judiciary.

By Mr. SHELLEY:

H.R. 5953. A bill for the relief of Pedro Garces; to the Committee on the Judiciary.

By Mr. CANNON:

H.J. Res. 345. Joint resolution to authorize the President of the United States to award, posthumously, an appropriate medal to Dr. Thomas Dooley III; to the Committee on Banking and Currency.

EXTENSIONS OF REMARKS

Address of Congressman Thomas N. Downing, of Virginia, on the Occasion of the Presentation of the Portrait of the Late State Senator Robert O. Norris, Jr., of Lancaster County, Va.

EXTENSION OF REMARKS
OF
HON. WILLIAM M. TUCK
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. TUCK. Mr. Speaker, under leave heretofore granted me to extend my remarks in the RECORD, I include a speech delivered by my distinguished colleague from Virginia, the Honorable THOMAS N. DOWNING, at the presentation of the portrait of the late State Senator Robert O. Norris, Jr., to the circuit court of Lancaster County at Lancaster, Va., on Monday, March 20, 1961.

Senator Norris was, during his lifetime, one of our most distinguished Virginians. He was a lawyer, a legislator of great ability, and a gentleman of outstanding qualities of character. He served in the General Assembly of Virginia possibly longer than any other individual in the history of the Commonwealth. He was elected to the house of delegates in 1911 and served in that body until 1928, when he was elected to the senate to succeed the late Senator Thomas J. Downing, where he continued until his retirement in 1958, a period covering nearly 50 years. He served as president pro tempore of the senate and was also chairman of the finance committee.

I had the distinction of serving with Senator Norris in the house of delegates and in the senate where we were for a period of 10 years desk mates. I have never known a finer man, nor have I ever had a better friend.

The address of Congressman DOWNING is as follows:

ADDRESS BY HON. THOMAS N. DOWNING

As I reflect back on my memory of cherished friendship with many people, no figure stands so prominently as does Robin Norris. It was my pleasure to have known and loved him since my earliest recollections of childhood. It was my distinguished honor to have been related to him. He was an intimate and devoted friend of my grandfather, Thomas N. Downing, whose portrait also hangs on the walls of this historic courthouse. Visits were frequently exchanged between these two men and for me it was always the greatest of delights to be allowed in their presence and listen to past masters in the now forgotten art of conversation. But, whether the conversation was privately conducted or a public speech before the multitudes, the resultant impression of one and all was that Senator Norris was a wonderful and interesting man.

When I first entered the practice of law, I had a strongly entrenched drive to begin my profession here in the Northern Neck, and it was Senator Norris who permitted me to work side by side with him. For one short, but precious, year I was with him night and day—through periods of adversity and disappointment—and when his joys were unbounded. It was during this period that I began to appreciate the magnitude of the man himself. As a practitioner of the law, he had no peer. The walls of this very courtroom have reverberated more than once with his oratorical elegance and understandable logic. Fortunate clients represented by him knew that they had an advocate of superior ability, character and integrity, and that if their cause had merit, it would be promoted by every fiber of his strength and every ounce of his energy. No client ever had a more able counselor, no lawyer better promoted his cause.

As a man, he always seemed to me to be a tower of confident strength. No responsible person ever questioned his word or his motive. He was a man other men loved and respected. He was a man who loved and respected his fellow man. Perhaps this was the cornerstone of his greatness. He could dine with kings and queens, and yet he had the gentle and kind common touch that endeared him to the hearts of all who knew him. As every other man, he had his frailties, to be sure, but in R. O. Norris, Jr., his were uncommonly few.

Above all else, however, he was a Christian gentleman in the finest and truest sense. He was courtly in manner, polite in speech; his very presence radiated a warm feeling.

As a representative of the people he loved, his prime purpose was to do only those things which would best serve the interests of his constituency, his beloved State and his Nation. There are laws on our statute books today which bear his name symbolizing his untiring efforts to promote, preserve and protect our form of society and which will serve to perpetuate his memory for years not within our reach.

The good Lord gave Robin Norris his great talents to be used—and they were used as He intended.

I hope that this sensitive portrait will serve as a constant reminder that the Northern Neck has again produced a true and loyal son of which she can be justly proud.

"The tall Cedar fell and left a lonely place against the sky."

Uniforms of American History, by Maj. Alexander R. Lawson, Army of the United States, Retired

EXTENSION OF REMARKS
OF
HON. WILLIAM T. CAHILL
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. CAHILL. Mr. Speaker, Maj. Alexander R. Lawson, Army of the United States, retired, of Thorofare, Gloucester County, N.J., who served 40 years in the civilian component parts of our Armed Forces, has prepared a most valuable historical set of pictures entitled "Uniforms of American History, 1600 to 1953." In collecting the material for this remarkable series of pictures he was ably assisted by Sgt.-Maj. Leon W. Little, U.S. Marine Corps, retired.

It has required untold hours of work and widespread research to obtain the basic information for this truly great collection. While the intent in producing this series of pictures was to depict the changes in the uniforms of American history, nevertheless, there are also included many examples of uniforms of other nations. Taking all of these pictures together they number upward of 400. These pictures are not only interesting, but highly educational.

The slides, that have been made from original water colors, have been shown all over this country. And, as an indication of the spirit of patriotism that dominates Major Lawson in this fine work he has performed, he will not accept any remuneration for their use and gladly and willingly makes the pictures available to all interested parties. Major Lawson is entitled to great credit for the fine service he has rendered.

Byelorussian Independence Day

EXTENSION OF REMARKS
OF
HON. JOHN D. DINGELL
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. DINGELL. Mr. Speaker, Byelorussia is hardly more than a geographic name today, almost lost in the huge and expansive Soviet Union. But 43 years ago this historic home of one of the oldest Slavic peoples was separated from the old czarist empire and its people proclaimed their independence. That was towards the end of the First World War, early in 1918.

The Byelorussian people, some 10 million hardy workers and gallant fighters, had been suffering under the oppressive czarist regime for centuries. Though they endured the heavy weight of the alien yoke, they retained their indomitable spirit of freedom, and they were always prepared to fight for its attainment. Their real chance came in 1918, after the overthrow of Russia's autocratic regime. Byelorussians were quick in taking advantage of this situation. They asserted their freedom, proclaimed their independence on March 25, and established the Byelorussian National Republic.

Thenceforth for almost 3 years Byelorussians divided their time between hard work and bitter struggle. They worked to rebuild their ravaged country and they fought against their foes on many fronts. But their enemies were too powerful, and one in particular among their foes proved fatal to their independence. The Soviet Red Army, reorganized and regrouped, attacked Byelorussia early in 1921 and overran the the country. Then it was incorporated into the Soviet Union. Thus ended the free and independent Byelorussian National Republic.

This brief 3-year period of Byelorussian history marks a turning point in the lives of Byelorussia's inhabitants. Though the happy and joyous period of freedom and independence was quite short, and vanished like a dream, its inspiring afterglow still survives in Byelorussia in the hearts of freedom-seeking Byelorussians. Today, on the 43d anniversary of their Independence Day, and 40 years after their enslavement under Communist totalitarian tyranny, the peoples of the free world still remember these devotees and gallant fighters for freedom.

The Independence Day of Byelorussia

EXTENSION OF REMARKS

OF

HON. CORNELIUS E. GALLAGHER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, March 24, 1961

Mr. GALLAGHER. Mr. Speaker, every year we, Americans, celebrate the Fourth of July—the day of the Declaration of Independence of the United States of America. The 25th of March is the Byelorussian national holiday—the day on which 43 years ago the Byelorussian Democratic Rada—Council—solemnly proclaimed the independence of the Byelorussian Democratic Republic—BNR—in the country's capital, Minsk.

The history of these two nations was different. The young American Nation, after having become independent, could freely develop all branches of national life and create the most democratic and powerful state in the world. The fate of Byelorussia was different, because of her different geopolitical location.

Byelorussia, a country on the crossroads of Europe where Western culture and freedom met with Eastern barbarian despotism, was always the battlefield of these two antagonistic worlds.

In the past Byelorussia was an independent nation and played an important part in the medieval history of Eastern Europe. In the early Middle Ages Byelorussia appeared under the name of Kryvia and later on—13th century—was known as the Grand Duchy of Lithuania; in 1795 the country was forcibly incorporated into Imperial Russia.

Continuous efforts have been made by the Byelorussians in an attempt to regain their freedom, with Napoleon's assistance in 1812, by armed uprising under the leadership of Kastus Kalinouski in 1863, and others. The revolution in Russia of 1917 offered another opportunity to shake off the chains of slavery—this time by the means of democratic self-determination. Through the coordinated effort of all Byelorussian organizations, a national representation, consisting of 1,872 delegates from all corners of the country, convened in Minsk on December 18, 1917. This all-Byelorussian Congress became in fact the constituent assembly of Byelorussia.

The Congress elected the Rada and its Presidium as its executive bodies, which have assumed the responsibility for the fate of the nation.

On March 25, 1918, the Rada and its executive council solemnly proclaimed the independence of Byelorussia and published their third constitutional act containing the official text of the proclamation.

Without any help from outside, the new Republic could not resist for too long a time the pressure of Russian imperialism and soon fell victim of new occupation, this time by the Red Communist army.

Her place was taken by the Bolshevik-sponsored Byelorussian Soviet Socialist Republic, created on January 1, 1919, in Smolensk as a Communist counterweight to the democratic republic. This "union republic" with its puppet government is still in existence within the structure of the Soviet Union.

The people of Byelorussia have never accepted the government forced upon them, and defended their rights by arms. The famous Slutsk uprising of 1920 was brutally crushed by overwhelming Communist forces, that is, suffered the same fate as the Hungarian revolution in 1956.

During the following 41 years the population has been subjected to a violent and ruthless persecution, deportation and extermination. As a result of Moscow's policy of genocide, Byelorussia lost 6 million people in 20 years, according to the Soviet census in 1959.

On the international forum the Communist puppet government of the B.S.S.R. continually abuses membership of Byelorussia in the United Nations.

The Byelorussian people know that thousands of their compatriots living in the free world are disseminating truth about their history, culture, and present colonial exploitation. They also know that the Byelorussian Democratic Rada leads the best forces of the nation in the fight for freedom and justice.

Byelorussian Independence

EXTENSION OF REMARKS

OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, March 24, 1961

Mr. MULTER. Mr. Speaker, Byelorussia's modern history is inextricably mixed with that of Russia, because during most of that period the country was part of Russia, Byelorussians had become subjects of Russian czars, and the Russian rulers had tried to eradicate all Byelorussian national traits.

The people of Byelorussia, who have had a longer history as a nation than the Russians themselves, were never willing to forgo and forget their distinct identity, were never reconciled with their lot under the Russian czars, and have always yearned for their freedom and independence. For centuries they struggled for their goal and patiently waited for the opportune moment. That opportune moment came in 1918.

The Russian revolution of 1917 overthrew the decrepit and detested czarist regime in Russia, thus freeing, for the time at least, all subject nationalities in the Russian Empire. Freedom reigned from the Baltics to the Caucasus, where many national groups asserted their freedom and proclaimed their independence from Russia. The Byelorussians did this early in 1918, by proclaiming the establishment of the Byelorussian National Republic on March 25 of that year. In a joyful and optimistic mood, it was then hoped that some 10 million Byelorussians, having thus attained sovereign independence in their historic homeland, would be allowed to enjoy the fruits of their freedom in peace. Unfortunately that was not to be.

Early in 1921, before Byelorussians had the chance to put their house in order, before they could consolidate and strengthen their government, resurgent and aggressive Soviet forces attacked and overran the country, and independent Byelorussia ceased to exist as a sovereign state. For 40 years these stouthearted and liberty-loving Byelorussians have lived under the unrelenting rule of Communist Russia's totalitarianism. But even under this ruthless tyranny they have not given up their hope for freedom and independence. They still cherish that ideal as their national goal.

On the 43d anniversary of their independence day I wish them more power in their struggle against ruthless totalitarianism.

Byelorussian Independence Day

EXTENSION OF REMARKS

OF

HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, March 24, 1961

Mr. DANIELS. Mr. Speaker, the fate and fortune of the Byelorussians have been almost blended with those of the people of Russia for a long time, but they have always striven to maintain their distinct ethnic identity and their undying love for freedom. Their firm determination to be free, and their readiness to sacrifice all their worldly possessions, even their lives for their ideals, has kept the spirit of freedom and independence alive among them. Though their oppressive overloads, the Russians, have done their worst to eradicate these fine traits, under oppression they have doubled their power of resistence and have succeeded in maintaining their identity. They have always wanted to regain their freedom, and in 1918 they had the opportunity to be independent.

When the decrepit czarist regime was overthrown during the First World War, the Byelorussians proclaimed their independence on March 25, 1918. Then they set up the Byelorussian National Republic with its democratic government under

which some 10 million Byelorussians lived and worked happily for about 3 years. Then began the unhappy period in their national life. Early in 1921 the Red army attacked and overran the country, thus putting an end to independent Byelorussia. Soon the country was incorporated into the Soviet Union and the Byelorussians were ensalved under Soviet tyranny.

For 40 years these people have been enduring the oppressive Soviet regime, but they have not lost their love of freedom; they still cling to their national goal, that of attaining independence and freedom. On this 43d anniversary of their independence day let us hope that they will reach their goal and attain their national freedom.

A National Lottery

EXTENSION OF REMARKS
OF
HON. PAUL A. FINO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. FINO. Mr. Speaker, an interesting news item appeared in the press last week to the effect that a multimillion dollar gambling syndicate operating in the Pentagon was smashed in a raid conducted by Treasury agents.

The Federal prosecutor who led the raid described the operation in our Nation's Defense Establishment as "unbelievable."

I wonder, Mr. Speaker, whether the Federal prosecutor was amazed at the tremendous amount of money our Federal employees spend to quench their gambling thirst or was he shocked at the discovery that such an operation could happen on Federal property.

In either event, the prosecutor should not have been surprised if he was willing to accept the indisputable fact that the urge to gamble is not only normal but a universal human trait. He should know that because of our own hypocrisy we have encouraged, permitted and allowed professional gamblers to capitalize on this human desire.

Mr. Speaker, the type of gambling activity uncovered at the Pentagon is no different than the kind of gambling that goes on everywhere else throughout this country. As a matter of fact Irish Sweepstake tickets are sold right in the House Office Buildings. I know. I have bought them right in my office.

All of this, Mr. Speaker, proves one point and that is that millions of American citizens enjoy the pleasures of gambling and the sooner we wipe out hypocrisy and accept the fact that man is by his very nature a gambler that much sooner we will cut off the underworld from this lucrative industry.

Mr. Speaker, the legalization of a national lottery under public control will not only satisfy the American desire to gamble but will easily pump into the coffers of our Government at least $10 billion a year in additional income which can help reduce our national debt and bring sorely needed tax relief to our wage earners.

This, Mr. Speaker, is the only realistic, sensible and courageous approach to this whole problem of gambling. It would be, I might add, a profitable and satisfactory solution to a pressing and disturbing human problem.

Seattle Citizens Salute a Fine Officer of the U.S. Navy

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. PELLY. Mr. Speaker, in the years I have served in the U.S. House of Representatives I have had occasion to work closely with a great many members of our armed services, and because the Puget Sound Naval Shipyard and the headquarters of the 13th Naval District are located in and around the Seattle area, my association with Navy personnel has been particularly close.

In this connection, it has been my privilege to have associated on a very personal basis with many high-ranking naval officers and without exception I have found them to be men dedicated to their chosen careers and to the service of their country.

Ordinarily it would be difficult, if not impossible, to single out any one of this distinguished company. But on occasion, by force of circumstances, events sometimes take over and spotlight one individual in the life and activities of a community. Such an example of public leadership and interest in civic affairs has attracted my notice and is worthy of mention.

This is the case of Capt. Kenneth J. Sanger, commandant of the Naval Air Station at Sand Point, Seattle, Wash. Captain Sanger assumed command of his present post on June 27, 1959. Since that time, he has given so unselfishly of himself, both as a Navy and community leader, as to have earned the official and quite unusual commendation of civic organizations such as the Seattle Chamber of Commerce, the Reserve Officers Association, the Disabled American Veterans, and the Navy League.

Captain Sanger's inspirational leadership of the approximately 2,000 officers and men under his command resulted in raising their standing in the Naval Air Reserve program from 18th place in the Nation to No. 1 naval air station in a 1-year period of time. For this outstanding accomplishment the CNATRA trophy was awarded on October 1, 1960. At the same time the Edwin Francis Conway Trophy was presented to Captain Sanger by Under Secretary of the Navy Fred A. Bantz. This trophy is given annually to the highest rated naval air station in the Nation.

Also, he was instrumental in aiding the mayor of Seattle in establishing the Seattle American Leadership Council and has taken an active part in assisting the mayor with the implementation of this important community activity.

A 1-day seminar for over 100 Seattle business and industrial leaders was held on October 18, 1960, which resulted in a program for citizenship education and action in the field of reawakening the citizens to our American heritage and our responsibilities as citizens.

These achievements in the field of public relations and his individual dynamic, enthusiastic, and patriotic personal activities have resulted in the closest cooperation between the military and civilian community leaders in Seattle. Many of these latter have expressed regret that under rotation or transfer he might be sent to some other duty.

As one of his many friends and admirers, I have joined in expressing the hope that the Navy will find it possible to extend Captain Sanger's tour of duty so that our community can continue enjoying the benefits of his inspirational leadership. As a fitting tribute to this fine officer and gentleman and to the Sand Point Naval Air Station which he so ably commands, I am including with these remarks a resolution adopted by the board of trustees of the Seattle Chamber of Commerce under date of March 21, 1961.

RESOLUTION ADOPTED BY THE BOARD OF TRUSTEES OF THE SEATTLE CHAMBER OF COMMERCE, MARCH 21, 1961

The Seattle Chamber of Commerce expresses again its great pride in the achievement of the Naval Air Station, Seattle, in winning last year the Conway and Chief of Naval Air Training Trophies for the most improved and most efficient naval air station in the Naval Air Reserve Training Command.

Further, the Seattle chamber takes favorable recognition of the aggressive and effective program of the Naval Air Station, Seattle, in emphasizing the Navy's all-out effort to revitalize leadership. This program is reflected in the goal of educating all individuals in the command to understand and practice the basic principles upon which our country was based. The program emphasizes that Navy men achieve, in addition to combat leadership, leadership in the cold war.

Further, the Seattle chamber commends Capt. Kenneth J. Sanger, USN, commanding officer, U.S. Naval Air Station, Seattle, and the other dedicated members of his command, for the results which have been obtained.

JOHN C. CROSTHWAITE,
Chairman, Armed Services Division.

Department of Agriculture Lamb-Buying Program

EXTENSION OF REMARKS
OF
HON. ODIN LANGEN
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. LANGEN. Mr. Speaker, the Department of Agriculture's recently announced lamb-buying program seems to be pretty much a matter of robbing Peter to pay Paul when viewed in the light of

lamb imports. Thus far, the Department, by a program announced on February 27, 1961, in an attempt to improve prices, has acquired 4½ million pounds of lamb at a cost of $1¾ million. At the same time, we have imported over 14 million pounds of lamb at a cost of over $3½ million during the past 13 months.

The way the program is operating, the Department is buying lamb at about the same rate it is being imported. The latest purchase was 1,700,000 pounds, and we imported 1,600,000 pounds in January. First these imports are allowed to come in, and then the Department purchases them because of their bad effect on the domestic market. This must be one of the strangest applications of the quota and tariff system in history.

I certainly agree that net farm income needs improvement and that contributing commodities to nonprofit charitable institutions, as is being done with the purchased lamb, is a worthy means of distribution. But since all we are doing, in effect, is buying imports, we are wasting the taxpayers' money and giving the farmer no real or lasting help. The cost of the program, however, is charged to the farmer.

I am aware of the importance of international trade to international relations, and am in no way advocating a complete termination of farm imports. However, situations such as this one in lamb—and there are comparable ones in oats, barley, and rye, also—certainly point to the fact that a more sensible import policy is needed. The present policy is harming both the farmer and the taxpayer.

Mrs. Clara B. Gonzales

EXTENSION OF REMARKS
OF
HON. JOSEPH M. MONTOYA
OF NEW MEXICO
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. MONTOYA. Mr. Speaker, Mrs. Clara B. Gonzales, reservation principal at the Zuni Pueblo, for the Bureau of Indian Affairs, Department of the Interior, is 1 of the 10 winners of the National Civil Service League Career Service Award for 1961.

The award was presented to Mrs. Gonzales by Nicholas Kelley, president of the National Civil Service League, on March 21. The citation on the scroll presented to her stated:

Mrs. Gonzales has planted in the hearts of the Zuni people a love and respect for education. When she came to the Zuni Pueblo very few of its members were in school. Now, largely because of her efforts, the percentage in schools and institutions of higher learning exceeds that of non-Indian communities on the periphery of the village. The Indian people do not hesitate to bring their problems to Mrs. Gonzales, so confident are they of her understanding and help. She has taken every opportunity to help them broaden their horizons. The Zuni people, as well as her coworkers, have a deep regard for Mrs. Gonzales because throughout her career the Zuni Pueblo has been her classroom; and the understanding, love, and affection for the Zuni people have been her basic textbook.

In announcing that Mrs. Gonzales had won the award, Interior Secretary Stewart L. Udall stated on March 13 that she is the first woman employee of the Interior Department and the first person from the ranks of the Bureau of Indian Affairs to receive this award presented annually to 10 outstanding Federal career service employees on the basis of competence, character, and outstanding achievements. Mrs. Gonzales has been a teacher at the Zuni Pueblo for nearly 38 years. She is credited with bringing Zuni school enrollment to nearly 100 percent.

Greek Independence Day

EXTENSION OF REMARKS
OF
HON. EDWARD P. BOLAND
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Friday, March 24, 1961

Mr. BOLAND. Mr. Speaker, it is only natural and quite human that all peoples and nations celebrate their national independence day, and that that day should become their most important national holiday. They do this because they all prize the attainment of their freedom and independence as the culmination of their political and spiritual aspirations. To this the Greek people are no exception.

They have especial reason to celebrate their independence day as their national holiday because they were the first among all peoples to have and enjoy freedom and independence, and therefore were keenly appreciative of the value of real freedom. And when they regained it after the lapse of 2,000 years, they rightly regarded the beginning of their national free life, as the beginning of a new era for them. This, more than anything else, is perhaps the reason why they have observed the anniversary of their independence day, so solemnly within Greece, and abroad, and have celebrated it as their national holiday.

The daring deed of a handful of gallant Greeks that had its beginning 140 years ago, under the leadership of an archbishop of the church, has become the most momentous event in the history of modern Greece, standing out as a brilliant landmark in the history of the Greek people. The war of independence, waged intermittently for more than 7 years, at times was no more than one wholesale slaughter by the Turks almost leading to the enslavement and annihilation of the Greeks.

But through their uncommon gallantry and indomitable will to sacrifice their all, and with the effective aid of their friends in many lands, they finally wrenched victory out of certain defeat. All that to the glory and honor of the Greek people, and to the credit of their friends abroad. I gladly join Americans of Greek origin and Greeks everywhere in the celebration of this day, the 140th anniversary celebration of Greek Independence Day.

The United Nations in a Time of Transition

EXTENSION OF REMARKS
OF
HON. J. GLENN BEALL
OF MARYLAND
IN THE SENATE OF THE UNITED STATES
Friday, March 24, 1961

Mr. BEALL. Mr. President, on March 22, 1961, the Honorable Douglas Dillon addressed the annual dinner of the United Nations Association of Maryland.

On this occasion, the Secretary of the Treasury chose as his topic "The United Nations in a Time of Transition." I ask unanimous consent that Mr. Dillon's address be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE UNITED NATIONS IN A TIME OF TRANSITION

It is a great pleasure for me to meet with the members of the United Nations Association of Maryland. For it is through the efforts of such organizations as yours that the message of the United Nations reaches the American public. Public understanding and support of the United Nations are, as you well know, fundamental to our country's fulfillment of its international responsibilities and objectives. We in Government are, therefore, deeply appreciative of the splendid work you are doing to help achieve this essential end.

Two decades ago, the idea of an organized world community seemed to many people to be no more than an idle dream. Some felt that such an organization was wholly impractical. Others feared that a successful world organization would impair the national sovereignties of member nations. Still others insisted that world affairs should be managed by a few of the great powers and that smaller nations should be compelled to follow their bidding.

Many obstacles were encountered in the creation of the United Nations. There have been further obstacles to its development and growth. But most of these obstacles have been surmounted. Today, the United Nations is one of the most vital realities in the entire sphere of international relations. We Americans can take justifiable pride in the role our country has played in helping to build and to preserve the United Nations system.

By a great many standards, the United States is classified as a "great power." However, throughout our history the American people have been devoted to the rights of small nations—the right to independence, the right to survive, the right to grow, and the right to pursue material and spiritual well-being for their peoples within a framework of free institutions of their own making. These rights have been achieved—as never before—within the framework of the United Nations.

The United Nations has amassed great support around the world in the 15 years of its life—although often for different reasons. This is at once a tribute to the many sidedness of the world organization, which plays a variety of roles in various parts of

the world. It is also a tribute to the capacity of the United Nations to respond to successively different demands throughout its existence.

The world has moved onward—but unfortunately, not always upward—since 1945, when the United Nations was a fledgling hope of barely 50 members. The United Nations has also altered, both in its composition and in its functions. It was originally conceived as an organization dependent for action upon agreement between the permanent powers—notably the United States and the Soviet Union. In those days, a majority in the General Assembly could be obtained from the votes of Western Europe and Latin America.

But the strains of international events demanded that the organization either grow or simply wither away—discarded, like its predecessor, the League of Nations. The United Nations did grow. It has now reached a total of 99 members, with several more almost certain to join in the next few years. A majority can now be obtained from the combined states of Asia and Africa. The functions of the organization have also expanded to meet new needs, as more and more problems affecting its membership and the world as a whole have been thrown into the lap of the United Nations.

Throughout these changes and developments, the United Nations concept has retained the allegiance of the overwhelming majority of the people of the United States.

President Kennedy spoke for all of us when he said in his inaugural address that the United Nations is "our last best hope in an age where the instruments of war have far outpaced the instruments of peace."

Four months earlier, former President Eisenhower told the General Assembly that the United Nations "has accomplished what no nation singly or any limited group of nations could have accomplished * * * to forego the bonds and build the structure of a true world community."

Important as the United Nations is to us, it is of perhaps greater importance to the new and emerging countries. To them, it is the symbol of nationhood. Membership in the world organization has become tangible evidence of their newly won independence.

Only in the United Nations can a small country participate fully in deliberations of international developments. Without the United Nations, it is not likely that small African States would have much say in decisions that will not only shape the future of Africa, but of the entire world. Small or emerging nations desperately need the United Nations for their security and as a sounding board for their hopes, fears, and aspirations.

President Kennedy had this idea very much in mind when he called in his state of the Union message on "the many smaller nations of the world to join with us in strengthening this Organization, which is far more essential to their security than it is to ours—the only body in the world where no nation need be powerful to be secure, where every nation has an equal voice, and where any nation can exert influence, not according to the strength of its armies, but according to the strength of its ideas."

What, then, is this Organization which has grown and developed in ways not foreseen by those who wrote its charter in San Francisco 15 years ago?

It is, first of all—and I say this without apology—a debating forum. This characteristic causes some United Nations supporters to become impatient and to assume that the United Nations because it is often long-winded and, on occasion, even unproductive, is also ineffective.

But free, thoughtful debate is essential on such immense issues as the rights of man, the ways of seeking peace, the need for economic advancement and spiritual growth, and the importance of justice with freedom. These topics must be endlessly explored and debated according to the customs of free parliaments if humanity is to move forward out of the shadows which becloud this uneasy world. Indeed, if the totalitarian spokesmen through their contacts with the free world in the forum of the United Nations learn nothing more than the rules and procedures of a democratically conducted debate, perhaps a small dent will have been knocked into the theory of the autocratic state—a dent which one day may bring about repercussions in the proceedings of monolithic totalitarianisms.

The United Nations is also an operation—a limited operation it is true, but a crucial one. The United Nations has demonstrated that an international organization can mobilize people and resources for economic development; that it can supervise the administration of dependent areas; that it can whip together a military force to repel aggression, and that it can mobilize security forces and civilian administrators to bring about a modicum of order and security where there might otherwise be civil war and communal rioting.

Each time the world organization takes on a new and bigger task, skeptics wonder if it can survive the test. But it has grown stronger from adversity. Today it is meeting the test of the Congo, where there is a United Naions force of approximately 20,000 troops and several hundred administrators, paid for by a United Nations budget of some $135 million.

The development of the operating capacity of the United Nations is perhaps the most striking aspect of the organization since its inception. But there is considerably more to the United Nations. It is also a facility for the practice of multilateral diplomacy. The complex world of today presents us with issues which involve many different peoples. Hence, multilateral negotiations are required to supplement bilateral diplomaacy. They, in turn, require a place and an atmosphere that are suitable. The place should have corridors as well as council chambers, because some of the most important developments in international arrangements come, not from formal meetings and agreements, but from informal, unofficial understandings and exchanges of views. Indeed the very presence in New York for protracted periods in time of leading statesmen is a real if intangible force in bridging gaps of misunderstanding between ourselves and the world around us.

This bodes well for the present and for the future. It is a happy development in the current struggle between freedom and totalitarianism that statesmen from all continents and all sections of the world desire to mingle their voices in a cosmopolitan chorus demanding peace.

It is our duty to strengthen and to maintain this great experiment in international collaboration, particularly in these days when it is subject to heavy attack and severe testing. It is valuable as a unifying factor of free states against totalitarian assaults or infiltrations which challenge their independence and security. However, the United Nations should not be used as a means of extending the cold war but, rather, as a means of ending it. The world organization is needed to preserve national ways of life and the ability of individual nations to choose how they should live. But it is not a device to hold back the hand of time or to maintain the status quo. On the contrary, change is often good and desirable, and the United Nations should serve as the framework of change and progress throughout the world. Peoples are best cemented together, not by mutual fear, but by mutual hope.

Finally, there are contained within the framework of the United Nations many opportunities to develop what may be called "quiet diplomacy," free from the shrill urgencies of the crisis and the headline. We need to cultivate these opportunities, and we will be better enabled to do so as the world organization grows both more responsible and more responsive to world needs. We can perhaps do this best in many cases by operating quietly away from the glare of publicity which sometimes distorts formal United Nations meetings. Most important, we can seek to increase the sense of harmony among nations, particularly between the older industrialized states and the younger emerging nations of Asia and Africa.

In these ways, we can seek solutions to international problems before they become conflicts. It takes great statesmanship to solve a world crisis. But it is a sign of greater, if sometimes lesser known statesmanship, to prevent the crisis from developing.

Never before has mankind been confronted by such grave dangers—nor by such magnificent opportunities. In the same hand we hold the power of death and destruction and the power of life and progress. We Americans have a profound conviction that mankind will choose the pathway of life. In this conviction, we must dedicate ourselves anew to the principles of the United Nations Charter and to the pursuit of peace, freedom, and prosperity for all the peoples of the earth. Our consciences as Americans and as members of the human race demand no less.

The Federal Judicial System

EXTENSION OF REMARKS
OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, March 24, 1961

Mr. McCORMACK. Mr. Speaker, I am very happy to note that our colleague, the gentleman from New York [Mr. CELLER], chairman of the Committee on the Judiciary, has seen fit to send a very interesting communication to the Judicial Conference which is composed of the Chief Justice of the United States as Chairman, and the chief judges of the 11 judicial circuits and an elected judge of the district courts from each of those circuits.

This communication concerns itself with the supervision of the various Federal courts throughout the country. I remember when we passed—in 1939—section 332 of title 28 of the United States Code. It was our intention that the judicial councils, composed of judges from the various courts of appeals for each circuit, would oversee the operation of the judicial systems in the various district courts and circuits. It was to give autonomy to the local councils rather than to centralize such supervision by the Congress or by some other agency in Washington.

In life, judges are human; there has been evidence that the councils have not fully met the responsibilities imposed upon them by statute. While the great majority of our judges are scrupulously honest in the courtroom, it is evident that there are some judges who are arrogant, domineering, dictatorial, in fact, judicial tyrants. One such

judge is one too many. Section 332 of title 28 of the United States Code reads as follows:

Each judicial council shall make all necessary orders for the effective and expeditious administration of the business of the courts within the circuit. The district judges shall promptly carry into effect all orders of the judicial council.

I know that following a previous admonition to the Judicial Conference on this very problem, a special committee on the responsibilities and powers of the judicial councils had been appointed and following Chairman CELLER'S second communication that a report of that special committee was filed and adopted. Nonetheless, I do repeat that Congress must keep a watchful eye on this whole area.

If a vacuum exists, it is bound to be filled. Unless appropriate action is taken by the local judicial councils in performing the duties set forth, as stated above, Congress will be compelled to act.

The communication addressed by Chairman CELLER to the Chief Justice is as follows:

MARCH 10, 1961.

The CHIEF JUSTICE,
The Supreme Court,
Washington, D.C.

MY DEAR MR. CHIEF JUSTICE: I regret very much that I am unable to be present this morning at the opening of the Judicial Conference of the United States. Unfortunately, an important engagement arose suddenly which required my immediate attention in New York City. However, the message which I contemplated presenting to the Conference today is of such importance and urgency that I am writing to you to request you to read this letter to the members present at the Conference.

You will recall that on past occasions I have raised the question before the Judicial Conference of the organization and powers of the judicial councils. I was very gratified to learn that you had appointed a special committee to look into this question. I have been informed that this committee may report to the Conference during its current session and I am looking forward with great anxiety to its report.

At the outset, I wish to state that my interest and concern over this question arose from personal experience as chairman of the Committee on the Judiciary of the House of Representatives. At no time did anyone intercede with me to initiate the activities which I have pursued in this matter. On the contrary, during the course of legislative consideration of many of the laws which have been enacted to improve our Federal judicial system and to administration of justice, I have had problems presented to me which, in my judgment, should never have been permitted to exist and would never have come to the attention of the Congress if the judicial councils had exercised the powers and responsibilities conferred upon them by section 332 of title 28 of the United States Code.

For example, due to failure of proper direction of the Judicial Councils to provide appropriate geographic distribution of judicial talent there has arisen demands for additional districts and divisions in some circuits. If judges had been properly assigned to certain areas, I am confident there would have been no such demand. Some of the suggested changes are unnecessary and costly.

I do not wish to dwell on specific instances or individuals, but I can advise you that over the course of the years several matters have been brought to my attention which have given me a great cause of concern. It was because of the undertone of dissatisfaction with the work of the Judicial Councils that I was motivated in presenting this problem to the Judicial Conference.

From my own personal experience and observation, I realize that by far, most of the members of the Federal judiciary are a hard-working, respected body of men. However, whenever the need for additional judges arises there is the immediate hue and cry concerning congestion and delay in our courts. If one goes back to 1906 when the American Bar Association first looked at the problem of court congestion and follows it down through the years to the present time, one finds the same criticism time and time again. Our courts are never criticized for their decisions but mostly for administrative deficiencies and excessive delay. It was these criticisms, together with the mounting public and professional impatience with the delay of justice, which created the necessary climate for reforms in Federal judicial administration. The act which created this body in 1922 and the act of 1939 setting up the Administrative Office of the U.S. Courts and the Judicial Councils of the circuits amply demonstrate the concern of the legislative branch of our Government with these problems of administration.

As one who actively participated in processing the act of 1939, I have no doubts as to the legislative intent of that law.

The legislative history, in my opinion, conclusively demonstrates that the major reliance for improving judicial administration was placed upon the voluntary cooperation of the courts rather than upon any powers of compulsion. There have been many fields and instances where major improvements in court organization have been accomplished by legislation, and here this has been accomplished through the Judicial Conference which, in turn, had consulted with the Councils throughout the country. I approve of such consideration and presentation. These instances demonstrate the value of both the Conference and the Councils when they function in accordance with the responsibilities which the Congress placed upon them.

I fully realize that this is a delicate question. I realized it in 1939 when section 332 was under consideration. I understand that there may be some doubts in the minds of some members of our Federal judicial system regarding the rather general and vague language of that statute. I can assure you that the drafting of that statute was deliberate in order to provide elasticity in the procedure to deal with the many and varied problems which the Congress contemplated would arise for the consideration by the judicial councils. Indeed, I recall that it was the considered judgment of the Congress that the judicial councils were, by their very nature, the proper agents for supervising our Federal courts. These councils know the needs arising out of local conditions. They can fit their actions to these needs. Such actions are necessary and desirable and, therefore, the power conferred on the councils by the Congress was purposely designed to permit them to adopt these powers to the local problems and necessities, but they were never designed to lie dormant, particularly in light of public impatience and criticism with the law's delay.

Let me make it clear that neither then nor now do I wish to see any interference with the judicial functions of our courts. I am a firm believer in the doctrine of separation of powers. However, the growth of this Nation, both politically and economically, has transformed the basic structure of our Federal judicial system. I do not have to tell you that judges are now doing much more than judging. Judges exercise a legislative function in recommending legislation to the Congress and in formulating procedural rules under the authority delegated by the Congress. They exercise an executive responsibility in supervising the many day-to-day tasks of operating the judicial establishment. As Mr. Justice Burton once remarked, "Judging is also administration."

It is my honest opinion that there is an urgent need for the judicial councils to start functioning immediately along the lines which I believe Congress intended them to do. If there are any doubts concerning the statute it behooves the Federal judges to resolve that question and make recommendations, if corrective legislative is necessary. On the other hand, if it is found that the statute is adequate, then there should be no toleration of further delay. Action, and quick action, is warranted, in my opinion, at this time. Here, I most reluctantly sound a warning. If there has been a vacuum in the exercise of these powers it must be filled now lest some other agency be delegated to fill it. I, under no circumstances, wish to see either the Congress or any agency selected by the Congress, or any individual for that matter, interfere or take over the administrative responsibilities of our judicial system. I believe the judges should do their own housekeeping, but do it they must or someone will do it for them.

The progress which has been made in improving our Federal judicial system over the past 20-odd years has been remarkable but we are still faced, as you realize, with criticisms and problems which must be met. At this time I believe the needs for solving these problems are more acute than ever because there is a greater awareness and acceptance by the public as to the validity of the criticisms. Aside from my own personal experience in dealing with the complaints of other Members of Congress, I merely point out the recent Cotter report as well as the report of the Senate Judiciary Subcommittee on Improvement in Judicial Machinery. Only last week during the course of the hearings before my subcommittee on my bill for additional judges, these criticisms could be heard. In the aggregate they toll a warning bell that this hesitation and delay on the part of the judicial councils must cease. I urge the Federal judges with all sincerity to do something about this matter and do it promptly. I assure them of all the help and cooperation I can give in assisting them to do that. I am confident that if they will help themselves the Congress will help them, too. But on the other hand, I am just as confident that if these judges do not do it someone will do it for them, to our mutual regret. I earnestly await their suggestions and their actions in this matter.

Sincerely yours,

EMANUEL CELLER,
Chairman.

St. Patrick's Day Address by Senator Claiborne Pell, of Rhode Island

EXTENSION OF REMARKS
OF
HON. HUBERT H. HUMPHREY
OF MINNESOTA
IN THE SENATE OF THE UNITED STATES
Friday, March 24, 1961

Mr. HUMPHREY. Mr. President, I ask unanimous consent that an address entitled "To the United States," delivered before the Friendly Sons of St. Patrick on March 17 in Providence, R.I., by the distinguished junior Senator from Rhode Island [Mr. PELL], be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR CLAIBORNE PELL AT THE 61ST ANNIVERSARY DINNER OF THE FRIENDLY SONS OF ST. PATRICK, FRIDAY, MARCH 17, 1961, 7 P.M., SHERATON BILTMORE HOTEL, PROVIDENCE, R.I.

TO THE UNITED STATES

I am deeply grateful to your committee for having invited me here this evening. Not only am I honored and grateful to you all, but knowing how distinguished through the years have been the previous speakers at this dinner, I am doubly honored.

I also bring you the greetings of my colleague and the friend of us all, whose birthday is today, Senator JOHN O. PASTORE.

President Kennedy some weeks ago said in his brilliant and stirring inaugural address: "Fellow Americans, ask not what your country can do for you—ask what you can do for your country."

This is the thought around which I should like to revolve my remarks tonight.

First, in looking at our country, let us briefly examine her appearance and age. Both of these are relative factors. I can recall that 10 years ago I believed a man in his forties was definitely mature; in fact, perhaps a rapidly aging man. Now that I am in my forties, I think that the forties are an age of youth, vigor, and imagination. And, being human and an optimist, as I grow older I will probably always be convinced that my generation is the generation of youth, vigor, and imagination, no matter whether I am 40, 50, 60, 70, 80, or even 90.

And speaking of 90 years of age, my wonderful predecessor, Senator Theodore Francis Green, has a mind that is as vigorous and young as that of any of us at any age. As long as hope and optimism are in a man's heart, that's what counts.

Now, speaking of age, let us examine our country. In fact, the United States has had its system of government unchanged, has relied on the same Constitution, longer than has any other government in our world.

At the same time, our critics say that we are becoming decadent, old and weak. They cite our rate of unemployment, greater than that of any other industrialized nation. The fact that our young people's physical health and strength is poorer than that of youngsters of other nations is also used as an example. Recently tests showed that British boys scored 14 percent higher than American boys, and that British girls scored 23 percent higher than American girls. Japanese boys and girls outscored our American children by an even wider margin.

However, some tests were run recently in Pawtucket—and here you Pawtucket fathers or grandfathers can take particular pride. Pawtucket youngsters came out 16 percent higher than the 42-percent average scored by youngsters throughout the Nation.

Personally, though, I believe our country has in its grasp the potentiality and prospects, the vigor and life, of a young man, and not of an old man.

I must say, too, that the atmosphere in Washington, sparked and generated by our excellent President, gives off this spirit of optimism and confidence. In fact, I believe that John Kennedy will prove one of our truly great Presidents, ranking with Washington, Jefferson, Lincoln, the two Roosevelts, and Woodrow Wilson. And in good measure, because of this, I see the United States—strong, morally and physically; powerful; and with a long, good, full life to lead.

But let us look hard at the image of the United States. What is our appearance? What do we look like? It depends on who does the looking.

To many of us, blessed with reasonable prosperity and circumstances, the United States looks pretty wonderful. But, let us look around, even in our own State, and see the variety of impressions.

This month, some 10,000 food packages are being distributed free to unemployed destitute families in our own State.

Our unemployment is high; 50 percent higher than the national average. I wonder how our United States, or even our Rhode Island, looks to the unemployed textile worker in Woonsocket or Central Falls, his unemployment compensation exhausted, dependent on public assistance, and with few job prospects.

Now, let us examine the problem of prejudice in our country. This last national election has, I believe, proved that religious prejudice is dead in our country. And, within our own State, my own election demonstrated the same.

For this, incidentally, I am fullheartedly grateful to many of you here in this room.

When it comes to racial prejudice, though, we still have a long way to go. The United States to a Negro, or even to a Jew, does not yet have the fullness of opportunity that it should. Just the other day, I noticed that our new Secretary of State, Dean Rusk, an old colleague of mine in the State Department (we both had desks side by side 15 years ago), bought a house in Washington, and in buying it, he refused to sign a covenant committing him, when he sold it, not to sell it to any non-Caucasian, i.e., a Jew, a Negro, or an oriental. Because our Secretary of State refused to sign this covenant, and was merely putting into his personal life our supposed national beliefs, it made headline news around the country.

So, while the United States seems full of opportunity to many of us, and to our children, it really does not offer the same full open doors to our unemployed and to others of our citizens.

Now, let us see how the United States looks from the viewpoint of other countries. First, let us take Great Britain. We were born in revolution against that country. We fought them hard, and they fought us. During the War of 1812, they even burned down our White House. We thought their policy harsh to our own forebears here in the United States. And the forebears of some of us here in this room shared an equal dislike from an even earlier period—from the days of Oliver Cromwell—than did the early American colonists.

Yet, today, to my mind, outside the United States, Great Britain is probably as strong and great a well of democratic values as exists in the present world. To her we sometimes seem bumptious and isolated, and even immature.

Now, let us go across the channel from Great Britain to Ireland, an appropriate trip on this St. Patrick's Day. How do we look from there?

Ireland's loss has been our gain in that its troubles have produced a great deal of the growth that is the United States by giving us her sons and daughters, who have become amongst our finest citizens. Incidentally, on this 100th anniversary month of the inauguration of the great President Lincoln, it would, I believe, be particularly appropriate to mention the fact, not commonly known, that just a century ago Irish troops were especially helpful to the Union Army during our Civil War. Between 150,000 and 170,000 Irish troops fought then. At Fredericksburg, Irish soldiers under General Meagher—wearing green twigs in their hats—made six of the most heroic charges of the Civil War. One Irish regiment of the Irish Brigade went into the battle with 700 men and came out with 150 men. Many of the Irish troops who fought in the Civil War remained in the United States after the war was finished.

We owe a great debt to Ireland, and we have enjoyed her friendship since our inception. However, let's not fool ourselves; to the Irish Free State, the United States may also sometimes appear a bit bumptious and even pigheaded.

And how do we look from the viewpoint of Africa or Asia? You are as familiar as I with the slowness with which we are implementing our Constitution and our laws when it comes to making available to all our citizens on an equal basis education, public facilities, and even the privilege of voting. In our own South, while the religious institutions, particularly the Catholics, and many moderates are doing as much as they can in the field of education, the great majority of our southern white Americans oppose integration in education.

Even here in our State there are problems. I have a Negro friend who told me that in the suburban block where he lives, not one of his neighbors had been friendly to him and his wife—though they had to their children—in the more than a year that they had been there. So, how do we look to people of color throughout the world. I leave you to draw your own conclusions.

Or, let us go behind the Iron Curtain, an area where I have lived a couple of years and visited most every other year since World War II. There, while their governments and the official propaganda line have done all that is possible to caricature the United States as a moneygrubbing, vicious, warmongering nation, the reservoir of goodwill that exists for us among its people is still as deep as ever.

I remember once taking a train from Warsaw to Moscow. I had no Russian money. Other passengers on the train shared their food and beverages with me for the whole of that long train ride. They did their best to make me feel at home. I wonder what would have been the fate of a Russian tourist on the New York, New Haven and Hartford for an equal length of time?

Actually, I guess it's a pretty tough fate to be dependent on the New York, New Haven and Hartford. And, one is usually on it longer than one intends anyway.

But, seriously, from the Russian viewpoint, we appear almost as threatening to their security as they do to ours. I remember once being struck by a Russian map of the world, which showed the American nuclear-armed bases surrounding its borders. The Russians are constantly told that these bases are for offensive operations, and we often join in saying how we can blast every Russian city from the face of the map. I must say that if I were a Russian and listened to either the bellicose speeches of the Communist propagandist or to some of the saber-rattling speeches of ourselves, much less both, and then looked at that map, I would be a bit worried, too.

Our way of life and outlook are, to my mind, the best and most natural for the expression of wishes and desires of people everywhere. And for that reason, in the long haul, our Judeo-Christian way of life will triumph over the Communists. This is particularly true in fair competition. I have seen Communist officials who go to the United States, come back a lot less convinced Communists than when they left.

Now let us look westward to the Pacific. The first and most amazing point here is our new State of Hawaii. In Hawaii we have a real amalgam, a real melting pot—even more than on the U.S. mainland. And this melting, like the tempering of steel, appears to have developed strong foundations and also charted a way toward improvements. What has happened in Hawaii can do a lot to change the image of us in the other parts of the world and to improve our posture as the world's leading democratic nation.

We go to Japan, and there is some confusion. A short 15 years ago we insisted that they disarm totally and completely, and forever forswear the use of arms. At our instance, the Japanese Constitution was written to say in part "sea, and air forces as

well as other war potential, will never be maintained. The right of belligerency of the state will never be recognized." Now, a very few years later, we urge them to arm as quickly and vigorously as they can.

We talk about disarmament in the United Nations, and yet we watch Communist China the most populous nation in the world arm itself with new and more deadly weapons without making any effort to insure that she sit down and discuss her awesome threat to humanity.

Now forgive me for literally covering the waterfront, but I have tried to underline the point that the United States does not appear the same to everybody.

Now that we have made our world tour, let us return home to President Kennedy's inaugural words: "Ask not what America can do for you—ask what you can do for your country."

There are many things that each of us can do for our country. There are many things that each of us can do to reinforce the vigor and youth of America and to insure that we continue toward our own New Frontiers.

To be specific: our businesses, our bankers, and our credit associations can be more adventurous and not depend too much on the Government. The other day a friend of mine and an excellent banker here wanted the Small Business Administration to extend a loan to a business to which he himself would not extend a loan. In this case, actually, he would not lay on half the loan, although the Small Business Administration said that it would put up a half, if he would agree to accept the other half. Now, I believe bankers should be willing to share in the risk that they ask the Government to take.

Asking what you can do for your country means the full reporting of all our taxable income and the payment of all the money we owe to the Government. I believe that if all the money that is owed by the taxpayers to the Government were paid, it would be unnecessary to raise taxes. For instance, in answer to a question from me at his appearance before the Joint Economic Committee, Secretary of the Treasury Dillon said for the record that the Treasury Department estimates that several billion dollars in interest and dividend income is not reported each year. And, while I believe all of us here in this room are reporting our income, we can do what we can to make sure that those we do business with or have contact with behave the same way.

Our industrialists and businessmen can be more imaginative and confident, more adventurous. This means plowing back a larger portion of profits into capital improvements, developing new marketing processes and uses for our products and the keeping pace with technological advances in other areas of the world.

Our investors can have greater confidence in our industries, in the growth of the American industrial system. One evidence of such confidence would be a willingness to invest in common securities and stocks, rather than bonds. In this connection, not only industrialists and bankers can help by investing in industry, but the unions can share in this. The amazing thing is that at present such supposedly conservative institutions as universities and mutual funds have invested a high percentage of their funds in common stocks. For instance, in 1959, 80 percent of the portfolios of mutual funds were invested in common stock. And in the fiscal year ending 1960, 80 percent of universities had 56.1 percent of their endowment funds invested in common stocks. Yet, the emphasis of the investment patterns of union funds is upon bonds and mortgages.

What we can do for America is to practice in our own lives the elimination of discrimination. My fellow Americans, there can be only one nationality in America—American.

Creed no longer enters the picture, but race, color, and age still do, and here each of us can do our own bit to help.

We must have greater faith and confidence in our own system, a realization that our democratic system provides not only the material welfare, but must meet the human and emotional and religious needs of all people. This is the field where communism fails.

We must have a willingness to sacrifice to obtain the good, the great, world that is within our grasp.

What can we do for America? We can act like Americans, talk like Americans, and think like Americans. And, most important, have the confidence in our own vitality that as Americans we must have.

Gentlemen, I give you a toast to our United States.

The 140th Anniversary of Greek Independence

EXTENSION OF REMARKS

OF

HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, March 24, 1961

Mr. BURKE of Massachusetts. Mr. Speaker, today marks the 140th anniversary of Greek independence. Because of the many folks of Hellenic descent in the 13th Congressional District of Massachusetts, I feel that it is especially fitting to call attention to this day in the CONGRESSIONAL RECORD.

GREEK INDEPENDENCE DAY, MARCH 25

The Greek people have been the most persistent and proud advocates of freedom throughout their long and glorious history. They were the first to conceive and formulate the idea of freedom, and the first to practice it in their almost ideally organized state 2,500 years ago. There they enjoyed freedom in all its manifestation, freedom of speech, of conscience, of assembly, of movement, and also freedom from fear and freedom from want. All these freedoms were honored in ancient Greece, in classical times as never before in human history and nowhere else. Thus, Greek genius has a claim upon us, upon all men and women of the free world, and we all have always been conscious of our indebtedness to Greece for giving birth to this noblest of human ideals, freedom and independence.

It is one of the ironies of human history that these gifted and gallant people of Greece who gave birth to this superb idea were not allowed to enjoy it for almost 2,000 years. A few centuries after Athens had become the center of artistic, esthetic and philosophic learning of the then known world, with its citizens famous for their love of freedom and public spirit, Greece became a Roman province. The glory of Greece was gone and the Greeks were without their national freedom. Then during the late Middle Ages they were ruled by Frankish kings. And finally in the middle of the 15th century they were brought under their most despotic oppressors, the Ottoman Turks, under whom they suffered for almost 400 years and against whom they carried on their relentless struggle for their national independence. The independence which they proclaimed in 1821 was thus the culmination of an ideal fervently and dearly cherished by the people of Greece during their subjugation to foreign yoke for 2,000 years.

Neither under the austere and orderly Roman Government, nor under the greedy Frankish kings, nor under the ruthless Ottoman sultans were the Greeks at all happy. They were never willing to be reconciled to their unenviable lot under alien yoke. The longer they endured the foreigners' detestable regimes, the more oppressive became these regimes. Under the Romans they were captives, but as has often and with considerable truth been said, in this case the Greeks took their captor Romans captive. That is to say, the Romans were so much impressed and so completely overwhelmed by the Greek genius, that they became its disarmed devotees. The same cannot be said of the Frankish kings whose avowed crusading zeal was expressed in bitter religious ultrafanaticism, which was abhored by the Greek mind. But what the Greeks had to put up with under the ruthless and unscrupulous Turks was far worse. It is true the Mohammedan sultans did not interfere with the Christian religion of the Greeks, but as against this much misunderstood religious tolerance of the Turks, the Greeks were not allowed political, civil, or social equality. They were considered far less than second-class citizens in the Ottoman Empire in that all their worldly possessions as well as their lives were at the mercy of their overlords, the Turks.

Among the severe inequities under which they suffered was the immoral form of child taxation, which meant that the Turkish officials could go around and snatch away male children from Greek homes, who, when brought up in the sultan's palace schools turned into ferocious guardians of the Ottoman Empire. For decades and centuries helpless Greeks put up with these heartrending hardships and suffered immeasurably under the Turks. In their historic homeland, under the very eyes of Christian rulers of Europe, Christian Greeks thus endured the inhuman rule of their unchristian oppressor. Then came the rebellion of 1821.

The Greek war of independence that started on March 25, 140 years ago today, not only spread instantaneously throughout the Greek mainland and all Greek islands, but it also roused many governments and all peoples of Europe. One might say it shook the conscience of Europe, and brought it to its sense of duty. All lovers of freedom and of Greece were elated and excited by the news of the revolt, led by an archbishop in a monastery in northwestern Greece. In the past, other Balkan peoples suffering under the same ruthless Ottoman sultans had revolted, and some had even attained autonomous status, but no previous revolt against the sultans, inside or outside of the Balkans, was to arouse so much public sympathy and enlist so much moral support as did the Greek

war that began in 1821. In taking such a fair, upright, and sympathetic stand on this issue, the people of the civilized world were not only expressing their natural and genuine feeling toward a righteous cause, but they were also showing their unconcealed admiration and affection for gallant Greeks fighting for their lives as well as for the cause of freedom.

The war, fought continuously for almost 7 years, seemed a one-sided struggle most of the time, and at times it looked quite hopeless. The Greeks were overwhelmingly outnumbered from the beginning by the forces of their powerful enemy. Even the optimistic among Greece's friends were admitting that the Greek cause was lost unless some effective move was made, and a decisive step was taken by the governments in Europe. By mid-1827, Greece was almost bled to death; most of the country lay under the heels of the sultan's soldiers. Peoples on both sides of the Atlantic were following the course of events with anxiety. Unofficial and semiofficial groups in many countries were sending much financial and medical aid, and England's great romantic poet, Lord Byron, had gone to Greece to have his magnetic influence felt there. And fortunately in the end the Greeks, through their tenacity and gallantry, and through their unswerving devotion to their freedom, wrenched victory out of defeat: with the aid of their friends their cause won out and they secured their independence.

Of course, this last act had its very sad twists and tragic turns, but even through tragedy the Greek people were to be freed and once more Greece was to be herself again. In 1827, as the sultan's ruthless agents were complete masters of nearly all Greece, they were committing a crime which could not be condoned even by the most inactive of European governments. At the time it was reported that the sultan's agents were deporting Greek people by the thousands to other parts of his empire, to be sold there as slaves. Peoples in Europe and America were horrified by this news. Now they wanted their governments to do something to stop this fiendish move on the part of the sultan, to prevent the enslavement of Greeks through the Middle East. At the time much as we wished to help the Greeks effectively, we could only do so privately, but fortunately for the Greeks, for the conscience of the civilized world, and also for the cause of freedom, certain European governments could and did act. In October the British, French, and Russian Governments informed the sultan to put a stop to such inhuman practices. The sultan did not take the warning seriously; nor did his naval commanders off the waters of Greece. Next the combined naval commanders there warned the Turkish admiral, and issued him what amounted to an ultimatum. The Turkish admiral at first vacillated and did not comply with the wishes of the European admirals.

But these admirals meant what they had said. When no satisfactory reply was received from the Turkish admiral, they ordered the decks of their ships cleared for action. On one memorable day, on the 20th of October 1827, as the combined British-French-Russian warships opened fire upon the Turkish flotilla, in a matter of hours that flotilla ceased to exist, and out of this naval battle, fought in the Bay of Navarrino, was born modern, free, independent, and soveriegn Greece.

One hundred and forty years have gone by since the beginning of the Greek war of independence, and since then the Greek people have had many anxious years and endured many hardships. During the two World Wars they fought bravely, both times on the side of freedom and democracy, and fortunately for them, on both occasions their allies and their cause were victorious. For their steadfastness and unfailing loyalty to the cause of freedom, and for their readiness to sacrifice for the common cause they have earned the admiration and sympathy of the free world. We in this country have always held them in very high esteem. We have appreciated their contribution to the well-being of this great Republic as loyal, enterprising, and patriotic citizens, and we have admired them in their historic homeland in their political struggle. We have, of course, helped them not only financially, but I am proud to say that we were able to save postwar Greece from the throes of Stalin's totalitarian communism. Today we all join our friends in Greece, our faithful ally, on the 140th anniversary of their independence day.

Secretary Udall Addresses North American Wildlife and Natural Resources Conference

---

EXTENSION OF REMARKS

OF

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, March 24, 1961

Mr. DINGELL. Mr. Speaker, pursuant to permission granted, I insert into the CONGRESSIONAL RECORD an address by Secretary of the Interior Stewart L. Udall at the 26th North American Wildlife and Natural Resources Conference, Washington, D.C., March 6, 1961:

ADDRESS BY SECRETARY OF THE INTERIOR STEWART L. UDALL AT 26TH NORTH AMERICAN WILDLIFE AND NATURAL RESOURCES CONFERENCE, WASHINGTON, D.C., MARCH 6, 1961

I am very glad that you have given me this opportunity to address the general session of this, the 26th North American Wildlife and Natural Resources Conference. I enjoy talking to people whose business is my business and whose interests are my interests, especially as we are about to share what I hope will prove to be some of the most far-reaching and productive years in the history of the conservation movement in this country.

The theme of this conference, "Planning for Population Pressures," is to me indicative of the breadth of purpose—and depth of understanding—of the conference's sponsors and participants.

Not so long ago, as time is reckoned, our natural resources appeared so limitless that people were no problem at all. As recently as the middle of the last century the French observer, de Tocqueville, was able to write of "that continent which still presents, as it did in the primeval time, rivers that rise from never-failing sources, green and moist solitudes, and limitless fields which the plowshare of the husbandman has never turned. Such is the admirable position of the new world that man has no other enemy than himself."

But man did turn out to be his own worst enemy, and all too soon it became the conservationist's mission to protect and preserve our land, water, and wildlife from the barren consequences of man's conviction that he held a special place in creation and that the land and its creatures were expendable. The conservation movement has—to its good fortune—had great champions in its hours of greatest need. With almost providential timing—men of extraordinary vigor and vision have taken up the cause of conservation and made it their own. To the wise counsel of Gifford Pinchot, John Muir, the two Roosevelts, and Harold Ickes—to name but a few—this generation owes a profound debt of gratitude. But more often than not their advice went unheeded.

Only four generations after de Tocqueville's visit to the "primeval continent" much of our land lay eroded. Many of our once vast forests were harvested wantonly and our great rivers ran unharnessed, and polluted, to the sea. It was not until the administration of Franklin D. Roosevelt that the full development of our land and water resources and the careful protection of perishable natural assets truly became major expressions of national policy.

But with the coming of World War II and troubled times abroad, the attention of the public and of succeeding administrations was largely diverted from our own land. The Department of the Interior—until that time a prime mover in national affairs—slowly settled into a rut of lackluster performance, content to let others shape the country and the ideas which guided it. It has now been more than 20 years since the United States has engaged in any massive and sustained national conservation effort. The broad programs initiated by Franklin Roosevelt—the Civilian Conservation Corps, reforestation of public lands, sustained soil and water conservation measures—have either been allowed to lapse or to drift along on the momentum of the past.

Yet it is precisely those same 20 years that have fundamentally changed what Thomas Jefferson called the face and character of our land. Hundreds of thousands have pushed out from the cities into the countryside—a movement that has inevitably created vast stretches of urban sprawl.

The talk today is of overurbanization, exploding population, and vanishing countryside. And it would seem that this is only the beginning. Inevitably we, as managers of our natural resources, are faced with acute new responsibilities. We are today in a state of long-term crisis. Although we rarely concede the point, our modern industrial society depends for its survival on an equilibrium between man and nature. As Aldo Leopold, that most perceptive and eloquent conservation prophet, once said:

"Civilization is not the enslavement of a stable and constant earth. It is the state of mutual and interdependent cooperation between human animals, other animals, plants and soils, which may be disrupted at any moment by the failure of any one of them."

We have today a new dimension of urgency in the dependence of man on nature: I refer to the need for the human animal to recreate itself in nature. The necessity to meet the outdoor needs of our people now and in the future will in all likelihood be the sharpest and most consistent pressure

on our land, water, and forests in the years ahead.

The overriding mandate to conservationists today is to preserve the natural habitat of man—to preserve it against the onslaught of bulldozers, cement mixers and subdividers. Because no matter how seemingly industrialized and civilized man has become over the past two centuries, he is biologically and temperamentally rooted in the soil. To allow ourselves to be cut off from our relationship with the earth, from our relationship with mountains and lakes, forests and open places, might well cause a fundamental change in our national character.

Never before has the need for imaginative and truly national leadership been as great as it is today. On the one hand we have an almost insatiable and evergrowing population. On the other hand, a limited reservoir of land and its resources. In between, as arbiter so to speak, we have a large group of dedicated and highly trained men such as those of you here today. The need clearly is for leadership in the very highest places of our Government so that we might define our objectives and proceed posthaste with meaningful planning—and action. It is therefore a matter of satisfaction that President Kennedy, in his special message to Congress on natural resources, has set forth a charter under which all of us can work with all the ingenuity, energy, intuition, and enthusiasm we can muster.

For, in my opinion, never before has a President of the United States given such a broad and comprehensive mandate to conservation policymakers. Particularly noteworthy is that section of the President's message which deals with recreation. It is significant indeed that for the first time in history the recreation potential of our land and water has been put on a par with, say the hydoelectric potential of our great rivers. Surely every conservationist who read the President's message must have felt a quickening of his pulse at the vast opportunities which we can achieve under this broad Presidential charter. I think I can safely say that my associates and I at the Department of the Interior felt a surge of purpose and momentum. That very night we sat down and began to assemble our plans and programs, with the realization that now, for the first time, we could put together a truly national program for the wise development of our resources including the acquisition of still unspoiled land and water in every section of this country.

It is still too early to present here anything except a broad outline of the principles and objectives which will dominate the thinking of the new administration.

We are first of all taking a hard new look at existing programs within the National Park Service, the Bureau of Land Management, the Fish and Wildlife Service, the Indian Bureau, and the Bureau of Reclamation. We are, for example, reassessing the objectives of Mission 66. There has been some concern on the part of conservationists whether some of our national parks are not being overdeveloped at the expense of their unspoiled grandeur. We are giving these considerations attention, area by area.

As you know, the administration has ordered an 18-month moratorium on the filing of nonmineral claims on our public domain. Among the advantages to be gained from this breathing spell is the opportunity to prepare an inventory of the recreational opportunities offered by the public domain to all. Those areas which offer exceptional opportunities must be made available, through proper development, to the men and women who own the land.

Perhaps no other outdoor sport has grown as much over the past decade as has boating, and here Federal reservoirs offer opportunities which often did not exist before. The construction of Tiber Dam in Montana, for example, created Tiber Reservoir where on a typical Sunday 300 boats were counted and where on the opening day of the trout season 1,750 fishermen caught 5,000 rainbow trout. But in the past recreational values of Federal reservoirs have received altogether too little attention. It is our intention to prepare plans to fully utilize recreational opportunities of new and existing reservoirs and to seek appropriations for their development.

We are giving very careful study on how we can speed up the vital wetlands acquisition program in the Fish and Wildlife Service.

We have been charged by the President to formulate plans for new starts. Obviously, a national program of this kind does not mean the acquisition of new Federal parks and recreational areas only. Inevitably, and most importantly, such a program must include devices for encouraging the States to develop land acquisition programs of their own.

The need is for a balanced program of National and State parks—wildlife preserves and local recreation areas. Our great national parks represent one of the few remaining opportunities for the leisurely enjoyment and admiration of magnificent landscapes.

But America's families should be able to spend a day in the outdoors—within an easy drive of their homes—whether they are picnickers, hunters, fishermen, or just looking for a place in the sun. They should not have to rely on the Federal Government for this, but rather on their own States and communities. And not so incidentally, such State areas would take much of the pressure off our national parks which now must take the impact of millions of visitors each year, some of them with only a casual interest in their significance and unique splendor.

This will be a real challenge to our States—and one that they must meet for the benefit of their citizens. Already some States—such as New York and California—have led the way with legislative programs or studies which point the way for all.

We hope to encourage not only State programs but joint ventures between neighboring States to acquire relatively large open spaces near cities where recreation land is most needed and hardest to come by.

We are in the process of finishing an inventory of areas of great scenic beauty which should become a part of the national park system. At the same time, we are giving a great deal of thought to whether some of these new national parks and new national seashores should not be managed as yearround recreational areas. It may well be that some areas whose beauty is fragile will serve only as living nature centers. The best management of other areas, however, may well allow more vigorous use, and be opened up to hunters, for example. We will decide in each case how to manage each area for its own best interest and for the interests of those who visit them now and in the generations to come.

I am especially eager to see that a part of the land adjoining our great rivers and streams be set aside for outdoor recreation. Such land offers unparalleled opportunities for the active enjoyment of the outdoors.

We are currently weighing various incentive programs to make it worthwhile for private landowners to open up their land to hunters, fishermen, and others. Programs of this kind are, of course, especially needed in the Northeast and Midwest where almost all land is privately owned.

And, as you know, this administration has urged the enactment of a wilderness protection bill, similar to the one now under consideration by the Congress.

I realize that we are about to undertake a great deal and I also realize that on each particular proposal we are going to receive encouragement from some, and criticism from others. We expect to rely substantially on the findings of the Outdoor Recreation Resources Review Commission as they become available and I intend to keep in close touch with the Commission as our plans develop. We are determined to do the best we can in consultation with all who have a working interest in these matters and we are equally determined to get the job done. The land which we save now is likely all that ever can be saved, and I know that I speak for millions of Americans when I say that this generation is willing to make the sacrifices to insure a good life for our children and grandchildren. As President Kennedy said in his resources message: "We cannot delude ourselves, we must understand our resources problems, and we must face up to them now. The task is large but it will be done."

SENATE

MONDAY, MARCH 27, 1961

The Senate met at 12 o'clock meridian, and was called to order by the President pro tempore.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

God of the living and of the living dead, in all the uncertainties of our mortal way, we turn to Thee with the assurance that we can never drift beyond the circle of Thy love, which notes even a sparrow's fall, and in whose universal rule of law the stars are held in their courses.

This day we hold in grateful remembrance one for whom that love divine was revealed supremely in the strange Man upon His cross.

At the opening of this session we would pause to lift the name of Thy servant—the friend of us all—James E. Murray, who for more than a quarter of a century served Thee and his Nation in this Chamber.

Now that his earthly career of doing good to others has come to its close, we keep in memory his soft-spoken gentleness of manner and his unruffled courtesy, his forthrightness and steadfastness of conviction. We record his tender sympathy for the underprivileged and the dispossessed, his eager contribution to the furthering of measures that would lift the level of human welfare, and his championship of the crusade to guard the treasures of the land he hallowed for the sake of the future which will inherit it.

Gird us with Thy grace, that, like him, we may be workmen who need not to be ashamed. We ask it in the name of the Master he adored. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Friday, March 24, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed a bill (H.R. 3935) to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H.R. 3935) to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes, was read twice by its title and referred to the Committee on Labor and Public Welfare.

ORDER DISPENSING WITH CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the calendar be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Public Roads Subcommittee of the Committee on Public Works was authorized to meet during the session of the Senate today.

On request of Mr. MANSFIELD, and by unanimous consent, the Committee on Finance was authorized to meet during the session of the Senate today.

On request of Mr. METCALF, and by unanimous consent, the Subcommittee on Freedom of Communications of the Committee on Interstate and Foreign Commerce was authorized to meet during the session of the Senate today.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, I think this is an appropriate time to ask the majority leader about the schedule for the remainder of the week, and even for next week, insofar as he can determine it.

Mr. MANSFIELD. Mr. President, in response to the question asked by the distinguished minority leader, let me say that today the Senate will consider the supplemental appropriation bill, the San Juan-Chama project bill, and various nominations on the Executive Calendar.

It is hoped that now that the minimum wage bill has been passed by the House, the Senate Committee on Labor and Public Welfare will soon start to mark up the bill. I have been informed by the chairman of that committee, the Senator from Alabama [Mr. HILL], that he has called a meeting of his committee for tomorrow, for this purpose. However, it does not seem probable that the bill will be reported from the committee this week, or even next week.

After discussing the matter with the minority leader, it is our intention that if the Committee on Labor and Public Welfare will mark up the bill on the 10th and 11th of next month, it will be reported immediately, and very likely will be taken up on the floor on the 12th or 13th.

It is the hope of the leadership that thereafter the Committee on Labor and Public Welfare will report an aid to education bill, and that in the meantime the other committees will take advantage of the time at their disposal to report the various measures they have under consideration.

After discussing the matter with the Senator from Illinois, we hope it will be possible for the Senate to take recesses, from time to time, for a few days, so the committees will be able to take advantage of the time to catch up with their work and to report measures to the Senate, for consideration by it.

Mr. DIRKSEN. Mr. President, I may add to what the majority leader has said that in going over the testimony on the minimum wage bill, we found that there were approximately 36 witnesses, as I recall; that 42 different bits of memoranda were filed; and that, in addition, 87 formal statements were filed with the committee by interested groups or persons whom the committee could not hear in the 5-day period. However, all that data and testimony must be digested before the committee will be prepared to mark up the bill.

I am grateful for the generous approach the majority leader takes, so that both the staff and the members of the committee can prepare to bring the bill to the floor of the Senate at the earliest possible date. I think that in the week of April 10 and 11 we will have opportunity to mark up the bill; and by then we shall have had a chance to examine all the testimony and also the bill passed last week by the House of Representatives.

Mr. MANSFIELD. Mr. President, once again I wish to thank the distinguished minority leader for his cooperation and his understanding.

As we now understand, the Committee on Labor and Public Welfare will very likely meet tomorrow to consider how it will go about marking up the bill. But certainly it will meet on the 10th and 11th with the idea that such a bill may well be reported at the conclusion of its business on the 11th, and brought to the floor of the Senate for consideration by the 12th, or, at the very latest, by the 13th of April.

Mr. DIRKSEN. Yes.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON NUMBER OF OFFICERS ON DUTY WITH HEADQUARTERS, DEPARTMENT OF THE ARMY AND ARMY GENERAL STAFF

A letter from the Secretary of the Army, transmitting, pursuant to law, a report on the number of officers on duty with Headquarters, Department of the Army and the Army General Staff, on December 31, 1960 (with an accompanying report); to the Committee on Armed Services.

REPORT ON COMPILATION OF GENERAL ACCOUNTING OFFICE FINDINGS AND RECOMMENDATIONS FOR IMPROVING GOVERNMENT OPERATIONS

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the compilation of General Accounting Office findings and recommendations for improving government operations, fiscal year 1960 (with an accompanying report); to the Committee on Government Operations.

AMENDMENTS TO RULES AND REGULATIONS, RELATING TO NUMBERING OF UNDOCUMENTED VESSELS, STATISTICS ON NUMBERING AND BOATING ACCIDENTS REPORTS AND ACCIDENT STATISTICS

A letter from the Acting Secretary of the Treasury, transmitting, pursuant to law, copy of amendments to the rules and regulations regarding "Numbering of Undocumented Vessels, Statistics on Numbering and Boating Accident Reports and Accident Statistics," to become effective on June 30, 1961 (with accompanying papers); to the Committee on Interstate and Foreign Commerce.

REPORT ON BACKLOG OF PENDING APPLICATIONS IN FEDERAL COMMUNICATIONS COMMISSION

A letter from the Chairman, Federal Communications Commission, transmitting, pursuant to law, a report on the backlog of pending applications and hearing cases in that Commission, as of January 31, 1961 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

REPORT OF NATIONAL INSTITUTE OF ARTS AND LETTERS

A letter from the Assistant Secretary, The National Institute of Arts and Letters, New York, N.Y., transmitting, pursuant to law, a report of that Institute, for the year 1960 (with an accompanying report); to the Committee on the Judiciary.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action

looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The PRESIDENT pro tempore appointed Mr. JOHNSTON and Mr. CARLSON members of the committee on the part of the Senate.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented and referred as indicated:

By the PRESIDENT pro tempore:

A concurrent resolution of the Legislature of the State of Utah; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION 4

"Concurrent resolution of the Senate and House of Representatives of the 34th Legislature of the State of Utah, memorializing the Congress of the United States to renew the Sugar Act and to provide for implementing long term sugar legislation with equitable distribution of foreign quotas among friendly nations

"Whereas the growing and processing of sugar beets is vital to the economy of Utah and the 21 other beet sugar-producing States; and

"Whereas the crisis in U.S. relations with Cuba—formerly the principal supplier of sugar to the United States and now excluded from the U.S. market by Presidential order—has proved the importance and wisdom of a strong domestic sugar industry, providing a bulwark against shortages created by war, revolutions, or foreign monopoly; and

"Whereas the beet sugar industry in 1960 marketed a record-breaking amount of sugar, and the industry in 1961 is expected to set new production records—with plantings of a predicted 1.1 million acres of sugar beets and processing of an estimated 2.7 million tons of sugar; and

"Whereas both the domestic beet and cane sugar industries and the foreign exporters of raw sugar to this country all are subject to provisions of the Federal Sugar Act which sets marketing quotas limiting sugar distribution in the United States; and

"Whereas the U.S. sugar program has been in continuous operation since 1934, always providing adequate supplies of this important food at reasonable prices, proving to be good agricultural commodity legislation; and the sugar program has the support of both political parties in Utah and the United States, the major farm organizations, consumer groups and all segments of the beet and cane processing industries; and

"Whereas the Sugar Act will expire March 31 of this year unless the Congress renews it: Now, therefore, be it

"*Resolved*, That the Legislature of the State of Utah (the Governor concurring therein), Urges the Congress of the United States to immediately renew and extend the present sugar legislation to insure uninterrupted continuation of the act and give farmers and processors in Utah and other beet sugar States ample time to plan and produce this year's crop; further, that the Congress then undertake detailed study of the U.S. sugar problem with these objectives:

1. Passage of long-term sugar legislation, assuring the domestic sugar industry of steady, stable growth in the future.

2. Equitable distribution of foreign quotas among friendly nations; and be it further

"*Resolved*, That the Secretary of State forward copies of this memorial to the President of the United States, the appropriate Senate and House committees which handle sugar legislation, the Utah congressional delegation, and to all other Members of the Congress."

A joint resolution of the Legislature of the State of Colorado; to the Committee on Interior and Insular Affairs:

"HOUSE JOINT MEMORIAL 10

"Joint memorial memorializing the Congress of the United States not to enact any legislation which establishes a blanket policy of single use for Federal lands which would result in lessening the State of Colorado's resource base and preclude recreation for the multitudes

"Whereas the Federal Government owns in excess of 1 out of every 3 acres of land in the State of Colorado; and

"Whereas forestry, agriculture, mining, water development, oil and gas drilling, and recreation are the six basic industries of the State of Colorado; and

"Whereas Federal lands are of great importance to our forest industry and provide a significant proportion of its raw material; and

"Whereas Federal lands are an important source of water for our agriculture, industry, and domestic use; and

"Whereas Federal lands provide countless opportunities for outdoor recreation; and

"Whereas Federal lands are important present and potential sources of minerals and oil and gas; and

"Whereas there is legislation now pending in the Congress of the United States which would establish a national wilderness preservation system and which would establish single purpose use for 50 million acres of western Federal lands; and

"Whereas such legislation would preclude forestry, mining, grazing, and water development, and motorized recreation and other resource development, use and management; Now, therefore, be it

"*Resolved by the House of Representatives of the 43d General Assembly of the State of Colorado (the Senate concurring herein)*, That this general assembly hereby petitions the Members of the Congress of the United States not to enact any legislation which establishes a blanket policy of single use for our Federal lands which would result in lessening the State of Colorado's resource base, and preclude recreation for the multitudes; and be it further

"*Resolved*, That copies of this memorial be sent to the President of the United States, the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, and Members of Congress from the State of Colorado.

"ALBERT J. TOMSIC,
"*Speaker of the House of Representatives.*
"ROBERT L. KNOUS,
"*President of the Senate.*
"GENE MANZANARES,
"*Chief Clerk of the House of Representatives.*
"LUCILLE L. SHUSTER,
"*Secretary of the Senate.*"

A joint resolution of the Legislature of the State of California; to the Committee on Appropriations:

"ASSEMBLY JOINT RESOLUTION 9

"Joint resolution relative to beach erosion and flood damage in Ventura County

"Whereas the shoreline area along the Pacific Ocean in Ventura County, has since the early 1920's, suffered from problems of beach erosion and flood damage caused by high tides and high wave action; and

"Whereas this condition exists primarily in the Pierpont Beach area and affects not only the San Buenaventura Beach State Park, but also a substantial residential area adjoining the State Beach Park; and

"Whereas within the past few weeks, extremely high tides and high wave action have presented a serious threat to public and private property in this area, and if such condition continues it will result in major damage to public and private property; and

"Whereas such property damage will not only directly affect the private property owners in this area, but also will result in a high loss of tax revenues to the city, county, and State; and

"Whereas the Federal Government, acting through the Corps of Engineers of the United States Army, has assumed leadership and responsibility in carrying on beach erosion control activities, in cooperation with State and local authorities; and

"Whereas, the Corps of Engineers, in 1951 and 1952, conducted a study of shoreline conditions along the beach at Ventura (published in House Document No. 29, 83d Congress, 1st session, appendix I) and, among other things, recommended construction of a stone and steel sheet piling groin along the beach in front of the San Buenaventura Beach State Park to trap sand and build up the beach; and

"Whereas while the above recommendation would serve to alleviate conditions along the shore in front of the State Beach Park, it would aggravate the conditions in the residential area adjoining the State Beach Park, according to engineering opinion; and

"Whereas in view of the imminent threat to both public and private property from current high tide and high wave action along the entire beach area, it is urgent that the previous study and recommendations by the Corps of Engineers be extended to cover the Pierpont Beach area adjacent to the San Buenaventura Beach State Park, and that immediate remedial action be taken to prevent beach erosion and flood damage in this area: Now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California (jointly)*, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact legislation appropriating the necessary funds so that the Corps of Engineers may immediately extend their study of shoreline conditions along the Pierpont Beach area in Ventura County to include the residential area adjacent to the San Buenaventura Beach State Park and take remedial action to prevent beach erosion and flood damage in the entire affected area; and be it further

"*Resolved*, That the chief clerk of the assembly be hereby directed to transmit copies of the resolutions to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Chief of Engineers of the Corps of Engineers."

A joint resolution of the Legislature of the State of California; to the Committee on Finance:

"ASSEMBLY JOINT RESOLUTION 18

"Joint resolution relative to the importation of mink

"Whereas the mink farmers of California are a substantial and permanent part of California's business economy and a source of considerable income to the State and to its citizens; and

"Whereas this important segment of our economy is being threatened by the fact that over the years there has been an ever-increasing rise in the importation of mink skins from foreign countries to the point that these imports are far exceeding exports; and

"Whereas since these imports are often from areas of depressed economic conditions they can be sold at a price far below cost of production for California mink farmers; and

"Whereas some of these mink skins being imported in competition with locally produced mink skins are coming, in spite of restrictions imposed by law, from China and Russia, resulting not only in slave labor competition with domestic production, but also results in a poor quality being imported: Now, therefore, be it

"Resolved by the Assembly and the Senate of the State of California (jointly), That the Congress of the United States is respectfully requested to take action which will bring about a balance between imports and exports in the mink industry before domestic mink farmers are forced from the business; and be it further

"Resolved, That the chief clerk of the assembly is directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Interior and Insular Affairs:

"ASSEMBLY JOINT RESOLUTION 19

"Joint resolution relative to requesting construction of the East Side Canal in the eastern San Joaquin Valley

"Whereas the lower San Joaquin Valley is one of the most prosperous and productive agricultural areas of the world; and

"Whereas the east-central area of this valley had a gross farm income in 1959 in excess of $1 billion; and

"Whereas more than one-fourth of all the ground water pumped for irrigation in the United States is taken from the San Joaquin Valley; and

"Whereas in the east-central part of the San Joaquin Valley the long-term water supply has not been in balance with the demand; and

"Whereas the imbalance in this area is characterized by increasing fluctuations in the water table and alarming overdrafts of the underground reservoir of water; and

"Whereas the continued growth, development and prosperity of the San Joaquin Valley is of utmost importance to the total economy of California; and

"Whereas such continued growth, development and prosperity is contingent upon supplies of supplemental surface water which are adequate to bring the pumping of underground water into balance with underground water replenishment; and

"Whereas hydrographs made from 1921 to 1958 show a reversal of the downward trends in the water table levels in overdraft areas of the State where waters of the Central Valley project have been delivered: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of California (jointly), That the Congress of the United States and the Secretary of the Interior are respectfully requested to take immediate steps to implement the past decade of study by the Bureau of Reclamation, entitled "East Side Investigation," by constructing, as an extension of the Central Valley project, a canal along the east side of the San Joaquin Valley to supplement the inadequate water supplies of this vital area; and be it further

"Resolved, That the chief clerk of the assembly is directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Secretary of the Interior, to the Chief of the Bureau of Reclamation, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Labor and Public Welfare:

"SENATE JOINT RESOLUTION 19

"Joint resolution relative to Federal aid to schools

"Whereas amendments to Public Law 874 and Public Law 815 of the 81st Congress, which established programs of Federal aid to school districts which have suffered financial burdens as the result of Federal activities, are being considered by Congress; and

"Whereas these programs assist districts in which local revenues for schools have been reduced due to the acquisition of real property by the United States, districts which provide education for children living on Federal property or whose parents are employed on Federal property, and districts experiencing a sudden and substantial increase in school attendance because of Federal activities; and

"Whereas these public laws have been of extreme importance to local school districts whose attendance has been greatly increased by the children of military personnel; and

"Whereas there are many areas in California, as well as in other parts of the country, where an adequate school program will be seriously jeopardized if Congress fails to continue the payment of entitlement with respect to "B" category children—those who either reside on Federal property or reside with a parent employed on Federal property: Now, therefore, be it

"Resolved by the Senate and Assembly of the State of California (jointly), That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to continue the vitally needed programs of assistance to public education in Public Law 874 and Public Law 815 by amending the provisions of titles II and III of H.R. 4970 and S. 1021 to include entitlement for "B" category children as provided in present law for the 1960–61 fiscal year; and be it further

"Resolved, That the President and Congress take action at the earliest possible time on legislation restoring full entitlement for "B" category children so that the impending budget problem faced by California's federally impacted school districts may be eliminated; and be it further

"Resolved, That the secretary of the senate is directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California to the Congress of the United States."

A joint resolution of the Legislature of the State of Missouri; to the Committee on the Judiciary:

"HOUSE JOINT RESOLUTION 4

"Joint resolution relating to the proposed amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia.

"Whereas at the 2d session of the 86th Congress of the United States of America it was resolved by the Senate and the House of Representatives of the United States in Congress assembled (two-thirds of each House concurring therein), that the following article be proposed as an amendment to the Constitution of the United States, which, if ratified by the legislatures of three-fourths of the several States within 7 years from the date of its submission by the Congress, shall be valid to all intents and purposes as part of the Constitution, viz:

"'ARTICLE —

"'SECTION 1. The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct:

"'A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the 12th article of amendment.

"'SEC. 2. The Congress shall have power to enforce this article by appropriate legislation': Therefore be it

"Resolved by the General Assembly of the State of Missouri, That the foregoing amendment to the Constitution of the United States of America, be and the same is hereby ratified to all intents and purposes as a part of the Constitution of the United States; and be it further

"Resolved, That the Governor of the State of Missouri is hereby requested to forward to the Secretary of State and to the Presiding Officer of the U.S. Senate and to the Speaker of the House of Representatives an authentic copy of this resolution. The secretary of the senate and the chief clerk of the house are hereby instructed to send to the Governor a certified copy of the action of the senate and the house on this resolution.

"THOMAS D. GAHAN,
"Speaker of the House of Representatives.
"HILARY A. BUSH,
"President of the Senate."

A joint resolution of the Legislature of the State of North Carolina; to the Committee on Armed Services:

"RESOLUTION 22

"Joint resolution requesting the U.S. Government to refrain from the use of any of the lands in Hyde County as a possible bomb range site

Whereas it has come to the attention of the the residents of Hyde County and other residents adjacent thereto that the Armed Forces of the United States are planning to use certain areas in said county as a possible bomb range site; and

"Whereas in the last several years the U.S. Government has acquired approximately 116,584 acres of land in Hyde County for Government use which has had the effect of removing said lands from the tax books of said county; and

"Whereas the proposed bomb range site is very near the boundaries of the Mattamuskeet National Wildlife Refuge and the use of the lands proposed to be taken would be most detrimental to the wildlife on said refuge and that such use would be destructive to deer and other game population in the area; and

"Whereas the Mattamuskeet National Wildlife Refuge is the largest refuge on the Atlantic Flyway for migratory game; and

"Whereas the use of said area as a bomb range site would be a continual threat to all areas adjacent thereto and would be destructive to valuable timber and other property; and

"Whereas the area under consideration as a bomb range site is crossed by an important highway and electric power lines which could very possibly be seriously damaged by such use: Now, therefore, be it

"Resolved by the senate (the house of representatives concurring):

"SECTION 1. The general assembly does hereby respectfully request the U.S. Government not to take and use any further lands in Hyde County and particularly re-

quests the Government not to take and use any lands in Hyde County as a bomb range site.

"SEC. 2. A copy of this resolution shall be sent to the President of the United States, the President of the U.S. Senate, the Speaker of the U.S. House of Representatives, the Secretary of Defense, and to the Members of the U.S. Senate and House of Representatives in Congress from North Carolina.

"SEC. 3. This resolution shall become effective upon its adoption.

"W. LUNSFORD CREW,
"President of the Senate, pro tempore,
"JOSEPH M. HUNT, Jr.,
"Speaker of the House of Representatives."

A petition signed by E. P. Sablan and seven other members of the Legislature of Saipan, relating to the annexation of the Saipan District by the United States as a separate and distinct U.S. territory; to the Committee on Foreign Relations.

By Mr. SALTONSTALL (for himself and Mr. SMITH of Massachusetts):

Three resolutions of the General Court of the Commonwealth of Massachusetts; to the Committee on Finance:

"RESOLUTION MEMORIALIZING CONGRESS TO REPEAL THE 10-PERCENT EXCISE (LUXURY) TAX ON TELEPHONE SERVICE

"Whereas as an emergency measure during time of war the United States levied a 10-percent excise tax on telephone service in the nature of a luxury tax; and

"Whereas the state of emergency which gave rise to this tax has long since passed; and

"Whereas the telephone cannot even remotely be considered a luxury, but is instead a vital necessity in the home, office, factory or public institution; and

"Whereas it is grossly unfair and inequitable to continue to extract such a tax from the citizens of this country: Therefore be it

"Resolved, That the Senate and the House of Representatives of the United States and the President be urged to repeal the excise tax on telephone service forthwith; and be it further

"Resolved, That copies of these resolutions be forwarded by the secretary of the Commonwealth to the President of the United States, to the Presiding Officer of each branch of Congress and to each Member thereof from this commonwealth.

"Adopted by the house of representatives March 10, 1961.

"LAWRENCE R. GROVE,
"Clerk.

"Adopted by the senate in concurrence March 14, 1961.

"IRVIN N. HAYDEN,
"Clerk.

"Attest:

"KEVIN H. WHITE,
"Secretary of the Commonwealth."

"RESOLUTION MEMORIALIZING THE CONGRESS ON THE UNITED STATES TO REDUCE THE ELIGIBILITY AGE OF PERSONS ENTITLED TO OLD-AGE BENEFITS UNDER THE SOCIAL SECURITY ACT TO 62 YEARS

"Resolved, That the General Court of Massachusetts hereby respectfully urges the Congress of the United States to enact legislation whereby the age at which persons become entitled to receive old age or retirement benefits under the Social Security Act shall be reduced from 65 years to 62 years; and be it further

"Resolved, That copies of this resolution be transmitted forthwith by the Secretary of the Commonwealth to the President of the United States, to the Presiding Officer of each branch of the Congress and to each Member thereof from this Commonwealth.

"Adopted by the house of representatives March 10, 1961.

"LAWRENCE R. GROVE,
"Clerk.

"Adopted by the senate in concurrence March 14, 1961.

"IRVING N. HAYDEN,
"Clerk.

"Attest:

"KEVIN H. WHITE,
"Secretary of the Commonwealth."

"RESOLUTION MEMORIALIZING THE CONGRESS ON QUESTIONS OF FEDERAL QUOTAS ON IMPORTS OF RESIDUAL FUEL OIL AND END-USE CONTROL OF THE VARIOUS FUELS SERVING THE COMMONWEALTH

"Whereas the current Federal quotas on the imports of residual fuel oil discriminate greatly against the New England area, including the Commonwealth; and

"Whereas such restriction on fuel oil imports poses an economic hardship on both the consumers of fuel oil in the Commonwealth and on the industrial community, already being responsible for higher fuel oil costs in the New England area; and

"Whereas a continuation of the current trend to limit fuel oil imports further augurs even higher fuel oil prices; and

"Whereas any study of the various fuels used in Massachusetts markets which has as its objective the promotion of the end-use control of such fuels would be contrary to the basic economic law of supply and demand and not in consonance with the operation of a free competitive economy, thereby causing higher prices to consumers of such fuels: Therefore be it

"Resolved, That the General Court of Massachusetts hereby requests the Members of the U.S. Congress from the Commonwealth to use their prestige and influence to terminate said quotas on the imports of residual fuel oil; and be it further

"Resolved, That the General Court of Massachusetts hereby requests the Massachusetts congressional delegation to make its voice heard against any attempt to promote the end-use control of the various fuels used in the Commonwealth; and be it further

"Resolved, That copies of this resolution be forwarded by the secretary of the Commonwealth to each Member of the U.S. Congress serving from Massachusetts.

"Adopted by the senate February 28, 1961.

"IRVING N. HAYDEN,
"Clerk.

"Adopted by the house of representatives in concurrence March 3, 1961.

"LAWRENCE R. GROVE,
"Clerk.

"Attest:

"KEVIN H. WHITE,
"Secretary of the Commonwealth."

By Mr. CHAVEZ:

A joint resolution of the Legislature of the State of New Mexico; to the Committee on Agriculture and Forestry:

"HOUSE JOINT MEMORIAL 24

"Joint memorial memorializing the Congress of the United States to amend the laws creating the agricultural conservation program in order to provide matching funds for concrete lining the main canal of the Hagerman Irrigation Co.

"Whereas the Hagerman Irrigation Co., a nonprofit corporation, owned in its entirety by water users and landowners wishes to participate in the agricultural conservation program for the lining of its main canal; and

"Whereas the lining of the ditch with concrete would result in the saving of thousands of acre-feet of water a year now being lost by seepage; and

"Whereas the amount of money required to line the main canal exceeds the amount allocated to New Mexico under the agricultural conservation program for any one project: Now, therefore be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States is memorialized to amend the laws creating the agricultural conservation program so that projects of at least $200,000 can be handled; and be it further

"Resolved, That copies of this memorial be sent to each member of the New Mexico delegation in Congress."

A joint resolution of the Legislature of the State of New Mexico; to the Committee on Appropriations:

"HOUSE JOINT MEMORIAL 28

"Joint memorial asking the Congress and President of the United States for increased Federal payments for Indian education in New Mexico

"Whereas integration of Indian youth with students in the public school systems of New Mexico has contributed greatly to development of both; and

"Whereas continued growth and development of New Mexico depends on a large measure upon an enlightened education for its youth of today who become its citizens of tomorrow; and

"Whereas public education in New Mexico today faces a financial crisis of unprecedented severity and dimensions: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress and President of the United States are asked to adopt and pursue a policy of realistic Federal payments to public school systems providing educational facilities for Indian children in New Mexico; and be it further

"Resolved, That copies of this memorial be transmitted to the President and to New Mexico's delegation to the Congress of the United States."

A joint resolution of the Legislature of the State of New Mexico; to the Committee on Foreign Relations:

"HOUSE JOINT MEMORIAL 25

"Joint memorial requesting the President, Secretary of State, the Federal Communications Commission and the New Mexico congressional delegation to take necessary steps to effect the conclusions of a reciprocal agreement with Mexico permitting the free movement and the operation of licensed amateur and other radio mobile units between the two countries

"Whereas there are numerous licensed amateur radio operators in this country who have contributed much to the Nation's security in time of peril, and

"Whereas the U.S. Government has for some years had an agreement with Canada permitting the free movement of mobile radio equipment installed in vehicles used in public and commercial activities; and

"Whereas it is desirable that a similar agreement be entered into permitting the free movement of such radio equipment between the United States and Mexico: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the President, Secretary of State, Federal Communications Commission and the New Mexico congressional delegation be and they are requested to take all necessary steps to effect the conclusion of a reciprocal agreement with the Republic of Mexico for the free movement of properly

licensed and regulated mobile radio equipment installed in vehicles used in public safety and commercial activities between the two countries; and be it further

"Resolved, That copies of this memorial be sent to the President, Secretary of State, Chairman of the Federal Communications Commission, and to the New Mexico congressional delegation."

Two joint resolutions of the Legislature of the State of New Mexico; to the Committee on Interior and Insular Affairs:

"HOUSE JOINT MEMORIAL 41

"Joint memorial memorializing the Congress of the United States to enact legislation to increase the revolving fund for economic development of Indian reservations

"Whereas the revolving loan fund available for Indian tribes has been restricted and additional funds are needed and necessary in order that economic development on Indian reservations may be encouraged: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be respectfully requested and urged to pass legislation to increase the Revolving Loan Fund by a sufficient amount to enable the Indian tribes to carry out economic development on their reservations; and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, to each Member of the New Mexico delegation to the National Congress, to the Secretary of Interior and to the Commissioner of Indian Affairs."

"HOUSE JOINT MEMORIAL 42

"Joint memorial memorializing Congress to assist Indians in solving their economic problems

"Whereas the 25th Legislature of the State of New Mexico, now in session, recognizes the importance of assisting the Indian people in solving their economic problems and the necessity of bringing about a higher standard of living through greater utilization of their human and natural resources for industry, through directing the attention of the traveling public to their rich culture and way of life, and through developing recreational facilities in reservation areas: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be memorialized to provide such assistance through new legislation to bring about a realization of these goals so that by aiding the improvement of the Indian people, the entire population of this State will benefit; and be it further

"Resolved, That a copy of this memorial shall be sent to the President and the Vice President of the United States, each member of the New Mexico delegation in the National Congress, the Secretary of Commerce, the Secretary of the Interior and the Commissioner of Indian Affairs."

A joint resolution of the Legislature of the State of New Mexico; to the Committee on Interstate and Foreign Commerce:

"HOUSE JOINT MEMORIAL 32

"Joint memorial memorializing the Civil Aeronautics Board to expedite decision concerning airline services from New Mexico to the West

"Whereas the development in recent years of an expanded national defense program within the borders of New Mexico and most particularly the activation and growth of Federal missile programs in this State, has stimulated and made vital the need for commercial airline services from points in New Mexico to points on the west coast, such as San Diego, Los Angeles, and San Francisco, Calif.; and

"Whereas the Civil Aeronautics Board has authorized airline service between Albuquerque and Dallas, Tex., which although it has greatly relieved pressures for service to the east, it has nevertheless, deferred action for over 5 years to provide vitally needed service to the west: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Civil Aeronautics Board is respectfully petitioned and urged to make an immediate decision in the Southern Transcontinental Route case and in the Southern Rocky Mountain Area Local Service cases so that this great demand for essential airline service to the west coast for the citizens of New Mexico and national defense personnel stationed in this State might be satisfied, and be it further

"Resolved, That copies of this memorial be transmitted to the Civil Aeronautics Board and to each member of the New Mexico delegation in the National Congress."

A joint resolution of the Legislature of the State of New Mexico; to the Committee on the Judiciary:

"HOUSE JOINT MEMORIAL 43

"Joint memorial memorializing the Congress of the United States to enact enabling legislation to set aside a day to be known as 'American Indian Day'

"Whereas the American Indian is the original American and has resided on this continent since time immemorial; and

"Whereas the American Indian has made outstanding contributions to our American way of life and has given us many products which have today become multibillion-dollar American industries; and

"Whereas the State of New Mexico has recognized this contribution by establishing a State 'Indian Day' during the annual New Mexico State fair in tribute to the role that the New Mexican Indian has played in our State and national life: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be respectfully petitioned to enact enabling legislation to set aside a day to be designated as 'American Indian Day,' and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, to the Speaker of the House of Representatives of the Congress of the United States, and to each member of the New Mexico delegation of the National Congress."

Five joint resolutions of the Legislature of the State of New Mexico; to the Committee on Labor and Public Welfare:

"HOUSE JOINT MEMORIAL 10

"Joint memorial asking the Secretary of Labor, the Attorney General, and the Congress of the United States to examine and correct the acute wage and unemployment condition in the construction industry in Dona Ana County resulting from an influx of nonresident alien commuter workers

"Whereas there is a minimum of 100 workers engaged in construction work in Dona Ana County who are commuting daily from Ciudad Juarez, Mexico, most of whom are nonresident aliens who have stated to the Immigration and Naturalization Service their intentions to become citizens but who apparently have abandoned their plans to establish residence in the United States; and

"Whereas employment of these nonresident alien commuter workers in the construction industry in Dona Ana County has created a definite adverse effect on the wages paid to local construction workers as well as an acute unemployment problem: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Secretary of Labor, the Attorney General, and the Congress of the United States be asked to examine the present Federal laws and regulations with respect to nonresident alien commuters, make necessary changes and require proper enforcement to the end that the conditions in Dona Ana County are corrected; and be it further

"Resolved, That copies of this joint memorial be sent to the Secretary of Labor, the Attorney General, and to the Members of the New Mexico delegation in the Congress of the United States."

"HOUSE JOINT MEMORIAL 21

"Joint memorial memorializing the Congress of the United States to establish and maintain a domiciliary for disabled veterans in New Mexico

"Whereas the growing disabled veteran population in New Mexico, and the increasing age of these veterans makes some action necessary, if we are to properly care for these citizens who have served their country with unselfish devotion; and

"Whereas there exists at the present time no facility for the care of disabled veterans in New Mexico; and

"Whereas the cost of maintaining such disabled veterans in a treatment institution is much greater thar it would be in a domiciliary: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States is memorialized to establish and maintain in New Mexico a domiciliary for disabled veterans; and be it further

"Resolved, That copies of this memorial be sent to the congressional delegation from New Mexico."

"HOUSE JOINT MEMORIAL 27

"Joint memorial to Congress concerning the distribution of Federal funds to public schools

"Whereas Federal funds appropriated by Congress for use by local public schools in New Mexico constitute an important factor in the budgetary planning of the affected recipient schools; and

"Whereas because of the unpredictable manner in which such funds are presently distributed by the Federal agency concerned it becomes impossible for the local school district to properly anticipate and budget for such funds; and

"Whereas present practice of the Federal Government is to pay only 80 percent of the entitlement to these schools despite urgent needs for the full amount of the entitlement: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be respectfully petitioned to give serious consideration to:

"A. Establishing a predictable method of distribution of Federal funds to enable recipient school districts to more accurately plan and budget for these funds; and

"B. To provide for payment to public schools 100 percent of the entitlement in lieu of the present policy of paying only 80 percent of entitlement; and be it further

"Resolved, That the chief clerk of the house of representatives send duly authenticated copies of this memorial to each member of the New Mexico congressional delegation and to the President of the United States."

"HOUSE JOINT MEMORIAL 44

"Joint memorial memorializing the Congress of the United States to provide a minimum program activities budget for the Division of Indian Health's 1962 fiscal year operations

"Whereas the New Mexico State Legislature is cognizant of the great progress in Indian health programs since the transfer of Indian health responsibility from the Bureau of Indian Affairs to the U.S. Public Health Service; and

"Whereas the Indians of New Mexico, as well as other Indians, are aware of the dire need which exists for safe and adequate domestic water supplies and sewerage facilities in the Indian communities so that sickness and death may be prevented on Indian reservations utilizing modern sanitation and health practices; and

"Whereas the Indians are desirous of obtaining such sanitation facilities in order that they may improve their health standards and personal hygiene: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That it hereby declares its support of the program being pursued under the act of July 3, 1959 (Public Law 86–121, 73 Stat. 267) to provide improved sanitation and water facilities for Indian lands and communities, and that the Congress of the United States is respectfully urged to provide a minimum program activities budget for the Division of Indian Health's 1962 fiscal year operations for Indian homes, communities, and lands as authorized under the Sanitations Facilities Act (Public Law 86–121); and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, to each member of the New Mexico delegation to the National Congress, to the Secretary of the Department of Health, Education, and Welfare, to the Surgeon General of the Public Health Service, and to the Commissioner of Indian Affairs."

"HOUSE JOINT MEMORIAL 45

"Joint memorial memorializing the Congress of the United States to expand and improve the vocational training program for Indians and to increase the appropriations accordingly

"Whereas Congress has appropriated funds for vocational training for Indians; and

"Whereas there exists a large potential number of applicants for such training which cannot be provided for because of limited funds; and

"Whereas the need for such training exists for Indians notwithstanding their residency; and

"Whereas the results of this program have significantly brought about a realistic approach to the problems of the young adult Indians: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be respectfully urged to expand and improve the vocational training program for Indians and that appropriations be increased accordingly. It is also urged that there shall not be permitted to exist any condition or priority to the receiving of such benefits which are based upon the residency of any otherwise eligible Indians; and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, the Secretary of Interior, the Commissioner of Indian Affairs and to each member of the delegation representing New Mexico in the National Congress."

A resolution of the House of Representatives of the State of New Mexico; to the Committee on Interior and Insular Affairs:

"HOUSE MEMORIAL 20

"Memorial to the Congress of the United States concerning the alcoholism problem among New Mexico Indians

"Whereas the uncontrolled drinking of alcoholic liquors and the increasing incidence of alcoholism among the Indian communities in New Mexico is of an extremely dangerous nature, threatening the survival of the way of life and patterns of culture of some 51,253 persons comprising the Indian population of this State; and

"Whereas the New Mexico Commission on Alcoholism is limited in its efforts to combat this problem by the amount of funds appropriated for its operations and will be limited for several years due to the current fiscal emergencies existing in this State, and

"Whereas the problems of the American Indian have historically come within the purview of Federal legislation: Now, therefore, be it

"Resolved by the house of representatives of the 25th legislature, That the Congress of the United States be urged to provide Federal funds, aid and assistance to combat the problem of alcoholism among the various Indian communities of New Mexico, and that the several Government agencies working in this field be urged to cooperate with the New Mexico Commission on Alcoholism, the Commissioner on Indian Affairs and other interested private organizations; and be it further

"Resolved, That copies of this memorial be transmitted to the Governor, the Commissioner of Indian Affairs, the Secretary of Interior and the New Mexico delegation in the Congress of the United States."

A resolution of the House of Representatives of the State of New Mexico; to the Committee on Public Works:

"HOUSE MEMORIAL 21

"Memorial petitioning the Governor of the State of New Mexico, the New Mexico U.S. Senators and Congressmen, the State highway commission and the Bureau of Public Roads to continue the present effort for the immediate construction of an overpass for the town of Gallup, N. Mex.

"Whereas ever since its incorporation in 1891, the town of Gallup, N. Mex., has been divided by the Atchison, Topeko & Santa Fe Railway Co., and

"Whereas for almost the same period of time an overpass has been needed by the residents and inhabitants of the town of Gallup, N. Mex. Such need has been recognized continually by the State highway department and State and Federal officials concerned for a number of years and has frequently been cited as the most critical and urgent traffic problem area in the State of New Mexico; and

"Whereas during the past several years the State highway commission through the State highway department and in cooperation with the Federal Bureau of Public Roads has determined and agreed upon the alinement of an interstate highway passing through the town of Gallup and of the construction in conjunction therewith of the above described needed overpass; and

"Whereas in accordance with the Federal law, a public hearing was held in the town of Gallup, N. Mex., on the 6th day of August 1959 advising its residents of the proposed alinement and design of the said throughway through Gallup and of the overpasses included therein. The people of Gallup attending such meetings approved such alinement and proposed design with a few minor exceptions; and

"Whereas the State highway department has now entered in a contract with a consulting engineer for the design and planning of such interstate throughway route including the proposed overpasses; said planning and design to cost approximately $260,000; and

"Whereas in anticipation of such eventual construction the town of Gallup has begun and is now in the process of doing certain urban renewal and other public development to provide for the orderly removal of the persons now living and residing within the proposed throughway right-of-way: Now, therefore, be it

"Resolved by the House of Representatives of the Legislature of the State of New Mexico, That the State highway commission through its State highway department and in cooperation with the Federal Bureau of Public Roads be respectfully requested and urged they continue their efforts along the lines mentioned above and following the completion of the design, now under contract, that the portion and segment of the said project providing an overpass for Gallup, be immediately let and contracted for the benefit of the residents of the town of Gallup, N. Mex., and of the State of New Mexico as a whole; and be it further

"Resolved, That the State highway commission through its State highway department and in cooperation with the Federal Bureau of Public Roads be respectfully requested and urged to agree that prior to completion of the proposed interstate throughway route through the town of Gallup, that the State highway department improve the existing U.S. Highway 66 within the corporate limits of the town of Gallup so as to make the existing U.S. Highway 66 route and the proposed interstate throughway route equally accessible and inviting to the traveling public; and be it further

"Resolved, That the State highway department is respectfully requested and urged to cooperate with the officials of the town of Gallup in providing and carrying out an orderly organized removal of the residents living in the right-of-way of the proposed interstate route such that the least amount of damage, inconvenience and harm be done; and be it further

"Resolved, That the State highway department is respectfully requested and urged to agree that the actual completion of the entire interstate throughway through the town of Gallup be carried out and completed as the very last phase of the Federal interstate project in the northwest portion of New Mexico; and be it further

"Resolved, That a copy of this memorial be sent to the Governor of the State of New Mexico, to the U.S. Congressmen and Senators of the State of New Mexico, to each of the State highway commissioners and to the division engineer of the Federal Bureau of Public Roads for the State of New Mexico."

RESOLUTION OF RED CREEK VALLEY GRANGE 1583, COOPERSTOWN, N.Y.

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Red Creek Valley Grange of Cooperstown, N.Y., protesting against any further increase in Federal automotive excise taxes, including the Federal tax on motor fuels.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the Federal Government is constantly reaching more and more into areas

formerly reserved to States for taxable income: Therefore be it

Resolved, That we the members of the Red Creek Valley Grange go on record as opposing any further increase in Federal automotive excise taxes including Federal tax on motor fuels; and be it further

Resolved, That we oppose any attempt to extend beyond June 30, 1961, the temporary increase of 1 cent per gallon on motor fuels enacted by Congress in 1959; and also be it further

Resolved, That copies of this resolution be sent to the President of the United States, to our Senators and Representatives in Congress.

RESOLUTION OF COMMON COUNCIL OF CITY OF BUFFALO, N.Y.

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Common Council of the City of Buffalo, N.Y., favoring the abolition of the 10-percent excise tax on motor vehicles.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas within the city of Buffalo and the Niagara Frontier area there are several automobile factories or assembly plants which are a vital part of the American automobile industry which industry is one of the cornerstones of our American economy; and

Whereas since the Korean war, there has been imposed upon the automotive industry, a 10-percent Federal excise tax levied against motor vehicles manufactured in this country, which excise tax was levied as a temporary measure during the Korean war to slow down automobile production; and

Whereas there are many automobile plants temporarily closed and many automotive employees are out of work adding to our large unemployment rolls and enlarging our depressed areas; and

Whereas there is before the present session of Congress a bill, House bill 3647, which bill would abolish the 10-percent Federal excise tax on American manufactured motor vehicles and that the passage of said House bill will certainly spur and aid our local economy as well as the national economy: Now, therefore, be it

Resolved, That the Common Council of the City of Buffalo memorialize the President of the United States and the Congress of the United States to act as expediently as possible for the passage of House bill 3647; and be it further

Resolved, That the city clerk be authorized and directed to forward certified copies of this resolution to the President, the clerks of the U.S. Senate and House of Representatives, and to the two U.S. Senators from New York State and to each of the U.S. Representatives representing any part of the city of Buffalo.

ALASKA AMERICAN LEGION DEPARTMENT URGES PASSAGE OF COLD WAR VETERANS GI BILL

Mr. YARBOROUGH. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the American Legion, Department of Alaska, urging passage of the cold war veterans GI bill.

This resolution, signed by Alaska Legion Commander Richard I. Eliason, recognizes that Alaska's very capable and distinguished Senator, ERNEST GRUENING, is one of the sponsors of S. 349.

I would like to call to the attention of the Senate the fact that Senator GRUENING was among the first witnesses to appear before the Senate Veterans' Affairs Subcommittee to testify for the bill. He made a stirring plea for passage of the cold war GI bill as an act of justice, saying:

Men now drafted into the Armed Forces are still in need of assistance in obtaining an education which will prepare them for the careers of their choice. Men whose service has been required during the period since the Korean conflict should not be discriminated against with respect to Government assistance for education merely because of the dates during which they served.

It is encouraging to see that the American Legion of his State recognize and appreciate the work Senator GRUENING is doing on behalf of veterans. I ask unanimous consent to have the resolution printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas, Senator ERNEST GRUENING is one of the sponsors of S. 349, entitled "Veterans Readjustment Assistance Act of 1961," to provide readjustment assistance for post-Korean war veterans who served on active duty in the Armed Forces after January 31, 1955; and

Whereas approximately 600 Alaska veterans would be entitled to educational and vocational training assistance and for Federal loan assistance in the purchase of homes and farms under the provisions of S. 349: Now, therefore, be it

Resolved, That the American Legion, Department of Alaska, does hereby endorse S. 349 and urge its passage without delay; and further

Resolved, That Senator ERNEST GRUENING be, and he hereby is, commended for his interest and efforts on behalf of the veterans of Alaska; and further

Resolved, That copies of this resolution be sent to the President of the U.S. Senate, the Speaker of the U.S. House of Representatives and to the Honorable ERNEST GRUENING, Senator from Alaska.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations, without amendment:

S. 1358. A bill to repeal section 12 of the act of June 26, 1884, prohibiting a charge or collection of fees by consular officers for official services to American vessels and seamen, and to repeal the provision of the act of June 4, 1920, authorizing the free issuance of passports to seamen (Rept. No. 88).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 126. A bill for the relief of Edward W. Scott III (Rept. No. 90);

S. 132. A bill for the relief of Man-Yeh Chow (Rept. No. 91);

S. 164. A bill for the relief of Cherie Helen Bratton (Rept. No. 92);

S. 217. A bill for the relief of Alessandro Gellhorn (Rept. No. 93);

S. 225. A bill for the relief of Dr. Chien Chen Chi (Rept. No. 94);

S. 262. A bill for the relief of Constantinos Georgiou Stravropoulos (Rept. No. 95);

S. 285. A bill for the relief of Alpo Fransila Crane (Rept. No. 96);

S. 292. A bill for the relief of Mah Jew Ngee (also known as Peter Jew Mah) (Rept. No. 97);

S. 298. A bill for the relief of Earl H. Pendell (Rept. No. 98);

S. 330. A bill for the relief of Harry N. Kouniakis (Rept. No. 99);

S. 417. A bill for the relief of Haruo T. Hendricks (Rept. No. 100);

S. 423. A bill for the relief of Fotios Gianoutsos (Frank Giannos) (Rept. No. 101);

S. 438. A bill for the relief of Mrs. Maria Giovanna Hopkins (Rept. No. 102);

S. 444. A bill for the relief of Ok Hi Shin and Tae Soo Chung (Rept. No. 103);

S. 533. A bill for the relief of Irene Maria Koller (Rept. No. 104);

S. 593. A bill for the relief of Hans Christian Gunnar Mikkelsen (Rept. No. 105);

S. 696. A bill for the relief of Angel Ardaiz Martinez (Rept. No. 106);

S. 697. A bill for the relief of Maria Luisa Martinez (Rept. No. 107);

S. 713. A bill for the relief of Anastasia Stassinopoulos (Rept. No. 108);

S. 894. A bill for the relief of Captain Ernest Mountain (Rept. No. 109);

S. 939. A bill for the relief of Zlata Dumlijan and Djuro (George) Kasner (Rept. No. 110); and

S. 1097. A bill for the relief of A. E. Waterstradt (Rept. No. 111).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

S. 118. A bill for the relief of Helen Irma Imhoof (Rept. No. 113);

S. 139. A bill for the relief of Krste Angeloff (Rept. No. 114);

S. 274. A bill for the relief of Hajime Asato (Rept. No. 115);

S. 277. A bill for the relief of Erica Barth (Rept. No. 116);

S. 313. A bill for the relief of Ante Tonic (Tunic), his wife, Elizabeth Tunic, and their two minor children, Ante Tunic, Jr., and Joseph Tunic (Rept. No. 117);

S. 532. A bill for the relief of Stanley Bulski (Zdzislaw Rekosz) (Rept. No. 118);

S. 545. A bill for the relief of Mrs. Elizabeth Clifford (Rept. No. 119); and

S. 555. A bill for the relief of Nicolaos A. Papadimitriou (Rept. No. 120).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 138. A bill for the relief of Mico Delic (Rept. No. 121);

S. 177. A bill for the relief of Hadji Benlevi (Rept. No. 122);

S. 546. A bill for the relief of In Fil Chung, In Ae Chung, In Sook Chung and In Ja Chung (Rept. No. 123); and

S. 663. A bill for the relief of Andreas Rakintzis (Rakajes) (Rept. No. 124).

By Mr. KEATING, from the Committee on the Judiciary, without amendment:

S. 178. A bill for the relief of Michael J. Collins (Rept. No. 112).

REPORT OF A COMMITTEE ON UTILIZATION OF FOREIGN CURRENCIES AND U.S. DOLLARS

Mr. HAYDEN. Mr. President, in accordance with the Mutual Security Act of 1954, as amended, I ask unanimous consent to have printed in the RECORD the report of the Committee on the Judiciary concerning the foreign currencies and U.S. dollars utilized by the committee in 1960 in connection with foreign travel.

There being no objection, the report was ordered to be printed in the RECORD.

Report of expenditure of foreign currencies and appropriated funds by the Committee on the Judiciary, U.S. Senate, expended between Jan. 1 and Dec. 31, 1960

MARCH 23, 1961.

JAMES O. EASTLAND,
Chairman, Committee on the Judiciary.

REPORT ENTITLED "SMALL BUSINESS EXPORTS AND THE WORLD MARKET" (S. REPT. NO. 89)

Mr. SPARKMAN. Mr. President, I am pleased to file today a unanimous report of the Committee on Small Business entitled "Small Business Exports and the World Market." The report contains the committee's conclusions and recommendations from its study last year of problems and oportunities of small business in exporting. The study included hearings by special panels of the committee in New York, New Orleans, and San Francisco.

Another outcome of the committee's study, Mr. President, was the bill I introduced last Monday, March 20, with every member of the committee as cosponsor. That bill, S. 1379, and the report I am filing today, both emphasize, as the basic need for expansion of exports by American small business, an improved, strengthened, more comprehensive system of export credit guarantees.

The bill would direct the implementation of the first and foremost recommendation of this report: a strengthened export-credit-guarantee program in the Export-Import Bank.

In filing the National Export Policy Act of 1961, S. 1379, I remarked:

I am personally persuaded that the Bank has the statutory authority now to set up the improved and expanded export-credit-guarantee facilities contemplated by this bill, and it is my hope that it will not await the passage of new legislation to exercise the authority.

I went on to say that the purpose of the bill was to make it unmistakably clear that Congress intends for the authority already possessed by the Bank to be used in a way that will place U.S. exporters in a position of complete equality with their competitors in other exporting nations, insofar as their ability to offer credit to their customers is concerned.

I am indeed happy to observe that the foremost recommendation of this report—improved export credit facilities—appears already to have been implemented in whole or substantial part by

the Export-Import Bank, even before the report is filed.

I have not yet had an opportunity to study in detail the new program announced by the Bank last Friday, but the newspaper accounts indicate that it is extremely close to the program contemplated by the report I am filing today and the bill I filed last Monday on behalf of the Senate Small Business Committee.

I am glad that the committee's hearings and other work in this vital area have had some influence and have been of some help in encouraging steps toward the reform which, at the committee's hearings, was noted most frequently by most people to be urgently needed. I congratulate the Export-Import Bank and its new president, Harold F. Linder, on the forward-looking program they have decided to initiate.

I should like to express my appreciation and that of the committee to the members who conducted the hearings at the Nation's principal ports late last year.

Senators HARRISON A. WILLIAMS, JR., of New Jersey, and JACOB K. JAVITS, of New York, were the cochairmen, and Senator JENNINGS RANDOLPH, of West Virginia, was the other member of the hearings panel at New York City on November 17.

Senator RUSSELL B. LONG, of Louisiana, as chairman, and Senator RANDOLPH conducted the hearing at New Orleans on December 9.

Senator CLAIR ENGLE, of California, as chairman, and Senators E. L. BARTLETT, of Alaska, and RANDOLPH were the panel in San Francisco on December 14.

The committee is also indebted to the large number of witnesses from Government, industry, and commerce whose testimony made the hearings so interesting and the printed hearing transcript, which is available from the committee, so valuable a document.

Mr. President, I submit the report of the committee, and ask that it be printed. I hope Senators will read the report and will also study the provisions of the bill to which I referred, S. 1379, which was introduced last Monday.

Mr. JAVITS. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. The Senator from Arizona has the floor.

Mr. JAVITS. Mr. President, will the Senator from Arizona yield to permit me to make a brief comment?

Mr. HAYDEN. I yield.

Mr. JAVITS. I think the report which has just been filed by the distinguished Senator from Alabama, the chairman of the Committee on Small Business, in relation to exports characterizes for us one of the most striking aspects of our national economic life. We are all talking about utilizing to the full the productive facilities which we have; but in the hearings before the Joint Economic Committee this morning the Director of the Bureau of the Budget himself had to admit that this is an aspiration; that no one has studied to implement it.

For example, we need enormous quantities of raw materials, most of which we import from abroad, in order that our productive machine may increase its output. It is not simply a question of our having everything we need in this country, making the products, and letting our people enjoy them. If that were so, it would be wonderful. So I think there is being placed before us one of the really fundamental issues in our Government. It will take a high order of patriotism for all of us to keep the balance as between imports and exports.

I think it is extremely important, therefore, to show, as we are showing in the report from the Committee on Small Business, the stake of small business itself in the expansion of the overseas markets of the United States. Many of us talk about the millions of people engaged in production for export. We talk about the raw materials we have to buy throughout the world. We talk about the need for a large balance, in terms of our trade, to help us with our difficulties in international payments. But all that does not become concrete for the businessman until he sees what is at stake for him, as shown by the report which has just been filed by the distinguished Senator from Alabama. I think a really national service is being performed in the development and issuance of this document.

Mr. SPARKMAN. Mr. President, this is another unanimous report on the part of the Committee on Small Business.

The PRESIDING OFFICER (Mr. METCALF in the chair). The report will be received and printed.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BUTLER:

S. 1435. A bill to amend the Internal Revenue Code of 1954 so as to allow a deduction for certain amounts paid by a taxpayer for nonmedical care of a dependent who is disabled; to the Committee on Finance.

(See the remarks of Mr. BUTLER when he introduced the above bill, which appear under a separate heading.)

By Mr. GOLDWATER:

S. 1436. A bill to amend the provisions of title 18 of the United States Code relating to offenses committed in Indian country; to the Committee on the Judiciary.

S. 1437. A bill to provide for the relocation and reestablishment of the members of the Papago Indian Tribe inhabiting the village of Sil Murk, which adjoins the Gila Bend Indian Reservation; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. GOLDWATER when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. JAVITS:

S. 1438. A bill to provide for posting information in post offices with respect to registration and voting, and for other purposes; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. JAVITS when he introduced the above bill, which appear under a separate heading.)

By Mr. MANSFIELD (for himself and Mr. METCALF):

S. 1439. A bill for the relief of Sylvia Freda Karro and her three minor children, Allan Karro, Jennifer Karro, and Michelle Karro; to the Committee on the Judiciary.

By Mr. MAGNUSON (by request):

S. 1440. A bill to amend the act approved July 14, 1960 (74 Stat. 526), relating to the establishment of a register in the Department of Commerce of certain motor vehicle operators' licenses; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. CHAVEZ:

S. 1441. A bill for the relief of Cilka Elizabeth Ingrova; to the Committee on Labor and Public Welfare.

By Mr. JOHNSTON:

S. 1442. A bill for the relief of Anna B. Dreyspring; to the Committee on the Judiciary.

By Mr. ELLENDER:

S. 1443. A bill for the relief of Mrs. Tyra Fenner Tynes; to the Committee on the Judiciary.

By Mr. SPARKMAN:

S. 1444. A bill for the relief of the next of kin of certain merchant seamen who lost their lives in an airplane crash; to the Committee on the Judiciary.

By Mr. BYRD of West Virginia:

S. 1445. A bill to stimulate the Nation's economic growth through accelerated natural resources development, and for other purposes; to the Committee on Agriculture and Forestry.

By Mrs. SMITH of Maine (by request):

S. 1446. A bill to provide for the adjustment of periods of military leave granted to Federal officers and employees; to the Committee on Armed Services.

By Mr. BEALL:

S. 1447. A bill to amend the District of Columbia Teachers' Salary Act of 1955, as amended; to the Committee on the District of Columbia.

By Mr. KEATING:

S. 1448. A bill for the relief of Pietro Pirri; to the Committee on the Judiciary.

By Mr. ALLOTT:

S. 1449. A bill for the relief of Col. Charles D. Wiegand; to the Committee on the Judiciary.

By Mrs. NEUBERGER:

S. 1450. A bill for the relief of Shim Dong Nyu (Kim Christine May); to the Committee on the Judiciary.

By Mr. DIRKSEN:

S.J. Res. 68. Joint resolution providing for the designation of the week commencing October 1, 1961, as "National Public Works Week"; to the Committee on the Judiciary.

(See the remarks of Mr. DIRKSEN when he introduced the above joint resolution, which appears under a separate heading.)

By Mr. DIRKSEN (by request):

S.J. Res. 69. Joint resolution establishing a National Shrine Commission to select and procure a site and formulate plans for the construction of a permanent memorial building in memory of the veterans of the Civil War; to the Committee on Rules and Administration.

(See the remarks of Mr. DIRKSEN when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTION

CHANGE OF NAME OF COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO COMMITTEE ON COMMERCE

Mr. MAGNUSON submitted the following resolution (S. Res. 117); which was referred to the Committee on Rules and Administration:

Resolved, That paragraphs (1) (j) and (4) of rule XXV of the Standing Rules of the

Senate are each amended by striking out "Committee on Interstate and Foreign Commerce" and inserting in lieu thereof "Committee on Commerce".

TAX DEDUCTIONS FOR AID TO DISABLED DEPENDENTS

Mr. BUTLER. Mr. President, I introduce, for appropriate reference, a bill to amend the Internal Revenue Code of 1954 so as to allow a deduction for certain amounts paid by a taxpayer for nonmedical care of a dependent who is disabled.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1435) to amend the Internal Revenue Code of 1954 so as to allow a deduction for certain amounts paid by a taxpayer for nonmedical care of a dependent who is disabled, introduced by Mr. BUTLER, was received, read twice by its title, and referred to the Committee on Finance.

Mr. BUTLER. Mr. President, in recent years we have heard much about medical care for the aged. Currently, as we all know, the controversy is raging again. Shall medical care be placed under social security with compulsory participation, or shall it remain where it was placed by the Kerr-Mills bill—under the control of the State with participation being noncompulsory?

I will not, at this time, go into the merits of either of those measures except to point out that there is at least one situation which is not provided for by either of them. That is the case where care—not necessarily medical—is needed for the very aged. Such may come about as the result of senility or, perhaps, immobility caused by old age as well as by other causes. In some cases this necessitates personal care at home with a companion in attendance; in others it necessitates full time confinement to a nursing, old persons, or other type of institution not a hospital.

Under the present Internal Revenue Code expenses incurred as the result of such care are not deductible because they are not medical expenses within the scope of definition contained therein.

Often, such expenses are prohibitive and fall upon the aged individuals' married children to absorb. The children more often than not have their own families to support and can ill afford another expenditure which often adds up to $200 or $300 per month.

I think that the least that can be done is to allow a tax deduction, within limitations, for amounts thus expended on behalf of qualified dependents, and I intend to introduce at this time a bill which will so provide.

The problem is not limited to the aged, however. There are cases in which children become afflicted at a very early age with a permanent disablement, and, as a result, a constant companion is required. In some cases, the expenses thus incurred are not properly deductible for Federal income tax purposes.

Thus, my bill will provide similar relief to taxpayers incurring such expenses on behalf of qualified dependents regardless of age. It will permit a maximum deduction of $300 per month for the number of months personal institutional care is required. This amount will be reduced, however, by the amount which a married taxpayer's income exceeds $20,000, and by that amount which a single taxpayer's income exceeds $10,000.

The bill is careful in specifying that only expenditures made on behalf of "disabled dependents" as defined therein will be deductible. A "disabled dependent" is defined as an individual who "by reason of any medically determinable physical or mental impairment which can be expected to result in death or to be of long-continued and indefinite duration, is incapable of caring for himself or is dangerous to himself or others if left alone." Proof of such disability must, of course, be supplied.

Mr. President, I know there are many taxpayers who find themselves burdened with this type of nondeductible expense. Passage of this bill will most assuredly be of great assistance to them. On the other hand, the net revenue loss to the Government will be minimal. I therefore see little reason why favorable action should not be taken and the provisions of this bill made part of our internal revenue law.

RELOCATION OF PAPAGO INDIAN VILLAGE OF SIL MURK

Mr. GOLDWATER. Mr. President, I introduce, for appropriate reference, a bill to provide for the relocation and reestablishment of the members of the Papago Indian Tribe inhabiting the village of Sil Murk, which adjoins the Gila Bend Indian Reservation. I ask unanimous consent to have the bill printed in the RECORD, together with an announcement, prepared by me, relating to the bill.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and announcement will be printed in the RECORD.

The bill (S. 1437) to provide for the relocation and reestablishment of the members of the Papago Indian Tribe inhabiting the village of Sil Murk, which adjoins the Gila Bend Indian Reservation, introduced by Mr. GOLDWATER, was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Chief of Engineers, Department of the Army, is authorized to take such action as may be necessary to effect the relocation and reestablishment of the members of the Papago Indian Tribe inhabiting the village of Sil Murk, which adjoins the Gila Bend Indian Reservation, to a nearby site within the boundaries of such Reservation, or to a site to be purchased by the Department of the Army for this purpose, such relocation and reestablishment having been made necessary as a result of the Painted Rock Dam and Reservoir Project authorized by the Act of May 17, 1950 (64 Stat. 163).

SEC. 2. (a) In effecting the relocation and reestablishment authorized by the first section of this Act, the Chief of Engineers shall take such action as will assure, to the extent feasible, that the economic, social, religious, and community life of the members of the Papago Indian Tribe inhabiting the village of Sil Murk shall be restored to a condition not less advantageous to such members than the condition which they enjoyed as inhabitants of the village of Sil Murk. Such action shall include, but shall not be limited to, the following:

(1) Providing a suitable replacement site (including the clearing and grading of such site), within the boundaries of the Gila Bend Indian Reservation, or on a purchased site, on which to relocate and reestablish such members;

(2) Providing for the relocation and reestablishment, on the site provided in accordance with paragraph (1) of this subsection, of the cemetery of such members, situated within the area comprising the village of Sil Murk, or in the alternative protect the existing cemetery from flooding by means of earth dikes or other suitable protective devices; and

(3) Providing for the establishment, on the site provided in accordance with the provisions of paragraph (1) of this subsection, of (A) a building to serve as a replacement for the church of such members; (B) living quarters for such members; (C) water wells; (D) a water distribution system (including distribution lines); (E) sewerage facilities; (F) roads; and (G) such other buildings, facilities and structures as may be necessary in order to carry out the provision of this Act.

(b) The Chief of Engineers is authorized to transfer, without consideration, all right, title, and interests of the United States in and to all buildings, structures, facilities, improvements, and other property provided by him, in accordance with the provisions of this Act, to the United States of America in trust for the Papago Indian Tribe. The members of the Papago Indian Tribe who are relocated and reestablished pursuant to the provisions of this Act shall have an interest in such buildings, structures, facilities, improvements, and property so provided comparable to that which they had as inhabitants of the village of Sil Murk in comparable properties in such village.

SEC. 3. As a condition of the rebuilding and relocation of the said village of Sil Murk the Papago Tribe shall by appropriate resolution quit-claim and release to the United States whatever interest the said tribe may have in the site of the present village of Sil Murk.

SEC. 4. There are authorized to be appropriated such sums, not to exceed in the aggregate $269,500, as may be necessary to carry out the provisions of this Act.

The announcement presented by Mr. GOLDWATER is as follows:

Senator BARRY GOLDWATER today introduced in the Senate a bill to enable the Corps of Engineers to relocate the Papago Indian village of Sil Murk, which must be moved to higher ground as the village now lies within the Painted Rock Dam and Reservoir project. The bill will provide substantive legislation for the Corps of Engineers to make this relocation and will make available additional funds for this purpose not to exceed $269,500.

Senator GOLDWATER said the new site would provide a building to serve as a replacement for the church for the Indian families being relocated, living quarters and water wells for them, and would also provide that the present cemetery would either be relocated or, if not moved, protected from floods by means of earth dikes or other suitable protective devices.

The Department of the Interior and the Corps of Engineers have cooperated, thoroughly studying this need and this bill is the result of their recommendations.

DISPLAY OF VOTING, REGISTRATION, AND ELECTION INFORMATION BY U.S. POST OFFICES

Mr. JAVITS. Mr. President, I introduce, for appropriate reference, a bill to require U.S. post offices to prominently display voting, registration, and election information. The bill is also being introduced in the House by Representative EDWIN B. DOOLEY, of New York.

Although a record 68,832,818 persons voted in the 1960 presidential election, they represented only 64.3 percent of the total civilian voting population. An estimated 20 million persons were not eligible to vote for various reasons. But more than 15,500,000 persons actually eligible to vote did not do so. In congressional elections, this total is usually more than twice that number. It is clear we need to do everything we can to stimulate citizen participation in government and in elections. There are more than 35,000 post offices in the United States and they are visited daily by millions of Americans. There is no more practical place to post voter information than the U.S. post office.

This bill would require each post office to post information on the qualifications for registration and voting; the places, dates, and times for registration and voting at elections in the area served by such post office. The names and office addresses of the U.S. Senators from the State and the Representatives from the congressional district in which the post office is situated would also be posted.

In anticipation of the passage of the constitutional amendment giving the District of Columbia the right to vote, the bill provides that post offices in the District would also be required to post the voter information.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1438) to provide for posting information in post offices with respect to registration and voting, and for other purposes, introduced by Mr. JAVITS, was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

REGISTER OF CERTAIN MOTOR VEHICLE OPERATORS' LICENSES IN DEPARTMENT OF COMMERCE

Mr. MAGNUSON. Mr. President, by request of the Secretary of Commerce, I introduce, for appropriate reference, a bill to amend the act approved July 14, 1960 (74 Stat. 526) relating to the establishment of a register in the Department of Commerce of certain motor vehicle operators' licenses. I ask unanimous consent that the letter from the Secretary requesting the proposed legislation be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately refered; and, without objection, the letter will be printed in the RECORD.

The bill (S. 1440) to amend the act approved July 14, 1960 (74 Stat. 526) relating to the establishment of a register in the Department of Commerce of certain motor vehicle operators' licenses, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

THE SECRETARY OF COMMERCE,
Washington, D.C., March 21, 1961.

The Honorable the PRESIDENT OF THE SENATE,
Washington, D.C.

DEAR MR. PRESIDENT: The Department of Commerce submits herewith as a part of its legislative program for the 87th Congress, 1st session, a draft bill entitled "To amend the act approved July 14, 1960 (74 Stat. 526) relating to the establishment of a register in the Department of Commerce of certain motor vehicle operators' licenses."

Under the provisions of the act approved July 14, 1960 (74 Stat. 526), the Secretary of Commerce was directed to establish and maintain a register containing the name of each individual reported to him by a State, or political subdivision thereof, as an individual with respect to whom such State or political subdivision has revoked a motor vehicle operator's license or permit because of (1) driving while intoxicated, or (2) conviction of a violation of a highway safety code involving loss of life. Such register shall also contain other information deemed appropriate by the Secretary to carry out the purposes of the act. The Secretary, at the request of any State, or political subdivision thereof, is required to furnish information contained in the register with respect to any individual applying for a motor vehicle operator's license in that State or political subdivision.

Necessary initial action in connection with the establishment of this register was taken shortly after enactment of the 1960 act. The register is designed to serve as a clearinghouse of information to identify for a State those motor vehicle drivers whose licenses have been revoked under the laws of other States because of driving while intoxicated or conviction of a traffic violation resulting in loss of life. The register will be operated as a voluntary State-Federal enterprise. It was recognized at the outset that one problem to be faced was that motor vehicle driver licensing, including revocation and suspension requirements and practices, is handled in a variety of ways by the States. State laws differ quite widely, in fact, with respect to the meaning and effect of the term "revoked." State laws also vary in terminology and effect where intoxicated or drinking drivers are concerned, as well as in other respects having a bearing upon the administration of the act.

A preliminary survey of State laws and practices has revealed that many States will not be able to participate in this national register because of certain limiting language found in the laws of the State. For example, many States do not provide for revocation of motor vehicle operators' licenses under the two conditions set forth in the act, but do provide for suspension of licenses for varying periods of time, in some cases for more than a year, depending upon the severity or repetition of the offense involved. Under the present language of the 1960 act such a State could not participate in furnishing information to the register because of the phraseology of its own laws. It is recommended, therefore, that consideration be given to striking the phrase "revoked a motor vehicle operator's license or permit" where it appears in the first sentence of section 1 of the act and substituting in lieu thereof the phrase "terminated or temporarily withdrawn an individual's license or privilege to operate a motor vehicle." Such an amendment would permit additional States to participate in this program and would more effectively reflect the intent of Congress in enacting the original enabling legislation.

For reasons of clarification and in order that the register may carry out the broad purposes of the legislation, it is also recommended that the conditions enumerated in section 1 of the act be slightly revised in broader terms to take into account the differences in State laws and practices.

The amendments recommended herein are principally technical in nature. The basic policies considered by the Congress in enacting the original legislation would not be affected. Said amendments are proposed as a result of a conference of representatives of State Motor Vehicle Administrators, the American Association of Motor Vehicle Administrators, the American Bar Association, the Traffic Institute of Northwestern University and the Bureau of Public Roads of this Department. We believe that enactment of these amendments would facilitate administration of the act as well as increase the effectiveness of the register itself. The enclosed draft bill is designed to accomplish the recommendations contained herein.

The Department of Commerce, therefore, recommends enactment of the enclosed draft bill.

We have been advised by the Bureau of the Budget that there is no objection to the presentation of this report from the standpoint of the administration's program.

Sincerely yours,

LUTHER H. HODGES,
Secretary of Commerce.

NATIONAL PUBLIC WORKS WEEK

Mr. DIRKSEN. Mr. President, I introduce, for appropriate reference, a joint resolution to authorize and request the President to issue a proclamation designating the 7-day period commencing October 1, 1961, as National Public Works Week, and calling upon the people of the United States to celebrate such week with appropriate activities and ceremonies.

The establishment of National Public Works Week will be an effective means of explaining the role that public works engineering and administration play in the lives of every American family, particularly those living in urban communities. Due to the vital nature of public works and their importance to most Americans, mass media can be expected to help carry their message to their respective audiences.

The designation of a Public Works Week will focus attention on the public works program whose services are dedicated to the health and well being of the citizens of the Nation. It is felt that this program will help to arouse an interest in the young people of the nation to pursue careers in the public service, inasmuch as that service needs topflight men of imagination, vision, and foresight in the field of public works.

Kiwanis clubs all over the country, having a basic interest in public works, enthusiastically sponsor and endorse this joint resolution. Kiwanis International, to encourage participation in this week, will have its clubs sponsor recognition luncheons for the public-works engineers and administrators in their respective communities. These clubs also have plans to select the top ten public works men of the year, and to announce the names of these men during the National Public Works Week.

Members of the Federal, State, and local units of government who are responsible for, and design, build, operate,

and maintain public services and facilities essential to serve the citizens of this Nation, certainly deserve recognition for their outstanding contributions to our health, safety, and general welfare.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 68) providing for the designation of the week commencing October 1, 1961, as "National Public Works Week", introduced by Mr. DIRKSEN, was received, read twice by its title, and referred to the Committee on the Judiciary.

CONSTRUCTION OF PERMANENT BUILDING IN MEMORY OF VETERANS OF CIVIL WAR

Mr. DIRKSEN. Mr. President, I have been asked by some of the local citizens to introduce proposed legislation to establish a national shrine commission to select and procure a site and to formulate plans for the construction of a permanent building in memory of the veterans of the Civil War. In pursuance of that request, I introduce a joint resolution, and ask that it be appropriately referred.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 69) establishing a national shrine commission to select and procure a site and formulate plans for the construction of a permanent memorial building in memory of the veterans of the Civil War, introduced by Mr. DIRKSEN, by request, was received, read twice by its title, and referred to the Committee on Rules and Administration.

PERMISSION FOR RAILROAD CORPORATIONS TO TAKE ADVANTAGE OF CERTAIN TAX RELIEF MEASURES — ADDITIONAL COSPONSOR OF BILL

Mr. JAVITS. Mr. President, on January 30, 1961, I introduced S. 658, to amend the Internal Revenue Code of 1954 so as to permit railroad corporations to take full advantage of tax relief measures enacted or granted by the States and their political subdivisions.

Such relief has been granted by a number of States, the latest of which is the action by the State of Connecticut to assist the continued operations of the New Haven Railroad and of the State of New York on tax remission and station maintenance. The Senator from Connecticut [Mr. BUSH] has for a long time been deeply concerned with the problems faced by our commuter railroads, and has asked to join as a sponsor of this legislation, which relates so closely to the recent action by his State.

I therefore ask unanimous consent that the Senator from Connecticut [Mr. BUSH] may be joined as a cosponsor of S. 658, and that his name may appear on the next printing of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF INTERNAL REVENUE CODE OF 1954, RELATING TO ESTATE TAXES PAID TO STATES—ADDITIONAL COSPONSOR OF BILL

Mr. LONG of Missouri. Mr. President, I ask unanimous consent that on the next printing of the bill (S. 1344) to amend the Internal Revenue Code of 1954 to provide an increase in the amount for which a credit may be allowed against the Federal estate tax for estate taxes paid to States, introduced by the Senator from Maine [Mr. MUSKIE], my name may be added as cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF CONSTITUTION RELATING TO QUALIFICATIONS OF ELECTORS—ADDITIONAL COSPONSOR OF JOINT RESOLUTION

Mr. HOLLAND. Mr. President, I ask unanimous consent that the name of the junior Senator from Minnesota [Mr. MCCARTHY] be added, at the next printing, to the list of cosponsors of the resolution (S.J. Res. 58), which I introduced for myself and 64 other Senators, proposing an amendment to the Constitution of the United States, relating to the qualifications of electors.

The PRESIDING OFFICER. Without objection, it is so ordered.

ABOLITION OF MANDATORY CAPITAL PUNISHMENT IN DISTRICT OF COLUMBIA—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of March 20, 1961, the names of Mr. LONG of Missouri, and Mr. BUSH were added as additional cosponsors of the bill (S. 1380) to amend section 801 of the act entitled "An act to establish a code of law for the District of Columbia," approved March 3, 1901, introduced by Mr. KEATING (for himself and Mr. HARTKE) on March 20, 1961.

APPOINTMENT OF MEMBERS OF THE SPECIAL COMMITTEE ON AGING

The PRESIDING OFFICER. On behalf of the Vice President, the Chair announces the appointment of the following to be members of the Special Committee on the Aging: Senators MORSE, BIBLE, CLARK, CHURCH, RANDOLPH, MUSKIE, LONG of Missouri, SMITH of Massachusetts, CARLSON, BENNETT, BUSH, and KEATING.

NOTICE OF HEARING ON NOMINATION OF REYNALDO G. GARZA, TO BE U.S. DISTRICT JUDGE, SOUTHERN DISTRICT OF TEXAS

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Thursday, April 6, 1961, at 10:30 a.m., in room 2228, New Senate Office Building, on the nomination of Reynaldo G. Garza, of Texas, to be U.S. district judge for the southern district of Texas, vice James V. Allred, deceased.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

The subcommittee consists of the Senator from Texas [Mr. BLAKLEY], as chairman, the Senator from Nebraska [Mr. HRUSKA], and myself.

NOTICE CONCERNING CERTAIN NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

W. Arthur Garrity, Jr., of Massachusetts, to be U.S. attorney for the district of Massachusetts, for a term of 4 years, vice Elliot L. Richardson;

Raymond J. Pettine, of Rhode Island, to be U.S. attorney for the district of Rhode Island, for a term of 4 years, vice Joseph Mainelli;

John F. Quinn, Jr., of New Mexico, to be U.S. attorney for the district of New Mexico, for a term of 4 years, vice James A. Borland;

Olin N. Bell, of Missouri, to be U.S. marshal for the eastern district of Missouri, for a term of 4 years, vice Omar L. Schnatmeier; and

Anson J. Anderson, of North Dakota, to be U.S. marshal for the district of North Dakota, for a term of 4 years, vice Harry R. Tenborg.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Monday, April 3, 1961, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearings which may be scheduled.

NOTICE OF PUBLIC HEARING, MARCH 29, 1961, BY JOINT COMMITTEE ON ATOMIC ENERGY

Mr. PASTORE. Mr. President, on behalf of the Senate members of the Joint Committee on Atomic Energy, I wish to give notice that a public hearing has been scheduled for Wednesday, March 29, 1961, at 10 a.m., in the Old Supreme Court Chamber, room P-63, Capitol Building, to consider the nomination of Dr. Leland John Haworth, of New York, to be a member of the Atomic Energy Commission for the term expiring June 30, 1961, and thereafter for a term of 5 years expiring June 30, 1966.

I ask unanimous consent to have printed in the RECORD a biographical summary of Dr. Haworth's background which accompanied his nomination.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

BIOGRAPHICAL SUMMARY OF DR. LELAND J. HAWORTH

Born July 11, 1904, Flint, Mich.
Marital status: Widower; children, two.

Residence: Cliff Road, Belle Terre, Port Jefferson, N.Y.

Education: A.B., Indiana University, 1925; A.M., Indiana University, 1926; Ph. D., University of Wisconsin, 1931.

Experience: Director, Brookhaven National Laboratory, 1948 to present; president, Associated Universities, Inc., 1960 to present; member of the board of directors, Oak Ridge Institute for Nuclear Studies, 1959 to present; vice president, Associated Universities, Inc., 1951–60; assistant director, Brookhaven National Laboratory, 1947–48; professor of physics, University of Illinois, 1944–47, on leave from 1941 to 1945 doing war work at the Massachusetts Institute of Technology Radiation Laboratory; assistant professor physics, University of Illinois, 1939–44; associate in physics, University of Illinois, 1938–39; Lalor fellow in physical chemistry, MIT, 1937–38; instructor in physics, University of Wisconsin, 1930–37; high school teacher, Indianapolis, Ind., 1926–28.

Scientific advisor, President's Science Advisory Committee.

Affiliations: Member, National Science Foundation; member and Chairman (since 1954), Panel on High Energy Accelerators, National Science Foundation; member, Panel on High Energy Physics, President's Science Advisory Committee; member, board of directors, American Nuclear Society, 1955–60; president, American Nuclear Society, 1958–59; member, various panels and projects on scientific-military affairs.

Scientific specialty: Surface structure of metals, secondary electron emission, low temperature research, nuclear physics, high energy physics, especially very high energy accelerators, electronics.

Publications: Numerous scientific papers in above fields, author of several chapters of the MIT Radiation Laboratory series.

Honors and awards: President's Certificate of Merit, Phi Beta Kapa.

Memberships: American Physical Society, fellow; American Nuclear Society, fellow; New York Academy of Sciences, fellow; Sigma XI; Gamma Alpha.

Political affiliation: Republican.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD as follows:

By Mr. JORDAN:

Address delivered by Senator PASTORE before the American Cotton Manufacturers Institute, at Miami Beach, Fla., on March 25, 1961.

By Mr. DODD:

Address entitled "Where Is Ireland in the Fight for Freedom?" delivered at the 177th anniversary dinner of the Society of the Friendly Sons of St. Patrick, in New York, N.Y., on March 17, 1961.

Address delivered by the Honorable ROBERT C. BYRD, a U.S. Senator from the State of West Virginia, before the Knox County Democratic Women's Club, Knoxville, Tenn., March 19, 1961.

By Mr. WILEY:

Address by him over radio station WIND, Chicago, March 26, 1961.

BYELORUSSIAN INDEPENDENCE DAY

Mr. DIRKSEN. Mr. President, Byelorussian Independence Day is commemorated on March 25 of each year. The Byelorussian people gained their independence in 1918; but it was shortlived, for the Communist Soviet Union forced these brave people behind the Iron Curtain. The enslaved Byelorussians are looking to America and other free nations for moral support so needed in these trying times for nations under the dominance of the Communists. I hope the day will come when all freedom-loving people will be permitted self-rule.

I ask unanimous consent that a letter to me from Mrs. Vera Z. Romuk, secretary, Byelorussian-American Youth Organization in the State of Illinois, which clearly states the cause of the Byelorussians, and her attached statement be made a part of the RECORD.

There being no objection, the letter and the statement were ordered to be printed in the RECORD, as follows:

PEORIA, ILL., *March 22, 1961.*

Hon. EVERETT M. DIRKSEN,
U.S. Senate, Washington, D.C.

DEAR SENATOR DIRKSEN: On March 25 falls the 43d anniversary of the declaration of independence of Byelorussia and the Americans of Byelorussian descent in Illinois will observe this occasion with prayers for the Byelorussian people in their Communist occupied homeland and specially designed programs. We would also appreciate your mention of this day in Congress.

The Americans of Byelorussian descent feel that as long as the Byelorussian people are held captive in their homeland by the Communist tyrants and deprived of every humane right to their national life and particularly of observing the national holidays of utmost concern to them, it is our duty as their descendants to keep alive their traditions and preserve whatever we can of their national heritage until the day when freedom is again regained by them.

It is also our belief that by commemorating each year the declaration of Byelorussia's independence we can raise our voices in defense of the Byelorussian people and reassure them that we have not forgotten them and never agreed to their enslavement by Soviet Russia. Further, it is our belief that any considerations shown for the Byelorussian people on the day of special significance to them by members of our local, State, and National Governments would support even more our concern for them and have greater bearing upon them in their longing for freedom.

I am enclosing a brief outline on Byelorussia for your information. Thank you for your consideration of this matter.

Sincerely yours,

VERA Z. ROMUK,
Secretary, Byelorussian-American Youth Organization in the State of Illinois.

BYELORUSSIA AND THE BYELORUSSIANS

(By Vera Z. Romuk)

Byelorussia is not Russia but one of the Slavic countries in Eastern Europe. Byelorussia is one of several non-Russian Republics in the Soviet Union and is represented as a full-fledged member of the General Assembly in the United Nations.

The Byelorussian territory lies in the western part of the Soviet Union, bordering with Poland on the west, Lithuania and Latvia on the northwest and north, Russia on the northeast and east, and Ukraine on the south. Her capital is Miensk (Minsk in the Russian language).

Byleorussia is at least twice bigger in population than the three Baltic Republics—Lithuania, Latvia and Estonia—combined together and occupies 148,000 square miles of land. Over 8 million of the Byelorussians (according to the Soviet Census of 1959) live in the Byelorussian S.S.R. and at least 7 million of them are distributed among the Federated Russian Republic, the People's Republic of Poland, and the Soviet Socialist Republics of Lithuania, Latvia, Ukraine and others. This figure makes the Byelorussians in the European U.S.S.R. the second largest non-Russian nation after the Ukrainians.

The Byelorussians are one of the family of eastern Slavs and their language is one of the east Slavic languages. It differs from the Russian and the Ukrainian in the same respect as the Spanish language differs from the Italian and Portuguese.

In the Middle Ages Byleroussia was known under the name of Grand Principality of Lithuania and the term "Bylerorussia" or "White Rusia" (no connection with the Russians who identify themselves as "White" Russians because of their opposition to Red Russia) came into existence in the 18th century. Other names applied to Byelorussia are: Belorussia, Whiteruthenia, Byeloruthenia, and Kryvia. However, the term "Byelorussia" has been used most extensively since the Second World War and it is because the Byelorussian Soviet Socialist Republic is represented in the United Nations under this name.

Byelorussia fell under the domination of Russia at the end of the 18th century, but so did Poland and other nations of Eastern Europe at that time, and was held by Russia until World War I. This prolonged domination, however, did not make Russians out of the Byelorussians. At least the Byelorussian people never had considered themselves as such and waited for the appropriate time to restore independence of their country.

In 1917, when the czarist Russian Empire was shattered by the revolution, the Byelorussian people felt it was time for them to restore the long-yearned independence and, as a result, on March 25, 1918, Byelorussia was declared independent by the third constitutional act of the all-Byelorussian Congress, which met to discuss the fate of Byelorussia at Miensk.

The young Byelorussian National Republic did not flourish very long, however. Her territory was turned into a battlefield between the rallying forces first of Russia and Germany and then Russia and Poland, and the tragedy befell again. At the Treaty of Riga in 1921 (this treaty was disapproved by the U.S. Department of State) Byelorussia's body was cut in two. The eastern two-thirds of her territory was occupied by Russia, where, in order to acquiesce the feelings of the Byelorussian people, the so-called Byelorussian Soviet Socialist Republic was established to take place of the rightful government of the Byelorussians, which was forced into exile. The western one-third was occupied by Poland.

By the 1939 agreement between Ribbentrop and Molotov Russia obtained the right of taking over the western part of Byelorussia from Poland to the Curzon Line and did occupy it soon thereafter. In 1944 Byelorussia's territory was reoccupied by Russia again and it is known to us today under the name of the Byelorussian Soviet Socialist Republic. However, only one-half of the ethnographical territory of Byelorussia found its way within the boundaries of the present-day Byelorussian Republic. The rest of it was distributed among the Peoples Republic of Poland and the Soviet Socialist Republics of Lithuania and Latvia.

DEATH OF FORMER SENATOR JAMES E. MURRAY

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD a memorial on the death of the Hon. James E. Murray. The memorial is signed by Donald G. Nutter, Governor of the State of Montana; Frank Murray, Secretary of State of Montana;

and Forrest Anderson, Attorney General of Montana.

There being no objection, the memorial was ordered to be printed in the RECORD, as follows:

MEMORIAL ON THE DEATH OF THE HONORABLE JAMES E. MURRAY

Whereas it is with sincere sorrow that the members of the State Board of Examiners of the State of Montana have learned of the death of Montana's beloved Senator James E. Murray; and

Whereas Senator Murray's long and outstanding service has well earned the deep respect of all citizens of his State as well as the entire Nation, and

Whereas Senator Murray's regard for the interests of mankind and his benevolence have become an important part of Montana's history; now, therefore, be it

Resolved by the State board of examiners, for and on its own behalf, and on behalf of the hundreds of employees of this State, That an expression of deep esteem, remembrance and respect to this outstanding and loyal citizen, this true and devoted public official, be extended to the members of his family, along with sincere sympathy in their bereavement and great loss; and be it further

Resolved, That this resolution be spread upon the minutes of the board, and that the secretary be directed to transmit a copy to the surviving members of the Senator's family.

Done at the city of Helena, the capital of Montana, on this 24th day of March 1961.

DONALD G. NUTTER,
Governor.
FRANK MURRAY,
Secretary of State.
FORREST ANDERSON,
Attorney General.

Mr. ENGLE. Mr. President, when Senator James E. Murray died last week this country lost one of its great public servants. No appraisal of his career in this brief space can cover the large range of his interests or the magnitude of his contributions to this Nation.

It is to the inestimable advantage of the people of this country that Senator Murray directed his interests and energies toward making a better life for his fellow men. For a quarter of a century he never broke from the consistent and persistent line he laid down in his fight for the underprivileged and the discriminated against. For his efforts to protect our natural resources against any violations by special interests—for these efforts alone—he deserves a high place among the Nation's statesmen.

When Senator Murray terminated his long career in the U.S. Senate last year, he left with us a far-reaching proposal to preserve and improve the natural resources of this country. He proposed that we establish a Resources and Conservation Council which would maintain a continuous study of our natural resources—our needs now and in the years ahead. The proposal had in mind not only a study of our water and minerals resources but our land, forests, fish and wildlife, recreational facilities—every natural resource of importance to our national life and strength. I had many long talks with Senator Murray about this proposal and this year I reintroduced it in the Senate. I hope my colleagues will move quickly on this important measure—not only because of the great need for it but because it would be a deserving tribute to the man who inspired and fostered it.

Senator Murray's death leaves us with a great national loss. It leaves many of us with a great personal loss. When I was a Member of the House of Representatives, particularly in my last 4 years there as chairman of the Interior and Insular Affairs Committee, his friendship and assistance to me were invaluable. For the qualities of kindness and strength which he combined in large measure, he will always be remembered as a great humanitarian and a great human being. In a world where more often than not personal integrity and courage give way to political and economic pressures, Senator Murray was a man apart.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, after consultation with the minority leader, I move that the Senate proceed to consider executive business, to consider nominations on the Executive Calendar to which there is no objection, beginning with the nomination of Mr. Jones, of Georgia.

The PRESIDING OFFICER (Mr. METCALF in the chair). The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Robert E. Maxwell, of West Virginia, to be U.S. attorney for the northern district of West Virginia; and

Newell A. George, of Kansas, to be U.S. attorney for the district of Kansas.

By Mr. LONG of Missouri, from the Committee on the Judiciary:

D. Jeff Lance, of Missouri, to be U.S. attorney for the eastern district of Missouri; and

F. Russell Millin, of Missouri, to be U.S. attorney for the western district of Missouri.

By Mr. HART, from the Committee on the Judiciary:

Burke Marshall, of Maryland, to be an Assistant Attorney General.

By Mr. ANDERSON, from the Committee on Interior and Insular Affairs:

John M. Kelly, of New Mexico, to be an Assistant Secretary of the Interior.

The PRESIDING OFFICER. If there be no further reports of committees, the nominations referred to will be stated.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The Chief Clerk read the nomination of Boisfeuilliet Jones, of Georgia, to be a Special Assistant on Health and Medical Affairs to the Secretary of Health, Education, and Welfare.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

DEPARTMENT OF THE TREASURY

The Chief Clerk proceeded to read sundry nominations in the Department of the Treasury.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

RENEGOTIATION BOARD

The Chief Clerk read the nomination of Thomas D'Alesandro, Jr., of Maryland, to be a member of the Renegotiation Board.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask that the President be immediately notified of the nominations confirmed.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

TREATY ON EXTRADITION WITH BRAZIL—REMOVAL OF INJUNCTION OF SECRECY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the injunction of secrecy be removed from Executive H, 87th Congress, 1st session, a treaty of extradition between the United States of America and the United States of Brazil, transmitted to the Senate today, and that the treaty, together with the President's message, be referred to the Committee on Foreign Relations, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

The message from the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith a treaty of extradition between the United States of America and the United States of Brazil, signed at Rio de Janeiro on January 13, 1961.

I also transmit for the information of the Senate the report made to me by the Secretary of State with respect to the treaty.

The treaty is urgently needed. For almost 50 years there has been no extradition treaty in force between the United States and Brazil. At the present time there are in Brazil a substantial number of important fugitives from the United States. The treaty, in making it possible to bring to justice such fugitives, will be of fundamental importance to law-enforcement officials of the

Federal Government and of the various States of the United States.

I therefore urge that the Senate give this treaty early and favorable consideration.

JOHN F. KENNEDY.
THE WHITE HOUSE, *March 27, 1961.*

PROPOSAL FOR MODIFICATION OF INTERNATIONAL LOAD LINE CONVENTION—REMOVAL OF INJUNCTION OF SECRECY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the injunction of secrecy be removed from Executive I, 87th Congress, 1st session, a proposed modification of article 3(e) of the International Load Line Convention, signed at London on July 5, 1930, transmitted to the Senate today, and that the proposal, together with the President's message, be referred to the Committee on Foreign Relations, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

The message from the President is as follows:

To the Senate of the United States:

I transmit herewith a report by the Secretary of State setting forth the text of a proposal made by the Government of the United Kingdom of Great Britain and Northern Ireland on May 31, 1949, for modification of article 3(e) of the International Load Line Convention signed at London on July 5, 1930.

In accordance with the recommendation made in the Secretary's report, I request that the Senate give its advice and consent to acceptance by the United States of America of the proposed modification of the convention.

JOHN F. KENNEDY.
THE WHITE HOUSE, *March 27, 1961.*

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate return to legislative session.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

ESCAPE TO FREEDOM—TRIBUTE TO SENATOR CANNON

Mr. BUTLER. Mr. President, there are few things more pleasurable in life than to direct public attention to a colleague and friend whose accomplishments have been too privately known in the past.

The distinguished Senator from Nevada [Mr. CANNON] is presently known for his quietly efficient work on the Armed Services and Rules Committees. In the Senate only 2 years, he is already the chairman of the Privileges and Elections Subcommittee. But his efforts as a Member of the U.S. Senate are well known. It is his exploits of a few years ago—during the Second World War, to be exact—of which I wish to speak.

Listen to these words, Mr. President, the words of an unassuming, courageous man:

When I parachuted into Holland, I felt I was nothing—someone small and unimportant—a speck in the universe leaving a disabled plane for a hostile country. When I left Holland, I sensed I had accomplished far more than our original mission—I had learned from the "defeated" the true meaning of freedom and how we must never give up fighting for it.

Those are the concluding words of an article in yesterday's edition of Family Weekly, a Sunday supplement, which printed the experiences of Senator CANNON—Colonel CANNON then—when he was shot down over Holland in 1944.

The title of the article is "Escape to Freedom." It is a brief story, but filled with significance for everyone in this Chamber and for every American. I count it a rare privilege indeed to serve in the same body with the man who wrote the article and who is its subject.

Mr. President, I ask unanimous consent to have printed in the RECORD following my remarks the article entitled, "Escape to Freedom," by the distinguished Senator for Nevada.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ESCAPE TO FREEDOM

(By HOWARD W. CANNON, U.S. Senator from Nevada)

(Senator HOWARD W. CANNON, Democrat, of Nevada, is a qualified jet command pilot in the Air Force. In World War II, he served 5 years in the Armed Forces, enlisting as a first lieutenant and emerging as a lieutenant colonel. His 15 decorations include the Distinguished Flying Cross, Air Medal with two Oak Leaf Clusters, Purple Heart, Presidential Unit Citation, and the French Croix de Guerre.)

One recent morning, I received a surprise birthday gift from a friend of mine in the Pentagon. It was an oil painting of a war scene in Holland, depicting two shabbily dressed "farmers" crossing a bridge near a bombed-out village. Incongruously, in the foreground, there was a large apple from which someone had taken a bite.

The painting was by Col. Roy Weinzettel of the U.S. Air Force, who had been an Intelligence officer in our wing during World War II. I was one of the farmers shown escaping to freedom.

The scene holds deep meaning to me, and I hope it will to all Americans as well as to the rest of the free world. Now, for the first time, I am telling the full story behind the picture.

As operations officer with the 440th Troop Carrier Group, I had copiloted the lead plane dropping paratroops over France on D-day. On September 17, 1944, during the Allied invasion of Holland, our mission was to discharge 'chutists over the Arnheim bridge. Col. Frank X. Krebs of Chicago and I were the pilots in the lead C–47 plane.

Flying through heavy flak over enemy-held territory, we dropped the paratroops and started back. I saw two Allied planes catch fire and another burning on the ground. As we turned for home, climbing to 3,000 feet, I thought the worst was over.

OUR PLANE IS LOST

Just as we passed Breda, we were hit. I heard a terrific explosion in our left engine. The left propeller vanished, there was a huge hole in our side and companionway, and the cockpit was a shambles of broken glass. With controls gone, the ship began to nose down in a spiral. I rang the signal bell ordering the crew to bail out.

Hydraulic fluid from the shot-out lines spurted all over us, almost blinding me. I groped for my parachute but slipped on the fluid and fell on my face. When I regained my balance, I had a hard time getting out of my flak suit, but I finally hooked on the 'chute pack and managed to reach the cabin door with the aid of Colonel Krebs. The rest of the crew had already bailed out.

I had never jumped before. Hardly able to see, I dived. When my parachute billowed out, I was at an altitude of about 800 feet.

As we drifted with the wind, German patrols below started shooting at us. To put it mildly, it was uncomfortable. Landing in a potato field, we got rid of our 'chutes and ran for cover to a ditch as Germans on bicycles headed through the field toward us. With me were Colonel Krebs, who had broken his left arch in the fall, and T. Sgt. Frank Broga, of Chester, Mass., our crew chief.

We lay flat on our back in the watery ditch, tall brush and grass pulled over us. Our .45's were cocked while we listened to the searching Germans yelling and jamming bayonets into piles of straw. After an interminable time, they left.

Then, suddenly, a Dutch farmer was standing over us. He motioned to us to stay hidden. When we couldn't understand what he was saying, he pointed to my watch—to 9 o'clock. We caught the idea that he would return after dark.

Could we trust the farmer not to give us away? Some of our flyers had told us not to expect any help from the Dutch because they were "first cousins of the Germans" and the only way to talk to them was with a .45. For the next 5 hours we sweated it out.

Toward dusk, we crawled under a pile of straw. When the farmer finally returned and we could see he was alone, we emerged. We followed him to the top of a hill. There we came upon two men in uniform. In a quick reflex action we pulled out our guns. They only grinned at us. It turned out they were local policemen, both in the underground.

With the policemen slowly riding their bicycles ahead of us, we started the longest walk I've ever taken. The Germans would have shot without warning anyone out after curfew without special-permission identification. Three times we encountered enemy patrols, but the policemen tipped us off, and we kept out of sight until the patrols passed. Reaching a farm, we were hidden in a shed.

Then came the Dutch reception committee—all the neighboring farmers bringing bread, cheese, and hot milk. Everyone there wanted to shake hands with us. It gave me a singular feeling of brotherhood that I had never before experienced.

At 2 a.m., we moved on, Krebs riding the handlebars of a policeman's bicycle. At the home of the local underground leader, in the little town of Audenbosch, Colonel Kreb's foot was treated by a doctor. Sergeant Broga and I slept in the attic of the police station. After 2 days we were given police uniforms and, riding motorcycles, boldly proceeded to the city of Breda.

WE HAVE A COZY HIDEOUT

For 3 weeks, our home was a department store that had been closed to civilians, although the Germans often came to requisition items. Our bedroom was the upholstery department, and naturally there was plenty of furniture on which to sleep. Whenever the enemy barged in, we scooted out through a tunnel to the home of the store owner across the street. Or, if we didn't have time, we'd climb through the trap-door in the ceiling of the elevator, push a switch that put it out of order, and sit on its top until we were safe.

We ate mostly potatoes, cooked in the store's deserted restaurant kitchen, and occasionally had a sort of meat stew. Food was scarce, and it must have been a hardship for the Dutch to feed us.

I knew, too, that by hiding us the Dutch were risking their lives every hour. Collaborators were busy informing on anti-Nazis and revealing hidden Allied fugitives. Every day we were told of Dutch citizens being rounded up and executed for taking part in underground activities.

In our department store, other American, British, and Canadian flyers kept joining us until there were 13—too dangerous for so many wanted men in one hideout. We had to split up into pairs. Colonel Krebs and I were presented with civilian clothes, ration books, birth certificates, and forged identification papers complete with photographs, our own fingerprints, and official seals. I was "Hendrik van Gils," a city clerk, and Krebs was a schoolteacher.

THE LONG TREK BACK BEGINS

The superb efficiency of the underground continued to amaze me. Even our brown paratroop boots, a sure giveaway, had been dyed black. If we were caught in civilian clothes, we'd be shot as spies, so the underground kept our uniforms for that emergency.

In the next few weeks we hid in closets of several homes and then under the floor in the home of a Dutch officer who had spent 18 months in a Nazi prison. His spirit hadn't been shaken. To keep busy, we did household chores and buried his heirlooms in the cellar. Every now and then, German search parties came through, and we felt we were endangering the family. We decided to make a break to the Allied lines.

Setting the day, we asked for complete new sets of identification papers and some old clothes. The Dutch came through with their usual finesse. Colonel Krebs became a farmer carrying a hoe. I was his hired man with an armful of twigs for firewood. He could speak German, but I knew only a few words of the language, so I tied a bandage around my neck. If we were stopped, Krebs could say I had a sore throat and couldn't talk.

At a predetermined hour we walked down a street until we came to a bridge where two 14-year-old boys were munching apples. This was our recognition signal. I pulled an apple out of my pocket and took a bite. (The apple and the bridge are shown in the oil painting.) Whistling cheerfully, the boys assigned to be our guides walked ahead of us as we trudged along.

We had 15 miles to go on foot, through roadblocks and patrols in no man's land. Every 2 or 3 miles, our young guides would change, so that none would be found too far from home—a serious offense to the Nazis. To skirt some towns, we followed ditches and climbed through barbed-wire barricades. Other times, we couldn't avoid walking by sentry posts, but we had learned to say "Morga" ("Howdy") to the guards. Occasionally, the boys were stopped, and we plodded on until the youngsters caught up.

At the end of that nerve-wracking day, we arrived at a farmhouse scarred by shelling. In the yard, a woodpile covered the bottom of an old silo. The widow who owned the farm pulled aside a few sticks of wood and pointed to a small room under the brush. Even some food awaited us.

About an hour later, a battery of German 88s rolled up nearby and started firing. They were so close we could hear a German officer give his orders to fire. For 3 days shells were whizzing around us—both ways. The farmhouse was hit, the barn knocked down, and two sheep killed. That meant fresh mutton, served graciously by the widow to her eight children—and the two Americans in the silo.

In the middle of the fourth night, the 88s pulled out and an eerie silence settled over the farm. Next morning we ventured out of our room under the woodpile to stretch our cramped legs. Then we heard voices of a patrol moving up. We were about to dash back to shelter when our ears caught the clear sounds of familiar slang. They could only be GI's. A few days later, we were back with our outfit, after 42 days behind enemy lines.

Shortly before that Christmas, after the Breda area was liberated, Colonel Krebs and I loaded a plane with clothes, C-rations, candy, soap, and cigarettes—all contributed by about 50 men in our outfit. This mountain of supplies was heaped into a trailer and jeep which we took along in our C–47. Landing near Breda, we retraced our steps in the jeep and trailer, passing out our tokens of gratitude to those who had helped us.

This is the simple story of the oil painting now hanging in my Senate office in Washington.

It is not a profile of heroism by a couple of jittery American airmen; the real heroes are the Dutch people. Colonel Krebs and I were symbols of the free world. We were important to all these vanquished but unconquerable people who treasured the dignity of liberty.

When I parachuted into Holland, I felt I was nothing—someone small and unimportant—a speck in the universe leaving a disabled plane for a hostile country. When I left Holland, I sensed I had accomplished far more than our original mission—I had learned from the "defeated" the true meaning of freedom and how we must never give up fighting for it.

ONE HUNDRED AND FORTIETH ANNIVERSARY OF GREEK INDEPENDENCE

Mr. DODD. Mr. President, last Saturday marked the 140th anniversary of Greek independence. It was on March 25, 140 years ago, that the flag of freedom was raised in Greece and there began the bitter 6-year-long war for independence from the Ottoman Empire.

It was a struggle in which the embattled Greek patriots had the sympathy of the entire civilized world. In our own country, Daniel Webster and President Monroe openly expressed their admiration and support for the Greek people. In England, the wave of popular sympathy that swept the country was immortalized in the writings of Lord Byron.

I believe that Greek Independence Day is a festival that merits the observance of the entire free world because Greece has contributed so much that has meaning for the spirit of man and for his arduous ascent to enlightenment and humanity.

The neoclassical lines of so many of our government buildings is testimony to the unrivaled purity and dignity of their architecture. This architecture can only be properly understood, however, if we accept it as a mirror of an inner spiritual nobility.

Thomas Jefferson and our Founding Fathers were steeped in the classic writings of the Greek philosophers, and the influence of this philosophy, with its emphasis on the dignity of man and the freedom of the human mind, is strongly etched in our Declaration of Independence.

The contribution of Greece to world civilization did not come to an end with classical times. From the Battle of Thermopylae, through the Greek resistance against the Ottoman invasion, through the hard struggle for independence that terminated 140 years ago, through the heroic resistance to the Italian and Nazi invasions of World War II, through the postwar fight against Communist guerrilla forces that were massively supported by the Cominform—through all of these battles, both in victory and defeat, the Greek people have given testimony to man's unconquerable spirit, his eternal will to freedom.

Through our mutual membership in NATO, Greece and the United States are now associated in a community of freedom. Through this historic alliance, we have committed ourselves to defend the independence of Greece against all aggression.

On this occasion, therefore, I feel that it is all the more fitting that we should join with the 1½ million Americans of Greek descent and with the people of Greece in celebrating the anniversary of their independence. I know we all hope that the ensuing decades will enable the people of Greece to enjoy a greater measure of economic well-being in peace and in freedom.

Mr. KEATING. Mr. President, on March 25 the Greek people celebrated their 140th anniversary of independence. It was a day of great significance and honored memory for Americans of Greek ancestry and for Greek people all over the whole world, for it commemorated the end of the long struggle of the Greek people for independence from the Ottoman Empire.

It is altogether fitting that we pause to reflect on the importance of the Greek nation to the free world. First, we must acknowledge that the history of ancient and of modern Greece is a source of continuing inspiration to freedom-loving people throughout the world. Ancient Greece was the cradle of Western civilization, giving birth to such cherished concepts as the rule of law and democratic government.

After the Second World War, Greece was beset by perils from within and without. They threatened to engulf the brave nation in a bloody civil war. Through timely U.S. assistance and the efforts of Greek patriots, stability and security were recovered. The Communist menace was repulsed. Further economic aid through the Marshall plan enabled the Greek people to reconstruct their economy to new levels of progress and prosperity.

Although there is still need for continued achievement and continued American aid, Greece stands united today in the North Atlantic Treaty Organization—an important member of the collective defense system of the free world. Its continuing independence and prosperity are a matter of vital concern to all Americans. Let us then take this occasion to hail the Greek nation as a fullfledged and dedicated partner in the effort to keep men and nations free and independent now and for the future.

Mr. BUSH. Mr. President, on March 25, the 140th anniversary of Greek independence was celebrated. This occasion should remind the world of its indebtedness to Greece as the birthplace of human freedom.

The Greek war of independence was a fierce and one-sided struggle between the weak but gallant Greeks and the powerful forces of the Ottoman Empire. It was the fight of a freedom-loving people against despotism and tyranny. In the course of 7 years of fighting, Greece was almost bled to death; and, in the face of inactivity of other powers in Europe, it seemed that the Greek cause was doomed.

At the same time, in the minds of people on both sides of the Atlantic who were beneficiaries of Greek heritage, there was no doubt of the justice of the Greek cause. It was this feeling of appreciation and gratitude to Greek genius that drove three European governments to intervene in behalf of Greece. With this help, the forces of freedom and humanity achieved a great victory, and independence was established in Greece.

On this anniversary date of that great struggle, the free world should pause to contemplate its significance, and should resolve anew to remain ever strong in order to counter the attempts of despotic governments to enslave those who would be free.

FLAG AWARD TO CONY HIGH SCHOOL OF AUGUSTA, MAINE

Mrs. SMITH of Maine. Mr. President, on October 14, 1960, there occurred in Augusta, Maine, a significant event. It was the presentation of the Francis Bellamy Flag Award to Cony High School of Augusta, Maine. We of Maine were indeed proud of the honor that Cony High School had brought to our beloved State.

As we all know, Francis Bellamy was the author of the "Pledge of Allegiance" to our flag. A Francis Bellamy Flag Award is an outstanding patriotic achievement to which any group could well aspire.

The true significance of it was admirably stated by the SCA president at Cony High School, Mr. Robert Browne, and I ask unanimous consent that his statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY ROBERT BROWNE

On June 4, 1777, the Congress of the United States adopted the following:

"*Resolved*, That the flag of the United States be 13 stripes alternating red and white, the Union be 13 white stars in a blue field representing the new constellation."

In 183 years since then Old Glory has represented our country and our democratic spirit. Our beautiful flag is a symbol of a happy way of life. It represents the courage of those who planted wheat in the great plains. It represents souls who live in the city and those who live on the farms. It represents most of all those who died serving their country.

The Star-Spangled Banner represents peace, prosperity and hope. It symbolizes the faith that man should have the right of choice, the right to seek happiness and to make dreams come true. Our flag is the symbol of man's worthiness to be self-governing.

How grateful we are to Francis Bellamy for the words that he wrote: "liberty and justice for all." His words, which have become our own, remind us of our great fortune to be born with this flag. The words ever remind us of the wonderful privilege and of our great and growing responsibilities.

With humility we, the student body, accept the Bellamy Award for Cony High School. We know that we and those who come after us will be continually inspired to pledge your allegiance in every way to the flag that surely represents the good way of life for mankind.

Mr. KEATING. Mr. President, one of the highest awards that is given to American high schools is the Bellamy Flag Award, established in honor of Francis Bellamy, the author of the "Pledge of Allegiance." Bellamy's words, repeated by generations of Americans, have been an inspiration for patriotism and loyalty. The award that has been given for approximately two decades now represents a very high honor indeed. In deciding the winner, judges consider the curriculum of the school, the school's participation in community activities, its adequacy in meeting community needs, its effectiveness in teaching citizenship, and its cooperation with local government and community services.

Mr. President, the first winner of a Bellamy Award was the Free Academy of Rome, in Rome, N.Y., where Francis Bellamy himself went to school. In 1942 the first award went to Rome, and I am very proud to know that this fine New York institution is still living up to the same high standards. This year's winner, which under the terms of the award, must come from a different State, is Cony High School of Augusta, Maine.

Mr. President, while we here in the Congress are striving to do what we can to raise the level of excellence in our Nation's schools, I think we should all take the time to pay special attention to accomplishments and awards such as this which present a continual challenge to our schools for advancement and improvement.

Mr. President, for this reason, I should like to include at this point in the RECORD the remarks made by Robert Hammond, the president of the student council association of the Rome Free Academy when he congratulated the Cony school in Maine on its achievement as 1961 winner of the Bellamy Flag Award:

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

STATEMENT BY ROBERT HAMMOND

Miss Miller, Mr. Croxford, Senator SMITH, honored guests, distinguished alumni, faculty, especially the students, for this is really your celebration, and I must admit that if we could get our student body to dress as nicely as the student body is dressed our faculty would probably like to have a Francis Bellamy Award in our school every year.

I'm honored and pleased to be here in Augusta this morning to participate in this Bellamy Award presentation. On behalf of Mr. Carl S. Paige, principal of the Rome Free Academy, behalf of the faculty and the student body, I bring you greetings and congratulations.

When we, the students of Rome Free Academy, recite the pledge of allegiance to the flag of these United States of America we are proud to remember that its author, Francis Bellamy, was graduated from our school in 1872, helped organize our alumni association and was its first president.

The city of Rome is built on the site of Fort Stanwix, a Revolutionary War battleground. It was here at Fort Stanwix that the American flag, the original Stars and Stripes, were first unfurled in battle against enemy troops.

We are both honored and proud that Francis Bellamy selected Rome as his final resting place. We are especially proud of the fact that in 1942 Rome Free Academy was honored by being selected as the first high school in America to receive the national Bellamy Award.

In recent years the board of education in the city of Rome has undertaken a dynamic building program. On October 25 I will have the pleasure of being one of the speakers at the official dedication of the new elementary school to serve our ever-increasing student population. This school has the honor and distinction of being the only school in America to bear the name of Francis Bellamy. The city of Rome feels assured that the Francis Bellamy Elementary School will educate its students in the fine traditions of good citizenship as exemplified by the renowned author of the pledge of allegiance.

In the days of the Iroquois Confederacy, going back a little further into history, the site of the city of Rome was a portage or overland carrying trail for the commuters of the Indians and the French and English traders. The Indians called the area the Deowainsta, or Carrying Point.

At this time I'd like to present to David Elvin for his school a copy of the 1960 Rome Free Academy yearbook, the Deowainsta, to further commemorate this great occasion.

I would like to take the opportunity to publicly thank Miss Miller for inviting Rome Free Academy to come up and take part in this program. I would also like to thank Cony High School and the friendly people who have played host for us for their wonderful hospitality, the faculty, the alumni, the students of Cony High School. Rome Free Academy salutes you, congratulates you and hopes that you will continue in the excellent traditions that enabled you to receive this award today. Thank you.

PRICE FIXING: FARMER AND CONSUMER

Mr. JAVITS. Mr. President, on March 22, 1961, the New York Times printed an editorial which points up very clearly the inconsistency between the new administration's attitude toward the farmer and its attitude toward the consumer and the businessman. This editorial, entitled "Economic Policy Schizophrenia," points out the strange phenomenon of almost simultaneous announcements by the Attorney General of new anti-price-fixing action particularly directed at food items, which is a most laudable effort, and the submittal of an agricultural program which would have the result of encouraging price-fixing combinations among producers of agricultural commodities, which could result in higher prices to the consumer.

I ask unanimous consent that the editorial may be printed in the body of the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ECONOMIC POLICY SCHIZOPHRENIA

Does the Kennedy administration's right hand know what its left hand is doing? Have our current Attorney General and Secretary of Agriculture bothered to check recently on the consistency or lack thereof in their actions and proposals? A negative answer to both questions is suggested by the obvious schizophrenia shown by some aspects of recent administration policy.

Last Sunday Attorney General Robert Kennedy announced that investigations are now under way to unearth price-fixing conspiracies in various industries, and he emphasized particularly such commodities as milk, meat and bread. He held forth the prospect that these investigations may lead to lower prices. A naive observer might think that our Government is opposed to producer cooperation to fix prices.

A few days earlier, however, President Kennedy sent his agricultural program to Congress. The key novelty in this program was a proposal to permit producers of agricultural commodities to meet and fix both prices and the level of their marketings so as to serve their own interests. The objective of this program is to raise prices, and if passed and implemented successfully this program could hardly fail to tend to raise the prices of milk, meat and bread, which the Attorney General assures us he is trying to reduce. It is an Alice in Wonderland situation.

Why should the men who raise our wheat be encouraged and legally permitted to combine to set the price they want when the men who bake bread from that wheat are regarded as criminals if they get together to do the same thing for their product? Why should owners of 10,000-acre wheat farms be given privileges denied owners of struggling corner bakeries?

The Kennedy administration may perhaps argue that it has provided for safeguards, since the farmer committees it wants to set up will work with the Secretary of Agriculture and their proposals will be subject to congressional veto. But to anyone who knows the strength of farm lobbyists in Washington these supposed safeguards will seem weak reeds indeed.

THE PERFORMING AND VISUAL ARTS

Mr. JAVITS. Mr. President, the present tour of the Theatre Guild American Repertory Co. through Europe and the Middle East is contributing substantial benefits to U.S. prestige. Under the leadership of Miss Helen Hayes, our first lady of the theater, the company, which is traveling under the auspices of the Department of State, is giving foreign audiences their first opportunity to see Thornton Wilder's "The Skin of Our Teeth," Tennessee Williams' "The Glass Menagerie," and William Gibson's "The Miracle Worker."

Miss Hayes is deserving of our special commendation because it was her interest and dedication which helped to make it possible for this project to come to life. Announcement of the tour was enthusiastically received in the cities scheduled to be visited.

I point out in this regard that I had occasion to protest the denial of access for this company into Cairo. I also emphasize the fact that we do not as yet have, by authorization of law, an adequate cultural program in our country with respect to the performing and visual arts.

I ask unanimous consent to include in the RECORD with my remarks the itinerary of the Theatre Guild American Repertory Co., and report from Madrid, March 8, describing the reception accorded Miss Hayes and the guild company, and quoting the reviews of Madrid critics; also a letter from Prof. Norman Philbrick, of Stanford University, president of the American Educational Theatre Association dated March 7; a letter of March 20 expressing the interest of the McCarter Theatre of Princeton, N.J., signed by Milton Lyon, producer, Brooks Jones, associate producer, and Marguerite McAneny, manager; a letter of March 23 from Prof. Willard Thorp of Princeton University, chairman of the department of English; and the feature article in the Dramatists Bulletin, March, by the distinguished playwright Marc Connelly, entitled "Things May Be Looking Up."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THEATER GUILD AMERICAN REPERTORY COMPANY ITINERARY (AS OF JAN. 31, 1961)

March 5: Travel to Madrid.
March 7–10: Plan Madrid (Teatro Español).
March 11: Travel to Barcelona.
March 12–14: Play Barcelona.
March 15: Travel to Brussels.
March 16–18: Play Brussels (Royal Flemmish Theater).
March 19: Travel to The Hague (live at The Hague).
March 20: Play Amsterdam (Municipal Theater).
March 21: Play The Hague (Royal Theater).
March 22: Play Rotterdam (Municipal Theater).
March 23: Travel to Belgrade.
March 24–26: Play Belgrade (Opera House).
March 27: Travel to Athens.
March 28–30: Play Athens (Kotopouli or Greek National Theater).
March 31: Travel to Cairo.
April 1–3: Play Cairo (Opera House).
April 4: Travel to Tel Aviv.
April 5–9: Play Tel Aviv (Habima Theater).
April 10: Travel to Ankara.
April 11–16: Play Ankara (National Opera House).
April 17: Travel to Vienna.
April 18–20: Play Vienna (Burg Theater).
April 21: Travel to Dusseldorf.
April 22–24: Play Dusseldorf (Schauspiel Haus).
April 25: Travel to Berlin.
April 26–30: Play Berlin (Schiller Theater).
May 1: Travel to Copenhagen.
May 2–7: Play Copenhagen (Royal Theater).
May 8: Travel to Oslo.
May 9–11: Play Oslo (National Theater).
May 12: Travel to Stochholm.
May 13–17: Play Stockholm (Royal Theater).
May 18: Travel to Helsinki.
May 19–21: Play Helsinki (National Theater).
May 22: Travel to Hamburg.
May 23–25: Play Hamburg.
May 26: Travel to Rome.
May 27–29: Play Rome (Elysee Theater).
May 30: Travel to Florence.
May 31: Sightseeing.
June 1–2: Play Florence (Pergola Theater).
June 3: Travel to Geneva.
June 4–5: Play Geneva (Gran Casino Theater).
June 6: Travel to Turin.
June 7–8: Play Turin (Carignano Theater).
June 9: Travel to Paris.
June 10–17: Play Paris (Teatre Sarah Bernhardt).

Mailing address: Care of Theater Guild American Repertory Co., in care of Cultural Attaché, American Embassy. (In noncapital cities, substitute American Consulate for American Embassy.)

MADRID, March 8.—Actress Helen Hayes today is proud possessor of order of Queen Isabella, the Catholic. She was awarded one of Spain's highest decorations by Spanish Foreign Minister Fernando María Castiella backstage in simple ceremony following gala premiere of "Skin of Our Teeth."

Present at ceremony were members of Theatre Guild American Repertory Co. and U.S. Ambassador and Mrs. John Davis Lodge, who had Minister and Mrs. Castiella as their guests.

In awarding decoration, Castiella said he wished to present medal to one of greatest actresses to perform in Madrid. In congratulating her on her magnificent performance, Castiella thanked Repertory Co. for bringing to Spain such a great measure of American art.

Visibly moved by unexpected honor, Hayes accepted decoration graciously and said, "Viva España! Ole!"

Among dignitaries in audience of 300-year old Teatro Español, which was sold out days before curtain went up, were Prince Juan Carlos, Lt. Gen. Antonio Barroso, Army Minister, Gabriel Arias Salgado, Information Minister, and José Solis Ruiz, Secretary General of the National Movement.

Spanish critics were unanimous in praising "Skin," first of three plays Repertory Co. is presenting to theater lovers of major cities in Europe and Near East.

Arriba, Madrid, March 8, by Gonzalo Torrente: Arriba critic pointed out "Skin" had been presented by Spanish Little Theater Group and not unknown to Spanish theater goers. Therefore he said no need to express opinion about play.

He wrote however: "We confess our partiality for Wilder, the most intelligent, the most European of American writers * * * 'Skin' would be a delight even if it were not a work of deep symbolism and clear meaning, so we limit ourselves to describing interpretations of the Theater Co.

"Few groups have appeared on stages of Madrid from whom we have so much to learn; but from this lesson two things stand out: first, the discipline, the submission to portraying author's intention, and use of all talents of all in the cast to express what play is trying to say; the second is way they have used 'theatrics,' including exaggeration and rhetoric. Our realism has led us to discard many ways of expression. Now we see that which we approve and that which we have lost."

"What would become of role of June Havoc if she played without deliberate affectation? From first moment she appears, Havoc is center of comedy, because of variety of her nuances, her effective use of abrupt transitions, rich register of her voice, and intelligent way she uses her talents.

"June Havoc is an extraordinary actress.

"Helen Hayes and Leif Erickson were extraordinary.

"There are moments in play, as in beginning of second act, when acting of Hayes and Erickson is brilliant; or the powerful third act when Mr. Antrobus (Erickson) faces his son (Thomas Hawley).

"Credit must also be given Helen Menken and Astrid Wilsrud. 'Skin of Our Teeth' was a great success.

"Directing was skillful, scenery was delightful, both contributing to success of play."

William Stuttard, Madrid correspondent for London Times, said: "After last night's brilliant performance of 'Skin,' I feel sure that in various countries included in grand tour of this magnificent repertory company, the different peoples are going to get

an excellent idea of how alive and how attractive American theater is. Whole company gave impression of being really superb team of actors. Helen Hayes and June Havoc were outstandingly good, especially Havoc last night. She gave magnificent portrayal of her role. Helen Menken revealed her talent. Erickson is undoubtedly outstanding and showed last night how skillful and versatile an actor he is. Mention must also be made of James Broderick and praise must be added for scenic effects. I can only repeat that the whole company is first class and choice of three distinctly different types of plays is going to bring them much success wherever they appear in Europe and at the same time reveal exceptional merits of American theater."

ABC of Madrid, March 8, by Alfredo Marquerie: "Play is difficult not only because of intricate stage setting, solved by wonderful decoration, well chosen color, clever sylization and lighting, but also because of transitions in dialog that frequently change from moments of extreme violence and of extreme humor to dramatic symbolism, but maintaining at every moment, depth of meaning.

"We praise all actors—we sum up our praise for prodigious Helen Hayes, who has set an example of good acting—in emotion, tenderness and gentle comedy.

"June Havoc from very beginning captured audience with her sense of burlesque. She reached across the footlights to establish direct contact with audience not only through her ironic undertones but also by her mastery of mimicry.

"Leif Erickson, an actor full of feeling, expression, convincing with great personality and a sense for comedy.

"Helen Menken attained impressive realism as the fortuneteller by her absolute mastery of voice and gesture.

"Presentation of this company could not have been a greater success and amply justifies expectation it has aroused and effort displayed to make trip possible."

Ya of Madrid, March 8, by Nicolas Gonzalez Ruiz: "Last night's performance was complete success from beginning to end. At conclusion audience gave company great ovation.

"What was most remarkable in premiere was perfect interpretation attained in which the voice, the gesture, the attitude and movement expressed message of play.

"It is difficult to measure merits, but last night there were two outstanding figures who performed their respective roles brilliantly: the great actress Helen Hayes and June Havoc, who proved she is also extraordinary actress. Both dominated stage and were applauded by spellbound audience for their impeccable acting. This review would not be complete without paying tribute to Helen Menken.

"In the masculine cast, Leif Erickson was outstanding, acting with great accuracy and vigor. We must also mention James Broderick but really we should mention all of the cast because they acted to perfection, giving the impression of a great interpretative company."

AMERICAN EDUCATIONAL
THEATRE ASSOCIATION, INC.,
March 7, 1961.

Hon. JACOB K. JAVITS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR JAVITS: Mr. John Walker, our executive secretary, has sent me a copy of your Senate bill 936. I wish to add my congratulations to you for emphasizing by your dedicated interest the great need for the recognition of cultural values in America. We have in this country many vigorous, imaginative artists who need the support of the Government. These artists appear in every aspect of theater: educational, children's, secondary school, community, and professional. There is still considerable need for communication in these groups, but all of us have a common purpose. The United States Arts Foundation would stimulate this purpose, and I would like to have you know that I speak for a large group of American citizens for whom the arts have a special and dignified meaning.

Sincerely yours,

NORMAN PHILBRICK,
President, AETA.

MCCARTER THEATRE OF PRINCETON,
March 20, 1961.

We at McCarter Theatre of Princeton are anxious to lend our support to Senator JAVITS' bill S. 1250, calling for the establishment of the U.S. Arts Foundation. In view of the success and apparent value of McCarter Center in Princeton, we are particularly impressed by the fact that such a bill could provide grants to universities which, with Government aid, could initiate similar projects (several schools, including Dartmouth, University of Illinois, and Swarthmore, have approached us on this matter).

After 2 years of planning and 1 year of operation in progress, we are convinced that with Government subsidy, the university provides an excellent framework within which performing arts centers can operate with a minimum of harmful restriction and with the greatest benefit to both the community and the colleges' effort to educate. We also feel that it is important to note that if the McCarter experiment has value as an example, a university, housing a "theater in residence," would allow for the necessary freedom in the arts. With university guidance, governmental pressures, as indicated in S. 1250's clause, "giving preference to stimulating and encouraging the works of citizens and residents of the United States and of the Americas"—a restriction which strikes us as dangerous and unnecessary—could be removed.

In light of the frightening cultural rot taking place throughout America today, we feel that it is urgent that the Arts Foundation, along with related ideas, be given a hearing as soon as possible. Any substantial gain in this area would be reflected in the health of community life, education, foreign opinion and, we can hope, in our opinion of ourselves as a people.

Quoting Howard Taubman in his appraisal of the McCarter Center (New York Times, Feb. 19): "Think of the theatrical facilities from good to excellent in college communities and consider how piddling is the function of most. Remember how many trained professional theater people yearn for a chance to work. Imagine the value to America if the riches of laughter and wisdom created by a long line of gifted playwrights were incorporated into the normal life of half a hundred communities throughout the land."

MILTON LYON,
Producer.
BROOKS JONES,
Associate Producer.
M. MCANENY,
Manager.

PRINCETON UNIVERSITY,
Princeton, N.J., March 23, 1961.

I should like to record my great interest in Senator JAVITS' admirably conceived "Bill to establish the U.S. Arts Foundation." We are the only great nation in the world which gives no public support to the performing arts. The proposals in the bill are modest, in view of the great opportunities in this cultural area, but even a moderate outlay would accomplish wonders. I know this is so from the success we have had this season with classical repertory in the university's McCarter Theater. We have come close to meeting all expenses without a subsidy. A small grant would have made it possible to tell our story better and reach a larger audience. As it was, over 15,000 New Jersey high school students heard about and attended the performances of Shakespeare.

I speak about our own experience only because I know it does or might match that of hundreds of such enterprises.

I hope you will assure Senator JAVITS of my warm support of S. 1250. I only wish there were something I could do to help in this excellent cause.

Yours sincerely,

WILLARD THORP,
Chairman, Department of English.

DRAMATISTS BULLETIN

THINGS MAY BE LOOKING UP

(By Marc Connelly)

It has been a long time since any music fell so sweetly on the ears of American writers as the utterance of Presidential Candidate John F. Kennedy in the issue of the Saturday Review of last October 29:

"At this moment, the Federal Government acts as art patron to only one person—the Consultant in Poetry and English at the Library of Congress. And his salary is paid through a private, anonymous bequest.

"I think we can do better than that, if only by alleviating the unfair tax burdens borne by writers, painters, and other creative artists. They may exist on small incomes for years to perfect their skills, and then be plundered by the Treasury in a single year of plenty."

The presence of Robert Frost at the inauguration ceremonies had the effect of a signature to a Presidential statement of good faith. The expansion of the Rules Committee insures a pro-Kennedy majority in Congress, and I wouldn't be surprised if the next tax legislation recognized that the men and women who increase America's cultural wealth deserve as much consideration as citizens who derive their income from oil wells.

That will be a day for celebration not only by a category of relieved taxpayers but by every American who knows how important its theater is to a country's cultural health. It will indicate the possibility of an emergence from a Puritanic attitude afflicting English-speaking countries since the days of Cromwell. Cromwellian bigotry suppressed the British theater on moral grounds. When it returned with Charles II those who had been intimidated into believing it a wicked institution by the Puritans became convinced that it was because of the amorality of Restoration playwrights.

Until the British Parliament eventually acknowledged governmental responsibility to the theater by subsidizing the Arts Council at the end of World War II, the official attitude toward the theater on both sides of the Atlantic was one of determined neglect. Today our National Government is the only one in the civilized world which doesn't give the theater as an institution financial aid.

Recognizing how valuable the theater could be in furthering international understanding, UNESCO organized a subagency, the International Theater Institute, in 1946. Half its annual expenses is provided by UNESCO, half by the dues paid by the individual national centers throughout the world. The United States is 1 of 40 member nations. The dues of 39 come from national treasuries. We obtain ours by passing a hat among benevolent private citizens.

The classic argument against Government subsidizing is that it stultifies private enterprise. Throughout Europe theaters financed partly or wholly by municipal and national governments stimulate a prosperous competition by thriving privately operated playhouses. In Sweden, where the stage is recnized as a vitally important factor in the nation's health, many cities have established and maintain municipal theaters with the

help of Riksdag funds. Three touring companies sponsored by the government bring drama to small communities. The million residents of Stockholm can attend 17 first-class theaters, 3 of which receive subsidies derived from enormously popular government lotteries, and if anyone tells you that government help for the American theater would mean its ruin because of bureaucratic control, you might point out that not only in Sweden but elsewhere throughout Europe the administrators of subsidized theaters are chosen from individuals recommended by the theater's professional personnel.

Compare this theatrical climate with our own. While encouraging people of the stage to donate their talents to the war effort, Congress during World War I imposed a 10 percent tax on theater tickets with the promise that it would be lifted as soon as hostilities ended. Not only was the tax continued through the twenties and thirties, but when World War II began, the tax was increased to 20 percent. The legislation bringing it about called it an amusement tax. Governmental blindness to the importance of the stage was acutely evident in a statement made by Governor Dewey during a coal shortage. He said that if it continued he might close every pool room, bowling alley, and theater in New York. A few years back the pressure of the movie industry managed to get the ticket tax reduced to the original 10 percent, but as soon as this was achieved a municipal tax was instituted. So today you pay 15 percent tax every time you buy a theater ticket in New York.

It's not only American lawmakers who are in a deep freeze of Puritanic tradition toward the theater. In the vast majority of our universities and college courses in the arts of the theater are taught in departments of English, schools of speech, and so on, which I suppose reconciles sanctimonious trustees to the teaching of theater. They seem to feel that unless the theater is studied for such facets as creative writing, dramatic poetry, public speaking, and other virtuous values, they are risking the spiritual damnation of the students. For in their secret hearts the trustees feel that theater itself, being fundamentally pleasurable, is somehow disreputable. I would not be surprised to learn that somewhere in the United States sculpture is being taught in a school of medicine because of its concern with anatomy.

The average American enjoys the theater as much as the average European, but he regards it as an amusement, a diverting escape from reality rather than an essential food for civilized man. And until that kind of shortsightedness is corrected, we're not going to see far ahead.

Good luck, Mr. President.

CONCURRENT RESOLUTION OF HAWAII LEGISLATURE RELATING TO PEACE CORPS

Mr. LONG of Hawaii. Mr. President, one of the most exciting ideas in recent years is the Peace Corps, recently established by the President in furtherance of the suggestions put forward by the distinguished senior Senator from Minnesota [Mr. HUMPHREY] and other able and dedicated Members of the Congress. The press reports tremendous response from all over the country, and today I have one such response that I would like to share with my colleagues in the Senate.

It is by no means a coincidence, Mr. President, that this response comes from the dedicated members of the legislature of my own State of Hawaii, where we learned decades ago that the way to real understanding of other peoples lies in working with them as human beings who are deserving of human dignity and endowed with the ability to teach as well as to learn.

In pursuance of these thoughts, the Hawaii Legislature has sent me a copy of a concurrent resolution expressing the readiness and willingness of the State of Hawaii and of the people of Hawaii to participate fully in the development of the National Peace Corps program. I have seen no more eloquent statement on the subject, and I therefore ask unanimous consent that the text of the resolution be printed at the conclusion of my remarks in the CONGRESSIONAL RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

CONCURRENT RESOLUTION EXPRESSING THE READINESS AND WILLINGNESS OF THE STATE OF HAWAII AND OF THE PEOPLE OF HAWAII TO PARTICIPATE FULLY IN THE DEVELOPMENT OF THE NATIONAL PEACE CORPS PROGRAM

Whereas President John F. Kennedy on March 1, 1961, by Executive order established a Peace Corps, whose humanitarian aim is the total enrichment of the life of the world through meeting the world's needs for skilled manpower and thereby contributing to peace and understanding; and

Whereas the realization of the noble aims of the Peace Corps is to be accomplished by the recruitment, training, and sending of dedicated, young American men and women into the world; and

Whereas Hawaii's tradition of voluntary service in the cause of world peace is well known and its people have a tradition of special insight in and an instinctive appreciation of the problems involved in attaining the union of races and cultures of the world; and

Whereas the people of Hawaii are recognized throughout the world as leaders in matters of racial understanding and harmony: Now, therefore, be it

Resolved by the senate of the first Legislature of the State of Hawaii, general session of 1961 (the house of representatives concurring), That the President of the United States, John F. Kennedy, and the Director of the Peace Corps, R. Sargent Shriver, be and are hereby respectfully informed that the State of Hawaii and the people of Hawaii express their readiness and willingness to support the programs of the Peace Corps and offer the natural advantages and special assets of Hawaii as a staging center for recruitment and training and to institute, organize, recruit, and make available the necessary training facilities for the fulfillment of the philosophy of the Peace Corps; and be it further

Resolved, That duly authenticated copies of this concurrent resolution be sent to the President of the United States, the Director of the Peace Corps, and to the Senators and Representative to the Congress from Hawaii.

THE MILITARY LOBBY: ITS IMPACT ON CONGRESS AND THE NATION

Mr. PROXMIRE. Mr. President, the current issue of Congressional Quarterly carries an excellent article exploring the warning given the Nation by President Eisenhower on the eve of his retirement that America is threatened by the "unwarranted influence" of a military industrial complex.

Congressional Quarterly explores the basis of the President's warning, examines the role of Congress, reports on the Hébert committee investigation, shows the extent and nature of military influence in the Congress, and sums up the pros and cons of this potential danger.

Mr. President, because I feel that this excellent article should be brought to the attention of all Members of Congress, I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE "MILITARY LOBBY": ITS IMPACT ON CONGRESS, NATION

What led President Eisenhower, on the eve of his retirement, to warn the Nation of unwarranted influence by what he called the military-industrial complex?

What is this complex, what is the nature and extent of its influence, and how is it exercised?

What dangers—if any—are implicit in the situation described by the former President?

These were the principal questions raised by the President's parting words (for text, see below). In an attempt to answer them, Congressional Quarterly culled the record of Presidential press conferences, congressional hearings, and other public documents. In addition, extensive off-the-record interviews were conducted with Members of Congress, representatives of defense contractors, former Government officials, and other persons with pertinent information. Results of this survey of fact and opinion are summarized on the following pages.

"EISENHOWER'S WARNING

"In his final address to the Nation on January 17, President Eisenhower noted that the United States has been compelled to 'create a permanent armaments industry of vast proportions' and to maintain a defense establishment employing 3.5 million persons and spending huge sums. He continued as follows:

" 'This conjunction of an immense military establishment and a large arms industry is new in American experience. The total influence—economic, political, even spiritual—it felt in every city, every statehouse, every office of the Federal Government. We recognize the imperative need for this development. Yet we must not fail to comprehend its grave implications. Our toil, resources and livelihood are all involved; so is the very structure of our society.

" 'In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex. The potential for the disastrous rise of misplaced power exists and will persist. We must never let the weight of this combination endanger our liberties or democratic processes. We should take nothing for granted. Only an alert and knowledgeable citizenry can compel the proper meshing of the huge industrial and military machinery of defense with our peaceful methods and goals, so that security and liberty may prosper together.' "

EISENHOWER'S VIEWS

The President's warning of January 17 was his first public reference to a military-industrial complex. But the concept was in the making for 8 years, during which the President had touched on most of the major components of his final declaration. These were the principal elements of his thinking, as seen by his associates and partially reflected in the record:

National survival, he stated in 1953 and repeatedly thereafter, rested on security with solvency. To achieve this required maximum effort to counter the inherent tendency of Federal expenditures in general, and defense spending in particular, to rise. The

key to success lay in balance—not, as he said April 25, 1958, during his battle with Congress over reorganization, in overindulging sentimental attachments to outmoded military machines and concepts, nor, as he put it January 27, 1960, in heeding the noisy trumpeting about dazzling military schemes or untrustworthy programs.

Ranged against this view, the President realized, was a host of special interests—the armed services and their civilian allies in business and in Congress. Beginning in 1953, when he cut the Air Force budget by $5 billion, the services had repeatedly carried their fight for more funds to Congress and the press. (More than one Member had called him to say that they were changing their votes in response to local pressures generated by the Pentagon.) Obviously political and financial considerations rather than strict military needs were influencing the situation, he said June 3, 1959. If such forces were allowed to prevail, he said March 11, 1959, everybody with any sense knows that we are finally going to a garrison state.

Revered by the Nation as its chief military hero, and respected as its Commander in Chief, the President was confident of his ability to "put need above pressure-group inducement, before local argument, before every kind of any pressure except that that America needs," as he put it February 11, 1960. The star-studded brass of the Pentagon awed him not a bit; "there are too many of these generals who have all sorts of ideas," he said February 3, 1960. Knowing how they operated, however, he feared that his successor—whether Nixon or Kennedy—would be unable to withstand their pressures.

This, according to a close associate, was what impelled the President to speak out as he prepared to leave office. Deeply committed to the goal of disarmament, he was sensitive to the counterinfluence of the military-industrial complex. The extent of his concern was indicated when, at his final press conference, January 18, he described the impact of widespread advertising by missile manufacturers as almost an insidious penetration of our own minds that the only thing this country is engaged in is weaponry and missiles. This, he said, was something "we just can't afford."

BACKGROUND

Defense spending reached its postwar low of $11.1 billion in fiscal 1948. By 1953, the cold war and a hot war in Korea had boosted spending to its postwar high of $43.7 billion. President Eisenhower cut that to $35.5 billion in 1955; thereafter, defense outlays climbed each year, to reach a projected $42.9 billion in fiscal 1962. At no time during his 8 years in office did military spending amount to less than one-half of the Federal budget or less than 8 percent of the Nation's gross national product. All told, the armed services spent $313 billion during the 8 years, fiscal 1954–61; when the costs of military aid, atomic energy, and stockpiling are added, that total mounts to $354 billion.

There is no yardstick by which to measure with precision the economic impact of these expenditures, but there is no question that it has been considerable. According to a 1960 study by the Defense Procurement Subcommittee of the Joint Economic Committee, there were 38 million procurement transactions with a dollar volume of $228 billion from 1950 through 1959. Few areas of the economy were untouched by these purchases of goods and services.

The largest portion of defense spending, however, is allocated to the development, production, and deployment of major weapons systems. In fiscal 1960, when military prime contract awards of $10,000 or more totaled $21 billion, $15.4 billion or 73.4 percent of the total went to 100 companies (or their subsidiaries) of which 65 were engaged primarily in "research, development, test or production of aircraft, missiles, or electronics." (For list of top 100 contractors see end of article.)

Despite the heavy concentration of prime contract awards among a small number of companies (in 1960 five companies accounted for 25 percent of the dollar volume, 21 companies for 50 percent), extensive subcontracting helps to spread procurement expenditures, employment, and profits throughout the country—although not as evenly as some States would like it. In addition, some 1.5 million members of the armed services and almost 1 million civilian employees of the Defense Department are spread throughout the 50 States, with payrolls that totaled $11.4 billion in fiscal 1960. Another $650 million was paid to more than 1 million members of the National Guard and other reserve groups. (For State breakdown of military and civilian personnel and payrolls, as well as procurement actions, see end of article.)

A further indication of the extent of defense-related activities is the wide distribution of facilities. From lists furnished by the military services, Atomic Energy Commission, and National Aeronautics and Space Administration, CQ determined the location of 738 separate installations by congressional district. According to this list, there are one or more installations in 282 of the country's 437 districts. (For list by district, see end of article.)

Taken together, these data suggest the sweeping extent of the Defense Establishment and its economic impact, and provide the background against which to examine the concept of a "military-industrial complex."

HÉBERT PROBE

In mid-1959, the House Armed Services Special Investigations Subcommittee, headed by Representative F. EDWARD HÉBERT, Democrat, of Louisiana, questioned 75 witnesses over 25 days regarding the employment of retired officers by defense industries. The public, said HÉBERT as the hearings began, was alarmed by reports "about the alleged conduct of some military men who depart the ranks of defense for lush places on the payrolls of defense contractors." As it turned out, no real evidence of misconduct was produced. But the hearings shed considerable light on the ramifications of military-industrial relations.

Retired officers: More than 1,400 retired officers in the rank of major or higher—including 261 of general or flag rank—were found to be employed by the top 100 defense contractors. The company employing the largest number (187, including 27 retired generals and admirals) was General Dynamics Corp., headed by former Secretary of the Army Frank Pace, which also received the biggest defense orders of any company in 1960. Duties of these officers, according to the testimony of their employers, encompassed a wide range of technical, management, and "representation" functions. But in no case, it appeared, was the officer involved in "selling" or the negotiation of defense contracts.

Influence: With little variation, retired officers told the Hébert subcommittee that they were "has beens" without influence upon the decisions of their former colleagues still on active duty. None had experienced "pressure" of this kind while still in the service; if any retired officers had asked him for a favor, "I would throw them out on their ear," said Lt. Gen. C. S. Irvine (retired), director of planning for Avco Corp. No one, however, took issue with the statement of Vice Adm. H. G. Rickover that the former jobs of retired officers often were filled "by people who are their dear friends, or even by people whom they have been influential in appointing, and naturally they will be listened to."

Illustrative of this point was the testimony of Adm. William M. Fechteler, retired, former Chief of Naval Operations and a consultant to General Electric's Atomic Products Division. He told of arranging appointments for a GE vice president: "I took him in to see Mr. Gates, the Secretary of the Navy. I took him in to see Admiral Burke. He had not met Admiral Burke before. And then I made appointments with him with the Chief of the Bureau of Ships. But I did not accompany him there, because those are materiel bureaus which make contracts. And I studiously avoid even being in the room when anybody talks about a contract."

Entertainment. Two instances of entertainment by defense contractors came before the Hébert subcommittee. George Bunker, chairman of the Martin Co., acknowledged that his firm had entertained at least 26 active-duty officers at a weekend retreat in the Bahamas. Bunker denied there was any impropriety involved, saying "a man could neither operate nor compete effectively unless he had a close personal relationship." But spokesmen for the Secretaries of the three services agreed that such chuminess "doesn't look well" and could not be condoned.

The second case concerned an invitation to a "small off-the-record party" to discuss the plans and problems of the Air Research and Development Command with its newly promoted chief, Lt. Gen. Bernard S. Schriever. The invitation, sent to Representative HÉBERT and nine other Members of Congress (all but two of whom were members of the Armed Services or Appropriations Committees), was issued by three Air Force contactors: Aerojet-General President Dan A. Kimball (one-time Secretary of the Navy), General Dynamics' Pace, and Martin's Bunker. All three men defended the propriety of the proposed party (which was called off because of the "publicity") as being, in Pace's words, "a means of advancing the interests of the United States of America."

Advertising: Shortly before the Hébert hearings began, a major controversy developed in and out of Congress over the respective merits of two competing antiaircraft missile systems—the Army's Nike-Hercules and the Air Force's Bomarc. Advertisements extolling the virtues of the two systems were inserted in Washington, D.C., newspapers by their prime contractors—Western Electric Co. and Boeing Airplane Co., respectively—while the issue was before Congress. Questioned by the Hébert subcommittee about the timing and purpose of the ads, spokesmen for the companies insisted that they were parts of long-term information programs.

However, Boeing's Harold Mansfield acknowledged that his company was fighting against a campaign of misinformation about the Bomarc, while Western Electric's W. M. Reynolds said the Nike ads had been suggested to the company by the Army. Both companies also acknowledged discussing proposed cutbacks in the Nike and Bomarc programs with Members of Congress from areas where employment would be affected. Said Mansfield: "Many of the most important decisions in the defense of our country are not made by military technicians. They are made in the Congress of the United States. And the Bomarc-Nike decision is one such decision."

Associations: Also questioned by the Hébert subcommittee were representatives of six organizations engaged in promoting the mutual interests of the armed services and their contractors in national security matters. All headquartered in Washington, they are the—

Association of the U.S. Army, with about 63,000 members (including military personnel on active duty) and 1958 income of $290,000, of which $143,000 was revenue from advertising in Army magazine. One of its

aims: To foster public understanding and support of the U.S. Army. Executive vice president: Lt. Gen. W. L. Weible, USA (retired). Among those on its advisory board: Donald Douglas, Jr., president of Douglas Aircraft Co.; Frank Pace, chairman of General Dynamics Corp.; Senators John J. Sparkman, Democrat, of Alabama, and Strom Thurmond, Democrat, of South Carolina.

Navy League, with about 38,000 members (no active duty personnel) and 1958 income of $179,000, plus $32,000 from advertising in Navy—The Magazine of Sea Power. Self-description: The civilian arm of the Navy. President: Frank Gard Jameson. Among those on its advisory council: Dan Kimball, president of Aerojet-General and former Secretary of the Navy; Adm. Robert B. Carney (retired), chairman of Bath Iron Works Shipbuilding Corp. and former Chief of Naval Operations.

Air Force Association, with about 60,000 members (including about 30,000 Air Force personnel) and 1958 income of $1.2 million, including $527,000 from advertising in Air Force and Space Digest. Its aim: To support the achievement of such airpower as is necessary for national security. Executive director: James H. Straubel. Among its directors: 14 employees of defense contractors, including Lt. Gen. James H. Doolittle, USAF (retired) of Space Technology Laboratories.

American Ordnance Association, formerly the Army Ordnance Association, with about 42,000 members and 1958 income of $474,000, of which subscriptions and advertisements in the magazine Ordnance furnished $253,000. Its aim: Armament preparedness. Executive vice president: Col. Leo A. Codd, USAR (retired).

Aerospace Industries Association, formerly the Aircraft Industries Association, a trade association with 79 member companies and 1958 income of $1.4 million in dues ranging up to $75,000 per member. Its aim: To promote the manufacture and sale of aircraft and astronautical vehicles of every nature and description. President: Gen. Orval R. Cook, USAF (retired).

National Security Industrial Association, formerly the Navy Industrial Association, with 502 member companies and 1958 income of $238,000, mostly from dues. Its aim: To establish a close working relationship between industrial concerns and national security agencies. Executive director: Capt. R. N. McFarlane, USN (retired).

According to the testimony of their representatives, none of these groups had anything to do with procurement; all were ignorant of any pressure in behalf of one or another manufacturer. The three service groups acknowledged their interest in building up grassroots support for the respective branches of the Armed Forces; they also maintained that they were fully independent of the services they represented, although the testimony showed that, for the most part, Army, Navy, and Air Force doctrines and weapon systems received enthusiastic support in their respective publications.

All of the groups insisted that their primary function was to inform and educate. Only the Aerospace Industries Association has registered under the lobby law, but General Cook said "we believe we do not operate according to the classic definition of a lobbyist. * * * We don't even dream of buying any influence of any kind." Asked whether the best interests of the industry would be served by an increase or decrease in defense spending, Cook said: "From a selfish point of view, the best interest of the industry would be served by an increase, of course, but from a patriotic and national point of view, it might not be."

Peter J. Schenck, then president of the Air Force Association and an official of Raytheon Corp., described the basis for close military-industrial relations as follows: "The day is past when the military requirement for a major weapons system is set up by the military and passed on to industry to build the hardware. Today it is more likely that the military requirement is the result of joint participation of military and industrial personnel, and it is not unusual for industry's contribution to be a key factor. Indeed there are highly placed military men who sincerely feel that industry currently is setting the pace in the research and development of new weapon systems."

Conclusion: In its report filed January 18, 1960, the Hébert subcommittee said it was "impressed by several obvious inconsistencies in testimony" relating to the influence enjoyed by retired officers in the employment of defense contractors. Said the report: "The better grade and more expensive influence is a very subtle thing when being successfully applied. * * * The 'coincidence' of contract and personal contacts with firms represented by retired officers and retired civilian officials sometimes raises serious doubts as to the complete objectivity of some of these decisions." The subcommittee proposed, among other steps, a much tighter law regarding "sales" to the Government by retired personnel; the House later passed a watered-down version of the proposal. (1959 Almanac, p. 727; 1960 Almanac, p. 279.)

ROLE OF CONGRESS

Charged with the responsibility of appropriating more than $40 billion each year for defense—and in the process deciding how to meet the conflicting claims of competing services for a larger share of the pie—Congress is up to its ears in the military-industrial issue. Collectively, the record shows, the Members strive to sift fact from fancy, and to point up and root out instances of waste and duplication in the defense program. The record also shows that, individually, the Members are zealous in representing the interests of their districts and States. Here are some examples:

Fair share: Documenting his case with facts and figures, Representative HECHLER, Democrat, of West Virginia, told the House on June 1, 1959: "I am firmly against the kind of logrolling which would subject our defense program to narrowly sectional or selfish pulling and hauling. But I am getting pretty hot under the collar about the way my State of West Virginia is shortchanged in Army, Navy, and Air Force installations. I am going to stand up on my hind legs and roar until West Virginia gets the fair treatment she deserves." (HECHLER plans to resume his campaign shortly.)

In the same vein, members of the New York delegation, led by Senators KENNETH B. KEATING, Republican, and JACOB K. JAVITS, Republican, have long complained about the overconcentration of prime contract awards placed with California firms. Asking only for a fair share, they want defense procurement officials to consider the strategic and economic desirability of allocating purchases to different geographic areas of the country. (For military payrolls and prime contracts by State, see end of article.)

Installations: The opening, expansion, cutback, or closing of any military installation is of vital interest to the Member whose area is affected. In recent years, with reductions in the size of the Army and other changes in the composition of defense forces, there have been more closing than openings, and the affected Members have been quick to take issue. Some recent instances: Senator ALBERT GORE, Democrat, of Tennessee, said February 15 that he had written Secretary of the Air Force Eugene M. Zuckert about reports that Sewart Air Force Base at Smyrna, Tenn., might be closed, and had been assured that as of now no change is contemplated which should cause any concern.

Senator OLIN D. JOHNSTON, Democrat, of South Carolina, after calling on President Kennedy February 20, said he had been assured that careful consideration would be given to the future of Fort Jackson at Columbia, S.C., and Donaldson Air Force Base at Greenville, S.C.

Representative SAMUEL S. STRATTON, Democrat, of New York, said March 3 that he had wired Secretary Zuckert about reports of a plan to transfer certain operations from Griffiss Air Force Base at Rome, N.Y. Said STRATTON: "It is fantastic to learn that one more defense department is considering recommendations which would have the effect of increasing unemployment in upstate New York, already hard hit by layoffs."

Representative EMANUEL CELLER, Democrat, of New York, said March 6 that Secretary of Defense Robert S. McNamara had assured him he had no knowledge "of any plans or proposals to shut down the operations" at the Brooklyn Navy Yard.

Procurement: Decisions to begin, accelerate, reduce, or stop production of various weapons and weapon systems are also of major interest to Members in whose districts or States the manufacturers involved are located. Here are examples of Representatives at work:

When the House Appropriations Committee chopped the Air Force's 1959 request for the Bomarc by $162.7 million, Representative DON MAGNUSON, Democrat, of Washington, charged that few Members were aware of "the incredible lengths to which the adherents of the Nike defense system have gone in their attempt to discredit the Bomarc * * *. Of course, this is Army inspired." (Contractor for Bomarc was Boeing Airplane Co., headquartered in Seattle, Wash.)

Also in 1950, Representative John R. Foley, Democrat, of Maryland, offered an amendment to the defense bill to add $10 million to Air Force funds to buy 10 F–27 transports from the Fairchild Aircraft Co. of Hagerstown, Md., in Foley's district. This failed, but the Senate obliged with $11 million. When House conferees refused to go along, Senator J. GLENN BEALL, Republican, of Maryland, begged the Senate to insist, saying that, of the $4 billion to be spent on aircraft, "all we ask for Fairchild is $11 million."

Recent reports that the Pentagon was thinking of cutting back the B–70 program led Representative EDGAR W. HIESTAND, Republican, of California, to write Secretary McNamara February 27 to assure him of "the strong congressional support for this valued program." North American Aviation, Inc., prime contractor for the B–70, is located in HIESTAND'S district.

Reserves: The well-known solicitude shown by Congress for the National Guard and other Reserve forces reflects to some degree a widespread local interest in the payrolls, armories, and other benefits involved, as well as effective work by the National Guard Association and the Reserve Officers Association. Among the 40 Reserve officers in Congress are six generals: Senators BARRY GOLDWATER, Republican, of Arizona, brigadier general, USAFR; HOWARD W. CANNON, Democrat, of Nevada, brigadier general, USAFR; KENNETH B. KEATING, Republican, of New York, brigadier general, USAR; STROM THURMOND, Democrat, of South Carolina, major general, USAR; and Representatives JAMES ROOSEVELT, Democrat, of California, brigadier general, USMCR; and ROBERT L. F. SIKES, Democrat, of Florida, brigadier general, USAR. CANNON and THURMOND are members of the Armed Services Committee; SIKES, of the Defense Appropriations Subcommittee. (For full list of committee members and their military and Reserve status, see end of article.)

President Eisenhower made no headway whatsoever in his 3-year campaign to reduce National Guard and Army Reserve manpower levels to "conform to the changing character and missions" of the Active

Forces; Congress responded with a mandatory floor of 400,000 for the Guard, and funds to maintain both the Guard and the Reserve at full strength. These actions, said the President in his final budget message, "are unnecessarily costing the American people over $80 million annually and have been too long based on other than strictly military needs." Even at the lower strengths he again proposed, the Reserves would cost "well over $1 billion in 1962," he said.

Summing up the cumulative impact of these varied expressions of congressional interest, Representative JAMIE L. WHITTEN, Democrat, of Mississippi, a member of the House Appropriations Defense Subcommittee, testified as follows January 29, 1960, before the Joint Economic Committee's Defense Procurement Subcommittee:

"I am convinced defense is only one of the factors that enter into our determinations for defense spending. The others are pump priming, spreading the immediate benefits of defense spending, taking care of all services, giving all defense contractors a fair share, spreading the military bases to include all sections, etc. There is no State in the Union and hardly a district in a State which doesn't have defense spending, contracting, or a defense establishment. We see the effect in public and congressional insistence on continuing contracts, or operating military bases, though the need has expired."

CASE OF THE ZEUS

The confluence of service, contractor, and congressional pressures is illustrated by the current revival of a campaign to launch production of the Army's Nike-Zeus antimissile system, although final tests are more than a year away. Congress added $137 million to the budget in 1958 to start production, but the President refused to spend it; in his final budget, providing about $287 million for further development of Nike-Zeus, he said, "Funds should not be committed to production until development tests are satisfactorily completed." Subsequently, these things happened.

On February 1 the magazine "Army" appeared with seven articles lauding the Nike-Zeus—four of them by Army commanders on active duty. Also in the issue: full-page advertisements by Western Electric Co., prime contractor for Nike-Zeus, and 8 of its major subcontractors, together with a map showing how much of the $410 million contract was being spent in each of 37 States (but $111 million in California, $110 million in New Jersey). The general message: it's time to start production.

On February 2, Senator THURMOND told the Senate that "we must start production of the Nike-Zeus now." Extolling the "experienced Army-industry team" that developed the system, he argued that "by spending money now to provide a capability for the production of components in quantity, we will save money in the long run." Rising to support his argument were Senators B. EVERETT JORDAN, Democrat, of North Carolina, and FRANK CARLSON, Republican, of Kansas. ("Army's" map showed spending of $36 million in North Carolina and $8.5 million in Kansas.)

On February 7, Representative GEORGE P. MILLER, Democrat, of California, urged every Member of the House to "read the current issue of Army magazine" and to "support immediate action for limited component production of the Nike-Zeus system." MILLER, a member of the Science and Astronautics Committee, said this could be done "with the addition of less than $175 million to the present Army budget."

On February 13, Representative DANIEL J. FLOOD, Democrat, of Pennsylvania, gave the House substantially the same speech delivered February 2 by Senator THURMOND, and also concluded that "we must start production of the Nike-Zeus now." FLOOD appended an article on the subject published by the Sperry Rand Corp., a subcontractor for Nike-Zeus. ("Army's" figure for spending in Pennsylvania: $10 million.)

On February 23, Representative JOHN W. MCCORMACK, Democrat, of Massachusetts, House majority leader, asked every Member to read FLOOD's "prescient address" of February 13. MCCORMACK's conclusion: "Close the gap in our military posture; muzzle the mad-dog missile threat of the Soviet Union; loose the Zeus through America's magnificent production lines, now." ("Army's" figure for Massachusetts: $1.5 million.)

On March 6, the press reported that President Kennedy was expected to approve a Defense Department compromise plan calling for an additional $100 million to $200 million to start tooling up. Eventual costs were estimated at from $5 billion to $20 billion.

EXTENT OF INFLUENCE

Proponents of the Nike-Zeus, it should be noted, base their case squarely on the national interest—the touchstone of debate, pro and con, concerning the merits of every proposal made in the name of defense. It is never clear, however, where the national interest begins and self-interest leaves off.

All of the persons questioned by CQ agreed that an element of self-interest pervades relationships among the services, their contractors, and Members of Congress. There was no consensus, however, regarding the extent to which decisions affecting the national interest are influenced by the self-interest of persons and organizations involved. Here is the gist of these views.

The services: Locked in competition for larger shares of a defense budget that has not kept pace with the soaring costs of new weapons systems, the services toil constantly to "sell" their particular doctrines, programs, and requirements to the public, industry, and Congress. Recent examples: television programs on the Navy's Polaris and "The New Marine," an Army-industry liaison seminar in New Orleans, an Air Force tour of Strategic Air Command Headquarters in Omaha for 35 new Members of Congress.

The services are especially careful of their relations with Congress, particularly with members of the Armed Services and Appropriations Committees. When a senior member of the House Armed Services Committee complained of rumors that a Marine Corps installation might be removed from his district, the Commandant came in person to assure him that no change would be made "so long as I am in the job." A junior committee member, on learning that an unsolicited Army training center was to be located in his district, concluded that "someone" in the Pentagon was looking out for his interests.

There is some truth, all agree, in Representative WHITTEN's statement to the Defense Procurement Subcommittee that "you can look at some of our key people in the key places in Congress and go see how many military establishments are in their districts." One oft-cited example: the State of Georgia, home of the chairmen of both Senate and House Armed Services Committees. (To the proposal that a new Air Force installation be placed in Georgia, one brave general is credited with replying that "one more base would sink the State.")

But Congressmen accustomed to the prevalence of "logrolling" in many other areas see nothing sinister in this situation. The services are generally credited with being "correct" in their dealings with Members; none of those questioned by CQ complained of "pressure" by the services.

The contractors: For many of the major defense contractors, their only client of any importance is the U.S. Government and the bulk of their business is obtained through negotiated contracts with one or more of the armed services. It is a highly competitive field, by all accounts, in which a considerable premium is placed on "good personal relations" with the client. Even those companies doing business exclusively with one service will be found supporting all three service sounding boards: the Air Force Association, Navy League, and Association of the U.S. Army. Entertainment practices vary widely throughout the industry, but no one denies that personal friendships play an important part in shaping working relationships between client and vendor. Two episodes serve to illustrate the point.

In one "competition" for a new weapon system, Navy technicians decided to throw out one proposal on grounds it was based on faulty data. Warned by a Navy friend of the impending decision, the contractor promptly went to the admiral in charge and persuaded him to order a 30-day delay to permit all bidders to submit additional data. (The well-informed contractor failed to win in the end, however.)

An Air Force "competition" for a new missile ended with a top-level decision to award the contract to Company A. Learning of this, the president of Company B went straight to the Secretary and persuaded him to order a complete review of the decision. Result: the contract went to Company B.

Sometimes helped and sometimes hurt by such manifestations of "influence," contractors generally accept it as "part of the game," recognizing that to some degree the outcome reflects a tendency on the part of all three services to take care of companies with whom they have been doing business for some time, before admitting any "outsiders." (Some companies have nevertheless managed to secure important prime contracts from all three services.)

Defense contractors vary in their attitudes toward relations with Congress. Small, new companies, trying to gain a foothold in the defense business, are quick to seek the aid of their Congressmen; established contractors recognize that such intercession may backfire, especially in any attempt to reverse an essentially technical decision by the services. As the Hébert hearings demonstrated, however, contractors are not at all reluctant to solicit the aid of interested Members when (as in the Nike-Bomarc dispute) it is in the mutual interest of all concerned.

Congress: As the elected representatives of their States and districts, Members of Congress take a keen political interest in the economic impact of defense activities in their areas, and are the first to admit it. But few believe that such considerations exert any significant influence over the course of defense spending or the shape of national strategy. The major complaint of some Members is their lack of influence.

Certain members of the Armed Services Committees admit seeking the assignment because of large military installations and defense industries in their States or districts. Others consider themselves fortunate that they do not have such activities—and the local pressures that go along with them—in their own areas. Recognizing that changing military requirements may produce a "boom and bust" effect on any given community, they try to dissuade local enthusiasts who clamor for a new installation.

Outsiders detect a Navy bias in the makeup of the House Armed Services Committee and to a lesser extent, the Senate Armed Services Committee. (Of the former's 37 members, 25 come from coastal States; of the latter's 17 members, 13 are from coastal States.) Committee members acknowledge that some of their colleagues re-

flect a service point of view (10 members of the House committee are active reservists) and that the Navy's position is amply represented; they also contend, however, that there is a minimum of service-oriented partisanship in the work of the committees.

As for dealings with contractors, most Members express doubt concerning both the desirability and feasibility of intervening in procurement decisions. One Senator who did go to bat for one of his constituents (to no avail) found himself under fire from a competitor in the same State. His conclusion: it doesn't pay to get involved.

PROS AND CONS

Does the evidence support President Eisenhower's warning against "the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex"? The answer varies with the individual.

"There is no question that the services and their contractors have an interest in maintaining a high degree of tension in the country," says a senior member of the House Defense Appropriations Subcommittee. But he foresees no threat to the democratic process, although admitting the need to guard against overly intimate relations between soldier, salesman, and legislator.

"There is a real danger that we may go the way of prewar Japan and Germany," says one member of the House Armed Services Committee, who objects to the presence of reserve officers on the committee and sees the appointment of industrialists to top Defense Department posts as a bad practice.

"I don't know what Eisenhower was talking about," says a former Defense Department official. Strong civilian control over the military services can be maintained, he believes, by the selection of a sufficient number of able Presidential appointees, regardless of their industrial background.

"The trouble is that national security has become popular—and the record of congressional appropriations proves it," says a former Eisenhower associate. He sees the military-industrial complex as a "floating power" largely free of any restraint.

Several of those questioned by CQ ascribed the President's concern to overpreoccupation with the budget. Believing that the Nation needs and can afford an even larger defense effort, they were inclined to dismiss his warning as misdirected. This point of view was reflected in Air Force magazine, which characterized reaction to the President's statement as a "flap" and deplored the "small wave of learned essays rehashing all of the irresponsible charges and insinuations that have been bandied around in congressional hearings for the past few years." The great danger, it concluded, was that "an exercise or misdirected caution * * * could menace national security."

The first moves of the Kennedy administration suggest little sympathy with the Eisenhower viewpoint. Orders have been placed for large numbers of additional transport planes. Steps have been taken to speed up defense purchases and "spread the business" in the interests of stimulating the lagging economy. Other proposals under consideration would add substantially to defense spending in the future.

At the same time, the new administration stands pledged to seek an agreement with the Soviets on banning nuclear tests and to pursue the goal of arms control. As yet, the chances of achieving either appear to be so remote as to preclude serious consideration of the possible opposition to any agreement by a "military-industrial complex." It may be worth noting, however, that the American Ordnance Association is calling for the "immediate resumption * * * of nuclear tests for both small and large weapons," and that Ordnance magazine argues that until the Communists' "goal of world dominion * * * is abandoned, there can be no lessening of our armament preparedness."

Top 100 defense contractors in fiscal 1961

[The following 100 companies and their subsidiaries ranked highest in the net value of military contract awards, July 1959–June 1960. Figures for major subsidiaries are included in parentheses]

Rank	Companies	Millions of dollars	Percent of U.S. total
	U.S. total	20,995.0	100.0

NAMES, AGES, SERVICES OF MILITARY COMMITTEE MEMBERS

Following is a listing of members of key congressional committees dealing with military appropriations and general defense matters, with military experience shown where appropriate.

SENATE ARMED SERVICES

Democrats

RICHARD B. RUSSELL, Winder, Ga., 63; chairman 1951–53 and since 1955.

HARRY FLOOD BYRD, Berryville, Va., 73.

JOHN STENNIS, De Kalb, Miss., 59; chairman, Preparedness Investigating Subcommittee.

STUART SYMINGTON, St. Louis, Mo., 59; Secretary of the Air Force, 1947–50.

HENRY M. JACKSON, Everett, Wash., 48, lieutenant colonel, USAR.

SAM J. ERVIN, Jr., Morganton, N.C., 64; Army, World War I.

STROM THURMOND, Aiken, S.C., 58; Army, World War II; major general, USAR; ex-president, Reserve Officers Association.

CLAIR ENGLE, Red Bluff, Calif., 49.

E. L. BARTLETT, Juneau, Alaska, 56.

HOWARD W. CANNON, Las Vegas, Nev., 49; Air Force, World War II; brigadier general, USAFR.

ROBERT C. BYRD, Sophia, W. Va., 42.

Republicans

LEVERETT SALTONSTALL, Dover, Mass., 68; Army, World War I.

STYLES BRIDGES, Concord, N.H., 62.

MARGARET CHASE SMITH, Skowhegan, Maine, 63; lieutenant colonel, USAFR.

FRANCIS CASE, Custer, S. Dak., 64; Marine Corps, World War I.

PRESCOTT BUSH, Greenwich, Conn., 65; Army, World War I.

J. GLENN BEALL, Frostburg, Md., 66; Army, World War I.

SENATE APPROPRIATIONS

Department of Defense Subcommittee

Democrats

DENNIS CHAVEZ, Albuquerque, N. Mex., 72, chairman.

RICHARD B. RUSSELL (see above).

LISTER HILL, Montgomery, Ala., 66; Army, World War I.

JOHN L. MCCLELLAN, Camden, Ark., 65; Army, World War I.

ALLEN J. ELLENDER, Houma, La., 70; Army, World War I.

A. WILLIS ROBERTSON, Lexington, Va., 73, Army, World War I.

JOHN STENNIS (see above).

JOHN O. PASTORE, Cranston, R.I., 53.

ESTES KEFAUVER, Chattanooga, Tenn., 57.

Republicans

LEVERETT SALTONSTALL (see above).

STYLES BRIDGES (see above).

MILTON R. YOUNG, La Moure, N. Dak., 63.

MARGARET CHASE SMITH (see above).

HENRY C. DWORSHAK, Burley, Idaho, 66; Army, World War I.

KARL E. MUNDT, Madison, S. Dak., 60.

HOUSE ARMED SERVICES

Democrats

CARL VINSON, Milledgeville, Ga. (Sixth District), 77; chairman 1949–53 and since 1955, previously chairman Naval Affairs Committee, 1931–47.

PAUL J. KILDAY, San Antonio, Tex. (20th District), 60.

L. MENDEL RIVERS, Charleston, S.C. (First District), 55.

PHILIP J. PHILBIN, Clinton, Mass. (Third District), 62.

F. EDWARD HÉBERT, New Orleans, La. (First District), 59.

ARTHUR WINSTEAD, Philadelphia, Miss. (Fifth District), 57.

MELVIN PRICE, East St. Louis, Ill. (24th District), 56; Army, World War II.

O. CLARK FISHER, San Angelo, Tex. (21st District), 58.

PORTER HARDY, Jr., Norfolk County, Va. (Second District), 58.

CLYDE DOYLE, Los Angeles County, Calif. (23d District), 73.

CHARLES E. BENNETT, Jacksonville, Fla. (Second District), 50; Army, 1942–47.

RICHARD E. LANKFORD, Annapolis, Md. (Fifth District), 46; Navy, 1942–46.

GEORGE HUDDLESTON, Jr., Birmingham, Ala. (Ninth District), 40; Navy, World War II; commander, USNR.

JAMES A. BYRNE, Philadelphia, Pa. (Third District), 54.

A. PAUL KITCHIN, Wadesboro, N.C. (Eighth District), 52.

DANIEL B. BREWSTER, Towson, Md. (Second District), 37; Marine Corps, World War II; Major, USMCR.

FRANK KOWALSKI, Meriden, Conn. (at large), 53; graduate of West Point, retired colonel, USA.

SAMUEL S. STRATTON, Schenectady, N.Y. (32d District), 44; Navy, World War II and Korea; commander, USNR.

JEFFERY COHELAN, Berkeley, Calif. (Seventh District), 46.

VICTOR WICKERSHAM, Mangum, Okla. (Sixth District), 55.

OTIS G. PIKE, Riverhead, N.Y. (First District), 39; Marine Corps, World War II.

Republicans

LESLIE C. ARENDS, Melvin, Ill. (17th District), 65; Navy, World War I.

LEON H. GAVIN, Oil City, Pa. (23d District), 68; Army, World War I.

WALTER NORBLAD, Stayton, Oreg. (First District), 52; Air Force, World War II.

JAMES E. VAN ZANDT, Altoona, Pa. (20th District), 62; Navy, World Wars I and II; captain, USNR; former commander in chief, Veterans of Foreign Wars.

WILLIAM H. BATES, Salem, Mass. (Sixth District), 43; Navy, 1941–50.

GLENARD P. LIPSCOMB, Los Angeles, Calif. (24th District), 45; Army, World War II.

PHIL WEAVER, Falls City, Nebr. (First District), 41; Army, World War II.

WILLIAM E. MINSHALL, Rocky River, Ohio (23d District), 49; Army, 1940–46.

MAJOR DEFENSE INSTALLATIONS, BY STATE AND CONGRESSIONAL DISTRICT

The following list shows the location by State, Congressional district, and town of 738 installations in the United States owned and operated by or for the armed services, the Atomic Energy Commission, and the National Aeronautics and Space Administration, according to information supplied by these agencies. An asterisk (*) denotes that the facility is inactive. Where the name of the installation does not indicate the agency involved, that information appears in parentheses—(A) for Army, (MC) for Marine Corps, etc. Abbreviations are used to designate certain types of installations, as shown. (AFB, Air Force Base; AFS, Air Force Station; MCAAS, Marine Corps Auxiliary Air Station; MCAF, Marine Corps Air Facility; MCAS, Marine Corps Air Station; NAAS, Navy Auxiliary Air Station; NAD, Navy Ammunition Depot; NAF, Naval Air Facility; NAS, Naval Air Station; ND, Naval District; NS, Naval Station.) Names of incumbent Congressmen are in caps and small caps, including 155 for whom no installations were listed.

ALABAMA

1. FRANK W. BOYKIN, Democrat: Brookley AFB, Mobile; Theodore Army Terminal*, Theodore.

2. GEORGE M. GRANT, Democrat: Gunter AFB, Montgomery; Maxwell AFB, Montgomery.

3. GEORGE W. ANDREWS, Democrat: Fort Rucker (A), Daleville.

4. KENNETH A. ROBERTS, Democrat: Craig AFB, Selma; Alabama Ordnance Works* (A), Childersburg; Anniston Ordnance Depot (A), Bynum; Fort McClellan (A), Anniston.

5. ALBERT RAINS, Democrat: Gadsden AFS, Gadsden.

6. ARMISTEAD I. SELDEN, JR., Democrat.

7. CARL ELLIOTT, Democrat.

8. ROBERT E. JONES, Democrat: Phosphate Development Works* (A), Muscle Shoals; Redstone Arsenal (A), Huntsville; Marshall Space Flight Center (NASA), Huntsville.

9. GEORGE HUDDLESTON, JR., Democrat.

ALASKA

A.L. RALPH J. RIVERS, Democrat: NS, Adak; Naval Communication Station, Adak; NS, Kodiak; Naval Communication Station, Kodiak; Eileson AFB; Elmendorf AFB; Fort Richardson (A); Fort Wainwright (A).

ARIZONA

1. JOHN J. RHODES, Republican: NAF, Litchfield Park; Luke AFB, Phoenix; Williams AFB, Chandler.

2. Vacancy: MCAAS, Yuma; Davis-Monthan AFB, Tucson; Fort Huachuca (A), Fort Huachuca; Navajo Ordnance Depot (A), Bellemont; Yuma Test Station (A), Yuma.

ARKANSAS

1. E. C. GATHINGS, Democrat: Blytheville AFB, Blytheville.

2. WILBUR D. MILLS, Democrat.

3. JAMES W. TRIMBLE, Democrat: Fort Chaffee* (A), Fort Smith.

4. OREN HARRIS, Democrat: Shumaker NAD, Camden.

5. DALE ALFORD, Democrat: Little Rock AFB, Little Rock; Maumelle Ordnance Works* (A), West Marche.

6. Vacancy: Pine Bluff Arsenal (A), Pine Bluff; Midwest Chemical Depot (A), Pine Bluff Arsenal.

CALIFORNIA

1. CLEM MILLER, Democrat: Hamilton AFB, San Rafael; Rio Vista Storage Area (A), Rio Vista; Two Rock Ranch Station (A), Petaluma.

2. HAROLD T. JOHNSON, Democrat: Sierra Ordnance Depot (A), Herlong.

3. JOHN E. MOSS, Democrat: Beale AFB, Marysville; Mather AFB, Sacramento; McClellan AFB, Sacramento; Sacramento Signal Depot (A), Sacramento.

4. WILLIAM S. MAILLIARD, Republican: Letterman General Hospital (A), San Francisco; Fort Mason (A), San Francisco; Presidio of San Francisco, San Francisco; Fort Winfield Scott (A), San Francisco.

5. JOHN F. SHELLEY, Democrat: Naval Communication Station, San Francisco; NS, Treasure Isl., San Francisco; Naval Shipyard, San Francisco; Naval Radiological Def. Lab., San Francisco; Marine Corps Supply Forwarding Annex, San Francisco; Public Works Transportation Center, 12th ND, San Francisco; Hdqtrs., 12th ND, San Francisco.

6. JOHN F. BALDWIN, Republican: NAD, Concord; Naval Shipyard, Mare Island, Vallejo; Travis AFB, Fairfield; Benicia Arsenal (Depot) (A), Benicia; Pacific Ordnance Steel Foundry* (A), Pittsburg.

7. JEFFERY COHELAN, Democrat: Naval Supply Center, Oakland; NAS, Oakland; Oakland Army Terminal, Oakland; Lawrence Radiation Laboratory, (AEC), Berkeley.

8. GEORGE P. MILLER, Democrat: NAS Alameda; Naval Hospital, Oakland; Parks AFB, Pleasanton; Alameda Administration Center (A), Alameda; Fort Baker (A), San Francisco; Fort Barry (A), San Francisco; Fort Cronkhite, San Francisco; Camp Parks* (A), Pleasanton; Lawrence Radiation Laboratory, (AEC), Livermore.

9. J. ARTHUR YOUNGER, Republican: District Public Works Office, 12th ND, San Bruno.

10. CHARLES S. GUBSER, Republican: NAS, Moffett Feld; Ames Research Center, (NASA), Moffett Field.

11. JOHN J. MCFALL, Democrat: Riverbank Ordnance Plant* (A), Riverbank; Sharpe General Depot (A), Lathrop.

12. B. F. SISK, Democrat: Castle AFB, Merced.

13. CHARLES M. TEAGUE, Republican: NAF Monterey; Naval Schools Construction, Fort Hueneme; Pacific Missile Range (N), Point Mugu; Postgraduate School (N), Monterey; Yards & Docks Supply Office (N), Port Hueneme; Naval Constr. Battalion Ctr., Port Hueneme; Civil Engineering Laboratory (N), Port Hueneme; Oxnard AFB, Camarillo; Vandenberg AFB, Lompoc; Branch US Disciplinary Barracks* (A), Lompoc; Hunter Liggett Military Reservation (A), Jolon; Presidio of Monterey (A), Monterey; Fort Ord. (A), Monterey; Camp Roberts* (A), San Miguel; Camp San Luis Obispo* (A), San Luis Obispo.

14. HARLAN, HAGEN (Democrat): Edwards AFB, Muroc; Flight Research Center (NASA), Edwards; Naval Ordnance Test Station, China Lake.

15. GORDON I. MCDONOUGH (Republican).

16. ALPHONSO E. BELL, JR. (Republican): Western Operations Office (NASA), Santa Monica; Medical Research Facilities (AEC), University of California, Los Angeles.

17. CECIL R. KING (Democrat): Fort MacArthur (A), San Pedro.

18. CRAIG HOSMER (Republican): NAS Los Alamitos, Long Beach; NS, Long Beach; Naval Shipyard, Long Beach; Long Beach Municipal Airport (AF), Long Beach.

19. CHET HOLIFIELD (Democrat).

20. H. ALLEN SMITH (Republican): Pasadena Area Support Center (A), Pasadena; Jet Propulsion Lab. (NASA), Calif. Inst. of

Tech., Pasadena; Research Facilities (AEC), Calif. Inst. of Tech., Pasadena.

21. EDGAR W. HIESTAND (Republican).

22. JAMES C. CORMAN (Democrat): Birmingham Army Hospital* (A), Van Nuys; Reactor and Research facilities (AEC), Atomics International Division, North American Aviation Inc., Canoga Park.

23. CLYDE DOYLE (Democrat): Cheli AFS, Maywood.

24. GLENARD P. LIPSCOMB (Republican).

25. JOHN H. ROUSSELOT (Republican).

26. JAMES ROOSEVELT (Democrat).

27. HARRY R. SHEPPARD (Democrat): Marine Corps Base, Twentynine Palms; Marine Corps Supply Center, Barstow; Georgia AFB, Victorville; Norton AFB, San Bernardino; Camp Irwin (A), Barstow.

28. JAMES B. UTT, Republican: Marine Corps Base, Camp Pendleton; Naval Hospital, Camp Pendleton; NAS, Miramar; Nav. Ammunition & Net Depot, Seal Beach; MCAF, Santa Ana; MCAS, El Toro, Santa Ana.

29. D. S. SAUND, Democrat: Nav. Ord. Lab., Corona; March AFB, Riverside; Salton Sea Base (AEC), Sandia Corp., Salton Sea.

30. BOB WILSON, Republican: NAAS, Brown Field, Chula Vista; NAAS, Ream Field, Imperial Beach; Naval Communications Trng. Ctr, Imperial Beach; Naval Repair Facility, San Diego; Navy Elect. Lab., San Diego; Marine Corps Recruit Depot, San Diego; Public Works Transportation Center, NS, San Diego; District Public Works Office, 11th ND, San Diego; Naval Hospital, San Diego; Naval Supply Center, San Diego; Fleet Anti-Submarine Warfare School, San Diego; Naval Training Center, San Diego; Naval Retraining Command, Camp Elliott, San Diego; Fleet Training Center (N), San Diego; Naval Amphibious Base, Coronado, San Diego; Fleet Air Defense Training Center (N), San Diego; NS, San Diego; Hdqtrs., 11th ND, NS, San Diego; Naval Communication Station, San Diego; NAS, North Island, San Diego.

COLORADO

1. BYRON G. ROGERS, Democrat: Air Force Accounting & Finance Center, Denver.

2. PETER H. DOMINICK, Republican: Lowry AFB, Denver; Fitzsimons General Hospital (A), Denver; Rocky Mountain Arsenal (A), Denver; Rocky Flats Plant (AEC), Boulder.

3. J. EDGAR CHENOWETH, Republican: Air Force Academy, Colorado Springs; Ent AFB, Colorado Springs; Peterson Field (AF), Colorado Springs; Fort Carson (A), Colorado Springs; Camp Hale (A), Pando; Pueblo Ordnance Depot (A), Avondale.

4. WAYNE N. ASPINALL, Democrat: Uranium handling, sampling, and general facilities (AEC), Grand Junction.

CONNECTICUT

1. EMILIO Q. DADDARIO, Democrat: Submarine reactor facilities (AEC), Windsor.

2. HORACE SEELY-BROWN, JR., Republican: Underwater Sound Lab. (N), New London; Submarine Base (N), New London; Conn. Aircraft Nuclear Engine Lab. (AEC), Middletown.

3. ROBERT N. GIAIMO, Democrat: Line accelerators (AEC), Yale University, New Haven.

4. ABNER W. SIBAL, Republican.

5. JOHN S. MONAGAN, Democrat.

AL. FRANK KOWALSKI, Democrat.

DELAWARE

AL. HARRIS B. MCDOWELL, JR., Democrat: Dover AFB, Dover; Lenape Ordnance Modification Center (A), Newark; Fort Miles* (A), Lewes.

DISTRICT OF COLUMBIA

NAS, Anacostia; Naval Weapons Plant; Headquarters, Potomac River Naval Command; Naval Observatory; Naval Security Station; Naval Research Laboratory; NS; Military Petroleum Supply Agency (N); Area Public Works Office (N); Hdqtrs. Battalion, Hdqtrs. Marine Corps; Bolling AFB; Washington National Airport (AF); Army Map Service; Diamond Ordnance Fuze Laboratories (A); Fort Lesley J. McNair (A); Walter Reed Army Medical Center.

FLORIDA

1. WILLIAM C. CRAMER, (Republican): MacDill AFB, Tampa; Pinellas Plant (AEC), General Electric Co., Clearwater.

2. CHARLES E. BENNETT, (Democrat): NAS, Cecil Field; NAS, Jacksonville, Yellow Water, Naval Magazine, Cecil Field; NS, Mayport; Naval Hospital, Jacksonville.

3. ROBERT L. F. SIKES, (Democrat): NAS, Pensacola; NAAS, Whiting Field, Milton; NAAS, Saufley Field, Pensacola; Naval Aviation Medical Center, Pensacola; Navy Mine Defense Lab. Panama City; Eglin AFB, Valparaiso; Eglin AF Auxiliary Field No. 9, Valparaiso; Graham Air Base (AF), Marianna; Tyndall AFB, Panama City.

4. DANTE B. FASCELL, (Democrat): NAS, Key West; NS, Key West; Fleet Sonar School (N), Key West; Naval Hospital, Key West; Homestead AFB, Homestead; Miami International (AF), Miami.

5. A. SYDNEY HERLONG, JR., Democrat: NAS, Sanford; McCoy AFB, Orlando; Orlando AFB, Orlando; Patrick AFB, Cocoa Launch Operations Directorate (NASA), Titusville.

6. PAUL G. ROGERS, Democrat: Boca Raton AF Auxiliary Field, Boca Raton; Palm Beach AFB, West Palm Beach Radio Tracking Facility (NASA), Fort Myers.

7. JAMES A. HALEY, Democrat: Bartow Air Base, Bartow.

8. D. R. MATTHEWS, (Democrat).

GEORGIA

1. G. ELLIOTT HAGAN, Democrat: Hunter AFB, Savannah; Fort Stewart (A), Hinesville.

2. J. L. PILCHER, Democrat: Marine Corps Supply Center, Albany; Bainbridge Air Base (AF), Bainbridge; Spence Air Base (AF), Moultrie; Turner AFB, Albany.

3. E. L. FORRESTER, Democrat: Navy Forms & Publications Supply Office, Byron; Robbins AFB, Warner Robins; Fort Benning (A), Columbus.

4. JOHN J. FLYNT, JR., Democrat: Atlanta General Depot (A), Forest Park.

5. JAMES C. DAVIS, Democrat: Fort McPherson (A), Atlanta.

6. CARL VINSON, Democrat: Naval Ordnance Plant, Macon.

7. JOHN W. DAVIS, Democrat: NAS Atlanta, Marietta; Dobbins AFB, Marietta.

8. IRIS F. BLITCH, Democrat: Clynco NAS, Brunswick; Moody AFB, Valdosta; King's Bay Army Terminal*, St. Marys.

9. PHIL LANDRUM, Democrat.

10. ROBERT G. STEPHENS, JR., Democrat: Navy Supply Corps School, Athens; Fort Gordon (A), Grovetown.

HAWAII

AL. DANIEL K. INOUYE, Democrat: Barber's Point NAS, Oahu; Pearl Harbor NAS, Ford Island; Naval Ammunition Depot, Oahu; Kaneohe Bay MCAS, Oahu; Naval Communications Station, Pearl Harbor; Hdqtrs., 14th ND, Pearl Harbor; NS, Pearl Harbor; Fleet Training Center (N), Pearl Harbor; Naval Supply Center, Pearl Harbor; Public Works Center, Naval Base, Pearl Harbor; 14th District Public Works Office (N), Pearl Harbor; Marine Barracks, Naval Base, Pearl Harbor; Camp H. M. Smith (MC), Halawa Heights, Oahu; Naval Shipyard, Pearl Harbor; Submarine Base (N), Pearl Harbor; Hickam AFB; Wheeler AFB; Fort Shafter (A); Schofield Barracks (A).

IDAHO

1. GRACIE PFOST, Democrat.

2. RALPH R. HARDING, Democrat: Naval Ordnance Plant, Pocatello; Mountain Home AFB, Mountain Home; National Reactor Testing Station (AEC), ARCO.

ILLINOIS

1. WILLIAM L. DAWSON, Democrat.

2. BARRATT O'HARA, Democrat: U.S. Army Area Support Center, Chicago.

3. WILLIAM T. MURPHY, Democrat.

4. EDWARD J. DERWINSKI, Republican.

5. JOHN C. KLUCZYNSKI, Democrat: Chicago Administration Center (A).

6. THOMAS J. O'BRIEN, Democrat.

7. ROLAND V. LIBONATI, Democrat.

8. DANIEL ROSTENKOWSKI, Democrat.

9. SIDNEY R. YATES, Democrat.

10. HAROLD R. COLLIER, Republican: Naval Ordnance Plant, Forest Park.

11. ROMAN C. PUCINSKI, Democrat: Chicago Ordnance Plant* (A), Chicago.

12. EDWARD R. FINNEGAN, Democrat.

13. MARGUERITE STITT CHURCH, Republican: NAS, Glenview; Hdqtrs., 9th ND, Great Lakes; Naval Training Center, Great Lakes; Electronics Supply Office (N), Great Lakes; Naval Supply Depot, Great Lakes; Naval Hospital, Great Lakes; District Public Works Office, 9th ND, Great Lakes; O'Hare International Airport (AF), Chicago; Fort Sheridan (A), Highwood.

14. ELMER J. HOFFMAN, Republican: Argonne National Laboratory (AEC), Argonne.

15. NOAH M. MASON, Republican: Elwood Ordnance Plant (A), Elwood; Kankakee Ordnance Works* (A), Elwood.

16. JOHN B. ANDERSON, Republican: Green River Ordnance Plant* (A), Dixon; Rockford Ordnance Plant (A), Rockford; Savanna Ordnance Depot (A), Savanna.

17. LESLIE C. ARENDS, Republican.

18. ROBERT H. MICHEL, Republican.

19. ROBERT B. CHIPERFIELD, Republican.

20. PAUL FINDLEY, Republican.

21. PETER F. MACK, JR., Democrat.

22. WILLIAM L. SPRINGER, Republican: Chanute AFB, Rantoul; Decatur Signal Depot (A), Decatur; Materials Research Laboratory (AEC), Champaign.

23. GEORGE E. SHIPLEY, Democrat.

24. MELVIN PRICE, Democrat: Scott AFB Belleville; Granite City Engineer Depot, Granite City.

25. KENNETH J. GRAY, Democrat.

INDIANA

1. RAY J. MADDEN, Democrat: East Chicago Ordnance Steel Foundry* (A), East Chicago.

2. CHARLES A. HALLECK, Republican.

3. JOHN BRADEMAS, Democrat: Kingsbury Ordnance plant* (A), La Porte; Radiation Laboratory (AEC), South Bend.

4. E. ROSS ADAIR, Republican.

5. Seat in doubt: Bunker Hill Air Force Base, Peru.

6. RICHARD L. ROUDEBUSH, Republican: Wabash River Ordnance Works* (A), Newport.

7. WILLIAM G. BRAY, Republican: NAD, Crane.

8. WINFIELD K. DENTON, Democrat: Hoosier Ordnance Plant* (A), Charlestown; Indiana Ordnance Works* (A), Charlestown.

9. EARL WILSON, Republican: Bakalar AFB, Columbus; Camp Atterbury* (A), Edinburg; Jefferson Proving Ground* (A), Madison.

10. RALPH HARVEY, Republican.

11. DONALD C. BRUCE, Republican: Naval Avionics Facility, Indianapolis; Fort Benjamin Harrison (A), Indianapolis.

IOWA

1. FRED SCHWENGEL, Republican: Iowa Ordnance Plant (AEC), Burlington.

2. JAMES E. BROMWELL, Republican.

3. H. R. GROSS, Republican.

4. JOHN KYL, Republican.

5. NEAL SMITH, Democrat: Research Laboratory (AEC), Iowa State College, Ames.

6. MERWIN COAD, Democrat.

7. BEN F. JENSEN, Republican.

8. CHARLES B. HOEVEN, Republican: Sioux City Municipal Airport (AF), Sioux City.

KANSAS

1. WILLIAM H. AVERY, Republican: Forbes AFB, Topeka; Topeka Air Force Station, Topeka; Fort Leavenworth (A), Leavenworth.

2. ROBERT F. ELLSWORTH, Republican, NAS, Olathe; Sunflower Ordnance Works* (A), De Soto.
3. WALTER L. MCVEY, Republican: Kansas Ordnance Plant* (A), Parsons.
4. GARNER E. SHRIVER, Republican: McConnell AFB, Wichita; Fort Riley (A), Junction City.
5. J. FLOYD BREEDING, Democrat.
6. ROBERT DOLE, Republican: Schilling AFB, Salina.

KENTUCKY

1. FRANK A. STUBBLEFIELD, Democrat: Paducah Gaseous Diffusion Plant (AEC), Paducah.
2. WILLIAM H. NATCHER, Democrat: Camp Breckenridge* (A), Morganfield.
3. FRANK W. BURKE, Democrat: Naval Ordnance Plant, Louisville; Louisville Medical Depot (A), Louisville.
4. FRANK CHELF, Democrat: Fort Knox (A), Fort Knox.
5. BRENT SPENCE, Democrat.
6. JOHN C. WATTS, Democrat: Blue Grass Ordnance Depot (A), Fort Estill; Lexington Signal Depot (A), Avon.
7. CARL D. PERKINS, Democrat.
8. EUGENE SILER, Republican.

LOUISIANA

1. F. EDWARD HÉBERT, Democrat: NAS, New Orleans; Hdqtrs, 8th ND, New Orleans; NS, New Orleans; Camp Leroy Johnson (A), New Orleans; Michoud Ordnance Plant* (A), New Orleans; New Orleans Army Terminal, New Orleans.
2. HALE BOGGS, Democrat.
3. EDWIN E. WILLIS, Democrat: NAAS, New Iberia.
4. OVERTON BROOKS, Democrat: Barksdale AFB, Shreveport; Louisiana Ordnance Plant* (A), Doyline.
5. OTTO E. PASSMAN, Democrat.
6. JAMES H. MORRISON, Democrat.
7. T. ASHTON THOMPSON, Democrat: Chennault AFB, Lake Charles.
8. HAROLD B. MCSWEEN, Democrat: England AFB, Alexandria; Fort Polk* (A), Leesville.

MAINE

1. PETER A. GARLAND, Republican: NAS, Brunswick; Fort Williams (A), Portland.
2. STANLEY R. TUPPER, Republican.
3. CLIFFORD G. MCINTIRE, Republican: Naval Security Group Activity, Winter Harbor; Dow AFB, Bangor; Loring AFB, Limestone; Presque Isle AFB, Presque Isle.

MARYLAND

MASSACHUSETTS

1. SILVIO O. CONTE, Republican.
2. EDWARD P. BOLAND, Democrat: Westover AFB, Chicopee Falls; Springfield Armory (A), Springfield.
3. PHILIP P. PHILBIN, Democrat: Maynard Quartermaster Test Activity, Maynard.
4. HAROLD D. DONOHUE, Democrat.
5. F. BRADFORD MORSE, Republican: Laurence G. Hanscom Field (AF), Bedford; Fort Dawes (A), Boston; Fort Devens (A), Ayer; Watertown Arsenal (A), Watertown; Raw Materials Development Laboratory (AEC), Winchester.
6. WILLIAM H. BATES, Republican.
7. THOMAS J. LANE, Democrat: Naval Hospital, Chelsea; Naval Shipyard, Boston; Fort Banks (A), Winthrop.
8. TORBERT H. MACDONALD, Democrat.
9. HASTINGS KEITH, Republican: NAD, Hingham; Otis AFB, Falmouth; Fort Rodman (A), New Bedford; Camp Wellfleet (A), South Wellfleet.
10. LAURENCE CURTIS, Republican.
11. THOMAS P. O'NEILL, JR., Democrat: Cambridge Electronics Research (AF), Cambridge; Electron accelerator (AEC), Harvard University, Cambridge.
12. JOHN W. MCCORMACK, Democrat: Hdqtrs., 1st ND, Boston; NS, Boston; Boston Army Base, Boston.
13. JAMES A. BURKE, Democrat: NAS, South Weymouth.
14. JOSEPH W. MARTIN, JR., Republican: Quartermaster Research & Engineering Center (A), Natick.

MICHIGAN

1. THADDEUS M. MACHROWICZ, Democrat.
2. GEORGE MEADER, Republican: NAS, Grosse Ile; Willow Run Airport (AF), Belleville.
3. AUGUST E. JOHANSEN, Republican: Fort Custer* (A), Battle Creek.
4. CLARE E. HOFFMAN, Republican.
5. GERALD R. FORD, JR., Republican.
6. CHARLES E. CHAMBERLAIN, Republican.
7. JAMES G. O'HARA, Democrat: Selfridge AFB, Mount Clemens; Detroit Arsenal (A), Center Line Michigan Ordnance Missile Plant (A), Warren.
8. JAMES HARVEY, Republican.
9. ROBERT P. GRIFFIN, Republican: Muskegon Ordnance Plant (A), Muskegon.
10. ELFORD A. CEDERBERG, Republican: Wurtsmith AFB, Oscoda.
11. VICTOR A. KNOX, Republican: Kincheloe AFB, Kinross, Camp Lucas* (A), Sault Ste. Marie.
12. JOHN B. BENNETT, Republican: K. I. Sawyer Airport (AF), Marquette.
13. CHARLES C. DIGGS, JR., Democrat.
14. LOUIS C. RABAUT, Democrat.
15. JOHN D. DINGELL, Democrat.
16. JOHN LESINSKI, Democrat: Fort Wayne (A), Detroit.
17. MARTHA W. GRIFFITHS, Democrat.
18. WILLIAM S. BROOMFIELD, Republican.

MINNESOTA

1. ALBERT H. QUIE, Republican.
2. ANCHER NELSEN, Republican.
3. CLARK MACGREGOR, Republican; NAS Minneapolis, Minneapolis-St. Paul International Airport (AF), Minneapolis; Twin Cities Arsenal* (A), New Brighton.
4. JOSEPH E. KARTH, Democrat.
5. WALTER H. JUDD, Republican: Linear accelerator (AEC), University of Minnesota, Minneapolis.
6. FRED MARSHALL, Democrat: Boiling Water power reactor (AEC), Elk River.
7. H. CARL ANDERSEN, Republican.
8. JOHN A. BLATNIK, Democrat: Duluth Municipal Airport (AF), Duluth.
9. ODIN LANGEN, Republican.

MISSISSIPPI

1. THOMAS G. ABERNETHY, Democrat: Columbus AFB, Columbus; Gulf Ordnance Plant* (A), Prairie.
2. JAMIE L. WHITTEN, Democrat.
3. FRANK E. SMITH, Democrat: Greenville AFB, Greenville.
4. JOHN BELL WILLIAMS, Democrat.
5. ARTHUR WINSTEAD, Democrat.
6. WILLIAM M. COLMER, Democrat: Naval Constr. Battalion Ctr., Gulfport; Keesler AFB, Biloxi.

MISSOURI

1. FRANK M. KARSTEN, Democrat: St. Louis Ordnance Plant* (A), St. Louis.
2. THOMAS B. CURTIS, Republican: Air Force Records Center, St. Louis; St. Louis Ordnance Steel Foundry* (A), St. Louis.
3. LEONOR K. SULLIVAN, Democrat: Aeronautical Chart & Information Center (AF), St. Louis; St. Louis Area Support Center (A), St. Louis.
4. WILLIAM J. RANDALL, Democrat: Richards-Gebaur AFB, Grandview; Whiteman AFB, Knob Noster; Lake City Arsenal (A), Lake City.
5. RICHARD BOLLING, Democrat: Kansas City Plant (AEC), Kansas City.
6. W. R. HULL, JR., Democrat.
7. DURWARD G. HALL, Republican: Fort Crowder* (A), Neosho.
8. RICHARD ICHORD, Democrat: Fort Leonard Wood (A), Waynesville.
9. CLARENCE CANNON, Democrat: Feed Materials Plant (AEC), Weldon Spring.
10. PAUL C. JONES, Democrat: Malden Air Base, Malden.
11. MORGAN M. MOULDER, Democrat.

MONTANA

1. ARNOLD OLSEN, Democrat.
2. JAMES F. BATTIN, Republican: Glasgow AFB, Glasgow; Malstrom AFB, Great Falls.

NEBRASKA

1. PHIL WEAVER, Republican: NAD, Hastings; Sodium graphite power reactor (AEC), Hallam.
2. GLENN CUNNINGHAM, Republican: Lincoln AFB, Lincoln; Offutt AFB, Omaha.
3. RALPH F. BEERMANN, Republican: Nebraska Ordnance Plant* (A), Mead.
4. DAVE MARTIN, Republican: Cornhusker Ordnance Plant* (A), Grand Island; Sioux Ordnance Depot (A), Sidney.

NEVADA

AL. WALTER S. BARING, Democrat: NAAS, Fallon; NAD, Hawthorne; Indian Springs AFB, Indian Springs; Nellis AFB, Las Vegas; Stead AFB, Reno; Camp Desert Rock (A), Indian Springs; Mercury Nevada Test Site (AEC); Tonopah Research Facilities (AEC).

NEW HAMPSHIRE

1. CHESTER E. MERROW, Republican: Naval Retraining Command, Portsmouth; Naval Hospital, Portsmouth; Naval Shipyard, Portsmouth; Grenier AFB, Manchester; Pease AFB, Portsmouth.
2. PERKINS BASS, Republican.

NEW JERSEY

1. WILLIAM T. CAHILL, Republican: Merchant ship reactor (AEC), Camden.
2. MILTON W. GLENN, Republican.
3. JAMES C. AUCHINCLOSS, Republican: NAS, Lakehurst; NAD, Earle; Fort Dix (A), Wrightstown; Fort Hancock (A) Highlands; Fort Monmouth (A), Oceanport; Raritan Arsenal, Metuchen.
4. FRANK THOMPSON, JR., Democrat: Naval Air Turbine Test Station, Trenton; McGuire AFB, Wrightstown; Burlington Ordnance Plant* (A), Burlington; Camp Kilmer* (A), Stelton; Princeton Research facilities (AEC), Princeton.
5. PETER FRELINGHUYSEN, JR., Republican: Nav. Air Rocket Test Sta., Dover; Picatinny Arsenal (A), Picatinny; Picatinny Arsenal Ordnance Facility (AEC), Dover.
6. FLORENCE P. DWYER, Republican: New Brunswick Laboratory (AEC), New Brunswick.
7. WILLIAM B. WIDNALL, Republican.
8. CHARLES S. JOELSON, Democrat.
9. FRANK C. OSMERS, JR., Republican.
10. PETER W. RODINO, JR., Democrat.
11. HUGH J. ADDONZIO, Democrat.
12. GEORGE M. WALLHAUSER, Republican.
13. CORNELIUS E. GALLAGHER, Democrat: Naval Supply Center, Bayonne; Caven Point Army Terminal*, Jersey City.
14. DOMINICK V. DANIELS, Democrat.

NEW MEXICO

AL. JOSEPH M. MONTOYA, Democrat.

AL. THOMAS C. MORRIS, Democrat: Naval Ord. Missile Test Fac., White Sands, Alamonon AFB, Clovis; Holloman AFB, Alamogordo; Kirtland AFB, Albuquerque; Walker AFB, Roswell; Sandia Base (A), Albuquerque; White Sands Missile Range (A), Las Cruces; Fort Wingate Ordnance Depot (A), Gallup; Sandia Laboratory (AEC), Albuquerque; South Albuquerque Works (AEC), Albuquerque; Los Alamos Scientific Laboratory (AEC), Los Alamos.

NEW YORK

1. OTIS G. PIKE, Democrat: Suffolk County AFB, Westhampton Beach; Camp Hero* (A), Montauk; Brookhaven National Laboratory (AEC), Upton.

2. STEVEN B. DEROUNIAN, Republican: U.S. Naval Training Device Center, Port Washington; Mitchell AFB, Hempstead.

3. FRANK J. BECKER, Republican.

4. SEYMOUR HALPERN, Republican: Fort Totten (A), Bayside.

11. EMANUEL CELLER, Democrat: Fort Hamilton (A), Brooklyn; Fort Tilden (A), Rockaway Park.

12. HUGH L. CAREY, Democrat: NAS, Brooklyn.

13. ABRAHAM J. MULTER, Democrat: Military Medical Supply Agency (N), Brooklyn; Manhattan Beach AFS, Sheepshead Bay.

14. JOHN J. ROONEY, Democrat: Brooklyn Army Terminal, Brooklyn.

15. JOHN H. RAY, Republican: Fort Wadsworth (A), Staten Island.

16. ADAM C. POWELL, Democrat.

17. JOHN V. LINDSAY, Republican.

18. ALFRED E. SANTANGELO, Democrat.

19. LEONARD FARBSTEIN, Democrat: Hdqtrs., 3rd ND, N.Y.; Fort Jay (A), Governors Island; Miller Field (A), Staten Island.

20. WILLIAM F. RYAN, Democrat.

21. HERBERT ZELENKO, Democrat: Accelerator and research facilities (AEC), Columbia University, N.Y.

22. JAMES C. HEALEY, Democrat.

23. JACOB H. GILBERT, Democrat.

24. CHARLES A. BUCKLEY, Democrat.

25. PAUL A. FINO, Republican.

26. EDWIN B. DOOLEY, Republican: Fort Slocum (A), New Rochelle.

27. ROBERT R. BARRY, Republican: Cold Spring Battery Plant (A), Cold Spring.

28. KATHARINE ST. GEORGE, Republican: Stewart AFB, Newburgh; U.S. Military Academy (A), West Point.

29. J. ERNEST WHARTON, Republican.

30. LEO W. O'BRIEN, Democrat: Watervliet Arsenal (A), Watervliet.

31. CARLETON J. KING, Republican: Plattsburgh AFB, Plattsburgh Malta Test Station* (A), Malta; Knolls Atomic Power Laboratory (AEC), West Milton.

32. SAMUEL S. STRATTON, Democrat: Schenectady General Depot (A), Schnectady; Knolls Atomic Power Laboratory (AEC), Schenectady.

33. CLARENCE E. KILBURN, Republican: Camp Drum* (A), Watertown.

34. ALEXANDER PIRNIE, Republican: Griffiss AFB, Rome.

35. R. WALTER RIEHLMAN, Republican.

36. JOHN TABER, Republican: Seneca Ordnance Depot (A), Romulus.

37. HOWARD W. ROBISON, Republican.

38. JESSICA MCC. WEIS, Republican: Research laboratory (AEC), University of Rochester, Rochester.

39. HAROLD C. OSTERTAG, Republican.

40. WILLIAM E. MILLER, Republican: Niagara Falls Municipal Airport (AF), Niagara Falls; Niagara Falls Chemical Plant* (A), Niagara Falls; Fort Niagara (A), Youngstown; Boron Plant (AEC), Niagara Falls.

41. THADDEUS J. DULSKI, Democrat.

42. JOHN R. PILLION, Republican.

43. CHARLES E. GOODELL, Republican.

NORTH CAROLINA

1. HERBERT C. BONNER, Democrat.

2. L. H. FOUNTAIN, Democrat.

3. DAVID N. HENDERSON, Democrat: MCAS, Cherry Point: MCAF, New River, Jacksonville; Naval Hospital, Camp Lejeune; Marine Corps Base, Camp Lejeune; Seymour-Johnson AFB, Goldsboro.

4. HAROLD D. COOLEY, Democrat.

5. RALPH J. SCOTT, Democrat.

6. HORACE R. KORNEGAY, Democrat: Tarheel Ordnance Plant (A), Burlington.

7. ALTON LENNON, Democrat: Pope AFB Fort Bragg; Fort Bragg (A), Fayetteville; Sonny Point Army Terminal, Southport.

8. A. PAUL KITCHIN, Democrat: Camp Mackall (A), Hoffman.

9. HUGH Q. ALEXANDER, Democrat.

10. CHARLES RAPER JONAS, Republican: Charlotte Ordnance Missile Plant (A), Charlotte.

11. BASIL L. WHITENER, Democrat.

12. ROY A. TAYLOR, Democrat.

NORTH DAKOTA

AL. DON SHORT, Republican.

AL. HJALMAR C. NYGAARD, Republican: Grand Forks AFB, Grand Forks; Minot AFB, Minot; Fort Lincoln* (A), Bismarck.

OHIO

1. GORDON H. SCHERER, Republican.

2. DONALD D. CLANCY, Republican: Ridgewood Ordnance Plant* (A), Cincinnati; Aircraft nuclear propulsion facilities (AEC), Lockland.

3. PAUL F. SCHENCK, Republican: Gentile AFS, Dayton; Feed Materials Plant (AEC), Fernald Mound Laboratory (AEC), Miamisburg.

4. WILLIAM M. MCCULLOCH, Republican: Lima Ordnance Modification Center* (A), Lima; Lima Ordnance Steel Foundry* (A), Lima; Organic moderated power reactors (AEC), Piqua.

5. DELBERT L. LATTA, Republican: Erie Ordnance Depot (A), Port Clinton.

6. WILLIAM H. HARSHA, Jr., Republican: Portsmouth Gaseous Diffusion Plant (AEC), Portsmouth.

7. CLARENCE J. BROWN, Republican: Wright-Patterson AFB, Dayton; Clinton County AFB, Wilmington.

8. JACKSON E. BETTS, Republican: Marion Engineer Depot (A), Marion.

9. THOMAS L. ASHLEY, Democrat: Rossford Ordnance Depot (A), Toledo.

10. WALTER H. MOELLER, Democrat.

11. ROBERT E. COOK, Democrat: Lordstown Military Reservation (A), Lordstown; Ravenna Arsenal* (A), Ravenna Arsenal.

12. SAMUEL L. DEVINE, Republican: Lockbourne AFB, Columbus; Columbus General Depot (A), Columbus; Fort Hayes* (A), Columbus.

13. CHARLES A. MOSHER, Republican: Navy Finance Center, Cleveland; Plum Brook Ordnance Works* (A), Sandusky.

14. WILLIAM H. AYRES, Republican.

15. TOM V. MOORHEAD, Republican.

16. FRANK T. BOW, Republican.

17. JOHN M. ASHBROOK, Republican: Wilkins AFS, Shelby.

18. WAYNE L. HAYS, Democrat.

19. MICHAEL J. KIRWAN, Democrat: Youngstown Municipal Airport (AF), Youngstown.

20. MICHAEL A. FEIGHAN, Democrat.

21. CHARLES A. VANIK, Democrat.

22. FRANCES P. BOLTON, Republican.

REMARKS BY DISTRICT OF COLUMBIA REPUBLICAN CHAIRMAN CARL L. SHIPLEY

Mr. GOLDWATER. Mr. President, on Monday, March 20, 1960, my esteemed friend and colleague, the senior Senator from West Virginia [Mr. RANDOLPH] took the floor to chastise Mr. Carl L. Shipley, Republican chairman of the District of Columbia. Because my colleague did not insert all of the remarks made by Mr. Shipley, and because I know that he would want to maintain his customary accuracy in this instance, I ask unanimous consent that a summary of the remarks made which are in question be inserted at this point in my remarks:

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF REMARKS BY DISTRICT OF COLUMBIA REPUBLICAN CHAIRMAN CARL L. SHIPLEY TO DISTRICT OF COLUMBIA YOUNG REPUBLICAN COLLEGE FEDERATION CONVENTION AT THE AMERICAN UNIVERSITY, MARCH 18, 1961

We Republicans face a heavy responsibility during the next 4 years in the role of a loyal opposition. Recently Democratic Congressman VINSON referred in Congress to "the healthy differences of opinion that are a part of the two-party system and the heart of

democracy." Several weeks ago the Rockefeller brothers issued a report in which they said: "What is a defining characteristic of political democracy is the existence, legally and officially, of an organized party in opposition to the party in power. The subtle notion of a loyal opposition takes us to the center of the democratic process of government. In the large perspective, the opposition party is really part of the government. Its presence means that democratic government is forced to seek as broad and tolerable a synthesis of interest as possible, and that the minority will be represented to some degree in the policies such a government eventually adopts."

This same report goes on to explain that it is within and not only between the two great political parties in the United States that a major part of the struggle between competing interests has taken place, and has been softened and negotiated.

Former President Conant of Harvard frequently refers to college students as "that distinguished society of educated men and women." With the air filled with talk of a Peace Corps, former President Eisenhower's suggestion 18-year-olds be allowed to vote, and Federal aid to education, the world is turning more and more to the vigor and leadership of younger people. Today college students have the obligation to identify themselves with one of the two great political parties. For the good of our country I hope it will be the Republican Party. As Republicans they must share in discharging the responsibilities of a loyal opposition. How can this be done? First, join the party, become a member of a Republican club or study group, such as the Young Republicans, the League of Republican Women, the Republican Club, or similar party organizations. Second, organize Republican groups on the campus. Third, get copies of the Republican and Democratic platforms. Compare the basic proposals. You will find the Republican Party places emphasis on individual self-reliance. The Democratic Party submerges the individual in collectivism. This is the great divide which makes the goals of the Republican and Democratic Parties as different as night and day.

College students, engaged as they are in the field of learning, should criticize constructively the words and deeds of the Kennedy administration. I will tell you a good place to start today.

A few days ago President Kennedy launched another of his schemes in the great Kennedy giveaway sweepstakes, which seeks to solve every problem by creating a new Government bureau and asking Congress for more money to launch another program. His latest is a request for $500 million for Latin America.

Only a few weeks ago Mr. Kennedy was campaigning on the theme that Republicans had allowed Cuba to fall under Communist domination, that we had failed to enforce the Monroe Doctrine, that we had allowed our friends in Cuba to fall under the alien spell of Soviet Russia, and allowed an alien philosophy to establish a foothold in the Western Hemisphere. He stated again and again that if elected he would set this matter right at once. Those were the words. What deeds translate those lofty words into the promised results? The answer is "none." The Cuban situation is steadily deteriorating. It is an ill-concealed political secret that he has set the stage for a similar disaster in Brazil. Apparently he is going to let those friendly people drift out on the tide. Time magazine this week carries a part of the story about Mr. Kennedy's Latin American troubleshooter, Adolf Berle, a retreaded New Dealer Mr. Kennedy sent out on a personal mission to Brazil's new President Quadros. In Time's language, "Berle stuck out his hand to say goodbye. Quadros refused to shake it, then turned his back on the special envoy of the President of the United States." Unfortunately, Mr. Kennedy is concealing the facts with respect to Brazil.

What is the result of 6 weeks of Kennedy management of our foreign affairs? The Government of Brazil has insulted Mr. Kennedy's food-for-peace mission, insulted Mr. Kennedy's personal representative Berle, and has resumed diplomatic relations with Russian satellite nations as a prelude to establishing closer ties with the Soviet Union. Brazilian officials are inviting such pro-Russian figures as Yugoslavia's Tito, India's Nehru and Ghana's Nkrumah, and others to Brazil. Brazil has also announced it may vote for Red China's admission to the United Nations, and may support Khrushchev's plan to reorganize the U.N. into complete impotence, and favors nonintervention and self-determination in Cuba—in other words, Brazil supports Castro.

The loss of Brazil to pro-Russian neutralism will be a major disaster for the United States.

The Kennedy administration is doing nothing about this ominous development, and is following a calculated policy of concealing from the American people the deterioration of our relations with Brazil. If Brazil is lost, other Latin American countries will soon follow. Then the political integrity of the Western Hemisphere and the safety of the United States will be in serious peril. It is time for President Kennedy, his family and friends of the administration, to divert some effort from philosophical proposals like the Peace Corps and the 10-year Latin American program, and get things moving now to stop the spread of neutralism and procommunism in Latin America.

College students are in an excellent position to focus public attention on the Brazilian fiasco, and to criticize lack of action by the Kennedy administration in the field of foreign affairs. I have cited Brazil as just one example. Since Mr. Kennedy has been in office, we have suffered serious losses in Laos. All of southeast Asia may slip into the hands of our enemies unless we do something. South Africa has withdrawn from the British Commonwealth, and will probably withdraw from the United Nations. Mr. Kennedy, dreaming along on his political honeymoon, is ignoring the facts. The Kennedy administration has already let us drift into serious difficulties. No doubt they hope this bad dream will go away before the honeymoon is over.

I urge you to join with students on college campuses all across the country in a call for action on the cold war front. The Kennedy administration has been losing the cold war on all fronts since it came into office on January 20. As Republicans and as good citizens you have the responsibility to arouse all Americans and give them the facts. The Kennedy administration, despite its campaign promises to get things moving, is losing the cold war on every front from Laos to Berlin at an alarming rate. And all the while President Kennedy is holding TV press conferences and announcing new programs and calling on Congress for more money. The sober truth is that he is exercising no leadership, he is doing nothing, and the Kennedy administration gives promise of being the greatest "do nothing" administration in the history of our Republic.

God bless each of you and God help all of us.

Mr. GOLDWATER. Mr. President, I would call my colleague from West Virginia's attention to this statement because in it is an explanation of the need for opposition. In these remarks my colleague will notice that Mr. Shipley has called attention to the fact that nothing has been done in Cuba; that dangerous developments have occurred in Brazil about which nothing is being done—at least, nothing that we know of. Mr. Shipley further calls for action on the cold-war front, but in this he is not alone. The American people are clamoring for this. Had Mr. Shipley's remarks been made after the President's decision on Laos, I am certain Mr. Shipley would have applauded this action, as have all Republicans.

Mr. Shipley was merely exercising his prerogative as a member of the opposition party, and I hope he will continue to exercise it. In doing this he might have called attention to the fact that while we have continued unemployment, nothing constructive has been done toward putting men back to work. We have only made it possible to provide assistance during unemployment, and I suggest that American workingmen would much rather have jobs than to be out of them. To approach this problem the New Frontier is merely using warmed-over versions of the New Deal-Fair Deal, which never pulled this country out of a depression in the 1930's. In fact, the United States was the last country in the world to come out of that depression. As Mr. John K. Galbraith has said in his book, "American Capitalism—The Concept of Countervailing Power," it took the mobilization for war to achieve an end to that depression.

To support Mr. Galbraith's contention, I ask unanimous consent to have printed in the RECORD a table covering the period 1929 through 1940.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	Disposable personal income (8)	U.S. population (including armed forces overseas) (9)	Disposable personal income per capita (8)/(9) (10)	Consumer Price Index (1947–49=100) (11)	Real disposable personal income per capita [1] (10)/(11) (12)	U.S. employment (13)	U.S. unemployment (14)	Unemployed as percent of civilian labor force (15)
	Billions	*Millions*				*Millions*	*Millions*	
1929	$83.1	121.9	$682	73.3	$930	47.6	1.6	3.2
1930	74.4	123.2	604	71.4	846	45.5	4.3	8.7
1931	63.8	124.1	514	65.0	791	42.4	8.0	15.9
1932	48.7	124.9	390	58.4	668	38.9	12.1	23.6
1933	45.7	125.7	364	55.3	658	38.8	12.8	24.9
1934	52.0	126.5	411	57.2	719	40.9	11.3	21.7
1935	58.3	127.4	458	58.7	780	42.3	10.6	20.1
1936	66.2	128.2	516	59.3	870	44.4	9.0	16.9
1937	71.0	129.0	550	61.4	896	46.3	7.7	14.3
1938	65.7	130.0	505	60.3	837	44.2	10.4	19.0
1939	70.4	131.0	537	59.4	904	45.8	9.5	17.2
1940	76.1	132.1	576	59.9	962	47.5	8.1	14.6

THE B–70

Mr. GOLDWATER. Mr. President, during the presidential election campaign, Mr. Kennedy called repeatedly for vigorous development and deployment of the most modern weapon systems possible. In his state of the Union message, the President supported the modernization of our forces and weapon systems. And, more recently, press dispatches claim the President is planning to place primary military emphasis on new weapons.

I fully support this emphasis on modern weapons systems, and it is my sincere hope it means the administration has decided to give the go-ahead signal for full and rapid development of the B–70 Mach 3 bomber now being constructed by the North American Aviation Co., in California. To most of us who are interested in aviation and in the ultimate category of weapons for the protection of our national interests, the B–70 program makes more sense than anything else being developed in the weapons line today.

This plane, Mr. President, has been called the most amazing plane in the world, and I believe anyone who becomes conversant with the capabilities of the B–70—even in an era which continually shocks the credulity of the layman—will agree that the title is appropriate. This plane embodies an entirely new aeronautical technology in propulsion, aerodynamics, structural material, airconditioning, reliability, and electronics.

It took half a century to bring the speed of operational aircraft up to the sound barrier. But the B–70 will not only be the first aircraft to cruise supersonically for intercontinental distances, it will also be the first operational aircraft to breach the thermal barrier. In one technical leap, it will be able to fly four times faster that its predecessor, the intercontinental B–52. This is an amazing feat of American ingenuity which, I believe, must be pursued to completion if the administration is serious about providing arms so formidable that we can be confident "beyond doubt" that they will never have to be used.

On the subject of speed, I have heard it said that the Mach 3 of the B–70 is unimpressive compared with ballistic missile speeds. But the missile's speed is not constant throughout its flight. It slows down as it reenters the atmosphere, and when it actually impacts it is going slower than the B–70 flies. True, no reasonable defense against the ballistic missile, taking advantage of this terminal slowdown, has been developed. But neither does the Soviet Union have any defensive weapon, either on the ground or in the air, that has a reasonable chance of shooting down a Mach 3 B–70 bomber.

Furthermore, speed must be valued in relation to a weapon's other capabilities. The B–70 has capabilities which missiles cannot match. It can vary the altitude and direction of attack, can use evasive action, can use tactical diversions, feints, and a combination of two or more forces attacking from different directions, to confuse the enemy. It can bring human judgment and decision, which must always be the most essential elements of combat, directly into the target area. It can bring itself and its crew back to its base to fly again and again. And it can be used in conflicts of any intensity, from a brush-fire war to an all-out nuclear exchange.

Mr. President, let me emphasize that the B–70 is not simply one among many weapons systems competing for defense dollars. Because it has unique and vital capabilities unparalleled by other weapons, it is not competitive, but complementary to them.

It is the only weapon planned as the successor of the B–52 intercontinental bomber, which has been and is the mainstay of our deterrent strength.

In its time period, the B–70 will be the only weapon providing versatility of action to an American striking force which, without it, would be composed entirely of ballistic missiles.

It will be the only Air Force deterrent weapon capable of getting clear of the ground in case of an unconfirmed warning of attack, and in this way assuring a potential enemy that he could not escape retaliation.

It will be the only U.S. strategic weapon capable of seeking out and destroying targets on the basis of actual observation, and thus will be the only weapon useful against such vital targets as mobile missile launchers and installation of uncertain location of ill-defined coordinates.

Mr. President, the current administration has put itself forward as the essence of novelty. The word "new" has been its touchstone. President Kennedy has not only called for new and modern weapons systems, but he has also specifically supported the B–70.

I, therefore, believe that the Congress, which was responsible for having the B–70 reinstated to a full weapon system last year, has a right to expect that the new administration will suit action to words, and will push the B–70 weapon system to operational status with all possible speed.

FORTY YEARS OF HONORABLE SERVICE BY WILLIAM C. ACKERMAN AT UCLA

Mr. KUCHEL. Mr. President, generations of undergraduates who have attended one of California's nationally known educational institutions, the University of California at Los Angeles, have fond and grateful recollections of a staff member who has spent virtually his entire life on the Westwood campus. Within a few weeks, deserved tribute will be paid by alumni, civic and governmental leaders, associates, and others to William C. Ackerman, a highly respected figure who has contributed generously and significantly to a host of activities and undertakings in the collegiate and athletic worlds.

Although personally I received my higher education at a university which is known by sportswriters as a traditional rival of UCLA, I long have known the affection and regard in which Bill Ackerman has won a coveted reputation as counselor, mentor, and inspiring leader in collegiate and civic affairs. His unselfish, enthusiastic participation in sports has been widely appreciated throughout southern California.

Since receiving his sheepskin in 1924 as a member of the first 4-year class graduated from UCLA, Bill Ackerman literally has been wrapped up in affairs of that institution. Nonetheless, he has managed to find time for a variety of off-campus activities. For more than a quarter century the coach of tennis, he produced 10 teams of racket-wielders which won titles in the southern division of the Pacific Coast Conference. His service at the university includes several years as director of athletics and a period as baseball coach. He worthily was honored in 1947 as UCLA's Alumnus of the Year. In the broader sports world he is likewise well known, having served as cochairman of the Los Angeles Coliseum relays, member of the Southern California Committee for the Olympic Games, the Olympic Games Tennis Committee, and the National Collegiate Athletic Association Tennis Committee.

It is heart warming to know that a virtual communitywide dinner will bespeak the appreciation felt for this devotion to this great educational institution, its long parade of students, and the cause of good sportsmanship.

FEDERAL AID TO EDUCATION

Mr. DIRKSEN. Mr. President, in the course of the hearings on the various bills to provide Federal aid for education there appeared before the Education Subcommittee of the Senate Committee on Labor and Public Welfare Mr. Roger A. Freeman, of Claremont, Calif. Mr. Freeman is a research associate at the Institute for Studies in Federalism at Claremont Men's College, and also connected with the Institute for Social Science Research in Washington.

For a great many years Mr. Freeman has made special studies in the field of Federal aid for education and, in my judgment, certainly qualifies as one of the truly authentic authorities in this field. His testimony before the Education Subcommittee was truly revealing and should be examined by every Member of the Senate in order to familiarize himself with the issues involved. I ask leave, therefore, to have Mr. Freeman's statement printed in the RECORD as a part of my remarks.

In addition thereto, I ask leave to include a statement submitted by the Investment Bankers Association of America. This statement was also presented to the Education Subcommittee on March 14 and is accompanied by a table showing the number of bond issues and the amounts involved which were validated in the various States of the Union for elementary and secondary school purposes.

In addition, there is one other appendix to indicate the number of school bond issues which were sold in the week of February 27 to March 3, 1961. This information is as current as any which can be obtained and should prove highly informative and useful to the Members.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF ROGER A. FREEMAN, CLAREMONT, CALIF., BEFORE THE SUBCOMMITTEE ON EDUCATION OF THE COMMITTEE ON LABOR AND PUBLIC WELFARE, U.S. SENATE, 87TH CONGRESS, 1ST SESSION, ON MARCH 13, 1961

My name is Roger A. Freeman, I am a research associate at the Institute for Studies in Federalism at Claremont Men's College, Claremont, Calif., and also connected with the Institute for Social Science Research in Washington. I am appearing before your committee at the invitation of your chairman. I received his telegram asking me to testify only last week and, because of other commitments, have had to prepare this statement in considerable haste. For this reason, I request that I be permitted to edit my testimony before it is inserted in the record of the committee.

For the information of your committee, I would like to state that I directed the research of the Education Committee of the U.S. Commission on Intergovernmental Relations in 1954–55, served as a consultant on school finance to the White House Conference on Education, and subsequently worked in the White House Office, Executive Office of the President, before I entered upon my present assignment. Previously, I had been assistant to the Governor of the State of Washington for about 6 years. Opinions I may express are entirely my own and do not in any way aim to reflect the views of any of the organizations with which I am or was connected.

School revenues have shown a consistent rise in the postwar period, when measured against the national income, and virtually all of those who in recent years have studied the outlook for school finances are agreed that taxes for school purposes are likely to continue to climb over the next 10 years.

Public school revenues as a percentage of the national income, 1946–61

	Percent
1945–46	1.7
1949–50	2.4
1954–55	2.7
1959–60	3.4
1960–61 (estimate)	3.5

There is, however, no agreement on the type of taxes—income, sales or property—which ought to be increased, nor on the levels of government—Federal, State, or local—which should accept the responsibility for it.

The National Tax Association, the country's leading professional society of teachers, administrators, and practitioners in the field of taxation, appointed in 1957 a committee on the financing of public education and gave it the assignment to study and report on the financing of the public elementary and secondary schools. The committee, under my chairmanship, has been at work for over 3 years and completed its report in January 1961. It recommends various methods by which school revenues can be lifted to a level of about $24 billion by the end of the 1960's. On some policy issues a majority and a minority view is expressed. In my testimony I intend to lean heavily on the findings of that committee in regard to sources of taxation for school purposes.

The report will appear in the "Proceedings of the 53d Annual Conference on Taxation," now in the printing stage, and scheduled to be published in April 1961. I am submitting a copy of the report for the information of your committee and any use it may wish to make of it.

Most of the bills which are under consideration by your committee would increase the Federal school contribution, which so far has been relatively small, by amounts which equal 5 percent of the school budget or less. Most of the Federal support to this date has been in the form of agricultural commodities or other school lunch aid and in the nature of payments in lieu-of-taxes to federally impacted areas. The grants-in-aid for educational school programs equal less than 1 percent of the school budget and slightly over one-tenth of 1 percent of the Federal budget.

The legislative proposals for Federal school aid before the 87th Congress may be classified as follows:

(a) Grants for general school support; this includes S. 8 by Senator MCNAMARA, S. 723 by Senator COOPER, and S. 1021 by Senator MORSE.

(b) Grants for school construction; this includes S. 433 by Senator DIRKSEN (some bills before the House of Representatives also propose loans).

(c) Sharing of certain Federal revenues with the States, with the proceeds earmarked for education; this includes S. 293 by Senator COTTON.

(d) Federal income-tax credits for payment of local school taxes or tuition payments; this includes S. 991 by Senator GOLDWATER and S. 792 by Senator KEATING.

1. THE EFFECT OF FEDERAL AID ON SCHOOL FINANCES

Most of the school-aid bills before the 87th Congress would allocate between $250 million and $1 billion in Federal funds annually to the States, with the typical amounts around $700 million.

The public school budget now totals over $16 billion and is projected to rise to at least $24 billion, and possibly as much as $31 billion, by the end of the 1960's. It is apparent that the bills now under consideration would make only a minor contribution—barely more than a token—to the overall requirements of the schools and leave most of the problem of augmenting, within 10 years, school funds by between 75 percent and 100 percent with the States. These proposals either assume that the States have the capacity to raise, for example, $23 billion or $30 billion a year for the schools but cannot raise the one additional billion or they are intended as the start of a Federal program which, within a few years, will climb to between $5 and $8 billion annually.

It is difficult to predict what effect these proposals would have on the level of school finances. States and communities have been increasing their school support more rapidly than has generally been expected. For example, the White House Conference on Education proposed that school funds be doubled within 10 years. But in 6 years which have since passed, school revenues rose at a decennial rate of 153 percent, and the increase between 1950 and 1960 equaled 152 percent.

The growth in school support in the postwar period has been on an accelerating rate. Increases in school revenues averaged $527 million annually in the 7 years 1945–46 through 1952–53; $940 million annually in the 8 years 1953–54 through 1960–61. The increase in each of the past 2 years exceeded $1 billion. Better than 95 percent of these amounts were provided by States and communities. The crucial question is whether State and local support will continue to improve at its current rate if Federal funds are made available for school purposes.

Several of the bills such as S. 1021 (H.R. 4970), S. 8 (H.R. 446), or S. 723 would impose upon States whose expenditures or effort decline, and two of the bills require certain year-to-year increases. But even the comparatively stringent formula in S. 1021 would exempt most States from penalties and could not prevent States from a material slowdown in the improvement of State and local support.

Federal school aid has widely been proposed as an alternative to higher State and local taxes. For example a recent report stated: "In Pennsylvania, Governor Lawrence holds off proposing any substantial increase in State aid for schools in the new budget; he looks instead to Congress to authorize Federal educational grants for States."

That this view is neither new nor unique is apparent from something that Woodrow Wilson wrote in 1886 when Federal aid was being debated in Congress as intensely as it is today: "It was evident that no increase in the State appropriation for public education would be voted as long as there was the least prospect of aid from Washington * * * there was deliberate determination to enjoy the easy position of a beneficiary of the National Government to the fullest possible extent, rather than to be independent and support a good school system by its own unaided efforts."

It is very doubtful whether States and communities will continue to raise school support from their own sources by a billion dollars each year if a program of Federal aid is adopted. At least part of the Federal funds would thus serve as a substitute for State and local support rather than as an addition to the school budget.

If, for example, it were assumed that the funds under the President's program (S. 1021 and H.R. 4970) were divided equally between construction and teachers' salaries, the picture might be as follows: $333 million could build approximately 7,500 classrooms, or slightly more than 10 percent of the 70,000 now annually built by States and communities. If about one project in five were eligible for Federal matching many boards of education would tend to defer their building plans for one or several years until they too become eligible. School bond issues—now at a record high both in amount and in approval percentage—might fall more often, as many communities would be reluctant to approve proposals which carry no Federal funds.

If the other half of the Federal appropriation were applied to teachers' salaries (thus not augmenting the number of teachers but raising their salaries) it would finance a salary increase of about $200 in the first year of the program and of another $30 in each of the 2 succeeding years. States and communities have increased teachers' salaries by an average of $230 in each of the past 8 years. Would State legislatures and communities be as willing as they have been to vote for higher taxes for raising teachers' salaries if Federal aid for that purpose were made available?

Such questions are difficult to answer but they must be taken into consideration when considering the various aid proposals. It is doubtful whether programs which supply relatively small amounts of Federal funds would raise the overall level of school finances by very much. They would accomplish their purpose, however, if the substitution of Federal funds for State and local funds as such is held desirable because it would enhance the influence of the professional administrators upon school policies. It certainly would make them less dependent upon the good will and approval of State legislatures, boards of education, communities and parents.

2. THE EFFECT OF FEDERAL AID ON SCHOOL CONTROL

Most of the bills declare that they intend to leave the control of education with the States, and several bills specifically forbid Federal departments or employees to exercise control over the schools. There is, however, a considerable difference in the effect which the several types of plans would have on the making of educational policy.

The proposals for tax credits or for the sharing of revenues would leave the power of making decisions about where it is now located. They would use the Federal tax machinery for educational purposes by one of two methods: they would either channel Fed-

erally-collected funds to the States or they would enable States and communities to collect higher taxes and fees whose burden would be borne by the general Federal taxpayer rather than by the communities which make the expenditure.

Particularly some of the tax credit proposals would tend to strengthen the influence of parents, and of local residents in general, upon school affairs, and distribute benefits fairly to all children. They would run counter to the suggestion which has received considerable attention in recent years, that the influence of the professional educators and administrators upon school policies ought to be broadened and reenforced.

One objection to tax sharing proposals has been that they would, so to speak, leave the money where it is, in other words not redistribute the funds as between high-income and low-income States. This is correct. But the effect of the so-called equalizing aid formulas in narrowing the fiscal capacity among the States is very small. The difference in the size of the grant between the highest and the lowest States in the administration bill (S. 1021 and H.R. 4970) is $4.45 per capita of population. The incidence of Federal taxation among the States varies from $961 to $178 per capita, which is a difference of $783. In other words the differential impact of Federal taxation is more than a hundred times greater than the impact of the distribution formula in the proposed school grant program would be. The effect of the program in more nearly equalizing fiscal capacity among the States would be diminutive compared with the working of the Federal tax system.

The House of Representatives twice adopted an amendment which would have employed the revenue sharing principle for educational purposes, once in regard to 1 percent of the income tax collections and once in regard to 25 percent of the cigarette tax collections. Both actions were subsequently rescinded.

Another possibility of using the Federal taxing machinery for the support of State and local public services would be a so-called block grant. For example, Great Britain in 1958 combined the 12 major functional grants of the National Government to local authorities into one unconditional purely fiscal grant. This method makes centrally collected funds available to local governments but leaves the control over their activities in local hands.

Opposition to any type of tax credit, revenue sharing, or unconditional fiscal grant seems to relate to the fact that the funds would be channeled from the U.S. Treasury to the State treasuries, bypass the Federal and State departments of education, and thus leave policy decisions with the general State and local authorities.

Most of the grant-type bills before the 87th Congress propose that each State educational agency use its own judgment in drafting a plan on the division of funds as to purpose and among the several districts within a State, subject to the approval of the U.S. Commissioner of Education. Those bills would tremendously strengthen the position of State departments of education versus the general State and local authorities. It is significant that most of the bills while outlawing control of local schools by a Federal agency, impose very stringent controls, and in effect, mandates, upon State legislatures.

Proposals for Federal school aid have often become enmeshed in a debate of whether they will or will not lead to Federal control. I tend to agree with Max Lerner who in a significant article in the Journal of the National Education Association (October 1958) stated:

"The choice before us is not a choice between the control of education by local officials and by National Government officials: that is not the choice, and don't let anyone tell us it is. The choice is between control by people who have not given their lives to education and control by people who have given their lives to it."

The significant effect of the grant-in-aid type bills probably would be a shift in control from general State and local authorities, that is from State legislatures, parents, and communities, in other words from lay persons, to the nationally organized educational administrators at Federal, State, and local levels. Such a shift is held desirable, necessary, or inevitable by many. The school administrators' journal Overview editorialized in November 1960: "The United States is inexorably moving toward a national system of education * * * the long-held views that education is largely a personal concern and that educational policy should be made by local units of government will have to go * * * the national welfare demands a national system of education." Dozens of similar statements from leading educational administrators and professors of education could be cited.

On the other hand, many persons hold that just as war is too important to be left to the generals, education is too important to be left to the educators.

The fact is that most—though not all—of the school administrators who have appeared before congressional committees to testify on Federal aid proposals have spoken in favor of grant programs controlled by State departments of education. When the Governors of the States were polled by the House Committee on Education and Labor in 1959, they spoke overwhelmingly in opposition to Federal aid. None of the tens of thousands of State and local boards of education has appeared to testify on behalf of Federal school aid for at least the past 5 years, but some have testified against it. The National School Boards Association has refused to endorse or support Federal aid.

In summary: Federal funds could be provided for local schools by several methods which would not result in a change in educational control. The adoption of grant-type school aid programs however would significantly alter the power structure and policy directions in the American public schools.

The most frequently cited purpose of Federal aid to schools is a substantial increase in funds which is held necessary, first because of rising enrollments and, second, because of existing shortages of classrooms and teachers. It appears therefore appropriate to review the prospects of enrollment and classroom and teacher supply.

3. THE ENROLLMENT OUTLOOK

The decade of the 1950's saw the most spectacular expansion of the school-age population. The number of young people between 5 and 17 years of age jumped by 46 percent. As of now the "tidal wave" has all but passed. Between 1960 and 1970 the school-age population will grow only 20 percent. The annual increase in the past 5 years averaged 1.5 million. Between 1965 and 1970 it will average only 644,000 a year.

Enrollment in the public schools grew 1.2 million annually in the past 5 years; in the second half of the 1960's it will increase less than 600,000 a year. It is not that the entering classes will be smaller but the difference between the entering and the leaving classes will decline sharply as the war and postwar babies start to graduate.

Actually, public schools never faced nor managed as difficult a situation as did the private schools. While public enrollment grew 42 percent over the past 20 years, private enrollment jumped a dramatic 147 percent. We may speculate about the cause of this extraordinary shift from public to private schools which occurred in spite of the fact that class sizes are much larger and overcrowding far worse in most private schools. Be that as it may, the population projections of the Bureau of the Census prove beyond doubt that the worst of the big enrollment expansion in the public schools is almost over. Growth will continue on a more moderate scale.

4. THE CLASSROOM SHORTAGE

The Office of Education reported a classroom shortage as of the fall of 1960 of 142,100 classrooms. The report—as its predecessor a year earlier—was sharply criticized by examiners of the Bureau of the Budget, held up for some time, but finally released by the former Secretary of Health, Education, and Welfare on his last day in office, January 19, 1961. It can be better evaluated in a historical perspective.

Congress in 1950, ordered a national school facilities survey. It was undertaken at a cost of more than $5 million and reported a shortage of 312,000 classrooms. Then, in the fall of 1954 the U.S. Commissioner of Education testified that the shortage had grown to 370,000 and other responsible officials predicted that it would, within 3 years, rise to 600,000.

When the White House Conference on Education soon after polled the States, it arrived at a shortage of 198,625. Finding itself under a barrage of criticism, the Office of Education revised its estimates, and its annual canvass of classroom shortages started coming down until it hit a low of 132,400 in the fall of 1959. A year later it reported a shortage of 142,100 classrooms. This was 230,000 less than had been reported 6 years earlier, and 360,000 fewer than had been predicted.

But the new figure does not seem to be any more reliable than the earlier ones. Statistics for the years 1956 and 1960 taken from the reports of the Office of Education, were inserted in the CONGRESSIONAL RECORD of January 31, 1961 and show this 4-year comparison: enrollment had grown 4.8 million children who required the addition of 171,000 classrooms. The number of classrooms in use—after deducting those which had been abandoned—has increased by 252,000 which left 81,000 classrooms for the reduction of shortages which existed in the fall of 1956. But the shortage reported by the Office of Education had been reduced by only 17,000. This means—and a detailed analysis confirms it—that several States had meanwhile "upped" their shortages by 64,000 classrooms by either raising their standards or reevaluating their needs. Actually in those 4 years enrollment had increased 15 percent, the number of classrooms in use 23 percent, and the number of pupils per classroom had declined from 29.0 to 27.1.

These figures may appear dry but they are significant. They prove that the various shortage reports are not all internally consistent nor using standards which would permit valid comparisons from year to year and add up to a meaningful national total. They largely express the opinion of hundreds of individuals all over the country, which fluctuate from year to year, from State to State, from school district to school district.

With several reevaluations taking place each year in a number of States, the reported shortages could go up at a very rapid rate or continue to run erratically, as they have for the past decade. The Budget Bureau examiners commented correctly that these are not reports upon which valid conclusions in regard to national policies could be formed. The race between shortage reports and construction is like greyhounds chasing a mechanical hare. The hare always wins.

The incontestable fact is that over the past decade more than 600,000 classrooms were completed while the increased attendance required the addition of only 400,000. This means that over 200,000 new classrooms were made available to replace old ones and

to reduce class sizes. That it was possible to accomplish this in the decade of the most rapid enrollment growth demonstrates, more dramatically than words could, the faith of the American people in education. This record is the result of thousands of communities voting bond issues and higher taxes year after year. It may be well to note that the new public schools, built in the postwar period, now house close to 20 million American children—compared with schools for 9 million children which—according to their own claims—the Russians built in the same span of time.

The statistics of the Office of Education about children in excess of normal enrollment are even less reliable than classroom reports, as a comparative analysis proves, and as the Budget Bureau examiners found on a field inspection trip to nine States in 1960.

But to judge the outlook in the classroom situation we do not need to spend more time with these statistics, although the more closely they are analyzed, the more misleading they turn out to be.

In his education message on February 20, 1961, President Kennedy said: "In order to meet current needs and accommodate increasing enrollments, if every child is to have the opportunity of a full day education in an adequate classroom, a total of 600,000 classrooms must be constructed during the next 10 years."

The figure of 600,000 over the next 10 years—an average of 60,000 a year—is based on estimates which the Office of Education prepared during 1960, and which accept all shortage claims at face value, regardless of their validity. I may mention that this is exactly the figure at which I arrived in a study of "School Needs in the Decade Ahead," published in 1958 (pp. 203–204).

Now 60,000 classrooms a year may appear to be a big order until it is recalled that States and communities have been building 70,000 classrooms each year for the past 5 years. This means that the volume of school construction can materially decline during the 1960's and still produce all the classrooms the public schools reasonably require. The reason for this reduced need is apparent from the earlier cited enrollment projections: While in recent years 40,000 classrooms a year were needed just to house the additional enrollment, we shall need only 20,000 classrooms a year for that purpose when enrollment increases drop to half their present size in the later 1960's.

There were complaints last year from the then Secretary of Health, Education, and Welfare and others that school construction was declining and that action was urgently called for to meet this emergency. We know now, from more recent reports of the Department of Health, Education, and Welfare, that school construction did not decline at all. We know also that in the school year 1959–60 the public schools had 360,000 fewer pupils but 7,000 more classrooms and 10,000 more teachers than Congress and the public were told early in 1960. The figures were quietly adjusted after the 86th Congress had adjourned.

At the present time there is no indication of a proximate decline in school building activity; quite the contrary. The Investment Bankers Association of America just reported that the amount of school bonds approved at elections and the approval percentage reached new record highs of $1.8 billion and 81 percent respectively in 1960. January 1961 again established a new record.

Because of the considerable interval between bond approval and completion of work, a high volume of school construction appears to be assured for some time to come. The Department of Commerce estimated that public educational construction would increase 8 percent in 1961 over 1960.

The so-called taxpayers' revolt belongs in the realm of fiction, as does the exhausted fiscal capacity of thousands of communities needing classrooms. The Department of Health, Education, and Welfare conducted a telegraphic survey among chief State school officers slightly over a year ago and found that only 237 school districts were reported as having exhausted their legal capacity, needing classrooms, and having no access to funds. No attempt was made to verify the reports from the 237 districts, most of which were small. But even at that, the survey does not suggest a critical situation among the country's 40,000 school districts.

In summary: The school building situation has shown a tremendous improvement in the past decade and is continuing to improve. States and communities are building classrooms at a more rapid rate than they will need to maintain through the 1960's. Some communities, to be sure, are lagging, particularly those which have for some years been waiting for the Federal Government to do the job for them. Whether that situation would be improved by the enactment of a program at this time remains to be seen.

5. THE TEACHER SHORTAGE

There have been complaints for many years that our educational institutions are suffering from a severe shortage of instructional personnel which is growing worse as enrollments soar. The U.S. Office of Education placed the teacher shortage in the public schools at 72,000 in 1953 and gradually raised its estimate until it hit 195,000 in the fall of 1959. That report, however, was so severely criticized that the office omitted a reference to the teacher shortage in its regular report in the autumn of 1960.

On the whole, the available statistics seem to indicate that education has made great strides in meeting its manpower needs. Over the past 30 years the number of employees in all public education (lower and higher) increased 140 percent, employment in private industries 45 percent. Simultaneously enrollment in public education rose at the same rate as the population of the United States as a whole: 45 percent.

Employment in public education and in private industries, 1929 and 1959

	1929	1959	Percent increase
Employment in public education	1,120,000	2,684,000	+140
Employment in private industries	34,088,000	49,374,000	+45

Source: U.S. Department of Commerce, National Income, 1954 edition; Survey of Current Business, July 1960.

The public schools have managed to increase their teaching staff proportionately faster than enrollment, and the number of pupils per teacher has consistently been reduced:

Enrollment and teachers in the public schools, 1900 and 1961

School year	Enrollment	Instructional staff	Number of pupils per teacher
1899–1900	15,503,000	[1] 436,000	35.6
1929–30	25,678,000	880,000	29.2
1960–61	37,244,284	1,526,079	24.4
Increase or decrease, 1900 to 1961	*Percent* +140	*Percent* +250	−11.2

[1] Adjusted for 13,000 administrators in 1900.

Source: 1900 and 1930: U.S. Office of Education, Statistical Summary of Education, 1955–56. National Education Association, Estimates of School Statistics, 1960–61.

The foregoing table shows that since 1900 the number of pupils in the public schools increased 140 percent, the number of teachers 250 percent, and the number of pupils per teacher was reduced by 11.2.

Taking only the past 7 years, when according to the Office of Education the teacher shortage climbed sharply, the picture appears as follows:

Enrollment and teachers in the public schools, 1953–54 and 1960–61

	School year 1953–54	School year 1960–61	Increase or decrease
Instructional staff	1,098,320	1,526,079	*Percent* +39
Less teachers without full certificates	78,850	93,917	+19
Total	1,019,450	1,432,162	+40
Pupil enrollment	28,916,703	37,244,284	+29
Number of pupils per certificated teacher	28.4	26.0	−2.4

Source: National Education Association, Estimates of School Statistics, 1960–61.

The table shows that in the past 7 years the number of pupils increased 29 percent, the number of certificated teachers 40 percent and the number of pupils per certificated teacher dropped 2.4.

The claimed increase in the teacher shortage was arrived at largely by aiming for a more rapid cut in class size and by omitting from the calculations about half the teacher supply, that is those who return to the schools after taking other jobs, raising a family, or engaging in additional study.

What the pupil-teacher ratio should be is a matter of opinion. Numerous research studies have been unable to show that children learn more in small classes than in large, and in fact, the results seemed to point in the opposite direction. However, the schools have been successful in cutting class sizes and will undoubtedly continue to do so.

The outlook for teacher supply is highly favorable. The percentage of college students who prepare for a teacher's certificate rose from 21 percent in 1948 to 31 percent in 1955 and has since been stable at that level. The number of bachelors' and first professional college degrees is projected to rise sharply during the 1960's:

Number of earned college degrees: 1958–59, 387,000; 1968–69, 703,000; increase, plus 82 percent.

(Source: U.S. Office of Education, "Projection of Earned Degrees to 1969–70.")

If the percentage of college students seeking a teaching career remains stable over the next decade, the number of newly graduated teachers will almost double. But enrollment increase will be far less as I pointed out earlier: the school-age group (5–17) which increased 46 percent between 1950 and 1960 is projected to grow only 20 percent between 1960 and 1970.

The U.S. Office of Education presented the following picture in a recent report (Staffing and Constructing Public Elementary and Secondary Schools, 1959–69). The enrollment increase in the public schools averaged 1,207,000 annually between 1955 and 1961; it will average only 589,000 between 1965 and 1969. The required annual increase in instructional staff in the public schools which averaged 60,000 in the past 5 years will average only 25,000 between 1965 and 1969.

But the output of college graduates will jump from an annual average of 336,000 in the past 5 years to an average of 594,000 between 1965 and 1969.

With the demand due to shrink and the supply rising it is likely that the colleges would be training more teachers than could land jobs if the present percentage of col-

lege students seeking a teaching career were maintained.

The NEA "Teacher Supply and Demand Report for 1956" predicted an end to the teacher shortage by the early 1960's, and this status has just about been reached. Within a few years the problem is likely to be to find jobs for all teacher graduates.

It is widely believed that teachers as a group are underpaid and that their salaries should be substantially raised. The Department of HEW, in its above-cited report suggested an increase of 50 percent in teachers' salaries between 1959 and 1964. In the past (that is since 1900) teachers' salaries have, on the average, risen 26 percent in dollars of constant value every decade. Over the past 30 years (1929 to 1959) teachers' salaries improved 106 percent, the earnings of all wage and salary workers 91 percent, and earnings of the civilian employees of the Federal Government 73 percent. (This raises the question of whether teachers would be better off if their wages were tied to the Federal payroll.)

Earnings of teachers and other groups, 1929 and 1959

	Teachers	All persons working for wages or salaries	Civilian employees of the Federal Government
1929 (actual dollars)	$1,400	$1,405	$1,933
1929 (in 1959 dollars)	$2,380	$2,389	$3,286
1959	$5,013	$4,553	$5,682
Increase in percent (constant dollars)	+106	+91	+73

Source: National Education Association, Economic Status of Teachers in 1959–60, Survey of Current Business, July 1960.

A 1958 survey demonstrated that men teachers earn less than men engineers, lawyers, judges, physicians, surgeons, dentists, architects, etc. The same survey and other studies have shown that women teachers average higher earnings than other women college graduates or professional workers. The problem thus seems to be how to attract more of the able men students into teaching. While the percentage of men among the public school teachers has been rising it appears that male students with above average ability tend tq seek careers in other professions or private industry. It has been suggested that this could be remedied by paying teachers by individual merit and performance because it is unlikely that boards of education would be willing to pay all teachers as much as good teachers are worth. But there have also been strenuous objections to such proposals which, it is charged, would ruin the morale of the teaching force.

In summary: The public schools have been able to increase their teaching staff proportionately faster than the rise in enrollment, and the number of pupils per teacher was gradually reduced from 35.6 in 1900 to 24.4 in 1961. Meanwhile the educational requirements for teachers were sharply raised and their professional preparation lengthened. Few teachers are hired nowadays who do not, at least, have a college degree, except in the very few States in which a fractionalized school organization survives. The level of teacher compensation has apparently been sufficient to attract a growing number of qualified applicants.

Current projections indicate that annual school enrollment increases will shrink to half their present size in the 1960's, while the output of new teachers may rise 82 percent or more. Thus the outlook is for an adequate supply of teachers.

6. RECORD AND PROSPECTS OF SCHOOL FINANCE

It has repeatedly been charged that the funds allocated to the schools are woefully inadequate, that too small a share of the Nation's income is allocated to education, and that personal consumption and private industry have forged ahead while the schools were left behind to subsist on a starvation diet.

The following table shows the record of educational finances since 1940:

Educational expenditures and enrollment, 1940 to 1961 (includes public and nonpublic schools at all levels—elementary, secondary, and higher)

School year	Expenditures	Enrollment (students)
1939–40	$3,199,593,000	29,751,203
1949–50	$8,795,635,000	31,319,271
1960–61	$26,000,000,000	48,650,000
Increase 1940–61 (percent)	713	64

Source: 1940 and 1950: U.S. Office of Education, Statistical Summary of Education, 1955–56. 1960: Expenditures, estimate in the President's education message, Feb. 20, 1961. Enrollment: Release of the U.S. Office of Education, Aug. 14, 1960.

The table above shows that since 1940 enrollment in educational institutions increased 64 percent, expenditures 713 percent. When allowance is made for the loss of half the dollar's value, the rise in expenditures was 306 percent compared with an enrollment expansion of only 64 percent.

If educational outlays are related to the Nation's resources we find that the share of the national income devoted to education has quadrupled since 1890; it increased 50 percent between 1950 and 1961:

Expenditures for education as a percentage of national income 1890 to 1961 (all levels of education, public and private)

	Percent
1890	1.4
1913	2.2
1930	3.7
1950	4.0
1958	5.4
1961	6.1

Source: 1890 and 1913: Roger A. Freeman, "School Needs in the Decade Ahead," Washington, 1958, p. 5; 1930 to 1958: U.S. Office of Education, "Progress of Public Education in the U.S.A. 1959–60"; 1961, estimate, based on statement in the President's message, Feb. 20, 1961.

This record certainly bears out what I wrote in my book "School Needs in the Decade Ahead," the Institute for Social Science Research, Washington, 1958, page xxi:

"The American people have loyally and faithfully supported their schools. The record of steeply increasing school revenues is nothing short of spectacular and makes no persuasive case for holding insufficient funds responsible for shortcomings in the product of our public school system."

Comparisons with other countries are, at best, approximations. UNESCO statistics indicate that almost all other countries allocate a smaller percentage of their national income to education. The Soviet budget for 1960 allowed 102 billion (old) rubles for education and culture, which includes besides educational institutions, radio, TV, museums, theaters, etc. This is the equivalent of about $10 billion. The Russian GNP has been estimated at 40 percent of our GNP. From this it appears that the Soviets do not allocate a larger percentage of GNP to education than the United States.

When we compare the public schools with other sectors of the economy we find the following increases between 1929 and 1960 (school years 1929–30 and 1960–61):

	Percent
Public school expenditures	611
Personal consumption	315
Corporate profits	177

Over the same period public school enrollment expanded at a slightly lower rate than the total population of the United States (45 percent for the schools versus 48 percent for the U.S. population).

There is no objective measure on how much should be spent on education or of what constitutes adequate school support. Undoubtedly aspirations and demands will always be ahead of realization, they will always aim for more, no matter at what level.

In summary: The meaning of the past record for the future outlook is this: Over the past 10 years enrollment in the public schools expanded 43 percent which is slightly faster than the simultaneous growth in GNP of 38 percent (constant dollars). In the next 10 years school enrollment is projected to expand only 20 percent, while the national product is expected to grow at least at the same rate as in the past decade, and, hopefully, faster.

In the past 10 years, under a system of State and local support, school revenues increased 152 percent in current dollars, or 98 percent in constant dollars. Why should States and communities not be able to raise their school funds sufficiently in the coming decade when enrollment will grow only 20 percent?

7. SOURCES OF SCHOOL REVENUE

The real question is not whether it is possible to raise adequate support for the schools but how. This question was explored by the Committee on the Financing of Public Education of the National Tax Association to which I referred earlier in my testimony. The rest of this section "(7. Sources of School Revenue)" consists entirely of quotations from the report of the mentioned committee:

"CHAPTER III—SOURCES OF SCHOOL SUPPORT BY LEVEL OF GOVERNMENT

"Until about a generation ago the support of the public schools was largely a local affair. More than four-fifths of all school funds was raised by school districts and other local units of government, and State aid was of substantial size in only few States outside the solid South. During the depression, war, and immediate postwar years State school contributions climbed steeply and the percentage of school income provided by State governments jumped from less than 18 percent prior to 1930 to about 40 percent in 1948. Since 1948 the State share has remained stable at 40 percent of school revenue.

"TABLE VIII.—*School revenues and State support in selected years 1890 to 1960*

School year ending in—	School revenues	Percentage from State aid
	Millions	
1890	$143	18.4
1900	220	17.2
1930	2,089	16.9
1948	4,312	38.9
1960	13,472	40.1

"Source: U.S. Office of Education, 'Statistics of State School Systems, 1955–56,' 1959. NEA, 'Estimates of School Statistics, 1959–60.'

"The National Education Association estimated the sources of school revenues in 1959–60, as follows:

	Million	Percent
Federal Government	$482	3.6
State governments	5,396	40.1
Local governments	7,594	56.3
All revenues	13,472	100.0

"The historical record shows that the relative shares of State and local governments in the public school support maintained a remarkable stability between 1890 and 1930 and between 1948 and 1960; the State share

increased only during the turbulent years from 1930 to 1948. In absolute amounts, of course, both State and local funds rose sharply. During the 1950's aggregate State and local school support increased an average of $800 million each year.

"The question of Federal support of education can obviously not be considered merely in the context of the schools but only against the background of Federal-State fiscal relations and the general tax structure. An adequate discussion of these problems would far exceed the scope of this report. But some of the significant facts need to be cited.

"It is well known that the number of Federal grant-in-aid programs to the States for various purposes has sharply expanded in the past quarter century. The aggregate amount tripled in the 1930's, tripled again in the 1940's, and tripled a third time in the 1950's:

"TABLE IX.—*Federal grants-in-aid to State and local Governments, in selected years 1922 to 1960*

"[In millions]

"Fiscal year:	*Amount*
1922	$118
1932	232
1940	884
1950	2,371
1960	7,435

"Source: 1922 to 1950: U.S. Bureau of the Census," Historical Summary of Governmental Finances, 1959; 1960, CONGRESSIONAL RECORD, vol. 106, pt. 3, p. 2817.

"It is apparent that a continuation of the historic growth rate of Federal grants, through the expansion of existing programs and the adoption of large new ones, would within another decade or two make State and local governments largely dependent upon Federal support. Resistance to expansion of the Federal role has been particularly noticeable in education because of a widespread belief—which is vigorously denied by other groups—that Federal aid would lead to Federal control.

"The advocates of increased Federal aid point out that State and local revenues rise more slowly than Federal tax receipts, that the Federal Government has increased its share of all taxes from about one-third to two-thirds and that this latter fact imposes an obligation upon the U.S. Treasury to accept increased responsibilities for public services.

"Between 1902 and 1959 Federal revenues multiplied 132 times, State-local revenues only 46 times. However the sharp Federal expansion took place only during the short periods of war. For example between 1940 and 1944 Federal revenues grew 634 percent, State-local revenues only 24 percent, between 1950 and 1952 Federal revenues increased 65 percent, State-local revenues 23 percent. During the intervening peace periods however State-local revenues consistently expanded faster than Federal revenues or national income:

"TABLE X.—*Rate of increase in Federal- and State-local revenues in peacetime periods 1902–59*

"[In percent]

Fiscal periods	Federal revenues	State-local revenues from own sources	National income
1902 to 1913	+47	+94	+80
1922 to 1940	+64	+113	+24
1944 to 1950	−15	+73	+30
1952 to 1959	+20	+67	+34
(1944 to 1959	+68	+256	+118)

"Source: U.S. Bureau of Census, 'Historical Summary of Governmental Finances,' 1959; U.S. Bureau of the Census, 'Governmental Finances in 1959,' 1960.

"The expansion of State-local revenues by 256 percent since the end of World War II is particularly significant. Federal revenues, in contrast, grew more slowly than national income. The Federal share of all public revenues gradually shrank from 79 percent in 1944 to 64 percent in 1959. Some observers favor a continuation of this trend. Others would rather have the Federal Government assume an increasing share of the aggregate fiscal responsibility in the United States. If the postwar trend were reversed, the Federal share of public revenues might again rise to 75 or 80 percent.

"Lack of adequate State-local fiscal capacity probably is the most frequently cited argument in favor of increased Federal aid to the schools and for other purposes. But the spectacular growth of State-local tax revenues in the postwar period—which greatly exceeded the expectations and projections of most fiscal economists—seems to suggest that State-local resources are more expandable than has widely been assumed. Resistance to tax increases (and pressure for tax cuts) appears to have been far less effective at the State-local than at the Federal level. Much of the State-local resistance is undoubtedly related to the heavy burden of Federal taxes which was imposed during the war, and has since been only slightly alleviated. This condition would be aggravated if reliance for additional tax funds were shifted from State-local governments to the U.S. Treasury.

"Virtually all material resources within the United States are subject to the taxing powers of the States. There are no Federal constitutional or statutory restrictions which significantly hamstring the taxing capacity of State-local governments. Tax limitations in State constitutions were placed there by the people of the respective States and can be altered and removed by the same process by which they were originally inserted

"It has frequently been stated that interstate competition prevents States from raising their taxes. The fact that pressure for expansion of public services and the need to revise taxes is strong in all States and the steep rise in State-local revenues during the postwar period (to a considerable extent due to sharp and repeated tax boosts) would seem to contradict this argument. Whether high State-local taxes have deterred industrial growth in any State is doubtful. James W. Martin and William G. Herzel surveyed some of the more important studies of the impact of State and local taxes upon industrial location and concluded that differentials among the States do not exert a primary influence upon industrial development.[1] Several other reports have confirmed these findings.

"Some observers point at the difficulty which even some of the wealthier States have experienced in recent years in trying to raise taxes to meet larger appropriations (the States are at the end of their financial ropes). Others suggest that these difficulties are of a purely political nature, that they are caused by a desire to gain popularity by more generous spending of public funds combined with a reluctance to accept the political responsibility for higher taxes.

"They emphasize that Federal revenues fell short of outgo in 24 years out of the past 30, and that even during the prosperous 1950's, 7 Federal budgets out of 10 were in the red, with an aggregate deficit of $32 billion.

"It is sometimes pointed out that the wealthier States may possibly have the economic resources to meet their public service needs but that some of the low-income States would have to impose prohibitive rates if they were to levy taxes to produce comparable amounts (e.g., on a per capita basis). A good case has been made that the poorer States need some financial assistance so as to be able to provide essential public services without an excessive tax effort.

"Opponents of this approach cite these facts: the range in per capita income among the States shrank within the past 30 years from 1:4.3 to 1:2.5; the remaining difference is more effectively narrowed by the operation of the progressive Federal tax system than by grants-in-aid; most of the increase in children has taken place (and, by all indications, will continue to occur) in the wealthier States and the range in personal income per child declined from 1:6.4 to 1:3.1; simultaneously the range in teachers' salaries among the States narrowed from 1:4.0 to 1:1.9. They suggest that the educational dollar buys more in the low-income States, that school construction costs are much lower there and that in relation to the prevailing family income level teachers are better off in the low-income States.

"Experience has shown that neither Congress nor State legislatures will consider a program that would allocate funds only to low-income jurisdictions. A proposal is unlikely to receive a sufficient number of favorable votes unless it distributes the funds to all areas, rich as well as poor.

"CHAPTER IV.—SOURCES OF SCHOOL SUPPORT: BY TYPES OF TAXES

"The property tax has historically been the mainstay of public school finance. Its role declined somewhat during the great depression and World War II but it still supplies over half the school income, and, to all appearances, will long remain a major source of school support.

"School administrators and allied groups deplore the schools' traditional dependence upon the property tax which they hold responsible for their chronic inability to obtain the amount of revenues they deem necessary. They have long asked that a greater share of the school support be shifted to income or sales taxes, collected by National and State Governments.

"With some exceptions in New York and Pennsylvania, almost all of the locally raised school funds now come from property taxes, State and Federal aid from income, sales and excise taxes. School revenue sources in 1958 (most recent year available) may be estimated as follows:

"TABLE XI.—*Sources of public school revenue in 1958*

	Billion	Percent
State and local:		
Property taxes	$6.7	56
Sales and excise taxes	3.0	25
Income taxes	1.0	8
Other sources	.7	6
Federal	.5	4
All revenues	11.9	100

"Source: Estimated from several earlier-cited publications of the Bureau of the Census and the Office of Education.

"In 1960 school revenues totaled $13.5 billion and probably were derived from the several types of taxes in about the same proportion as in 1958. By 1970 school funds may total $24 billion (see chapter I). The question is, how much of the additional $10.5 billion (between 1960 and 1970) can be obtained from property taxes, how much from income taxes, from sales taxes, and from other sources. This cannot be adequately considered merely in terms of school finance because other public functions will also raise substantial claims upon the same tax sources and will compete with the schools for

[1] James W. Martin and William G. Herzel, "The Influence of Taxation Upon Industrial Development," State Government, July 1957.

larger shares. It is thus necessary to discuss the tax sources within the framework of the country's total fiscal picture.

"Over the past 9 years—1950 to 1959[2]—governmental expenditures in the United States (National, State, local) rose from $70 to $146 billion. Governmental revenues[3] meanwhile climbed from 29 percent of the national income to 35 percent. The steady expansion of governmental activities and finances will undoubtedly continue through the 1960's although possibly not at as rapid a rate.[4] The Rockefeller Brothers Fund panel projected a rise in governmental expenditures from 1957 to 1967 of between 50 and 80 percent.[5] Other authors have made similar estimates. A decennial increase of $70 to $100 billion is well with the realm of possibility; such a rise would be steeper than either the prospective growth of national income or the normal increase in tax collections. It would probably require higher taxes of some kind. Most of the additional funds for nonschool purposes, largely at State and Federal levels, will most certainly come from sales and income taxes. If school support also is to be moved in that direction, pressure upon these taxes will become very heavy.

"The past 20 to 30 years have seen a radical shift of emphasis in the American tax structure from property to income taxes. Since 1940 income taxes have multiplied 23 times, property taxes less than 4 times.

"TABLE XII.—*Tax collections in the United States, 1932, 1940, 1959*

"[In billions]

	1927	1932	1940	1959
Income taxes	$2.3	$1.2	$2.5	$57.0
Sales and excise taxes	1.6	1.5	4.1	21.8
Property taxes	4.7	4.5	4.4	15.0
Other taxes	.9	.8	1.7	5.8
Total	9.5	8.0	12.7	99.6

"Source: U.S. Bureau of the Census, 'Historical Summary of Governmental Finances,' 1959; U.S. Bureau of the Census, 'Governmental Finances in 1959,' 1960.

"Does this suggest a long-range trend from property to income taxation which can be expected to continue? Some authors so hold. They call the property tax laggard and inflexible and assert that in contrast to income and sales taxes, it does not expand with the economy.

"A closer analysis of the historical record reveals that the property tax grows rapidly during periods of peace and prosperity but stagnates in wars and depressions. Property tax collections climbed proportionately faster than the national income, and at approximately the same rate as other taxes, during the first 3 decades of the 20th century. They barely changed between 1930 and 1944. In the post-World War II period they more than tripled while the other taxes less than doubled (see table XIII).

"Income taxes played a minor role for most of the first 30 years after they were first levied (1911 to 1940), and showed rapid growth only during shooting wars: they multiplied 11 times between 1917 and 1920 and 16 times between 1940 and 1944.[6] Between 1920 and 1940 their yield was almost cut in half although national income was of about the same magnitude in both years. In the post-World War II years they grew more slowly than other types of taxes or national income. They accounted for 72 percent of all tax collections in the United States in 1944; by 1959 their share had shrunk to 57 percent. It is anybody's guess whether this trend will continue or be reversed.

"TABLE XIII.—*Increase in tax collections (National, State, local) 1944–59*

Fiscal years	1944	1959	Increase
	Billion	*Billion*	*Percent*
Income taxes	$35.2	$57.0	62
All other taxes	13.9	42.6	206
Sales taxes	7.0	21.8	210
Property taxes	4.6	15.0	225
All nonproperty taxes	44.5	84.6	90
National income	176.3	383.7	118

"Source: Same as table XII.

"Income tax rates were raised to such exhorbitant levels during wars that subsequently they had to be somewhat reduced, which, of course, cut into collections. But their yield is still so large—$57 billion in 1959 with 95 percent going to the Federal Government—that school and other interest groups understandably would like to have some of the proceeds channeled their way. It is sometimes overlooked that income taxes were raised to their high level for war purposes and that they still serve wholly or largely national defense. Federal income tax receipts in recent years just about equaled expenditures for war-connected purposse (national defense, international finance, veterans services and benefits, interest on the national debt). This strong interrelationship between Federal income taxes and defense outlays may well continue for some time. It raises the question whether income tax proceeds of a significant size will be available to finance domestic public services.

"The spectacular growth of property tax collections in the post-World War II period ran counter to the predictions of most tax experts in the 1930's and 1940's. It was caused partly by inflation—which, of course, also affected income taxes—but largely by the creation of new values; the completion of $400 billion (1959 dollar) worth of new private construction; the conversion of millions of acres of vacant and farmland to industrial, commercial, and residential use; the completion of $150 billion (1959 dollar) worth of public service facilities (highways, streets, schools, water, sewer, etc.) which lifted the value of abutting property, etc. Progress in assessment administration also helped. A decisive factor may well have been recognition by the voting public of growing local service needs which required higher taxes. The record proves that the property tax is capable of rapid expansion in times of economic growth. It is, of course, another question whether it is desirable to make greater demands on the property tax or whether income taxes or sales taxes should be called upon to provide the needed larger funds.

"Some authorities suggest that the income tax can and should be the main source of additional public revenues. They believe that broadening of the income tax base or higher rates could yield substantially enlarged funds. Others hold that income taxes are being used up to their load-bearing capacity and possibly beyond it, and that they need to be lightened as soon as possible. They point out that the governments of most other industrial nations obtain only a minor share of their revenues from income taxes and finance their requirements largely by consumption taxation. They suggest that sales taxation is much lower in the United States than in most other countries and that it could be expanded if governmental requirements increase faster than tax collections from economic growth.

"The issue of income versus sales taxation cannot be adequately discussed within the scope of this report. Yet, much of the question of Federal versus State support of education depends on it. Eighty percent of Federal tax revenues comes from income taxation, almost 60 percent of State tax revenues from consumption taxation.

"The proponents of additional income taxation point out that income taxes are geared to capacity to pay while sales taxes are regressive. The proponents of sales taxation counter that present-day income tax rates are excessively high and have overdone the principle of progression to the detriment of incentives and economic expansion; further, studies have generally found that the retail sales tax is moderately regressive if it includes food, and is substantially proportional through most of the range of personal income if food is exempted. The sales tax cannot be judged alone but as part of the American fiscal operations which are progressive because of the effect of Federal and State individual income and death taxes and the reallocation of public expenditures.

"Strong objections have been raised against further increases in the demand upon the property tax for school and other purposes. The property tax is said to be ill suited to an industrial society in which taxable capacity is determined chiefly by income rather than the ownership of tangible property. Income, it is asserted, grows faster than property.

"These arguments had considerable validity prior to 1930 when the property tax accounted for about half of all tax collections in the United States. In 1959 property taxes equalled only 15 percent of all taxes, and 11 percent of all governmental revenues (including social security contributions, charges, etc.). It does hardly seem inappropriate to take property holdings into account to the extent of 15 percent or 11 percent of the total bill for public services. This can, at most, change the distribution of the aggregate tax load only minutely. It leaves ample space for a tax structure that is well balanced among the several types of taxes.

"National wealth has, during peacetime, quite consistently increased at about the same rate as national income. Only during wars, when the Nation's productive effort concentrated on defense rather than the creation of permanent assets did national wealth lag behind the growth of national income.

"The burden of property taxation has changed remarkably little during the 20th century. It stood at 4 percent of the national income in 1902 and also in 1959, and equalled about 0.8 percent to 0.9 percent of the national wealth in both years. Over the same span of years, the burden of all other taxes rose (largely through wartime increases) from 3.8 to 22.1 percent of the national income.

"Comparisons in time and space—with past trends and with other nations—cannot, of course, in themselves answer the question which type of taxation should be called upon to lift school revenues from $13.5 to $24 billion over the next 10 years. But they can supply the factual background and the perspective necessary in the formulation of sound tax policy.

"Summary

"School tax sources have shown a remarkable stability in the post-World War II period, with slightly over one-half the

[2] Financial statistics for 1960 are not yet available.

[3] Governmental revenues, as defined by the Bureau of the Census, include: taxes, charges, insurance trust revenue (employment taxes, etc.), income from governmental enterprises, etc.

[4] However some observers believe that the rate of governmental growth ought to be stepped up.

[5] "The Challenge to America: Its Economic and Social Aspects," Rockfeller Brothers Fund, special studies project rept. IV, Doubleday, New York, 1958, p. 68.

[6] This includes Federal individual and corporate income taxes.

revenue coming from property taxes, about one-fourth from consumption taxes and the remainder divided between income taxes and other sources. It is conceivable that this stability may continue for another decade.

"Property tax yields will improve as new values are created and schools receive an increasing share of the yield. State sales and excise tax rates for school purposes may keep rising. Some States will tighten their income taxes. Normal economic growth may be expected to boost school revenues, at present effective tax rates, from $13.5 to between $18 and $20 billion by 1970. Thus between $4 and $6 billion may have to come from higher tax rates, unless other governmental expenditures can be proportionately cut and the savings applied to the schools.

"Under an assumption of continued stability in the relative distribution of school sources, the school revenue picture in 1970 may be as follows:

	Billion
"Property taxes	$12.7
Sales and excise taxes	7.0
Income taxes	3.1
Other sources	1.2
Total	24.0

"If however the share of the National Government is substantially increased, some of the load may be shifted from property to income taxes:

	Billion
"Property taxes	$10.8
Sales taxes	7.0
Income taxes	5.0
Other sources	1.2
Total	24.0

"How the revenue from the several types of taxes may be increased will be discussed in the remaining chapters of this report.

"NOTE: All projections are in 1950–60 dollars.

"CHAPTER V—LOCAL SCHOOL REVENUES

"Long experience has shown that the property tax is the only local source of revenue which can consistently provide a major share of the school income. It has been severely criticized over the years as being too heavy and burdensome, but so have all other taxes, and probably for good reason. The real estate tax is eminently suited for small local jurisdictions because land and houses are visible and stay put. It is well adapted to school requirements—expanding in times of economic growth (see table XIII, ch. IV of this report) and stable in periods of stagnation or recession. The tax has some serious defects but balancing the good with the bad, there does not seem to be a satisfactory substitute for the local property tax.

"The uneven distribution of taxable property—e.g., on a per-pupil basis has often been cited as a serious handicap to the use of the tax for school purposes. Discrepancies are very wide on a school district basis in many States as was pointed out in chapter II. Consolidation of small into larger districts or into county units would eliminate the wide variations and keep differences in taxable capacity to a range which can be satisfactorily equalized by a well-designed State aid system.

"Constitutional or statutory rate limitations often keep schools and other local governments from levying the amount of property taxes they believe necessary. Many students of taxation and several commissions have suggested that these limits be raised or abolished. Some of the restrictions have been gradually eased but attempts to repeal them have seldom been successful. One potent argument against their elimination is that it would give several mutually independent local governments—county, city, school districts, other special districts—overlapping and unrestricted taxing power upon the same tax base, property. This is like letting several people independently draw upon the same checking account. It makes it difficult for the taxpayer to hold any particular official or office responsible for the size of his tax bill. If all local public services in a geographic area were integrated under one responsible body—as State and National Governments are—there would be no need for the several tax limitations. As long as local government remains fractionalized there is little likelihood that the several units will attain unrestricted taxing powers.

"The rate limits are not as rigid as they may appear. In most States the constituents of each jurisdiction can vote levies in excess of the specified limits. Thus the real power over the size of public spending and taxing lies in the hands of the residents of the community who are the beneficiaries of the local public services. This seems an excellent way of enabling voters to have their wishes carried out. That officials sometimes dislike the extent of control which the voters exercise over their policies and actions through the power over the purse is not overly surprising. But the fact is that most budget proposals and special tax levies pass although those which do not pass tend to get greater publicity.

"Rate limits are usually applied to assessed values which in all but a handful of States are legally supposed to be set at full current value. But real estate was found in the 1957 Census of Governments to be assessed at a national average of 30.4 percent with statewide averages ranging from 7.2 percent in South Carolina to 66.3 percent in Rhode Island. Valuation practices in regard to personal property vary even more widely. Thus the effective limitations on the size of the taxes which boards of education and other local units can levy is set not so much by constitutional or statutory limitations as by the extralegal action of the assessor of placing property on the rolls at a fraction of its value. It appears then that there is a local remedy against tax limitations which are too tight, without having to amend the State constitution or statutes: to move assessed values closer to current values.

"Most of what was said about tax limitations also applies to debt limitations. School debt limits have been raised in many States but there still are complaints that thousands of school districts have reached their bonding limits and are prevented from meeting their classroom needs. A survey by the U.S. Department of Health, Education, and Welfare in December 1959, however, revealed that only 237 school districts in 45 States (out of a national total of over 40,000 districts) reported that they had reached the limit of their legal debt capacity, needed classrooms, and had no access to State aid to build them.

"Many school districts would find it easier to finance their requirements if tax and debt limits were generally raised or abolished. But some observers hold that an upward movement in the assessment level would offer a better solution to the problem.

"School debt, as well as State and local and private debt, has increased rapidly in the post-World War II period. But in relation to national income, or to State and local tax revenues, State and local debt is now lower than it was 20 to 30 years ago. Debt service requirements (principal and interest) now require a smaller percentage of State and local revenue (from their own sources) than they did 3 decades ago.

"One frequently heard complaint against the property tax is that it places an unduly heavy burden on property owners. This seems to overlook that everybody pays property taxes, directly or indirectly, whether homeowner or renter. Almost two-thirds of all American families now live in their own homes. They earn a higher than average income and account for at least 70 percent of all personal income in the country. They also pay about 70 percent of all taxes, whether on property, income or sales. They cannot escape their share. The remaining third of families, the tenants, pay residential property taxes which are included in their rent.

"Detail analysis of data from the 1957 Census of Governments discloses this picture: About one-half of all real estate taxes rests on residential property with the remainder coming from business, farms, vacant lots, etc. Residential real estate taxes equaled $5 billion in 1957, of which about $3.3 billion came from owner-occupied homes. This does not seem an overly large item in a total tax bill (National, State, local) for that year of close to $100 billion. The property tax suffers the disadvantage of being conspicuous while most other taxes are withheld, paid in small amounts, or invisible, that is, paid in the form of higher prices.

"Homeowners offset a considerable share of their property taxes in the Federal income tax: they deduct property taxes and mortgage interest from the tax base and do not have to pay tax on the imputed income from their homes. Thus the net burden of the residential property tax is much smaller than the gross amount.

"The record of the property tax in the past 15 years suggests that the yield of the tax grows steeply in times of prosperity. The following factors may have a major bearing on the amounts of revenues which may be expected to be raised by property taxes in the 1960's:

"1. Close to a half a trillion dollars worth of new private construction may be expected to be built during the 1960's and will presumably be placed on the tax rolls.

"2. Land values will continue to rise as huge acreages are turned into new suburbs, industrial plants, etc., and roads and other public facilities are being built. This increase should offset much of the depreciation on the existing improvements.

"3. Many existing property tax exemptions have little justification and may be whittled down. This is particularly true of most homestead, veterans, and industrial exemptions as well as of property owned by organizations whose claim to exemption rests on shaky grounds. Certain public property also could be subjected to taxation or to payments in lieu of taxes. On the other hand there are pressures at work to extend rather than reduce industrial exemptions.

"4. Tax rate and debt limitations have shown a tendency to move up. This trend may well continue.

"5. Attempts of States and communities to move assessed values closer to current market values have had sporadic success. The pressure for greater revenues and the need to equalize valuations may lend added impetus to this drive.

"6. Administrative improvements in the assessment procedure and general reassessment programs will place much unlisted property on the rolls and raise the listing of badly undervalued property. Opposition is often based on the mistaken notion that the level of taxation should be controlled by the assessment process rather than by rates. A vigorous State-directed program of uniform reassessment (to be maintained thereafter) probably is the most urgently needed action in the property tax field.

"7. Rising income levels may make it possible to move property tax levies up without increasing their net burden (effective tax rate).

"8. Realistic expectations for the coming decade must temper the foregoing factors favorable to the growth of property taxation. Property presently is taxed heavily in some areas, lightly in others. Where property is heavily taxed, an effort will be

made to continue the low level of property taxes. Constitutional exemptions and tax limits will be difficult to change, though statutory restrictions may be liberalized. Despite progress during the 1960's in the reform of property tax administration, 1970 will probably see too many reforms uncompleted. Owners of personal property will likely resist continually administrative improvement, while real estate owners will continually promote alternative taxes.

"Summary

"The property tax has long supplied almost all local school funds and is likely to continue to do so in the future. Local nonproperty taxes will at best make a minor direct contribution to the schools. The preservation of local school autonomy and of community control of school affairs requires that a substantial share of school income be raised locally with the consent of local voters. This probably can be done only if the property tax remains a major source of school income.

"The property tax is an expandible tax and can provide substantially increased school funds during the 1960's without an undue rise in the tax burden. Property tax collections may well rise from $15 billion, in 1959 to $23 to $24 billion by 1970, with more than half the additional funds—about $5 billion—going to the schools. If the States or the National Government increase their school contributions at a more rapid rate, then it is likely that local efforts will be less pronounced and that the productivity of the property tax will increase somewhat less.

"CHAPTER VI—STATE SCHOOL AID

"A crucial question is how the States can raise the additional sums which school aid will require in the years ahead. State school appropriations have been increasing faster than the normal growth of State tax collections and the States have found it necessary to enact numerous tax boosts in rapid succession, particularly for school purposes. This trend will undoubtedly continue for at least the next 10 years, and probably longer. Higher taxes will be necessary if school costs continue to grow faster than the Nation's economy.

"Increased State aid will have to come either from individual and corporate income taxes or from sales and excise taxes. Which are more likely to be tapped?

"Thirty-one States levy an individual income tax, 36 a corporate tax; combined they account for 18 percent of all State tax revenues. Many States have lowered personal exemptions, raised rates, introduced withholding from wages and applied various other means of increasing the productivity of income taxes. It is however unlikely that State income tax rates will climb very high. No State has adopted an individual income tax since 1937 and only three States a corporation tax. It remains to be seen whether the rank of income tax States will widen in the next 10 years.

"The reason for the moderate use of income taxation by the States is patent: the Federal Government raised its income tax rates so high after 1940 that it virtually preempted the field. It now collects 95 percent of all income taxes in the country. States are reluctant to raise (combined) income tax rates higher. It has been proposed to grant Federal credits for State income taxes so as to encourage—or in effect force—their use by all States. The question may be raised why the Federal Government should force a tax upon States whose people do not want it. State income tax yields will undoubtedly continue to rise as the economy expands but it is doubtful whether very substantial amounts can be expected.

"The States are alone in the field of general sales and excise taxation except where they have granted local governments the power to enter it. In contrast to most foreign countries, the Federal Government does not levy consumption taxes save excises on liquor, tobacco, gasoline and a few other products at the manufacturing or retailing level. The number of retail sales-tax States grew from 24 to 35 in the post-World War II period and appears likely to expand further. The typical State sales tax rate has risen from 2 percent in 1950 to 3 percent in 1960, with 3 States presently levying 4 percent. The level of consumption taxation in the United States is low by comparison with foreign nations and appears to be a natural field for expansion if and when the need arises. Signs point to the conclusion that State sales tax rates will continue to climb and that more States will adopt the tax.

"An additional 1 percent retail sales tax in all States may be estimated to yield in 1970 approximately $2.2 billion if food is exempted and $3.4 billion if food is taxed. This together with modest boosts in income taxes and the normal increase from tax collections would supply approximately the additional amount of State funds which the schools may require between 1960 and 1970. Some States, will not adopt a 1 percent sales tax increase but rather tighten their present tax provisions, reduce exemptions, include services in the retail sales tax, raise rates on excise taxes on alcohol, tobacco and other goods, levy some type of gross receipts or value-added tax, etc."

This concludes the direct quotations from the report of the Committee on the Financing of Public Education of the National Tax Association.

8. THE ISSUE OF FEDERAL AID TO EDUCATION

The committee from whose report I just quoted extensively also presented a summary of arguments for and against Federal aid to education. A majority of the committee concluded in opposition, a minority in favor of Federal aid.

I would like to conclude my testimony by presenting to your committee my own reasons why I believe Federal grants-in-aid for school support to be undesirable. They are summarized in four points and taken from my book "Taxes for the Schools," pages 387 to 397:

"A. THE MOST URGENT NEED IS NOT 'MORE MONEY FOR EDUCATION' BUT 'MORE EDUCATION FOR OUR MONEY' [7]

"Complaints have been raised with increasing frequency in recent years that deficiencies in our educational system stem not from inadequate financial support but from inefficient or wasteful use of the available resources. Some of the charges are: In no other field are expensive facilities and trained manpower utilized so inadequately and on a part-time basis. School buildings are in use barely 1,000 hours a year compared with 2,000 hours or more for other types of facilities or for schools in many other countries. Space allowances in many new school plants have approximately doubled over the past quarter century—from about 50 to 100 square feet per pupil—although there is no evidence that children learn more if they have twice as much space.

"Most people work 240 days a year, teachers only 180. The productivity in other types of activity has been climbing steadily and steeply, largely through technological advances. A doubling of industrial output per man-hour over the past 3 decades permitted large increases in the workers' pay and purchasing power. But organized resistance to the use of manpower savings devices has brought about an opposite trend in education; [8] each teacher now instructs fewer pupils than she did 30 or 50 years ago. Whether the achievement level of the schools' graduates meanwhile has improved or deteriorated is controversial. By indiscriminately mixing in the same classroom children of widely diverse ability, aspiration, and level of skills, the teachers' task is being made difficult and the educational advance of all is retarded. Emphasis on fundamental skills and knowledge has declined while the number and variety of courses proliferated. The subject matter content of the curriculum has been watered down and the program stretched out which has added an unnecessary 2 years. As a consequence pupils in American public schools are reported to be 2 or more years behind their European counterparts in academic achievements. Wasteful organization keeps thousands of inefficient schools alive. Federal aid would relieve the pressure to correct such practices and, thus, help to perpetuate them.

"Most of these charges are vehemently denied by the spokesmen for the public school profession. They insist that the schools have never been better or more efficiently managed, that available manpower and facilities are not only fully utilized but being overworked, and that charges (attacks) are being levied only by persons who dislike public schools and do not want them to be adequately supported.

"B. FEDERAL AID MEANS FEDERAL CONTROL

"That Federal funds will result in Federal control of the schools has been the most frequently used argument against Federal school aid since the 1870's. The proponents of Federal aid insist that funds can (and will) be granted to the States without undue controls. They have inserted in most of their legislative proposals clauses enjoining Federal administrative officials from exercising powers over local schools. They cite existing programs, such as grants to federally affected areas, as proof that control does not need to follow aid.

"But the chairman of the House Education and Labor Committee, Representative Graham Barden, declared: 'You will hear it said there has not been any Federal control or interference through Public Law 815, the Federal impacted area bill. I tell you there has been some of the most horrible illustrations of interference and wrongdoing under that bill that you can imagine, and I challenge anyone to deny that statement.' [9]

"He cited examples too lengthy to be quoted here and later presented his conclusion about the school construction aid bill then under consideration: 'Again I say to you as in the beginning, I question seriously that the prime objective of this bill is to build school buildings. Could it be to centralize power over our school system here in Washington where it is easier to apply concentrated pressure?' [10]

"Mr. Barden's predecessor as chairman of the House Education and Labor Committee, the late Representative John Lesinski, Jr., stated: 'It is impossible to draft a general Federal aid bill which will not contain a great deal of Federal control over local school systems * * *. I am convinced, after the hard study we have put to the question, that no acceptable bill preventing Federal domination of local schools can be drawn. I reluctantly come to the conclusion, but I had to face the facts.' [11]

[11] CONGRESSIONAL RECORD, vol. 103, pt. 5, p. 6348.

"Financial aid to the States could be provided without the possibility of Federal control through purely monetary, nonearmarked, and unconditional grants or tax sharing.[12] But the proponents of Federal school aid insist that the funds must not only be earmarked for the schools but also channeled through the U.S. Office of Education and the State departments of education so as to insure and enforce the supremacy of the established high command. They strenuously oppose proposals which would have the U.S. Treasury allocate to State treasuries a small percentage of certain Federal taxes even if it were earmarked for the schools.[13] Such a plan would provide federally collected funds for the States and eliminate the likelihood of a resulting control of education. But the fatal flaw in all such schemes is that the funds would bypass the Federal and State offices of education, and tend to strengthen the hand of the general State officials—Governors and legislators—rather than of the educational bureaucracy.

"When during the 1930's emergency programs channeled funds for school construction and other activities directly from the Federal dispensing agencies to local school systems, the NEA and AASA recognized the link between the source and control of funds, even in a brick-and-mortar program. They declared in 1945: 'Increasing federalization of education has also been brought about in recent years by groups anxious to secure public funds for various undertakings and purposes. Washington has furnished a setting favorable to the accomplishment of their ends. Through political maneuvering they have been able to obtain Federal funds for undertakings and purposes which the States and localities have not been willing to finance.'[14]

"Numerous authorities in this field have expressed their conviction that control would inevitably have to accompany a grant-in-aid program. We want to cite only three. First, John J. Tigert, a former U.S. Commissioner of Education: 'Reason and experience both indicate that Federal money cannot be expended wisely and efficiently except by exercising Federal control and supervision, even then there is considerable waste. * * * If we embark upon a program of turning over Federal money to schools without any strings attached, it is only a question of time until the waste, extravagance and misuse of these funds will result in reaction or a change. The alternative is Federal control.'[15]

"Robert Murray Haig of Columbia University wrote: 'The demand for increased Federal participation in the support of education is accompanied by the specification that there shall be no Federal control of educational policy. At once the interesting question arises: Can any jurisdiction take responsibility for levying the taxes for any particular purpose without sooner or later being forced to take the responsibility for defending that expenditure and without being asked to answer taxpayers that the money is being spent in a proper manner. * * * No mere audit will satisfy the demand. Sooner or later the jurisdiction which imposes the taxes will exercise real control.'[16]

"Twenty years later James Bryant Conant stated his belief of the likely results of Federal aid: 'To imagine that recurring appropriations of this magniture can be made without careful budgeting on the part of the administration seems to me to be the equivalent of imagining completely irresponsible government. Careful budgeting will mean, in turn, a strong executive agency which must have access to a mass of factual information about the educational situation in every State * * *. The educational committees of the House and Senate will have every reason to examine into details of curriculums and school organization, much as committees of the State legislatures now do from time to time. Certainly, a chapter in American public education will have opened.'[17]

"The experience with the large Federal programs in highways, urban renewal, farm support, public welfare, etc., demonstrate that controls gradually tighten as the Federal share increases, as conflicts arise between Federal and local officials about the most effective use of the funds, and as abuses occur which lead to public scandals.[18]

"Let us now assume that it may be possible to administer Federal school aid—in contrast to aid for other purposes—without Federal control. After all, professional administrators in the U.S. Office of Education, in State departments of education, and in local school systems belong to one close-knit, battle-hardened, national fraternity whose members have stood shoulder to shoulder in upholding each other against the barbarians, and in defending the educational theories which have dominated the scene for over a generation. Thus, the U.S. Office of Education might find ready acceptance for its directives (labelled 'guidelines') and policies among local school administrators, and there would be no need for Federal dictation.

"Some of these policies would not necessarily be in keeping with the beliefs or wishes of the lay public of what the schools should be doing and how. That is where the reinforced cooperation among the professionals at all levels would show its effectiveness in overcoming backwoods resistance. The influence of parents, communities, and legislatures is likely to wane if an increasing share of the funds does not depend upon their approval and is derived through Federal aid without Federal control. Boards of education for many years have tended to concern themselves mostly with approving tax rates and bond issues and selling them to the public than with the setting of educational policies. They largely turned into ratifiers of professional proposals. Boards which tried to assert themselves against their superintendents in regard to educational policy sometimes found themselves at the receiving end of a national organized investigation.

"An editorial in the Nation's Schools (June 1960) referred to the indefinable sense of uneasiness with which some school administrators view the growing strength of school board organizations and questioned whether the school board is to be secretly appraised as a group to be controlled or stymied. Among the fears of school administrators: 'The possibility that school boards as organized groups may embark upon programs to influence school legislation in direct conflict with the goals of professional groups.'[19] Another report stated that 'the deepening concern board members show for their responsibilities gives rise to a major problem. One aspect of this is the alarm with which professional educators view amateur direction of school policy.'[20] A keen observer of the educational scene threatened that 'local boards are in danger of voting themselves out of power, if they refuse to accept guidance from those who will increasingly map out national goals and standards.'[21]

"The purse strings have been the main instrument by which communities and boards of education have tried to make their influence upon school policies felt. Federal aid would make it less necessary for educational administrators to bow so low to legislators, boards, and to the lay public; it would give them more of the independence they have so long sought.

"The fight over Federal aid to education has been commonly viewed as a battle over money for the schools. It is conceivable that the real issue is not just money.[22] The crucial isue may well be a power struggle over the control of the schools between the organized profession and the lay public. Federal funds would strengthen the hand of the educational bureaucracy and weaken the veto power of the communities. Such an outcome would be hailed by some, deplored by others.

[13] See ch. VIII, p. 374. A proposal channeling Federal funds from the U.S. Treasury directly to State treasuries—but allocated on a per pupil basis—has been advanced by Edgar Fuller of the Council of Chief State School Officers and was incorporated in H.R. 2365—86th Congress by Representative Stewart L. Udall. It has drawn little support or attention.

[14] NEA and AASA, "Federal-State Relations in Education," 1945, p. 15. This is, indeed, a rare case of a special interest group describing the ill effects of its own activities—although this was, of course, not the intention of the authors who were referring to some other groups rather than to themselves. They saw the mote in somebody else's eye but not the beam in their own.

[18] Recent scandals in the interstate highway program which caused an investigation by the House Public Works Committee will undoubtedly bring about stricter and more detailed controls by the Bureau of Public Roads.

The National Association of Housing and Redevelopment Officials has repeatedly complained that "the Federal agencies are utilizing loan and grant, annual contributions, and other financial contracts with local public agencies as a means of extending Federal control of local programs * * * controls are imposed upon local programs that go far beyond any conditions provided in the basic legislation. * * *" Journal of Housing, November 1955, p. 375.

The controls upon farmers are too well known to require further comments. State and local public assistance administration operates under regulations and close supervision of the Department of Health, Education, and Welfare.

[19] Loc. cit. This refers to the fact that the professional organizations do, and school board organizations do not, support Federal aid.

[20] Education Summary, Oct. 12, 1958.

[21] Fred M. Hechinger, "School Conflicts," the New York Times, May 29, 1960.

[22] Views differ on whether Federal funds would be a net addition to school revenues or, at least partly, substitute for State and local funds. The aggregate amount of school income might be raised but little.

John J. Tigert, former U.S. Commissioner of Education, was quoted in "What Others Have To Say About Federal Subsidies," the Nation's Schools, February 1934: "The use of Federal money for support of schools would decrease local support. The net amount available to schools would be no greater as local support would vanish about as fast as Federal money became available. There would be a diminishing interest in local responsibility and other evils always attendant on paternalism."

"C. FEDERAL AID MEANS CENTRALIZATION OF GOVERNMENT [23]

"It has been convincingly argued that the National Government which participates in the financing of many activities that used to be regarded as State and local responsibilities should not discriminate against schools. Are roads, hospitals, welfare, more deserving of national support than education? Is it more of a national responsibility to teach children how to cook than how to master their native language?

"One quick reply might be that opponents to school aid tend to be foes of governmental centralization as such and to dislike the other Federal programs as well. But this does not answer the question why Congress enacted dozens of aid programs for other purposes and only a few small ones for the schools. One element may well be that the States provide little support for local activities other than the schools. But the major factor is the fear that a major Federal entry into education would be more damaging to the principle of local autonomy. The rapid expansion of grants-in-aid for various purposes has shifted much control to Washington. Schools, it is held, are a landmark of home rule which should be kept out of the Federal realm. Opponents to Federal school aid believe that 'once this dam is breached, there will be no holding back the floods, that the Federal Government will assume an evergrowing role in education and in other State and local activities. They visualize that in a few decades with the further growth of Central Government financing of State and local activities, nothing may be left of our Federal system of government with its union of strong and self-propelled States except a few empty symbols and rituals and a nostalgic memory, that we shall have but one all powerful Central Government with regional offices, which may or may not be called States.' [24]

"Woodrow Wilson, while still a professor of government, wrote a statement that ought to be lifted from oblivion: 'There can, I suppose, be little doubt that it is due to the moral influences of this policy that the States are now turning to the Common Government for aid in such things as education. Expecting to be helped, they will not help themselves. Certain it is that there is more than one State which, though abundantly able to pay for an educational system of the greatest efficiency, fails to do so, and contents itself with imperfect temporary makeshifts because there are immense surpluses every year in the National Treasury which, rumor and unauthorized promises say, may be distributed among the States in aid of education. If the Federal Government were more careful to keep apart from every strictly local scheme of improvement, this culpable and demoralizing policy could scarcely live. States would cease to wish, because they would cease to hope, to be stipendiaries of the Union, and would address themselves with diligence to their proper duties, with much more benefit to themselves and to the Federal system.' [25]

"For many years, however, it has not been the States which have been asking for Federal aid to education but largely organizations of school employees. They appeal against the decisions of the constituted State and local authorities and ask Congress to overrule them. They assert, in effect, that during the most prosperous period this or any country has ever known, American parents are either so deprived or so depraved that they cannot or will not provide the funds to give their children an adequate education.

"Massive Federal aid to education would be more than just another grant program. The president of the National School Boards Association, Carl B. Munck, warned the members of his association in April 1959: 'The narcotic of Federal aid will become a habit for whose indulgence the victims will soon surrender that which they now so highly prize.' [26]

"D. FEDERAL AID RUINS CIVIC MORALE

"The most serious charge against general Federal school aid may well be that it would set an example for our youth, and for the American public in general, that the way to get what we want for our children, for ourselves, for our community, is not to work and pay for it but to seek a device by which we can have others foot the bill. Gov. Arthur B. Langlie of Washington said in an address to the American Assembly on October 15, 1955: 'Instead of squarely facing our responsibility of paying for the things we want, we seem to be getting into a free-for-all scramble to evade the painful duty, in the hope that the squeeze may be put on somebody else. Too many still believe that we can eat our cake and have it, too. This unhealthy trend is being fanned by shrewd promoters who claim that they have found the secret for which the alchemists had been seeking in vain, that they can get for us something for nothing—not by making gold but by the device of so-called Federal grants-in-aid. To the uncritical onlooker they seemed to prove their point that we can hitch on to a rainbow and ride to the sky * * *. The most dangerous trend—harmful not only to the States but to our whole system of free government—has been this tendency to evade individual and collective responsibility. It corrupts the civic morale, and erodes the feeling of personal accountability among public officials.' [27]

"In another speech in New York City on November 2, 1955, Governor Langlie stated:

" 'The demonstration of how to get the things we want in life—but which we are unwilling to pay for—by putting pressure upon our public officials, has had a poisonous influence upon the minds of many millions who became used to the idea that it was better to look for a gimmick than to labor in the sweat of one's brow. The insidious effect of a policy of always trying to get something for nothing, of searching for a way of letting somebody else get stuck for the check or for loading the cost on to a distant future may be hard to eradicate.'

"The most effective appeal for Federal school aid has been the suggestion that new buildings, more and better paid teachers, if financed at the State or local level, would force up taxes but that by shifting the cost to the Federal treasury it would not mean higher taxes, that it would come for free, or be loaded unto other States, other communities, other economic groups. President Herbert Hoover wrote: 'Our people, under the illusion that money from Washington is pure manna, are selling right and left their birthright as freemen.'

"Some of the existing grant programs have set examples which are destructive of State and local responsibility and of attempts at solving local problems by local initiative: the interstate highway program rewards the citizens of States which have been laggard and penalizes those which took the initiative and pulled themselves up by their bootstraps; the open-end public assistance programs encourage the design of ingenious techniques by which some States manage to tap the Federal Treasury more effectively (or more rapaciously); through school construction aid, communities which taxed and bonded themselves heavily to take care of their own needs, would be forced to foot part of the bill for others which sat back and waited. A massive program of Federal school aid may through such demonstration effectively destroy civic morale in communities and States throughout the Nation.

"In conclusion: Federal school funds were purely nominal prior to 1930 when they accounted for only a fraction of 1 percent of the school income. In the postwar period, while Federal grants-in-aid for a variety of State and local activities proliferated to about one hundred and soared from under $1 billion to over $7 billion annually, comparatively little Federal money was authorized for the public schools. The indemnity payments to federally impacted communities and the school lunch commodities and funds are not aid to education. Only two school aid programs are now in operation, one of a continuing, one of a temporary nature: Grants for vocational training, and the 4-year plan to aid foreign language and science education, guidance, etc. These two programs combined account for less than 1 percent of all school revenues and one-eighth of 1 percent of the Federal budget. How much do contributions of this magnitude help to bring school revenues from $12 billion to a hoped-for $24 or $30 billion?

"This truly is scant harvest for a century-long impassioned campaign, fervidly pursued by dedicated nationwide organizations whose members and applied resources number many millions. It is preposterous to assume—as some of the drive's protagonists have done—that the Members of Congress are prejudiced against education and deliberately discriminate against the schools. Rather, it appears that Congress after listening to extensive arguments for Federal aid, year after year, is not convinced that such aid is necessary or desirable. It has authorized minor amounts, earmarked for specific activities to meet temporary emergencies, but consistently denied pleas for general or massive school aid because it found the fiscal case for such aid—the claimed lack of State and local capacity and the Federal taxing superiority—to be spurious. It is significant that the authorities which are de lerge and de facto responsible for school support—the State governments and the boards of education—have not asked for aid. Rather, the school's employees, claiming to speak for the schools, have demanded that Congress overrule the decisions of their States and their communities.

"The ideological case for Federal aid which calls for national standards and national and professional direction of educational policy has found little echo in Congress or among the great majority of Americans who are philosophically committed to home rule in education. This attitude could some day change. But the congressional debates of recent years leave room for doubt whether the extraordinary efforts of the school aid protagonists against no organized resistance have brought massive general Federal school aid as close to realization as its supporters believe."

STATEMENT SUBMITTED BY THE INVESTMENT BANKERS ASSOCIATION OF AMERICA TO THE SUBCOMMITTEE ON EDUCATION OF THE SENATE COMMITTEE ON LABOR AND PUBLIC WELFARE MARCH 14, 1961, RE S. 1021, FEDERAL AID FOR PUBLIC ELEMENTARY AND SECONDARY SCHOOLS

Title I of S. 1021 would authorize a 3-year program of Federal grants to States to assist

---

[23] See ch. III, sec. 5.

[24] Roger A. Freeman, "Federal Aid to Education—Boon or Bane?" American Enterprise Association, Washington, 1955, p. 3.

[25] Woodrow Wilson, "Constitutional Government," 15th ed. 1900, pp. 29–30.

[26] Carl B. Munck, "Some Thoughts on Federal Aid," School Boards, April 1959.

[27] Arthur B. Langlie, "Stronger States in the Federal Union: Why and How," State Government, December 1955.

public elementary and secondary schools, such funds to be used either for construction of school facilities or for teachers' salaries. There would be authorized $666 million for the fiscal year beginning July 1, 1961, $766 million for the fiscal year beginning July 1, 1962 and $866 million for the fiscal year beginning July 1, 1963. These funds would be allotted among the States on the basis of income per public school pupil, the number of public school pupils, and the effort for public school purposes; but the minimum allotment for a State for any fiscal year would be $15 multiplied by the number of public school pupils in such State in the preceding fiscal year (subject to a reduction, not to exceed one-third of its total allotment, if a State fails to maintain its "effort" in public school expenditures).

Titles II and III of the bill would amend present laws authorizing Federal compensation to school districts for educational burdens imposed upon them by the location of tax-exempt Federal property on which public school children reside or their parents are employed (Public Law 815 and Public Law 874). Two of these amendments (i) would make permanent the authorized Federal payments but (ii) would reduce the Federal payments per child from 50 percent to 25 percent of the district's local contribution rate under Public Law 874 and from 50 percent to 25 percent of the State average per pupil construction costs under Public Law 815.

The comments in this statement are directed entirely to the proposed new program of Federal financial assistance for public elementary and secondary schools under Title I of the bill. There is deep-seated concern that Federal aid to public elementary and secondary schools in any form would inevitably lead to Federal control and direction of education, despite specific assurance in the proposed bill that no department or officer of the United States shall exercise any control over the policy determination, curriculum or program of instruction of any school. We do not here address ourselves to this issue, however, for reasons which are apparent from that which follows.

In our view, the first and basic issue to be decided by the Congress is whether there is really any need for the proposed Federal aid. Since the primary emphasis has been placed on the need for additional classrooms, the answer to this question rests upon an informed consideration (1) the present need for additional classrooms, (2) the growth rate in enrollment in public elementary and secondary schools which will determine the future need for additional classrooms and (3) the efforts and ability of State and local educational agencies to finance construction of additional classrooms. As we have up-to-date pertinent factual data on these questions which we believe will be helpful to the committee, this statement is directed particularly to this issue.

CONSTRUCTION OF CLASSROOMS FOR PUBLIC ELEMENTARY AND SECONDARY SCHOOLS CONTINUES AT A HIGH LEVEL WITHOUT FEDERAL ASSISTANCE

The U.S. Department of Health, Education, and Welfare prepares annual tabulations of the number of additional classrooms reported to be needed in each State. These estimates of needed classrooms are generally accepted as the most accurate available, but it should be recognized that they represent maximum estimates of need. These estimates of classrooms needed to accomodate pupils in excess of normal capacity are inflated because they indicate needed classrooms in many cases where the classrooms are almost completed. For example, the figures for the fall of 1960 for a junior high school in Montgomery County, Md., show 2,180 students on double session in that school; but the facts reveal that a new high school scheduled for opening in September 1960 was not completed on schedule because of construction delays so that the 740 pupils scheduled to attend the new high school were put on double sessions with the 1,440 pupils in the junior high school until the new school was completed in December 1960. This situation undoubtedly occurred in many communities throughout the country with the result that the reports thus showed large numbers of students in classrooms in excess of normal capacity simply because schools which had been financed and scheduled for opening in September 1960, were not completed by the scheduled date.

The estimates of classrooms needed to replace unsatisfactory facilities are also suspect as maximum figures. In some States there are arbitrary standards which provide that after a school building has been in use for a specified number of years it automatically is classified as obsolete. In this connection, it might be observed that age alone does not make a classroom unsatisfactory. Many of our finest institutions of higher learning, both in this country and abroad, take great pride in classrooms that have been in use for over 100 years.

In 1955 it was estimated by the Department of Health, Education, and Welfare that about 300,000 additional classrooms were needed (and certain advocates of Federal aid then placed the estimate much higher).

In a release on January 19, 1961, the Department of Health, Education, and Welfare announced that its latest tabulation for the fall of 1960 showed a shortage of 66,100 additional classrooms needed to accomodate pupils in excess of normal capacity and 76,000 classrooms to replace unsatisfactory facilities.

This same January 1961 release by the Department of Health, Education, and Welfare reported classrooms completed during the past 4 years for public elementary and secondary schools as follows:

Year:	*Classrooms completed*
1956–57	68,700
1957–58	72,100
1958–59	69,500
1959–60	69,400
1960–61 (scheduled for completion)	69,600

Thus, over 279,700 classrooms have been completed during the last 4 years and an additional 69,600 classrooms are scheduled for completion during the 1960–61 school year, a total of over 349,300 classrooms during the 5-year 1957–61 period.

These facts serve dramatically to disprove the prophesies of the advocates of Federal aid at hearings before a Subcommittee of the House Committee on Education and Labor in February 1957. One stated that "we will be very lucky if this year we build as many schools as we did last year and next year we won't build as many as we did this year unless there is assistance, stimulation and financial incentives from the Federal Government" (pp. 128–129 of hearings on Federal aid to States for school construction before a subcommittee of the House Committee on Education and Labor, 1957). Another advocate of Federal aid in 1957 stated, "And most serious, without substantial Federal aid, it is doubtful that even the present inadequate level of school construction can be maintained" (p. 226 of the same hearings.) Today, 4 years later, we have an additional 279,700 classrooms without Federal aid.

In any community with a growing population it is a normal situation to need a few additional classrooms every year, and this normal level of additional classroom need—which may total thousands of classrooms when aggregated for the United States—does not indicate any crisis or inability to finance additional facilities. Classrooms usually are built only when they are needed, simply because taxpayers do not authorize the construction of classrooms and the required tax levy for payment of debt service until the need exists. In most communities the need for classrooms may be reaching what is considered a normal level of additional classroom need.

In short, the alleged crisis in need for additional classrooms for public elementary and secondary schools has been met by the construction programs which are continuing at a steady rate without Federal aid.

RATE OF GROWTH IS DECREASING IN PUBLIC ELEMENTARY AND SECONDARY SCHOOL ENROLLMENT

A preliminary projection of enrollment in the public schools, included in a report on "Staffing and Constructing Public Elementary and Secondary Schools" issued by the Department of Health, Education and Welfare, dated December 14, 1960, shows that the total enrollment in public elementary and secondary schools increased from 31,162,843 in 1955–56 to 37,196,000 in 1960–61, a total increase of 6,033,157, or an average annual increase of 1,206,631.

The projection estimates that the enrollment in 1960–61 will increase to 41,880,000 in 1965–66, an increase in the 5-year period of 4,692,000, an average annual increase of only 938,400.

The important fact from these figures is that the rate of growth in enrollment in public elementary and secondary schools during the 5-year period from 1961 to 1966 is estimated to be down 35.1 percent from the growth rate during the 5-year period immediately past. In absolute terms, the increase in enrollment in the next 5 years is estimated to be down over 22 percent from the average annual increase in enrollment during the past 5 years.

SALES OF SCHOOL BONDS TO FINANCE CONSTRUCTION OF PUBLIC ELEMENTARY AND SECONDARY SCHOOLS CONTINUE AT A HIGH LEVEL

Attached as appendix A is a list of the number of issues and the dollar amount of new issues of school bonds sold in 1960 to finance construction of elementary and secondary school facilities. Sales of new issues of school bonds for public elementary and secondary schools in 1960 aggregated over $2,183,870,000, an increase of over 13 percent over sales of $1,927,600,000 of such bonds in 1959. The sales of new issues of such bonds during each of the last 4 years have been as follows:

1957	$2,357,700,000
1958	2,315,000,000
1959	1,927,600,000
1960	2,183,870,000

Sales of such bonds in January 1961 aggregated over $305 million, the largest amount of school bonds ever sold in a single month.

Preliminary reports for the last full week for which figures are available (Feb. 27–Mar. 3, 1961), indicate that these high levels of school-bond sales are continuing at the present time. Attached as appendix B is a preliminary list of new issues of school bonds sold during that week, aggregating over $76 million. It is pertinent to note, since the estimates of classrooms needed to accommodate excess enrollment show the two States needing the largest number as New York with 8,200 and Alabama with 4,926, that the issues on this list include a $30 million issue by the Alabama Education Authority and 5 issues in New York aggregating over $8,600,000.

The proceeds from the sales of these bonds are used for school facilities, not for operating expenses and teachers' salaries, and are supplemented by additional funds from current income.

The evidence also shows that voters have approved record amounts of additional school bonds. At school bond elections in 1960 voters approved over $1,756,975,000 of addi-

tional school bonds for elementary and secondary schools, representing approval of over 81 percent by value of the school bonds submitted for approval at bond elections. This represented the largest amount of school bonds approved at bond elections in any year and indicates the probability of a continuing high level of sales of school bonds to provide facilities in public elementary and secondary schools. The amount approved at bond elections in 1960 would be supplemented by unused authorizations from prior years and by large amounts of bonds for which voter approval was not required.

A resolution printed at page 3300 of the CONGRESSIONAL RECORD of March 7, 1961, states that the city of Buffalo (N.Y) "faces an educational state of emergency since present methods of financing public education have proved to be woefully inadequate." However, the record shows that:

(a) The city of Buffalo sold $3,662,000 of school bonds at a net interest cost of 2.78 percent on September 22, 1960; $4,398,000 of school bonds at a net interest cost of 2.715 percent on April 9, 1959; and $4,142,000 of school bonds at a net interest cost of 2.223 percent on March 27, 1958.

(b) The city of Buffalo has announced plans to sell about $3,988,000 of school bonds within the next few months.

(c) Bonds of the city of Buffalo are rated AAA, the highest possible rating, and the city has not reached its debt limitations.

These facts reflect a city with excellent credit and an active program of school construction and certainly provide no basis for the claim of an educational state of emergency.

These facts show that State and local school authorities are continuing to authorize and finance a high level of school construction for elementary and secondary schools without Federal assistance.

CONCLUDING COMMENTS

The foregoing facts regarding the high level of construction of additional classrooms by local educational authorities without Federal assistance, the decreasing rate of growth in public elementary and secondary school enrollment during the next 5 years, and the continuing high level of sales of new issues of school bonds to finance further construction of facilities for public elementary and secondary schools led our association to the conclusion that there is no need for Federal financial assistance for public elementary and secondary schools.

If there were a need for Federal assistance for classroom construction, S. 1021 would not guarantee that a single dollar of Federal assistance would be provided for classroom construction, because it would permit the entire amount of Federal assistance in any State to be used for increases in teachers' salaries.

The proposed Federal aid (providing a minimum State allotment of $15 multiplied by the number of public school pupils in a State during the preceding fiscal year, subject to partial reduction if a State's educational effort is not maintained) would be made available in every State, regardless of whether there was actual need in that State, regardless of the fact that the local educational authorities in a State have successfully financed—without Federal assistance—the construction of needed classrooms, a satisfactory teacher salary scale and a high level of educational attainment. Since the funds which would be given so freely by the Federal Government could come only from the taxpayers, if a program of Federal aid were needed, it should be given only where the need exists rather than as a handout for all who are willing to take.

Finally, reports in the press (the Washington Evening Star of Mar. 9, 1961, p. 1) quote one supporter of the program as stating that the program would lower local taxes for financing public schools. If funds from the proposed Federal program were simply substituted for funds from local taxes there would be no additional classrooms or teachers salary increase above the present level. To the extent that this program would finance construction of additional classrooms and salary increases for teachers above the programs presently financed by local taxes (its stated purpose), local taxes could not be reduced while the present level of local effort is maintained. In either event the Federal program obviously would require $2,298 million of additional funds from Federal income taxes, in addition to administrative costs.

APPENDIX A

Elementary and secondary school bonds sold, 1960

State	Amount	Number of issues
	Thousands	
Alabama	$12,714	8
Alaska	7,458	5
Arizona	26,969	49
Arkansas	3,362	6
California	328,343	431
Colorado	10,300	10
Connecticut	42,980	37
Delaware	5,719	3
Florida	26,905	27
Georgia	4,872	7
Hawaii		0
Idaho	7,754	10
Illinois	109,777	128
Indiana	37,299	73
Iowa	25,217	41

APPENDIX B

SCHOOL BOND ISSUES FOR PUBLIC ELEMENTARY AND SECONDARY SCHOOLS SOLD DURING THE WEEK OF FEBRUARY 27–MARCH 3, 1961

NAME OF ISSUER AND AMOUNT

Watchung, Hills Regional High School District (N.J.), $900,000.

DuPage and Will Counties Community High School District 107 (Ill.), $1,880,000.

Natrona County School Districts (Wyo.), $5.573,000.

Roxbury Township School District (N.J.), $1,716,000.

Alabama Education Authority, $30 million.

Chillicothe City School District (Ohio), $1,500,000.

Lockport City School District (N.Y.), $1,200,000.

Pomona Unified School District (Calif.), $1,060,000.

Prince Georges County (Md.), $8 million.

Raritan Township School District (N.J.), $1,498,000.

Shelby County (Tenn.), $4 million.

South Hadley (Mass.), $1,311,000.

Victoria Independent School District (Tex.), $750,000.

Austintown Local School District (Ohio), $1,155,000.

Berlin, Petersburg Consolidated School District No. 1 (N.Y.), $763,000.

Ellicottville Consolidated School District No. 1 (N.Y.), $1,260,000.

Kingston City School District (N.Y.), $3 million.

South Park Independent School District (Tex.), $2,500,000.

Cobb County School District (Ga.), $1,250,000.

Riverhead, South Hampton Consolidated School District No. 2 (N.Y.), $2,400,000.

Northern Berkshire Vocational Regional School District (Mass.), $1,474,000.

Wichita Falls Independent School District (Tex.), $3 million.

Total, $76,090,000.

DEATH OF DMYTRO HALYCHYN

Mr. KEATING. Mr. President, I was greatly distressed to learn today of the death of Dmytro Halychyn, who was supreme president of the Ukrainian National Association and also president of the Ukrainian Congress Committee of America.

Mr. Halychyn was a devoted supporter of the cause of freedom who did not forget the plight of the captive nations under Soviet tyranny behind the Iron Curtain. He labored tirelessly to make Americans aware of the hopes and aspirations of these captive peoples for freedom and self-determination. And he sought, through liberalized immigration laws to make it possible for these people to realize in America the freedom which they sought in vain to establish in their own lands.

Mr. President, I ask unanimous consent to include in the RECORD an article giving further details of Mr. Halychyn's life and work in the cause of international freedom.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DMYTRO HALYCHYN OF UKRAINIAN UNIT—HEAD OF NATIONAL GROUP IS DEAD AT 66—LEADER IN GOP ACTIVITIES

Dmytro Halychyn, supreme president of the Ukrainian National Association, Inc., and president of the Ukrainian Congress Committee of America, died yesterday at Long Island College Hospital in Brooklyn as a result of head injuries suffered in a fall 2 weeks ago. He was 66 years old.

For the last 30 years, Mr. Halychyn was a leader of the Ukrainian-American community. After his graduation from the school of international commerce in the University of Vienna, he came to the United States in 1923. He was elected secretary of the Ukrainian National Association in 1933 and became president in 1950. The association has a current membership of 79,000 and has assets of $24 million.

Mr. Halychyn served in the Ukrainian National Army as a lieutenant from 1917 to 1920. He became an American citizen in 1929. Long a member of the Republican Party, he became head of the Ukrainian Republican Committee of New York in 1952.

He continued his activities on behalf of the Republican Party throughout his career. During the Republican National Convention

last year he was made assistant secretary of the convention and appeared before the platform committee to plead for countries under the domination of the Soviet Union and for liberalization of U.S. immigration laws.

Mr. Halychyn was also known for his activities with the Conference of Americans of Central and Eastern European Descent. In recognition of his contribution to the cause of Ukrainian freedom and liberation, he received an honorary degree of doctor of political sciences from the Free Ukrainian University in Munich.

The Ukrainian American Professional Society named Mr. Halychyn "Ukrainian of the Year" in 1959.

He is survived by his widow, Stefania, and three brothers, John, Joseph, and Vasyl.

Mr. JAVITS subsequently said: Mr. President, I wish to add to the remarks of my colleague my own sadness on learning of the death of Dmytro Halychyn, whom I knew well. I had the honor of addressing the Ukrainian National Associations about a week ago at their great meeting in Carnegie Hall in commemoration of the 100th anniversary of Taras Shevchenko, one of the great heroes of the Ukrainian freedom movement, in which Mr. Halychyn was a great leader.

I express my sympathy to all the members of that association and to the people of Ukrainian extraction in the United States in connection with his demise.

U.N. DEBATE ON HUNGARY AND TIBET

Mr. KEATING. Mr. President, several weeks ago it was reported that the U.S. delegation to the United Nations was considering dropping the questions of Hungary and Tibet from the United Nations General Assembly agenda, or at the very least postponing them for as long as possible. Very much concerned about these reports, I immediately telegraphed to Ambassador Adlai E. Stevenson urging that these issues, which involve matters of deep moral principle, not be swept under the rug in an ill-conceived effort to appease the Communists.

I am happy to say that I have now received a reply to my telegram in which Ambassador Stevenson reassures me that he expects the Assembly to debate these subjects along with all questions on its agenda. I am glad to have this official reaffirmation of American dedication to the principles involved in the violation of the integrity of these countries. What makes these issues of importance and urgency is the fact that both of these cases reveal so vividly the long-term goals of Communist imperialism.

The discussion of these problems is not what makes the cold war. It is the fact that these acts of Communist barbarity actually took place that must be recognized by all free world nations. We must not allow ourselves to forget the plight of these heroic people in an attempt to appease Communist dictators. Events in Laos show only too clearly that the Communists still adhere to their goal of world domination.

Mr. President, I ask unanimous consent to include in the RECORD the text of my telegram to Ambassador Stevenson and his reply.

There being no objection, the telegram and letter were ordered to be printed in the RECORD, as follows:

MARCH 9, 1961.

Hon. ADLAI E. STEVENSON,
Ambassador to the United Nations,
New York, N.Y.:

I am deeply distressed to learn that the U.S. delegation is considering the withdrawal of the issues of Hungary and Tibet from the agenda of the United Nations General Assembly, although I agree that the problems in the Congo and the financing of Congo operations are of greatest urgency at the moment, it is vital that this blatant Communist aggression not be swept under the rug. Communist brutality in Hungary and Tibet deserves a thorough investigation and debate in the General Assembly. Basic principles of human rights and national independence are involved. The rape of Hungary and Tibet reveals beyond the shadow of doubt the ultimate aim of communism. I hope that after the immediate needs of the Congo crisis are provided for, the U.S. delegation to the United Nations will press for serious consideration of all the issues raised by Communist aggression in Hungary and Tibet, including complete Communist disregard for the authority of the United Nations.

KENNETH B. KEATING.

U.S. REPRESENTATIVE
TO THE UNITED NATIONS,
New York, N.Y., March 17, 1961.

The Honorable KENNETH B. KEATING,
U.S. Senate.

DEAR SENATOR KEATING: Thank you for your telegram of March 9. We had hoped it might have been possible to defer until September all the questions on the agenda except the few items essential to the conduct of the United Nations business. We felt that the resulting period of relative quiet would contribute to a better international climate for serious negotiation.

It now appears certain that it will not be possible to shorten the session as we had hoped. Therefore I expect the Assembly to debate all the questions on its agenda.

I am grateful to you for giving me your views and fully recognize their great merit.

With all good wishes,

Sincerely yours,

ADLAI E. STEVENSON.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

FOOD ADDITIVES TRANSITIONAL PROVISIONS AMENDMENT OF 1961

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 74, H.R. 3980.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 3980) to amend the transitional provisions of the act approved September 6, 1958, entitled "An act to protect the public health by amending the Federal Food, Drug, and Cosmetic Act to prohibit the use in food of additives which have not been adequately tested to establish their safety," and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I have discussed this procedure with the minority leadership which is agreeable to having the bill considered at this time.

I ask unanimous consent, Mr. President, to have printed in the RECORD at this point an excerpt from the report of the Committee on Labor and Public Welfare covering the proposal.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXPLANATION

This bill would extend, from March 5, 1961, until June 30, 1964, the final effective dates of the Food Additives Amendment of 1958 (Public Law 85-929) and the Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959 (Public Law 86-139). This extension would authorize the continued use of certain food additives and pesticide chemicals not covered by regulations issued by the Secretary of the Department of Health, Education, and Welfare, if the Secretary finds that such continued use would involve no undue risk to the public health, that such additives and pesticide chemicals were in commercial use prior to January 1, 1958, and that scientific investigations to determine safe levels of use are being pursued with due diligence.

Additional time is required by the Food and Drug Administration and the affected industries to complete and evaluate scientific investigations and studies needed to determine final assurance of safe use for about 30 pesticide chemicals and to determine whether some 3,000 substances are actually additives in or on a food and, if they are, what if any tolerance limitations or other conditions should be imposed on their use.

Under the bill, the Secretary of Health, Education, and Welfare could permit the continued use of the food additives or pesticide chemicals which have not been finally cleared for safety only in those instances where he has received satisfactory evidence, and has either authorized or has pending a request for authorization for the continued usage of these chemicals up to March 5, 1961, the limit of his authority, and he finds that the persons requesting the extensions have taken bona fide action before March 6, 1960, to investigate the chemicals concerned, that such investigations have continued with reasonable diligence, and that more time is necessary to complete them.

The Secretary would, at any time, be able to terminate any extension of time granted under this legislation if he finds that (1) it should not have been granted, (2) the basis for an extension no longer exists owing to a change in circumstances, or (3) there has been a failure to comply with any requirement for the submission of progress reports or with other conditions attached to the extension.

BACKGROUND

The Food Additives Amendment of 1958 (Public Law 85-929) amending the Federal Food, Drug, and Cosmetic Act became generally effective on March 5, 1959, 180 days after the date of enactment. However, with respect to any particular commercial use of a food additive before January 1, 1958, Public Law 85-929 authorized the Secretary of Health, Education, and Welfare to permit its continued commercial use while the industries concerned proceeded to develop all the necessary scientific information and data to petition the Secretary for safety clearance.

While it was felt at the time of enactment of this legislation that a deferred effective date of 18 months would be generally sufficient, it was realized that there would be some instances where a further extension of

time might become necessary, particularly in cases where extensive scientific work would be required. Hence Public Law 85–929 authorized the Secretary to allow, in these instances, an extension ending not later than March 5, 1961, based on a finding that such an extension, in each instance, would involve no undue risk to the public health and that conditions exist which necessitate such action. Under this authority the Secretary has granted over 3,000 postponements.

The Department of Health, Education, and Welfare has advised the committee that the March 5, 1961, cutoff date on the authority to grant extensions would operate unfairly in a number of situations where the continued use of an additive beyond this date would be consistent with the protection of the public health and where the industry concerned has exercised due diligence in starting and pursuing the necessary scientific work but has been unable to complete the work and file a petition for safety clearance in time for the Secretary to act.

The committee believes that the extension of authority to the Secretary of Health, Education, and Welfare to June 30, 1964, will be sufficient to enable him and industry to complete most, if not all, of the work involved in the investigations already underway.

The bill grants similar authority to the Secretary with respect to certain pesticide chemicals—about 30 in number—which were in the category of food additives before August 7, 1959, but became pesticide chemicals on that date by reason of a change in the definition of a term which encompasses such chemicals. This change was made by the Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959 (Public Law 86–139), amending the Federal Insecticide, Fungicide, and Rodenticide Act which had the effect of reclassifying nematocides, plant regulators, defoliants, and desiccants from the category of food additives to the category of pesticide chemicals.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. JAVITS. Mr. President, may we have an explanation of the bill? The bill comes from the Committee on Labor and Public Welfare, a committee on which I serve.

Mr. MANSFIELD. The bill was reported unanimously by the committee. The bill would extend, from March 5, 1961, until June 30, 1964, the final effective dates of the Food Additives Amendment of 1958 (Public Law 85–929) and the Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959—Public Law 86–139. This extension would authorize the continued use of certain food additives and pesticide chemicals not covered by regulations issued by the Secretary of the Department of Health, Education, and Welfare, if the Secretary finds that such continued use would involve no undue risk to the public health, that such additives and pesticide chemicals were in commercial use prior to January 1, 1958, and that scientific investigations to determine safe levels of use are being pursued with due diligence.

The bill has been requested by the administration, reported from the committee unanimously, and cleared with the minority leadership before being called up.

Mr. HILL. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. HILL. The bill was reported unanimously by the committee in the House of Representatives, and passed unanimously by the House of Representatives.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment, the question is on the third reading and passage of the bill.

The bill (H.R. 3980) was ordered to a third reading, was read the third time, and passed.

STUDY OF STATE TAXATION OF INTERSTATE COMMERCE

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 75, H.R. 4363.

The PRESIDING OFFICER. The bill will be stated by title.

The CHIEF CLERK. A bill (H.R. 4363) to amend Public Law 86–272 relating to State taxation of interstate commerce.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, the bill now before the Senate likewise has been cleared with the minority leadership.

The purpose of H.R. 4363 is to expand the scope of the study authorized by Public Law 86–272 to include all matters pertaining to the taxation of interstate commerce by the States, territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico, or any political or taxing subdivision of the foregoing. The study is to be made by the House Committee on the Judiciary or the Senate Committee on Finance, acting separately or jointly.

I ask unanimous consent that a general statement in respect to the bill be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 4363 is to expand the scope of the study authorized by Public Law 86–272 to include all matters pertaining to the taxation of interstate commerce by the States, territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico, or any political or taxing subdivision of the foregoing. The study is to be made by the House Committee on the Judiciary or the Senate Committee on Finance, acting separately or jointly.

GENERAL STATEMENT

Public Law 86–272 was the outgrowth of the decision by the Supreme Court in *Northwestern Cement Company* v. *Minnesota*, 358 U.S. 450 (1959) and of a number of subsequent cases in which the Court denied certiorari. Those cases dealt with the problem of income taxation and consequently when Congress sought to provide a more certain standard for businesses engaged in interstate commerce, it enacted a statute which was concerned only with the problem of State income taxation.

Subsequent to Public Law 86–272, the Supreme Court decided the case of *Scripto* v. *Carson*, 362 U.S. 207 (1960). In that case, the facts were somewhat similar to those in the income tax cases which followed Northwestern and in which the Supreme Court denied certiorari. However, the tax involved in the Scripto case was a use tax. In Scripto it was held that an out-of-State business could be required to collect and pay over a use tax on sales made within the taxing State even though the out-of-State business maintained no facilities in the taxing State.

The Scripto decision evoked a number of bills in both the House and Senate patterned after those which followed the Northwestern case. These bills, in most instances, sought to do two things:

First, they sought to impose a prohibition upon requiring an out-of-State business to collect a use tax on behalf of a State if the only activity within that State is solicitation of orders to be filled by shipment from outside the State;

Second, they sought to broaden the scope of the study required under Public Law 86–272 to include sales and use taxes.

In the 86th Congress, the Senate Committee on Finance approved a bill of this kind, S. 3549, which extended the scope of the study to all matters pertaining to the imposition of sales and use taxes by the States on sales and other business activities which are exclusively in furtherance of interstate commerce. However, no action was taken in the House.

The Committe on Finance is in agreement with the following statements from the report of the House Committee on the Judiciary:

"In view of the history of the problems of State taxation of interstate commerce, it would appear that to enlarge the scope of this study simply by adding another specific category of taxes would not prove the basis for an effective solution. If congressional action is necessary, then it must be predicated upon considerations which go beyond those relating to a particular form of tax. Since Congress must concern itself not only with safeguarding the unimpeded flow of commerce but also with the fiscal problems of State governments, it must take into account the effect which any action it may take will have upon the revenue needs of the States. Since revenues are obtained from a variety of taxes, all of which are closely interrelated, a valid judgment can be predicated only upon a consideration of the entire picture rather than a fragment of it.

"The committee is of the view that the scope of this study should be enlarged not only because it involves a unitary economic problem but because a solution predicated upon a consideration of only specified tax forms would be ineffective. In the event that Congress should determine to limit the imposition by the States of income or sales and use taxes upon interstate commerce, the States might then turn to other forms of taxes which were not considered by Congress. This is amply demonstrated by the ineffectiveness which any solution dealing with income taxes alone would have had on the problems brought to light by the Scripto decision in the area of sales and use taxes. A complete study must therefore take into account not only those taxes which happen to have been the subject of recent Supreme Court decisions but also others which have long vexed the courts.

"This bill would provide the comprehensive authority necessary to consider all matters relating to taxation by the States which affect business activities in interstate commerce."

The PRESIDING OFFICER. The bill is open to amendment. If there be no

amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 4363) was ordered to a third reading, was read the third time, and passed.

THIRD SUPPLEMENTAL APPROPRIATIONS, 1961

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 76, H.R. 5188.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 5188) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill (H.R. 5188), making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes, which had been reported from the Committee on Appropriations, with amendments.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HAYDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HAYDEN. Mr. President, the third supplemental appropriation bill, which is now before the Senate, recommends total appropriations of $4,762,600,000.

The increase over the House bill is $3,950,130,000.

However, I wish to make it clear that subsequent to the passage of the bill in the House, new estimates in excess of $4 billion were submitted to the Senate by the President. Of course, these estimates were not considered by the House.

The largest single increase recommended by the committee is in the appropriations for the Commodity Credit Corporation, where the committee recommends $2.960 million for restoration of capital impairment and for reimbursement for the activities of the Corporation.

Although the report reflects an increase by the committee in the amount of $265 million for the Department of Defense, the House had approved these programs by permitting the transfer of funds which would require replacement at a subsequent date. The committee has seen fit to recommend the appropriation in this bill.

Another sizable increase in the $150 million for the Development Loan Fund, which the House denied.

The committee was advised that unless these funds are furnished the United States will be without a development lending program during the months of April, May, and June.

To implement the new Temporary Extended Compensation Act of 1961, the committee recommends an additional appropriation of $500 million.

Although this is a reduction of $490 million under the supplemental budget estimate submitted to the Senate, in reality there will be sufficient funds to make payments for the remainder of fiscal year 1961 and into the new fiscal year.

I have cited the major increases effected by the committee. A detailed description of all increases is contained in the committee report.

Mr. President, I ask that the committee amendments to the bill on pages 2, 3, and 4, down through line 10, relating to the Commodity Credit Corporation, be considered and agreed to en bloc, and that the bill as thus amended be regarded for the purpose of amendment as original text, provided that no point of order shall be considered to have been waived by reason of agreement to this order.

The PRESIDING OFFICER. The amendment will be stated.

The first amendment of the Committee on Appropriations was, under the heading "Title I—Department of Agriculture," on page 2, after line 15, to insert:

COMMODITY CREDIT CORPORATION

Restoration of capital impairment

To restore the capital impairment of the Commodity Credit Corporation determined by the appraisal of June 30, 1960, pursuant to section 1 of the Act of March 8, 1938, as amended (15 U.S.C. 713a-1), $1,017,610,000.

The next amendment was, on page 2, after line 21, to insert:

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF SPECIAL MILK PROGRAM

To reimburse the Commodity Credit Corporation for amounts advanced including costs of interest incurred thereon to date of reimbursement, for the fiscal year beginning July 1, 1960, for the special milk program for children pursuant to the Act of July 1, 1958, as amended (72 Stat. 276, 74 Stat. 84-85), $90,000,000.

The amendment was ageed to.

The next amendment was, on page 3, after line 4, to insert:

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF SPECIAL ACTIVITIES

To reimburse the Commodity Credit Corporation for authorized unrecovered costs through June 30, 1961 (including interest through date of recovery), as follows: (1) $88,790,000 under the International Wheat Agreement Act of 1949, as amended (7 U.S.C. 1641-1642); (2) $255,685,000 for commodities disposed of for emergency famine relief to friendly peoples pursuant to title II of the Act of July 10, 1954, as amended (7 U.S.C. 1703, 1721-1724); (3) $1,353,000,000 for the sale of surplus agricultural commodities for foreign currencies pursuant to title I of the Act of July 10, 1954, as amended (7 U.S.C. 1701-1709); (4) $13,000 for grain made available to the Secretary of the Interior to prevent crop damage by migratory waterfowl pursuant to the Act of July 3, 1956 (7 U.S.C. 442-445); (5) $163,163,000 for strategic and other materials acquired by the Commodity Credit Corporation as a result of barter or exchange of agricultural commodities or products and transferred to the supplemental stockpile pursuant to Public Law 540, Eighty-fourth Congress (7 U.S.C. 1856); and (6) $1,264,000 for transfers to the appropriation "Marketing research and service" pursuant to the Act of August 31, 1951 (7 U.S.C. 414a), for grading tobacco and classing cotton without charge to producers, as authorized by law (7 U.S.C. 473a, 511d): *Provided*, That the unexpected balances of funds heretofore provided for the various purposes under this head may remain available until expended for the purposes for which appropriated and may be merged with the funds provided in this paragraph.

Mr. MANSFIELD. Mr. President, will the Senator from Arizona yield?

Mr. HAYDEN. I yield.

Mr. MANSFIELD. The distinguished chairman of the Committee on Appropriations will recall that my colleague from Montana [Mr. METCALF] and I appeared before the committee in behalf of a $350,000 appropriation to enable the Corps of Engineers to resume planning on Libby Dam in northwestern Montana.

During the course of that testimony, both my colleague, Mr. METCALF, and I stated that it was our understanding that insofar as the Libby project was concerned, there would be a power preference for Montana, based on the Hungry Horse project. Is that correct?

Mr. HAYDEN. Yes.

Mr. METCALF. Mr. President, will the Senator from Arizona yield to me?

The PRESIDING OFFICER (Mr. BIBLE in the chair). Does the Senator from Arizona yield to the junior Senator from Montana?

Mr. HAYDEN. I yield.

Mr. METCALF. Of course I am delighted that the appropriation for Libby Dam is included in the bill and that we shall go forward with this very important project.

The Senator from Arizona will remember that when the Columbia Basin Treaty, authorizing this project and others, was under consideration on the floor of the Senate, the other day, my colleague, the senior Senator from Montana [Mr. MANSFIELD], said it was our understanding that when Libby Dam is built—

> Every effort will be made to see to it that, as in the case of the Hungry Horse project, Montana will receive a proportionate share of power from that dam, to Montana for the use of the State of Montana. (CONGRESSIONAL RECORD, Mar. 16, 1961, p. 4141.)

If the Senator from Arizona will yield further, I wish to call attention to the provisions of the Hungry Horse authorizing legislation, Public Law 329, 78th Congress, which provided:

> That for the purposes of irrigation and reclamation of arid lands, for controlling floods, improving navigation, regulating the flow of the South Fork of the Flathead River, for the generation of electric energy, and for other beneficial uses primarily in the State of Montana, but also in the downstream areas, the Hungry Horse Dam was authorized.

It is my understanding, and I think it is also the understanding of the senior Senator from Montana [Mr. MANSFIELD], that that would be the general power preference for this dam under the same conditions and precedents as at Hungry Horse.

Mr. HAYDEN. Yes, there is no doubt that that is the general purpose, as stated.

Mr. MANSFIELD. And there is no question that Montana will have a prior power preference, based on that legislation?

Mr. HAYDEN. That has been the understanding all along.

Mr. METCALF. And this item is for the purpose of taking care of the planning on that, is it?

Mr. HAYDEN. Yes. It is necessary to begin the planning now, so the construction work can begin within the time specified in the treaty.

Mr. MANSFIELD. And the power preference for Montana will be included?

Mr. HAYDEN. Yes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arizona? Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, has the right to raise a point of order been reserved?

The PRESIDING OFFICER. A point of order can be raised at any time.

Mr. DIRKSEN. I wish to be sure that the right to raise a point of order prior to the taking of final action is not waived.

Mr. HRUSKA. Mr. President, it has been stated that a point of order could be raised at any time prior to the taking of final action. Final action on what?

The PRESIDING OFFICER. On the amendments.

Mr. HRUSKA. So a point of order would have to be raised prior to the time of the taking of the vote on the amendments. Is that correct?

The PRESIDING OFFICER. Yes.

Mr. WILLIAMS of Delaware. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Delaware will state it.

Mr. WILLIAMS of Delaware. Mr. committee amendments now to be considered en bloc?

The PRESIDING OFFICER. Yes. The request was that they now be considered en bloc; and that request was agreed to.

Mr. HAYDEN. Mr. President, I understand that these amendments have now been considered and agreed to en bloc.

The PRESIDING OFFICER. It was agreed that they be considered en bloc.

Mr. HAYDEN. My request was that they also be agreed to en bloc, subject to amendment, under the ordinary procedure.

The PRESIDING OFFICER. It is requested that the committee amendments referred to—those in regard to the Commodity Credit Corporation—be adopted en bloc, subject to the right to raise a point of order.

Mr. DIRKSEN. Mr. President, with all due respect to the Chair, I think the Chair should state the proposition in another way. The request goes only to agreement to consider these amendments en bloc, not to adoption of the amendments relating to the Commodity Credit Corporation.

The PRESIDING OFFICER. That was the first understanding of the Chair; but subsequently the Chair understood the Senator from Arizona to make a further request that they be considered and also be adopted en bloc, subject to reservation of the right to raise a point of order.

Mr. HAYDEN. I also asked that it be agreed that no point of order be considered to have been waived as a result of entering into the proposed agreement.

Mr. WILLIAMS of Delaware. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Delaware will state it.

Mr. WILLIAMS of Delaware. That is also my understanding of the proposed agreement, namely, that a point of order could be made at any time prior to the final vote on these particular amendments.

The PRESIDING OFFICER. The understanding of the Chair is that a point of order can be raised at any time prior to the third reading of the bill.

Mr. WILLIAMS of Delaware. That is correct.

Mr. DIRKSEN. Mr. President, what is the exact proposition now before the Senate?

The PRESIDING OFFICER. Unanimous consent has been requested by the chairman of the Appropriations Committee, the Senator from Arizona, that the committee amendments in connection with the Commodity Credit Corporation section of the bill be considered and agreed to en bloc, but without waiving the right to raise a point of order.

Is there objection to the request of the Senator from Arizona? Without objection, it is so ordered.

Mr. BRIDGES. Mr. President, this bill as constituted, if we accept the committee amendments without further amendment, will provide to the Department of Agriculture nearly $3 billion for expenditure in the 3 months which remain in the present fiscal year.

The purpose of a supplemental appropriation bill is to provide a department or agency with the funds it requires in order to carry out an activity authorized by the Congress during the current fiscal year. A supplemental appropriation bill is not intended to provide a department or agency with funds which it cannot possibly use during the current fiscal year, but which will be available during the next fiscal year.

The total amount provided in this supplemental appropriation bill is about $4,500 million. Of this amount, nearly $3 billion has been requested for the Department of Agriculture under a procedure by which the House of Representatives was bypassed and the request was made directly to the Senate committee. As a consequence of this procedure, hearings were held; and Mr. Charles S. Murphy, Under Secretary of Agriculture, testified on last Tuesday, March 21. I quote now from page 712 of the hearings, beginning near the bottom of the page with a question by the Senator from Georgia [Mr. RUSSELL]

Senator RUSSELL. I notice that you estimate almost a half billion dollars that has not been utilized.

Mr. MURPHY. At the present time, Senator RUSSELL, I would understand that we had a larger sum than that that has not been utilized. The last projection that was made indicated that as of June 30, 1961, the amount not utilized would be about $500 million. That projection was made the first part of this year. It did not take into account a number of program changes that have been made since then and one particularly important one that I refer to in this statement is involved in the new feed grains legislation which authorizes partial payment in advance of compliance for cooperation with that program.

That might result in an additional expenditure of as much as $225 million in the fiscal year 1961 which is not taken account of in that $500 million projection.

STATUS OF BORROWING AUTHORITY

In addition to that, some of the support price increases may require additional funds that will have to be recognized in the next projection and we have the rather strong feeling, sir, that this would be too narrow a margin for safety considering the size of the programs that are involved.

It is my view that the sum of the testimony of Mr. Murphy is to the effect that the Department could not use much more than $1 billion of additional funds during the current fiscal year. To be on the safe side, in order that none of these programs shall be impaired through lack of funds, I shall offer an amendment to cut $1,017,610,000 from this item.

Therefore, Mr. President, I submit the following amendment: To strike from the bill, in title I, under the heading "Commodity Credit Corporation—Restoration of Capital Impairment," the item on page 2, from line 17 up to and including line 21.

In effect, that would strike the $1,017,610,000 from the bill. It would leave a great sufficiency in the Department's appropriation not only to take care of every payment which is to be due or which it might possibly be called upon this year for payment, but it would also strike at the habit which Congress has sometimes adopted of getting into a supplemental bill and item which should properly come in the next fiscal year's appropriation bill. The proper place for such an appropriation, naturally, would be in the 1962 budget.

Therefore, in all propriety, and in the way we have made appropriations in the past, in carrying out the purpose of the amendment, plenty of money would be available in the Department of Agriculture, in view of the admission of the Under Secretary, Mr. Murphy, that it would have $500 million on June 30 of this year unspent.

I ask that the amendment be adopted.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. SALTONSTALL. What the Senator from New Hampshire has said, in substance, is that the amount of $1,017,610,000 is placed in a supplemental bill, whereas in every year in the past, or for at least 8 or 10 years, this particular item has been a part of the regular agricultural appropriation bill. Is that correct?

Mr. BRIDGES. In answer to the Senator, I could not say that in every year past the item has gone in as a part of the regular appropriation bill, but that

is the regular procedure for it, and generally that has been done.

Mr. SALTONSTALL. And there are enough funds available, although it is getting down to a close line, to carry forward the Commodity Credit Corporation through this year. Is that correct?

Mr. BRIDGES. There would be sufficient funds. The Senator has said that it would be getting to a close line; $500,000 of unspent funds will be available, plus the $2 billion which would be left in the bill if the amendment is adopted. That will not create a situation where there would be a need for worry.

Mr. SALTONSTALL. Under the committee action, as a part of the 1961 budget, the amount proposed will go into the 1962 budget.

Mr. BRIDGES. That is correct.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. RUSSELL. We may differ as to what amounts are necessary in this item, but in the past we have not always carried these funds in the regular appropriation bill. So this is not the first time it has appeared in a supplemental bill.

Mr. BRIDGES. That is the answer of the Senator from New Hampshire to the Senator from Massachusetts. The general procedure has been to carry them to the next fiscal year.

Mr. RUSSELL. Whenever they have requested it we have put it in the supplemental bills in previous years.

Mr. BRIDGES. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. WILLIAMS of Delaware. Under the recommendations of the committee, do I understand correctly that they are taking care of not only the losses heretofore sustained by the Commodity Credit Corporation, but, to some extent, the losses they may suffer in the future?

Mr. BRIDGES. It is my understanding that what we are taking care of is the estimated impairment of capital as of June 30, 1961. My answer to the Senator from Deleware was based on the estimated impairment of capital as of June 30, 1961.

Mr. RUSSELL. Mr. President, if the Senator will yield, I understand that was as of last June 30, not next June 30.

Mr. BRIDGES. A year ago. Then I am mistaken, if the chairman of the committee says this is not on an estimated basis.

Mr. RUSSELL. The total impairment of capital stock of the Commodity Credit Corporation was about $1,600 million. We restored about $595 million last year, and this is the remainder of it up to the first of July 1960.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Hampshire.

Mr. RUSSELL. Mr. President, the total amount involved is a large sum of money. It is almost $3 billion. But we have been dealing with very large sums in undertaking to restore the losses sustained by the Commodity Credit Corporation over the past 6 or 7 years.

I wish I could assure the Senate that this amount of money would make good all of the losses the Commodity Credit Corporation will bear, but I cannot, in good conscience, do so.

As of the first of this year, we had about $6½ billion of inventories on hand, in addition to the loans outstanding, which, as of the first of July this year, will total nearly $8 billion.

There is no need here of getting into a debate as to who is responsible for it. Personally, it is my view—and I have lived with this appropriation bill for more than a quarter of a century—it is due to the fallacious reasoning of Mr. Benson, the past Secretary of Agriculture. He undertook to make loans, as he was required to do under the law, to producers of commodities, and he was apparently unwilling to put any restrictions on the production of those commodities. So when he reduced the support rates with no restrictions on production, it was very natural for every farmer to produce more units to make up the losses in his income that were brought about by the reducing of the loan levels.

But the problem is before us. While it grows out of several separate losses, the particular item that is recommended to the Senate by the committee is as much an obligation of the United States under existing law as is the interest on the public debt. Indeed, it is as much an obligation of the taxpayers of the country as is the principal of the public debt itself. The only difference is that we cannot refund this fund from year to year, but must restore it each year.

The largest single item here grows out of the operation of our Public Law 480 program, and that is in effect a part of our foreign assistance program. The largest item in the bill is the $1,860 million to reimburse the Commodity Credit Corporation for special activities. That includes the operation of the International Wheat Agreement, $250 million for commodities disposed of for emergency famine relief, and $1,353 million for the sale of surplus agricultural commodities for foreign currencies, pursuant to title 1 of the act of July 10, 1954, that being Public Law 480, to which I referred.

Mr. LAUSCHE. The item of $1,017,610,000 is labeled as an amount which is required to restore the capital structure.

Mr. RUSSELL. Yes.

Mr. LAUSCHE. When did the impairment which the appropriation is supposed to cure occur?

Mr. RUSSELL. It occurred in the fiscal year 1960; from the first of July 1959, to the first of July 1960.

Mr. LAUSCHE. If that is the fact, then the amount could not legitimately be embodied in what we would call an appropriation of funds for the fiscal year 1962.

Mr. RUSSELL. I do not know why, because it is an obligation of the Government. It must be paid. When does the Senator think it should be paid?

Mr. LAUSCHE. I mean, if it is money to be appropriated, it should not be considered one of the current expenditures for the operation of the Government.

Mr. RUSSELL. No; indeed not. A similar request was submitted to the Congress last year by the previous administration, and we made a payment of $595 million last year. As I recall, that was the amount the Department of Agriculture sought, for this item in the regular bill.

The Department of Agriculture came before the committee and asked for $595 million last year, and we allowed it. The total amount of the impairment was much greater. It was approximately $1.6 billion or a little more for the entire year. We paid $595 million on the impairment last year. This is a request for the remainder.

The money is required to make good the capital structure of the Commodity Credit Corporation, to assure that funds will be available for the commodity loans which are required by law.

Mr. LAUSCHE. For the fiscal year 1960?

Mr. RUSSELL. Yes. The Commodity Credit Corporation, in its essential elements, is a banking institution. The money requested is money needed to make sure that the capital stock of the Corporation will be adequate to enable the Corporation to discharge its functions.

We have made good the impairment of capital stock every year for many years. I have the figures before me for the years 1952 to 1960. The amount of impairment we have been compelled to make good by appropriations is shown. I point out that for the year 1959 we were compelled to appropriate $1,760,399,886 to make good the capital impairment of the Commodity Credit Corporation.

Mr. LAUSCHE. I should like to repeat my understanding. The impairment of the capital structure of the Commodity Credit Corporation occurred in the fiscal year 1960, which ended on June 30, 1960, and the request now is to restore that amount.

Mr. RUSSELL. Exactly.

Mr. LAUSCHE. The item is not being placed in the regular appropriation bill for 1962 because it is not a legitimate part of that appropriation bill, the deficit having occurred in 1960.

Mr. BRIDGES. Mr. President, will the Senator yield?

Mr. RUSSELL. The item is in the supplemental bill. It is perfectly appropriate to add the funds to the bill.

Mr. LAUSCHE. I recognize it is appropriate to do so.

Mr. RUSSELL. We have previously carried such items in supplemental bills and we have carried them in the regular appropriation bills. We have, at times, carried a part of the item in the supplemental appropriation bill and a part in the regular appropriation bill. There has been no fixed rule of procedure.

Mr. LAUSCHE. Prudence would seem to indicate that the operations for the fiscal year 1962 ought not to be charged with this amount of money,

but that instead the money should be placed in a supplemental bill, to add to the appropriations for preceding years.

Mr. RUSSELL. The Senator's logic is unassailable. This is a debt which has already been incurred. We know what it is, to the last nickel. It is a past due obligation and it should be paid now, rather than charged to future operations.

Mr. LAUSCHE. If it is not included in the supplemental appropriation bill it will become a part of the current year's appropriation bill, to be charged against operations for the year 1962, with respect to which it is not a legitimate part.

Mr. RUSSELL. The Senator is absolutely correct. Though I must say that such items have been carried on some occasions in times past in the regular appropriation bills.

Mr. BRIDGES. Mr. President, will the Senator yield to me?

Mr. RUSSELL. I yield to the Senator from New Hampshire.

Mr. BRIDGES. I should like to make a brief statement to the Senator from Ohio.

I read to the Senator from the testimony of Charles S. Murphy, Under Secretary of Agriculture of the present administration. He said:

> The supplemental request before you proposes to provide in the fiscal year 1961 the appropriations for those purposes which in the budget submitted to the Congress on January 16 were proposed for 1962.

Therefore, it had been part of the original budget proposed for 1962.

As the distinguished Senator from Georgia has indicated—although not wholeheartedly—the item has been generally carried in that appropriation bill.

Mr. RUSSELL. I am not sure the statement "generally" is correct. I think it has been done about half and half in recent years.

Mr. BRIDGES. It has been done half the time?

Mr. RUSSELL. About half the time the item has been in the supplemental appropriation bill and half the time in the regular appropriation bill. There has been no established policy. The thing which has determined whether the money was immediately made available in a supplemental appropriation bill or carried in a regular appropriation bill has been whether the Department of Agriculture requested such an amount in a supplemental appropriation bill.

When Mr. Benson requested such funds in a supplemental appropriation bill we provided every dollar he asked. I certainly do not propose to do less for the present Secretary of Agriculture, who says that he needs these funds in order to enable him to operate the Department of Agriculture in accordance with his legal responsibilities under the several acts which have been passed by the Congress of the United States.

The Secretary of Agriculture says that he needs these funds now to enable him to plan, to know that the capital will be restored, and so funds will be available for the milk program, which Congress increased last year. I was one of those who supported the program to provide milk for the schoolchildren. Part of the money requested is required for that.

The Secretary has to know that the funds will be restored, to make up losses under the International Wheat Agreement. We have had losses every year for the past 15 years under this agreement.

The Secretary has to have the funds so that the losses under the Public Law 480 program can be taken care of. We have sold vast quantities of agricultural commodities to nations all over the world for soft currencies, for currencies which are not readily exchangeable. We have sold the commodities at currency values the other countries have determined, rather than for what their currency would bring in the open money market. I never did agree with that procedure. I thought we should get from a foreign country for our production the dollar value of the currency, rather than a fictitious value, but the law provided otherwise.

All of these kinds of expenditures have been made under the mandate of the Congress of the United States in every single instance.

A new man has come in to take over the Department of Agriculture. He must solve one of the most complicated and prodigious problems which has ever faced any administrator in the Cabinet of the President of the United States. He says that he needs the funds to restore the capital structure of the Commodity Credit Corporation.

Mr. President, as I said a few moments ago, for 8 years on the committee I made the motion to provide the amount of funds which Mr. Ezra Taft Benson, as the Secretary of Agriculture, requested of the Appropriations Committee. For 8 years I have stood before the Senate and supported the payment to Mr. Benson of the funds which he requested for the Commodity Credit Corporation. I certainly shall not do less for the present Secretary of Agriculture, not only because he is a member of my party but also because he is confronted with problems which require the support of the Congress of the United States.

Mr. LAUSCHE. Mr. President, will the Senator yield further?

Mr. RUSSELL. I am glad to yield to the Senator from Ohio.

Mr. LAUSCHE. I think I understand why the dispute has arisen as to whether the funds should be provided in the regular appropriation bill or in the supplemental appropriation bill. Since the obligation must be met, in the opinion of the Senator from Georgia why has the dispute become important as to whether the funds are provided in the supplemental appropriation bill or in the regular appropriation bill?

Mr. RUSSELL. With all deference and respect to my beloved friend from New Hampshire, whom I admire very extravagantly, there could be only one reason, and that is to embarrass the administration in the 1962 fiscal year with funds which have to be expended.

This bill has to be paid. I say let us go ahead, hold our noses, and pay it today. Let us give the Secretary of the Department of Agriculture, who is grappling with these problems, the assurance that he will have funds available for use for the capital stock of the Commodity Credit Corporation, as the funds were made available to his predecessor in office.

The Secretary of Agriculture has more requirements to meet now than has heretofore been the case.

Last week the Senate passed a feed grains bill, which the President signed. It is estimated that that bill will require the expenditure of approximately $250 million more than would have been spent under the existing law, and the only source from which those funds could be obtained is the appropriation that is now being requested.

The present Secretary of Agriculture has made some small increases in the rate of commodity loans that must be made on agricultural commodities that may be made before funds under a new appropriation bill will be available to the Department of Agriculture. I am glad he proposed those increases. He did not add as much in some instances as I thought he should, but he has shown that he realizes the farmers of the country have been in a deplorable condition. They have been caught in a price squeeze whereby they have had to sell their products in a buyer's market and buy what they needed in a seller's market. It has been rough going for the farmer. I am glad that the Secretary has made some modest increases in the amounts of loans available for some of these commodities, but funds will be required in order to meet those loans, and why should we not make them available today?

Mr. HRUSKA. I believe the Senator from Georgia stated that the funds involved here or those in the appropriation requested are for the purpose of covering unexpended moneys. Does that statement apply to the entire appropriation, or is it limited to the $1,017 million which is the subject of the present amendment?

Mr. RUSSELL. The statement applies to all of the items. Every one of those items is a loss that is unrecoverable, and which the Department of Agriculture was directed to incur by law. All items were incurred before the present Secretary of Agriculture took office.

Mr. HRUSKA. If the Senator will permit, I should like an explanation of the testimony of the Assistant Secretary of Agriculture Murphy, which starts with the last sentence on page 698 of the transcript of hearings:

> Because of the uncertainty as to the timing of the receipt of the appropriations originally requested in the fiscal year 1962 and the fast-moving developments in the farm economy, it is necessary to move up to the current fiscal year the request for restoration of the capital impairment of the Commodity Credit Corporation as of June 30, 1960. Acceleration of this appropriation would assure adequate uncommitted borrowing authority to the Corporation to provide for the many contingencies which possibly could occur before the end of this fiscal year.

There are some additional words which are not pertinent here.

It seems to me that those words refer to expenditures which have not yet been

made, and which are not yet payable, and certainly as to which no basis can be formed for the necessary certification which is required of the Secretary of Agriculture under section 713(a)(1) as to the net worth of the Commodity Credit Corporation, which is the only basis upon which we can appropriate, because it is in that section that the authority to appropriate is stated.

Mr. RUSSELL. I believe the Senator has completely missed the point. Mr. Murphy was talking about when the money will be committed and expended. But the question the Senator from Ohio asked me is when this money became due to the Commodity Credit Corporation, and I stated it was all past due to the Commodity Credit Corporation.

Mr. HRUSKA. Some of the money is not expended yet.

Mr. RUSSELL. Oh, no. This relates to future expenditures, to obligations to make loans on the wheat that will be produced in the State of the Senator from Nebraska this fall, not what has transpired in the past. All of the requested money is involved in transactions that have already taken place. The money has already been lost. All the losses were incurred by virtue of statutes enacted by the Congress of the United States. It is now sought to recoup and replace these losses with new appropriations as the law requires and authorizes.

Mr. HRUSKA. The testimony of the Assistant Secretary of Agriculture was that—

> Acceleration of this appropriation would assure adequate uncommitted borrowing authority to the Corporation to provide for the many contingencies which possibly could occur before the end of this fiscal year.

some of which appear to be due. He then refers to the feed grains bill, which was not law at the time this item was inserted in the supplemental appropriation request.

Mr. RUSSELL. That statement is quite true. It was not. But the feed grains bill was an additional obligation placed upon the Department of Agriculture, and for that reason we wish to make good the losses that have already been incurred by reason of past transactions, so that the present Secretary will be armed, as was his predecessor, with adequate funds to deal with problems that arise in the future.

Mr. HRUSKA. As I understand, the restoration of capital to the Commodity Credit Corporation is pursuant to section 713(a), and that is based upon an appraisal of net worth of the Commodity Credit Corporation, which cannot be made until June 30 of this year.

Mr. RUSSELL. Oh, no. This request concerns losses incurred in 1959, not this year. We are making good losses that occurred in 1959 and 1960 for appraisals that were made in June 1960, and the proposal is to meet the losses that Mr. Benson said on the first of July 1960, had already been incurred by the Commodity Credit Corporation under his direction.

Mr. HRUSKA. To that extent, I would be in full agreement with the Senator from Georgia. Yet the fact remains that the Under Secretary of Agriculture, Mr. Murphy, has referred to expenditures to be incurred in the future, and he wants these funds as an advanced and accelerated appropriation for the purpose of being able to take care of commitments which he has not made yet but which he expects to make.

Mr. RUSSELL. What Mr. Murphy was referring to is this: The question had been raised as to why we could not carry this item in the regular bill for 1962. He said he wanted the amount accelerated in the supplemental bill because he might need some of the funds between now and the time the regular bill would take effect. That is the point to which Mr. Murphy referred. I will be perfectly frank. I do not want to deceive anyone. I made this statement in the committee, and I shall make it here. In my judgment, we would not commit all the funds between now and the time the benefits of the new bill will become available. However, the Department needs the funds for planning purposes, so that it will know how to plan with respect to every commodity and the entire program, including the feed grains bill which we passed the other day.

Incidentally, I do not believe the feed grains bill will prove to be very efficacious, but it was the only measure we had before us that showed any promise of being helpful. Therefore, I supported the bill. I did so with my fingers crossed. If the Secretary of Agriculture can make anything out of that bill in the form in which Congress sent it to him, he will be a wizard. He should have been given the bill for which he asked. The bill he desired could have been made effective.

Mr. HRUSKA. Mr. President, I ask unanimous consent that the text of title 15, section 713(a)(1), be printed in the RECORD at this point in my remarks, because I made several comments and references to it. I believe if it is set forth in this context my remarks will be more comprehensible.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

§ 713a–1. Commodity Credit Corporation; annual appraisal of assets; restoration of capital impairment.

As of the 30th of June in each year and as soon as possible thereafter, beginning with June 30, 1945, an appraisal of all of the assets and liabilities of the Commodity Credit Corporation for the purpose of determining the net worth of the Commodity Credit Corporation shall be made by the Secretary of the Treasury. The value of assets shall be determined on the basis of the cost of such assets to the Commodity Credit Corporation, and a report of any such appraisal shall be submitted to the President as soon as possible after it has been made. In the event that any such appraisal shall establish that the net worth of the Commodity Credit Corporation is less than $100,000,000, the Secretary of the Treasury, on behalf of the United States, shall restore the amount of such capital impairment by a contribution to the Commodity Credit Corporation in the amount of such impairment. To enable the Secretary of the Treasury to make such payment to the Commodity Credit Corporation, there is authorized to be appropriated annually, commencing with the fiscal year 1938, out of any money in the Treasury not otherwise appropriated, an amount equal to any capital impairment found to exist by virtue of any appraisal as provided herein. Such capital impairment shall be restored with appropriated funds as provided herein rather than through the cancellation of notes. (Mar. 8, 1938, ch. 44, § 1, 52 Stat. 107; July 1, 1941, ch. 270, § 2, 55 Stat. 498; Apr. 12, 1945, ch. 54, § 4, 59 Stat. 51; Mar. 20, 1954, ch. 102, § 1(b), 68 Stat. 30.)

AMENDMENTS

1954—Act Mar. 20, 1954, struck out the words ", or insofar as practicable, the average market price of such assets during the last month of the fiscal year covered by the appraisal, whichever is lower,", which followed "Commodity Credit Corporation" in second sentence; and added sentence providing that the capital impairment referred to in the preceding sentence shall be restored with appropriated funds as provided in section rather than through the cancellation of notes.

1945—Act Apr. 12, 1945, amended section by substituting "30th of June" for "31st of March", "June 30, 1945" for "March 31, 1938" in the first sentence, and amending second sentence generally.

1941—Act July 1, 1941, affected second sentence by substituting for "on the basis of market prices at the time of appraisal" the words "on the basis of the cost . . . whichever is the lower."

EXCEPTIONS FROM TRANSFER OF FUNCTIONS

Functions of the corporations of the Department of Agriculture, the boards of directors and officers of such corporations; the Advisory Board of the Commodity Credit Corporation; and the Farm Credit Administration or any agency, officer or entity of, under, or subject to the supervision of the Administration were excepted from the function of officers, agencies and employees transferred to the Secretary of Agriculture by 1953 Reorg. Plan No. 2, § 1, eff. June 4, 1953, 18 F.R. 3219, 67 Stat. 633, set out as a note under section 511 of Title 5, Executive Departments and Government Officers and Employees.

CROSS REFERENCES

Provisions of section as applicable to federally chartered corporation, see section 714d of this title.

Mr. RUSSELL. I am glad to have that section printed in the RECORD at this point. The Senator is correct about the appraisal, but what we are making good are the deficiencies that were demonstrated by an appraisal that was made in 1960.

Mr. HRUSKA. Again I say that is understandable to me. I am in sympathy with it. I think it is very fine. But when the Secretary of Agriculture seeks to justify an acceleration of expenditures in the future, obviously they could not have been contained in the appraisal of June 30, 1960.

Mr. RUSSELL. What the Secretary was referring to was the difference between carrying it in the present bill and in the regular appropriation bill that will probably become law sometime in September.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. RUSSELL. I am glad to yield to the Senator from Idaho.

Mr. DWORSHAK. The Senator from Georgia is chairman of the subcommittee on appropriations which handles the budget for the Department of Agriculture, and is intimately acquainted with all the activities in the Department of a financial nature.

Mr. RUSSELL. I fear I do not deserve that compliment, but I shall not dispute the Senator's statement. The

Department is farflung, and has many activities.

Mr. DWORSHAK. The Senator has been a member of the subcommittee for 16 or 18 years, and chairman most of that time.

Mr. RUSSELL. I am afraid the period has been longer than that. For some 27 or 28 years I have been a member of the committee.

Mr. DWORSHAK. Of the subcommittee.

Mr. RUSSELL. Yes.

Mr. DWORSHAK. On page 13 of the side-slip under the heading "Explanation of Language Proposed," it is pointed out that capital impairment as of June 30, 1960, amounted to $1,612,108,771, and undoubtedly the subcommittee, of which the Senator is chairman, recommended in the bill which was approved last summer the restoration of $594 million of that amount of impairment, which appears on the second line of page 14.

Mr. RUSSELL. Yes. However, I would say to the distinguished Senator from Idaho that the total amount of the impairment for the year ending June 30, 1960, was $1,612,100,000.

Mr. DWORSHAK. I have just pointed that out.

Mr. RUSSELL. Yes. The Secretary of Agriculture requested, in the annual appropriation act, the sum of $595 million. He did not request all of the money, but we gave him all that he asked for.

Mr. DWORSHAK. Allegedly, leaving a balance of a little more than $1 billion to restore impairment of capital in the year ending June 30.

Mr. RUSSELL. Yes. That is the figure which was arrived at by the former Secretary of Agriculture, Mr. Benson.

Mr. DWORSHAK. Assuming that in the next fiscal year, which is fiscal year 1962, the Secretary of Agriculture makes no request for funds for restoration of impairment of capital, and would let that be deferred until a subsequent year, is it not probable that during the next fiscal year there would not be even a single dollar appropriated for restoring of impairment of capital?

Mr. RUSSELL. If the Senator's assumption were correct, that would be the result. Of course, the Secretary has already requested a restoration for that in the budget.

Mr. DWORSHAK. Yes; but that will be chargeable to the current fiscal year.

Mr. RUSSELL. No; amount under discussion is for the current fiscal year.

Mr. DWORSHAK. The money would be appropriated in the pending supplemental appropriation bill and chargeable to the present fiscal year.

Mr. RUSSELL. There has been no fixed rule about that as I stated in discussion with the Senator from New Hampshire [Mr. BRIDGES]. Sometimes we have carried it in a supplemental bill, and at other times we have carried it in the regular appropriation bill.

Sometimes we have carried part of it in a supplemental bill and the remainder in the regular appropriation bill.

Mr. DWORSHAK. Yes, but we are in agreement up to this point, then. What I would like to ask is this: Is it not possible for the Secretary of Agriculture to defer his requests until fiscal year 1963, so that the emphasis would be placed upon fiscal year 1961, which we are considering now in the pending bill, and actually giving preferential treatment to fiscal year 1963, so that the actual bookkeeping would not show how much capital has been impaired?

Mr. RUSSELL. No; he must establish the amount of the impairment every year, on June 30, under the law. He does not have to ask Congress for it, of course. But his findings are not secret.

Mr. DWORSHAK. Then it is possible to have the impairment restored in 1961 and 1963, but none in 1962. Is that correct?

Mr. RUSSELL. It is technically possible, yes; however, if I understand the attitude of the present Secretary of Agriculture, it is highly unlikely that there would be any failure on his part to ask for a restoration of the impairment.

Mr. DWORSHAK. But if my assumption is carried out on the basis of what the Secretary of Agriculture may do in the next 12 months, that could happen.

Mr. RUSSELL. He has already requested it in the pending bill. He is asking for an additional restoration in the regular appropriation bill for 1962.

Mr. DWORSHAK. How much is that?

Mr. RUSSELL. One billion four hundred and seventy-seven million dollars.

Mr. DWORSHAK. Is that based upon the impairment of capital for the fiscal year ending June 30, 1961?

Mr. RUSSELL. Yes; that is correct.

Mr. DWORSHAK. But there are still 3 months remaining in the present fiscal year.

Mr. RUSSELL. That is correct. This is the amount that he has requested. This money does not become available until next year.

Mr. DWORSHAK. He is speculating on what is required to restore the impairment. Is that correct?

Mr. RUSSELL. Yes. This is not the first time it has been done this way. It has been done before. I am ready to vote, Mr. President. We have to restore the capital impairment. I see no reason for delay.

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. RUSSELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Hampshire [Mr. BRIDGES] to strike from the bill the language contained on page 2, lines 17 to 21, inclusive. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Virginia [Mr. BYRD], the Senator from Idaho [Mr. CHURCH], the Senator from North Carolina [Mr. ERVIN], the Senator from New Jersey [Mr. WILLIAMS], the Senator from Tennessee [Mr. GORE], the Senator from Michigan [Mr. HART], the Senator from Oklahoma [Mr. KERR], the Senator from Louisiana [Mr. LONG], the Senator from Oklahoma [Mr. MONRONEY], the Senator from West Virginia [Mr. RANDOLPH], the Senator from Florida [Mr. SMATHERS], and the Senator from Missouri [Mr. SYMINGTON] are absent on official business.

I also announce that the Senator from Minnesota [Mr. MCCARTHY] is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY] is necessarily absent.

I further announce that, if present and voting, the Senator from Virginia [Mr. BYRD], the Senator from Idaho [Mr. CHURCH], the Senator from North Carolina [Mr. ERVIN], the Senator from Tennessee [Mr. GORE], the Senator from Michigan [Mr. HART], the Senator from Oklahoma [Mr. KERR], the Senator from Louisiana [Mr. LONG], the Senator from Oklahoma [Mr. MONRONEY], the Senator from West Virginia [Mr. RANDOLPH], the Senator from Florida [Mr. SMATHERS], the Senator from Missouri [Mr. SYMINGTON], the Senator from Minnesota [Mr. MCCARTHY], the Senator from Texas [Mr. BLAKLEY], and the Senator from New Jersey [Mr. WILLIAMS], would each vote "nay."

On this vote, the Senator from Indiana [Mr. CAPEHART] is paired with the Senator from North Dakota [Mr. BURDICK]. If present and voting, the Senator from Indiana would vote "yea" and the Senator from North Dakota would vote "nay."

Mr. KUCHEL. I announce that the Senator from Indiana [Mr. CAPEHART], the Senators from Kansas [Mr. CARLSON and Mr. SCHOEPPEL] and the Senator from Kentucky [Mr. MORTON] are necessarily absent. If present and voting, the Senators from Kansas [Mr. CARLSON and Mr. SCHOEPPEL] and the Senator from Kentucky [Mr. MORTON] would each vote "yea."

The Senator from Indiana [Mr. CAPEHART] is paired with the Senator from North Dakota [Mr. BURDICK]. If present and voting the Senator from Indiana [Mr. CAPEHART] would vote "yea," and the Senator from North Dakota [Mr. BURDICK] would vote "nay."

The result was announced—yeas 31, nays 50, as follows:

[No. 22]

YEAS—31

Aiken	Cotton	Miller
Allott	Curtis	Mundt
Beall	Dirksen	Prouty
Bennett	Dworshak	Saltonstall
Boggs	Fong	Scott
Bridges	Goldwater	Smith, Maine
Bush	Hickenlooper	Wiley
Butler	Hruska	Williams, Del.
Case, N.J.	Javits	Young, N. Dak.
Case, S. Dak.	Keating	
Cooper	Kuchel	

NAYS—50

Anderson	Eastland	Humphrey
Bartlett	Ellender	Jackson
Bible	Engle	Johnston
Byrd, W. Va.	Fulbright	Jordan
Cannon	Gruening	Kefauver
Carroll	Hartke	Lausche
Chavez	Hayden	Long, Mo.
Clark	Hickey	Long, Hawaii
Dodd	Hill	Magnuson
Douglas	Holland	Mansfield

McClellan	Neuberger	Sparkman
McGee	Pastore	Stennis
McNamara	Pell	Talmadge
Metcalf	Proxmire	Thurmond
Morse	Robertson	Yarborough
Moss	Russell	Young, Ohio
Muskie	Smith, Mass.	

NOT VOTING—19

Blakley	Gore	Randolph
Burdick	Hart	Schoeppel
Byrd, Va.	Kerr	Smathers
Capehart	Long, La.	Symington
Carlson	McCarthy	Williams, N.J.
Church	Monroney	
Ervin	Morton	

So Mr. BRIDGES' amendment to the committee amendment was rejected.

The PRESIDING OFFICER (Mr. BARTLETT in the chair). The next committee amendment will be stated.

The LEGISLATIVE CLERK. On page 4, it is proposed to strike out line 21——

Mr. BRIDGES. No, Mr. President; the next committee amendment is not on page 4. The Senate has acted on part of the committee amendments which begin on page 2. I have another amendment to offer to these committee amendments.

The PRESIDING OFFICER. These amendments have been agreed to; but they are subject to amendment.

Mr. BRIDGES. Mr. President, to this committee amendment I offer the following amendment: On page 3, after the semicolon in line 15, to strike out all up to and including the semicolon after the figures "1709", in line 18—in other words, strike out subparagraph (3), which reads as follows:

(3) $1,353,000,000 for the sale of surplus agricultural commodities for foreign currencies pursuant to title I of the Act of July 10, 1954, as amended (7 U.S.C. 1701–1709).

The PRESIDING OFFICER. The amendment submitted by the Senator from New Hampshire to the committee amendment will be stated.

The LEGISLATIVE CLERK. In the committee amendment on page 3, beginning in line 15, it is proposed to strike out the following:

(3) $1,353,000,000 for the sale of surplus agricultural commodities for foreign currencies pursuant to title I of the Act of July 10, 1954, as amended (7 U.S.C. 1701–1709).

Mr. BRIDGES. Mr. President, this amendment is similar to the one I previously submitted.

The entire committee amendment appears under the heading "Reimbursement to Commodity Credit Corporation for Costs of Special Activities;" and lines 7, 8, and 9, on page 3, which appear under that heading, read as follows:

To reimburse the Commodity Credit Corporation for authorized unrecovered costs through June 30, 1961 (including interest through date of recovery), as follows:

My amendment will strike out subdivision (3), in lines 15 through 18.

Let me point out that part of the money which we now are asked to appropriate will not be expended in the present fiscal year, which will end on June 30, 1961. We here are asked to appropriate sufficient to permit an estimated balance to remain. As a result of the other parts of this overall amendment, there will be ample funds for the Commodity Credit Corporation. First, there will be the $500 million, which Under Secretary Murphy says will be in the fund, under the general authority. Then there will be approximately $1,750 million more, under the part of the committee amendment to which I offered my first amendment, which was rejected, and also under several other items in this overall amendment.

So there will be the $500 million which Under Secretary Murphy said will be available, plus approximately $1,650 million which will be covered by the remainder of the overall amendment. So there is no justification for the appropriation of this particular amount in this bill.

Mr. JAVITS. Mr. President, will the Senator from New Hampshire yield?

Mr. BRIDGES. I yield.

Mr. JAVITS. I wish to make one point, although I believe I know the answer. Nevertheless, I believe it should be made clear for the record. I think all of us know the views of the Senator from New Hampshire on this foreign-policy question; but let me state that, as I understand, the amendment he now submits in no way affects who may be the legitimate purchasers of these commodities or the particular countries to which they may move. The amendment has no bearing, one way or the other, on that question, as I understand.

Mr. BRIDGES. No, it does not. It relates to the estimate for the period up to June 30; and the item to which my amendment relates would normally be included in the regular appropriation bill for the fiscal year 1962.

Mr. JAVITS. I thank the Senator from New Hampshire.

Mr. AIKEN. Mr. President, will the Senator from New Hampshire yield to me?

Mr. BRIDGES. I yield.

Mr. AIKEN. Is it the assumption of the Senator from New Hampshire that the purpose of including in this bill this item of $1,353 million is to have it charged against this fiscal year, rather than the next fiscal year?

Mr. BRIDGES. Certainly that is one of the principal objectives.

Mr. AIKEN. What other purpose would there be?

Mr. BRIDGES. None. Obviously the purpose is to charge this item against the fiscal year ending June 30, 1961, instead of to charge it against the fiscal year ending June 30, 1962.

Mr. AIKEN. In other words, the purpose is to make the last fiscal year of the Eisenhower administration look a little worse, and to make the fiscal year of the Kennedy administration look better. Does the Senator from New Hampshire assume that is the purpose?

Mr. BRIDGES. Yes.

Mr. AIKEN. Would this part of the committee amendment establish a precedent of any kind?

Mr. BRIDGES. Well, we have previously established precedents, either in whole or in part, from time to time. But the fact that from time to time exceptions have been made is no reason for taking the action now proposed by means of this committee amendment.

Mr. AIKEN. The Senator from New Hampshire will recall that 2 years ago I vigorously opposed advancing certain expenditures, in order to include them in the calendar year 1959, rather than to have them included in the calendar year 1960.

I do not believe that the taxpayer or the voter of this country cares whether he gets a bill in June or in August. The total amount does mean a lot to him. It looks now as if it is going to mean a lot more to him in the next 3 or 4 years.

In order to be consistent, I shall vote for the Senator's amendment, because I opposed a similar proposal which was an attempt at a new precedent; and I am still wondering how President Eisenhower was able to get a Democratic Congress to do it. It must have been as a result of magnificent persuasion on the part of the President.

I shall vote for the amendment so long as the Senator can assure me that it does not affect the sale of commodities to any country anywhere.

Mr. BRIDGES. It does not.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. WILLIAMS of Delaware. On the previous amendment the Senator from Georgia [Mr. RUSSELL] advanced the argument that the item was merely for the restoration of established losses. However, that argument does not stand now. Is that correct?

Mr. BRIDGES. That is correct.

Mr. WILLIAMS of Delaware. As I understand, losses have been estimated which may or may not be sustained between now and June 30. In addition, there is an estimated interest requirement on the losses which has not as yet been sustained, and so far as anyone knows, may or may not be sustained.

Mr. BRIDGES. That is correct.

Mr. WILLIAMS of Delaware. The law provides that Congress may make appropriations for the restoration of the capital impairment of the Commodity Credit Corporation. Is that correct?

Mr. BRIDGES. That is my understanding.

Mr. WILLIAMS of Delaware. Does not this proposal go beyond the requirements that exist in law in making restoration of capital impairment? How can capital impairment be corrected when the capital has not yet been impaired?

Mr. BRIDGES. I think that is a good point. I do not see how it could be done. It has been from time to time attempted.

Mr. WILLIAMS of Delaware. I recognize that. I also agree with the Senator from Vermont that it was wrong if it was done before, and it is wrong now. I do not see how we can have intelligent bookkeeping if we are going to run the department on estimates. In the first place, I am not sure we have legal authority to make an appropriation in advance of the actual impairment of the capital structure.

Mr. AIKEN. Mr. President, if the Senator will yield, we may as well concede, whether an impairment has actually taken place or not, that there is going to be a massive impairment of capital in the next 3 or 4 years. We may use it all if we do not restore any of it.

Another matter we should take notice of is that much of the foreign currencies deposited in banks in foreign countries draws no interest, but the money is loaned at high rates of interest. As I am sure the Senator from Delaware knows, they make very substantial profits on the loans. There ought to be some way for the administration to collect more interest on these huge amounts of foreign currencies that are deposited with banks in foreign countries.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. SALTONSTALL. The Senate has sustained the committee amendment providing for the $1,017,610,000. Following what the Senator from Vermont [Mr. AIKEN] and the Senator from Delaware [Mr. WILLIAMS] have said, that action gives the agency sufficient funds to carry through for the rest of the year, when it can be more accurately determined whether or not there will be a loss of $1,353 million. Is that a correct understanding?

Mr. BRIDGES. Absolutely; it is.

Mr. SALTONSTALL. If the Senate had not voted to sustain the action of the committee in providing the $1,017,610,000, this item would be more important.

Mr. BRIDGES. I ask for the yeas and nays on the amendment. The yeas and nays were ordered.

Mr. RUSSELL. Mr. President, politics being what it is in this country, I suppose we may always expect to have improper motives attributed any time there is any change made in the old order. I regret that the President has been charged with the motive, without any evidence to support it, that this is a change made to make the Eisenhower administration look bad and the Kennedy administration to look good.

I wonder if those who are making the charge are familiar with the communication from the President of the United States transmitting amendments to the budget for the fiscal year 1962 dealing with this item, dated March 20, 1961. This is the additional estimate for 1962 sent to the Congress just recently dealing with appropriations, requesting that $1,477 million be included in the bill for the year 1962 for the Commodity Credit Corporation.

The present President of the United States is trying to put the Commodity Credit Corporation on a strictly pay-as-you-go basis; that he intends to keep it sound; that he does not want great impairments of capital carried over from year to year and the vast expenditures made in the foreign aid program carried over from year to year. His purpose is to see that the full capital stock of the Commodity Credit Corporation is available to help the farmers of the United States under the farm program he has requested at the hands of Congress.

I have come to that conclusion, and regard it as more reasonable than attributing to the new administration all kinds of dubious motives, that the President is determined to see that the Commodity Credit Corporation and its capital stock and its operations are kept on a current basis, instead of letting them lag and stay in confusion.

This item deals with the foreign aid program, Public Law 480. I have not thought too highly of that program. I think within it is embraced vast grants to certain countries between the difference of the real value of the foreign currencies which we obtain and the estimated or official value in the country in which we spend them. I think we are giving vast grants to the countries that receive the benefits of the program. But what is proposed here is not the way to kill that program. If Senators desire to kill the foreign aid program and put it on a current and realistic basis, they should introduce a bill to kill the program.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. HUMPHREY. I wish to commend the Senator for his defense of this appropriation, because, frankly, it is the only way the program can operate, unless we want to nibble away at the resources without doing something to restore them.

I understand that in the Second Supplemental Appropriation Act of 1958 there was an item of $1,545 million, which is similar to the request being made. In the second supplemental appropriation bill of 1959 there was a request for $1,336 million. In this proposal, the total request for all activities, not merely the item under debate here, was $1,861 million. The whole purpose of this is foreign aid, as is evident from the report of the committee.

The $1,353 million about which we are talking is with reference to sales of surplus agricultural commodities for local currencies under title I, Public Law 480. These local currencies are a part of the general funds available to the Government for what we call foreign aid. The local currencies are not all given away, by any stretch of the imagination. Many of such amounts are repaid.

While one could do a little tinkering with the books and perhaps appropriate less, when one does that as a teller in a bank he is caught and put some place for a long vacation.

It does not seem to me that we ought to be tinkering with the books of the Commodity Credit Corporation. What the Senator from Georgia proposes is that we face up to the costs we have encountered during the present fiscal year.

Mr. RUSSELL. This is as just an obligation against the United States as is the interest on the public debt or any allocation of moneys to build a highway which is already under contract. The law says how the money should be estimated and that it should be repaid.

Mr. President, I ask unanimous consent to have printed in the RECORD as a part of my remarks section 103(a) of the Agricultural Trade Development and Assistance Act, commonly known as Public Law 480.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

SEC. 103. (a) For the purpose of making payment to the Commodity Credit Corporation to the extent the Commodity Credit Corporation is not reimbursed under section 105 for commodities disposed of and costs incurred under titles I and II of this Act, there are hereby authorized to be appropriated such sums as are equal to (1) the Corporation's investment in commodities made available for export under this title and title II of this Act, including processing, packaging, transportation, and handling costs, (2) all costs incurred by the Corporation in making funds available to finance the exportation of surplus agricultural commodities pursuant to this title and, (3) all Commodity Credit Corporation funds expended for ocean freight costs authorized under title II hereof for purposes of section 416 of the Agricultural Act of 1949, as amended. Any funds or other assets available to the Commodity Credit Corporation may be used in advance of such appropriation or payments, for carrying out the purposes of this Act. (7 U.S.C. 1703(a).)

Mr. RUSSELL. Mr. President, this represents an obligation which the Congress of the United States has instructed the Department of Agriculture and the Department of State to incur. There is no man in this body who would say the obligation does not have to be paid. What is the point in delaying?

The President is requesting $1,477 million in anticipation of the restoration of the capital stock in his revised budget for the year 1962. I assume the President is undertaking to put the Commodity Credit Corporation on a current basis, and does not intend to leave this $14 billion Corporation with only a half billion dollars available for operations.

We are not going to avoid paying for these obligations by voting for any amendment. We may defer paying them, but we cannot avoid the payment. All we will do is cause confusion in the operation of the farm program and in the operation of the foreign-aid program of this country, by withholding approval of appropriations. It is, in essence, a request for a partial repudiation of an honest obligation of the Government of the United States to intimate we can avoid paying for these losses.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. HUMPHREY. I suggest that we have evidence in the report as to what the Senator is discussing. For example, the item of $1,353 million is a part of the overall item of $1,861 million. There are $194,260,000 of unrecovered 1960 costs, consisting of $177 million for sales for local currencies and $17,260,000 for the International Wheat Agreement.

My point is that we did not have a supplemental under the 1960 program, and therefore we were caught short, and $194,260,000 was taken out of the Commodity Credit Corporation. There was no replacement. We are now considering the supplemental appropriation bill a year later. If we do not provide the item this year, as we did not provide the item last year, pretty soon the Commodity Credit Corporation, with its $14 billion in capital assets——

Mr. RUSSELL. Fourteen and one-half billion dollars.

Mr. HUMPHREY. The Commodity Credit Corporation with $14½ billion in capital assets, will have no money. Most of the money is committed.

Mr. RUSSELL. The estimate is that only $500 million will be available as of the first of July, without the replacement requested.

There are many programs to be taken care of. There are many loan programs, including the feed grains program, and, praise God, a slightly increased support price on some commodities has been ordered by the Secretary of Agriculture.

Mr. HUMPHREY. We are threatening to jeopardize the operations of a $14½ billion corporation by trying to make what I would call a bookkeeping cut. It would not be an actual or a factual cut, but what is proposed is a bookkeeping cut.

Mr. RUSSELL. It would simply confuse the program. There are those who claim it would not have an effect on the foreign aid program. I repeat that I think the foreign aid program has been extravagant and wasteful of a great deal of money. However, when the Congress passes an act pertaining to such a program, we ought to try to carry it out in good faith. We cannot strike out the replacement of funds without slowing down the foreign aid program. Neither the foreign countries nor the administrators of the program will know what to expect at the hands of Congress if we appear to be repudiating a legal obligation.

Mr. WILLIAMS of Delaware. Mr. President, I have listened to the distinguished Senator from Georgia, for whom I have a great deal of respect. It is interesting, however, to read the statements by the Senator from Georgia on page 713 of the hearings before the committee, in which he raised questions as to the advisability of the item being included.

Mr. RUSSELL. I certainly did raise the question. I deem it my duty to scrutinize every request for appropriations which is made to the committee.

Mr. WILLIAMS of Delaware. The Senator from Georgia raised some serious questions at the time. He pointed out that all of the money was not needed and that by appropriating the full amount, thereby making it available in advance, it could result in an unnecessary expenditure on the part of the Government.

The Senator made a rather persuasive argument, and I think it would be well to incorporate his statement in the RECORD at this point. I ask unanimous consent that the remarks of the Senator from Georgia, appearing on page 713 of the hearings, be printed in the RECORD.

Mr. RUSSELL. Mr. President, I hope the Senator will put the entire statement in.

Mr. WILLIAMS of Delaware. I meant to have the whole statement printed.

Mr. RUSSELL. I also said I would favor making such an appropriation on a current basis. I do not think the Department can possibly spend all of the money between now and the time the new bill will take effect. I have said that before, and I will say it again.

Mr. WILLIAMS of Delaware. The Senator from Georgia will admit will he not, that in the requested appropriation there is an estimate made for a loss which as yet has not been sustained, and no man can say whether the loss will be sustained.

Mr. RUSSELL. That is not involved in the present appropriation request, because actually the losses were greater than the estimate in 1960. That was the estimate at June 30, 1960. The best figure we have is that the losses were really greater than the estimate. The loss has already been incurred, up to 1960.

The PRESIDING OFFICER (Mr. BARTLETT in the chair). Is there objection to the request of the Senator from Delaware?

There being no objection, the excerpt beginning on page 712 of the hearings, was ordered to be printed in the RECORD, as follows:

NEED FOR MORE CURRENT RESTORATIONS

Senator RUSSELL. This acceleration means that you propose to make the appropriations for the restoration of the capital impairment and to reimburse for the expenditures under Public Law 480 program available as a supplemental or a deficiency this year rather than in the regular appropriation bill for the coming fiscal year.

Mr. MURPHY. Yes, sir; that is true. We feel it is desirable and advisable to get these restorations on a more current basis and, particularly in this case, to avoid the necessity for increasing the authorized borrowing power of the Commodity Credit Corporation and to keep the Commodity Credit Corporation from running out of available funds.

Senator RUSSELL. Has the Solicitor of the Department of Agriculture approved the legality of this appropriation under existing law?

Mr. MURPHY. Yes, sir; he has.

Mr. RUSSELL. You are convinced in your own mind as an attorney, and a good one, that this can be done under existing law?

Mr. MURPHY. Yes, sir.

Senator RUSSELL. I notice that you estimate almost a half billion dollars that has not been utilized.

PROGRAM CHANGES

Mr. MURPHY. At the present time, Senator Russell, I would understand that we had a larger sum than that that has not been utilized. The last projection that was made indicated that as of June 30, 1961, the amount not utilized would be about $500 million. That projection was made the first part of this year. It did not take into account a number of program changes that have been made since then and one particularly important one that I refer to in this statement is involved in the new feed grains legislation which authorizes partial payment in advance of compliance for cooperation with that program.

That might result in an additional expenditure of as much as $225 million in the fiscal year 1961 which is not taken account of in that $500 million projection.

STATUS OF BORROWING AUTHORITY

In addition to that, some of the support price increases may require additional funds that will have to be recognized in the next projection and we have the rather strong feeling, sir, that this would be too narrow a margin for safety considering the size of the programs that are involved.

Senator RUSSELL. I am inclined to agree with that. I was just wondering if it was necessary to make this whole sum, which is approximately $3 billion, available a year in advance of the time it has ordinarily been made available.

I hope that does not encourage any extravagance on the part of the Department. If we do, we will have to go to not only anticipating but increasing the authorization.

Did you give any consideration to increasing the capital authorization to meet this emergency?

Mr. MURPHY. Yes, sir; we did, and we felt that it was more desirable to approach it this way because we hope and believe that this is a problem that is temporary and we would hope that we could conduct the activities of the Corporation in the future without increasing that borrowing power authorization above the present $14.5 billion. We would hope to be able to live within that and not have to increase it.

EFFECT OF PROPOSAL ON EXPENDITURES

I may say, Senator, that these restorations for funds to enable us to carry out what I believe we call mandatory programs do not affect the amount that is actually spent under these programs.

Senator RUSSELL. Yes, I am aware of that but that makes it all the more difficult to understand why it is necessary to have the whole $3 billion. I heard you say in your original statement that this would not increase the expenditures. I do not see how you are going to meet the $225 million under the grain bill which you estimate there as well as the increased loan rates which have been established by the Secretary and with which I agree without an increase in your expenditures. It seems you would certainly increase them above what you have estimated them to be.

ESTIMATED COST OF FEED PROGRAM

What is the total estimated cost of that new feed grains bill?

Mr. BEACH. The estimated total value of the payment-in-kind certificates would be roughly $450 million, and $225 million represents half of that.

Senator YOUNG. How much is the estimated cost?

Mr. BEACH. The value of the payment-in-kind certificates under the feed grains bill would be approximately $450 million, assuming 60-percent participation.

Senator YOUNG. This would be paid out of stocks of the Commodity Credit Corporation?

Mr. BEACH. Yes, sir. Against that payment in kind the law provides the possibility of making an advance payment of one-half, so if half goes out this year and if the sales did not take place this fiscal year there would be a net drawdown of CCC cash.

PAYMENTS IN KIND

Senator YOUNG. Do you plan to make all of the payments in kind or in cash? It would make a difference on your request for appropriations.

Mr. BEACH. The bill provides the option for the first 20-percent reduction to be made in kind. The second reduction has to be made in kind. Our present projections are on the basis of both being paid for entirely in kind.

Senator RUSSELL. In other words, it would be as broad as it is long in terms of financing the Commodity Credit Corporation whether you paid it in cash or in kind.

Mr. BEACH. In the fiscal year 1961, the net effect would be that the cash would go out and the cash would not be returned to the CCC until probably the next fiscal year.

Senator YOUNG. You would be selling the grain on the open market?

Mr. BEACH. Not necessarily in the same fiscal year.

Senator YOUNG. I hope you are not going to be dumping this grain on the market shortly after you get it. That would be in line with the section 3 provision requested by the Secretary and which the House approved.

Mr. BEACH. Our present projections do not anticipate that.

Senator RUSSELL. Have you given up getting section 3 in the bill?

Mr. BEACH. At present, this projection does not reflect extra-large sales receipts this year. In other words, this anticipates no greater sales than would ordinarily be the case.

Senator YOUNG. You say "no greater sales than would ordinarily be the case." You have a new program of payment in kind and the Department of Agriculture would be authorized to sell this grain for the farmer. Do you plan to hold all of this grain and not sell it?

Mr. BEACH. We are only speaking of the period between now and June 30, 1961.

EFFECT OF PAYMENTS ON FINANCING

Senator RUSSELL. Do you anticipate they will want cash on the first payment?

Mr. BEACH. The option would remain with the Secretary as to when he would sell grain to offset those several certificates back into the market.

Senator RUSSELL. I cannot see where it would make any difference with Commodity Credit Corporation financing whether you sell it or whether the farmer accepts it and sells it. It will get rid of grain that we now have invested $450 million in, and you would be rid of that amount, whichever way it is done.

Mr. BEACH. The immediate effect of it is that there is an immediate drawdown in CCC cash and borrowing power. That is what we are speaking of with respect to the $225 million, which would not actually be replaced until the grain is sold later.

Mr. WILLIAMS of Delaware. The statement of the Senator from Georgia may be correct in connection with the previous amendment, but I think, based on the committee report, it is not correct with respect to the amendment now before the Senate.

Mr. RUSSELL. There is a difference.

Mr. WILLIAMS of Delaware. The amendment which is now before the Senate relates not only to established losses but also to estimated losses between now and June 30, 1961, plus interest on those estimated losses. No one knows how much those will be; is that correct?

Mr. RUSSELL. The Senator is correct. The estimate to which I referred was with respect to the item on which we just had the vote.

Mr. WILLIAMS of Delaware. I understand that situation, but with reference to the particular item, the point I am making is that under the law, as I understand it, the Congress can authorize the restoration of the impairment of the capital of the Corporation. In this instance, we not only would be restoring the impairment of the capital but also would be making allowance for estimated losses in advance. If we can do that with respect to $400 million or $500 million, conceivably the Appropriations Committee could present to the Senate a request for an appropriation of $10 billion to pay for 10 years in advance.

Mr. RUSSELL. Mr. President, I merely wish to say, if Senators will indulge me, that the estimates were not made by this administration but were made by the Eisenhower administration, and were included in the original budget estimates.

This is not a new proposal. We have had Public Law 480 for several years. On three or four previous occasions the Democratic Congress has appropriated such funds on the same basis to the Department of Agriculture in that past administration.

Mr. WILLIAMS of Delaware. I say to the Senator from Georgia that I opposed any such financing then, as I do now, because I do not think we would be carrying out the intent of the law as it was written by estimating such losses. My point is that if we can do so in an amount of $400 million or $500 million, we can do so in an amount of $10 billion. There is no limit as to what we could appropriate if we were to adopt this principle.

If the Appropriations Committee wishes to request an appropriation on the basis of estimates, then the existing law should be amended.

Mr. RUSSELL. Mr. President, the Senator well knows that all of the appropriations we are asked to provide for in the entire budget are on the basis of estimates. There is an estimate for every item in all of the appropriation bills for the next year. I cannot see, for the life of me, why we ought to apply a different rule with respect to this item.

Mr. WILLIAMS of Delaware. I beg the Senator's pardon. Some other type of items are covered by estimates, but the impairment of capital of the Corporation is to be done only on a sustained-loss basis and is not supposed to be done on the basis of estimates.

Mr. HRUSKA. Mr. President, in connection with the pending amendment I should like to make a statement or two in order to keep this subject in focus. Some suggestions have been made to the effect that to sustain the amendment would be a repudiation of an honest obligation. There has also been a suggestion that a program would be jeopardized if the amendment were approved. With all due respect to those who have made such statements, I say that no such thing is involved whatsoever. All that is involved is the timeliness and the regular order of approving an appropriation for the amount involved. That is quite clear from the testimony given before the Subcommittee on Department of Agriculture Appropriations, and it is simply an acceleration of an item which originally appeared in the budget for fiscal year 1962. I quote now the testimony of Assistant Secretary Charles Murphy at page 698 of the hearings, in which he testified—

> Because of the uncertainty as to the timing of the receipt of the appropriations originally requested in the fiscal year 1962 and the fast-moving developments in the farm economy, it is necessary to move up to the current fiscal year the request for restoration of the capital impairment of the Commodity Credit Corporation as of June 30, 1960. Acceleration of this appropriation would assure adequate uncommitted borrowing authority to the Corporation to provide for the many contingencies which possibly could occur before the end of this fiscal year, some of which now appear to be developing.

The point is that the impairment of capital to the Commodity Credit Corporation is done pursuant to section 5, title 15 of the code, section 713 (a) (1). That section was already adverted to by the Senator from Delaware [Mr. WILLIAMS]. In brief, it provides that there is an estimate of the appraisal of the net worth of the Corporation. If the net worth falls below the authorized capitalization, then Congress is authorized to appropriate an amount to make up the deficiency.

Obviously, to the extent that there has been no estimate of appraisal as of June 30, 1961—and there cannot be—there will not be compliance with title 15, of section 713(a)(1). It is on that basis that I urge approval of the amendment.

Mr. WILLIAMS of Delaware. Madam President, will the Senator yield?

Mr. HRUSKA. I yield.

Mr. WILLIAMS of Delaware. The Senator is aware of the fact, is he not, that several years ago the law provided that the Commodity Credit Corporation should make its expenditures by borrowing from the Treasury and that at periodic intervals Congress would cancel those notes.

Mr. HRUSKA. Yes.

Mr. WILLIAMS of Delaware. As a result of an amendment which I sponsored and which was accepted by the Senate the practice of cancellation of notes was changed, and the funds were made available by direct appropriations. This amendment was submitted with the thought in mind that as the department asked for funds, it could supply a breakdown as to the losses sustained on the various commodities so that the Congress would know what was being expended.

In this instance we have no idea for what we would be appropriating the requested money. We are asked to appropriate $2 million to $3 million on an item listed as a prospective loss—a loss which may be sustained on wheat, corn, or any other commodity, or which may not be sustained at all. By so doing we would lose control over appropriations. We would also lose the benefit of knowledge of what the programs are costing.

It may well be that this is what the new administration has in mind.

Mr. HRUSKA. The Senator from Delaware should again be commended for having sponsored and secured approval of the section to which I referred. His amendment closed somewhat the door of backdoor financing. By now rejecting the proposed amendment we would reopen the door, if that would be the judgment of the Senate.

Mr. RUSSELL. Madam President, I ask unanimous consent to have printed at this point in the RECORD a statement I have prepared on actions taken by the new administration in the Department of Agriculture to improve farm income and utilization of reserve supplies of commodities, showing that there has been a number of increases, and these funds are therefore needed.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ACTIONS TAKEN BY THE NEW ADMINISTRATION IN THE DEPARTMENT OF AGRICULTURE TO IMPROVE FARM INCOME AND UTILIZATION OF RESERVE SUPPLIES OF COMMODITIES

1. Feed grain bill formulated and passed, designed to reduce production of feed grains and increase income of feed grain producers.

2. One-half the storage payments for reseal of farm-stored grains for the 1960–61

season were advanced to farmers early in March to help producers meet spring planting and other costs.

3. Provision was made late in February for a broad reseal program on grains, including provisions enabling farmers to hold 1960-crop corn, wheat and grain sorghums under farm-stored price-support loans for a 2-year period following maturity dates of original loans. The objective of these provisions is to enable and encourage farmers to plan for adequate farm storage facilities, particularly in areas where more storage may be needed.

4. Announced a more adequate loan on farm storage facilities (95 percent of cost or 40 cents per bushel of capacity) to encourage farmers to build their own storage.

5. Increased support prices on a number of commodities to provide more farm income as follows:

Commodity	1960 support price	1961 support price
Corn (per bushel)	$1.06	$1.20
Grain sorghums (per bushel)	.85	1.08
Barley (per bushel)	.77	.93
Oats (per bushel)	.50	.62
Rye (per bushel)	.90	1.02
Soybeans (per bushel)	1.85	2.30
Flaxseed (per bushel)	2.38	2.80
Cottonseed (per ton)	34.00–38.00	45.00–49.00
Dairy products (per hundredweight manufacturing milk)	3.22	3.40
Peanuts (per ton)	201.02	221.00
Cotton (per pound)	.3242	.3304
Rice (per hundredweight)	4.42	4.71

6. Recommended to Congress an agricultural program designed to adjust supplies, protect the prices and incomes of farmers and protect the interests of taxpayers and consumers.

Mr. RUSSELL. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. RUSSELL. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from New Hampshire [Mr. BRIDGES] to strike out subdivision (3) at line 15, page 3, of the bill. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from North Carolina [Mr. ERVIN], the Senator from Tennessee [Mr. GORE], the Senator from Michigan [Mr. HART], the Senator from Oklahoma [Mr. KERR], the Senator from Louisiana [Mr. LONG], the Senator from Oklahoma [Mr. MONRONEY], the Senator from West Virginia [Mr. RANDOLPH], the Senator from Florida [Mr. SMATHERS], the Senator from Missouri [Mr. SYMINGTON], and the Senator from New Jersey [Mr. WILLIAMS] are absent on official business.

I also announce that the Senator from Minnesota [Mr. MCCARTHY] is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY] is necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina [Mr. IRVIN], the Senator from Tennessee [Mr. GORE], the Senator from Michigan [Mr. HART], the Senator from Oklahoma [Mr. KERR], the Senator from Louisiana [Mr. LONG], the Senator from Oklahoma [Mr. MONRONEY], the Senator from West Virginia [Mr. RANDOLPH], the Senator from Florida [Mr. SMATHERS], the Senator from Missouri [Mr. SYMINGTON], the Senator from New Jersey [Mr. WILLIAMS], the Senator from Minnesota [Mr. MCCARTHY], and the Senator from Texas [Mr. BLAKLEY] would each vote "nay."

On this vote, the Senator from Indiana [Mr. CAPEHART] is paired with the Senator from North Dakota [Mr. BURDICK].

If present and voting, the Senator from Indiana would vote "yea" and the Senator from North Dakota would vote "nay."

Mr. KUCHEL. I announce that the Senator from Indiana [Mr. CAPEHART], the Senators from Kansas [Mr. CARLSON and Mr. SCHOEPPEL] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Arizona [Mr. GOLDWATER] is detained on official business.

If present and voting, the Senator from Arizona [Mr. GOLDWATER], the Senators from Kansas [Mr. CARLSON and Mr. SCHOEPPEL] and the Senator from Kentucky [Mr. MORTON] would each vote "yea."

The Senator from Indiana [Mr. CAPEHART] is paired with the Senator from North Dakota [Mr. BURDICK]. If present and voting the Senator from Indiana [Mr. CAPEHART] would vote "yea" and the Senator from North Dakota [Mr. BURDICK] would vote "nay."

The result was announced—yeas 29, nays 53, as follows:

[No. 23]

YEAS—29

Aiken	Cooper	Kuchel
Allott	Cotton	Miller
Beall	Curtis	Mundt
Bennett	Dirksen	Prouty
Boggs	Dworshak	Saltonstall

NOT VOTING—18

Blakley	Gore	Morton
Burdick	Hart	Randolph
Capehart	Kerr	Schoeppel
Carlson	Long, La.	Smathers
Ervin	McCarthy	Symington
Goldwater	Monroney	Williams, N.J.

So Mr. BRIDGES' amendment to the committee amendment was rejected.

Mr. DWORSHAK. Madam President, I offer the following amendments: On page 3, line 10, in lieu of "$88,790,000" I propose to insert "$70,681,000"; on page 3, line 12, in lieu of "$255,685,000", insert "$140,868,000"; and on page 3, line 15, in lieu of "$1,353,000,000", insert "$1,310,500,000".

The PRESIDING OFFICER (Mrs. NEUBERGER in the chair). Will the Senator from Idaho please send his amendments to the desk?

Mr. DWORSHAK. Yes.

The PRESIDING OFFICER. The amendments will be stated.

The LEGISLATIVE CLERK. On page 3, line 10, in lieu of "$88,790,000" it is proposed to insert "$70,681,000"; on page 3, line 12, in lieu of "$255,685,000" it is proposed to insert "$140,868,000"; and on page 3, line 15, in lieu of "$1,353,000,000" insert "$1,310,500,000".

The PRESIDING OFFICER. Is there objection to the consideration of the amendments en bloc? The Chair hears none, and it is so ordered.

Mr. DWORSHAK. Madam President, the contention has been made in the debate this afternoon that the figures which are included in the bill for payments to the Commodity Credit Corporation are based upon estimates which have been submitted by the Department of Agriculture. I have before me House Document No. 112 of the 87th Congress, 1st session, dated at the White House on March 20, 1961—1 week ago today. On page 4 of the budget request submitted by the President, under the heading "Commodity Credit Corporation," are 3 estimates. The first column is the original estimate, the second column is the revised estimate, and the third column is the increase or decrease in amount.

My first amendment deals with the funds required under the International Wheat Agreement Act of 1949. The original estimate was $88,790,000, whereas the revised estimate, made 1 week ago today, is $70,681,000.

My second amendment deals with repayment to the Commodity Credit Corporation for commodities disposed of for emergency famine relief to friendly peoples. The original estimate for this program was $255,685,000, whereas the revised estimate, submitted 1 week ago today, is $140,868,000.

My third amendment deals with funds to reimburse the Commodity Credit Corporation for capital impairment for the sale of surplus agricultural commodities for foreign currencies. The original estimate was $1,353 million, whereas the revised budget, submitted just a week ago today, is $1,310,500,000

In these three instances, I can see little justification for appropriating funds to restore the impairment of capital or to repay the Commodity Credit Corporation for funds which it was anticipated would be required for these three categories.

If we are dealing with authentic responsible budget estimates—and I presume the estimates submitted by the President just a week ago today are very responsible—then I can see no justifica-

tion whatsoever, in these three instances, for appropriating funds far in excess of the amounts requested by the President and the Bureau of the Budget to carry out the objectives of the Department during the next fiscal year.

I feel certain that the chairman of the Committee on Appropriations and the chairman of the Subcommittee on Agriculture Appropriations, in view of their expressed desire to make the appropriations accord with the submitted budget requests, will agree to the revised figures in these three cases and will accept my amendment.

Has the distinguished Senator from Georgia had a chance to check these figures?

Mr. RUSSELL. No; I have just now been able to get a copy of the budget message. I have had it only about 1 minute.

I would have no objection to the amendments if the Senator would agree to go all the way through and correct the errors on the other side of the scale, as well.

Mr. DWORSHAK. They are quite insignificant. They amount to only a few dollars. However, to be consistent, I would accept those changes as a part of the amendment.

Mr. RUSSELL. Then I would not object to the amendments. I do not believe these changes are too important, because other items were also submitted, and they will all have to be considered in the regular appropriation bill. However, strictly as a matter of mathematics, the Senator from Idaho seems to be correct in his position. If he will modify his amendments to add the sum of $22,000 for grain for migratory waterfowl; the sum of $11,637,000 for the transfer of bartered materials to supplemental stockpile; $1,549,000 for advances to Agricultural Marketing Service for classing cotton and grading tobacco; and $13 million for long-term supply contracts, I will have no objection to the amendments.

Mr. DWORSHAK. I thank the Senator from Georgia. I shall be glad to accept those modifications. Then we can be in complete agreement on the point that if these appropriations are based upon authentic revised budget requests, we are acting in accordance with what the President requested just 1 week ago today.

Mr. RUSSELL. I certainly agree with the Senator from Idaho, if it develops that the Eisenhower administration overestimated those amounts.

Mr. DWORSHAK. I thank the Senator from Georgia.

Will the chairman of the Committee on Appropriations accept the amendments as modified?

The PRESIDING OFFICER. Does the Senator from Idaho so modify his amendments?

Mr. DWORSHAK. Yes; I accept the modifications.

Mr. HAYDEN. I have no objection.

Mr. RUSSELL. I have no objection. I commend the Senator from Idaho for his diligence.

Mr. DWORSHAK. I thank the Senator from Georgia.

Mr. WILLIAMS of Delaware. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WILLIAMS of Delaware. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modified amendments to the committee amendment will be stated.

The LEGISLATIVE CLERK. In the committee amendment on page 3, in line 10 it is proposed to strike out "$88,790,000," and insert in lieu thereof "$70,681,000"; in line 12, strike out "$255,685,000", and insert in lieu thereof "$140,868,000"; in line 15, strike out "$1,353,000,000", and insert in lieu thereof "$1,310,500,000"; in line 18, strike out "$13,000", and insert in lieu thereof "$35,000"; in line 21, strike out "$163,163,000", and insert in lieu thereof "$174,800,000"; on page 4, in line 1, after the semicolon, strike out "and"; and in the same line strike out "$1,264,000", and insert in lieu thereof "$2,813,000"; and in line 5, after the colon, and immediately preceding the proviso, insert the following: "and (7) long-term supply contracts, "$13,000,000."

The PRESIDING OFFICER. The question is on agreeing to the amendments, as modified, to the committee amendment.

The modified amendments to the committee amendment were agreed to.

The PRESIDING OFFICER. The next committee amendment will be stated.

The next amendment was, under the heading "Department of Defense, Military," on page 4, after line 20, to strike out:

GENERAL PROVISIONS

During the current fiscal year, the Secretary of Defense, should he deem it necessary, may transfer under the authority and terms of the Emergency Fund, not to exceed an additional amount of $263,900,000: *Provided*, That the additional transfer authority herein made available shall be used only for transfers to the appropriations "Military Personnel, Army", "Military Personnel, Navy", "Operation and Maintenance, Army", "Operation and Maintenance, Navy", "Operation and Maintenance, Air Force", and "Claims, Department of Defense": *Provided further*, That the transfer authority made available under the terms of the Emergency Fund is hereby broadened to meet the requirements of this paragraph: *Provided further*, That the Secretary of Defense shall notify the Committees on Appropriations of the Congress promptly of all transfers made pursuant to this authority.

The amendment was agreed to.

The next amendment was, on page 5, after line 13, to insert:

MILITARY PERSONNEL

Military personnel, Army

For an additional amount for "Military personnel, Army," $7,000,000.

Mr. PROXMIRE. Madam President, without moving that this amendment be stricken out, I should like to ask some questions in connection with it. Beginning on page 5, in line 14, appear a series of amendments which involve military personnel.

Mr. SALTONSTALL. Madam President, let me state that I favor what the committee has done.

Mr. PROXMIRE. Yes, I so understand. I also understand that the committee has included an item for an additional $263,900,000 above the amount voted by the House.

Mr. SALTONSTALL. That is correct, plus $1 million for Naval Reserve aviation fuel.

Mr. PROXMIRE. The committee has done that because it did not accept the House position, which was that, in addition to these additional appropriation items, there should be transfer authority, because in the judgment of the House it would have been possible to meet these additional obligations within the budget already appropriated, except for the additional $3 million.

Mr. SALTONSTALL. We have included these items, instead of borrowing from all the "no-year" appropriations. If we borrowed from all the "no-year" appropriations, we would have to make many new additions to the next year's budget. Unlike the previous argument on the agricultural item, it is much wiser to include this money now, since it is necessary because of the civilian pay increase, increased readiness for the forces and the single management agency to put the Army, the Navy, and the Air Force in a better defense position. So it is advisable to include these items in this year's budget, where they properly belong, as increased appropriations, rather than to use up a number of "no-year" funds, which will have to be obligated next year and which are already programed for next year. If those funds were utilized this year, we then would have to have new requests for additional sums, next year, in the various "no-year" funds.

Little money for this purpose is available in the present budget from one-year funds. Therefore, we would have to take the money from "no-year" funds, which are procurement funds; and they would have to be restored in like amount in next year's budget, in the amounts transferred within this year's budget.

I know the committee was unanimous about this matter; and I am glad that the Senator from New Mexico [Mr. CHAVEZ] has permitted me to make this statement, because I am sure that he and I are in accord, in regard to it.

Mr. CHAVEZ. Mr. President, I thank the Senator from Massachusetts for making that statement, inasmuch as I was detained by a long-distance telephone call. The Senator from Massachusetts has very kindly explained the reason why we took this action. All of us were in favor of making the transfers, if possible. But it happens that very little money can be transferred without taking it away from programed funds.

Mr. AIKEN. Madam President——

Mr. PROXMIRE. Madam President, before I proceed further, I yield to the

Senator from Vermont, if it is understood that in yielding to him, I shall not lose the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

VISIT TO THE SENATE BY HON. GEORGE NOWLAN, MINISTER OF NATIONAL REVENUE OF CANADA

Mr. AIKEN. Madam President, this afternoon I have a very rare privilege, although, fortunately, such privileges are becoming more common as members of the Canadian Government and the Canadian Cabinet visit the Senate. This afternoon we are very highly honored to have as our guest, here on the floor of the Senate, the Minister of National Revenue of Canada, the Honorable George Nowlan, of Ottawa. [Applause, Senators rising.]

The PRESIDING OFFICER. The Senate is pleased to welcome the Honorable Minister.

Mr. MANSFIELD. Madam President, I wish to join in the remarks of the distinguished senior Senator from Vermont, the chairman of the United States delegation of the United States-Canadian Interparliamentary Group.

We are delighted to have such a distinguished guest on the floor this afternoon. We know he is here on important business. It has something to do with revenues. We are very glad he has had a chance to hear us discuss revenues, even though it is on a supplemental appropriation bill.

We welcome our distinguished visitor on the Senate floor. We hope it is only the beginning of many more visits in the future.

Mr. DIRKSEN. Mr. President, I note with delight the presence of our distinguished friend from the north. First, I see a look of sympathy in his eye, and I detect from it that he knows of some of our distress in endeavoring to provide funds to energize and keep functioning our governmental activities.

Second, I think he has, at one time or another, served in a minority capacity in his own Parliament, and as such I thought I saw an almost tearful gleam in his eye [laughter]; and that made me feel particularly good.

I join the majority leader in extending the hand of fellowship and welcome to our distinguished guest.

THIRD SUPPLEMENTAL APPROPRIATION BILL, 1961

The Senate resumed the consideration of the bill (H.R. 5188) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes.

Mr. PROXMIRE. Madam President, the reason why I questioned these additional appropriations is that, with the enormous size of the defense budget, the action of the House would seem to have considerable merit. It is true that this $263 million is a large amount of money; but in relation to $40 billion, it is a small percentage.

It would seem Congress has held a pretty loose rein on the Defense Department. The Defense Establishment has been given very great appropriations. The course that the House has adopted would seem to me to place more pressure on the Department to economize as much as it could.

Is it not true that in the past the Department has been able to operate in this way without serious inconvenience? All it would mean is that at a later time, in a subsequent bill, the Senate would make up the amount, which I recognize has been approved and is necessary in a supplemental appropriation. In the meantime there will be pressure on the Defense Department to exercise more economy than it has in the past.

Mr. CHAVEZ. Madam President, every member of the committee would have been in favor of that procedure if there had been any money available to be transferred, but we learned from the Defense Department witnesses appearing before the Senate committee that plans in being called for utilization of the unprogramed balances in 1962. We listened to those witnesses very carefully, because the thought was that the better way was to go along with the House. We ascertained from the witnesses it was impossible to do so.

Hence, in order to accelerate the preparedness program in the manner that the President indicated, the committee was in full agreeemnt that this was the course which should be followed.

We are still not sure that the amendment will prevail. We shall have to take it to conference.

Let me read from page 5, beginning 9 lines from the bottom:

> Furthermore, the committee urges the President to release from reserve the remaining procurement and production balances added by the Congress to Department of Defense appropriations last year for modernization of ground forces equipment. The committee also urges the Department, once the funds are available, to expedite production.

We provided the Department with additional funds last year. All we can do is make such funds available. Some of these funds have been held in reserve. All we suggest is that they turn the funds loose for the purpose for which they were appropriated.

Mr. PROXMIRE. That does not mean the Senate is doing it both ways, does it? In other words, the Senate is not providing transfer authority and also making the appropriations that are necessary to meet it?

Mr. CHAVEZ. It can be done either way, but the Senate wishes to provide additional funds rather than transfer authority.

Mr. PROXMIRE. The Senate is not authorizing $263 million in transfer authority and at the same time appropriating the money, is it?

Mr. CHAVEZ. No; the Senate is only appropriating it.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. SALTONSTALL. I think the best explanation of the item appears in the letter written by Roswell Gilpatric, Deputy Secretary of Defense, to the chairman of the Senate Appropriations Committee, which appears on page 417 of the hearings.

I ask unanimous consent that the letter appear in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

> THE SECRETARY OF DEFENSE,
> *Washington, March 9, 1961.*
>
> Hon. CARL HAYDEN,
> *Chairman, Committee on Appropriations, U.S. Senate.*
>
> DEAR MR. CHAIRMAN: The Department of Defense has reviewed H.R. 5188 as passed by the House of Representatives on March 7, 1961, and I have explored the possibility of deriving necessary supplemental funds by transfer from other Defense appropriations.
>
> The present rate of obligation of 1-year funds indicates that there will be few, if any, such funds unobligated on June 30, 1961. Consequently, the only accounts from which funds could be transferred are the no-year accounts such as those available for procurement, research and development, and military construction.
>
> The estimated unprogramed funds as of June 30, 1961, in no-year accounts are shown in the President's fiscal year 1962 budget document as having been applied for financing the fiscal year 1962 program requirements. Any utilization of these planned unprogramed funds to cover this supplemental request necessarily would require action within the next 3 months by the Appropriation Committees to replace these funds as a part of the consideration of the fiscal year 1962 Defense appropriation bill.
>
> Even though no-year funds could be transferred on a temporary basis to the annual accounts set forth in the House approved bill, and such funds later restored in the fiscal year 1962 appropriation bill, action would handicap unnecessarily the Administration's capabilities to use such funds to finance the acceleration of vital programs under plans now under consideration by the President.
>
> For these reasons, I urge your favorable consideration of the appropriation of the additional amount of $263,900,000 for the programs approved by the House, rather than the requirement that these funds be obtained by transfer from other appropriations.
>
> Attached are the detailed reclama statements of the Department of Defense.
>
> Sincerely,
>
> ROSWELL GILPATRIC,
> *Deputy.*

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 5, line 14 through 17.

The amendment was agreed to.

The next amendment was, on page 5, after line 17, to insert:

MILITARY PERSONNEL, NAVY

For an additional amount for "Military personnel, Navy", $15,000,000.

The amendment was agreed to.

The next amendment was, on page 5, after line 20, to insert:

OPERATION AND MAINTENANCE

Operation and maintenance, Army

For an additional amount for "Operation and maintenance, Army", $88,500,000.

The amendment was agreed to.

The next amendment was, at the top of page 6, to insert:

OPERATION AND MAINTENANCE, NAVY

For an additional amount for "Operation and maintenance, Navy", $79,400,000.

The amendment was agreed to.

The next amendment was, on page 6, after line 3, to insert:

OPERATION AND MAINTENANCE, AIR FORCE

For an additional amount for "Operation and maintenance, Air Force", $72,000,000.

The amendment was agreed to.

The next amendment was, on page 6, after line 6, to insert:

CLAIMS, DEPARTMENT OF DEFESE

For an additional amount for "Claims, Department of Defense", $3,000,000.

The amendment was agreed to.

The next amendment was, at the top of page 7, to insert:

DEPARTMENT OF DEFENSE—CIVIL FUNCTIONS

Department of the Army

Rivers and Harbors and Flood Control

Construction, general

For an additional amount for "Construction, general", $350,000, to remain available until expended.

The amendment was agreed to.

The next amendment was, under the heading "District of Columbia", on page 7, after line 8, to insert:

DISTRICT OF COLUMBIA

Federal funds

Federal Loan to the District of Columbia

For an additional amount for loans to the District of Columbia, to be advanced upon request of the Commissioners to the general fund, $5,700,000.

The amendment was agreed to.

The next amendment was, under the subhead "Operating Expenses—Regulatory Agencies", on page 7, line 18, to strike out "$89,000" and insert "$118,000".

The amendment was agreed to.

The next amendment was, under the subhead "Department of Occupations and Professions", on page 7, line 21, after the word "Professions", to strike out "$14,000" and insert "$29,000".

The amendment was agreed to.

The next amendment was, at the top of page 8, to insert:

METROPOLITAN POLICE

For an additional amount for "Metropolitan Police", $100,000.

The amendment was agreed to.

The next amendment was, under the subhead "Department of Public Health", on page 8, line 6, after the word "Health", to strike out "$1,652,050" and insert "$1,849,500".

The amendment was agreed to.

The next amendment was, on page 8, after line 6, to insert:

DEPARTMENT OF PUBLIC WELFARE

For an additional amount for "Department of Public Welfare", $575,000.

The amendment was agreed to.

The next amendment was, on page 8, after line 9, to insert:

DEPARTMENT OF SANITARY ENGINEERING

For an additional amount for "Department of Sanitary Engineering", $1,268,000, of which $845,000 shall be payable from the highway fund.

The amendment was agreed to.

The next amendment was, on page 9, after line 14 to insert:

EXECUTIVE OFFICE OF THE PRESIDENT

President's advisory committee on labor-management policy

For necessary expenses of the President's Advisory Committee on Labor-Management Policy, established by Executive Order 10918 of February 16, 1961, including rent in the District of Columbia either for the Committee or for Federal agencies displaced in the interests of the Committee, services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55(a)), but at rates for individuals not to exceed $100 per diem, and $25 per diem in lieu of subsistence for members of the Committee while away from their homes or regular places of business, $80,000.

Mr. HOLLAND. Madam President, I think perhaps it might be well to have a brief explanation in the RECORD regarding the item for the Executive Office of the President. That item was not before the House, and it combines two items which were in the nature of supplemental requests.

The PRESIDING OFFICER. For the benefit of the Chair, will the Senator state to which amendment he refers?

Mr. HOLLAND. Page 9, lines 15 and following.

The supplemental budget request was for two separate items of $40,000 each, one for the Department of Commerce and the other for the Department of Labor, to finance the operation of the President's Advisory Committee on Labor-Management Policy, appointed in February by President Kennedy.

Instead of providing for a split of that very small item of $80,000 and making it appear that the Commerce Department was to finance half the activity, and those people who were being paid by that department were answerable to it, and that the other half would be paid by the Department of Labor and those people were therefore answerable to that Department, leaving no place whatever for the public members of the committee, the Appropriations Committee decided, on the joint request of the Senator from Alabama [Mr. HILL] and myself, to combine the two items into one and to make an appropriation of $80,000 to the President, for the balance of this year to carry forward the activity sponsored by an executive order. The whole committee felt that was a sounder way to approach the problem.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next amendment.

The LEGISLATIVE CLERK. On page 10, after line 4, to insert:

MUTUAL SECURITY

Development Loan Fund

For an additional amount for advances to the Development Loan Fund, as authorized by section 203 of the Mutual Security Act of 1954, as amended, $150,000,000, to remain available until expended.

Mr. PROXMIRE. Madam President, I should like to ask the Senator from Wyoming, who I understand is interested in this section of the appropriation bill, a question.

Is it not true that the amendment would provide $150 million above what the House provided, which is $550 million, to make a total amount for mutual security of $700 million?

Mr. McGEE. The Senator is approximately correct. Last August the $700 million figure was requested, but because of the pressure of the closing of the session and the attempt to keep the item within reason at the end of the session, we had an agreement, or at least an understanding of a general sort, with then Secretary Dillon, the purpose of which was to defer the $150 million until spring, as a banking operation. The $550 million which was granted was regarded as sufficient to keep the loan operation going without interruption. The understanding was that the Department would be expected to return to the Congress to ask for another $150 million in the spring. This has now been done.

The House of Representatives did not grant the $150 million in the appropriation bill this spring. Some of us on the Senate committee felt it was important to restore the $150 million as a part of the total loan operation.

Mr. PROXMIRE. It is my understanding this is one appropriation which does involve additional fund approval on the part of the Congress. The other appropriations with respect to the Commodity Credit Corporation, Defense funds, and so forth, were spending commitments of obligations anyway.

Mr. McGEE. Yes.

Mr. PROXMIRE. That money would have to be expended anyway. In this case, if the Senate refuses to agree to the amendment, it will mean that $150 million additional will not be loaned in the next 3 months. Is that correct?

Mr. McGEE. In the next 4 or 5 months.

Mr. PROXMIRE. This would have a substantive impact on the mutual security program.

Mr. McGEE. It would have a very substantive impact on the program, if I may explain it to my colleague, for the reason that the money which is available for loans through the Development Loan Fund is approximately $100 million. The commitments with reference to the $100 million still remaining are more than sufficient. The amount is oversubscribed on a tentative basis with respect to cases already pending. Beginning on the 1st of April, the efforts of our Government to enlist other Western European countries in a joint effort to loan funds, particularly to help India launch the third 5-year plan and Pakistan to launch the second 5-year plan, will be hampered. We know in the immediate future there will be additional opportunities for loans which will be significant in our attempt to get help from friends and allies in this program.

By withholding the $150 million we would interrupt the program, and it seems to me we would cripple the efforts of this Government at a critical moment, because we have established a loan procedure, a cooperative procedure, with

other friends and allies of our own way of life, in joining together to bear this burden. That is why it is important to provide the $150 million.

Mr. PROXMIRE. Is it not true that this specific appropriation has been denied by the Congress at least once? I believe the House committee report says it has been denied twice. Is it not therefore a situation in which the administration has proceeded to loan the full amount of the appropriations and then come to the Congress for an additional $150 million, in an effort to be bailed out? In other words, whereas the Congress intended in its initial appropriation to limit the amount of loans to $550 million, the administration, it seems to me, has decided it should allow $700 million, and has gone ahead.

Now the administration comes back to the Congress and says, "You will have to bail us out to the tune of another $150 million.

Mr. SALTONSTALL. Mr. President, will the Senator yield to me?

Mr. PROXMIRE. I yield.

Mr. SALTONSTALL. I should like to answer the Senator very briefly.

When we discussed the question last year we agreed, so far as the Senate committee was concerned, that we would be sympathetic if the administration came back to Congress for an additional amount, because we felt at the time we were tying them down too tight. We tied them down in the conference because we could not get an agreement any other way.

I support what the Senator from Wyoming has said. The sum and substance, in a word, is simply that if we do not allow the $150 million we will freeze the Development Loan Fund for at least 3 or 4 months. That freeze would come at a peculiarly unfortunate time, because of what the President has done with respect to recommendations for Latin America and recommendations for mutual security. There are enough pending substantially good possibilities for loans that it is very important we appropriate the $150 million at this time.

Mr. PROXMIRE. I say to the Senator from Massachusetts that I am very sympathetic to the President's program, and particularly his message on foreign policy. However, it seems to me that if the President is going to present Congress with a new program with a new look, the Congress has reason to stand by its position taken last year, when it provided $550 million.

One of the things which the Senator from Wisconsin would like to see, for example, is some statement with respect to the loans themselves and the countries which are to receive loans. I have always felt that if we did not have a country by country breakdown on this kind of loan we should at least have some indication as to the loans which are going to be made.

I understand perhaps India is a possible customer. Perhaps other countries are. It is very difficult for me, as a Senator, to vote for such an enormous amount of money without being in a position to evaluate the loans at all, simply having to take the whole thing on trust, not knowing which countries are going to be able to borrow and which are not.

Mr. SALTONSTALL. The last thing in the world we should do, I say most respectfully, is to say in advance which countries are going to receive loans, or to have loans firmed up. If we did that, we might disappoint countries which had possibilities for the future. We might make statements in regard to certain countries before the amount of the loan had been firmed up and before the conditions had been firmed up, and then the Department could not do any more working out of an agreement which would be a proper agreement.

We cannot give those specific details. We can say that there are proposed loans in Asia, in Latin America, and in Africa. We can say there are good loans pending, but we cannot state definitely which loans they are until they are firmed up.

Mr. PROXMIRE. I understand that the position the Senator from Massachusetts is stating is the position which has been taken traditionally by the State Department in previous administrations.

I am forced to say it is very difficult for me to justify this kind of a position when we are so very properly careful about making any kind of loan within the United States. For projects in Wisconsin or Massachusetts or Colorado or Wyoming or any other place. It seems to me we should do all that we can—I cannot really see why it should make such a difference—to explore the loans in advance to make sure they are sound, particularly with respect to a grant program. I agree this does not involve the grants, but even with respect to the grant programs we are not told where the money will go. It seems to me this is a perfectly reasonable and proper request.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Wyoming.

Mr. McGEE. I think there would be circumstances under which too much of a record with respect to where some of the money was going would be rather unwise, in the interest of State loans, because there would be a tendency to stir up comparative petitions from rival governments, for example.

I believe Senators will find that in India this spring we shall reach a culmination in the persuasion that we have been trying to convey there. We have endeavored to explore the private as well as the public sentiment with respect to financial development, and have attempted to persuade Europeans to join us in providing some of the economic base for additional loans.

This subject comes up for discussion and negotiation in April. Funds are not available now to give us any leeway for devising a formula in which we would participate with the British, the French, the Dutch, and other nations in order to expand this opportunity.

It seems to me this occasion is an unfortunate moment to interrupt this procedure. The Senator from Wisconsin raises a very serious question as to why we should not wait for the President's economic program. Why not wait until we see what form the lines of that program ultimately takes? I think the most reasonable explanation in answer to that question is that the programs must continue to go forward with the impetus that has already been built up from investments in the past. India is a notable case in point. It becomes the simplest illustration of what is at stake. To let India be cut off from funds until September, late in August, or early October, or whenever the new program is ready, would seem to me to come at the most unfortunate psychological moment and would delay the participation of European capital with American capital in this undertaking.

Mr. PROXMIRE. Madam President, I am sympathetic with what I think was an excellent reply by the Senator from Wyoming. Nevertheless, I must say that I am not convinced that this comparative petition argument has any real bearing. I am sure that recipient countries know where the funds go when they are loaned. I cannot see why greater information and greater understanding on their part of the careful consideration on the part of Congress with respect to loans to specific countries should necessarily alienate countries; I cannot see why it would not make for a sounder rather than a less sound system.

Second, I feel that, in regard to the hobgoblin of secrecy, in every instance we have exploded it in any area, we have found that we get along very well. The public of other countries knows eventually where the money is being expended. I do not see why the Congress that spends the money should not at least know where it is being spent.

Mr. McGEE. The problem was not so much one of secrecy as one of commitments that we must assume we are in a position to make if we are going to discuss them.

In the first place, some $700 million or $800 million of loans, as I understand, have been petitioned for. There are some $350 million to $400 million worth of loans that are regarded by our own people as being in the meritorious category for serious consideration. But before they sit down and weigh the import of those loans, they wish to sit down in good faith, knowing that they have the funds behind them to back up the loan if the case is made. This is not to follow the suggestion of the Senator from Wisconsin that no careful study is made of where the loans go and what purpose they would serve. That is the reason, it seems to me, it is important that we should not tie the hands of this agency.

However, I would only modify the Senator's statements in regard to the intent of Congress in the Appropriations Committee.

When we held hearings late last summer, the understanding was not that a $550 million ceiling would be placed on the program, but only that for purposes of negotiation it would be easier to negotiate during the immediate months ahead with a clear invitation to come back with a straightforward case in the supplemental appropriation in the spring

of this session, in order to get the next amount necessary before the regular appropriation.

Mr. PROXMIRE. I am sure such was the position of the Senate conferees. But was it the position of the House conferees also? Was that their understanding?

Mr. McGEE. I cannot answer that question.

Mr. PROXMIRE. My position is that there may have been something in the minds of the Senate conferees that was not the construction of the entire Congress.

Mr. ALLOTT. Madam President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Colorado.

Mr. ALLOTT. There is no question in my mind that at least the great majority, if not all the members of the Senate Appropriations Committee, had the same understanding, namely, that the agency would come back for this $150 million.

I should like to refer to two subjects the Senator has mentioned, and I hope that what I have to say will be of some assistance to him.

First, he will recall, that Congress instituted the Development Loan Fund in order that we might get away from grants to other countries, and that by establishing the program upon a loan basis, we would have it on a businesslike basis with respect to other countries, so that other countries would not expect to have money doled out to them, and we would expect to have our money returned to us and paid to us.

As a result of this program, in the period of approximately 2 years that the Development Loan Fund has actually been operating, I believe, the operation has been very successful on the whole. I agree completely with the idea that it is far better to put the entire program on a loan basis than to dole money out in grants.

Mr. PROXMIRE. I am sympathetic with that viewpoint.

Mr. ALLOTT. I am sure the Senator is.

Second, the Senator has mentioned the question of secrecy and countries knowing about proposed loans. I think it might be well to point out that, so far as I recollect, information on proposed loans is not classified. Certainly, I am sure that if the Senator would call any member of the Board of the Development Loan Fund, he would find that he would be most happy to inform him of the accumulation of loans, the type, and how they were made, because this information is compiled, and it is made available to the committee.

Mr. PROXMIRE. I am sure that what the Senator from Colorado has said is true. But the point is that when we vote for loans, we have no idea whether $150 million will be loaned to India or to some other country.

Mr. ALLOTT. The Senator is correct. I point out to the Senator, however, that if the amount of loans and supporting material were placed in the report, the report would be very bulky. That is probably the reason why the procedure is not followed.

I agree with the Senator from Massachusetts [Mr. SALTONSTALL] in this respect that the biggest mistake that we could make would be to say in advance of the time that we appropriate money for the Development Loan Fund, "We are going to put the money here," or, "We are going to put the money there." There is a certain amount of feeling, of course, when money is loaned in one country and not loaned in another. But certainly all we would do if we required commitments in advance would be to build up pressures and troubles in advance with other friendly countries. So I think the proposal is the best way to carry on the program and, so far as I have been able to observe, with the exception of one or two instances, of which I have been personally critical in the committee, I feel that the agency has done good work.

Mr. PROXMIRE. Pressures from domestic legislation affecting Colorado, Wisconsin, Wyoming, and other States is bound to be much heavier than pressures to which we would be subject when we deal with loans to foreign countries. In the first place, no vote would be involved. Some groups in this country might be interested in a particular country, but that would be a relatively slight and simple pressure compared to the vigorous pressure on domestic issues directly involving millions. I believe the Congress would be far better advised to cast an informed vote on the entire program, so we will know where the money is to go, and how to evaluate the program. We should have the kind of information we need when we spend as much of the public's money as we do in the foreign aid program. Such procedure would enable us to spend the money wisely.

Mr. ALLOTT. I must disagree with the Senator because of the fact that such procedure would in effect call upon Congress to evaluate and to determine the amounts in terms of each and every loan in advance, and it would be physically impossible to do so.

Mr. PROXMIRE. If we are not competent to pass on each of these loans, I do not think we ought to make the loan. Of course as a practical matter we would have to delegate part of the responsibility to a committee or subcommittee, and they in turn must delegate a great deal of the responsibility of securing information, and so forth, to officials in the various departments. But I think we could have a summary that would give us some simple, abbreviated, precise notion of the country to which our own tax money would go.

Mr. ALLOTT. I am sure the Development Loan Fund would provide the Senator with any kind of report upon this subject that he would wish, either in the long form in which we consider the program or even country by country.

Mr. PROXMIRE. But not before we cast our votes, as we are about to do today. We cannot get this information when it will do us any good.

Mr. McGEE. I am sure that if the Senator made a request even at this moment, he would be able to obtain a breakdown in far greater detail than we are in a position to give him now. It would be made available to him for his inspection. This is not a matter of classified information, or a matter of secrecy.

I have before me the House hearings on the bill now before the Senate, and I refer particularly to page 642 of those hearings, where there is a discussion of the list of $414 million worth of projects which had reached a ready stage for consideration. There is listed the amount of $153 million for India alone on which there rides so much as to what is to take place in the conversations in April.

In Africa there are projects totaling $29 million. This includes Cameroon, Liberia, Nigeria, and Tunisia, in terms of the specific breakdown of the area.

Further, on pages 642 and 643 we find a breakdown on a country-by-country basis in terms of Latin America, and the kind of projects in each country in Latin America to which tentative commitment has been made in conversations.

Mr. PROXMIRE. There is really no breakdown at all. The hearings show a total amount of $153 million for the Development Loan Fund. Then it goes on, in Africa, with projects totaling $29 million, for Cameroon, Liberia, Nigeria, and Tunisia.

Then there is an interruption in the hearings. No idea is given as to which country gets how much. I am not asking for detailed information. I do say that if we are to cast an intelligent vote on the granting of mutual security funds, we should get the information that will make it possible for us to do so. I do not believe it would handicap the program. In fact, I believe it would inform us, to cast an intelligent vote. In the breakdown for Latin America there is a kind of generalization with respect to some of the programs that will be engaged in. All I am asking for is more specific information, so that when we spend the taxpayers' money we will know where we are spending it.

Mr. McGEE. I assure the Senator from Wisconsin that those details are always available in large book form to all members of the Committee on Appropriations. The details are supplied by the officials of DFL for anyone to examine. It is obvious that on the floor of the Senate it would lead to a rather cumbersome situation if those books were brought here, once the committee had satisfied itself that these were serious figures and that the need was serious and that it had to be met. I may say that the $150 million was on the bottom side of the estimate in this case. It was not the desire to burden the Senate as a whole with this kind of details. If the Senator wishes to make a request, I am confident that such information would be supplied to him. All he needs to do is to make a request to see the breakdown within the country, down to the last penny.

Mr. PROXMIRE. Madam President, I object to any unanimous consent approval of the amendment. I wish to be recorded as voting "no" on the amendment.

Mr. HUMPHREY. Madam President, I merely wish to say that the Senator from Wyoming has made a very cogent

argument with respect to the pending amendment. I would hesitate to have every proposed loan made the subject of subcommittee consideration and argument and debate in the Senate. In the long run that would prejudice our foreign relations, and we would have utter conflict not only among ourselves, but also with our friends and associates whom we sought to help.

When the new Director of the Development Loan Fund, Mr. Coffin, was before our committee, he supplied us with the information that had been prepared not only by the present administration, but also by the preceding administration, and he requested $150 million, which was carried over from the Eisenhower administration into the Kennedy administration, and that, very frankly, is inadequate. It is far less than is required. It is even less than was assured to the Development Loan Fund by the Senate last year.

It has been my privilege, as a member of the Committee on Foreign Relations, to see many of the project outlines. We have given very serious considerations over the years—and there has been a policy determination made on it—as to whether we should have each country listed in the Mutual Security Act or in any of the foreign-aid operations, in terms of the amount given to each country, country by country, project by project.

If that were the case I believe we would find that it would lead to a gross misinterpretation. As a matter of fact, there is a great deal of misinterpretation already about many of these items.

I wish to conclude on this note. The Development Loan Fund is operating with 155 people. It is doing a tremendous job in evaluating these projects.

I asked the Director of the Development Loan Fund a number of questions in terms of the feasibility of certain projects.

One thing that is wrong in the foreign-aid program is that we have no long-term planning in connection with these programs. That is the responsibility of Congress, because we have refused to give long-term authorizations. President Kennedy has asked for long-term authorizations, so that we could look ahead at least 3 to 5 years. I believe such authorization would save the public a great deal of money. It would lend itself to a much better foreign-aid program.

I am sure that in the light of the vote in committee, which was a very substantial majority for this item, the Senate will confirm the item, unless we wish to close up shop during this critical period in our foreign relations.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 10, beginning on line 5.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The next amendment was, under the heading "Department of Health, Education, and Welfare", on page 11, after line 3, to insert:

PUBLIC HEALTH SERVICE

Communicable disease activities

For an additional amount for "Communicable disease activities", $1,000,000 which shall be available only for the purchase, demonstration, and distribution of oral poliomyelitis vaccine and shall remain available until June 30, 1962.

The amendment was agreed to.

The next amendment was, under the subhead "Grants to States For Public Assistance", on page 12, line 7, after the word "assistance", to strike out "$74,000,000" and insert "$104,000,000, of which $30,000,000 shall be available only upon enactment of H.R. 4884, 87th Congress, or similar legislation".

The amendment was agreed to.

The next amendment was, under the subhead "Salaries and Expenses, Bureau of Public Assistance", on page 12, line 12, after the word "assistance", to strike out "$300,000" and insert "$457,000".

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Secretary—Salaries and Expenses, Office of Field Administration", on page 12, line 18, after the word "exceed", to strike out "$60,000" and insert "$225,000".

The amendment was agreed to.

The next amendment was, under the subhead "Salaries and Expenses, Office of the General Counsel", on page 12, line 26, after the word "Counsel", to strike out "$42,000" and insert "$58,000", and on page 13, line 1, after the word "exceed", to strike out "$38,000" and insert "$71,000".

The amendment was agreed to.

The next amendment was, under the heading "Independent Offices—Civil Aeronautics Board—Payments to Air Carriers (Liquidation of Contract Authorization", on page 13, line 17, after the word "authorization", to strike out "$15,000,000" and insert "$20,000,000".

The amendment was agreed to.

The next amendment was, under the subhead "Civil Service Commission—Investigation of United States Citizens for Employment by International Organizations", on page 13, line 25, to strike out "$57,000" and insert "$67,000".

The amendment was agreed to.

The next amendment was, under the subhead "Government Contribution, Retired Employees Health Benefits Fund", on page 14, line 6, after "(74 Stat. 850)", to strike out "$1,500,000" and insert "$1,750,000".

The amendment was agreed to.

The next amendment was, under the subhead "General Services Administration—General Supply Fund", on page 14, line 12, after "(5 U.S.C. 630g)", to strike out "$15,000,000" and insert "$25,000,000".

The amendment was agreed to.

The next amendment was, on page 14, after line 12, to insert:

EXPENSES, SUPPLY DISTRIBUTION

For an additional amount for "Expenses, supply distribution", $700,000, to be derived by transfer from the appropriation for "Strategic and critical materials", fiscal year 1961.

The amendment was agreed to.

The next amendment was, under the subhead "Housing and Home Finance Agency—Limitation on Administrative Expenses, Office of the Administrator, College Housing Loans", on page 15, line 2, to strike out "$180,000" and insert "$270,000".

The amendment was agreed to.

The next amendment was, under the subhead "Veterans' Administration—General Operating Expenses", on page 15, line 14, after the word "expenses", to strike out "$10,600,000" and insert "$11,063,000".

The amendment was agreed to.

The next amendment was, under the subhead "Inpatient Care", on page 15, line 13, after the word "care", to strike out "$41,000,000" and insert "$43,000,000".

The amendment was agreed to.

The next amendment was, under the heading "Department of the Interior," on page 15, after line 20, to insert:

BONNEVILLE POWER ADMINISTRATION

Administrative provisions

After April 1, 1961, the position of Administrator, Bonneville Power Administration, shall have the same annual rate of compensation as that provided for positions listed in section 2205(b) of title 5, United States Code, so long as held by the present incumbent.

Mr. WILLIAMS of Delaware. Which amendment is now before the Senate?

The PRESIDING OFFICER. The committee amendment under the heading "Department of the Interior," on page 15, beginning on line 21.

Mr. WILLIAMS of Delaware. Madam President, this amendment provides for a salary increase for the Administrator of the Bonneville Power Administration. In my opinion, if we are to give salary increases, it should be done in an orderly manner by introducing proposed legislation and having it referred to the appropriate committee for consideration not only on its merits but also as it would affect other situations. Therefore, I make the point of order that this is legislation on an appropriation bill. I make the point of order against this amendment on page 15, beginning in line 21, and running down to and including line 2 on page 16.

The PRESIDING OFFICER. In the opinion of the Chair, the amendment is legislation on an appropriation bill; therefore, it is in contravention of rule XVI, paragraph 4. The point of order is therefore sustained.

Mr. HAYDEN. Madam President, may I make a brief explanation of the amendment?

Mr. WILLIAMS of Delaware. Certainly.

Mr. HAYDEN. By this amendment we seek to equalize the salary of the Administrator of the Bonneville Power Administration, the very largest operation of the Government in the power field, with the salary of the Administrator of the power agency in the Eastern part of the United States, in the Carolinas and Georgia, which is a smaller operation.

It is intended that the increased salary of the Administrator of the Bonneville Power Administration shall be available

only during the service of the present incumbent. The amendment merely provides an equalization of salaries.

Actually, in my opinion, the work which is done by the Bonneville Power Administration rates equally with that of the Office of the Bureau of Reclamation in Washington. Bonneville is a highly important power development, and the Administrator at Bonneville should get a decent salary.

Mr. WILLIAMS of Delaware. I do not question that. It may be that I shall vote for that legislation when it is offered.

The statement of the Senator from Arizona merely emphasizes the importance of changing salaries in an orderly manner. For example, if I recall correctly, a change in the salary for the Administrator of the eastern region was made in a manner similar to this, and I suppose without any connection as to how it would compare with the salary of the Administrator at Bonneville or the Administrator somewhere else.

Again, if this is an important position—and I am certain it is, as the chairman has stated—then it will remain an important position long after the present incumbent has vacated the office. Therefore, the salary increase should be made permanent, not just for the duration of this one officer.

Mr. HAYDEN. It is not proposed now to make the increase permanent.

Mr. WILLIAMS of Delaware. I think the proposal to increase the salary should be made by a bill introduced in an orderly manner. If other Administrators also are affected, let the question be brought before the Senate.

Mr. HAYDEN. Madam President, I concede the point of order.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. MANSFIELD. Before we go too far on the bill, I should like to return to page 7, where, under the heading "Department of Defense—Civil Functions, Department of the Army, Rivers and Harbors and Flood Control," there is an item: "Construction, General; For an Additional Amount for 'Construction, General', $350,000, to Remain Available Until Expended."

This item, I understand, refers to the Presidential proposal for résumé planning on the Libby project in Montana.

Mr. HAYDEN. The Senator is correct.

Mr. MANSFIELD. I call the Senate's attention to the fact that today our former colleague, Senator James E. Murray, is being buried in Butte, Mont. Eleven years ago, Senator Murray was the instigator, the man responsible, for the authorization of the Libby Dam on the Kootenai, in northwestern Montana. I think this item is a fitting memorial, on this particular occasion, to a great Senator who advocated a great project, and who for 11 years, ever since he was responsible for its being authorized, worked hard and constructively to get it going. The goal which he set is now in sight, and the rest of us in Montana and the Northwest will benefit because of the foresight shown by this great man.

Mr. HOLLAND. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. HOLLAND. I wish to associate myself with the remarks made by the distinguished majority leader. I had the pleasure of going out to the Kootenai and to the Libby site some years ago. I came back with the conviction that here was one of the great projects which needed to be developed. I inquired as to why there was a delay. I learned that an international question was involved, and was even then pending, between the United States and Canada, a question which required some delay, and difficult negotiations. I understand that the negotiations have now been concluded.

I think it is a wonderful step which is being taken, particularly so since it comes on the very day when all of us are thinking about Senator Murray, who played such an active part in the authorization of this project.

Mr. MANSFIELD. And who is, in effect, the father of the project.

Mr. CHAVEZ. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. CHAVEZ. I remember vividly the time when Senator Murray initiated the program. It came before the committee of which I was a member at that time. I recall the work of Senator Murray throughout the years.

The delay was necessitated because Canada had some interest in the building of Libby Dam. Since then, a treaty has been concluded between Canada and the United States, and as a result it is possible to report this item today and to put it into effect.

Mr. MANSFIELD. The Senator from New Mexico is correct.

Mr. METCALF. Mr. President, will my colleague yield?

Mr. MANSFIELD. I yield.

Mr. METCALF. It is an unusual circumstance that Senator Murray should have been the person to father the authorization legislation, and then, tragically, not to have lived only a few days longer to see the culmination of his work.

Senator Murray was born in Canada and came to the United States to become one of the great Senators in Congress. Really, he was one of our international resources, just as Libby Dam will be an international resource, spreading across the border, but developed by the two nations involved.

Madam President, it is appropriate that today we should see the beginning of appropriations to create the development of this great resource, a project which Senator Murray fathered.

However, it should be remembered that Senator Murray was not only the father of the resource of water development in Montana or on the Columbia and Missouri Rivers, because during his career of more than a quarter of a century in this body he sponsored water resource developments all over the United States. Indeed, he is responsible for the development of most of our natural resources. Therefore, it is a fitting remembrance of him today that we are able to pass upon one of his pieces of legislation.

The PRESIDING OFFICER. The next amendment will be stated.

The next amendment was, under the subhead "Resources Management", on page 16, line 13, to strike out "$1,730,000" and insert "$1,777,000".

The amendment was agreed to.

The next amendment was, under the subhead "National Park Service—Management and Protection", on page 16, line 17, after the word "Protection", to strike out "$1,934,000" and insert "$1,984,000".

The amendment was agreed to.

The next amendment was, under the subhead "Maintenance and Rehabilitation of Physical Facilities", on page 16, line 21, after the word "facilities", to strike out "$800,000" and insert "$850,000".

The amendment was agreed to.

The next amendment was, under the subhead "Construction", on page 16, line 23, after the word "Construction", to strike out "$800,000" and insert "$850,000".

The amendment was agreed to.

The next amendment was, under the subhead "Fish and Wildlife Service—Construction", on page 17, line 12, after the word "Construction", to strike out "$200,000" and insert "$350,000".

The amendment was agreed to.

The next amendment was, on page 17, after line 13, to insert:

BUREAU OF COMMERCIAL FISHERIES

Management and investigations of resources

For an additional amount for "Management and Investigations of Resources", $1,000,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of Territories," on page 17, after line 18, to insert:

ADMINISTRATION OF TERRITORIES

For an additional amount for "Administration of Territories", $465,000.

The amendment was agreed to.

The next amendment was, under the subhead "Trust Territory of the Pacific Islands", on page 18, line 3, after the word "Islands", to strike out "$300,000" and insert "$127,333".

The amendment was agreed to.

The next amendment was, under the heading "Department of Justice—Legal Activities and General Administration", on page 18, after line 20, to insert:

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

For an additional amount for "Salaries and expenses, general legal activities", $100,000.

The amendment was agreed to.

The next amendment was, on page 19, after line 7, to insert:

OFFICE OF ALIEN PROPERTY

Limitation on salaries and expenses, Office of Alien Property

The limitation under this head in the Department of Justice Appropriation Act, 1961, on the amount available for general administrative expenses of the Office of Alien Property is increased by $75,000.

The amendment was agreed to.

The next amendment was, under the heading "Department of Labor—Bureau of Employment Security—Advances to Employment Security Administration Account, Unemployment Trust Fund",

on page 19, line 21, after the word "limitation", to insert "as a repayable advance", and in the same line, after the amendment just above stated, to strike out "$250,000,000, to" and insert "$268,000,000, of which $250,000,000 shall".

The amendment was agreed to.

The next amendment was, on page 20, after line 6, to insert:

PAYMENT TO THE FEDERAL EXTENDED COMPENSATION ACCOUNT

For payment into the Federal extended compensation account of the Unemployment trust fund, as repayable advances, as authorized by section 13 of the Temporary Extended Unemployment Compensation Act of 1961, $500,000,000 to remain available only until September 30, 1962.

The amendment was agreed to.

The next amendment was, under the subhead "Limitation on Grants to States for Unemployment Compensation and Employment Service Administration (Trust Fund)", on page 20, line 17, after the word "exceed", to strike out "$340,000,000" and insert "$375,245,000".

Mr. HILL. Madam President, I have an amendment on page 20, line 17.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 20, line 17, it is proposed to strike out "$375,245,000" and insert in lieu thereof "$375,995,000".

Mr. HILL. Madam President, the amendment would provide an additional $750,000 for grants to States for unemployment compensation and employment service administration, and $250,000 additional for the Federal administrative costs under the item "Limitation on salaries and expenses—trust fund."

The Committee on Finance in reporting to the Senate the bill, H.R. 4806, the Temporary Extended Unemployment Compensation Act of 1961, recommended the inclusion in section 10, under the head "Information" to require data on the personal characteristics, family situation, employment background, and experience under the act of individuals found to be entitled to the benefits provided.

Labor Departement officials informed the Committee on Appropriations of this additional administrative requirement and testified that it would cost $750,000 additional for State administrative expenses and $250,000 additional for Federal administrative expenses. But the committee had no budget estimate for the sums and accordingly did not approve the additional sums needed.

At the time the Committee on Appropriations considered the bill, we had no word from the Bureau of the Budget as to these amendments. This morning, we received a letter from Mr. David Bell, saying that the President had authorized him to state that these additional funds will be required to carry out the Temporary Extended Unemployment Compensation Act of 1961.

In other words, this amendment is required if we are to get the information which is called for in the amendment which was offered by the Committee on Finance, which the Senate agreed to, which was agreed to in conference, and is now a part of the basic legislation.

Mr. KEATING. Mr. President, will the Senator from Alabama yield?

Mr. HILL. I yield.

Mr. KEATING. Does the Senator have reference to the amendment to add $24 million?

Mr. HILL. No; that is a different item. This is an amendment which is necessary to procure the data on the personal characteristics, family situation, employment background, and experience, under the act, of individuals found to be entitled to the benefits provided in the act.

Mr. ALLOTT. Mr. President, will the Senator from Alabama yield?

Mr. HILL. I yield.

Mr. ALLOTT. As I understand, the Senator is offering an amendment to increase the item of $375,245,000 to $375,995,000.

Mr. HILL. An increase of $750,000.

Mr. ALLOTT. That is for the sole purpose of the administration which will be necessary to acquire information about individuals who are unemployed?

Mr. HILL. That is correct; individuals who get benefits under the Temporary Unemployment Act which was passed a week ago last Thursday night.

Mr. ALLOTT. Is the letter of the Director of the Bureau of the Budget available?

Mr. HILL. I shall be glad to place the letter in the RECORD at this point. Does the Senator wish to read it?

Mr. ALLOTT. No; I should be happy to have the Senator place it in the RECORD at this point.

Mr. HILL. Madam President, I ask unanimous consent to have printed at this point in the RECORD the letter from Mr. David E. Bell, Director of the Bureau of the Budget, in regard to the matter now under consideration.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D.C., March 27, 1961.

Hon. CARL HAYDEN,
Chairman, Appropriations Committee, U.S. Senate, Washington, D.C.

MY DEAR MR. CHAIRMAN: On March 15, 1961, the President transmitted to the Senate a request for appropriations to finance the Temporary Extended Unemployment Compensation Act of 1961 which was then being considered by the Congress. Since that request was submitted, the bill then pending was revised and enacted as revised.

The bill as finally enacted will require additional funds to administer because of a revision requiring additional information to be collected concerning the personal characteristics, family situation, employment background, and experience under the act of individuals entitled to benefits. This provision will require these additional amounts: Department of Labor, Bureau of Employment Security, limitation on salaries and expenses (trust fund), $250,000 and limitation on grants to States for unemployment compensation and employment service administration (trust fund), $750,000.

In response to the committee's inquiry, the President has authorized me to state that these additional funds will be required to carry out the Temporary Extended Unemployment Compensation Act of 1961.

Sincerely yours,

DAVID E. BELL,
Director.

Mr. ALLOTT. Madam President, if the Senator from Alabama will yield further, I should like to refer to the second part of his amendment.

Mr. HILL. It is on page 21, in line 2, to strike out "$9,120,000" and to insert in lieu thereof "$9,370,000". This amendment would add $750,000 in the first instance and $250,000 in the second instance—or an additional $1 million—in order to secure this information in the way provided by the Senate Finance Committee amendment and in the way agreed to by the Senate and in the conference, and as now carried in the basic act.

Mr. ALLOTT. Both of them are for substantially the same purpose, are they?

Mr. HILL. That is correct.

Mr. ALLOTT. I thank the Senator from Alabama.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama to the committee amendment.

The amendment to the amendment was agreed to.

The committee amendment as amended was agreed to.

The PRESIDING OFFICER. The next committee amendment will be stated.

The next amendment was on page 20, in line 23, after "1961", to insert a comma and "of which $26,000,000 shall remain available until September 30, 1962".

The amendment was agreed to.

The next amendment was, under the subhead "Limitation on Salaries and Expenses (Trust Fund)", on page 21, line 2, after the word "exceed", to strike out "$7,900,000" and insert "$9,120,000".

Mr. HILL. Madam President, this is the second committee amendment to which I have addressed my remarks. To this amendment, I submit the amendment which I have at the desk.

The PRESIDING OFFICER. The amendment of the Senator from Alabama to the committee amendment will be stated.

The LEGISLATIVE CLERK. In the committee amendment on page 21, in line 2, it is proposed to strike out "$9,120,000" and to insert "$9,370,000".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama to the committee amendment.

The amendment to the amendment was agreed to.

The committee amendment as amended was agreed to.

The PRESIDING OFFICER. The next committee amendment will be stated.

The next amendment was on page 21, and in line 10, after "1944", to insert a comma and "and of which $1,100,000 shall remain available until September 30, 1962, and shall be available for reimbursement to the States for salaries and other expenses of State employees temporarily assigned or detailed to duty with the Bureau of Employment Security, and for direct payments to such employees for travel expenses, transportation of household goods, and per

diem in lieu of subsistence while away from their regular duty stations in the States, at rates authorized by law for Federal employees; and contracts with public and other nonprofit organizations for conduct of research or demonstration projects relating to the public employment security system, and rent in the District of Columbia".

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Employees' Compensation—Salaries and Expenses", on page 22, line 15, to strike out "$310,000" and insert "$357,000".

The amendment was agreed to.

The next amendment was, under the heading "Legislative Branch", on page 22, after line 19, to insert:

SENATE

For payment to Elizabeth S. Hennings, widow of Thomas C. Hennings, Junior, late a Senator from the State of Missouri, $22,500.

The amendment was agreed to.

The next amendment was, at the top of page 23, to insert:

SALARIES, OFFICERS AND EMPLOYEES

Offices of the majority and minority whips

For an additional amount for "Offices of the Majority and Minority Whips", $1,160: *Provided*, That effective April 1, 1961, the basic compensation of the clerical assistants to the majority and minority whips may be fixed at not to exceed $6,900 each.

The amendment was agreed to.

The next amendment was, on page 23, after line 7, to insert:

CONTINGENT EXPENSES OF THE SENATE

Joint Economic Committee

For an additional amount for "Joint Economic Committee", $35,000.

The amendment was agreed to.

The next amendment was, on page 23, after line 11, to insert:

FURNITURE

For an additional amount for "Furniture", $26,000.

The amendment was agreed to.

The next amendment was, on page 23, after line 13, to insert:

INQUIRIES AND INVESTIGATIONS

For an additional amount for "Inquiries and Investigations", fiscal year 1960, $105,000.

The amendment was agreed to.

The next amendment was, on page 23, after line 16, to insert:

ADMINISTRATIVE PROVISION

The ninth paragraph under the heading "Administrative Provisions" in the appropriations for the Senate in the Legislative Branch Appropriation Act, 1957 (2 U.S.C. 127), is amended to read as follows:

"The contingent fund of the Senate is hereafter made available for the payment of mileage, to be computed at 10 cents per mile by the nearest usual route, between Washington, District of Columbia, and the residence city of the Senator involved, for not to exceed four round trips originating and terminating in Washington, District of Columbia, made by employees in each Senator's office in any fiscal year, such payment to be made only upon vouchers approved by the Senator containing a certification, by such Senator, that such travel was performed in line of official duty."

The amendment was agreed to.

The next amendment was, under the subhead "House of Representatives", on page 24, after line 18, to insert:

For payment to Louise G. Reece, widow of B. Carroll Reece, late a Representative from Tennessee, $22,500.

The amendment was agreed to.

The next amendment was, at the top of page 25, to insert:

MEMBERS' CLERK HIRE

For an additional amount for "Members' clerk hire" pursuant to House Resolution 219, Eighty-seventh Congress, $600,000.

The amendment was agreed to.

The next amendment was, on page 25, after line 13, to insert:

GENERAL PROVISION

Effective as of July 12, 1960, the paragraph immediately preceding the short title in the Legislative Branch Appropriation Act, 1961, which related to expenses of travel by Senators and Representatives between the District of Columbia and their home States or districts (2 U.S.C. 43c), is repealed.

The amendment was agree to.

The next amendment was, under the headline "Department of State—Administration of Foreign Affairs—Salaries and Expenses", on page 26, line 10, to strike out "$10,340,000" and insert "$10,140,000".

The amendment was agreed to.

The next amendment was, under the subhead "Department of the Interior—Bureau of Reclamation", on page 42, line 7, after the word "expended", to insert a comma and "of which $236,364 shall be derived from the reclamation fund"; in line 9, after "$548,000", to insert a comma and "of which $483,721 shall be derived from the reclamation fund and $32,000 shall be derived from the Colorado River Dam fund", and in line 13, after "$282,000", to insert a comma and "to be derived from the reclamation fund".

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Commercial Fisheries", on page 43, line 10, after "$29,000", to insert a comma and "to be derived from Pribilof Islands fund".

The amendment was agreed to.

The next amendment was, under the heading "Legislative Branch", on page 46, after line 9, to insert:

Senate:

"Salaries, officers and employees", $1,272,855;

"Office of the Legislative Counsel of the Senate", $15,290;

Contingent expenses of the Senate:

"Legislative reorganization", $8,790;

"Senate Policy Committees", $18,580;

"Joint Economic Committee", $10,605;

"Joint Committee on Atomic Energy", $13,865;

"Joint Committee on Printing", $7,610;

"Vice President's automobile", $465;

"Automobile for the President pro tempore", $465;

"Automobile for the majority and minority leaders", $930;

"Inquiries and investigations", $228,855;

"Folding documents", $2,395;

"Miscellaneous items", $34,240;

"Joint Committee on Reduction of Nonessential Federal Expenditures", $1,880, to remain available until expended;

The amendment was agreed to.

The next amendment was, at the top of page 51, to insert a new title, as follows:

TITLE III

Claims and judgments

For payment of claims as settled and determined by departments and agencies in accord with law and judgments rendered against the United States by the United States Court of Claims and United States district courts, as set forth in Senate Document Numbered 25, Eighty-seventh Congress, $3,248,533, together with such amounts as may be necessary to pay interest (as and when specified in such judgments or provided by law) and such additional sums due to increases in rates of exchange as may be necessary to pay claims in foreign currency: *Provided*, That no judgment herein appropriated for shall be paid until it shall have become final and conclusive against the United States by failure of the parties to appeal or otherwise: *Provided further*, That, unless otherwise specifically required by law or by the judgment, payment of interest wherever appropriated for herein shall not continue for more than thirty days after the date of approval of this Act.

The amendment was agreed to.

The PRESIDING OFFICER. That completes the committee amendments.

The bill is open to further amendment.

Mr. HILL. Madam President, I offer an amendment, which is at the desk, on page 15, after line 10.

The PRESIDING OFFICER. The amendment of the Senator from Alabama will be stated.

The LEGISLATIVE CLERK. On page 15, after line 10, it is proposed to insert the following:

RAILROAD RETIREMENT BOARD

Payment to Railroad Unemployment Insurance Account

For payment to the railroad unemployment insurance account, as a repayable advance, as authorized by section 4 of the Temporary Extended Railroad Unemployment Insurance Benefits Act of 1961, $24 million, to remain available until September 30, 1962: *Provided*, That this amount shall be repaid to the general fund of the Treasury from the railroad unemployment insurance account, whether or not the total derived from the temporary increase in the contribution rate under section 5 of such act is sufficient for this purpose.

Mr. ALLOTT. Madam President, will the Senator from Alabama yield?

Mr. HILL. I yield.

Mr. ALLOTT. In connection with this particular matter, several of us raised a question at the committee meeting; and, as a result, the chairman was, I believe, to explore the possibility of borrowing this money from the Railroad Retirement Fund.

Since then I have been informed that under the provisions of section 10(d) of the Railroad Unemployment Insurance Act, if this $24 million is borrowed from the Railroad Retirement Fund, they will be required to pay 3 percent interest on it. Is that the Senator's understanding?

Mr. HILL. I find that the railroad unemployment insurance account at this time—as of February 28—has a deficit of $185,178,222. That is set forth in a letter dated March 24, addressed to me by Mr. Howard W. Habermeyer, Chairman of the Railroad Retirement

Board. So this very large deficit now exists.

I may say to the distinguished Senator from Colorado that on checking on this item, we find that the legislation the Congress recently passed—that providing for the temporary extension of railroad unemployment insurance benefits—contains the following provision: "The amounts so transferred shall be repayable advances without interest." That provision is in the basic act.

Mr. ALLOTT. Let me ask the distinguished chairman of the committee whether it is a fact, then, that under the provisions of section 10(d), even though the unemployment account is now $185 million in arrears, if they borrowed the $124 million from that account—they are not required to do so by the basic act, but they can do it—they would pay 3 percent interest on it. Is that correct?

Mr. HILL. I think the Senator from Colorado is correct.

Mr. ALLOTT. So if they were required to pay 3 percent interest on this amount—on an amount taken from a fund that the railroads themselves have to maintain—they would be placed in a situation different from that of employers under the general unemployment fund.

Mr. HILL. Yes; under the general act and under what we know as the Temporary Unemployment Insurance Act, which the Senate passed a few days before the passage of the Railroad Unemployment Insurance Act, the two groups would be in different categories.

Mr. ALLOTT. I must say that it seemed to be a feasible arrangement. For many years I have fought, as the chairman of the committee knows, to try to place the Railroad Retirement Act and the Unemployment Insurance Act of the railroads in a sound fiscal situation. The act will not be on one for several years yet, when these additional payments are made.

It seems to me that it would be unfair to treat one set of employers differently from the way the other set is treated. However, if this money is borrowed from the fund available under the Railroad Retirement Act, we would be charging them interest for it, whereas we would not be doing so in the case of general employers.

Mr. HILL. The Senator from Colorado is entirely correct.

Mr. ALLOTT. Therefore, Madam President, I have no objection to the amendment of the Senator from Alabama.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open for further amendment.

If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

Mr. KEATING. Madam President, I wish to ask several questions of the chairman of the committee. I would have asked these questions before now, but I was called from the Chamber to answer the telephone.

I understand that the additional money is needed in order to give full effect to the bill which we recently passed—H.R. 4806.

Mr. HILL. That bill was H.R. 5075.

Mr. KEATING. Oh, yes.

Mr. HILL. It was the Temporary Railroad Unemployment Insurance Benefit Act, whereas the other act was the General Unemployment Benefit Act.

Mr. KEATING. That is correct.

Mr. HILL. The same principle.

Mr. KEATING. In order to implement the provisions of the bill which Congress enacted in regard to the railroad workers, it is necessary to provide the funds in the bill. Is that correct?

Mr. HILL. The Senator is correct.

Mr. KEATING. Does the Senator have a record of the number of workers here involved?

Mr. HILL. The number appears in the hearings. If the Senator will look at page 740 of the hearings, he will find the number of workers involved.

Mr. KEATING. I thank the Senator.

What is the total amount in the railroad retirement insurance account now?

Mr. HILL. A little earlier I had called attention to the fact that I had received a letter from Mr. Howard W. Habermeyer, Chairman of the Railroad Retirement Board, under date of March 24, 1961, in which he stated there is a deficit of $185,178,000 as of the end of February.

Mr. KEATING. If the amount were not provided, it would add to that deficit; is that correct?

Mr. HILL. The Senator is correct.

Madam President, I ask unanimous consent to have printed in the RECORD at this point the letter from Chairman Habermeyer to which I have referred.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA
RAILROAD RETIREMENT BOARD,
Chicago, Ill., March 24, 1961.

Hon. LISTER HILL,
Committee on Appropriations,
U.S. Senate, Washington, D.C.

DEAR SENATOR HILL: The bill H.R. 5075 which proposes the payment to railroad workers of temporary unemployment insurance benefits is in substantially the same terms as the bill H.R. 4806 which would provide temporary unemployment benefits to workers in industry generally. Both bills provide for repayable advances from the Treasury without interest of amounts needed to pay the temporary unemployment benefits under the respective systems. The $24 million requested on an advance repayable basis without interest to pay for temporary extended benefits for unemployed railroad workers is absolutely necessary. The railroad unemployment insurance account has been borrowing from the railroad retirement account for the payment of regular unemployment benefits under the Railroad Unemployment Insurance Act, and has a deficit, as of the end of February, of $185,178,000. The deficit will not be eliminated for several years. Unless special appropriation of the $24 million is made, the treatment of railroad employers would not be the same as for employers in industry generally which would receive the benefit of Treasury advances without interest. The advances to the railroad systen. would be repaid out of the railroad unemployment insurance account; and for this purpose section 5 of H.R. 5075 provides an increase in the rate of contribution required of employers by one-fourth percent for 2 years, beginning 1962.

The table below, prepared from records of our Office of Budget and Fiscal Operations, shows, as of February 28, 1961, the amount borrowed from the railroad retirement account for the railroad unemployment insurance account and the deficit:

Total amount borrowed	$289,715,000
Repaid to date	104,271,000
Principal owed Feb. 28	185,444,000
Interest to date on amounts borrowed	4,843,186
Paid through Feb. 28	1,369,237
Accrued, but not paid	3,473,949
Total owed including interest	188,917,949
Cash balance in RUI account Feb. 28	3,739,727
Net deficit, Feb. 28	185,178,222

Sincerely yours,
HOWARD W. HABERMEYER,
Chairman.

Mr. KEATING. I want to agree with the Senator's statement. It seems to be necessary, and I want to commend him.

Mr. HILL. I thank the Senator.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 5188) was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass?

The bill was passed.

Mr. HAYDEN. Madam President, I move that the Senate insist on its amendments, request a conference with the House on the disagreeing votes thereon, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. HAYDEN, Mr. RUSSELL, Mr. CHAVEZ, Mr. ELLENDER, Mr. HILL, Mr. MCCLELLAN, Mr. MAGNUSON, Mr. BRIDGES, Mr. SALTONSTALL, Mr. YOUNG of North Dakota, and Mr. MUNDT conferees on the part of the Senate.

EXECUTIVE SESSION

Mr. MANSFIELD. Madam President, I move that the Senate go into executive session to consider nominations for U.S. attorneys for the eastern and western districts of the State of Missouri.

The motion was agreed to; and the Senate proceeded to consider executive business.

The PRESIDING OFFICER. The clerk will state the nominations.

U.S. ATTORNEYS

The legislative clerk read the nominations of D. Jeff Lance, of Missouri, to be U.S. attorney for the eastern district of Missouri and of F. Russell Millin, of Missouri, to be U.S. attorney for the western district of Missouri.

Mr. LONG of Missouri. Madam President, the President of the United

States has nominated to be U.S. attorneys for the eastern and western districts of Missouri two outstanding young Missouri attorneys. In support of their confirmation, I am making this statement on behalf of myself and the senior Senator from Missouri.

D. Jeff Lance has been nominated U.S. attorney for the eastern district of Missouri. Mr. Lance is a partner in the law firm of Cook, Murphy, Lance & English, St. Louis, Mo. He received his law degree from the University of Missouri in 1948. His experience in the law is well rounded.

He served for a time as an attorney in State government, and as a corporation attorney. In addition, for several years, he has been engaged in the general practice of law. He is a member of the Missouri bar, American Bar Association, and the Bar Association of St. Louis. In addition to having been admitted to practice before the Missouri Supreme Court, he has been admitted to practice before the U.S. Federal courts both in the eastern district and the western district of Missouri. With confidence in the ability of D. Jeff Lance, I urge Senate confirmation.

Madam President, F. Russell Millin, Jr., has been nominated to be U.S. attorney for the western district of Missouri. Mr. Millin is a lifetime resident of Missouri and received his law degree from Kansas City University in 1954. He became associated prior to graduation with the law firm of Popham, Thompson, Popham, Mandell & Trusty of Kansas City, as an investigator. Upon admission to the Missouri bar in 1954, he became an associate with the firm and in July of 1959 was made a partner. His experience with this firm has to a great extent been as a trial lawyer. He is a member of the Missouri Bar Association, Kansas City Bar Association, and the Lawyers Association of Kansas City. From 1955 to 1958, he served as an elected member of the board of education for one of our State school districts. Realizing the ability and experience of F. Russell Millin, I urge Senate confirmation of this nomination.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nominations?

The nominations were confirmed.

Mr. MANSFIELD. Madam President, I ask that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

GOVERNOR OF THE VIRGIN ISLANDS

Mr. MANSFIELD. Madam President, I move that the Senate proceed to the consideration of the nomination of Ralphael M. Paiewonsky to be Governor of the Virgin Islands.

The PRESIDING OFFICER. The nomination will be stated.

The legislative clerk read the nomination of Ralphael M. Paiewonsky to be Governor of the Virgin Islands.

OVERCHARGE FOR GRAIN SHIPMENTS BY THE U.S. GOVERNMENT

As in legislative session:

Mr. WILLIAMS of Delaware. Madam President, on March 15 the Comptroller General called to the attention of the Congress a shocking situation wherein the U.S. Government in its shipments of grain under the foreign aid program was being grossly overcharged by two shipping companies—Bloomfield Steamship Co. and the Lykes Bros. Steamship Co., Inc. The shipping charges were financed by the ICA.

The Comptroller General cited several instances in which these two carriers charged the Government far in excess of the rates which were being charged at the same time to the commercial shippers between the same points.

As a result of these overcharges, the Comptroller General estimated that the Government had paid to these two companies excess transportation charges in the amount of $305,111.

In this report, he cited several instances in which the Government was paying $10.50 per ton for the shipment of grain from the gulf to German ports, while on the same ships during the same voyages commercial interests were shipping grain from the same ports to the same destinations at $6 to $6.50 per ton.

These shipments involved the transportation mostly of wheat and barley.

The Bloomfield Steamship Co. overcharged the Government $270,380 on 19 shipments, while the Lykes Bros. Steamship Co. on three voyages overcharged the Government $34,731.

At this point I ask unanimous consent to incorporate in the RECORD a breakdown of these overcharges as furnished by the Comptroller General:

There being no objection, the table was ordered to be printed in the RECORD, as follows:

General Accounting Office summary of excess payments to ocean carriers of grain, 1958–59

BLOOMFIELD STEAMSHIP CO.

Vessel	Number of bills of lading	Voyage No.	Long tons	Government rate	Commercial rate	Excess payment
1958						
Alice Brown	1	8–S	3500	$13.50	$6.75	$23,625
Neva West	5	7–S [1]	5256	12.50	6.75	30,188
Margaret Brown	1	9–S [1]	2000	10.50	9.25	2,500
Alice Brown	3	10–S [1]	4450	10.50	6.00	20,025
Lucille Bloomfield	1	13–S	4000	10.50	6.40	16,400
Margaret Brown	1	10–S	2000	10.50	6.40	8,200
Alice Brown	5	11–S	5932.4998	10.50	6.40	24,322
Lucille Bloomfield	3	14–S [1]	4498	10.50	7.00	15,743
Bloomfield Steamship Co. total excess, 1958						141,003
1959						
Margaret Brown	2	V–11	4984	$10.50	$6.00	$22,428
Neva West	3	V–11	4718.307	10.50	6.00	21,232
Lucille Bloomfield	2	V–15 [1]	2144.827	10.50	6.00	9,652
Margaret Brown	1	V–12 [1]	2463.053	10.50	6.50	9,852
Alice Brown	1	V–13 [1]	2409.482	10.50	6.50	9,638
Neva West	1	V–14	2500	10.50	6.40	10,250
Lucille Bloomfield	1	V–18	1970.437	10.50	6.40	8,079
Neva West	1	V–15	2069.643	10.50	6.40	8,489
Margaret Brown	5	V–16	4137.6685	10.50	7.50	12,413
Neva West	9	V–16 [1]	2530.046	11.00	8.00	7,590
Margaret Brown	2	V–17	3251.231	11.00	8.00	9,754
Bloomfield Steamship Co. total excess, 1959						129,377
Total Bloomfield Steamship Co.						270,380

LYKES BROS. STEAMSHIP CO., INC.

1959						
Elizabeth Lykes	1	60	1158	$10.50	$6.25	$4,921
John Lykes	1	96	2500	10.50	6.50	10,000
Kenneth McKay	2	63	4952.465	10.50	6.50	19,810
Lykes Bros. Steamship Co. total excess, 1959						34,731
Combined total						305,111

[1] Commercial grain and Government-financed grain aboard the same vessel.

Mr. WILLIAMS of Delaware. Madam President, as if these overcharges were not enough in themselves to justify severe criticism, both against the companies involved as well as against the ICA officials who approved these exorbitant rates, it is also noted that these two shipping companies were at the time of these overcharges also beneficiaries of substantial Government subsidies. For example:

The Lykes Bros. Steamship Co., Inc., transported some of this grain in the vessel SS *John Lykes*, and on one of its voyages—No. 26—they charged the U.S. Government $10.50 per ton transportation rates whereas at the same time they were charging commercial interests only $6.50 per ton.

The record shows that originally, in 1940, this ship was built at a cost of $1,957,610 to the U.S. Government.

On January 28, 1941, the title to this vessel—the S.S. *John Lykes*—was transferred by the Government to the Lykes Bros. Steamship Co. at a net price of $978,805.

The company operated the vessel until 1958, during which time they collected from the Government through the Maritime Commission operational subsidies on this one ship of $2,448,852.

These subsidies included the operational differential subsidy and included an allowance for full depreciation of the original cost.

Then in 1958, after the company had operated the ship for 20 years, during which time they had collected nearly $2½ million in subsidies, the Government accepted the vessel on a trade-in for a new ship and allowed the Lykes Bros. Steamship Co. $900,000 or approximately the same price for which the Government had sold them the ship 20 years previously.

Now we are told by the Comptroller General that on this same heavily subsidized ship, the Lykes Bros. had the gall to charge the U.S. Government $10.50 per ton to transport grain from the Gulf of Mexico to German ports while during the same period they were transporting grain for commercial shippers between the same points at rates ranging from $6 to $7 per ton. The Comptroller General called our attention to three specific instances wherein the Lykes Bros. overcharged the U.S. Government for a total of $34,741.

The Bloomfield Steamship Co. likewise had bought several of its ships from the U.S. Government at similar discounts from the original construction costs and was also grossly overcharging the Government on the transportation of grain.

An examination of the report showed that in several instances Bloomfield was charging the U.S. Government $10.50 per ton for transporting grain from the gulf to the German ports while on occasions on the same vessels they were only charging private commercial shippers around $6 to $7 per ton transportation rates on grain. The shipments originated at the same points and were going to the same destinations, often on the same ships.

All of these overcharges have been referred to the Department of Justice for examination and possible collection of the overcharges.

I am also suggesting that the Department of Justice carefully examine these transactions to see whether or not there was any collusion between representatives of the shipping company and the officials of the ICA who on behalf of the Government agreed upon these excessive overcharges.

This is another example of unnecessary waste of the taxpayers' money under our foreign aid program, and certainly, to say the least, the Government officials responsible should be fired.

At this point I ask unanimous consent to have incorporated in the RECORD a more detailed report as furnished by the Comptroller General, in which he outlines these overcharges by the Bloomfield Steamship Co. and the Lykes Bros. Steamship Co., Inc.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

BLOOMFIELD STEAMSHIP CO. 1948 SHIPMENTS

Our review of grain shipments during calendar year 1958 revealed that the Bloomfield Steamship Co. transported grains from U.S. gulf ports to Germany for commercial shippers at rates ranging from a low of $4.50 per ton to a high of $9.25 per ton, whereas, on Government-financed shipments of grain during the same period, Bloomfield Steamship Co. rates to the Government ranged from $10.50 to $13.50 per ton. Had the Government shipments moved at the rates charged commercial shippers during this period, we estimate that transportation charges to the Government would have been reduced by $141,003.

For instance, in our examination of records covering 1958 shipments, we found that bills of lading were issued by Bloomfield for the transportation of both Government-financed and commercial wheat on the SS *Neva West*, voyage No. 7–S, sailing from Houston, Tex., and Galveston, Tex., to Germany in May 1958. The rate charged to the commercial shipper for wheat on this voyage was $6.75 per ton for 1,655 tons, while the rate paid by the Government was $12.50 per ton for 5,250 tons. The total charge to the Government for wheat aboard this vessel was $65,625. Had the Government been charged the commercial rate of $6.75 per ton, transportation charges to the Government would have been reduced by $30,188.

Our examination of other payments revealed a shipment in August 1958 of 2,000 tons of Government-financed wheat from Galveston, Tex., to Hamburg, Germany, on the Bloomfield vessel SS *Margaret Brown*, voyage No. 9–S, for which Bloomfield charged the Government at a rate of $10.50 per ton. On the same vessel between the same points, a commercial company shipped approximately 4,543 tons of barley for which Bloomfield charged at a rate of $9.25 per ton.

Other similar records disclosed a shipment in August 1958 of 4,450 tons of wheat from Houston, Tex., to Hamburg, Germany, aboard the Bloomfield vessel SS *Alice Brown*, voyage No. 10–S, at a rate of $10.50 per ton, while on the same voyage 1,500 tons of barley were shipped by a commercial company from Houston to Bremen, Germany, at a rate of $6 per ton.

On voyage No. 13–S of the Bloomfield vessel SS *Lucille Bloomfield*, in September 1958, 4,000 tons of wheat were carried from Galveston, Tex., to Bremen, Germany, at a rate to the Government of $10.50 per ton, whereas approximately 2,248 tons of barley were carried for a commercial company at a rate of $6.40 per ton.

On another voyage, No. 14–S, of the same vessel in November 1958, approximately 4,500 tons of wheat were carried at a rate to the Government of $10.50 per ton from Houston, Tex., to Hamburg, Germany, whereas, on the same voyage, 1,000 tons of barley were shipped by a commercial shipper at a rate of $7 per ton.

We found three additional Bloomfield voyages carrying Government shipments of grain during 1958 at rates in excess of those charged on commercial shipments of grain moving on different voyages during the same period.

BLOOMFIELD STEAMSHIP CO. 1959 SHIPMENTS

During 1959, we found 11 voyages of Bloomfield Steamship Co. vessels from gulf ports to Germany carrying wheat at rates to the Government of $10.50 and $11 per ton, while barley, kafir, corn, oats, and soybeans were transported for commercial shippers at rates ranging from $5.50 to $8 per ton.

Our examination revealed that on four of these voyages Government-financed and commercial grain was transported in the same vessel. On the remaining seven voyages involving Government-financed grain, we found no commercial grain shipments aboard the same vessel. However, commercial shipments of grain were moving on different vessels during the same period at the lower rates previously mentioned.

Had these Government shipments moved at the rates charged commercial shippers during 1959, we estimate that transportation charges to the Government would have been reduced by $129,377.

LYKES BROS. STEAMSHIP CO., INC.

Our review also disclosed Government-financed shipments of grain in 1959 moving on Lykes Bros. Steamship Co., Inc., vessels from gulf ports to Germany at rates of $10.50 per ton, whereas, grain was transported for commercial shippers during the same period and between the same points at rates ranging from $6 to $7 per ton. However, we found no commercial and Government shipments on the same voyages.

Had Lykes charged the Government the same rates as charged to commercial shippers on comparable dates during 1959, we estimate that transportation charges to the Government would have been reduced by $34,731.

AUTHORITY OF COMMITTEES TO FILE BILLS AND REPORTS DURING THE RECESS OF THE SENATE

As in legislative session,

Mr. MANSFIELD. Madam President, I ask unanimous consent that the committees of the Senate be permitted to file reports during the recess or adjournment of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

BYELORUSSIAN INDEPENDENCE DAY

As in legislative session,

Mr. ALLOTT. Madam President, this past Saturday, March 25, 1961, was the 43d anniversary of the proclamation of independence of the Byelorussian Democratic Republic. The Byelorussian American Association celebrated this anniversary yesterday, March 26, at the Biltmore Hotel in New York City. The Byelorussians, one of the oldest Slavic people, were allowed only a brief 3 years of independence from the old czarist empire before they were overrun by the Soviet Red Army in 1921. Thus this 43d anniversary of their independence also marks the 40th year of living under the Communist totalitarian tyranny. We in the free world surely want these brave people to know they are not forgotten and that we are as one in the hope and prayer that they may ultimately regain the national freedom so justly theirs and which they had so short a time to enjoy.

I ask unanimous consent to include a commemorative statement at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE INDEPENDENCE DAY OF BYELORUSSIA

Every year we, Americans, celebrate the Fourth of July—the day of the Declaration of Independence of the United States of America. The 25th of March is the Byelorussian national holiday—the day on which 43 years ago the Byelorussian Democratic Rada (Council) solemnly proclaimed the independence of the Byelorussian Democratic Republic (BNR) in the country's capital, Minsk.

The history of these two nations was different. The young American Nation, after having become independent, could freely de-

velop all branches of national life and create the most democratic and powerful state in the world. The fate of Byelorussia was different, because of her different geopolitical location.

Byelorussia, a country on the crossroads of Europe where Western culture and freedom met with Eastern barbarian despotism, was always the battlefield of these two antagonistic worlds.

In the past Byelorussia was an independent nation and played an important part in the medieval history of Eastern Europe. In the early Middle Ages Byelorussia appeared under the name of Kryvia and later on (13th century) was known as the Grand Duchy of Lithuania; in 1795 the country was forcibly incorporated into Imperial Russia.

Continuous efforts have been made by the Byelorussians in an attempt to regain their freedom. With Napoleon's assistance in 1812, by armed uprising under the leadership of Kastus Kalinouski in 1863 and others. The revolution in Russia of 1917 offered another opportunity to shake off the chains of slavery—this time by the means of democratic self-determination. Through the coordinated effort of all Byelorussian organizations, a national representation, consisting of 1,872 delegates from all corners of the country, convened in Minsk on December 18, 1917. This all-Byelorussion Congress became in fact the constituent assembly of Byelorussia.

The Congress elected the Rada (Council) and its presidium as its executive bodies, which have assumed the responsibility for the fate of the nation.

On March 25, 1918, the Rada and its executive council solemnly proclaimed the independence of Byelorussia and published their third constitutional act containing the official text of the proclamation.

Without any help from outside the new republic could not resist for too long a time the pressure of Russian imperialism and soon fell victim of new occupation, this time by the Red Communist army.

Her place was taken by the Bolshevik-sponsored Byelorussian Soviet Socialist Republic, created on Jan. 1, 1919, in Smolensk as a Communist counterweight to the democratic republic. This "union republic" with its puppet government is still in existence within the structure of the Soviet Union.

The people of Byelorussia have never accepted the government forced upon them, and defended their rights by arms. The famous Slutsk uprising of 1920 was brutally crushed by overwhelming Communist forces, i.e., suffered the same fate as the Hungarian revolution in 1956.

During the following 41 years the population has been subjected to a violent and ruthless persecution, deportation, and extermination. As a result of Moscow's policy of genocide, Byelorussia lost 6 million people in 20 years, according to the Soviet census of 1959.

On the international forum the Communist puppet government of the B.S.S.R. continually abuses membership of Byelorussia in the United Nations.

The Byelorussian people know that thousands of their compatriots living in the free world are disseminating truth about their history, culture, and present colonial exploitation. They also know that the Byelorussian Democratic Rada leads the best forces of the nation in the fight for freedom and justice.

GOVERNOR OF THE VIRGIN ISLANDS

The Senate resumed the consideration of the nomination of Ralphael M. Paiewonsky to be Governor of the Virgin Islands.

Mr. ANDERSON. Madam President, the nomination occasioned a great deal of interest on the part of the committee members. I commend the members of the committee, on both the majority and minority sides, for their constant attention to duty in this regard.

I think this nomination will eventually be quite satisfactory for the area. I believe Mr. Paiewonsky will be a good Governor. I commend the members of the committee for the fact that they tried to make sure the Virgin Islands Corporation, which has cost the United States a great deal of money, will be used for the benefit of the people and not merely be a drain on the resources of our Government. I think that may be possible now.

Madam President, I commend the members of the committee, who tried to make sure that the new Governor would produce for the people of the island a good government and at the same time would help relieve some of the financial burdens which this country has had to bear in that area.

Mr. DWORSHAK. Madam President, the Committee on Interior and Insular Affairs held 3 days of exhaustive hearings with respect to the nomination of Mr. Paiewonsky to be Governor of the Virgin Islands.

Many witnesses testified, with only one exception indicating that they had complete confidence in Mr. Paiewonsky and in the qualifications which he has to administer the affairs of the Virgin Islands.

I think it is very timely to point out that throughout the discussions and the taking of testimony in regard to the nomination it became obvious that our Government has been expending huge sums of money, many millions of dollars in various forms—direct appropriations and grants, as well as the restoration of impaired capital due to losses of the Virgin Islands Corporation, which is operated by the Government.

It was testified by many of the witnesses that Mr. Paiewonsky has displayed exceptional ability in becoming the outstanding businessman in the islands.

I invite attention to brief comments made by Mr. William W. Bailey, who has practiced law in the islands for more than a decade. I think the record will show that at one time he was the Republican State chairman in the islands. I quote as follows from his testimony:

> I might say that in the entire time I have lived and worked in the Virgin Islands I have always found Mr. Paiewonsky's character to be of the highest, and I certainly believe that in the present instance where he is being considered for the position of Governor of the Virgin Islands, that great emphasis should be put upon the fact that in selecting a helmsman, a captain, for the small ship of state known as the Virgin Islands down in the Caribbean Sea, that he is one of the best qualified to step into that position.

Because of the intense interest displayed by the members of the Committee on Interior and Insular Affairs in regard to the financial affairs of the Virgin Islands, and because it is generally recognized that something must be done to bring about greater economy, greater order, and stability in the operations of the people of the islands, who number only some 33,000, I asked the staff of the Committee on Interior and Insular Affairs to confer with the General Accounting Office and obtain some reliable data and information concerning the cost of our Government of assisting in the affairs of the Virgin Islands during the past decade.

At this time, I invite attention to the report submitted by the General Accounting Office, which is in two parts.

The first portion is entitled "Federal Appropriations and Grants for Financing Activities of the Virgin Islands Government for Fiscal Years 1951 Through 1960."

The table shows Federal grants and appropriations for financing Virgin Islands Government activities for fiscal years 1951 through 1960 as reported in the combined statements of receipts, expenditures, and balances of the U.S. Government, U.S. Treasury Department, and the budgets of the United States, as follows:

Appropriations for central administration of the insular government	$1,951,050
Grants to municipalities (1951 through 1955)	3,179,666
Appropriation for Office of the Government Comptroller (fiscal year 1960)	180,000
Internal revenue matching fund collections (1955 through 1960)	22,892,912
Appropriations for public works projects (1951 through 1954)	5,728,570
Federal grants-in-aid	7,103,823
Total	41,036,021

The table does not include all Federal expenditures in the Virgin Islands. The records reviewed did not disclose the amounts of Federal expenditures in the Virgin Islands for activities such as those of the U.S. Coast Guard, U.S. post offices, Veterans' Administration, Soil Conservation Service, Production and Marketing Administration, Farmers Home Administration, agricultural experimental station, Fish and Wildlife Conservation, Immigration and Naturalization, U.S. attorneys and marshals, U.S. district court of the Virgin Islands, Weather Bureau, Civil Aeronautics Administration, and Federal-aid payments to individuals within the Virgin Islands.

The second portion of the report is entitled: "Funds received by the Virgin Islands Corp. from the Federal Government for financing the corporation's activities for fiscal years 1951 through 1960."

The figures are:

Revolving fund withdrawals		$5,263,000
Grants provided in Department of the Interior appropriation acts:		
For reimbursement of operating losses	$2,780,769	
For water and soil conservation	940,000	
For forestry program	185,000	
For tourist development	95,000	
Total grants		4,000,769

Borrowings from U.S. Treasury for construction of salt water distillation facilities	$33,900
Total Federal financing	9,297,669

The total of these two amounts is in excess of $50 million, which we might consider financial assistance in one form or another provided by our Government for approximately 33,000 people living in the Virgin Islands.

Madam President, I have presented these figures primarily because we have been drifting along. I recall when the late Senator Hugh Butler, of Nebraska, was chairman of the Committee on Interior and Insular Affairs. He made several trips to the Virgin Islands and sought to bring greater stability into the operations, particularly of the Virgin Islands Corporation.

I know that during the past several years Fred Seaton, when he was Secretary of Interior, made many trips to the Virgin Islands in an effort to eliminate some of the inefficient operations which were causing extreme losses to our Government. The testimony taken in behalf of the appointment of Mr. Paiewonsky as Governor of the Virgin Islands indicates that he has almost a fantastic business background and experience which should qualify him to do an outstanding job in trying to administer effectively and successfully the affairs of the people of the Virgin Islands.

Notwithstanding some doubt that crept into the minds of some members of the Committee on Interior and Insular Affairs, that was one reason why it was finally determined that Mr. Paiewonsky, if his nomination were confirmed—and, of course, confirmation was recommended by the committee—would be charged, if that be possible, with the responsibility of bringing into the administration of the office of Governor of the Virgin Islands some of the exceptional and outstanding ability which has characterized his own business success.

I express the ardent hope that as Governor of the Virgin Islands Mr. Paiewonsky will utilize these exceptional abilities and do everything he can to bring success and real progress in the utilization of the Virgin Islands.

Mr. ALLOTT. Madam President, I rise to discuss the nomination briefly. Before I begin I shall say that I do not intend to vote against confirmation of the nomination. However, there are certain points that I believe should be inserted in the RECORD, and perhaps if circumstances had been different, I might have voted against him.

I say unequivocally that if the power of appointment, rather than the power to participate in the advice and consent to the confirmation of the nomination, were involved, I personally would not appoint Mr. Paiewonsky. Unfortunately for myself, a death in my own family made it necessary for me to return to Colorado, and the hearings were concluded while I was there and before I had an opportunity to return.

The Senator from New Mexico [Mr. ANDERSON] is in the Chamber, and in this respect I wish to say that I do not attribute to him any unfairness in any way, because I discussed this subject on the telephone with him while I was in Colorado and told him that my personal situation was such that I had to remain in Colorado a while and to continue with the hearings.

With that background I should like to make a short statement about the Virgin Islands situation and the nominee. For 2 or 3 years I have been suggesting to the Committee on Interior and Insular Affairs that an investigation should be made of the Virgin Islands.

The Virgin Islands are a very small part of the world. They consist of three islands—St. Thomas, on which is located Charlotte Amalie, St. Croix to the south, and St. Johns, of which the greater part is a national park. It is a very close-knit world in which people live closely together.

The statements made by the Senator from Idaho are true. I think the conditions on the Virgin Islands as I observed them a little over 2 years ago are shocking. I found the hospitals which we furnish for them in Charlotte Amalie to be in deplorable physical condition, even though comparatively new. I found that instead of helping to bring these people to be self-supporting, we were in fact encouraging a sort of feudal tutelage there, which encouraged these people to depend more and more on direct public assistance from the United States. I make this statement despite the protestations of the nominee to the contrary.

The statements that the Senator from Idaho [Mr. DWORSHAK] has made about the cost of the Virgin Islands to the United States are true. All of the Federal income tax which is collected in the Virgin Islands stays in the Virgin Islands for their support. In addition, they have had and enjoy at the present time an inheritance tax privilege which has caused many wealthy Americans to go there, to declare themselves as residents, and, by such subterfuge, to avoid the inheritance taxes which otherwise they would have had to pay to the Federal Government in the United States.

All of this history, of course, is not the fault of Mr. Paiewonsky. However, I say there are situations with respect to Mr. Paiewonsky which make me wonder whether he should have been appointed.

I say frankly there is not enough in the record for me to vote against him in the Senate today. There are certain facts that I think are well to be remembered.

Mr. Paiewonsky has been national committeeman of the Democratic Party in the Virgin Islands for 20 or 25 years. The Democratic Party there runs a very tightly controlled political patronage system which is unsurpassed anywhere in the United States.

Among the businesses of the Paiewonsky family is a distillery which was acquired, if I recall correctly, from the Vicorp corporation, a Virgin Islands corporation that has representatives from the Department of Agriculture, the Department of the Interior, the Governor of the Virgin Islands, and I believe three others appointed at large, who run it.

There are several peculiar points about the operation. First, in 1957 or 1958, I believe, according to the testimony of Mr. Paiewonsky, the Legislature of the Virgin Islands voted a $258,000 subsidy to the distillery which Mr. Paiewonsky and his family own. I say the loan was to the distillery. It was not made to the distillery but to him alone.

I will read Mr. Paiewonsky's testimony verbatim:

> Well, there are two distilleries in the islands, and it follows the same pattern with molasses from Vicorp. We receive 70 percent and the St. Croix Industries received 30 percent.

Then he modified his statement and said:

> On the subsidy, I think it worked out 66⅔ percent to Riise and 33⅓ percent to St. Croix Sugar Cane Industries.

Occupying a position of extremely strong political leadership, and participating in almost every business there is on St. Thomas Island and also many on St. Croix, he was able to secure from the legislature two-thirds of a $258,000 subsidy in order to boost the profits of the Riise Industries in the Virgin Islands.

There are many other subjects which came up during the course of the hearing, one of which, I understand, although I have not had an opportunity to locate it in the hearings subsequently, is that he admitted that during one period he had sold rum from the Riise distilleries which was mislabeled 6-, 7- or 8-year-old rum when in fact it was rum which had just come from the tap.

There are other points which make me wonder about the plausibility or the advisability of the nomination being confirmed. For example, in addition to the subsidy and the mislabeling, it is a fact that he has himself received a very definite benefit from the Vicorp corporation time and time again.

For example, although there was much controversy about one witness, I do not believe there is any controversy about the fact that at that time, back in the middle 1950's, there were four distilleries in the islands which distilled rum out of cane molasses. While there were four distilleries, there were only two distilleries that received the subsidy at the time Paiewonsky got the subsidy.

At that time also, in the middle 1950's, he was receiving molasses and was able to purchase molasses from Vicorp at 10 cents, when the world price was 17 cents. The testimony was to the effect that the understanding was that when purchases were made offshore there would be a 2-cent transportation and handling difference, so the chances are that at the very best he was receiving at least a 5-cent-a-gallon subsidy or preference from Vicorp over what molasses would have to be sold for on the world market.

When we consider this fact in the light of the fact that only the St. Croix distilleries and the Riise distilleries had been able to purchase any molasses on the islands from Vicorp, it raises innumerable questions which would cause a reasonable man to pause and consider.

In addition to that, Mr. Paiewonsky has just sold the family-owned distillery to the Schenley Corp. He said, "My personal interest may amount to approximately 12,000 shares—between 10,000 and 12,000 shares—of a value of $26 or $27 a share."

Therefore, what he has done is to sell his shares of stock of this family-owned distillery to the Schenley Corp. and has accepted in payment of these shares the stock of the Schenley Corp. Where does that leave the Schenley Corp.? The Schenley Corp. will continue to buy molasses from Vicorp. Who is going to control the price that Vicorp pays?

While there is a fairly long term contract now, eventually the Governor, together with the other members of the board of directors of Vicorp, will determine the terms and conditions under which the molasses will be sold to the Schenley Corp., and Mr. Paiewonsky will be a stockholder in the Schenley Corp.

So, regardless of the fact that the Schenley Corp. is very large and he is a minority stockholder, he will still be in the position of effectively and actually selling and determining the price of molasses sold to himself or to a corporation in which he has an interest and in the profits of which he has a definite interest and of which he is a stockholder.

Many other things came out during the hearings some of which were substantiated and some not. I know that the items I have recited are fully substantiated by the hearings. Although I did not attend the session in which I had hoped to cross-examine Mr. Paiewonsky, I withheld my vote in committee because I did not have an opportunity to confirm or not certain items that I had in mind about this gentleman.

On the floor of the Senate I cannot shirk my responsibility for voting. I will not do so. If I had the power of appointment, I would not appoint this gentleman. I do not have such power, and I shall therefore not vote against him. I do say that when we consider the economic stranglehold which this family has upon the islands, and consider the facts that I have recited, it should give a Senator pause before voting to confirm the nomination of this man. I have considered it, but because I cannot pin it down to any actual disqualification for office, I shall vote to confirm the nomination.

I should like to make one further point. I believe it is significant that the only persons who testified for the nominee, aside from one lawyer, whom the Senator from Idaho [Mr. DWORSHAK] has quoted, were people who were very closely associated and allied with him either in his own business interests or in his political interests. I think it is particularly significant—and I would be remiss if I did not spread it on the RECORD at this time—that so far as the time when I was present at the hearings is concerned, there was not one businessman present who did not have either a political or business alliance with Mr. Paiewonsky. Not a single businessman or farmer or rancher appeared at the hearings and testified in his behalf.

Madam President, among the questions which came up, I suggested to the chairman of the committee that it was my hope that we would be able to postpone our action on this nomination until such time as the committee or a portion of the committee was able to go to the Virgin Islands and ferret out the truth in connection with some of the charges and countercharges which had been made. I still think it would have been wise to do that, because I am convinced that the great bulk of the responsible business people in the Virgin Islands would prefer to see anyone except Mr. Paiewonsky appointed Governor of the islands.

I ask unanimous consent to have printed at this point in the RECORD an article published in the Washington Post on Friday, March 10, 1961.

The PRESIDING OFFICER (Mr. SMITH of Massachusetts in the chair). Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FIGHT DUE OVER ISLAND GOVERNOR

(By Jack Anderson)

A bitter backstage battle over the appointment of Ralph Paiewonsky, the rum king, to be Governor of the Virgin Islands will erupt into the open today before the Senate Interior Committee.

The fireworks are expected to rival the explosion earlier this week over Charles Merwether, the Kennedy appointee to the Export-Import Bank.

It's not supposed to be known outside the Kennedy Cabinet, but the Paiewonsky appointment was shoved down the throat of Secretary of the Interior Stewart Udall. He not only recommended against it but, after he was overruled, repeated his misgivings in his confidential biweekly report to the President.

Udall based his opposition upon the confidential report of two consultants, Maurice Rosenblatt and John Nuveen, whom the Interior Department sent to the Virgin Islands in January to scout the scene.

They investigated several candidates for the Governorship, rating Paiewonsky the lowest. Yet he got the job. He has been longtime Democratic committeeman from the Virgin Islands.

Meant for Udall's eyes only, the confidential report declares:

"With Paiewonsky as Governor, the Virgin Islands would once again become a happy pirate kingdom rivaling the days of Sir Henry Morgan, Bluebeard, and Blackbeard, who made this their base of operations. At the bottom of the pile, controlled and kept in line by the Mooreheads and Hodges (Negro leaders considered pro-Paiewonsky), would remain the 30,000 Negro natives reduced to work in the hotels, run errands, and drive cabs. A few would be allowed to rise as gang bosses."

WAR WEALTH

Paiewonsky's family has long operated a drugstore in St. Thomas, has also long dabbled in politics. The memo describes Paiewonsky's rise to wealth and power during World War II.

"The Paiewonsky family seems to have done moderately well up until 1940," it says. "The first financial success came to the boys, Ralph and Isadore, during the war, reputedly from cigarettes and other scarcity items. After the war, the Paiewonskys prospered, going into the rum business, drugstores, movie theaters, gift shops, acquiring large tracts.

"Paiewonsky operates through a tight inner group, building for financial control through political alliances. Paiewonsky's ultimate objective can only be estimated. We believe that his plan is to legalize gambling on the island, build Miami Beach-type hotels, and stimulate a land boom."

Stressing the importance of this U.S. protectorate in the Caribbean, the report proclaims: "In the Virgin Islands, we are on display. America is on trial. To succeed here would be a graceful feather in our cap. To fail here would be more than another running Caribbean sore, an active irritant for the agitators to throw on the United Nation's table for exploitation.

"SITTING ON A VOLCANO

"We confess that we went with the general popular misconception. We, too, believed that this was a happy tourist resort, a sort of Caribbean Monaco, costumed by the Pirates of Penzance, with Calypso songs and 'steel bands' giving a native accompaniment to an easy blend of cultures and economics. We are now convinced that to be Governor of the Virgin Islands is to take on one of the toughest, most demanding, and most all-embracing tasks. It also means sitting on top of a volcano."

The most pressing problem, as the consultants saw it, is the need for agricultural development.

"If something is not done about agriculture fast," they report in their confidential memo, "the drift will be into a real estate development. Rapidly amortized hotels and honky-tonk resorts with gambling, vice, etc., are the next step. The social consequence will be to reduce the native, Negro population to domestics, bellboys, and taxi drivers for a white man's pleasure haven.

Udall forwarded the report to the White House, which also received a report on Paiewonsky from the FBI. In the end, President Kennedy sided against his Secretary of the Interior and with his political advisers who claimed that Paiewonsky deserved reward.

Mr. HUMPHREY. Mr. President, will the Senator from Colorado yield?

Mr. ALLOTT. I am happy to yield.

Mr. HUMPHREY. I would feel remiss if I did not take this opportunity to say a few words in behalf of Gov. John Merwin, the present Governor. I believe he has done a good job. Although he is not a member of the party to which I belong—instead, he belongs to the party to which the senior Senator from Colorado [Mr. ALLOTT] belongs—I believe Governor Merwin is entitled to an expression of thanks for doing a good job under many difficulties and limitations, as the Senator from Colorado has properly pointed out.

Mr. ALLOTT. I thank the Senator from Minnesota for the statement he has made. I became acquainted with Governor Merwin, and I have been greatly impressed with his efforts to bring these three islands into orbit, with a self-supporting economy. The problems which exist there are numerous. Of course, to a great extent they were discussed in committee. Mr. Paiewonsky is not chargeable with those problems. He is chargeable only with the things I mentioned.

I think the remarks of the Senator from Minnesota about Governor Merwin are well deserved, and I am very happy to join in them.

Mr. HUMPHREY. Mr. President, I merely wish to say a few words in behalf of Mr. Paiewonsky. It has been my privilege to visit the Virgin Islands.

I did so as a matter of personal pleasure, as well as a matter of being interested in the welfare of the islands. My colleagues may be interested in knowing why I am concerned with this matter. For 12 years, in my office, I have had one of the most able and competent and loyal members of my staff, Mr. Cyril King, working for me. He is a native of the Virgin Islands. He came to me when he wanted to go to school here in the States. He attended American University, and he graduated from American University. He has demonstrated unusual qualities of leadership and sound judgment and hard, loyal work as a member of my staff.

He interested me in the Virgin Islands, and from time to time I have met people who have come from the Virgin Islands. As a result I have learned something of the problems of that country. I have learned not only about the problems, but also the great opportunities that exist there.

It was my privilege a year ago to pay a very brief visit to St. Croix and St. Thomas. In the past month, in the middle of February, Mrs. Humphrey and I journeyed for a brief vacation to St. Thomas and St. Croix and St. John. We had an opportunity to talk to many people there and to visit with them as intensively, I believe, as any two people could. I visited the high school at Christiansted and at Fredericksted on St. Croix. We visited Charlotte Amalie, and visited many business places there. Governor Merwin, the present Governor, was very courteous and kind. I know the members of the Governor's staff. I have had an opportunity to work rather closely with them on legislative matters. In fact, the present Governor's secretary is married to a lady from St. Paul, Minn.

The Governor's assistant in St. Croix, Mr. McFarland, is a young man whom I have known for some time. I believe I have done about as much inquiring into matters in the Virgin Islands as has almost any other Senator, outside the members of the Committee on Interior and Insular Affairs. At least, my inquiry has been rewarding in this: that I love those beautiful islands. I have sincere respect and affection for their people, and I have had the privilege, now, of meeting and knowing Mr. Paiewonsky.

I read the record of Mr. Paiewonsky, and I read the reports in the press. Undoubtedly, like most people, when one is in public life, there are some people who are for him, and some who are "agin" him, as the saying goes. For some peculiar reason, those who are, to put it in the vernacular "agin you," always seem to make more copy and more news than those who are "for you."

After several days of person-to-person contact, inquiring of people in business, schoolteachers, social workers, Government people, and members of our Armed Forces who are stationed at Charlotte Amalie, for example—the Navy has a very small detachment there—I found there was a great respect for Mr. Paiewonsky. I found they thought he would perform his duties well as Governor. I found that the people of the islands felt he was dedicated to the islands. I found that they thought he would be active, alert, and progressive in trying to get for the islands a little better standard of living than they presently enjoyed.

I do not say that Mr. Paiewonsky has done everything well. I suppose that, like all of us, he has made mistakes. However, I think that what is needed in the islands is someone who really has an interest, who really has a continuing interest, in the islands. I believe that what the islands need is someone who sees the business opportunities which are in the islands; someone who will protect the legitimate economic interests of the islands; someone who will want to do something more about the harbor facilities, roads, and housing.

As an American, I am not pleased with some of the slum conditions that exist in some of the cities in the islands. I sincerely believe that the United States of America, which says that it has something to offer to the whole world, could do very well by setting a good example in some of its own territories.

On our recent trip, Mrs. Humphrey and I visited San Juan, P.R. Perhaps that was a poor way to take a little vacation, but we spent a couple days traveling from one end of Puerto Rico to another, going from farm to farm, and community to community.

We visited schools, hospitals, and community centers. We were inspired by what we saw. What the people are doing is magnificent. There is much more to be done, and it ought to be done. However, there are people there who want to get the job done. I am speaking now of Puerto Rico.

The same is true of the Virgin Islands. With a little cooperation, I think we can do much more for the islands. In the Virgin Islands, I saw a Navy pier which the Government of the United States has not even had the decency to dismantle. It has been allowed to rot in the harbor. Evidently the Navy has not been able to secure an appropriation for the repair of the pier, so it simply stands and rots in the harbor. Although it is partly in use, it is not receiving any repairs. It is a threat to life and limb in the harbor of Charlotte Amalie. I predict that one of these days the United States will have a claim filed against it by an American citizen who may visit there, go on the pier, and be injured, because the Government has not taken care of the pier at all.

What is needed more than anything else is dedicated representation in high office—in the Governor's office, in the Secretary's office—for the well-being of the islands. The Virgin Islands should have a Delegate in Congress, and some day they will have one, to watch over their interests. The Virgin Islands are a part of the United States. I think every part of the United States is entitled to a fair deal. I think every part of our Nation is entitled to decent attention.

I hope and believe that Mr. Paiewonsky will be a good voice for the Virgin Islands. As the two distinguished Senators on the other side of the aisle have stated, I believe he will be an able administrator and a good businessman.

Mr. CARROLL. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. CARROLL. I join with the able Senator from Minnesota and commend him for his statement. As a member of the committee that questioned Mr. Paiewonsky for several days I can say that the Senators on the other side of the aisle who interrogated him were, in my opinion, very fair. Their questions were searching. They had a right to search into the qualifications of Mr. Paiewonsky, and they did so in an excellent manner.

I myself have never been to the Virgin Islands. I know nothing about the Virgin Islands except what I have read about them.

I myself questioned the nominee and my questioning was sharp and direct. I had not met Mr. Paiewonsky before. I knew nothing of his background. But I was interested in why he wanted to become Governor of the Virgin Islands. I wondered why a successful businessman who, I assume, is wealthy in his own right, wanted to become Governor of the Virgin Islands.

Mr. Paiewonsky told me that he wanted to become Governor of the Virgin Islands because he wanted to do something for his people. He said his family had lived in the islands for 60 years.

He is a successful businessman. Of course, he has had some competition. I think one of his bitterest critics was one of his strongest competitors. However, our committee took great pains to inquire of other persons, including government representatives, about some of the accusations which had been made. Mr. Paiewonsky emerged with a fine showing as a result of statements made by men who are not in politics.

I may say to the able Senator from Minnesota that what swung me toward Mr. Paiewonsky was his frank attitude. I asked him:

> What do you know about the people of the islands? Tell me about the low-income groups in your area. How many are there? What has been done for them in years past? How many are in the so-called middle class group? How many persons control the islands?

Mr. Paiewonsky told me that about 15 families control the islands. He said there was not much of a middle-class group, but that there are a great number in the low-income group.

I asked Mr. Paiewonsky:

> How do you feel about that? What will you do to relieve those conditions?

My able colleague from Colorado [Mr. ALLOTT], who was very diligent in his questioning, called to our attention in the committee some of the conditions which exist in the islands. I wanted to know what Mr. Paiewonsky intended to do about them. We all know that he is an able businessman, but we wanted to know what his philosophy was about assisting those people.

He responded to my question by saying:

Senator, those are the people who are for me.

Mr. President, those are the people who are for Mr. Paiewonsky, as the able Senator from Minnesota has so clearly described to the Senate. It is my own feeling that Mr. Paiewonsky has the proper philosophy to assist the islands. I think he will work for the people. I believe he will favor the construction of additional schools and hospitals. I talked with him about help for the children of the islands and he responded with interest. Furthermore, he is a businessman. I think he will satisfy people who are interested in the amount of money that can be saved. There is now a deficit of $600,000 in the Virgin Islands Corporation. We asked Mr. Paiewonsky why he did not do something about it. He replied that he had never had the privilege of sitting on the Board but that if he became Governor he would do his best to reduce the deficit.

So, for economic reasons, for business reasons, for social reasons, and for philosophical reasons, based on the testimony I have heard, and based on my reading of the record, it is my hope and belief that Mr. Paiewonsky will be a good Governor of the Virgin Islands.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. CARROLL. I yield.

Mr. JAVITS. We in New York have a great interest in the Virgin Islands. Many persons who live in New York came from the Virgin Islands. I have had an opportunity to learn much about the islands. Unfortunately, I did not hear the testimony. Of course, I have the greatest respect for the opinion of the distinguished Senator from Colorado and the opinions of other Senators who have spoken about the nomination.

Undoubtedly, from all I can learn now, the nomination of Mr. Paiewonsky to be Governor of the Virgin Islands will be confirmed. However, I express this view: There is a great feeling among those who know much about the Virgin Islands that, first, it is extremely desirable that the Governor be an indigenous product of the islands. That is one thing, whatever else may be concerned with respect to the nominee, that can be said in his favor. He has done business there; and he is actually an indigenous product of the islands.

The other point is that there is a considerable challenge to us to find some way in which we can bring about more and more self-determination on the part of the people there, and a responsibility for their own affairs. This is probably a corollary of the first point: That is, that it is desirable to have as Governor someone who has been reared and who has lived in the islands, and who is acquainted with their problems in a personal sense.

I express the hope that the nominee, assuming his nomination is confirmed by the Senate, might come to us with some rather affirmative recommendations as to how self-government can, in a developing way, be even more built up in the Virgin Islands than has already been accomplished, because I feel that this is very much the end and aim of the American attitude toward any area which is part of the great complex which we now call the United States.

Mr. CARROLL. I thank the able Senator from New York for his remarks.

Let me state, in conclusion, what my sole purpose is in making these remarks. I restate this because the Senator from Minnesota was otherwise engaged when I spoke previously. During the committee hearings I gave Mr. Paiewonsky some sharp questioning. I was blunt—not brutal, but blunt—because I wanted to know, and wanted it stated in no uncertain terms, what the situation was. I had read reports that a gambling mecca was to be established in the Virgin Islands.

Mr. Paiewonsky's responses were directly to the point, in connection with all the questions I put to him. He said there would be no gambling mecca; he said that his interest is in the people; and he said that his purpose is to do something for the people and for improvement of the fiscal condition of the islands.

Of course, we realize that it is easy for a witness to make such statements at a hearing. However, we shall be watching him and carefully observing his performance.

I see in the Chamber at this time the able Senator from Alaska [Mr. GRUENING]. He was present at the hearing when I asked those questions. The responses the witness made in regard to his philosophy satisfied me.

I repeat that Senators on the other side of the aisle made a searching examination. That was all to the good, and I think they should have done so. In fact, I think such procedure should be had in connection with other nominations of persons to serve as Governors. It is good to have such nominees put in a glass bowl, so we can judge what their future performance will be.

Certainly I hope Mr. Paiewonsky will do a good job.

Mr. GRUENING. Mr. President, will the Senator from Colorado yield?

Mr. CARROLL. I yield.

Mr. GRUENING. I agree fully with the comments made by the able junior Senator from Colorado.

I listened carefully throughout the hearings. I have had some familiarity with the Virgin Islands, inasmuch as nearly 30 years ago I was the first Director of the Division of Territories and Island Possessions, of the Department of the Interior, which had supervision over the Federal relationships of those outlying American areas, which included the Virgin Islands; and I have followed development there closely since that time.

It is not easy to find the right man to serve as Governor of the Virgin Islands. Paul Pearson was a dedicated Governor but life was made difficult for him. Most of the Governors there have had a good deal of trouble.

I highly approve of the principle established in recent years—namely, to have a native, a person born and brought up in the islands, serve as Governor, rather than someone who comes from another area, and who would be appointed in payment of a political debt. I think that principle is in line with our best American professions, even if we have not always practiced it.

The United States has liquidated the last vestiges of its colonial policy, which began after our war with Spain, or to a slight degree before then. We have given statehood to our two former incorporated territories, Alaska and Hawaii; we have granted Puerto Rico the political status it sought; and what remains to be done is to give the maximum of self-government to our remaining possessions—the Virgin Islands, Samoa, and Guam. Certainly the best way to start is to appoint as Governor one who lives there, not someone from the outside who would be appointed as a political reward, for some party service, real or fancied.

Let me say that I was favorably impressed by the replies Mr. Paiewonsky made. He has been a successful businessman in the Virgin Islands, and I think his ambition is to be a good Governor and to serve the public interest. I am confident that he will be that kind of a Governor. If he is not, we shall have made a mistake. But I believe he will be a good Governor, and will be responsive to the people's needs and to the requirements of their welfare.

I think the Senator from Colorado has accurately sized up the situation; and I hope the nomination will be confirmed by unanimous vote of the Senate.

Mr. CARROLL. I thank the Senator from Alaska.

Mr. President, I hope I am correct in my view about Mr. Paiewonsky. Of course I may be mistaken. But I liked the impression he made on me, and I liked what he stated for the record.

I do not like some of the things that have been going on in the Virgin Islands; and I am indebted to my colleague, who has been there, for giving me much valuable information.

The committee members on the other side of the aisle did a thorough job in their examination in connection with this nomination. I hope they continue to do so, especially in connection with the appointments in the U.S. possessions.

Mr. DWORSHAK. Mr. President, just now I have been checking on the hearings on the Paiewonsky nomination. I was under the impression that there had been included in the committee hearings or in the record of those hearings a report dated February 13, 1961, directed to the Secretary of the Interior, by Maurice Rosenblatt, who acted as a consultant in making a personal survey and study of conditions in the Virgin Islands, with particular emphasis upon the desirability of having Mr. Paiewonsky serve as the Governor.

I think that in all fairness to the members of our committee—and I shall not ask permission to have the report printed in the RECORD—it should be said there was some rather unsavory newspaper publicity, which undoubtedly was based upon the memorandum report submitted by Mr. Rosenblatt, which received widespread circulation.

I am sure that if there was some indecision or delay by the members of the committee in connection with their consideration of the nomination, it was partially, if not largely, the result of that report, a copy of which was given to each member of our committee. I shall not state any of the details; I merely point out that the report, which consists of 10 typewritten pages, was most disparaging of Mr. Paiewonsky, although I must say that the investigator made some allegations which probably were not justified, and there might have been some evidence of bias or prejudice on his part as he made the investigation and the survey in the Virgin Islands.

I am not sure that Mr. Maurice Rosenblatt is the motivating factor behind a nationally known Committee To Elect an Effective Congress, which maintains headquarters in Chicago.

I can look back, as can every Member of this body, and recall that every 2 years, at election time, this committee sends out endorsements with respect to Members of the House and Senate who are up for reelection. The voting public knows very little of the activities of the committee or its motivations. It seems to me that in this particular instance members of our committee, overwhelmingly Democratic members, were unwilling to accept the recommendations of Maurice Rosenblatt concerning the appointment of Mr. Paiewonsky to be Governor. But I presume that in 1962 and in 1964 this same man, through the Committee To Elect an Effective Congress, will be so contemptuous and so arrogant that it will proceed to endorse some Members of Congress seeking reelection, and to denounce others.

I can recall that I have been the victim of some of the abuse heaped upon Members of Congress who were up for reelection. So I desire to point out that apparently some Members of Congress are willing to place their abiding faith and confidence in this man when he does something which is in accord with their political motives; but in this particular case, when he made the survey at the request of the Secretary of the Interior, and the report happened to be full of disparaging comments, of course, the same people did not hesitate to reject the recommendations made.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. DWORSHAK. I yield.

Mr. LAUSCHE. By whom was the study and report requested?

Mr. DWORSHAK. By the Secretary of the Interior; but I think the request was probably made prior to the time that Stewart Udall became Secretary, although the announcement of his appointment had already been made in the public press.

It is not what might be considered an official document made after Stewart Udall became Secretary, but there is no doubt whatsoever that Maurice Rosenblatt undertook the survey of conditions, as directly related to Mr. Paiewonsky's nomination at the request of the Secretary of the Interior. It does not appear in the hearings. I do not object, because I do not think the investigator was justified in making many of the charges he made, because he sought motivations which are most questionable concerning the nomination of Mr. Paiewonsky to be Governor.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to this nomination?

The nomination was confirmed.

Mr. HUMPHREY. Mr. President, I ask that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. HUMPHREY. Mr. President, I move that the Senate return to legislative session.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

NAVAJO IRRIGATION AND SAN JUAN-CHAMA PROJECTS, NEW MEXICO

Mr. HUMPHREY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 72, S. 107.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 107) to authorize the Secretary of the Interior to construct, operate, and maintain the Navajo Indian irrigation project and the initial stage of the San Juan-Chama project as participating projects of the Colorado River storage project, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Minnesota.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 6, line 5, after "(70 Stat. 105)", to insert "as amended by section 9 of the Act of June 27, 1960 (74 Stat. 277)"; on page 13, after line 12, to insert a new section as follows:

SEC. 9. In the operation and maintenance of all facilities, authorized by Federal law and under the jurisdiction and supervision of the Secretary of the Interior, in the basin of the Colorado River, the Secretary of the Interior is directed to comply with the applicable provisions of the Colorado River compact, the Upper Colorado River Basin compact, the Boulder Canyon Project Act, the Boulder Canyon Project Adjustment Act, and the treaty with the United Mexican States, in the storage and release of water from reservoirs in the Colorado River Basin. In the event of the failure of the Secretary of the Interior to so comply, any State of the Colorado River Basin may maintain an action in the Supreme Court of the United States to enforce the provisions of this section, and consent is given to the joinder of the United States as a party in such suit or suits, as a defendant or otherwise.

On page 14, at the beginning of line 4, to change the section number from "9" to "10", and at the beginning of line 15, to change the section number from "10" to "11"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of furnishing water for irrigation of irrigable and arable lands, municipal, domestic and industrial uses (and for other beneficial purposes), providing recreation and fish and wildlife benefits, controlling silt, the Congress hereby approves as participating projects of the Colorado River storage project the Navajo Indian irrigation project, New Mexico, and the initial stage of the San Juan-Chama project, Colorado-New Mexico as conditioned, modified, and limited herein. Principal engineering works of the Navajo Indian irrigation project shall be a main gravity canal, tunnels, siphons, pumps, and powerplants for project purposes, laterals, drains, distribution systems and related works. The initial stage of the San Juan-Chama project facilities shall be comprised principally of regulating and storage reservoirs, collection, diversion and conveyance systems, and associated works.

The Navajo Indian irrigation project and the initial stage of the San Juan-Chama project herein approved are substantially those described in the proposed coordinated report of the Acting Commissioner of Reclamation and the Commissioner of Indian Affairs, approved and adopted by the Secretary of the Interior on October 16, 1957, as conditioned, modified, and limited herein.

SEC. 2. Pursuant to the provisions of the Act of April 11, 1956 (70 Stat. 105), the Secretary of the Interior is authorized to construct, operate, and maintain the Navajo Indian irrigation project for the principal purpose of furnishing irrigation water to approximately one hundred and ten thousand six hundred and thirty acres of land, said project to have an average annual diversion of five hundred and eight thousand acre-feet of water, the repayment of the costs of construction thereof to be in accordance with the provisions of said Act of April 11, 1956 (70 Stat. 105), including, but not limited to, section 4(d) thereof.

SEC. 3. (a) In order to provide for the most economical development of the Navajo irrigation project, the Secretary of the Interior is hereby authorized and directed to declare by publication in the Federal Register that the United States of America holds in trust for the Navajo Tribe of Indians any legal subdivisions or unsurveyed tracts of federally owned land outside the present boundary of the Navajo Indian Reservation in New Mexico in townships 28 and 29 north, ranges 10 and 11 west, and townships 27 and 28 north, ranges 12 and 13 west, New Mexico principal meridian, susceptible to irrigation as part of the Navajo Indian irrigation project or necessary for location of any of the works or canals of such project: *Provided, however,* That no such legal subdivision or unsurveyed tract shall be so declared to be held in trust by the United States for the Navajo Tribe until the Navajo Tribe shall have paid the United States the full appraised value thereof: *And provided further,* That in making appraisals of such lands the Secretary of the Interior shall consider their values as of the date of approval of this Act, excluding therefrom the value of minerals subject to leasing under the Act of February 25, 1920, as amended (30 U.S.C. 181–286), and such leasable minerals shall not be held in trust for the Navajo Tribe and shall continue to be subject to leasing under the Act of February 25, 1920, as amended, after the lands containing them have been declared to be held in trust by the United States for the Navajo Tribe.

(b) The Navajo Tribe is hereby authorized to convey to the United States, and the Secretary of the Interior is hereby directed to accept on behalf of the United States, title to any land, or interest in land within the above-described townships, susceptible to irrigation as part of the Navajo Indian irrigation project or necessary for location of any of the works or canals of such project, acquired in fee simple by the Navajo Tribe, and after such conveyance said land or interest in land shall be held in trust by the United States for the Navajo Tribe as a part of the Navajo Indian irrigation project.

(c) The Secretary of the Interior is hereby authorized and directed to acquire by purchase, exchange, or condemnation any other land or interest in land within the townships above described susceptible to irrigation as part of the Navajo Indian irrigation project or necessary for location of any of the works or canals of such project. After such acquisition, said lands or interest in lands shall be held by the United States in trust for the Navajo Tribe of Indians and the price of such lands or interest in lands or of the land given in exchange therefor by the United States shall be charged to funds of the Navajo Tribe of Indians on deposit in the Treasury of the United States.

SEC. 4. In developing the Navajo Indian irrigation project, the Secretary is authorized to provide capacity for municipal and industrial water supplies or miscellaneous purposes over and above the diversion requirements for irrigation stated in section 2 of this Act. But such additional capacity shall not be constructed and no appropriation of funds for such construction shall be made unless, prior thereto, contracts have been executed which, in the judgment of the Secretary, provide satisfactory assurance of repayment of all costs properly allocated to the purposes aforesaid with interest as provided by law.

SEC. 5. Payment of operation and maintenance charges of the irrigation features of the Navajo Indian irrigation project shall be in accordance with the provisions of the Act of August 1, 1914 (38 Stat. 582, 583), as amended by the Act of August 7, 1946 (60 Stat. 867): *Provided*, That the Secretary of the Interior in his discretion may transfer to the Navajo Tribe of Indians the care, operation, and maintenance of all or any part of the Navajo Indian irrigation project works, subject to such rules and regulations as he may prescribe, and, in such event, the Secretary may transfer to the Navajo Tribe title to movable property necessary to the operation and maintenance of project works.

SEC. 6. Pursuant to the provisions of the Act of April 11, 1956 (70 Stat. 105), *as amended by section 9 of the Act of June 27, 1960 (74 Stat. 277)*, the Secretary of the Interior is authorized to construct, operate, and maintain the initial stage of the San Juan-Chama project, Colorado-New Mexico, for the principal purposes of furnishing water supplies to approximately thirty-nine thousand three hundred acres of land in Cerro, Taos, Llano, and Pojoaque tributary irrigation units in the Rio Grande Basin, about eighty-one thousand six hundred acres of land in the existing Middle Rio Grande Conservancy District, and municipal, domestic, and industrial uses, and providing recreation and fish and wildlife benefits. Said construction and operation of the diversion facilities of the initial stage authorized herein shall include only natural flow of the Navajo, Little Navajo, and Blanco Rivers in Colorado as set forth in the supplemental project report dated May 1957. Principal engineering works of the initial stage development involving three major elements, shall include diversion dams and conduits, storage and regulation facilities at the Heron Numbered 4 Reservoir site and enlargement of outlet works of the existing El Vado Dam, and water use facilities consisting of reservoirs, dams, canals, lateral and drainage systems, and associated works and appurtenances. The construction of recreation facilities at the Nambe Reservoir shall be contingent upon the Secretary's making appropriate arrangements with the governing body of the Nambe Pueblo for the operation and maintenance of such facilities, and the construction of recreation facilities at the Heron Numbered 4, Valdez, and Indian Camp Reservoirs and shall be contingent upon the Secretary's making appropriate arrangements with a State or local agency or organization for the operation and maintenance of those facilities: *Provided*, That—

(a) the Secretary of Interior shall so operate the initial stage of the project authorized herein that diversions to the Rio Grande Valley shall not exceed one million three hundred and fifty thousand acre-feet of water in any period of ten consecutive years, reckoned in continuing progressive series starting with the first day of October after the project shall have commenced operation;

(b) the Secretary of Interior shall operate the project so that there shall be no injury, impairment, or depletion of existing or future beneficial uses of water within the State of Colorado, the use of which is within the apportionment made to the State of Colorado by article III of the Upper Colorado River Basin compact, as provided by article IX of the Upper Colorado River Basin compact and article IX of the Rio Grande compact;

(c) all works of the project shall be constructed so as to permit compliance physically with all provisions of the Rio Grande compact, and all such works shall be operated at all times in conformity with the Rio Grande compact;

(d) the amount of water diverted in the Rio Grande Basin for uses served by the San Juan-Chama project shall be limited in any calendar year to the amount of imported water available to such uses from importation to and storage in the Rio Grande Basin in that year;

(e) details of project operation essential to the accounting of diverted San Juan and Rio Grande flows shall be cooperatively developed through the joint efforts of the Rio Grande Compact Commission, the appropriate agencies of the United States and of the States of Colorado, New Mexico, and Texas, and the various project entities. In this connection the States of Texas and New Mexico shall agree, within a reasonable time, on a system of gaging devices and measurements to secure data necessary to determine the present effects of tributary irrigation, as well as present river channel losses: *Provided*, That if the State of Texas shall require, as a precedent to such agreement, gaging devices and measurements in addition to or different from those considered by the Department of the Interior and the State of New Mexico to be necessary to this determination, the State of Texas shall pay one-half of all cost of constructing and operating such additional or different devices and making such additional or different measurements which are not borne by the United States. The results of the action required by this subsection shall be incorporated in a written report transmitted to the States of Colorado, Texas, and New Mexico for comment in the manner provided in the Flood Control Act of 1944, before any appropriation shall be made for project construction;

(f) the Secretary of the Interior shall operate the project so that for the preservation of fish and aquatic life the flow of the Navajo River and the flow of the Blanco River shall not be depleted at the project diversion points below the values set forth at page D2–7 of appendix D of the U.S. Bureau of Reclamation report entitled "San Juan-Chama Project, Colorado-New Mexico," dated November 1955;

(g) the Secretary of the Interior is hereby authorized to construct the tunnel and conduit works of the initial stage of the San Juan-Chama project with sufficient capacity for future diversion of an average of 235,000 acre-feet per annum, and to recognize the cost of providing such additional capacity as a deferred obligation to be paid at such time as the additional capacity may be required: *Provided, however*, That nothing contained in this act shall be construed as committing the Congress of the United States to future authorization of any additional stage of the San Juan-Chama project.

SEC. 7. (a) No person shall have or be entitled to have the use for any purpose, including uses under the Navajo Indian irrigation project and the San Juan-Chama project authorized by sections 2 and 6 of this Act, of water stored in Navajo Reservoir or of any other waters of the San Juan River and its tributaries originating above Navajo Reservoir to the use of which the United States is entitled under these projects except under contract satisfactory to the Secretary of the Interior and conforming to the provisions of this Act. Such contracts, which, in the case of water for Indian uses, shall be executed with the Navajo Tribe, shall make provisions, in any year in which the Secretary anticipates a shortage taking into account both prospective runoff originating above Navajo Reservoir and the available water in storage in Navajo Reservoir, for a sharing of the available water in the following manner: The prospective runoff shall be apportioned between the contractors diverting above and those diverting at or below Navajo Reservoir in the proportion that the total normal diversion requirement of each group bears to the total of all normal diversion requirements. In the case of contractors diverting above Navajo Reservoir, each such contract shall provide for a sharing of the runoff apportioned to said group in the same proportion as the normal diversion requirement under said contract bears to the total normal diversion requirements of all such contracts that have been made hereunder: *Provided*, That for any year in which the foregoing sharing procedure either would apportion to any contractor diverting above Navajo Reservoir an amount in excess of the runoff anticipated to be physically available at the point of his diversion, or would result in no water being available to one or more such contractors, the runoff apportioned to said group shall be reapportioned as near as may be among the contractors diverting above Navajo Reservoir in the proportion that the normal diversion requirements of each bears to the total normal diversion requirements of the group. In the case of contractors diverting from or below Navajo Reservoir, each such contract shall provide for a sharing of the remaining runoff together with the available storage in the same proportion as the normal diversion requirement under said contract bears to the total normal diversion requirements under all such contracts that have been made hereunder.

The Secretary shall not enter into contracts beyond a total amount of water that, in his judgment, in the event of shortage will result in a reasonable amount being available for the diversion requirements for the Navajo Indian irrigation project and the initial stage of the San Juan-Chama project as specified in sections 2 and 6 of this Act.

(b) In the event contracts are entered into for delivery from storage in Navajo Reservoir of water not covered by subsection (a) of this section, such contracts shall be subject to the same provision for sharing of

available water supply in the event of shortage as in the case of contracts required to be made pursuant to subparagraph (a) of this section.

(c) This section shall not be applicable to the water requirements of the existing Fruitland, Hogback, Cudai, and Cambridge Indian irrigation projects, nor to the water required in connection with the extension of the irrigated acreages of the Fruitland and Hogback Indian irrigation projects in a total amount of approximately eleven thousand acres.

SEC. 8. (a) None of the project works, or structures authorized by this Act shall be operated by the Secretary of the Interior so as to create, implement, or satisfy any preferential right in the United States or any Indian tribe to the waters impounded, diverted, or used by means of such project works or structures, other than contained in those rights to the uses of water granted to the States of New Mexico or Arizona pursuant to the provisions of the Upper Colorado River Basin compact.

(b) The Secretary of the Interior shall operate the projects authorized by this Act so that no waters shall be diverted or used by means of the project works, which, together with all other waters used in or diverted from the San Juan River Basin in New Mexico, will exceed the water available to the States of New Mexico and Arizona under the allocation contained in article III of the Upper Colorado River Basin compact for any water year.

SEC. 9. In the operation and maintenance of all facilities, authorized by Federal law and under the jurisdiction and supervision of the Secretary of the Interior, in the basin of the Colorado River, the Secretary of the Interior is directed to comply with the applicable provisions of the Colorado River compact, the Upper Colorado River Basin compact, the Boulder Canyon Project Act, the Boulder Canyon Project Adjustment Act, and the treaty with the United Mexican States, in the storage and release of water from reservoirs in the Colorado River Basin. In the event of the failure of the Secretary of the Interior to so comply, any State of the Colorado River Basin may maintain an action in the Supreme Court of the United States to enforce the provisions of this section, and consent is given to the joinder of the United States as a party in such suit or suits, as a defendant or otherwise.

SEC. 10. Section 12 of the Act of April 11, 1956 (70 Stat. 105), shall not apply to the works authorized by this Act. There are hereby authorized to be appropriated out of any moneys in the Treasury not otherwise appropriated, such funds as may be required to carry out the purposes of this Act, but not to exceed $221,000,000 (January 1958 prices) plus such amounts, if any, as may be required by reason of changes in construction costs as indicated by engineering cost indexes applicable to the types of construction involved therein and, in addition thereto, such sums as may be required to operate and maintain the projects.

SEC. 11. The Act of April 11, 1956 (70 Stat. 105), is hereby amended as follows: (i) In section 1, subsection (2), after "Central Utah (initial phase)" delete the colon and insert in lieu thereof a comma; (ii) in section 5, subsection (e), in the phrase "herein or hereinafter authorized" delete the word "hereinafter" and insert in lieu thereof the word "hereafter"; (iii) in section 7 in the phrase "and any contract lawfully entered unto under said compacts and Acts" delete the word "unto" and insert in lieu thereof the word "into".

ON "RECESSION STRETCHING"

Mr. KEATING. Mr. President, recessions are curious creatures. They can be and often are creatures of the mind, rather than the body.

It is clear that the mild recession of recent months is coming to an end. We should be gratified that it is. We should help it along, by stressing and discussing those positive and inherent elements in our economy which are moving forward.

But, judging by the statements made by some economic gloom-peddlers, we are still talking about low points, serious rigidities, and our poor little 500 billion dollar gross national products. I am very concerned that we will not only talk ourselves back into a slump, but that, at the rate we are talking, we will create a nice depression.

Our economy, of course, began to perk up before we passed any of the major recovery bills the President sent to the Congress.

I have the feeling there are some quarters that would like to do a little recession stretching. They want to be able to say: "See America, it didn't take us long, it's all over."

But recession stretching is not in our best interest. It is not in anybody's interest.

Let me make another point: Recession stretching is emphatically not in the interest of the unemployed, the 6.8 percent who are really feeling the "squeeze." I recognize as well as anyone that the grave human problems of jobless workers and their families are the most serious consequences of a period of economic slump.

If, instead of dragging out and talking about the present lean indicators, we emphasize those economic trends which are rising, we can help create a spirit of enthusiasm and drive which will make people more encouraged. They will buy more, stock more, hire more help and, before you know it, it will not be 6.8 percent unemployed—it will be a lot less.

There are, I fear, those who would like the recession to end officially in a month or so. They would prefer to attribute this improvement to the thrust of legislative events, rather than to the building up of positive forces inherent in our free economy, which seems to be much closer to the actual fact.

There is this factor, too: The psychology of emergency, the rush of events, may in some quarters be thought advantageous in terms of getting important economic bills through the Congress. But it is not worth it. Recession stretching is costly to everyone.

Last week the President did not talk about recovery when asked about our economy. He talked instead about questions as to whether the upturn would be big and fast enough. He said and repeated that recovery, if it develops, is still off in the future.

The actual situation, I believe, is clearer than this. The lead economic indicators are and have been moving forward. Unemployment has leveled off. It has been relatively steady for the last 3 months.

It was 6.8 percent in December; 6.6 percent in January; and 6.8 percent in February. I do not mean to say it has leveled off to an appropriate rate, but the rate has stopped going up.

Spring is in the air. This situation should improve soon.

Secretary of Commerce Hodges said recently we were moving out of the slump of recent months.

Retail sales increased in February. Inventories are down The combination of increased sales and decreased inventories may well indicate that goods are moving faster, particularly in light of the coming of the spring season.

Private housing construction starts, car loadings, and others of the so-called lead indicators have been showing for several weeks that our economy is snapping back.

I propose that we amplify and discuss these factors, rather than the present apparent recession stretching in high places.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. KEATING. I yield to my colleague.

Mr. HICKENLOOPER. I congratulate the Senator from New York for pointing out this very important phase of the discussion of the present economy in the country. I have felt for a long time that we have had much depression talk, which is unnecessary, which is discouraging, and which does not contribute to the orderly reestablishment of normal employment and normal business.

I thoroughly agree with the Senator that we could do for ourselves a very great service if we talked about the strength of America and the reestablishment of normal economic relationships rather than constantly talking about depression and saying, "If we recover," or "Will we recover?"

I think it is bad psychology to do so, and I think it can do and has done us a tremendous amount of damage. It has slowed down the normal reestablishment process.

I do not think any salesman ever sold his bill of goods by complaining about it or by attempting to point out its bad qualities. I think a salesman rather sells his bill of goods by telling of its strong points and by being enthusiastic about it.

I congratulate the Senator on his very succinct statement of very vital issues which confront America.

Mr. KEATING. Mr. President, I am very grateful to my distinguished friend from Iowa. I agree with him. Those of us who have had a little experience with salesmanship know that the way to get the country to the point where we want it economically is not by running down the economic conditions, but rather by building them up. They are responding. My thesis is: Let us keep economic conditions responding by an optimistic outlook toward the future. That is the best thing in the world for everybody, including, most of all, those who are out of work.

ORDER OF BUSINESS

Mr. ALLOTT obtained the floor.

Mr. BENNETT. Mr. President, will my friend from Colorado yield to me?

Mr. ALLOTT. Mr. President, I ask unanimous consent that I may yield to

the Senator from Utah without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Colorado? The Chair hears none, and it is so ordered.

REPLACEMENT OF PLAQUES ON POST OFFICES

Mr. BENNETT. Mr. President, the Postmaster General seems determined to erase the record of the Eisenhower years. Now he is doing it with a chisel.

It will be recalled that last week I remarked on the fact that the Postmaster General had ordered the destruction of all copies of the February issue of the Postal Service News magazine, because that magazine contained an article summarizing the achievements of Postmaster General Summerfield.

This morning I received two letters from different parts of the country, which say in effect, "Senator, you don't know the half of it." Both of these letters reported instances of the new administration removing bronze plaques from post offices which were completed under the Eisenhower administration. The plaques, which included the names of President Eisenhower and Postmaster General Arthur Summerfield, were replaced by plaques bearing the names of President Kennedy and Postmaster General Day.

I can understand the impatience of Mr. Day to see his name cast in bronze. But it seems to me that it would be appropriate to wait a little longer, and put it only on buildings which were constructed—or at least completed—during his administration.

The post office at Taylorsville, Ky., according to my informant, was completed early in December, but the dedication was delayed because of weather and the Christmas rush. After the new administration came to power, the Eisenhower-Summerfield plaque was removed and replaced.

The other letter I received, from Bettendorf, Iowa, told a similar story. In this case, as soon as the new administration came to power a veil was placed over the Eisenhower plaque until it could be taken down.

I understand that these cases are typical of what is happening with new post offices all over the country.

Postmaster Day's obsession with wiping out the record of his predecessor surprises me. I had thought that the New Frontier was supposed to be dedicated to charting new courses, not to obliterating the record of the past. Based on what we have seen thus far, the symbol of the Day administration may well be a chisel, superimposed on a background of burning magazines.

Just how far the new administration will go in its attempt to change building inscriptions no one can say. But next time I walk by the Lincoln Memorial I intend to take a close look at the inscription merely to see whether or not it, too, may now bear the chisel marks of the New Frontier.

I thank my friend for yielding.

Mr. ALLOTT subsequently said: Mr. President, I ask unanimous consent that my remarks be printed in the RECORD immediately following the remarks made by the senior Senator from Utah [Mr. BENNETT], inasmuch as I have yielded to other Senators for other business.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Colorado? The Chair hears none, and it is so ordered.

Mr. ALLOTT. Mr. President, with respect to post offices I am not so naive as to believe that a political system does not work, yet I am a little shocked at times by the great speed with which the New Frontier is exerting its political coercion on various people.

There is a man in Colorado who is the head of the postal region, by the name of Don Brewer. He was named to that position as a career man. As a matter of fact, he has served in the Post Office Department for 28 years.

Immediately after the new administration took office, Mr. Brewer was notified that he would be moved out of his office as regional director, even though he has rendered 28 years of good service to the Department, and that he would be transferred to another post, something he could not hope to do because of a recent heart attack which he suffered.

I bring this up after being reminded of the subject by the Senator from Utah, because I particularly wish to pay respect to Mr. Brewer. He is a fine public servant in every sense of the word. He has found it necessary to retire 2 years before the time he would normally retire because of political circumstances, because of the working of a political machine which has moved him out of office. I think this should be brought to the attention of the American people.

UNANIMOUS CONSENT AGREEMENT TO LIMIT DEBATE ON S. 107, NAVAJO INDIAN AND SAN JUAN-CHAMA PROJECTS

Mr. HUMPHREY. Mr. President, will the Senator from Colorado yield to me so that I may make a unanimous-consent request?

Mr. ALLOTT. I am happy to yield to the majority whip, with the understanding that I shall not lose my right to the floor.

Mr. HUMPHREY. Mr. President, I send to the desk and ask to have stated a unanimous-consent agreement, the provisions of which have been discussed informally. I place it before the Senate so that we may have some discussion with our colleagues.

The PRESIDING OFFICER. The proposed unanimous-consent agreement will be stated for the information of the Senate.

The legislative clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on Tuesday, March 28, 1961, at the conclusion of routine morning business, during the further consideration of the bill (S. 107), to authorize the Secretary of the Interior to construct, operate, and maintain the Navajo Indian irrigation project and the initial stage of the San Juan-Chama project as participating projects of the Colorado River storage project, and for other purposes, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to 1 hour, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided*, That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided*, That the said leaders, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

The PRESIDING OFFICER. Is there objection to the unanimous consent agreement?

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object, I should like to ask a question. Does the agreement call for one hour on each amendment, to be divided a half hour for each side?

Mr. HUMPHREY. The Senator is correct.

The PRESIDING OFFICER. Is there objection to the unanimous consent agreement? The Chair hears none, and the unanimous consent agreement is agreed to.

Mr. HUMPHREY. I thank the Senator from Colorado.

Mr. DIRKSEN. Mr. President, will the Senator yield to me?

Mr. ALLOTT. I am happy to yield to the Senator from Illinois, provided I do not lose my right to the floor.

Mr. DIRKSEN. In view of the unanimous consent agreement which has been approved, I presume there will be no votes tonight. Other than discussion, that will be the end of Senate business this evening?

Mr. MANSFIELD. The minority leader is correct. There will be no votes tonight.

SUGAR QUOTAS

Mr. ALLOTT. Mr. President, in a very short time—within the next few days—the Senate will be considering sugar legislation. I wish I could say the sugar bill would be before us for action within the next few hours, for it is extremely urgent that the Senate act on this vital legislation before the Easter recess.

The present Sugar Act expires at midnight on the 31st day of March, this year. That is less than 6 days away. It is unthinkable that this body would let the sugar program, which for nearly 27 years has so well served both consumers and producers of sugar, go by the board for lack of prompt and intelligent action.

Since the sugar program has been in operation, American consumers have been assured of adequate supplies of sugar at most reasonable prices. The price of sugar to the U.S. consumer is,

in fact, less than the average prices in 121 nations around the globe. I say this on the basis of a United Nations survey of the sugar situation all over the world. This same survey pointed out that in virtually every nation on earth, sugar is the subject of governmental regulation, both as to its marketing and as to its production. Only about 10 percent of all the sugar in the world enters trade between nations on the so-called free world market, and even this trade is subject to the influence of the pricing and supply mechanisms of the International Sugar Agreement.

And so the United States is not unique in having a sugar program. What is unique about the U.S. program is that it has worked so effectively for everybody concerned. Although it has kept prices reasonable to consumers, yet it has permitted an efficient domestic sugar industry to be maintained, so as to strengthen the muscle and sinew of our Nation. It has long been our Nation's policy to provide the economic climate for a competitive and efficient domestic sugar-producing industry, on this continent, for reasons of national defense.

Our sugar program has worked so well because it has achieved a workable balance of all the elements involved. Supply has been balanced with demand. Continental domestic production has been balanced with offshore domestic production. Total domestic production has been balanced with the importation of foreign sugar. The availability of domestically produced refined sugar has been balanced with the availability of sugar refined from domestic and foreign raw sugar.

These balances have been achieved through operation of the sugar program over a number of years, and some of them are extremely delicate since they involve a commodity which, marketwise, is known for its volatility and quick response to the unusual.

The other body on March 21 passed H.R. 5463, a bill which would extend the present Sugar Act, with two amendments, for 21 months—until the end of 1962. This is the bill which the Senate will consider soon—I hope before this week is out. This bill will continue the basic principles of the Sugar Act—the system of balances which I have described. The two amendments, though important, will not disturb the balance. Both apply to the distribution of foreign allocations to this market, but I want to emphasize that neither amendment either increases or diminishes the proportion of foreign sugar, in relation to domestic sugar, that may be marketed here. The bill continues the provision enacted by the Congress last July, authorizing the President of the United States to establish the size of the Cuban sugar quota, and therefore permitting him to ban the importation of sugar from Castro's Cuba. One of the amendments grants further power to the President, giving him the authority to prevent a windfall replacement of Cuban sugar from benefiting any other country with which we do not have diplomatic relations. This amendment obviously is designed to prevent a windfall from accruing to the benefit of Dictator Trujillo of the Dominican Republic, whose government has been linked to an assassination attempt on the President of Venezuela. The other amendment requires that consideration be given to countries in the Western Hemisphere and to countries that purchase agricultural commodities from us, if it is necessary to obtain additional sugar after following the formula spelled out in the law.

To both of these amendments I am sure we can all subscribe. In other respects the bill is identical to the bill passed by both houses of the Congress and signed by the President last July.

I should like to emphasize that the bill we shall soon consider is not intended to be permanent or even semipermanent sugar legislation. It is not intended to set the pattern for future legislation. It is intended merely to continue the essential beneficial features of the present sugar program while a long-range program can be carefully worked out, later in the current session of Congress. There simply has not been time to develop long-range legislation for enactment before the March 31 expiration date of the present law. The report on H.R. 5463 of the Agriculture Committee of the other body twice gives assurance that hearings on such proposed legislation will begin early in May.

It is gratifying to note that the committee, in its written report, observes that—

> The committee is well aware of the problems and aspirations of the domestic sugar-producing industry and at that time [when hearings on long-range legislation are held] spokesmen for prospective domestic producers of sugar beets and sugar cane will have the opportunity to fully present their views.

I am sure that long-range sugar legislation will take into account the changes that have occurred in the sugar world since Castro took over Cuba, and that the long-range law that Congress will pass will provide for a reasonably greater reliance on domestic sources for our sugar. But it takes time to work such things out in a manner that will not destroy the delicate balance among the various sources of supply—the balance, as I have pointed out before, that has contributed so much to the success of the sugar program.

We hear much about the possibilities of great expansion of the domestic sugar industry. My home State of Colorado is the second largest sugar beet producing State in the Nation, and I am interested in the healthy growth of the sugar beet industry as much as anyone in the Senate—growth not only in Colorado but also in other areas where growth is practical. The four beet sugar companies in Colorado process beets grown in several States—and three of the four companies now have factories in several States. As evidence of their interest in sound and practical growth in new areas, I should like to read from a newspaper account in the Plainview, Tex., Herald, in the issue of March 5, 1961.

The headline reads: "Great Western Sugar Will Experiment Here." This Texas newspaper goes on to report:

> A progressive step was taken Friday down the long road Hale County farmers intend to travel, if necessary, to obtain a right to devote part of their fertile, irrigated acres to producing some of the Nation's sugar.
>
> It was in a running conference, 2-hour discussion and film review of sugar industry, which started at a breakfast in Abernathy, continued through a tour of the southern part of the county, a luncheon, and another afternoon tour of the northern segment.
>
> Net result: Hale County growers and interested workers on the beet program have a better insight into the industrial phases, a close friendship with Frank Kemp, president of Great Western Sugar Co. of Denver, and staffmen with him, with all parties pondering their mutual interests.
>
> And, Great Western will definitely establish several locations on which plats of about an acre will be devoted to sugar culture. Varieties deemed adaptable to this area will be planted, climatic, insect, disease, and other factors noted, to determine which of Western's several varities will do best here.
>
> Fieldmen of the company will assist in establishing the plats and in observation.
>
> The group were looking at the New Mexico and northwest Texas areas where interests in beet production is shown.

I cite this as evidence that the established beet sugar industry is interested in new growers in new areas—that the men of experience who operate the present industry, as well as those who want to get into the business, are interested in greater sugar production by American farmers. The present industry is vitally interested in long-range legislation that will provide for such growth as is practical and sound.

How much growth that is, we cannot determine in the Congress between now and the 31st day of this month. But I am confident that we can do so later in this session of Congress after thorough hearings at which all facets of this complicated sugar situation will be examined.

In conclusion, I wish to reemphasize that the sugar bill that will reach this floor in the next few days is a temporary measure, but it is of the greatest urgency for the sugar beet industry of my own great State of Colorado and the sugar beet producers of Texas, New Mexico, and the nineteen other States that now produce this crop. It is of the greatest urgency for the cane growers of Louisiana, Florida, Hawaii, Puerto Rico, and the Virgin Islands. It is of the greatest urgency for the United States cane sugar refining industry of our Atlantic seaboard, the Gulf States, and California. It is of the greatest urgency for all American sugar consumers, and that includes all of us, who for more than a quarter of a century have come to rely upon our sugar program for assurance of a steady flow of sugar at reasonable prices.

And so I urge that this measure be expedited in every way possible. Time is of the essence.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. ALLOTT. I am glad to yield to the Senator from California.

Mr. KUCHEL. I congratulate the able and distinguished senior Senator from Colorado on an excellent speech with respect to the situation facing Congress and the country in connection with sugar legislation. He has marshaled his facts admirably and has demonstrated

most persuasively the problems in international relations which we face and which could be intensely multiplied if we failed to take action before the present law expires.

My friend from Colorado also, as a good American, interested in expanding American agriculture, has indicated how he and I, and also people who are in the sugar business, are interested in strengthening that portion of our agricultural economy, but that there are overriding considerations, and that what we deal with now is temporary legislation which my able friend hopes—and I join him in that hope—will be replaced by sound legislation based upon the type of hearings which he has outlined.

I again congratulate the Senator on an excellent speech.

Mr. ALLOTT. I thank my good friend from California. As he has so clearly pointed out, there is no question that it is to the interest of every segment of our country, including the cane producers, the sugar beet raisers, the refiners, and those who want new acreage, to act expeditiously on the bill. It also applies very much to our international relations.

DEVELOPMENT OF BRAZILIAN OIL SHALE

Mr. ALLOTT. Mr. President, as I stated publicly last Wednesday, I am delighted with the realistic approach which President Kennedy is taking at our multiplicity of foreign aid programs. His proposals deserve our unreserved consideration. Properly applied, they can bring our Nation a new respect while better carrying out our responsibilities of world leadership.

Certainly we all realize that one of the most important areas to us lies among the other nations of the Western Hemisphere. It is to one particular situation to which I wish to address my brief remarks today.

As my colleagues know, one of my abiding interests is development of an oil shale industry in the United States. Oil products are essential to peacetime development. They are critical in time of war. In the area where Colorado, Wyoming, and Utah join, there are mountains of oil shale which constitute a potential reserve of more than 1½ trillion barrels of oil.

Mr. President, to put this matter in proper perspective, we have discovered and used only about 80 billion barrels of oil to date in this country.

This potential reserve is double all of the known liquid petroleum reserves of the world. To do other than prepare ourselves to draw upon this vital reserve, safe within our own borders, is sheer folly.

One of our good neighbors of South America—Brazil—faces an even more critical problem. During the past 6 years, Brazil spent approximately $300 million in search of petroleum without a single commercial discovery. Competent geologists conclude Brazil must be classed at best as a second-rate petroleum prospect and probably never will be self-sufficient.

On the other hand, Brazil apparently has greater reserves of oil locked in shale than any other country with the possible exception of the United States. In one new area in the past year, geologists have blocked out an easily accessible reserve of oil shale estimated at 600 million barrels. More important, the oil shale can be recovered by strip mining. Engineering and economic studies indicate that oil from this deposit will be competitive in Brazil with imported petroleum, assuming proposed extraction methods will work on a large scale.

It is interesting to note that the technology developed by the U.S. Bureau of Mines at Rifle, Colo., and Laramie, Wyo., has been the basis for the Brazilian development. Indeed, many of the technicians as well as the consultants in the Brazilian work received their training in the Bureau of Mines program.

The next Brazilian move is construction of a prototype plant to extract oil from the shale. This, I am informed, will cost an estimated $12 to $15 million over a 3-year period. To date, the shale work in Brazil has been financed locally. Information indicates Brazil will be able to finance about half the cost of the prototype. However, the current shortage of foreign exchange—much of it occasioned by the some $250 million Brazil spends for crude oil from outside its borders every year—will make it necessary for that nation to arrange elsewhere for the other half, perhaps $7 million, primarily to purchase the machinery and equipment involved.

It is my hope that the United States, through its own resources directly or through its international banking arrangements, will consider favorably the arranging of financing for this purpose. I have so stated in a letter to the President last Friday, asking for every possible consideration.

Certainly this is an excellent opportunity to foster hemisphere relations; an excellent opportunity to strengthen one of our friendly neighbors to the south.

But it is much more than this:

If Brazil cannot quickly find the helping hand it needs here, she must, particularly because of the foreign exchange situation I mentioned a short time ago, turn elsewhere, most probably to the Soviet Union. Because of our policies—policies which I suggested a year ago should be reviewed—we have done virtually nothing officially as a nation to lend assistance to Petrobas, the Government-directed oil monopoly. On the other hand, the Soviets have had a mission in Brazil for the past year, discussing oil shale development.

The Soviets have their own operating shale industry, although it is used more for the production of gas than liquids. As a matter of fact, the city of Leningrad brings its gas supply from the great shale beds in Estonia. This technical know-how and working experience is being used by the Soviet mission as a reason to form an economic agreement with Brazil.

Were the Soviets to provide Brazil the means of obtaining the equipment it needs and the usual large number of technicians and so-called technicians which always go with such a deal, I am sure my colleagues easily can see how this might provide another convenient bridge for international communism into the Western Hemisphere.

Yet if the United States affords the financing, and American industry manufactures the equipment, we block any such move. We keep American technicians on the job in Brazil. We enable American industry to develop further know-how in the manufacture of this equipment. We place American industry in a position to compete for the more costly orders for future full-scale commercial plants which would run in the neighborhood of $100 million for the equipment alone. We create jobs for Americans. We forge another link in the chain of friendship with Brazil.

As matters now stand, no U.S. manufacturer will risk much capital on such equipment development because our own confused, lagging policy on development of our own oil shale provides no incentive.

Reliable information indicates that the prototype plant programed by Brazil is of a type and size which would yield significant information for the further development of the oil shale reserves of Colorado, Wyo., and Utah. Such data would fill one of the last significant voids in our own development.

The development of the equipment manufacturing techniques in America would also ultimately result in lower costs both for Brazil and for America.

Mr. President, if the Brazilian Government is disposed to some cooperative agreement in this matter, it could significantly strengthen the ties between our two nations. But time is short. I invite my colleagues to join in urging that the administration, particularly the Departments of State, of Defense, and of the Interior, act speedily to consider favorably this proposal.

NAVAJO IRRIGATION AND SAN JUAN-CHAMA PROJECTS, NEW MEXICO

The Senate resumed the consideration of the bill (S. 107) to authorize the Secretary of the Interior to construct, operate, and maintain the Navajo Indian irrigation project and the initial stage of the San Juan-Chama project as participating projects of the Colorado River storage project, and for other purposes.

Mr. ANDERSON. Mr. President, the bill which has been set for action tomorrow, S. 107, is substantially the same as S. 3468 of the 85th Congress and S. 72 of the 86th Congress, in that all three authorize the construction of the Navajo Indian irrigation project and the initial phase of the San Juan-Chama diversion projects in New Mexico. Hearings were held on S. 3648 on July 9 and 10, 1958. The bill was reported by Senate Report No. 2198, dated August 5, 1958, and was passed by the Senate on August 15, 1958. Hearings were held on S. 72 on March 16, 1959. The bill was reported by the Committee on Interior and Insular Affairs, by Report No. 155, on April 8, 1959, and the bill passed the Senate May 19, 1959.

I mention this merely to assure the Senate that these are substantially the same bills which have previously passed the Senate.

There is one change in the bill which I think is significant.

It is the addition of a new section 9, which replaced the previous section 9, and the remaining sections were renumbered. This section was proposed by the able senior Senator from California [Mr. KUCHEL].

When the hearings were held, the Senator from California presented a statement by Raymond Matthew, chief engineer of the Colorado River Board of California, concerning the bill. The Senator from California pointed out that Mr. Matthew had raised a great many questions with reference to the whole situation of the water supply, and he placed in the report tables which Mr. Matthews had prepared. The Senator from California then offered amendments to Senate bill 107, which had been proposed by the Colorado River Board of California.

The Committee on Interior and Insular Affairs subsequently went into executive session to consider the bill.

I desire to make this statement merely because the California amendments, which are carried in the text, did not appear in the bill.

The amendments were rejected in committee, as the Senator from California knows; but in their places there was put into the bill the new section 9 which we hope will take care of the point about which California had a doubt.

We wanted to make certain that the projects, if built, were operated in accordance with the law of the river, which takes into consideration other projects which have been built before.

I said in the hearings that the distinguished senior Senator from California [Mr. KUCHEL] capably and vigorously represents the State of California. I think it goes without saying that the Senate would never have passed the original bill had it not been for the fact that we carefully tried to work out a relationship between the upper and lower basins, and also the relationship between the other States of the upper basin, particularly the upper Colorado storage division States. I mention that because many persons wonder if there is a conflict in this proposal between the upper basin and the lower basin, since there are matters on the Colorado River system which are now in controversy. That controversy does not, I believe, apply in any way to this situation.

I am very happy that we were able in committee to accept the proposal of the able Senator from California that we put in the section 9, which was a restatement of the previous statement carried in the earlier legislation.

I also point out that the Senator from California raised a question which I think is of great importance. He raised the question of the findings of the special master in the suit between California and Arizona, in which the special master used language in his report, which I shall repeat, and which almost suggests that there has been some sort of self-limitation on the parts of the States of the upper division, those States being Wyoming, Colorado, Utah, and New Mexico. The report of the special master in the suit of California versus Arizona, or perhaps it is styled the other way around, on page 4 states:

> When all project units and participating projects named in that bill are constructed, the aggregate of all consumptive uses in the upper basin would not exceed 4.8 million acre-feet per annum. This would leave an unused apportionment of 2.7 million acre-feet of the 7½ million acre-feet apportioned to the upper basin to meet any contingencies arising out of litigation over varying interpretations of the compact. In these circumstances, the continuity of the water supply for the lower basin would be assured.

That statement appears on page 61 of the hearings on the bill this year.

The junior Senator from New Mexico joined just as vigorously as he could with the distinguished senior Senator from California in pointing out that we dispute sharply this finding of the special master—if it was a finding—because the projects covered in the original Senate bill 500, which became Public Law 485 of the 84th Congress, were not supposed to be all the projects that ever would be constructed. It was pointed out subsequently that in the authorizing legislation only a limited number of projects could be listed. For example, the great State of Colorado, which supplies 50 percent, I believe, of all the water in the Colorado River system, was not ready to construct many of its projects on the western slope, and Colorado had some question about these projects that might be regarded as transmountain diversion.

Therefore, in the bill presented to Congress, which Congress accepted, and the President signed, no attempt was made to apportion all the water that might be eventually used. So it is true that those projects listed come only to 4.8 million acre-feet of water. But that did not mean that they were not subsequently to be augmented by other projects.

I pointed out in the hearing that I was quite certain of the meaning of my language, and I knew very well what the Senator from California understood, that we were only trying to authorize a limited number of projects, and that they would be supplemented by other projects as the supply of water in the river was determined, and as the breadwinner, which is the Glen Canyon Dam, was completed and starts to generate its power and start to produce money for all its sisters.

This is an unusual situation, in which the able Senator from California came to the aid of the States in the upper basin. I thanked him in the committee, and I thank him now, because it was with his aid and assistance that these bills reached the floor of the Senate twice before, and we want to make certain that fairness is shown.

We tried in committee to treat the California projects with the respect and affection which they deserve.

The San Luis project is an example. I have visited it many times and have carefully inspected it. There is no need, in my opinion, for the States of the upper division and the States of the lower division to be contesting against one another for the use of the water of the Colorado River.

It was merely to show that all of the water was properly used in the downriver system, including the State of California. I wanted to assure in this way that this is the same bill which has been before Congress on two occasions, with sections 8(a) and 8(b), written into the bill at the request of the State of Colorado, because of worries on the part of some people in southwestern Colorado about the effect of this project upon the Animas-La Plata project in southern Colorado and northern New Mexico.

Secondly, paragraph 9, which, as I say, was placed in the bill by the able Senator from California, on his motion, to make certain that the project would be operated in accordance with the law of the river, provides for the many things which have been previously laid down as yardsticks and guides for the conduct of the project once it is completed.

I do not desire to make a long statement. I ask unanimous consent to have printed at this point in the RECORD a report on the bill in the form of a letter from the Bureau of the Budget. The report was not available at the time the bill was presented.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE
OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D.C., March 24, 1961,

HON. CLINTON P. ANDERSON,
Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C.

MY DEAR MR. CHAIRMAN: This is in reply to your letter of January 17, 1961, requesting the views of the Bureau of the Budget on S. 107, a bill to authorize the Secretary of the Interior to construct, operate, and maintain the Navajo Indian irrigation project and the initial state of the San Juan-Chama project as participating projects of the Colorado River storage project, and for other purposes.

The purpose of this bill is clearly stated in its title.

The proposed report of the Secretary of the Interior on S. 107 indicates that the benefit-cost ratio for the initial stage of the San Juan-Chama project is 0.81 using direct benefits only and a 50-year period of analysis. However, information in the project report indicates that the tributary irrigation units of the project are suffering economic distress as the result of increasing population pressures, erratic water supplies, deterioration of existing irrigation works, and subdivision of ownerships among heirs. The proposed project would assist in alleviating these conditions. The anticipated beneficial effects from the proposed project in sustaining the economies of these declining agricultural communities would appear to justify an exception to current evaluation standards in this case. We would recommend, however, that a joint Federal-State program be developed to provide for the consolidation of farms in these tributary irrigation units into developments large enough to provide reasonable family incomes prior to the initiation of construction on these units.

Accordingly, the Bureau of the Budget would have no objection to the enactment of S. 107.

Sincerely yours,

PHILLIP S. HUGHES,
Assistant Director for Legislative Reference.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. ANDERSON. I am happy to yield.

Mr. LAUSCHE. Will the Senator tell us what the cost of the project will be on the basis of the 1958 estimate of cost?

Mr. ANDERSON. The Navajo irrigation project will cost approximately $134 million; the San Juan-Chama project, $86 million.

Mr. LAUSCHE. I read from the bottom of page 3 of the report:

Section 10 authorizes appropriations for the construction of the Navajo irrigation project and the San Juan-Chama diversion project of $221 million, plus such amounts, if any, as may be required by changes in construction costs.

Thus, an appropriation of $221 million is authorized plus such amounts above the $221 million cost as reflects the increased cost from the time the estimate was made in 1958.

Mr. ANDERSON. Yes. If we add $134 million-plus and $86 million-plus, the total is approximately that figure.

Mr. LAUSCHE. How many acres of food-producing land will be made available by the expenditure of at least $221 million?

Mr. ANDERSON. The only acreage that will become food producing is the acreage the Navajos will farm. The water from the San Juan-Chama project will undoubtedly be used eventually for municipal water, not to increase the food supply. The acreage in the Navajo project itself is 110,000 acres. As testified by the representative of the Navajo Tribe, in that area they will not be producing crops which are in surplus supply in the United States. As a matter of fact, in the legislation heretofore drawn in connection with most of these projects, an attempt has been made to specify that they shall not be used to produce crops which are in surplus supply over the country.

This area happens to be one where they would not be involved in producing such crops, anyway. They have no cotton-production history, and they would not produce rice, wheat, corn, oats, or barley. They produce crops which are not in surplus supply in the United States.

Furthermore, the Navajo Indians have been receiving a great deal of attention because of their present dietary habits; and it surely is the hope of the Department of the Interior that if the Navajo project is constructed, it will be farmed by the Navajos and will provide thousands of homes for the Navajos, on the reservation, and will permit them to have a wider diversity of materials in their diet.

Mr. LAUSCHE. From the Navajo Indian irrigation project, water will be provided for 110,630 acres of land, with an average annual diversion of 508,000 acre-feet of water. Is it fair or unfair to say that we shall be spending $221 million on the basis that the principal objective of this bill is to provide aid to the Navajo Indians, and that in the provision of the aid we shall make available, at a cost of $221 million, 110,630 acres of land for food production?

Mr. ANDERSON. No. There are two parts to the project. The San Juan-Chama project, which costs $86 million, does not involve the production of food for the Indians, nor does it involve a great deal of water to be used on irrigable land. There is a provision for a small amount of irrigation. Some of it is supplemental irrigation to the mid-Rio Grande Conservancy District. But my guess is, and has been, that the water which will be provided by the San Juan-Chama diversion will be used by the city of Albuquerque for supplemental water supply, and will also be used to supply Santa Fe and other cities and towns in the area, and will also be used at the Los Alamos project, where water is now being pumped at tremendous expense. The water which will be provided there will be expensive water, and will be used for municipal water purposes.

Mr. LAUSCHE. What part of the $221 million will be used for the San Juan-Chama project?

Mr. ANDERSON. Eighty-six million dollars; and the Navajo project will receive $134 million. So, to get the matter in proper perspective, that means that $134 million will be used in connection with the 110,630 acres of land.

Mr. LAUSCHE. In other words, to make available 110,630 acres of land for the cultivation of crops, we shall be spending $135 million?

Mr. ANDERSON. Approximately, yes.

Mr. LAUSCHE. I notice that the Senator from New Mexico has made special effort to point out that the crops which will be grown on this land are not now in surplus supply in the United States.

By that statement, does the Senator from New Mexico mean to imply that he recognizes that about a week ago the Senate passed a bill granting special inducements to feed grain farmers to take acreage out of production, so as to stabilize the farmers' business; but by means of this bill we seemingly shall be doing the very opposite of what we recommended only 1 week ago?

Mr. ANDERSON. No, I do not, because the crops which will be raised on this land are not among the ones which now are in surplus supply in the United States. For example, in the Nation there are many areas which are producing citrus fruits. By developing irrigation projects in Arizona, we might be able to add to the production of citrus fruits; but thus far what we have done has not had that effect, at all.

Mr. LAUSCHE. However, the Senator from New Mexico does recognize that within this proposal there are elements which seem to be exactly in conflict with what we were trying to do last week, when we took steps in an attempt to reduce farm acreage for the production of feed grains.

Mr. ANDERSON. If the land on the project were used to produce corn, wheat, oats, rye, or barley, yes.

Mr. LAUSCHE. But the Senator from New Mexico is pointing out, instead, that crops now in surplus supply in the United States will not be produced on this land?

Mr. ANDERSON. Yes. I am simply trying to find what was the testimony of the representative of the Navajo Tribal Council, Mr. J. Maurice McCabe. That testimony appears on page 39, as follows:

In the operation of our training farm we have learned what crops are most feasible and yield the highest return on soils similar to that of the proposed Navajo Indian irrigation project. We have found that 3 crop-years of alfalfa will build up the soil, and that thereafter, without missing a single crop-year, the lands can be sown to a number of grasses, and will produce superior irrigated pasture, capable of supporting 2 cows or 10 to 12 sheep per acre. Our training farm produces 6 tons per acre of alfalfa. The proposed Navajo Indian irrigation project should be just as productive.

The actual cash crop of the farmers will be the livestock they feed from their pasture crops and certain truck farm products. We do not plan to produce any crops which are currently in surplus.

I may say that not only was that his testimony, but that has also been the plan of those who have cooperated with the Navajo Indians on the project. Mr. Keesee, their engineer, has been working on that, to make sure that crops which are not at the present time in surplus supply will be produced there.

Mr. LAUSCHE. Can the Senator from New Mexico state the per acre value of the 110,000 acres of Navajo Indian land which will be made food producing? What is the present value per acre?

Mr. ANDERSON. At the present time?

Mr. LAUSCHE. Yes.

Mr. ANDERSON. It is extremely low. It is desert country which has virtually nothing on it. Some of it has produced some oil, and is very valuable from that standpoint. But I have flown across it many times; and, from the surface standpoint, I would say it has a value of $5 or $10 per acre.

Mr. LAUSCHE. Then we would be spending, on land which now has a value of $5 or $10 an acre——

Mr. ANDERSON. Over $1,000 an acre.

Mr. LAUSCHE. Over $1,000 an acre to make the land produce food products which are not now in surplus supply in the United States. Has the committee decided that such an expenditure of $1,000 an acre in aid of the national farm economy is justifiable?

Mr. ANDERSON. Yes. The committee has twice said that, because two problems are involved here: Not only the general question of the improvement of land by putting water on it; but, also, in 1868 this tribe had a treaty with the U.S. Government, and in the treaty the Government guaranteed that it would do certain things for the Navajo Indians. However, many of those things have not been done. The Navajos have been, and currently are, maintaining a suit against the Government, because of the

failure of the Government to fulfill the obligations of the treaty.

This project would help solve that problem, because it would provide homes for a great many Navajo families and for about 10,000 to 12,000 of the Navajo Indians, of which there are now about 84,000 in all. Not only is it considered that this project will make it possible for 10,000 or 12,000 of them to live on the land; but, in addition, the usual experience with the development of irrigation projects is that 4 or 5 people are able to live in the towns, for every person who is put upon the farms.

Therefore, they hope they can take care of a great many of the Navajos in the small towns that will be developed around the irrigation project. It is a somewhat different situation than that of the ordinary irrigation project.

Mr. LAUSCHE. To support the bill, one would have to conclude that the expenditure of $1,250 an acre on land that is worth $7.50—I am taking the mean of $5 and $10—is justifiable economics, and therefore the bill ought to be approved.

Mr. ANDERSON. Other persons might dispute my $5 or $10 figure. I am trying to answer very honestly and say that these are desert lands which are wastelands unless water is put upon them. I farm a few irrigated acres in the Rio Grande Valley. Without water, it becomes blowing sand, and is not very valuable. With water on it, it becomes valuable.

The Navajo Indians have a very meager livelihood. For 1938 the estimated per capita income was $467 for the Navajos, compared to a national average of $1,940 for the country as a whole.

As I have stated, we have treaty obligations with the Navajo Nation, and we have been trying to build up their average income so that they may become self-sustaining. About 16.2 percent of the individual Navajo income is derived from welfare, unemployment, and similar sources. Eighty-three percent is earned income. And yet it comes to only a little more than $400 a year.

Mr. LAUSCHE. May I assume that the principal objective of this bill is to fulfill the obligation of debt to the Navajo Indians?

Mr. ANDERSON. It is, to my mind.

Mr. LAUSCHE. Why are we spending $85 million on these other projects, if the principal objective is to correct a wrong that we perpetrated, allegedly, upon the Navajo Indians?

Mr. ANDERSON. I am not particularly saying it was a wrong perpetrated on the Navajo Indians. I do say that when the Navajos were moved from the area in which they were living to the Bosque Redundo, and then moved back to the reservation, it was done pursuant to a treaty. There are suits all over the United States based on Indian treaties. There now exists a special court to hear the Indian claims, and a special Indian Claims Commission.

The $86 million project is a separate project. It is in the bill for the reason that the State of New Mexico has a right, under the upper Colorado River compact, to allocate the water coming into the State. In its decision to allocate water, it decided certain uses would be made in the Navajo project, but it would not ignore the more populous section of the State which follows the Rio Grande River.

In order to fulfill the requirements laid down by the then Governor of the State, who is also the present Governor of the State, there was a decision to combine the two projects in a single bill. The State of New Mexico asked that if a bill was to be adopted to include the Navajos, it include the San Juan-Chama transmountain diversion, in order that remaining water of the Colorado River usable by the State of New Mexico could be used in another river valley. That is why the projects are in the same bill. They are not here by the desire of the Senator from New Mexico, but by reason of a desire on the part of the conservation board of the State of New Mexico and the Governor of the State. That is why they are tied together in one bill.

Mr. LAUSCHE. The San Juan-Chama project will require construction of canals carrying water what distance? What will be the length of the canals diverting the water from one basin into another? Will it run a distance of 100 miles or more?

Mr. ANDERSON. Yes. It depends a little on the final type of construction which is to be decided upon. This project started more than 50 years ago and progressed very slowly, because we had to have built irrigation projects of large dimensions to permit it. If the early plan is utilized, of reaching up into the State of Colorado and tapping fingers of water in southern Colorado, the canals will exceed 100 miles in length. I regret I am not able to say to the Senator what the length will be, but they will be more than 100 miles, and, I would guess, in the neighborhood of 140 miles.

If, however, the water is taken from the face of the Navajo Dam, which is now nearing completion, and is carried in large tunnels to the Continental Divide, then lifted over the Continental Divide and dropped down the other side, the tunnels will be in the neighborhood of 85 or 90 miles, although I may be making a misstatement. I hope the Senator will realize that I am guessing. It may be 90 miles, and perhaps 100 miles.

Mr. LAUSCHE. I will read from page 2 of the report, section 6:

> That the initial phase of the San Juan-Chama diversion will assure means of providing water for irrigation, for existing developments and urgently needed additional municipal and industrial supplies available for the city of Albuquerque and defense installations.

The San Juan-Chama diversions will supply water supplementing present irrigation supplies, and thus increase the production of food in the area served by the San Juan-Chama diversion.

Mr. ANDERSON. The original project called for the use of supplemental water on 81,000 acres of land in the Middle Rio Grande Conservancy District. The land in the Middle Rio Grande Conservancy District has been shrinking rather rapidly. Originally I believe I owned 1,706 acres within the Middle Rio Grande Conservancy District. Of that I do not suppose more than 400 acres is now actually being cultivated, and of that 400 acres I hope within a few years none will be cultivated. The land is being subdivided.

While the original projects embraced those acres in the Middle Rio Grande Conservancy District and there were suggestions for the use of supplemental water, the price of the supplemental water is rather high, and thus far we are pumping more cheaply than the cost of the supplemental water. Therefore, the supplemental water, when finally furnished by the Secretary of the Interior, will be used by the people of Belen, Socorro, and by the military reservations at Kirtland Base, Sandia Base, and also the White Sands Proving Grounds farther down the river.

In addition, of course, the city of Los Alamos, now composed of some 12,000 to 14,000 people, or perhaps more, was built on a little ledge of ground which was purposely utilized because it was inaccessible. The water supply consists of pumping water at a place near Bosque from the Rio Grande River and lifting the water several hundred feet to the mesa. It would be possible, if the engineering project which I last mentioned to the Senator were to be utilized, to take water from the face of the Navajo Dam and to transport it in tunnels and in closed conduits thereby diverting the water to satisfy the requirements of Los Alamos and the city of Santa Fe.

My guess is that when the project is constructed the water will be almost entirely municipal water. There will be perhaps 25,000 acre-feet which is likely to be used in an exchange water project in the northern part of New Mexico, going I think into three areas. Taos is one. Cerro is another. And Quemado is the third. These are rather small areas not now adequately served, where relief measures are constantly being utilized. By the diversion of water from the Rio Grande River, to which the areas do not now have water rights, and by substituting San Juan River water into the Rio Grande River at a point below the confluence with the Rio Grande, these areas in northern New Mexico can be taken care of. That will be irrigation water.

Again, however, we are dealing with areas which are 6,000 feet in elevation and higher. These areas do not produce the types of crops which are in surplus supply. The use of the water would be largely for small individual gardening. That is the principal use of water in these localities.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. WILLIAMS of Delaware. Is the Senator referring to the entire 81,000 acres?

Mr. ANDERSON. No. I am sorry if I stated it that way, I say to the Senator from Delaware. I meant to say, and I hope I said, that 29,000 to 31,000 acres represents water transfer in the northern part of New Mexico. The 81,000 acres refers to the Middle Rio Grande Conservancy District, which I doubt would actually purchase the water if it came to it. My guess is that

the water would be much more valuable for municipal purposes and for other purposes, including recreation.

I shall have to give the figures from memory, and I hope I do not do too badly, but not long ago there was a study made as to the value of water for various purposes. Those who studied it arrived at a figure of about $30 an acre-foot for irrigation, about $100 an acre-foot for industrial use, about $300 an acre-foot for municipal use, and something more than $1,000 an acre-foot for recreational use. It was pointed ou that the State of Colorado, if using water for its highest use so far as financial return were concerned, should use more water for recreation and less for irrigation.

Mr. LAUSCHE. Am I correct in assuming the prospects are great that most of the water in the San Juan-Chama project will be used for municipal and industrial purposes, and very little of the water will be used for farming, because of the excessive cost it would entail?

Mr. ANDERSON. The Senator is correct. The fact is the cost is higher than the cost of pumping water.

Mr. LAUSCHE. If practically none of the water is to be used for farming, upon what ground is the expenditure justified under the irrigation law, which contemplates making land available for farming?

Mr. ANDERSON. It is under the same general rule by which we approved, several years ago, the Canadian River project, which serves the cities of Amarillo, Pampa, and various north Texas towns.

It is under the same rule by which we passed, in the last session of Congress, the bill for the Cheney division of the Wichita project, which serves Wichita, Kans., and irrigates only a tiny patch of ground.

It is under the same rule by which we approved the Norman project in the State of Oklahoma, which takes care of a portion of Oklahoma; I believe Del City and various other communities.

The probable greatest value of reclamation projects in the next 25 to 50 years is likely to be the use of the collective power of the Federal Government to construct municipal waterworks which no individual community could afford to construct, thereby supplying water to areas which are greatly short of water in all of our arid States.

The Canadian River project, which involves the city of Amarillo and other Texas communities, I believe was approved by the 81st Congress. The author of the bill in the House was Eugene Worley of Amarillo, who has been a judge of the Patent Court, I am sure, for at least 10 or 12 years. Therefore, I say that the project was approved, I believe, by the 81st Congress. It has taken all the intervening years for the cities of this area of Texas to agree upon a system of charges by which they would construct the $100 million project.

This is not a new development. We had several projects presented to the last Congress for the construction of works to provide municipal water. All of such money is, of course, repayable with interest. These projects are different from the ordinary reclamation project in that respect.

On the Norman project several million dollars was charged to recreation, fish and wildlife. On the Cheney Division of the Wichita project $10 million was charged for recreation, fish and wildlife, although the most recommended by the Engineering Department of the Bureau of Reclamation was $7 million.

In respect to the present proposal, involving $86 million, three times the size of the Wichita project, only $400,000 of the $86 million is allotted to recreation.

Mr. LAUSCHE. That is not a reimbursable item?

Mr. ANDERSON. The $400,000 is not. The $85.6 million of the $86 million is reimbursable, but the $400,000 is not.

Mr. LAUSCHE. Is it the Senator's position that on the basis of the irrigation laws of our country, without any food-producing element being tied into the project, the Federal Government can provide money for the building of dams to provide water for municipalities and for industries?

Mr. ANDERSON. I think it could. A portion of this proposal relates to the water exchange with the areas in northern New Mexico, where there will be a use of water for irrigation.

In the bill is the provision that the Middle Rio Grande Conservancy District could buy such water as it might desire.

I know that there will be—and that there have been—projects which involve municipal water supplies or water supply systems which do not involve irrigation. I point to the fact that when the San Luis project in the State of California was under consideration an amendment was proposed which would have raised the level of the dam and would have permitted an overflow from the back side of the dam into the area around Stockton, which would have been solely for the benefit of domestic water and not for ordinary irrigation. It was favored by the junior Senator from New Mexico, but the provision was not included in the final project. It would have been a perfectly proper use of the money, in my opinion, because interest is paid on the money. The Federal Treasury merely acts as a banking agency for the municipality, to supply funds the municipality does not have available.

Mr. LAUSCHE. Let us get to the subject of interest. What does the bill provide concerning the rate of interest that would be paid by local agencies which would be obligated to pay a part of the cost of construction?

Mr. ANDERSON. The bill provides that such agencies would pay the average long-term rate for bonds of the United States.

Mr. LAUSCHE. Does the bill so provide, or does the bill set a specific sum of approximately 2.37, which is a figure I recall reading from the report?

Mr. ANDERSON. I hope I am not misstating the figure. I think it includes the language which the junior Senator from New Mexico added to the Norman project.

Mr. LAUSCHE. A specific figure is stated somewhere in the report.

Mr. ANDERSON. Yes.

Mr. LAUSCHE. What is the long-term interest rate that is proposed to be paid?

Mr. ANDERSON. It is approximately 2⅝ percent as a long-term obligation of the United States.

Mr. LAUSCHE. I am quite certain that the figures which I read in the report do not indicate that rate of interest. I shall not ask the Senator immediately to locate the figure, nor shall I try to do so.

Mr. ANDERSON. The original language in the Upper Colorado Storage Basin Act was changed from the language contained in the original bill, S. 500, in order to follow a recommendation of the Treasury Department at that time; namely, that the rate of interest should not be what it had been in previous irrigation projects, but the average long-term interest rate of the United States, which runs from 5 years to whatever year of maturity the obligation contains.

Mr. LAUSCHE. Referring to page 8 of the report——

Mr. ANDERSON. May I finish by saying that we then got into a position in which language was inserted in the bill so as to provide that the rate should not be the average rate but should be based on the average yield. Recently, we have been in a very strange situation, in which the average yield on long-term bonds rose to 3⅝ percent. At 3⅝ percent almost every irrigation or reclamation project would have been unfeasible. The Hoover Dam, which is a great and fine tribute to the engineering skills of this country, could only have been constructed with money at 3 to 3⅛ percent interest. It would not pay out at 3⅜, nor would the Grand Coulee Dam or any of the other large dams of the country. Therefore we tried to change the rate and we came out with a different figure. The bill carries the same provisions that all other bills carry, and that is that the interest rate shall be a long-term rate, which is approximately 2⅝ percent.

Mr. LAUSCHE. Referring to page 8 of the report, I find a statement that the costs allocated to municipal and industrial water supply, including interest during construction, would be paid over a 50-year period with interest on the unamortized balance using the interest rate of 2.632 percent.

Mr. ANDERSON. I merely suggest to the Senator that the figure he has stated is pretty close to 2⅝ percent.

Mr. LAUSCHE. The figure of 2.632 percent does not reflect the average long-term interest rate that the Federal Government must pay.

Mr. ANDERSON. I challenge that statement. I think it does. The Treasury Department so certifies. I am sure it would.

Mr. LAUSCHE. I thought the Senator stated that these projects could not be constructed on the basis of the interest yield.

Mr. ANDERSON. No, I said these projects could not be constructed if the

local groups had to try to borrow the necessary money themselves. These projects involve municipal water supply and would be handled on the basis of the average return on long-term Government bonds. That amount of interest would be charged to them, and would be paid.

Mr. LAUSCHE. We have reached an understanding on the basis of what the Senator from New Mexico has said, that the average interest rate on long-term Government bonds is now 2.632 percent.

Mr. ANDERSON. I am not trying to quibble on the point. I wish to say only that this amount is determined at the end of the year. It may not be that figure today, but it will be on June 30th and was on June 30th last.

Mr. LAUSCHE. Does the bill provide that the interest rate shall be the average rate or does the bill specifically state that the interest rate shall be 2.632 percent?

Mr. ANDERSON. The interest rate is not specifically stated. The bill states that the interest rate shall be the rate which would be applicable on the upper Colorado River storage project. It does not have to be stated in the bill. That provision was changed by an amendment to the Norman project, in order to provide that the rate should be the rate of the long-term bonds.

Mr. LAUSCHE. Coming to the financial feasibility of the project, in concluding that it was financially feasible, what life was used in making the calculation? Was it a 100-year life of the project?

Mr. ANDERSON. It is with respect to the municipal water supply.

Mr. LAUSCHE. What about dams? Let us consider first the Navajo Indian Dam project.

Mr. ANDERSON. I believe the calculation is made both ways. If a 100-year cost ratio is used, it is 1.44 to 1. If a 50-year cost ratio is used, it is 1.17 to 1.

Mr. LAUSCHE. Which formula was used, the 100-year life of the project, in order to bring it up to 1.44 to 1, or the 50-year life? Did a 50-year life make the project feasible?

Mr. ANDERSON. Yes; 50 years would be feasible.

Mr. LAUSCHE. That is, with a margin of 0.17.

Mr. ANDERSON. Yes.

Mr. LAUSCHE. That question dealt with the Navajo project.

Mr. ANDERSON. Yes.

Mr. LAUSCHE. What is the feasibility of the San Juan-Chama project?

Mr. ANDERSON. On a 100-year basis it would have a ratio of 1.26 to 1. On a 50-year basis it would have a ration of 0.81 to 1.

Mr. LAUSCHE. On a 50-year basis the benefits accrued or enjoyed would not be as great as the obligations incurred?

Mr. ANDERSON. The Senator is correct.

Mr. LAUSCHE. So on a 50-year basis the San Juan-Chama project is not financially feasible?

Mr. ANDERSON. Unless the water is used almost entirely for municipal purposes.

Mr. LAUSCHE. But on the basis of the calculation made, on a 50-year basis the San Juan-Chama project would not be advisable from a financial standpoint?

Mr. ANDERSON. The Senator is correct.

Mr. LAUSCHE. On a 100-year basis it would have a margin of 1.17 to 1?

Mr. ANDERSON. 1.26 to 1.

Mr. LAUSCHE. I suppose the 100-year feasibility calculation was used as a consequence of the law passed either a year or 2 years ago?

Mr. ANDERSON. Yes.

Mr. LAUSCHE. Considering feasibility on a 50-year basis, dealing with the Navajo project, were the direct benefits adequate to support the financial feasibility or did the financial feasibility only become actual when we consider what are supposed to be indirect benefits?

Mr. ANDERSON. No; the direct benefits made the project feasible.

Mr. LAUSCHE. Can the Senator from New Mexico read to me from the report on that subject? I am not familiar with the paper that the Senator now has.

Mr. ANDERSON. While the quotation that the Senator desires is being found, I should like to point out that the Bureau of the Budget in reporting the Navajo and San Juan-Chama project said that the proposed report of the Secretary of the Interior on S. 107 indicates that the benefit-cost ratio for the initial stage of the project is 0.81, using direct benefits only, and a 50-year period of analysis.

If we had indirect benefits that would arise because of the nature of the Defense Establishment, there is a possibility that most of it would be leased water, and we would have a somewhat different story.

Mr. LAUSCHE. What is the difference in the story? Would the ratio be brought up to 1.26?

Mr. ANDERSON. No; I have not calculated it. I merely say that if we are going to have the lowest use of water, which is for irrigation purposes, as against a higher use by municipalities, we would come out with a much different benefit ratio from municipal use than we would from using the water on a 39,000-acre-foot irrigation basis.

Mr. LAUSCHE. I assume that in making the study they based their figures on what they thought would be the actual use, and that on the basis of actual use they concluded it would not be financially feasible on a 50-year basis.

Mr. ANDERSON. They used as a figure what was considered to be the possible consumption of water in the city of Albuquerque, as that demand has been developed for many years.

I pointed out previously, when this subject was under consideration, that in 1920 the city of Albuquerque had a population of about 15,000. In 1930 it had a population of about 22,000. In 1940 it had a population of about 36,000. In 1950 it had a population of about 96,000. In 1960 it had a population of about 200,000. That growth in the past few years has made its need for municipal water much greater, and therefore, the possibility of marketing water at a higher rate was much better. It is pretty hard to go back to the Bureau of the Budget and say that the city of Albuquerque is going to abandon its wells and buy its water in this way, when no such contract has been entered into as yet.

Mr. LAUSCHE. According to the Senator's interpretation, am I to assume that, let us say, a city in mid-Indiana could, under the pending bill, if it became law, procure money to build water supply projects?

Mr. ANDERSON. Well——

Mr. LAUSCHE. To be used industrially and for the consumption of water in the homes of people living in mid-Indiana.

Mr. ANDERSON. There was for a time a restriction on the number of States which are included in the reclamation system. I would think that Indiana might not be one of those States. A city in Texas could, because it has. A city in Oklahoma could, because it has. A city in Kansas could, because it has. A city in California could, because it has. So could a city in Arizona, a city in Colorado, a city in North Dakota, a city in South Dakota, and cities in a great many other States. I am not sure as to Indiana, but I doubt it.

Mr. LAUSCHE. The Senator from New Mexico served as Secretary of Agriculture. How many acres of crop-producing land are there in the United States? Is he able to tell us?

Mr. ANDERSON. No; I am not able to do so. I believe it is around 400 million acres.

Mr. LAUSCHE. I understand it to be 500 million acres.

Mr. ANDERSON. I am only a short distance from my friend on that figure. I will take his figure. I believe he is including pastureland, although I am not sure.

Mr. LAUSCHE. It is said that if we took 8 percent of the total crop-producing acreage out of production, we would bring consumption in some reasonable relationship with the power of our people to consume and our power to sell.

Mr. ANDERSON. I assure the Senator that that is no statement than can be attributed to me, because while I was in the Department of Agriculture there was constructed, at tremendous effort on the part of a great many people, a chart which tried to measure the utilization to which it would be necessary to put the farms of this country if we were to utilize them to their highest purpose, and then tried to calculate on the opposite side of the chart how much food would be needed to give each person in the United States an adequate diet—not an expensive diet, but a diet which would yield about 3,000 calories. This was in 1945 or 1946. At that time we came out with almost a balance.

The great difficulty in our country is that we do not use the land for the production of nutritious food. If we were to produce more meat, more eggs, more butter, more milk, and do it in the finest possible way, with crops that did not destroy the soil, but knit together the

land, we would have a shortage of agriculture in the country at the present time.

Mr. LAUSCHE. The feed grains bill which we passed a week ago contemplated taking substantial acreage of feed grains out of production.

Mr. ANDERSON. I voted against it.

Mr. LAUSCHE. I had intended originally to do so, but finally I voted for it.

Mr. ANDERSON. I remained an unreconstructed rebel.

Mr. LAUSCHE. How many acres has it been suggested are necessary to take out of production so as to bring production into some relationship with consumption?

Mr. ANDERSON. I do not know. I disagree entirely with that philosophy, and therefore I have not paid much attention to it. I have the feeling that we would do much better to stress livestock farming. If the Senator will indulge me for a few moments, I would like to say that I pointed out that probably we could make good use of our land in this way. For example, if a man were to be confronted with about 30 slices of toast for breakfast, he probably would admit that he could not eat that much bread. Therefore, we probably would have a surplus of wheat in such a situation. However, if we were to put on the man's plate two eggs and two strips of bacon and one piece of toast, he could eat that breakfast without any trouble. The same amount of grain goes into the 2 eggs and the 2 strips of bacon and 1 piece of toast as goes into 30 or more slices of bread.

If we were to use more nutritious food, we would not have an oversupply of agricultural land. As a matter of fact, by the year 2000 I believe we will probably be a deficit nation with respect to the production of agricultural commodities.

Mr. LAUSCHE. I have only one more question to ask of the distinguished Senator from New Mexico. I believe the Senator will concede that the administration's program of a week or so ago was founded principally on the proposition that acreage must be taken out of production.

Mr. ANDERSON. Yes; I concede that.

Mr. LAUSCHE. If that were the administration's principal objective in the bill, does not the proposal before us run in direct conflict with it, when we recognize the fact that we would be adding 110,000 more acres to the production, with the exception that the Senator from New Mexico says it will go into production of nonsurplus goods?

Mr. ANDERSON. I do not believe it runs contrary to it. I tried to say before that the attempt was made to take out of production cornland and the attempt was made to take out of production wheatland. However, the Secretary of Agriculture, in the same breath with which he asked that this land be taken out of production, indicated that he intended to raise the support price on soybeans beyond the present level, which means that he wanted additional production of soybeans. Therefore in this particular area we would not have a conflict, because we would then have a livestock type of agriculture, and it would not result in the type of surpluses that give us the present trouble.

Mr. LAUSCHE. I believe in the bill it is specifically provided that it is possible to take acreage out of production and convert it into pastureland for the purpose of producing livestock.

I am very grateful to the Senator for his courtesy and politeness and gentility in taking this time to answer my many questions.

Mr. ANDERSON. I only wish to say to my friend that I appreciate very much his approach to this problem, and I hope the time will never come when I cannot show him courtesy.

ADJOURNMENT

Mr. ANDERSON. Mr. President, I move the Senate stand in adjournment until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 6 o'clock and 49 minutes p.m.) the Senate adjourned until tomorrow, Tuesday, March 28, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 27, 1961:

U.S. MARSHALS

Covell H. Meek, of Iowa, to be U.S. marshal for the northern district of Iowa for a term of 4 years, vice Clement W. Crahan.

Francis M. Wilson, of Missouri, to be U.S. marshal for the western district of Missouri for a term of 4 years, vice Burke Dennis.

George A. Bayer, of Alaska, to be U.S. marshal for the district of Alaska for a term of 4 years, vice Fred S. Williamson.

Dave Fresquez, of New Mexico, to be U.S. marshal for the district of New Mexico for a term of 4 years, vice George W. Beach.

Royal Dion, of New Hampshire, to be U.S. marshal for the district of New Hampshire for a term of 4 years, vice George A. Colbath.

Harry A. Sieben, of Minnesota, to be U.S. marshal for the district of Minnesota for a term of 4 years, vice C. Enard Erickson.

U.S. ATTORNEYS

Miles W. Lord, of Minnesota, to be U.S. attorney for the district of Minnesota for a term of 4 years, vice Fallon Kelly, resigned.

Francis G. Whelan, of California, to be U.S. attorney for the southern district of California for a term of 4 years, vice Laughlin E. Waters.

William H. Craig, Jr., of New Hampshire, to be U.S. attorney for the district of New Hampshire for a term of 4 years, vice Maurice Bois.

DIPLOMATIC AND FOREIGN SERVICE

Parker T. Hart, of Illinois, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Saudi Arabia.

Julius C. Holmes, of Kansas, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Iran.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 27, 1961:

GOVERNOR OF THE VIRGIN ISLANDS

Ralphael M. Paiewonsky of the Virgin Islands, to be Governor of the Virgin Islands.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Boisfeuillet Jones, of Georgia, to be special assistant on health and medical affairs to the Secretary of Health, Education, and Welfare.

DEPARTMENT OF THE TREASURY

John M. Leddy, of Virginia, to be an Assistant Secretary of the Treasury.

Robert Huntington Knight, of Connecticut, to be General Counsel for the Department of the Treasury.

RENEGOTIATION BOARD

Thomas D'Alesandro, Jr., of Maryland, to be a member of the Renegotiation Board.

U.S. ATTORNEYS

D. Jeff Lance, of Missouri, to be U.S. attorney for the eastern district of Missouri for a term of 4 years, vice William H. Webster, resigned.

F. Russell Millin, of Missouri, to be U.S. attorney for the western district of Missouri for a term of 4 years, vice Edward L. Scheufler.

HOUSE OF REPRESENTATIVES

MONDAY, MARCH 27, 1961

The House met at 12 o'clock noon.

The Reverend Don Jones, Sixth Presbyterian Church, Washington, D.C., offered the following prayer:

Almighty God, as we meet together here in a time of urgency and concern, we turn to Thee for wisdom and for guidance. We pray that Thou wilt bless us and help us to use the wisdom of our minds, the experience of our lives, and the convictions of our hearts, that they might become the instruments of Thy will that we here in this Congress and this land might be a part of Thy plan. Save us from sectional selfishness and partisan pride, that we may seek and achieve what is the best good and the most right for the most people. In so doing we pray that we might be able to do justly, to love mercy, and to walk humbly with Thee, our God. We ask it in Christ's name. Amen.

THE JOURNAL

The Journal of the proceedings of Friday, March 24, 1961, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed a joint resolution of the following title:

S.J. Res. 66. Joint resolution to amend the joint resolution providing for membership and participation by the United States in the Inter-American Children's Institute.

COMMITTEE ON RULES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain reports.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE LATE WESLEY E. DISNEY

The SPEAKER. The Chair recognizes the gentleman from Oklahoma [Mr. BELCHER]..

Mr. BELCHER. Mr. Speaker, it is with deep regret that I announce to the Members of the House the sudden passing of the Honorable Wesley E. Disney, former Representative from the First District of Oklahoma.

He passed away yesterday at George Washington University Hospital. He was stricken while on an automobile drive with his wife, Anna, and Mr. and Mrs. Milton MacKaye.

Mr. Disney was a Member of the House from 1931 to 1944, and retired from the House to run for the Democratic nomination to the Senate, in which he was defeated. He served on the Ways and Means Committee; and at his retirement was a high ranking Member.

Since his retirement from Congress in 1944, Mr. Disney has been practicing law here in Washington with offices in the Warner Building, and has been representing mining and oil interests.

He was a native of Kansas and was graduated from Kansas University in 1906. He began the practice of law in Oklahoma and served as county attorney in Muskogee County from 1911 to 1915. He was a member of the Oklahoma House of Representatives from 1919 to 1924.

Mr. Disney was a very popular Congressman, both with his constituents and with his colleagues. He was a friendly man, courageous and strong in his convictions, yet always tolerant of those who differed with him.

I first became acquainted with him in 1941 while he was serving here in the House. We soon became very good friends and our friendship lasted throughout the years.

He was a man whose word was as good as his bond. He carefully studied the legislation that came before the House, and he voted his convictions, regardless of party ties.

He leaves surviving him, his wife, Anna, and two sons, Wesley V. Disney, Jr., and Dr. Ralph E. Disney, both of Tulsa, and a brother, R. L. Disney, former judge of the U.S. Tax Court, now living in Norman, Okla.

In this hour of sorrow, we offer our deepest sympathy and condolences to Mrs. Disney and the family.

Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. EDMONDSON].

Mr. EDMONDSON. Mr. Speaker, thousands of Oklahomans, and many here in the Nation's Capital, have been saddened by the passing of the Honorable Wesley E. Disney, one of the pioneer statesmen of Oklahoma.

The record of Wesley Disney as a Member of this body is known and respected by many who serve here today, and the State of Oklahoma is proud of the distinguished service of the man who represented the old First Congressional District so well.

I first came to know former Congressman Disney while I was serving as county attorney in Muskogee County, Okla. It was a post which he had filled himself, from 1911 to 1915, shortly after statehood.

From oldtimers in the courthouse I learned of the outstanding record which Wesley Disney had made as a prosecutor and as a public servant, and I learned also of the high regard with which he was held by people in our hometown of Muskogee.

Later, when the State of Oklahoma was redistricted and the late William G. Stigler decided to retire from this body, I became a candidate for the new Second Congressional District. This new district included many of the counties formerly represented by Wesley Disney, and I have heard his name called often by his former constituents in these counties.

Without exception, the men and women he once represented in this body have spoken with high regard and respect for Wesley Disney. He had served them conscientiously and effectively in Washington, and the record of his reelection campaigns is a record of steadily increasing majorities from the old First District.

In my own first campaign for Congress, Wesley Disney was a source of much wise counsel and helpful advice. The friends to whom he referred me, in the counties he knew so well, without exception have proved to be good and loyal friends whose only request has been, "Be the same kind of Congressman that we knew in Wesley Disney."

After coming to Washington, I valued highly the occasional visits which Congressman Disney paid to my office, and the wise words of advice and counsel which he brought with him.

My wife and I enjoyed and cherished the friendship of both Wesley Disney and his beloved wife, who stood faithfully at his side through the years.

To Mrs. Disney, to their fine sons, and to all in this outstanding family, go our warm sympathy in this hour of bereavement.

Wesley E. Disney was a man of great ability, a man of great enthusiasms and strong convictions, and a man trusted, respected, and highly regarded by his neighbors. In his passing, Oklahoma has lost a trusted son, and the Nation has lost a valued public servant.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. BELCHER. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, I join my colleague in this word of tribute to a distinguished Oklahoman and a former distinguished Member of this House. Wes Disney was universally considered one of the strongest and ablest men ever to represent our State in this body.

Wes Disney was my friend for many years. He came from a strong family of able and distinguished men of affairs. One of his brothers was a former member of the board of tax appeals.

He was a great and good man. I extend to his family and loved ones my deepest sympathy in this time of their bereavement.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BELCHER. I yield to the distinguished majority leader.

Mr. McCORMACK. Mr. Speaker, I am very sorry to learn of the death of my dear friend, Wes Disney. I was not aware that Wes had taken the journey into the Great Beyond until my friend just announced it to the House of Representatives. Wes Disney and I served in the Committee on Ways and Means together. He was one of the outstanding Members of this body, a dedicated American—not only a great man but more than that, he was a good man. I extend to his loved ones my deepest sympathy in their great loss and sorrow.

Mr. BELCHER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the life, character, and service of the Honorable Wesley E. Disney.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. HORAN. Mr. Speaker, I too want to join with my colleagues in paying my own personal respects and those of Mrs. Horan to the memory of Wesley E. Disney. There are many in the Congress, of course, who do not remember Wes Disney, but I consider myself fortunate to have come to the Congress while he was serving. He was able, friendly, witty, and altogether a very fine product of the State of Oklahoma. I always felt as though Wes Disney lived on a hilltop from where he could survey the events occuring around him. But when he came down, as he did when I was a freshman and the House was considering the pay-as-you-go income tax, he was very effective, very honest, and very, very much a credit to those who were supporting the legislation. Had Wes elected to remain in the House of Representatives conceivably he would have had a chairmanship. But he chose to run for the Senate and, of course, retired from Congress after that. Wes Disney was an able lawyer and one of the fine friends who I enjoyed knowing during my service here in the Nation's Capital.

Mrs. Horan joins with me in expressing our sympathy to Mrs. Disney and the members of the fine Disney family.

Mr. WICKERSHAM. Mr. Speaker, I lost a friend yesterday, all of us in Congress have lost a friend, the United States lost a friend yesterday when the Most Honorable Wesley E. Disney died.

A lot of us knew him as a Congressman, and a more honest and dedicated Member of this body has not sat in these seats nor walked these halls nor worked in these committee rooms. Since he was stricken with paralysis a few years ago, all of us who knew him have marveled at the courage with which he went about his chores and the pleasure he took in moving, slowly, but very surely, despite his infirmity, around the city and here at the Capitol. How straight he stood, how firmly he walked, how perfect his grooming, how courteous his manner, how great a gentleman. The world is a little poorer today because Wes Disney died yesterday. There is a bright light in the place where he stood so gallantly. I will miss Wes Disney, my friend.

UNITED STATES AGAINST ELLIOTT SULLIVAN—UNITED STATES AGAINST PETER SEEGER

The SPEAKER. The Chair lays before the House the following communication from the Clerk of the House.

The Clerk read as follows:

MARCH 24, 1961.

The Honorable the SPEAKER,
House of Representatives.

SIR: As the Clerk of the House of the 86th Congress I received, from the U.S. District Court for the Southern District of New York, two subpenas duces tecum, one in the case of Peter Seeger (criminal No. C–152–240), and the other in the case of Elliott Sullivan (criminal No. C–152–238). Both subpenas directed me to appear before said court as a witness in these cases and to bring with me certain and sundry papers therein described in the files of the House of Representatives.

This matter was brought to the attention of the last House, as a result of which House Resolutions 476 and 477 were adopted on March 15, 1960.

Since the development of these cases has extended into the 87th Congress and it is well recognized that each House controls its own papers, this matter is presented for such action as the House, in its wisdom, may see fit to take.

Respectfully yours,

RALPH R. ROBERTS,
Clerk, U.S. House of Representatives.

The SPEAKER. The Clerk will report the subpenas.

The Clerk read as follows:

UNITED STATES DISTRICT COURT FOR THE SOUTHERN DISTRICT OF NEW YORK; UNITED STATES OF AMERICA *v.* PETER SEEGER; No. C–152–240

To Ralph R. Roberts, Clerk of the House of Representatives, room P–42, the Capitol, Washington, D.C., Richard Arens, staff director, House Un-American Activities Committee, House Office Building, Washington, D.C.:

You are hereby commanded to appear in the U.S. District Court for the Southern District of New York at the Federal Courthouse, in the city of New York on the 21st day of March 1960 at 10:30 o'clock a.m. to testify in the case of *United States* v. *Peter Seeger* and bring with you the papers, documents, correspondence, transcripts of testimony and reports more fully described on the annexed schedule.

This subpena is issued upon application of the attorney for defendant, Wolf, Popper, Rose, Wolf & Jones, 635 Madison Avenue, New York, N.Y.

HERBERT A. CHARLSON,
Clerk.

CATHERINE D. SALAMONE,
Deputy Clerk.

MARCH 8, 1960.

SCHEDULE ATTACHED TO SUBPENA DUCES TECUM IN THE CASE OF UNITED STATES OF AMERICA AGAINST PETER SEEGER

1. House Resolution 2, 84th Congress, 1st session, January 5, 1955.

2. Rules of the House of Representatives for the 84th Congress.

3. Journal of the House of Representatives of January 13, 1955, and January 20, 1955, indicating the constitution of the Committee on Un-American Activities of the House of Representatives.

4. The minutes of a January 20, 1955, executive session of the Committee on Un-American Activities adopting a resolution empowering and authorizing the chairman to appoint subcommittees composed of three or more members, a majority of whom to constitute a quorum, for the purpose of performing any and all acts which the committee as a whole is authorized to perform.

5. The written minutes, record and report of an organizational meeting of the Committee on Un-American Activities in January 1955 at which a preliminary investigation into Communist infiltration in the field of entertaining in New York was authorized.

6. All transcripts of testimony, memoranda, written statements, reports and any other material in the custody or control of the committee, its clerk, counsel, or staff director, which refers or relates to defendant.

7. Original stenographic minutes or report of any meeting of the committee or any of its subcommittees at which the issuance of a subpena to the defendant to appear before the committee or any of its subcommittees was discussed, considered, or acted upon.

8. Original stenographic minutes of executive session or any other meeting of the committee or any of its subcommittees at which the citation of the defendant for contempt was discussed, considered, or acted upon, and particularly the minutes of an executive session of the committee on June 27, 1956.

9. The original report approved by the committee for presentation to the House of Representatives requesting the citation of defendant for contempt.

10. House Reports 2918, 2919, and 2920 relating to the appearance of this defendant before the subcommittee, and House Reports 634, 635, and 636, including to July 25, 1956, relating to the certification of these reports to the U.S. attorney.

11. All the annual reports of the committee to the House of Representatives covering its activities from and including the year 1938 to and including the year 1956.

12. Transcripts of the testimony before the committee of the following named individuals, which testimony was given on the dates set opposite their names:

Lee J. Cobb, June 2, 1953; Jerome Robbins, May 5, 1953; Carl Foreman, September 24, 1951; Larry Parks, March 21, 1951; Marc Lawrence, April 24, 1951; Sterling Hayden, April 10, 1951; Richard J. Collins, April 12, 1951; Meta Reis Rosenberg, April 13, 1951; Roy M. Brewer, May 17, 1951, and July 12, 1956; Edward Dmytryk, April 25, 1951; David Raskin, September 20, 1951; George Hall, August 17, 1955; Vincent W. Hartnett, July 12, 1956; Paul R. Milton, July 12, 13, 1956; Elizabeth Wilson, September 12, 1951; Frank Tuttle, May 24, 1951; Martin Berkeley, September 19, 1951; Harold J. Ashe, September 17, 1951; Budd Wilson Schulberg, May 23, 1951; Mildred Ashe, September 17, 1951; Leo Townsend, September 18, 1951; Bernice Polifka Fleury, September 24, 1951; George Beck, September 25, 1959; Karl Tunberg, September 25, 1951; Eugene Fleury, September 10, 1951; Eve Ettinger, September 10, 1951; Anne Ray Frank, September 10, 1951; Mendell Morton Krieger, September 11, 1951; Stanley Roberts, May 20, 1952; Isobel Lennart, May 20, 1952; Nicholas Bela, December 14, 1954; Clifford Odets, May 19, 1952; May 20, 1952; Elia Kazan, April 10, 1952; Melvin Levy, January 28, 1952; George Bassman, January 28, 1952; Roy Huggins, September 29, 1952; Allan E. Sloane, January 13, 1954; Abram S. Burrows, November 12, 1952, and March 20, 1951; and Bernard C. Schoenfeld, August 19, 1952.

13. True copies of any letters or other written communications or reports referring to Peter Seeger sent by the committee or its members, staff members, counsel, agents or representatives to Aware, Inc., Vincent Hartnett, Godfrey Schmidt, Ted Kirkpatrick, John Keenan, Counterattack (a publication), or Red Channels (a publication) during the period January 1, 1951, through December 31, 1956.

14. Letters or other written communications referring to Peter Seeger sent by any of the persons or organizations or publications named in paragraph 13 above to the committee, its members, staff members, counsel, agents, or representatives during the period January 1, 1951, through December 31, 1956.

15. True copy of letter dated on or about January 31, 1956, by Frank J. Tavenner, counsel to the committee, to Charles Collingwood, then president of American Federation of Television & Radio Artists, New York.

16. True copies of any and all letters or other written communications or reports sent by the committee, its members, staff members, counsel, agents, or representatives during the period January 1, 1951, through December 31, 1956, to any advertising agencies, radio or television broadcasting systems, sponsors of radio and television programs, theatrical agencies and producers, or their counsel, agents, or representatives, in respect to persons called or to be called for their testimony as to Communist methods or activities in entertainment, or in respect to the employment or nonemployment of persons in the field of entertainment.

17. Any and all letters or other written communications received by the Committee, its members, staff members, counsel, agents or representatives during the period January 1, 1951, through December 31, 1956, from the individuals, agencies and companies and organizations referred to in paragraph 16 above in respect to the subject matters referred to in said paragraph.

U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF NEW YORK—UNITED STATES OF AMERICA *v.* ELLIOTT SULLIVAN, No. C152–238

To Ralph R. Roberts, Clerk of the House of Representatives, Room P 42, The Capitol, Washington, D.C.

Richard Arens, staff director, House Un-American Activities Committee, House Office Building, Washington, D.C.

You are hereby commanded to appear in the U.S. District Court for the Southern District of New York, at the Federal Courthouse, room 318, in the city of New York on the 21st day of March 1960, and bring with you the papers, documents, correspondence, transcripts of testimony (see attached schedule).

This subpena is issued upon the application of the attorney for defendant, David Scribner, 342 Madison Avenue, New York.

MARCH 8, 1960.

HERBERT A. CHARLSON,
Clerk.

CATHERINE B. SALAMONE,
Deputy Clerk.

STATEMENT

1. Transcript of testimony of Lee J. Cobb before House Committee on Un-American Activities (hereafter referred to as HUAC) on June 2, 1953.

2. Transcript of testimony of Jerome Robbins before HUAC on May 5, 1953.

3. Transcript of testimony of Martin Berkeley before HUAC in 1951.

4. Transcript of testimony of Nicholas Bela before HUAC on December 14, 1954.

5. Transcript of testimony, or written statement, or written report of oral statement of "a former Communist" who "identified" Elliott Sullivan "in 1951" as a member of the Communist Party; the material sought be that specifically referred to in the HUAC Annual Report for 1953, House Report No. 1192, 83d Congress, 2d session, at page 51.

6. Transcript of testimony of Elliott Sullivan in executive session before HUAC on

July 29, 1955, which was later released for publication.

7. HUAC annual report for the year 1954.

8. Transcript of testimony of Larry Parks before HUAC in or about April 1951.

9. True copies of any letters or other written communications or reports referring to Elliott Sullivan sent by HUAC or its members, staff members, counsel, agents, or representatives to Aware, Inc., Vincent Hartnett, Godfrey Schmidt, Ted Kirkpatrick, John Keenan, Counterattack (a publication), or Red Channels (a publication) during the period January 1, 1951, through December 31, 1956.

10. Letters or other written communications referring to Elliott Sullivan sent by any of the persons or organizations or publications named in paragraph 9 above to the HUAC, its members, staff members, counsel, agents, or representatives during the period January 1, 1951, through December 31, 1956.

11. True copy of letter dated on or about January 31, 1956, by Frank J. Tavenner, counsel to HUAC, to Charles Collingwood, then president of American Federation of Television and Radio Artists, New York.

12. True copies of any and all letters or other written communications or reports sent by HUAC, its members, staff members, counsel, agents, or representatives during the period January 1, 1951, through December 31, 1956, to any advertising agencies, radio or television broadcasting systems, sponsors of radio and television programs, theatrical agencies and producers, or their counsel, agents, or representatives, in respect to persons called or to be called for their testimony as to Communist methods or activities in entertainment, or in respect to the employment or nonemployment of persons in the field of entertainment.

13. Any and all letters or written communications received by the HUAC, its members, staff members, counsel, agents, or representatives during the period January 1, 1951, through December 31, 1956, from the individuals, agencies and companies and organizations referred to in paragraph 12 above in respect to the subject matters referred to in said paragraph.

14. Original stenographic minutes of executive session or any other meeting of the HUAC or any of its subcommittees at which the citation of defendant for contempt was discussed, considered, or acted upon.

15. Original stenographic minutes of any meeting of the committee or of any of its subcommittees at which the issuance of a subpena to appear before the committee or any of its subcommittees was discussed, considered, or acted upon.

16. All transcripts of testimony, memoranda, written statement, reports, and any other material in the custody or under the custody of the committee, its agents other than already referred to in this subpena duces tecum, which refers or relates to the defendant.

Mr. McCORMACK. Mr. Speaker, I offer a privileged resolution and ask for its immediate consideration.

The Clerk reads as follows:

H. RES 234

Whereas in the case of the *United States of America* v. *Peter Seeger* (criminal case number C.–152–240), pending in the United States District Court for the Southern District of New York, a subpena duces tecum was issued by the said court and addressed to Ralph R. Roberts, Clerk of the House of Representatives, directing him to appear as a witness before said court on the twenty-first day of March 1960, and to bring with him certain and sundry papers in the possession and under the control of the House of Representatives: Therefore be it

Resolved, That by the privileges of this House no evidence of a documentary character under the control and in the possession of the House of Representatives can, by the mandate of process of the ordinary courts of justice, be taken from such control or possession but by its permission; be it further

Resolved, That when it appears by the order of the court or of the judge thereof, or of any legal officer charged with the administration of the orders of such court or judge, that documentary evidence in the possession and under the control of the House is needful for use in any court of justice, or before any judge or such legal officer, for the promotion of justice, this House will take such action thereon as will promote the ends of justice consistently with the privileges and rights of this House; be it further

Resolved, That Ralph R. Roberts, Clerk of the House, be authorized to appear at the place and before the court named in the subpena duces tecum before mentioned, but shall not take with him any papers or documents on file in his office or under his control or in possession or control of the House of Representatives; be it further

Resolved, That when said court determines upon the materiality and the relevancy of the papers and documents called for in the subpena duces tecum, then the said court, through any of its officers or agents, have full permisison to attend with all proper parties to the proceeding and then always at any place under the orders and control of this House and take copies of any documents or papers and the Clerk is authorized to supply certified copies of such documents or papers in possession or control of said Clerk that the court has found to be material and relevant (except that under no circumstances shall any minutes or transcripts of executive sessions of committees, or confidential papers, documents, or files of the House of Representatives, or any evidence of witnesses in respect thereto, be disclosed or copied) and which the court or other proper officer thereof shall desire, so as, however, the possession of said documents and papers by the said Clerk shall not be disturbed, or the same shall not be removed from their place of file or custody under the said Clerk; and be it further

Resolved, That as a respectful answer to the subpena a copy of these resolutions be submitted to the said court.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. McCORMACK. Mr. Speaker, I offer a privileged resolution and ask for its immediate consideration.

The Clerk read as follows:

H. RES. 235

Whereas in the case of the *United States of America* v. *Elliott Sullivan* (criminal case number C152–238), pending in the United States District Court for the Southern District of New York, a subpena duces tecum was issued by the said court and addressed to Ralph R. Roberts, Clerk of the House of Representatives, directing him to appear as a witness before said court on the sixth day of March 1961, and to bring with him certain and sundry papers in the possession and under the control of the House of Representatives: Therefore be it

Resolved, That by the privileges of this House no evidence of a documentary character under the control and in the possession of the House of Representatives can, by the mandate of process of the ordinary courts of justice, be taken from such control or possession but by its permission; be it further

Resolved, That when it appears by the order of the court or of the judge thereof, or of any legal officer charged with the administration of the orders of such court or judge, that documentary evidence in the possession and under the control of the House is needful for use in any court of justice, or before any judge or such legal officer, for the promotion of justice, this House will take such action thereon as will promote the ends of justice consistently with the privileges and rights of this House; be it further

Resolved, That Ralph R. Roberts, Clerk of the House, be authorized to appear at the place and before the court named in the subpena duces tecum before mentioned, but shall not take with him any papers or documents on file in his office or under his control or in possession of the House of Representatives; be it further

Resolved, That when said court determines upon the materiality and the relevancy of the papers and documents called for in the subpena duces tecum, then the said court, through any of its officers or agents, have full permission to attend with all proper parties to the proceeding and then always at any place under the orders and control of this House and take copies of any documents or papers and the Clerk is authorized to supply certified copies of such documents or papers in possession or control of said Clerk that the court has found to be material and relevant (except that under no circumstances shall any minutes or transcripts of executive sessions of committees, or confidential papers, documents, or files of the House of Representatives, or any evidence of witnesses in respect thereto, be disclosed or copied) and which the court or other proper officer thereof shall desire, so as, however, the possession of said documents and papers by the said Clerk shall not be disturbed, or the same shall not be removed from their place of file or custody under the said Clerk; and be it further

Resolved, That as a respectful answer to the subpena a copy of this resolution be submitted to the said court.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. I wish to inquire about this practice. Assuming that I have been subpenaed as a witness in some proceeding that concerns the Federal Government, may I not appear down here without the consent of the House?

Mr. McCORMACK. My understanding is that while Congress is in session a Member must obtain consent of the House.

Mr. HOFFMAN of Michigan. The gentleman means that I must get the consent of the House; that I cannot go down voluntarily?

Mr. McCORMACK. That is my understanding. That is why such resolutions are offered.

Mr. HOFFMAN of Michigan. In years gone by I have often gone down to departments, I have gone down on several occasions, just went down voluntarily. Does the gentleman mean I cannot do that without getting the consent of the House, or permission?

Mr. McCORMACK. The gentleman means while Congress was in session?

Mr. HOFFMAN of Michigan. Yes.

Mr. McCORMACK. I would say that the gentleman unwittingly did something he should not have done. He should have first obtained the permission of the House.

Mr. HOFFMAN of Michigan. I wonder if the gentleman will tell me why, when I could go down without it?

Mr. McCORMACK. There is a document known as the Constitution of the United States that has some relation to it, while the Congress is in session.

Mr. HOFFMAN of Michigan. That says you cannot be arrested.

Mr. McCORMACK. Will the gentleman accept my statement that this has to be done?

Mr. HOFFMAN of Michigan. I very reluctantly accept it because I cannot see why I cannot voluntarily walk down there, testify, and come back. I do not think I violate the rules.

If you think I am taking up too much time, unless the House takes some action, when I am subpenaed I will go down.

Mr. McCORMACK. If the gentleman is subpenaed he should get the consent of the House.

Mr. HOFFMAN of Michigan. If the U.S. attorney calls up and says, "We would like to have you come down," I will comply.

Mr. ROGERS of Colorado. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Colorado.

Mr. ROGERS of Colorado. Suppose the gentleman did go down there and he got into an argument with the judge and he threw the gentleman in jail.

Mr. HOFFMAN of Michigan. No; I am not going to get into an argument with the judge. I practiced law too long for that.

Mr. ROGERS of Colorado. If you do in court what you do around here, you would get into an argument.

Mr. HOFFMAN of Michigan. This is not a court, and you do not have any power over me except perhaps the power to punish me for contempt.

Mr. ROGERS of Colorado. Suppose the court holds you in contempt.

Mr. HOFFMAN of Michigan. I would say "I am a Congressman, you cannot do that."

Mr. ROGERS of Colorado. Suppose he put the gentleman in jail and we had a rollcall up here, where would you be? You would be in jail.

Mr. HOFFMAN of Michigan. I will answer that. I do not believe the country would be very much in danger. I might be called to account in the next election.

Mr. McCORMACK. May I make the observation that I cannot conceive of the gentleman from Michigan going into the courtroom, even voluntarily, if they had a dictatorial judge, a judicial tyrant doing things he should not do, I could not conceive of the gentleman from Michigan subjecting himself to judicial tyranny in case there was a judge who is a judicial tyrant.

Mr. GROSS. If he were a Republican judge you would not have a dictatorial judge.

The resolution was agreed to.

A motion to reconsider was laid on the table.

DISTRICT DAY

The SPEAKER. This is District Day. The Chair recognizes the gentleman from South Carolina.

DISTRICT OF COLUMBIA SALES TAX ACT AND PARKING FACILITY ACT

Mr. McMILLAN. Mr. Speaker, by direction of the House District Committee, I call up H.R. 258, to amend the District of Columbia Sales Tax Act so as to increase the rate of tax imposed on gross receipts from certain sales, and for other purposes, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 125 of the District of Columbia Sales Tax Act (D.C. Code 47–2602) is amended by striking out "2 per centum" and by inserting in lieu thereof "3 per centum".

(b) Subsection (a) of section 127 of such Act (D.C. Code 47–2604(a)) is amended to read as follows:

"(a) On each sale, other than sales of food for human consumption off the premises where such food is sold, and other than sales or charges for rooms, lodgings, or accommodations furnished to transients, such amounts as may be prescribed by the Board of Commissioners of the District of Columbia to carry out the purposes of this section."

SEC. 2. Section 212 of the District of Columbia Use Tax Act (D.C. Code 47–2702) is amended by striking out "2 per centum" and inserting in lieu thereof "3 per centum".

SEC. 3. The amendments made by the first two sections of this Act shall take effect on the first day of the first month which begins more than sixty days after the date of enactment of this Act. From and after the effective date of such amendments, all references in the District of Columbia Use Tax Act to sections 125 and 127 of the District of Columbia Sales Tax Act shall be deemed to be references to such sections 125 and 127, as amended by the first section of this Act.

Amend the title so as to read: "A bill to amend the District of Columbia Sales Tax Act to increase the rate of tax imposed on certain gross receipts, to amend the District of Columbia Motor Vehicle Parking Facility Act of 1942 to transfer certain parking fees and other moneys to the highway fund, and for other purposes."

With the following committee amendments:

On page 2, after line 15, insert the following:

"SEC. 4. Section 7 of the District of Columbia Motor Vehicle Parking Facility Act of 1942 is amended to read as follows:

" 'SEC. 7. All fees and other moneys collected under this Act, including all fees collected pursuant to section 11 of the Act entitled "An Act making appropriations to the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1939, and for other purposes", approved April 4, 1938 (District of Columbia Code, sec. 40–616), and the Act entitled "An Act to authorize the Commissioners of the District of Columbia to provide for the parking of automobiles in the Municipal Center", approved June 6, 1940 (54 Stat. 241), and all moneys derived from the sale or assignment of any property, real or personal, shall be deposited in a special account within the highway fund established in the first section of the Act entitled "An Act to provide for a tax on motor-vehicle fuels sold within the District of Columbia, and for other purposes", approved April 23, 1924, as amended (District of Columbia Code, sec. 47–1901). Moneys deposited in such special account shall be available, first, to defray the expenses of enforcing laws, rules, and regulations relating to the parking of vehicles in the District of Columbia by the Metropolitan Police force of the District of Columbia; second, to defray the expenses of operating parking facilities under this Act; and, third, for the maintenance of highways within the District of Columbia, including, but not limited to, the purchase of highway equipment.'

"SEC. 5. The first sentence of section 8 of the District of Columbia Motor Vehicle Parking Facility Act of 1942 is amended to read as follows: 'The Commissioners shall include in their annual budget such amounts as may be required from the highway fund established in the first section of the Act of April 23, 1924, for the purpose of carrying out the provisions of this Act.'

"SEC. 6. The District of Columbia Motor Vehicle Parking Facility Act of 1942 is amended by renumbering section 10 thereof as section 12 and by inserting immediately following section 9 of the following new sections:

" 'SEC. 10. Notwithstanding any other provision of this Act or of any other law, no person other than an officer or member of the Metropolitan Police force of the District of Columbia, United States Park Police, White House Police, the zoo police, and the United States Capitol Police shall be authorized to enforce any law, rule, or regulation relating to the parking of vehicles in the District of Columbia.

" 'SEC. 11. Notwithstanding any provision of this Act, no real property shall be acquired under the authority of this Act for use as a parking facility on or after the date of enactment of this section, and the Commissioners and the agency are authorized to operate and maintain only those parking facilities which have been established prior to the date of enactment of this section. No such existing parking facility shall be expanded or otherwise altered except to the extent as may be necessary to permit its continued operation in the same manner as it was being operated immediately before the date of enactment of this section.'

"SEC. 7. All fees and other moneys which have been deposited in the special account of the Treasury of the United States before the date of enactment of this Act to the credit of the District of Columbia in accordance with section 7 of the District of Columbia Motor Vehicle Parking Facility Act of 1942 are hereby transferred to the special account established in the highway fund by the amendment made to section 7 of such Motor Vehicle Parking Act of 1942 by section 4 of this Act, and such funds shall be available for the purposes provided in such amendment to such section 7.

"SEC. 8. Sections 4, 5, 6, and 7 of this Act shall take effect July 1, 1961."

The committee amendment was agreed to.

Mr. McMILLAN. Mr. Speaker, I offer a committee amendment.

The Clerk read as follows:

Committee amendment offered by Mr. McMILLAN: On page 2, lines 8 through 16, strike section 3 and insert in lieu thereof the following:

"SEC. 3. The amendments made by the first two sections of this Act shall take effect on the first day of the first month which begins on or after the thirtieth day after the date of enactment of this Act. From and after the effective date of such amendments, all references in the District of Columbia Use Tax Act to sections 125 and 127 of the District of Columbia Sales Tax Act shall be

deemed to be references to such sections 125 and 127 as amended by the first section of this Act."

Mr. McMILLAN. Mr. Speaker, I move to strike out the last word.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Iowa.

Mr. GROSS. All I wanted was some kind of an explanation of what this bill purports to be.

Mr. McMILLAN. That is why I move to strike out the last word.

The purpose of this proposed legislation is to increase the sales tax in the District of Columbia from 2 to 3 cents. It seems that the District of Columbia is very much in need of additional revenue at this time. Our committee came to the conclusion that a 1-cent additional sales tax would be the most painless tax that our committee could place upon the people of the District of Columbia at the present time.

Mr. Speaker, I yield to the gentleman from New Jersey [Mr. AUCHINCLOSS].

Mr. AUCHINCLOSS. Mr. Speaker, this legislation was passed unanimously by the committee, I think with some reluctance, because I do not think anyone wants to increase taxes anywhere. But, it is necessary, and it was done with the approval of the Commissioners.

I do feel, however, Mr. Speaker, that a study of the operations of the District government is very much in order to see if there is not some way that we can eliminate waste and extravagance, and promote a little more efficiency. Consequently I am preparing now a resolution which I will submit in due time to the District Committee which would empower the President to appoint a commission to study the District government and make such recommendations as might be to its advantage in the hope that greater efficiency may ensue in the operations of the government—you might even call it a small Hoover Commission—to look over the situation. I hope this legislation will pass unanimously, because it is necessary.

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent that the majority and minority members of the committee may extend their remarks at this point explaining the proposed legislation.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RHODES of Arizona. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Arizona.

Mr. RHODES of Arizona. I would like to ask the distinguished chairman of the committee how much revenue this tax will raise.

Mr. McMILLAN. During the last fiscal year the 2-cent sales tax derived $22.5 million. The Commissioners think that this additional 1 cent will provide $9 million additional revenues; that is, without increasing the tax on food.

Mr. RHODES of Arizona. That will be in the calendar year?

Mr. McMILLAN. Yes; that is right.

Mr. RHODES of Arizona. So for the rest of the fiscal year you would assume that something in the neighborhood of $4 million to $5 million will be raised?

Mr. McMILLAN. I think it will be a little more than that; it will be around $7 or $8 million.

Mr. RHODES of Arizona. If the gentleman will yield further, will this take care of the expenses of the District government which were projected over and above the regular budget for this fiscal year?

Mr. McMILLAN. No, it will not take care of all the Commissioners are asking for, but we hope they can get by with this amount.

Mr. RHODES of Arizona. It will not be necessary, then, in the opinion of the chairman of the committee, to raise the Federal payment to the District of Columbia for the remainder of the fiscal year?

Mr. McMILLAN. This increase is desirable to meet present and proposed expenses here.

Mr. RHODES of Arizona. Will it be necessary, to balance the budget of the District of Columbia, to raise the Federal payment?

Mr. McMILLAN. If they go ahead with all the projects they have advanced; yes, sir.

Mr. RHODES of Arizona. All of the capital improvement projects.

Mr. McMILLAN. Yes.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Virginia.

Mr. BROYHILL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. BROYHILL. Mr. Speaker, I favor the increase in the rate of the District of Columbia sales tax from 2 cents to 3 cents per dollar, as proposed in H.R. 258. This will place all items subject to the sales tax at the 3-cent level except for groceries, on which the sales tax will remain at the present rate of 1 cent per dollar.

It is estimated that this increase will result in approximately $9 million of additional revenue per year for the District, and it is my conviction that this amount of money could not be obtained by any other form of taxation which would be as fair and equitable as the sales tax increase, nor as simple and inexpensive to administer and collect.

I wish particularly, however, to address myself to section 4 of H.R. 258, which provides that all moneys collected by the District of Columbia Motor Vehicle Parking Agency for the use of public parking facilities in the District shall be deposited in a special account in the District of Columbia highway fund. This includes not only such moneys collected after the date of enactment of this act, but also all moneys now accumulated by the Agency, which presently amount to some $3,100,000.

When parking meters were first authorized for use in the District of Columbia in 1938, by act of Congress, the moneys collected from the meters were placed in the District of Columbia general fund, as a part of the District's revenues. This policy was followed until the District of Columbia Motor Vehicle Parking Facility Act was enacted in 1942, creating the District of Columbia Motor Vehicle Parking Agency.

This act authorized the District of Columbia Board of Commissioners, through this Agency, to acquire, create, and operate offstreet public parking facilities under public regulation. Further, it was stipulated that all moneys collected by this Agency for the use of public parking facilities should thenceforth be used solely for the purposes of the Motor Vehicle Parking Facility Act. Thus, these parking meter and public parking lot collections have been earmarked since 1942 to be used exclusively for the acquiring and operation of additional offstreet public parking facilities. The reasoning behind this decision at that time is apparently expressed in a statement in the preface to the act of 1942, which says that adequate offstreet parking facilities have not been provided by private enterprise.

However correct this premise may have been in 1942, I am convinced that it no longer is true, and that private enterprise is now providing completely adequate offstreet parking facilities in the District of Columbia, and will continue to do so in the future as the need for such facilities may increase.

It is a matter of record that I have consistently favored the encouragement of private enterprise as opposed to government participation in business wherever this is feasible.

Under these circumstances, there appears to me no reason why these funds, now aggregating some $3,100,000 and estimated to reach approximately $4 million by the end of fiscal year 1962, should lie idle in the account of the Motor Vehicle Parking Agency while the motoring public, who have paid out this money, are forced to tolerate inadequate street facilities such as substandard paving and an ineffective program of snow removal. It is estimated that the District needs to spend approximately $1½ million this year to provide modern, effective equipment for snow removal; and what could be a more appropriate source for this badly needed money than the parking meter collections from the automobile operators who daily use the city's streets? It seems completely appropriate to me that this very substantial financial contribution from the motoring public who utilize the District's street facilities should be applied toward the adequate maintenance of those streets.

In view of these facts, I am pleased indeed to lend my support to the passage of H.R. 258.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Iowa.

Mr. GROSS. I understand that there are exemptions under the present 2 percent tax; is that correct?

Mr. McMILLAN. That is correct.

Mr. GROSS. And those exemptions are retained as to food and certain other items?

Mr. McMILLAN. They will not pay additional taxes on food, or raise the excise tax on automobiles.

Mr. GROSS. Will the gentleman explain briefly the meaning of section 7 of the bill with respect to vehicle parking?

Mr. McMILLAN. In 1942 I sponsored a bill creating a Parking Fund Commission. The purpose of creating that commission was to build some public parking lots in the downtown area of the District of Columbia. At that time we had very little private parking facilities in the downtown area. During the 18 years that have elapsed we have built no public parking facilities in downtown Washington. We have created only three fringe parking lots. We now have millions and millions of dollars invested by private enterprise for parking space in the downtown area. My committee was of the opinion that we should use this fund on the streets for some other needed projects. Since private funds seem to have solved the parking problem in downtown Washington.

Mr. GROSS. This simply releases the money for use on the streets of the District of Columbia?

Mr. McMILLAN. That is correct.

Mr. GROSS. I thank the gentleman.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman.

Mr. HAYS. This subject has been touched on briefly, but I would like to have a little more said about it. I keep reading in the papers that the Federal Government does not pay its fair share of the expenses of the District of Columbia. Is that factually correct?

Mr. McMILLAN. That is a matter of opinion. I have always thought the Federal Government did pretty well by the District of Columbia. There are many people here who think the Federal Government should pay half the expenses of the District of Columbia and if it were not for the fact that the Federal Government provides jobs for a multi-billion-dollar payroll in the District I would be more in favor of a $50 million Federal payment.

Mr. HAYS. Is there not some way we can determine how much property the Federal Government owns, or has taken off the tax rolls, and arrive at some equitable arrangement?

Mr. McMILLAN. We have those figures. However, in the gentleman's State and in my State the Federal Government pays no tax on Federal property and we get no Federal payment to assist the State government.

Mr. HAYS. This is the Capital of the United States. I suppose the people in my district do not want to pay taxes any more than does anybody else, but I think they would be willing for the Federal Government to pay whatever is right to have this city run in the fashion in which it should be run as the Capital of the United States.

Mr. McMILLAN. I agree with the gentleman.

Mr. HAYS. And make whatever capital improvements are necessary. And if a certain amount has been authorized, I should hope it will be appropriated.

Mr. McMILLAN. I agree with the gentleman. I think the amount authorized is $32 million and it should be appropriated. If the Congress wants to authorize more than that, action can be taken later.

Mr. JONES of Missouri. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Missouri.

Mr. JONES of Missouri. I did not intend to get into this colloquy, but the gentleman from Ohio [Mr. HAYS] brought up a question that has been a touchy one with me for a long time. I expect the people of the District of Columbia pay the same proportionate share of taxes that the people do in the district in Missouri that I represent. And until they do pay that I am going to object to any increase in the Federal contribution toward the expenses of this Government.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Ohio.

Mr. HAYS. I have no figures before me, but I am willing to make the gentleman a small wager that the real estate taxes in the District of Columbia are three times the average of the real estate taxes in the gentleman's district.

Mr. JONES of Missouri. I will accept that wager in any amount the gentleman wants to name, because I presented figures on the floor of this House showing that the district in which I live pays as much school taxes as the total of taxes in the District of Columbia.

Mr. HARSHA. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Nebraska, a valuable member of the District Committee.

Mr. HARSHA. I am sorry I was not here to hear the beginning of the gentleman's statement, but as to section 7, was there any assurance given that if this money is transferred from this trust fund to the highway fund, it will be used to repair some of the streets and roads in the District?

Mr. McMILLAN. That item is earmarked specifically for street repair in the bill.

Mr. HARSHA. I know that some of them are in very bad shape. I was nearly lost in one this morning, particularly on Ordway Street.

I intend to check a little bit further to see whether or not these repairs are made.

Mr. McMILLAN. Bad streets are one of the reasons that prompted me to introduce this legislation transferring funds paid by individual motorists.

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: A bill to amend the District of Columbia Sales Tax Act to increase the rate of tax imposed on certain gross receipts, to amend the District of Columbia Motor Vehicle Parking Facility Act of 1942 to transfer certain parking fees and other moneys to the highway fund, and for other purposes.

A motion to reconsider was laid on the table.

Mr. McMILLAN. Mr. Speaker, H.R. 258, which is under consideration today, is exactly the same tax bill that the House District Committee reported unanimously on June 25, 1960, and the House passed unanimously on June 27, 1960.

The bill which passed the House last year was reported by the Senate District Committee; however, it was too late in the session for the Senate to take final action on same before Congress adjourned. The House District Committee held full hearings and unanimously reported H.R. 258 to the floor of the House for consideration with an amendment to transfer the parking meter funds to the District Highway Department.

During 1942, I sponsored legislation creating the present Parking Commission here in the District of Columbia. The purpose for creating this Commission was to see that the funds collected from parking meters were used to build public parking space in the downtown area of Washington. Eighteen years have passed since we enacted this piece of legislation creating the Parking Commission and we only have three or four fringe parking lots at the present time built from parking meter funds.

When we created the Parking Commission in 1942, we only had two privately owned parking facilities in the immediate downtown area. Since that date private industry has invested millions and millions of dollars in private parking facilities and from the best information I have been able to secure, it seems that there is sufficient private parking space available in the downtown area at the present time.

We have more than $3 million in the parking fund at the present time and since the District seems to be in dire need of additional funds, the committee is of the opinion that the parking funds should be earmarked for repairing and maintaining the streets here in Washington so that the motorists, who pay into the parking meters enough dimes to create a $3 million fund, will receive some return from this money.

The present 2 cent sales tax has collected $22,500,000 during the fiscal year 1960 and it is estimated that the District will collect $9 million from the proposed 1 cent additional sales tax even with the exemption of food for home consumption.

We all realize that from first glance at the tax structure here in the District of Columbia, the average person would think that the property owners were not paying their pro rata share of taxes; however, since property is levied at a higher value for tax purposes here in the District of Columbia than in the average State, the committee feels that

the most equitable tax that we could impose on the people in the District of Columbia at the present time would be the 1 cent additional sales tax.

GREEK INDEPENDENCE DAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, all peoples celebrate their independence day, and each nation's independence day has a special significance to that nation, for usually that day in the history of each nation is marked as its national holiday. The Greek Independence Day of this year, which occurred on March 25, means and signifies all that, but to the Greeks in Greece and everywhere else it means something more. It is of more significance because they are conscious that the Greeks were the first people who conceived and advocated the idea of independence, and then they had the misfortune to be deprived of it for more than 2,000 years. That is why the rebirth of free and independent Greece was acclaimed in all parts of the world 140 years ago. Greeks suffering under alien rulers, and their determination to work and fight for their independence during all that time, earned them the admiration and affection of so many millions in many lands that they all were rightly overjoyed in seeing the rise of modern Greece as a free and sovereign state.

Yes, the Greek people were not free for nearly 2,000 years, but their lot under the Ottoman Turks during the four centuries before their independence was worse than any they had known in their long and eventful history. The Turks never treated the Greeks as citizens, but they were regarded as mere subservient subjects to be employed and exploited. To the independent-minded, individualistic, and freedom-loving Greeks this was an unbearable stigma, something unthinkable to endure. But they endured it for nearly 400 years because all their attempts at rebellion ended in failure. They themselves alone could not free themselves from the tyranny of the sultans. Gallant and courageous as they have always been in wars, they were not able physically to cope with the massive might of the powerful Ottoman Empire. Fortunately, however, the Greek cause has always had many friends abroad; thus, people in other lands and foreign governments came to the aid of Greece and guaranteed the successful culmination of their war of independence. That was one of the finest and noblest acts that the governments of certain powers in Europe performed in that fateful year 1827. More than 6 years after the Greek people had unfurled the flag of revolt against their oppressors, Greek independence was attained and the people of Greece set free from the sultan's bondage.

Today on the celebration of the 140th Greek Independence Day we again find the Greek people on the ramparts of freedom, ready to fight for their and for the free world's independence. We salute them as faithful and loyal allies in this common struggle—on their independence day.

HAZARDS OF IONIZING RADIATION

Mr. ASHLEY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. ASHLEY. Mr. Speaker, in recent years I have become very concerned about the functioning and organization of the Nation's program for protection against the hazards of ionizing radiation, for I think the program has been seriously impaired by overlapping and confused laws, directives, and press statements, and also by poorly organized and perhaps overly weak administration.

Originally the basic functioning of the radiation control program came under the aegis of the Atomic Energy Commission. Under the Atomic Energy Act of 1946 the AEC was given a threefold responsibility: Promoting the peaceful uses of atomic energy, which meant finding new ways to employ atomic energy as well as encouraging the construction of reactors and atomic devices for medical and other uses; operation of the nuclear facilities owned by the Government, such as the Oak Ridge National Laboratory; and regulation of the basic sources of ionizing radiation, which are atomic ores or source material, special nuclear material—fissionable material used to power nuclear reactors—and by-products made in nuclear reactors.

Because the Atomic Energy Commission over the years has been subjected to a great deal of criticism and public mistrust, this original jurisdiction, which would appear to cover the entire area of radiation hazards, has been whittled down and various attempts have been made to cut it down still further. In 1959, when the Commission became a center of controversy because of the threat of strontium 90 in milk and wheat, Congress enacted a law which permitted the Commission to share some of its responsibilities with the States, and at the same time President Eisenhower issued an Executive order and a series of press statements and letters which attempted to reorganize and clarify the functioning of the various departments and agencies of Government involved in the radiation control program. The gist of these documents was that a Federal Radiation Council was established—subsequently made statutory—which was to "advise the President with respect to the development by Government agencies of criteria for the protection of humans against ionizing radiation." At the same time, the President issued press releases which gave the Atomic Energy Commission the primary responsibility for guiding and assisting the States with respect to contamination from sources not controlled by the Commission, for example, X-rays and similar medical and natural sources.

The result of this tangled web of regulation, Mr. Speaker, is that the Department of Health, Education, and Welfare and the Atomic Energy Commission are in a complete maze of interlocking and conflicting claims of jurisdiction, with the public having no idea of who is responsible for what. The confusion is so great that when legislation was introduced last session to give HEW's Public Health Service the primary responsibility for the protection of the public health from the dangers of radiation, HEW opposed the legislation on the basis that responsibility was already vested in that Department. The Atomic Energy Commission also opposed the bill because they said it would give to HEW all the AEC's authority. When the Federal Radiation Council—a part-time nontechnical body composed of several Cabinet members and a staff of only three persons—is added to this already confused hodgepodge, the situation becomes completely chaotic. For the safety of the public, some reorganization and clarification must be made.

At the present time, Mr. Speaker, my feeling is that two major changes are necessary in order to guarantee consistent and careful control over the hazards of radiation. First, the Federal Radiation Council should be strengthened and reorganized to insure its independence and full-time devotion to the problems of safe levels of radiation and experts from the scientific community should be added to its permanent staff. Secondly, the regulatory functions now performed by the Atomic Energy Commission should be placed with an agency or body which is independent of the Commission. When one agency is charged with the dual function of promoting the use of atomic energy and safeguarding the public against its dangers, some conflict is inevitable, and to the extent that the Commission may sometimes be tempted to subordinate the interests of safety to the interests of promotion, the public is endangered.

Mr. Speaker, I very much hope that hearings on this vitally important matter will be scheduled promptly so that legislation can be shaped and brought to the Congress during the present session. The health of our country for generations to come may well be at stake.

COOK COUNTY BAR ASSOCIATION HONORS CONGRESSMAN DAWSON

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'HARA of Illinois. Mr. Speaker, in 1914, only 3 years short of half a century ago, the Cook County Bar Association was organized by Edward H. Wright and a distinguished group of Negro lawyers then practicing in the courts of Chicago, Cook County, and Illinois.

Edward B. Toles is the president for 1961 of this old and honored associa-

tion. I am happy and proud that not only President Toles but as well Vice Presidents James D. Crosson and Russell R. De Bow and four members of the board of directors are constituents of mine in the great Second District of Illinois. The directors who live in the Second District are Theodore F. Crawley, Judge Sidney A. Jones, John W. Rogers, and Frank Anglin, Jr.

At the 47th annual installation dinner the award of merit in the form of a gavel was given Congressman Dawson and Judges Mollison, Richardson, and Moore. I am extending my remarks to include biographical sketches of the four recipients of the award of merit and also excerpts from the Cook County Bar Association News on the advancement of the Negro in the judicial and other public offices. It is interesting to note, in this latter connection, that as stated in the CBA News on the authority of the Chicago Tribune of March 12, 1875, the first Negro elected to public office in the North was John Jones, who was elected Cook County commissioner in 1871.

The material referred to follows:

COOK COUNTY BAR ASSOCIATION NEWS

WILLIAM L. DAWSON, Congressman: Born Albany, Ga., April 26, 1886. Son of Levi and Rebecca (Kendrick) D.; educated, Fisk University, Nashville, Tenn. 1909 A.B. magna cum laude. Studied law Chicago Kent College of Law and Northwestern University School of Law; married Nellie W. Brown, December 20, 1922; children, William L. Jr., Barbara Ann. Admitted to Illinois bar 1920 and since practiced in Chicago. Elected alderman 2d ward Chicago 1933. Appointed vice chairman Democratic Committee. U.S. Member 78th to 87th Congress from 1st Illinois District. Chairman House Committee on Executive Expenditures since January 1949. Served as first lieutenant AEF U.S. Army 1917–19. Member American Legion, Disabled American Veterans, Alpha Phi Alpha, Masons (32d degree), Elks.

Irvin Charles Mollison, judge U.S. Customs Court: Born Vicksburg, Miss., December 24, 1898. Son of Attorney Willis Elbert and Ida (Welbourne) M.; educated at Tougaloo Academy, Oberlin, Ohio 1916–17. Ph. B. University of Chicago 1920, J.D. 1923. Phi Beta Kappa. Married August 26, 1930, Alice Longfellow Rucker of Atlanta, Ga. Admitted to Illinois bar 1923. Member board of directors Chicago Public Library 1938–44. Member Chicago Board of Education 1944–45. Appointed judge U.S. Customs Court November 3, 1945, by President Harry S. Truman. Member ABA, AJS, NBA, Federal bar; American Political Science Association, American Academy of Political and Social Science, Academy of Political Science, Legal Aid Society (New York), American Society of International Law, Chicago Bar Association, Cook County Bar Association. Served SATC University of Chicago 1918. Protestant.

Scovel Richardson, judge, U.S. Customs Court: Born Nashville, Tenn., February 4, 1912. Son of M. Scovel and Capitolo W. (Hawkins) R.; educated at University of Illinois, A.B. 1934; A.M. 1936; LL.B., Howard University, 1937. Married Inez Williston on July 3, 1937. Children, Frances Elaine, Alice Inez, and Mary Louise and Marjorie Linda (twins). Admitted to Illinois bar 1938, Missouri bar 1945, U.S. Supreme Court bar 1944. Private practice with Lawrence & Richardson, Chicago 1938–39. Associate professor of law Lincoln University, St. Louis, Mo., 1939–43. Dean and professor of law, 1944–58. Senior attorney, OPA, Washington, 1943–44. Member U.S. Parole Board, Washington, 1953–54; Chairman, 1954–57. Appointed judge, U.S. Customs Court, 1957, by President Eisenhower. Received citation Urban League, St. Louis, 1953. Member American, National, Missouri, St. Louis Bar Associations, American Law Institute, American Judicature Society, National Probation and Parole Associations, Lawyers Association, St. Louis, Kappa Alpha Psi, Republican Executive Association, chairman of national committee, August–October 1948. Knights of Pythias, past supreme chancellor. Presbyterian.

Herman Emmons Moore, retired judge, U.S. District Court, Virgin Islands: Born August 3, 1893, Jackson, Miss. Son of Edward Willis and Beatrice (Walker) M. Educated Howard University, A.B., 1914; LL.B., 1917; Boston University, 1919. Married September 5, 1923, Marie Johnson. Admitted Massachusetts bar, 1919. Practiced Boston, 1919–21. Chicago, Ill, 1921–34. Assistant commerce commissioner, Illinois Commerce Commission, 1934–39. Appointed judge, U.S. District Court, Virgin Islands District, 1939, by President Roosevelt. He was reappointed by President Truman and retired in 1957. Director, National Association for the Advancement of Colored People, 1930–34. Chicago Urban League, 1928. Democrat, member Cook County Bar Association; president, 1930–32. Alpha Phi Alpha. Methodist. Address, St. Thomas, V.I.

The House Committee on Government Operations is chaired by Congressman DAWSON, first Negro chairman of a House committee. This committee is one of the most important committees in the U.S. House of Representatives. Excerpts from an article in the January 1960 issue of the Chicago Bar Record published by the Chicago Bar Association, written by Donald H. Dalton, Esq., show the tremendous importance of this powerful committee:

"The legislative jurisdiction of this committee has a wide and broad range. It includes all matters relating to budgeting and accounting, measures other than appropriations, and all matters relating to reorganizations in the executive branch of the Government. In addition, property disposals and matters relating to Federal property and administrative services are referred to the committee."—Hon. ELIZABETH KEE, CONGRESSIONAL RECORD, volume 105, part 15, page 19985.

The committee has saved the Government huge sums of money. In its latest interim report, in the CONGRESSIONAL RECORD of October 2, 1959, one-time savings of $109,228,000 are listed, and annual savings of $105,495,500 are attributable to current activities of the committee. If the so-called annual savings are considered on a 10-year basis, the total would be well over $1 billion.

Under Congressman DAWSON, the committee has established five regular subcommittees which cover the entire range of Federal activities. The committee also has the duty of receiving and examining all reports of the Comptroller General of the United States and of submitting recommendations to the House with respect to those reports, of studying the operation of the Government agencies at all levels with a view to determine their economy and efficiency and of studying intergovernmental relations between the United States and the States and municipalities and between the United States and international organizations. The committee report shows that acting under this broad authority the committee has examined into every niche and cranny of Federal operations. As a matter of fact, a great deal of the committee's work is done on a more or less informal basis in working out problems with Federal agencies. The smaller percentage of its work is embodied in the 12 reports it issued formally in the first session of the 86th Congress and in the 14 legislative measures it reported to the House floor.

The committee's September 1959 report on the organization and management of missile programs presents for the first time in a public document a comprehensive and systematic account of the major missile programs in the United States. It examines the Department of Defense agencies and organizations for top-level direction of the missile program, the field agencies and operations of the three military departments in this area, and procurement and management methods. It gives particular attention to the background of the Air Force program and of the rule of two private advisory firms as technical managers of the programs.

The committee also issued a report on civil defense in Western Europe and in the Soviet Union in April 1959. This report, another first, brings together a systematic account of the civil defense activities of eight NATO allies (Great Britain, France, Germany, Denmark, Norway, the Netherlands, Belgium, and Italy), two neutrals (Sweden and Switzerland), and the Soviet Union. The report also discusses the strategic implications of civil defense, including questions of deterrent capabilities, survival after attack, and the considerable effect of the civil defense measures which have been undertaken in the Soviet Union.

In the field of foreign operations, the committee issued a report in June on U.S. aid operations in Laos. The report uncovered inflation and profiteering following U.S. aid and considered that the Laos aid program was inadequate in effectiveness, scope, and, in fact, a number of demonstrated instances were tainted with corruption.

NEGRO JUDGES TOTAL 54

All Negro judges in the United States number only 54 of the more than 7,000 judges in Federal and State judiciaries. U.S. Federal, 4; New York, 15; California, 6; Illinois, 4; Pennsylvania, 4; Michigan, 3; Ohio, 3; Washington, D.C., 2; Maryland, 2; Missouri, 2; Massachusetts, 2; New Jersey, 2; Washington, 1; Indiana, 1; Connecticut, 1; Florida, 1; and Iowa, 1.

In New York 15 judicial salaries total $342,500 annually. In Illinois four judicial salaries total $88,500 annually.

In New York nine judges are elected for 14 year and 10 year terms, respectively.

Supreme court: Appellate Division Judge Harold A. Stevens, $34,500, 1969.

Court of general sessions: Judge Thomas Dickens, $34,500, 1970.

City court: Judge Francis E. Rivers, $25,000, 1963. Judge Darwin W. Telesford, $25,000, 1969.

Municipal court: Judge Amos E. Bowman, $19,000, 1970. Judge Lewis S. Flagg, $19,000, 1963. Judge Oliver D. Williams, $19,000, 1966. Judge Franklin W. Morton, $19,000, 1968. Judge Harrison S. Jackson, $19,000, 1970.

Judges appointed by the mayor of the city of New York for 10-year terms are:

Domestic relations court: Judge Jane M. Bolin, $21,500, 1969. Judge Myles A. Paige, $21,500, 1968. Judge Edward R. Dudley, 1965, recently appointed borough president of Manhattan.

City magistrate courts: Judge Kenneth M. Phipps, $18,000, 1966. Judge Walter E. Gladwin, $18,000, 1967. Judge Maurice W. Gray, $18,000, 1970.

In Illinois four CCBA judges are elected for 6 years. Two superior court judges elected by Cook County at $25,500 and two municipal court judges elected by the city of Chicago at $19,000 annually. They are:

Superior court of Cook County: Judge Fred W. Slater, 1965. Judge James B. Parsons, 1963.

Municipal court of Chicago: Judge Henry C. Ferguson, 1962. Judge Sidney A. Jones, Jr., 1966.

In 1960 CCBA members elected or appointed to Federal public office are:

U.S. House of Representatives: WILLIAM L. DAWSON, Congressman, second ward committeeman.

U.S. Federal judges: Judge Irvin C. Mollison, U.S. Customs Court. Judge Herman E. Moore, retired, U.S. District Court, Virgin Islands.

House Committee on Government Operations: Elmer E. Henderson, assistant attorney.

President's Committee on Employment: Archibald J. Carey, Jr., chairman.

U.S. district assistant attorneys: James B. Parsons (resigned), James D. Montgomery (resigned).

Internal Revenue Service assistant attorneys: Charles E. Lomax, James E. Caldwell, and Michael Lowe.

National Labor Relations Board: Assistant Attorney Norbett Rayford.

Assistant to Congressman BARRATT O'HARA: Russell R. DeBow.

Seven new Negro State judges were elected and appointed in Illinois, New Jersey, California, and New York in 1960. In New Jersey Gov. Robert B. Meyner appointed Judge Roger M. Yancey as the first Negro judge in the history of New Jersey. He was recently upgraded from the superior court of Newark by Governor Meyner to serve as presiding judge of the Essex County court. In December 1960 Governor Meyner appointed assistant prosecutor for Camden County Edward A. Reid as judge of the new juvenile and domestic relations court of Camden County. Judge Reid, 58, is the second Negro judge in New Jersey history.

In California, Gov. Edmund G. Brown appointed Judge John D. Bussey to the municipal court in San Francisco, Calif. He was recently named as presiding judge of the municipal court of San Francisco. Judge Lionel J. Wilson, 45, was appointed to the municipal court bench in Oakland-Piedmont by Governor Brown. This brings the number of judges to six in California. Judges Edwin Jefferson and Bernard Jefferson, circuit court, Judges David Williams and Thomas L. Griffith, municipal court, Los Angeles, Calif.

In Pennsylvania, Judge Juanita Kidd Stoute became the first Negro woman elected a judge in U.S. history as judge of the municipal court, Philadelphia. She succeeds to the vacancy created by the death of the first Negro judge in Philadelphia, Judge Herbert Millen. Judge Raymond Pace Alexander was elected to the court of common pleas. Judge Theodore Spaulding and U.S. Judge William H. Hastie of the Third Circuit Court of Appeals brings the total number of judges in Philadelphia to 4.

Mr. O'HARA of Illinois. In New York with 15 Negro judges, Judge Samuel Pierce, who had been appointed judge of the court of special sessions, was defeated by a white sitting judge by a very narrow margin in the Democratic landslide in Harlem. Judge Harrison S. Jackson was elected to the 10th municipal court district of New York for a 10-year term, defeating Judge Herman C. Stoute. Judge Amos E. Bowman was elected to a 10-year term after a temporary appointment by Mayor Robert Wagner early last year.

In Illinois Judge James B. Parsons was elected to the superior court of Cook County to fill the vacancy created by the death of Judge Grover C. Niemeyer to become the second Negro judge on the superior court. Judge Fred Slater was elected in 1959 to become the first Negro superior court judge. Judge Sidney A. Jones, Jr., was elected to a 6-year term on the municipal court of Chicago to succeed Judge Fred Slater; Judge Henry C. Ferguson of the municipal court brings the total number of Illinois Negro judges to four, the highest number in Illinois history.

In Massachusetts Judge Elwood S. McKinney, chief secretary to Gov. Foster Furcolo, was confirmed as judge of Roxbury district court, Boston.

OPPOSITION TO THE BACK-DOOR SPENDING APPROACH OF PRESIDENT KENNEDY'S FOREIGN AID PROPOSAL

Mr. PELLY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. PELLY. Mr. Speaker, I want to speak briefly regarding the proposal of President Kennedy for a 5-year $7.3 billion new foreign aid program. As my colleagues are aware, this plan calls for direct borrowing from the Federal Treasury without any annual review or approval of the House Committee on Appropriations.

This back-door provision in the Kennedy administration request will be welcomed, of course, by opponents of foreign aid. Here is a natural situation for an organized coalition between them and those who strongly oppose expenditures which bypass the appropriations procedure.

Mr. Speaker, I have indicated to the distinguished chairman of the Committee on Foreign Affairs that many of us who constitute a nonpartisan anti-back-door spending group will vigorously fight any bill that authorizes financing of a program by public debt transaction. Indeed, Mr. Speaker, I predict the defeat of any such type of foreign aid legislation and that would be all right with me, but actually consideration of each issue on its own merits is a more responsible way to legislate.

I am confident an anti-back-door spending resolution such as recently was bottled up by the Committee on Rules would pass on its own merit if it could be brought to the floor.

Pending such determination, those of us who favor such a resolution must meet the issue as best we can. In this connection, the foreign aid authorization would make a prime target. If necessary, it will be made such a target.

However, first I intend to express my views against financing outside of the appropriations procedure to the Committee on Foreign Affairs. Afterward, and if necessary, the fight I am sure will be continued on this floor.

PROVIDENCE COLLEGE

Mr. ST. GERMAIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. ST. GERMAIN. Mr. Speaker, it is with a great deal of pride and satisfaction that I rise to pay tribute to my alma mater, Providence College, which on Saturday, March 21, 1961, won the National Invitation Basketball Tournament championship.

At a time when so much stress is being placed upon the quality of our educational system, pro and con, it is indeed encouraging to witness the marvelous work being done by one of our smallest colleges in developing both the minds and physical fitness of her young men.

Reverend Father Slavin, president of Providence College, is very highly regarded in educational circles, and has been unceasing in his efforts to establish and maintain Providence College as a leader in liberal arts education.

The emphasis is on intellectual development, but Saturday's performance by the basketball team is ample proof that good intellectual training carries over to athletics.

Anyone who saw, or read about, the tournament games could not help but be impressed by the splendid physical fitness, courage, and teamwork displayed by the Providence College aggregation.

Their performance on the basketball court is a tribute to their coach, Joe Mullaney, and their instructors, and should make us happy in the realization that those who are to follow us are being so well trained.

Their fine spirit of teamwork when the going was tough should be an inspiration to all of us.

Their heartbreaking defeat of last year provided the incentive leading to this year's great victory.

Well done, Providence College.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. ST. GERMAIN. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. I am very happy to join with my friend from Rhode Island in congratulating Providence College on the great victory that its basketball team had in winning the National Invitation Tournament.

Providence College has a student body of 2,100 students. Father Slavin, the president of Providence College is a very close and dear and valued friend of both Mrs. McCormack and myself, and he comes from my congressional district. I congratulate Father Slavin as president of Providence College and by so doing, I congratulate also the other fathers and lay members of the faculty, the student body and, particularly, the members of the basketball team which in winning this national championship brings such great credit and glory to their college. This victory shows what a small college can do when they have the spirit that they showed in the National Invitational Tournament that took place last week. I join my friend, the gentleman from Rhode Island [Mr. ST. GERMAIN] in expressing my pleasure at this time because Providence College has conferred an honorary degree upon me. I might also point out, Mr. Speaker, that the team which finished third, Holy Cross College, is also to be congratulated and I am very happy that Holy Cross

finished third because that college also has conferred upon me an honorary degree.

The SPEAKER. The time of the gentleman from Rhode Island has expired.

Mr. ST. GERMAIN. Mr. Speaker, I ask unanimous consent to proceed for 1 additional minute.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. ST. GERMAIN. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Speaker, I join my colleague, the gentleman from Rhode Island in complimenting the victorious Providence College team. This is a great basketball team. It comes from a small State—it is a small college but like the State itself, it has accomplished great things in the past. I am sure it will accomplish great things in the future. I join my colleague, the distinguished leader from Massachusetts, in singling out Providence College as a great educational institution, which not only excels in the sport field, but in the academic field as well.

AN URGENT PLEA FROM THE HEART OF AMERICA

Mr. RIEHLMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the body of the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RIEHLMAN. Mr. Speaker, I recently received from a mother in Memphis, N.Y., a letter which seemed to express so well the feelings which I know millions of Americans share, and which asked in such sincere terms the questions these people would like answered, that I requested the permission of the writer to make it available for all of my colleagues to read. She kindly consented.

In so many words, this letter asks that we stop and take stock of our direction. It asks that when we consider the vast undertakings of Government in the field of social welfare, we also consider their impact on the people in this country who support them.

The Federal Government does not create or produce the wealth to support these undertakings. The Government can only spend what it first takes in taxes from the people, or what it first borrows from the people. And this mother is only asking that the people be given some consideration.

I will speak no further about this letter. It speaks eloquently for itself. I would respectfully suggest that a moment's reflection on its meaning would be a moment well spent for all of us.

Under unanimous consent I insert the letter at this point in the RECORD:

Hon. R. WALTER RIEHLMAN,
House of Representatives,
Washington, D.C.

DEAR SIR: Please permit me the opportunity of voicing my opinion as a devoted American citizen who holds her country in the highest regard and respects the lawmakers whom we have chosen to make the final decisions for us.

Many families within our income bracket—which lies in the $6,000 to $7,000 a year category—are becoming increasingly alarmed at the degree to which the steady, hard-working family man is being overlooked and overburdened.

Where unemployment insurance is concerned, I'm sure there are many thousands who desperately want to work and are sincere about it. By the same token, there are those who are making a good thing of it. In two instances I know of, to give an example, the men work 6 months of the year and draw unemployment benefits the other 6. When they file their income tax they receive a refund for the full amount they paid in during the time they worked. Which means that they as American citizens share the same privileges as we do and it costs them little or nothing.

These things are causing much discouragement and feeling of despair among those who are diligent workers and family men striving to make a decent living and provide a comfortable home for their wives and children. In fact the slogan seems to be—"The only way to get along is to draw unemployment or retire."

While President Kennedy is endorsing billions of dollars for overseas relief, he also is forcing the American mothers out of their homes and into jobs, not for luxuries but just to meet everyday living expenses. At the same time, he states juvenile delinquency is a problem for the parents to solve, and this can only be done with love and affection and the security of a mother who's there when she's needed.

I sincerely hope this letter will be taken with the good intentions it has been written. Constant strain and financial worry is causing the morale of the "heart" of America to drop lower and lower.

As the mother of three boys I can honestly say it hurts when your son asks to go to a Saturday afternoon movie or to join Boy Scouts or the "Y" and you have to refuse because there isn't a spare dollar.

Are the union officials speaking for us? Do they voice the opinion of the men they represent or do they have their own selfish reasons? So many questions are left unanswered. Why not consult the people themselves?

The question foremost in our minds regarding the burden facing us now and in the foreseeable future is "Are we being penalized for working?"

When a conscientious, family-loving, devoted American workingman comes home at night and says, "It's getting to the point where it is a waste of time to work" it's quite an alarming situation.

Perhaps this situation is one Washington is not aware of and if so would it not be wise to give a little consideration to this situation? While we realize the numerous deductions withheld from each weekly pay check, for the most part, are necessary and for our benefit, we seem to have little to say as to the percentage of these deductions. At the present time, my husband contributes $3.60 per week to FICA and by 1963, if President Kennedy's plan is accepted, will increase to about $6.50, roughly. He averages about 10 cents per hour increase yearly which we barely realize when the cost of living, increased taxes, etc., are considered.

While we are so busy taking care of the aged, unemployed, etc., we are struggling to meet our own personal obligations.

Might we have some assurance that our efforts are not futile?

I sincerely thank you for this opportunity to speak for the forgotten ones and hope our future may be brighter because of it.

Yours truly,

——— ———.

HIGHWAY FINANCING PROPOSALS

Mr. RIEHLMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minue and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RIEHLMAN. Mr. Speaker, I have introduced two bills embodying what I feel is a realistic and fair solution to the problem of financing completion of the Interstate Highway System.

The major features of these bills are as follows: First, plan for completion of construction by 1975, 3 years beyond the present target date; second, continue the present 4-cents-a-gallon tax on gasoline and diesel fuel for 1 more year; third, establish the tax on gasoline and diesel fuel at 3¼ cents a gallon from July 1, 1962, through the completion date of the program; fourth, authorize the appropriation of $2.1 billion a year for interstate construction for fiscal years 1963 through 1974; fifth, waive the operation of the Byrd pay-as-you-go amendment by providing that the authorized amount be apportioned to the States each year regardless of whether highway trust fund revenues fall below or exceed that amount—in lean years the necessary funds would be advanced from the general fund and in later years, when revenues exceed expenditures, these advances would be repaid with interest; sixth, provide for a nonrepayable annual appropriation from general revenues of $52.5 million for fiscal years 1962 through 1974. This would amount to roughly $735 million over the life of the program, compared with a total cost of completion of slightly in excess of $44 billion. The total percentage of completion costs borne by general revenues would be 1.6 percent; and, seventh, repeal the scheduled 3-year diversion to the trust fund of the excise taxes on automobiles, parts, and accessories.

EXTENSION OF COMPLETION DATE

Although I believe the Interstate Highway System must be completed within a reasonable period of time, I do not recognize any pressing need to maintain this steadfast adherence to the 1972 target date. The feeling seems to be that the system must be completed on target date no matter what it costs the American people in taxes. Congress has had to make several adjustments in the program since its inception, and we have always forced the taxpayer to do the adjusting, never the program itself. I think it is time we achieved some balance between these interests.

Under the 3-year extension which I have in mind, the final apportionment would be made to the States in the second half of calendar year 1972. The States could then proceed to completion of the program as fast as their own resources would permit.

ADJUSTMENT OF TAX LEVELS

I would like to see the taxes on gasoline and diesel fuel reduced to 1956 levels, but the Department of Commerce estimates submitted to Congress in January

indicated that completion of the interstate program would require $9.74 billion in additional revenues over and above those provided by the 1956 tax structure. In view of this, I think it is unrealistic to continue working for a return to 1956 levels.

I feel that the 4-cent gasoline tax should be continued through fiscal 1962 to lessen the impact on a budget which we already know will probably be out of balance. Both the Eisenhower and the Kennedy budgets have been submitted to Congress. Extensive plans having already been made for spending 1962 revenues. I would want to keep any additional burden on those revenues at a minimum. The budgets for years after 1962 could then take the further reductions into account. As it stands now, with a 4-cent gasoline and diesel fuel tax, trust fund revenues and expenditures will just about balance out in fiscal 1962.

The 3½-cent gasoline and diesel tax for the years following 1962 represents what I feel is a reasonable tax responsibility for the highway user to carry, based on the added cost of completing the program and the desire that such completion should not be postponed for more than 3 years.

WAIVER OF BYRD AMENDMENT

The Byrd amendment requires that the program pay its own way during each year of its lifetime. This amendment has resulted in a degree of uncertainty among the States. A State does not know what to expect from the program from one year to the next, and it can never be certain that there will be money in the highway trust fund to meet the Federal Government's obligations.

The interstate apportionment has varied as much as $700 million from one year to the next, a change of some 30 percent. This sort of fluctuation does not contribute a great deal to stability of employment, construction operations, equipment requirements, or planning in general.

I would much prefer to see a level of apportionments that would remain stable throughout the duration of the program. To make this possible, it would be necessary to advance money from the general fund to the trust fund in years when trust fund revenues did not meet expenses, and to repay those advances when revenues exceeded expenditures. We would be injecting the elements of certainty, dependability, and stability into the program and at the same time insuring that costs and revenues would balance out, not necessarily in every year of the program, but over the lifetime of the program. This was the original intent of the Congress when the program was initiated, and I believe we should reevaluate our financing methods in light of a possible return to that original intent.

USING GENERAL REVENUES

The Department of Commerce in assessing the allocation of costs for the program, stated that 8 percent of the program's benefits accrue to others than those whose taxes now finance the trust fund. Although this estimate is open to some question, I think it is widely agreed that the interstate highway program is beneficial to our national defense and has an important impact on our economic health. There are other indirect benefits accruing to nonhighway users that are too numerous to mention. These benefits cannot be easily measured but they can certainly be said to justify assigning the general revenues a portion of the responsibility for financing the cost of the Interstate System.

To continually justify the interstate program on the basis of its importance to national security and economic health, as well as its contribution to convenience and safety, and at the same time to continue sparing the nonhighway users the responsibility for supporting the program, is to be a little bit inconsistent.

FISCAL POLICY OF THE NEW FRONTIER: HIGHER INTEREST RATES

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I take this time to call the attention of the House to the offer of the Treasury Department last Friday to swap intermediate term Federal bonds at 3⅜ and 3⅝ percent for short-term bonds of 2¼ and 2⅝ percent. This advanced refunding is good fiscal procedure and a procedure pioneered by the Eisenhower administration last summer with success. I call attention to this matter because it is the second positive step the Kennedy administration has taken to increase interest rates. Where are the campaign promises of yesteryear?

FEDERAL AID TO EDUCATION

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. TEAGUE] may extend his remarks at this point in the body of the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TEAGUE of California. Mr. Speaker, under leave to extend my remarks, may I call attention of my colleagues in the Congress to a letter just received from my constituent, Mr. Lewis E. Kimball, Jr., headmaster of Crane Country Day School, Santa Barbara, Calif.

MARCH 23, 1961.

Hon. CHARLES M. TEAGUE,
House of Representatives,
Washington, D.C.

DEAR SIR: The matter of Federal aid to education, currently much in the local press, is now before Representative ADAM CLAYTON POWELL's committee. It may be of help to that committee to have before it the statement of position taken by the California Association of Independent Schools. This statement was drawn up in response to an earlier attempt to introduce tax support of independent schools, and I have no reason to believe that the opinion of the members has changed since that time. I am enclosing a directory so that the association may be more closely identified.

The following is the policy statement regarding tax support of independent schools adopted by the CAIS May 4, 1956:

"POLICY ON TAX SUPPORT OF INDEPENDENT SCHOOLS

"Independent school initiative and enterprise contribute vitally to the growth of American education. This contribution is made possible chiefly through the freedom of independent schools from those regulations and controls which are inherent in and essential to tax-supported institutions. If their historic role in educational development is to continue, independent schools must maintain freedom to explore new methods and to evolve new patterns.

"It is our belief that the particular contribution of the independent school would be lost if any part of its educational program were financed directly through public taxation; therefore, we are opposed to either Federal or State direct support of nonpublic schools.

"Approved May 4, 1956."

Very truly yours,

LEWIS E. KIMBALL, Jr.,
Headmaster.

A HABITUAL CRIMINAL, POTENTIAL KILLER, ROAMED THE CAPITAL'S STREETS—WHY?

The SPEAKER. Under the previous order of the House the gentleman from Michigan [Mr. HOFFMAN] is recognized for 5 minutes.

Mr. HOFFMAN of Michigan. Mr. Speaker, when I came over to the House one day last week I counted 15 policemen out in front of the Capitol. I suppose they are trying to find parking places for Members of the House and the press.

The thing that worries me, however, is the lawlessness that prevails in the District—the lack of protection on our streets. The fact that this Dallas Williams who has a police record of 100 entries on the police docket, a man who was convicted of manslaughter several years ago, is back in circulation, killed two more men the other day.

What I am trying to bring out is that it is a little difficult to understand, Mr. Speaker, the thinking of our legal experts, the judges, the lawyers, and our so-called mental experts, working together keep this fellow out. Think it over a little bit and see if we should not do something about revising our criminal code, insist on better enforcement—a little protection for the public, a little less concern about the criminal individual. As I understand the situation now, if I am mentally ill, and shoot you when I am a little peculiar mentally, it is my privilege to go to St. Elizabeths for a few months and when the doctors out there say I am sane again, let me out to kill another individual.

That is what it all boils down to. That is the way it is according to the press.

Mr. Speaker, Congress and certain groups seem greatly concerned with protecting people throughout the world from a denial of what some term civil rights. We make vigorous and persistent efforts to assure freedom to individuals wherever, if they live beyond the borders of the continental United States, they may live, to teach them

how and insist that they shall comply with our standards of living, willy-nilly, whether that is what they want or do not want.

Here at home, our so-called top intellectuals, if results alone are considered, seem determined to guarantee freedom of action to criminals. It is absurd to even suggest that such is their purpose, but such is sometimes the result of their actions.

Nor would it be fair to suggest that our legalistic experts and those who determine who is or is not sane are so dumb they do not know what they are doing, but somewhere along the line there is a flaw in the procedure which should protect the average American from lawlessness, sometimes death.

Some time ago, in one of our subcommittee hearings, questioning one of these so-called experts, in answer to my questions, he finally got around to accepting the thought that anyone who did not agree with his opinions or conclusions was a little bit off mentally—his mental health somewhat impaired.

Reading some of the more recent decisions of our courts and the testimony of our experts on mentality, it appears that individuals in the three groups, that is, judges, lawyers, and psychiatrists, now agree that those who disagree with the latter group are suffering from some mental disease, and therefore, temporarily should be incarcerated in St. Elizabeths or some similar institution, and then shortly turned loose on the public.

These thoughts, which at first glance seem absurd, are given utterance because of the story carried in the Washington Star on the 16th of March, last. Pertinent parts of that article read:

Dallas O. Williams, the notorious "Bad Man of Swampoodle," whose violence-packed police record dates back 28 years, last night shot one man to death and critically wounded another, Washington police said.

Homicide squad detectives charged Williams, 46, one of the central figures in the debate over local insanity laws, with fatally wounding Robert L. Watson, 40, a gas station attendant, and wounding Hazel Ross, 48, another attendant, in a fracas at a Northwest gas station. The three men are colored.

* * * * *

WARNING BY PSYCHIATRIST

Two years ago, when Williams was released after a protracted series of court battles and sanity hearings, a psychiatrist warned: "It should be kept in mind that he is potentially definitely dangerous to others, and once released, is likely to repeat his patterns of criminal behavior, including homicide."

* * * * *

Williams' police record, which numbers more than 100 entries, dates back to 1933 and includes a 1936 manslaughter conviction.

* * * * *

In the District, Williams' record dates back to 1940. As recently as last January, he was back in police custody on a charge of assaulting a 42-year-old man with a lead pipe. The charge was dropped on January 19 when the assault victim refused to testify against Williams.

RELEASE WAS DISPUTED

Williams' controversial 1958 release came on a U.S. court of appeals ruling which climaxed a series of five trials for the same offense—the shooting of a man during a dice game in September 1949. Williams was convicted three times and there were two mistrials.

Williams was indicted for the dice-game shooting in November 1949. His first conviction was reversed because of a prosecution error. His second and third trials were ruled to be mistrials. At the third trial, in 1953, psychiatrists testified Williams was then insane.

He was committed to St. Elizabeths Hospital in July 1953, but was discharged as cured the following September. In December of that year, however, he was tried for the fourth time on the assault charge. In January 1954, he was sentenced to 3 to 9 years in jail.

THIRD CONVICTION REVERSED

In April 1955, Williams was found to be insane after jail officials requested he be given a mental examination. The court of appeals, 16 days later, reversed the 1954 sentence and conviction because the judge had denied a request for a mental examination.

The appellate court sent the case back to District court for a new trial. Williams, however, was back in St. Elizabeths. He was released on bail in December 1955, after psychiatrists said he was cured. The fifth trial began almost immediately and Williams was convicted for the third time. He was sentenced in May 1956, to a term of 1 to 3 years in prison.

The third conviction was appealed and on November 1, 1957, the U.S. Court of Appeals again reversed the conviction, saying Williams did not get a speedy trial.

Despite the reversal, the appellate judges, apparently not wishing to see Williams freed, suggested that the Government seek to have Williams committed to a mental institution in civil proceedings. This was done and in January 1958, Chief Judge Bolitha J. Laws of District court ordered Williams committed pending a report on his condition from the Mental Health Commission.

POTENTIAL DANGER CITED

Ten days before the commitment, two Government psychiatrists had examined the ex-convict. They said he was not insane but agreed that he was a potential danger to the community.

Nevertheless, Williams walked out of the U.S. courthouse here on January 14, 1958, after his release from St. Elizabeths was ordered by Federal Judge Richmond B. Keech. Judge Keech's ruling was upheld by the court of appeals on grounds that there was no verified allegation that Williams was then insane.

Within 3 weeks of his release, he was back in police custody, on a drunkenness charge. At 2 a.m. on February 2, 1958, the "bad man" was arrested and accused of being drunk and yelling at Kenilworth and Jay Streets NE.

Williams posted $10 collateral and was released, but 2 days later was jailed when Municipal Court Judge Thomas C. Scalley issued a court attachment for his arrest. Judge Scalley's commitment of the prisoner to St. Elizabeths for mental observation triggered another lengthy round of appeals and hearings.

In July 1958 Judge Scalley found Williams not guilty because of insanity. The following February, a year after the drunk charge was placed, Williams was again freed. The Municipal Court of Appeals had ruled that he was wrongly committed in what amounted to a "sanity inquisition."

Thus, in February 1959 Judge Scalley, in accordance with the appellate ruling, accepted Williams' guilty plea in the drunkenness case and sentenced him to 30 days in jail. Williams was released because he was credited with time already spent in jail.

The legal machinery that Williams extricated himself from so often in the past is grinding slowly, carefully, today.

HOUSE RESOLUTION 211: SPECIAL COMMITTEE ON CAPTIVE NATIONS

The SPEAKER. Under the previous order of the House the gentleman from Pennsylvania [Mr. FLOOD] is recognized for 30 minutes.

Mr. FLOOD. Mr. Speaker, on March 8, 1961, I had the pleasure of introducing a resolution calling for the establishment of a Special Committee on Captive Nations. The discussion on the subject of "Russian Colonialism and the Necessity of a Special Captive Nations Committee—CONGRESSIONAL RECORD, March 8, 1961, pages 3518–3543—was the occasion for it. Over 20 Members contributed valuably to this discussion which was one of the most illuminating in my experience. However, for some reason the full text of my resolution did not appear.

The response to House Resolution 211 has been tremendously enthusiastic. To meet the growing inquiries into the textual contents of the resolution, I ask permission that the measure be printed at this point in the RECORD in full:

Whereas on the issue of colonialism the blatant hypocrisy of imperialist Moscow has not been adequately exposed by us in the United Nations and elsewhere; and

Whereas two Presidential proclamations designating Captive Nations Week summon the American people "to study the plight of the Soviet-dominated nations and to recommit themselves to the support of the just aspirations of the people of those captive nations"; and

Whereas the nationwide observances in the first anniversary of Captive Nations Week clearly demonstrated the enthusiastic response of major sections of our society to this Presidential call; and

Whereas following the passage of the Captive Nations Week resolution in 1959 by the Congress of the United States and again during the observance of Captive Nations Week in 1960, Moscow displayed to the world its profound fear of growing free world knowledge of and interest in all of the captive nations, and particularly the occupied non-Russian colonies within the Soviet Union; and

Whereas the indispensable advancement of such basic knowledge and interest alone can serve to explode current myths on Soviet unity, Soviet national economy and monolithic military prowess and openly to expose the depths of imperialist totalitarianism and economic colonialism throughout the Red Russian Empire, especially inside the so-called Union of Soviet Socialist Republics; and

Whereas for example, it was not generally recognized, and thus not advantageously made use of, that in point of geography, history, and demography, the now famous U–2 plane flew mostly over captive non-Russian territories in the Soviet Union; and

Whereas in the fundamental conviction that the central issue of our times is imperialist totalitarian slavery versus democratic national freedom, we commence to win the psychopolitical cold war by assembling and forthrightly utilizing all the truths and facts pertaining to the enslaved condition of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, White Ruthenia, Rumania, East Germany, Bulgaria, mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Tibet, Cossackia, Turkestan, North Vietnam, and other subjugated nations; and

Whereas the enlightening forces generated by such knowledge and understanding of the

fate of these occupied and captive non-Russian nations would also give encouragement to latent liberal elements in the Russian Soviet Federative Socialist Republic—which contains Russia itself—and would help bring to the oppressed Russian people their overdue independence from centuries-long authoritarian rule and tyranny; and

Whereas these weapons of truth, fact, and ideas would counter effectively and overwhelm and defeat Moscow's worldwide propaganda campaign in Asia, Africa, the Middle East, Latin America, and specifically among the newly independent and underdeveloped nations and states; and

Whereas it is incumbent upon us as free citizens to appreciatively recognize that the captive nations in the aggregate constitute not only a primary deterrent against a hot global war and further overt aggression by Moscow's totalitarian imperialism, but also a prime positive means for the advance of world freedom in a struggle which in totalistic form is psychopolitical; and

Whereas in pursuit of a diplomacy of truth we cannot for long avoid bringing into question Moscow's legalistic pretensions of "noninterference in the internal affairs of states" and other contrivances which are acutely subject to examination under the light of morally founded legal principles and political, economic, and historical evidence; and

Whereas in the implementing spirit of our own congressional Captive Nations Week resolution and the two Presidential proclamations it is in our own strategic interest and that of the nontotalitarian free world to undertake a continuous and unremitting study of all the captive nations for the purpose of developing new approaches and fresh ideas for victory in the psychopolitical cold war: Now, therefore be it

Resolved, That there is hereby established a committee which shall be known as the Special Committee on the Captive Nations. The committee shall be composed of ten Members of the House, of whom not more than six shall be members of the same political party and of whom five shall be members of the Committee on Foreign Affairs, to be appointed by the Speaker of the House of Representatives.

SEC. 2. (a) Vacancies in the membership of the committee shall not affect the power of the remaining members to execute the functions of the committee, and shall be filled in the same manner as in the case of the original selection.

(b) The committee shall select a chairman and a vice chairman from among its members. In the absence of the chairman, the vice chairman shall act as chairman.

(c) A majority of the committee shall constitute a quorum except that a lesser number, to be fixed by the committee, shall constitute a quorum for the purpose of administering oaths and taking sworn testimony.

SEC. 3. (a) The committee shall conduct an inquiry into and a study of all the captive non-Russian nations, which includes those in the Soviet Union and Asia, and also of the Russian people, with particular reference to the moral and legal status of Red totalitarian control over them, facts concerning conditions existing in these nations, and means by which the United States can assist them by peaceful processes in their present plight and in their aspiration to regain their national and individual freedoms.

(b) The committee shall make such interim reports to the House of Representatives as it deems proper, and shall make its first comprehensive report of the results of its inquiry and study, together with its recommendations, not later than January 31, 1962.

SEC. 4. The committee, or any duly authorized subcommittee thereof, is authorized to sit and act at such places and times within or outside the United States to hold such hearings, to require by subpena or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony as it deems advisable.

SEC. 5. The committee may employ and fix the compensation of such experts, consultants, and other employees as it deems necessary in the performance of its duties.

Mr. Speaker, I wish also to take this occasion to introduce into the RECORD one of the first statements of support for House Resolution 211. It was issued in behalf of the National Captive Nations Committee, Inc., by Dr. Lev E. Dobriansky, of Georgetown University, the chairman of this national organization. As many of us know, this committee consists of hundreds of outstanding American citizens drawn from almost every State in the Union and representing education, labor, management, religious and many other institutions of our society.

I am indeed happy that the National Captive Nations Committee, Inc., expresses its support of House Resolution 211. The contents of its statement will be of interest to all Members who took part in the House discussion of March 8. The statement offers some concrete reasons for the necessary passage of the resolution. I request that this statement be printed in full at this point in the RECORD:

NATIONAL CAPTIVE
NATIONS COMMITTEE, INC.,
Washington, D.C., March 24, 1961.

The Honorable DANIEL J. FLOOD,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: The nationwide membership of the National Captive Nations Committee, Inc., cannot thank you enough for your vision, leadership and initiative in introducing House Resolution 211, establishing a Special Committee on the Captive Nations. We support it wholeheartedly and shall use every means to inform all sectors of our society on the necessity of the passage of this far-seeing measure.

I take this opportunity to express our deepest esteem and gratitude to all Members of Congress who joined with you in the discussion of this vital subject on March 8. To Representatives MCCORMACK, MACGREGOR, SCRANTON, PUCINSKI, ELLSWORTH, O'HARA, BRUCE, LANE, HALPERN, STRATTON, SCHWENGEL, DERWINSKI, TOLL, GOODLING, SCHNEEBELI, RODINO, RYAN, SHELLEY, CUNNINGHAM, FARBSTEIN, MOORHEAD, and FEIGHAN we offer our heartiest congratulations on their fine statements in the House that day. We also extend them to Representatives LESINSKI, COLLIER, CONTE, and MARTIN for their splendid individual statements on the captive nations. And as we support House Resolution 211, we naturally support also House Resolutions 212, 213, and 214 submitted respectively for the same purpose by Representatives PHILBIN, RODINO, and STRATTON.

With the passage of this resolution our Congress would make one of the most vital contributions to both the security of this Nation and the freedom of mankind. And the reasons for this are plain:

1. The resolution seeks the first concrete implementation of the Captive Nations Week resolution passed by Congress in 1959. We all know by sheer demonstration how fearful Khrushchev and the Moscow colonial clique is of that resolution;

2. House Resolution 211 is realistically based on the aggregative concept of the captive nations—meaning those inside the U.S.S.R. as well as outside—and emphasizes the strategic importance of all these nations both for cold and hot war purposes. Given the facts about the captive nations in the aggregate, the American people will quickly realize that colonial Moscow can least afford a hot war and is most vulnerable in the cold war. Our people will also come to realize that it will require comparatively little to defeat the cold war objectives of Moscow;

3. The studies, facts, and truths educed by a Special Committee on Captive Nations would give the constant lie to the propagandized and overblown Russian image, particularly in the underdeveloped areas of Africa, Asia, and Latin America;

4. The committee proposed by House Resolution 211 would at last fill a hazardous gap in our official and private facilities by providing systematic, objective, and continuous studies of all the captive nations, especially those in the U.S.S.R. Nowhere is there any agency, public, or private, performing this essential task; and

5. As the resolution states, the work of the committee would serve as an indispensable reservoir of new dimensions of thought, of new and fresh ideas, of solid and grounded recommendations for positive and constructive action against the traditional imperialism and colonialism of Moscow. It is pitiful that even now we are forsaking many opportunities in the U.N. and elsewhere in the cause of freedom.

It is scarcely necessary to point out that the crucial subject of the captive nations in the aggregate deserves and warrants the type of sustained study and investigation sought by your resolution. We earnestly hope that reason rather than shock treatments of further Red totalitarian conquests in Asia and elsewhere will guide us to do those things that are long overdue. In this war for the minds of men a Special Committee on Captive Nations is a necessity.

With our warmest compliments on your vision and foresight and best personal wishes, I am,

Sincerely yours,

LEV E. DOBRIANSKY,
Chairman.

CIVIL WAR CONTROVERSY

Mr. ST. GERMAIN. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. ADDONIZIO] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. ADDONIZIO. Mr. Speaker, it is gratifying that the efforts to insure equal treatment of delegates to the fourth assembly of the Civil War Centennial Commission in Charleston next month have apparently been successful. It is most regrettable that the meeting place of the assembly had to be changed in order to provide suitable accommodations for persons assembled to commemorate the Civil War which upheld the principles of human freedom and equality. As the Washington Post stated in an editorial this morning:

> To observe this centennial by humiliating some Americans because of the color of their skin would be a hideous blasphemy.

I am grateful to the President and to those members of the National Civil War Centennial Commission who shared my concern about the principles at stake in the issue. I should like, too, to pay

tribute to the New Jersey Civil War Centennial Commission for its resolute refusal to submit to the discriminatory racial policies decreed by the executive committee, and to the States that joined in my State's protest.

A special word of commendation is due that valiant lady, Mrs. Madaline Williams, who bore the trial to which she was subjected with customary dignity and equanimity. Mrs. Williams was the subject of an interesting article in the Newark Sunday Star Ledger of March 26 which appears below.

I am sure that Mrs. Williams was heartened by the wholehearted support of her cause—the cause of the equality of mankind—by so many groups and organizations throughout the Nation. Their vigorous rejection of the exclusion of their fellow citizens on the grounds of race was the bright note in the controversy. The strong protest entered by the Essex County, N.J., chapter of the American Jewish Committee, represents the sentiments not only of its membership but of the vast majority of Americans. I am pleased to insert the committee's fine statement in full, together with the article on Mrs. Williams:

[From the Newark Star Ledger, Mar. 26, 1961]

CIVIL WAR CONTROVERSY—SOUTHERN COLD SHOULDER NOT NEW IN MRS. MADALINE WILLIAMS' CAREER

When Madaline Williams was told she could not share the southern hospitality which is to be accorded to other delegates at the Civil War Centennial celebration in Charleston, it was not a new story to her.

She had grown up in Brunswick, Ga., where her grandmother had been born into slavery. She attended segregated Negro schools and came north in 1916 to study teaching at Trenton State Teachers College and later at NYU.

She taught for 8 years in a segregated school in Trenton. Then the board of education made plans to build a new Lincoln School for Negroes. Mrs. Williams and 17 other Negro teachers were ordered to ask Negro parents to send their children to the school, despite the location of their homes.

FIRED FROM JOB

"I refused and I was fired. It was as simple as that," Mrs. Williams related.

That was the end of Mrs. Williams' teaching career. It was almost 30 years before she went to work again. After the death of her only child, Mrs. Williams took a job as a sales clerk "to help me forget."

For 23 years, Mrs. Williams and her husband, Samuel, a retired postal superintendent, nursed their invalid child. The boy was injured at birth.

"He required care 24 hours a day until he died. He had seven eye operations but none was successful. But we never gave up hope."

During this time, Mrs. Williams did volunteer work for the NAACP, the YWCA, the East Orange League of Women Voters, and the Essex County Council of Church Women. She had also belonged to the East Orange Democratic Club, but had never engaged actively in politics.

Mrs. Williams, who had never intended to pursue a political career, entered public life 3 years ago, when she was 62 years old.

"I was completely surprised when John McMahon, who was chairman of the Essex County Democratic Screening Committee, called one day and asked if I would like to run for the assembly. I didn't know him and he didn't know me. I hesitated, but he was most persuasive."

Mrs. Williams won the primary and went on to win handily in the general election.

"But before my first term was up, I was told the party would not put me up for reelection. The county was furious with me because I voted against the wishes of the other Essex assemblymen for the passage of dependent aid for children. The bill was passed by one vote * * * mine."

Nevertheless, in 1959, Mrs. Williams received the party backing and was reelected. After serving less than a year of her second term, she ran for Essex County Register of Deeds, a post that pays $13,000 a year, and won again. She resigned from the assembly to take over the job which had been held for 25 years by the GOP.

Mrs. Williams was a member of the assembly when Governor Meyner appointed her as a charter member of the New Jersey Civil War Centennial Commission.

The formation of the commisssion followed on the heels of the creation of national commission by an act of Congress.

TO MARK EVENT

"We have been meeting regularly once or twice a month, since we began almost 2 years ago. Although our delegation will not attend the national observance if it is held in Charleston as planned, we will observe this great struggle to preserve the Union and human dignity."

The commission is preparing a brochure about the Civil War which they will distribute through the public schools, Mrs. Williams said.

Mrs. Williams regrets that she has become part of a national issue, but she is not alone.

HAD TO PHONE

"Actually, we tried to avoid any embarrassment or publicity by attempting to find out in advance if there would be a color line drawn. We wrote letter after letter to national officials without reply. Then Donald Flamm, who is chairman of the State commission, instructed the executive director to call Charleston. It was then that we were informed that I could not stay with the rest of the delegation and the State commission voted to boycott the celebration."

In a last-ditch effort the State commission earlier this week requested the site of the observance be changed.

In a prepared statement, the commission said in part: "It was hoped that the occasion of Mrs. Williams as a first-class citizen in Charleston would have been a glorious way of opening the centennial and proving to all humanity that the terrible American Civil War was really not waged in vain."

The American Jewish Committee made public today a protest to the National Civil War Centennial Commission for the discriminatory treatment accorded a member of the New Jersey delegation who was unable to secure equal housing, because of racial restrictions, with other delegates at the national assembly of the commission in Charleston, S.C.

The text of the letter, which was issued by Dr. Alan H. Herman, chairman of the American Jewish Committee's Essex County Chapter, is as follows:

"The American Jewish Committee in New Jersey protests the discriminatory treatment accorded a distinguished member of the New Jersey Civil War Centennial Commission who was unable to secure, because of racial restrictions, equal housing with her fellow delegates at the assembly of the National Civil War Centennial Commission to be held in Charleston, S.C.

"In our view, this indignity to an official representative is not only an affront to the soverign State of New Jersey, but it dramatizes a moral issue for the entire world to note that despite our preachments about democracy, basic human rights, and civil liberties are denied to minority group members within our borders.

"We believe and strongly urge that all public functions under the auspices of our National Government be open to all citizens on an equal basis. We, therefore, call upon the National Civil War Centennial Commission to take immediate steps to rectify this disservice to American interests and make certain that all who attend the national assembly of the commission will be treated with the courtesy and the human dignity which such an historic occasion warrants."

The American Jewish Committee, founded in 1906, is the pioneer human relations agency in this country, combating bigotry, protecting civil rights and advancing intergroup and interreligious understanding. Its national headquarters is the new Institute of Human Relations which serves as a center of research, education, and action in the field of human relations.

IMPORTATION OF MEXICAN NATIONALS

Mr. ST. GERMAIN. Mr. Speaker, I ask unanimous consent that the gentlewoman from Oregon [Mrs. GREEN] may extend her remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mrs. GREEN of Oregon. Mr. Speaker, in a period of high unemployment and increasing economic distress, there are a great many questions which have yet to be answered in regard to the continuation of the program of importing Mexican nationals to work on American farms. Public Law 78, which was necessary and desirable when first enacted, has come to be less of a contribution and more of a detriment to the economic health of the Nation with each passing year. Of so it would seem.

The Committee on Agriculture has been holding hearings on the extension of Public Law 78. Oregon's distinguished labor commissioner, the Honorable Norman O. Nilsen, has become nationally recognized as an outstanding authority in the general field of migratory agricultural labor conditions. I believe that Commissioner Nilsen's statement to the committee, submitted for the present hearings, is an informative and valuable comment on this subject. I ask that that statement be printed at the conclusion of these remarks, in the RECORD:

STATE OF OREGON,
BUREAU OF LABOR,
March 17, 1961.

Hon. E. C. GATHINGS,
Chairman, Subcommittee on Equipment, Supplies, and Manpower, Committee on Agriculture, House of Representatives, Washington, D.C.

DEAR MR. GATHINGS: I would greatly appreciate having this statement included in the record of hearings on H.R. 2010 before your committee on extension of Public Law 78.

Having conducted extensive surveys in the State of Oregon in the past several years, the Oregon Bureau of Labor has assembled substantial information depicting the serious economic handicaps of American farmworkers. It is our well-documented view that the only solution is to stimulate better wages and conditions for migrant labor. If this is

not done, it is my opinion that it will be the growers who will in the long run suffer, because improvement is bound to come. If a steady improvement is not encouraged by all persons involved I sincerely believe there will be a drastic change by which agriculture will be hurt.

Because of my observations I must obviously be of the opinion that any governmental measures which tend to perpetuate repression and tend to defeat the normal working of the labor market in a situation of labor shortage must, for the benefit of the whole economy, be avoided. Since the availability of foreign workers cannot help but have this effect, I believe that you would not be doing a favor for agriculture if you enacted an extension of Public Law 78 without taking definite steps to bring the program to an end at a time definite in the near future. In my view the only legitimate purpose for an extension would be to reduce the extension of temporary dislocation which might result. In the meantime I urge that Public Law 78 guarantee much greater protection for our domestic workers than it has in the past. I believe that the report of the consultants to the Secretary of Labor in 1959 is the best source of intelligently considered and fair proposals to afford American farmworkers the increased protection, which they need so badly.

There are many groups and individuals, including many in agriculture in Oregon, who concur in my views. We know in Oregon that transition from foreign workers to domestic workers is possible. It has meant increased wages and improved conditions for farmworkers in Oregon and we now import only 300 or 400 Mexican nationals. The work formerly done by Mexican nationals is now done by domestic workers attracted by improved incentives offered by Oregon agriculture. Furthermore, there is no need for the 300 or 400 that we do import and improved protection for domestic workers in Public Law 78 would result in encouraging Oregon pear growers to abandon their crutch and walk quite well without the assistance they pretend to need. Their solution along with vigorous recruiting lies in providing adequate family type housing and other improved conditions.

Sincerely,

NORMAN O. NILSEN,
Oregon Commissioner of Labor.

THE JOHN BIRCH SOCIETY

Mr. ST. GERMAIN. Mr. Speaker, I ask unanimous consent that the gentlewoman from Oregon [Mrs. GREEN] may extend her remarks at this point in the RECORD and include an article.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mrs. GREEN of Oregon. Mr. Speaker, several days ago, a distinguished and impeccably conservative Member of the other body inserted some materials in the RECORD in regard to the John Birch Society, an organization which, in the name of "anticommunism," is conducting a vicious and well-organized campaign calling, among other things, for the impeachment of Chief Justice Warren. Many outstanding Americans, of varying political persuasions, have expressed concern at the tactics, the organizational structure, and the real aims of this organization.

On March 26, there appeared, in the Washington Post, an article about the John Birch Society, setting forth some of the concerns as this group utilizes the language of "un-American" for objectives, which, to say the least, might bear closer American public scrutiny. I ask unanimous consent that this article be printed at this point in the RECORD.

(By James E. Clayton)

Three months ago, the John Birch Society had been heard of only in a few scattered areas of the country. Its desire to operate quietly and behind the scenes was generally being fulfilled.

But almost overnight, the society has become an organization of national interest. Newspapers on both coasts have denounced it. Two U.S. Senators have spoken against it on the Senate floor. Former Vice President Nixon has joined the protests. Time magazine has given the society a critical analysis.

The society has attracted this attention because of:

Its strong views on many topics. It thinks that everything from increased spending for defense to Federal aid to education is part of a Communist plot.

The attacks made by its leader, Robert Welch, on the loyalty of America's leaders. These include former President Eisenhower, Chief Justice Warren, former Secretary of State Dulles and CIA Director Allen Dulles, all of whom Welch says are Communist agents or sympathizers.

The secrecy which surrounds the society and the amount of money which it apparently has to spend.

CONSERVATIVE COMPLAINTS

Two weeks ago, the Los Angeles Times, a conservative newspaper, said editorially: "If the John Birchers follow the program of their leader, they will bring our institutions into question exactly as the Communists try to do. They will sow distrust, and aggravate disputes, and they will weaken the very strong case for conservatism."

The same day, the Reverend Dr. Eugene Carson Blake, chief executive officer of the United Presbyterian Church in the United States, told a church group in Santa Barbara that the society was waging a "campaign of falsehoods" against that church.

On March 8, on the Senate floor, Senator MILTON J. YOUNG, Republican of North Dakota, said, "It is unbelievable that any sane person would make such accusations" (as the society's leader has made against former President Eisenhower).

Other Senators have also expressed concern about the power of the society. Senator YOUNG, a conservative Republican, says he has been attacked as being a helper of the Communists. The same attack has been mounted against Senator MIKE MANSFIELD, a liberal Democrat from Montana, and Senator THOMAS C. KUCHEL, a liberal Republican from California. The attack against KUCHEL and YOUNG has been particularly vigorous, apparently because they are up for reelection in 1962.

But not a great deal is known here about the society. It has not been particularly active in the Washington area although it apparently has at least one chapter here. Senator MANSFIELD said that he had been unable to find out much about it although he tried to get information from "various committees (on Capitol Hill) or the agencies downtown."

On March 20, the United Press International reported that the Senate Internal Security Subcommittee is telling inquirers that the society "seems to be, from our records, a patriotic organization." The Los Angeles Times, however, implied that the group was subversive—from the right instead of from the left.

Last Tuesday, Representative L. MENDEL RIVERS, Democrat of South Carolina, came to the society's defense. It is a "nationwide organization of patriotic Americans," he said in a statement in the CONGRESSIONAL RECORD. The source of the charges which smear the organization, he said, is a publication of the Communist Party.

This is a report on the society and what it believes and does.

THE FOUNDING DOZEN

What is the society? How is it organized?

The John Birch Society is the creation of Robert Welch, 61, a former candy company executive who lives in Belmont, Mass. It was organized in Indianapolis in December 1958, at a meeting of 12 men who have never been publicly identified.

That meeting was a 2-day affair devoted largely to speeches by Welch. Most of what he said was later published in the blue book of the society, copyrighted by Welch.

That book says the society is to have small local chapters, usually of 10 to 20 dedicated patriots. Each chapter should have a leader appointed by Welch or one of his officers. Senator YOUNG called these groups cells but received a heated protest from the society. Cells is the term applied to similar units of the Communist Party organization.

The society is "a monolithic body" operating under "complete authoritarian control at all levels." A republican form of government or organization has advantages, the book says, under favorable circumstances. "But under less happy circumstances," it goes on, "it lends itself too readily to infiltration, distortion and disruption. And democracy, of course, in government or organization, as the Greeks and Romans both found out, and as I believe every man in this room recognizes—democracy is merely a deceptive phrase, a weapon of demagoguery and a perennial fraud."

Newspapers which have written about the society have quoted these statements to show that it is ruled by Welch and is opposed to democracy.

In a letter printed in the CONGRESSIONAL RECORD last week, Robert D. Love, a Wichita businessman and society member, said, "These statements have been pulled completely out of context and made to smear something which could help to inform people of the true dangers of communism."

"BELIEVE IN ME"

Welch also told the Indianapolis meeting that those who join the society "are going to be doing so primarily because they believe in me and what I am doing and are willing to accept my leadership. And we are going to use that loyalty, like any other resource, to the fullest possible advantage that we can * * *. Those members who cease to feel the necessary degree of loyalty can either resign or will be put out."

Welch said then that he hoped to have 30,000 members by the end of 1959. Interviewed last summer by Stanley Eames of the Boston Herald, Welch said there were chapters in 20 States, including 25 chapters near Boston.

Gene Blake of the Los Angeles Times reported early this month that Paul H. (Tex) Talbert, a Beverly Hills insurance executive and a member of the society's national council, said there were several thousand members in scores of chapters in California. Blake says there are chapters in 34 States and members in all 50 States.

As of last summer, the society had 52 employees, Eames reported. He added that Welch told him there was an effort to get several chapters in each city. In one Texas city, Welch said, there are three chapters—one for financial people, one for carpenters and one for Negroes.

Membership costs at least $24 a year for men and $12 for women. Fundraising outside of dues has apparently been successful since the society appears to spend large sums on staff and publications. Some of the members are wealthy conservatives who ap-

parently believe in the society's goals if not in all of Welch's personal ideas.

A list of members of the society's national council was put into the CONGRESSIONAL RECORD by Representative RIVERS. It contains 25 names, many, those of leading businessmen. Among them:

Cola G. Parker and William J. Grede, Wisconsin industrialists, and Ernest G. Swigert, Oregon manufacturer, all past presidents of the National Association of Manufacturers; T. Coleman Andrews, former Commissioner of Internal Revenue; Spruille Braden, former diplomat; Clarence Manion, former dean of the Notre Dame Law School; M. T. Phelps, former chief justice of the Arizona Supreme Court; F. Gano Chance, former president of the Missouri Chamber of Commerce; Louis Ruthenburg, former president of Servel, Inc., and Fred C. Koch, president of the Rock Island Oil & Refining Co.

Welch has given these men the job of showing the stature of the organization, of advising him and of selecting "a successor to myself as head * * * if and when an accident, 'suicide' or anything sufficiently fatal is arranged for me by the Communists—or I simply die in bed."

"COMMUNIST LINE"

What does the John Birch Society stand for? Its objective, Welch told the Indianapolis meeting, is simply less government and more responsibility.

This, however, is tied closely with a drive against international communism. The Communists are rapidly taking over the United States, the society thinks, and must be stopped. The Communist method of taking over, it says, is to increase government.

Thus, the things which international communism wants the United States to do are these:

Increase defense and foreign aid spending, making higher taxes, an unbalanced budget, and inflation possible.

Increase governmental controls over prices, wages, and material so that power will be centralized in Washington.

Worry about the horror of modern warfare so that the beauties of peace become attractive and lead the Nation to appeasement of the Communists.

Those who favor these ideas are either Communists or dupes of the Communists, the society says. Into these categories it puts most recent Secretaries of State and Defense. This is where Welch's personal views come into play, particularly since he is the absolute master of the society.

At the Indianapolis meeting, he attacked both President Kennedy and former Vice President Nixon. Never naming Mr. Kennedy, Welch made it clear that he thinks the President is an "amoral man" who can do "a tremendous amount of ball carrying on behalf of the Communist aims here in the United States."

Nixon, Welch said, would be a patriotic anti-Communist only if it fit his political career. Nixon pulled off "the dirtiest deal in American political history," Welch said, by upsetting the Taft bandwagon in the 1952 Republican convention. If Taft had been President, Welch said, the Communists would have been routed from government and the Nation would not be in "this mess" today.

In a book called "The Politician," circulated to only a few selected leaders of the society, Welch really lets down his views. When Jack Mabley of the Chicago Daily News came across a copy last summer, he asked a chapter leader if it was given to all society members.

Mabley says the response was that giving the book to members before they became "qualified" would be like telling a first-year medical student to go out and cure cancer.

In the book, Welch accuses former President Eisenhower, most of his chief aides and many other Government leaders of being a part of the international Communist conspiracy.

"While I, too, think that Milton Eisenhower is a Communist and has been for 30 years, this opinion is based largely on general circumstances of his conduct," it says. "But my firm belief that Dwight Eisenhower is a dedicated, conscious agent of the Communist conspiracy is based on an accumulation of detailed evidence so extensive and so palpable that it seems to me to put this conviction beyond any reasonable doubt."

When asked about this book by reporter Eames, Welch said, "Four-fifths of our members never have seen it and most of those who have don't agree with it."

When he asked Welch flatly if former President Eisenhower was a Communist, Eames reports that Welch said, "I never felt that way enough to say it in print. Now I don't know what I think. Eisenhower may be too dumb to be a Communist."

Eames notes that a January 1, 1960, footnote to "The Politician" says, "A huge majority of Eisenhower's appointments during the past year make no sense whatever except as a part of a plan to help the Communists."

Welch also runs a yearly chart in American Opinion, a magazine he edits, on how much of the world is Communist controlled. He listed the United States as 20 to 40 percent Communist controlled in 1958 and 30 to 50 percent by mid-1959.

On other topics, Welch has said:

American churches: "One-third of the ministers are not true believers in the Divine names or the Divine history and Divine teachings to which they give lip service * * *." Some, he says, preach communism from their pulpits.

The Marshall plan: "A brilliant scheme of the Communists to get the United States to do exactly what the Communists wanted us to do."

Desegregation: "The trouble in our Southern States has been formented almost entirely by the Communists for this purpose (civil war) * * *. The whole slogan of 'civil,' as used to make trouble in the South today, is an exact parallel to the slogan of 'agrarian reform' which they used in China."

The United Nations: Part of a plan to "induce the gradual surrender of American sovereignty."

His own movement: "We are not beginning any revolution, nor even a counter-revolution, in any technical sense, because we are opposing a conspiracy, yet we are not ourselves making use of conspiratorial methods. Yet our determination to overthrow an entrenched tyranny is the very stuff out of which revolutions are made."

How does the John Birch Society work? It's problem in Indianapolis was to select a leader. Welch rejected Nixon and Senator BARRY GOLDWATER, Republican of Arizona.

He said he thought GOLDWATER was totally loyal and would make a fine President. But, he added, "Does anybody in this room think there is any slightest chance of BARRY GOLDWATER supplying the dynamic overall leadership needed to save this country for anybody to be President of? If so, I think he is still not fully aware of the nature and totality of the forces at work. For GOLDWATER * * * will inevitably think and move in terms of political warfare."

Then Welch suggested himself:

"It is not because I want so frightening a responsibility and it is certainly not because I think that you gentlemen * * * recognize any such quality of leadership in me as would make me a happy choice for the role.

"It's just that I don't know where you, or all of us, are going to find anybody else to undertake the job."

With that out of the way, Welch outlined the action program for the society.

First, he said, it must set up reading rooms in as many cities and towns as possible. It now has such rooms in, at least, California and Florida.

Second, it must get the "truth about recent history and current events into as many hands and heads as possible." It should put the National Review into college libraries, the Dan Smoot Review into doctors' and dentists' offices, and Human Events and American Opinion into barbershops.

Third, it should help increase the audience of such radio programs as those of Fulton Lewis, Jr., and Clarence Manion.

Fourth, it should organize letter writing campaigns. Some Senators think they are now receiving some of this mail.

Fifth, it "should organize fronts—little fronts, big fronts, temporary fronts, permanent fronts, all kinds of fronts." He suggested a petition to impeach Earl Warren (this is now being circulated), a petition headed please, Mr. President, don't go (this was circulated just before last spring's abortive summit meeting) and a Committee To Investigate Communist Influences at Vassar College.

Sixth, other suggestions included exposing why the Communists "just had to get rid of McCarthy, and went to such extreme lengths to do so"; heckling speakers who urge programs the society disagrees with (this happened in Cincinnati recently); lining up speakers all over the country, and getting into political action.

Eric Sevareid recently wrote what all this means in a small midwestern city he visited:

"On a street in Kansas, my host stopped his car to point to a new office building. 'He owns that, and a lot else besides,' my host explained. 'He's got money and influence. He couldn't tell a Communist from Robert A. Taft, but he's trying to get his crackpots onto the school board and a lot of us are worried.'

" 'He' is the local boss of the John Birch Society * * * 'They organize in task forces,' my host went on. 'They call schoolteachers and local college professors in the middle of the night and denounce them as Communists. They recruit kids as spies to take down classroom remarks of their teachers.

" 'They plant people in public lectures to ask loaded questions. They try to get their idiotic films and maps used in high schools. Maybe it's hard these days to get a man smeared in Washington or even in Hollywood, but in a small city like this * * * it can still be done.' "

Who was John Birch? A native of Georgia, Birch was a missionary to China who joined Gen. Clare Chennault's forces there in 1942. He was killed 10 days after V-J Day by, Welch says, the Chinese Communists.

His death, Welch says, was "the first casualty in the third world war, between the Communists and the ever-shrinking free world."

FEDERAL EXCISE TAX ON AUTOMOBILES

Mr. CHAMBERLAIN. Mr. Speaker, I rise to inform this body of a very gratifying expression of support for my effort to repeal the automotive excise tax. I have just learned that the House and Senate of the Michigan Legislature have passed a concurrent resolution urging the Congress to effect public hearings on this subject.

The resolution notes the grave situation caused by a serious decline in sales within the automotive industry which has resulted in curtailment of production, unemployment, economic hardship

and increased demands on tax-supported public services and calls attention to the importance of the automobile industry to the economy of our entire Nation.

As we appropriate millions to alleviate the impact of unemployment it is equally important that we give thought to some means of preventing unemployment. May I remind my colleagues that the present auto excise tax was imposed to discourage automobile production during the Korean war, and that this tax is still continuing its depressing effects on the automotive industry and its workers today.

I commend to my colleagues for consideration the request of the Michigan State Legislature that hearings be held on legislation to repeal the automobile excise tax:

A CONCURRENT RESOLUTION RELATIVE TO THE REPEAL OF THE FEDERAL EXCISE TAX ON AUTOMOBILES

Whereas the automotive industry has experienced a serious sales depression, which has created a grave situation of consequent curtailment of production, unemployment, economic hardship, and exploding demands on tax-supported public services. It has been disruptive of Michigan's and the Nation's economy; and

Whereas repeal of the Federal excise tax on automobiles is urgently needed to reverse these trends and regain State and National prosperity: Now, therefore, be it

Resolved by the senate (the house of representatives concurring therein), That the Michigan Legislature respectfully requests the Congress of the United States to effect public hearings by the U.S. House of Representatives on the proposition of the repeal of the Federal excise tax on automobiles; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States, the President of the Senate, and the Speaker of the House of Representatives, and to each Member of the Michigan delegation to the U.S. Senate and the House of Representatives.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. HOFFMAN of Michigan to address the House for 5 minutes today and to include in his remarks certain relevant material.

Mr. FLOOD (at the request of Mr. ALBERT) for 30 minutes today, to revise and extend his remarks, and to include extraneous matter.

Mr. DENT (at the request of Mr. ST. GERMAIN) for 1 hour on tomorrow, Tuesday, March 28, to revise and extend his remarks and include extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. O'HARA of Illinois.

Mr. JOHNSON of Wisconsin in three instances and to include extraneous matter.

Mr. HARRIS and include an exchange of communications between Gov. LeRoy Collins and the Broadcasters Association.

Mr. ALGER.

(The following Members (at the request of Mr. ST. GERMAIN) and to include extraneous matter:)

Mr. KEOGH.

Mrs. SULLIVAN.

Mr. LIBONATI.

Mr. CONTE.

(The following Member (at the request of Mr. LINDSAY) and to include extraneous matter:)

Mr. LINDSAY.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 66. Joint resolution to amend the joint resolution providing for membership and participation by the United States in the Inter-American Children's Institute; to the Committee on Foreign Affairs.

ADJOURNMENT

Mr. ST. GERMAIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 46 minutes p.m.), the House adjourned until tomorrow, Tuesday, March 28, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

715. A letter from the Secretary of the Army, transmitting reports of the number of officers on duty with Headquarters, Department of the Army and the Army General Staff as of December 31, 1960, pursuant to Public Law 581, 81st Congress; to the Committee on Armed Services.

716. A letter from the Administrator, General Services Administration, transmitting the report of the Archivist of the United States on records proposed for disposal under the law; to the Committee on House Administration.

717. A letter from the Chairman, Federal Communications Commission, transmitting a copy of the report on backlog of pending applications and hearing cases in the Federal Communications Commission as of January 31, 1961, pursuant to Public Law 554, 82d Congress; to the Committee on Interstate and Foreign Commerce.

718. A letter from the president, the Foundation of the Federal Bar Association, transmitting a report of the audit of the financial transactions of the Foundation of the Federal Bar Association for the fiscal year ended September 30, 1960, pursuant to Public Law 662, 83d Congress; to the Committee on the District of Columbia.

719. A letter from the assistant secretary, the National Institute of Arts and Letters, transmitting the official report of the National Institute of Arts and Letters for the year 1960, pursuant to section 4 of their charter; to the Committee on House Administration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BOLLING: Committee on Rules. House Resolution 237. Resolution for consideration of S. 1, an act to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas; without amendment (Rept. No. 201). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 238. Resolution for the consideration of S. 153, a bill to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963, without amendment (Rept. No. 202). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL:

H.R. 5955. A bill to amend the act of August 12, 1955, relating to elections in the District of Columbia; to the Committee on the District of Columbia.

By Mr. DAWSON (by request):

H.R. 5956. A bill to amend section 203(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484(j)), to provide that the Department of Defense may allocate surplus property under its control for transfer under that act only to educational institutions conducting approved military training programs; to the Committee on Government Operations.

By Mr. DONOHUE:

H.R. 5957. A bill to amend the Internal Revenue Code of 1954 to provide an accelerated amortization deduction for industrial or commercial plants and facilities constructed or established in economically depressed areas; to the Committee on Ways and Means.

By Mr. DOOLEY:

H.R. 5958. A bill to provide for posting information in post offices with respect to registration and voting, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. HALPERN:

H.R. 5959. A bill to provide for the construction of a permanent museum of modern science and engineering at the New York World's Fair of 1964, and for other purposes; to the Committee on Foreign Affairs.

By Mr. RIEHLMAN:

H.R. 5960. A bill relating to the financing of the Federal highway program; to the Committee on Ways and Means.

H.R. 5961. A bill to amend certain laws relating to Federal-aid highways, to make certain adjustments in the Federal-aid highway program, and for other purposes; to the Committee on Public Works.

By Mr. ROGERS of Colorado:

H.R. 5962. A bill to amend title 28, United State Code, with respect to fees of U.S. marshals; to the Committee on the Judiciary.

By Mr. SMITH of Mississippi:

H.R. 5963. A bill to amend the General Bridge Act of 1946 with respect to the vertical clearance of bridges to be constructed across the Mississippi River; to the Committee on Public Works.

By Mr. STEED:

H.R. 5964. A bill to authorize the use of funds arising from a judgment in favor of the Potawatomi Nation of Indians, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WALTER:

H.R. 5965. A bill to extend the period for the filing of Czechoslovakian claims; to the Committee on Foreign Affairs.

By Mr. ZELENKO:

H.R. 5966. A bill to amend the Fair Labor Standards Act, 1938, as amended, to provide for minimum wages for certain persons employed in agriculture, and for other purposes; to the Committee on Education and Labor.

By Mr. LINDSAY:

H. Res. 236. Resolution creating a select committee to conduct an investigation and study of the problems of urban areas; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to beach erosion and flood damage in Ventura County; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to Federal aid to schools; to the Committee on Education and Labor.

Also, memorial of the Legislature of the State of Colorado, memorializing the President and the Congress of the United States not to enact any legislation which establishes a blanket policy of single use for Federal lands which would result in lessening State of Colorado's resource base and preclude recreation for the multitudes; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Missouri, memorializing the President and the Congress of the United States relative to ratification of the proposed amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia; to the Committee on the Judiciary.

Also, memorial of the Legislature of the State of North Carolina, memorializing the President and the Congress of the United States relative to requesting the U.S. Government to refrain from the use of any of the lands in Hyde County as a possible bomb range site; to the Committee on Armed Services.

Also, memorial of the Legislature of the State of South Carolina, memorializing the President and the Congress of the United States to enact remedial legislation limiting the importation of textile and plywood products; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Utah, memorializing the President and the Congress of the United States to renew the Sugar Act and to provide for implementing long term sugar legislation with equitable distribution of foreign quotas among friendly nations; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. JAMES C. DAVIS introduced a bill (H.R. 5967) for the relief of George M. Battey III, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

104. By the SPEAKER: Petition of E. S. Preston, secretary, Mississippi Valley Conference of State Highway Departments, Columbus, Ohio, transmitting certain resolutions adopted at the 52d annual meeting of the Mississippi Valley Conference of State Highway Departments held in Chicago, Ill., March 16 through 18, 1961; to the Committee on Ways and Means.

105. Also, petition of O. T. Borja, 13th Saipan Legislature, Saipan, Mariana Islands, petitioning consideration of their resolution with reference to requesting the U.S. Congress and the United Nations to take under serious consideration the future annexation of the Saipan District to the United States as a separate and distinct U.S. territory; to the Committee on Interior and Insular Affairs.

EXTENSIONS OF REMARKS

Forty-third Anniversary of the Proclamation of Independence of the Byelorussian Democratic Republic

EXTENSION OF REMARKS
OF
HON. ROLAND V. LIBONATI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. LIBONATI. Mr. Speaker, the Byelorussian-American Association, Inc., with national headquarters at 401 Atlantic Avenue, Brooklyn, N.Y., are celebrating the 43d anniversary of the proclamation of independence of the Byelorussian Democratic Republic on March 26, 1961, at the Biltmore Hotel, New York City.

It is an honor to note my sentiments on behalf of the recovery of the independence of the Byelorussian people now held in servitude under Soviet domination.

It is organizations, such as this one, whose patriotic support, together with a unified program of disseminating information as to the culture and historic significance of their contributions to the civilization of our times, that instill a great admiration on the part of all Americans.

A request for a telegram, as follows, is indicative of our feelings in the sad plight of the Byelorussian Republic:

MARCH 26, 1961.

Mr. CONSTANT MIERLAK,
National President,
Byelorussian-American Association,
New York City, N.Y.:

Byelorussia's struggles to regain its freedom can be aided in purpose by establishing Byelorussian broadcasts by the Voice of America.

It is for our Government to do everything possible to further the dissemination of information among the Byelorussian people who are now under the Soviet yoke. The spirit of independence is still alive among the Byelorussians, even though the Republic with its puppet government is still smothered in the covering structure of the Soviet Union leadership. It is a sad commentary that following the 41 years of Byelorussian independence, she has suffered the loss of 6 million people in 20 years. The thousands of Byelorussian people living in the free world are carrying on the fight to acquaint the world with the plight of their compatriots, in their exploitation by Russia.

These brave people must be given courage and help in order to overcome and overthrow their Communist enemies. We must never forget Byelorussia's plight and we must show the greatest vigilance toward ultimately freeing her from the captors of her people.

Congressman ROLAND V. LIBONATI.

Department of Agriculture Has Positive Attitude on Farm Credit

EXTENSION OF REMARKS
OF
HON. LESTER R. JOHNSON
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. JOHNSON of Wisconsin. Mr. Speaker, the current attitudes and actions in the U.S. Department of Agriculture are refreshing and encouraging not only because they are positive, but because they are rooted in optimism and determination.

In the field of farm credit, Secretary of Agriculture Orville L. Freeman recently had this comment:

To the extent that farm loan policies and available funds can prevent it, no qualified family farmer will be required to give up farming because of his inability to finance his 1961 operations.

The Secretary at that time asked the Farmers Home Administration of the Department to review its regulations and take every step within its authority to meet farm credit needs. The Secretary's request accompanied action by the President making an additional $35 million available for farm operating loans during the 1961 fiscal year.

Mr. Speaker, over the past 9 years, declining farm prices and income have caused many beginning and other farmers to exhaust their normal sources of credit. This is a poor time to throw upon the labor market families which can, through loans and guidance enabling them to achieve full utilization of earning resources, continue in a way of life they know and love.

It is the intention of the administration, working in cooperation with the Congress and the farmers of our Nation, to reverse the downward farm income trend so our efficient family farmers can earn and get a parity of income. Secretary Freeman has said:

When the new farm program becomes effective, these family-type farmers will again be good commercial credit risks. It would be unthinkable to allow many efficient farm families to give up the struggle now because they are unable to obtain credit needed to finance 1961 operations.

The Farmers Home Administration's broadened look at the credit needs of small farmers does not mean individuals

will be financed beyond ability to pay—but it does mean that problems will not be allowed to overshadow potentials. The revised loan eligibility requirements give increased consideration to young farmers who in the future will be able to obtain additional land and other resources, and to young and middle-aged farmers who may be able to obtain off-farm income in the future. The operating loans are made for purchase of livestock and equipment, or fertilizer, tractor fuel, feed, and other essential farm and home operating needs, and to refinance chattel debts. The loans are scheduled for repayment in accordance with borrowers' abilities, over periods not exceeding 7 years.

Mr. Speaker, experience has shown that Farmers Home Administration loans do not result in increased expenditures by the Federal Government, because borrowers have an outstanding repayment record.

Secretary Freeman and the Department of Agriculture deserve appreciation for their recognition of a genuine social and economic need in the field of credit, and their constructive attitude and actions in meeting it.

Where Is Ireland in the Fight for Freedom?

EXTENSION OF REMARKS
OF

HON. THOMAS J. DODD

OF CONNECTICUT

IN THE SENATE OF THE UNITED STATES

Monday, March 27, 1961

Mr. DODD. Mr. President, on March 17 I had the privilege of addressing the annual dinner of the Friendly Sons of St. Patrick in New York. This is one of the oldest fraternal organizations in the United States, dating back to Revolutionary days, and its annual dinner is one of the principal St. Patrick's Day events each year.

My remarks at the dinner dealt with the historic contribution of Irishmen to the struggle for freedom around the world and the contrast posed by the more recent record of neutralism by the Irish Republic Government in the struggle between freedom and tyranny.

I ask unanimous consent that these remarks be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR THOMAS J. DODD, OF CONNECTICUT, AT THE 177TH ANNIVERSARY DINNER OF THE SOCIETY OF THE FRIENDLY SONS OF ST. PATRICK; HOTEL ASTOR, NEW YORK, FRIDAY, MARCH 17, 1961

Only an Irishman can fully appreciate what is in our hearts on a St. Patrick's Day occasion such as this. For this annual observance brings a pleasant interruption in our lives; reminds us of the many ties that bind Irishmen together wherever they may live; inspires a remembrance of the half-forgotten events and emotions of an earlier time that lie close to the core of our lives.

In my mind, as I am sure in yours, this day recalls a whole series of pictures stretching back to early youth: St. Patrick's concerts in the church hall; the wearing of the green; the countless stories and ancedotes drawn from the measureless well of Irish humor; simple music with its power and poignancy; a whole pattern of commonly shared attitudes and loyalties and animosities growing out of the long struggle of our people for freedom and progress.

Hidden in the heart of each of us is the image of something ever green, something clean, something right, some breath of home which is a part of our heritage, which marks us apart and ties us together.

The Irish have been a poor and humble people. They had little of material wealth to give to the world. So they bequeathed those rare jewels of character which lend an eternal significance to their history.

They have fought for freedom with courage and perseverance in their own country and all around the globe.

They have clung tenaciously to the faith of St. Patrick, resisting all attacks upon it, whether of brutal suppression, of ridicule and social sanction, or of false philosophy.

They have, through all the wrongs and shames which have been heaped upon them, kept alive a cheerful optimism, a certain amiability in adversity, a good humor in bad times, a durability and staying power which brought them through centuries of cruel oppression unbroken and unspoiled.

Thus, to an age poisoned by indifference, fearfulness, doubt, and softness, little Ireland has given hosts of sons and daughters who have qualities which the free world desperately needs: a love of freedom, a courage in defending it, a steadfastness in religious faith, a hardy endurance in defeat and adversity.

For as long as many of us can remember, the condition of Ireland has been a constant object of our hopes and prayers and efforts.

Ireland in chains was admired and loved around the world, not for its military strength or material wealth, but for its spiritual strength and the power and inspiration of its ideals.

Ireland, free, was confidently expected to lead the world by its honest and forthright example; to be a national embodiment of that constancy of faith and devotion to freedom which was the inheritance of this fabled land of heroes and martyrs, of saints and scholars.

But something has gone amiss in Ireland. Perhaps I trespass when I, an American, presume to comment upon the conduct of the Irish Republic. But our interest in Ireland is too ingrained, our concern is too personal to give way to diplomatic niceties.

This is a holy day as well as a holiday. If we would truly honor St. Patrick we should sometimes speak of our people with the candor and even the severity with which St. Patrick spoke to them.

Our generation has faced the most evil and dangerous of all threats to Christian civilization, nazism, and communism. Free nations throughout the world, large and small, banded together in resisting the common enemies of decency. But in world war and cold war, Ireland officially has been among the missing.

However notable may be its achievements at home, the Irish Republic, in the brief period in which it has played a role on the world stage, has become known for four principal courses of action:

Ireland refused to join the other nations of the free world in the desperate fight against Nazi aggression.

Ireland has declined to join NATO or to bear its small share of the common defense against Communist aggression in the post-war world.

Ireland has become an advocate of neutralism in the raging conflict between Christian civilization and communism.

Ireland has lent its support to those who are today paving the way for the admission of Red China into the United Nations.

Ireland, in short, is pursuing neutrality in a struggle in which no Irishman should be neutral, a struggle in which no one devoted to the religious and philosophical tenets of Christian civilization can be neutral.

This seems to me a renunciation of the Irish heritage, of all that it has stood for, of all that Ireland should properly represent to the world.

I am saddened by this and I know that kinsmen of ours in every corner of the world are puzzled and hurt by it.

We cannot believe that the national traits of Ireland have suddenly changed, or that the clear trumpet of old is to be forever mute.

We hope that we misread the signs.

We hope that in Red China and its Communist allies, Ireland will soon see its natural enemy and the mortal enemy of all things decent and honorable, the enemy of all religion, of all personal freedom, of all national independence, of all international law and order, of all true peace.

And those of us who foresee for Ireland a higher role than that of a mere neutral can draw comfort from the spontaneous action of the Irish people during World War II.

The official policy of Ireland in that war was one of neutrality that denied to the side of freedom badly needed training areas and naval bases. This is painful to recall. But we also remember the thrill it brought to our hearts to learn that the young men of Ireland, by the thousands and tens of thousands, were enlisting under an alien flag in order to join in the struggle against Nazi tyranny.

Despite the policy of its government, the Irish people contributed to that war a larger percentage of volunteers than any other nation in the world. The divine spark was still there, and it is there today ready to be ignited into a consuming flame by a new O'Connell, another Parnell, an Emmet, or a Wolfe Tone.

We want to see in the world an Ireland that is prosperous, an Ireland that is united, but above all, an Ireland that takes its place, not among the neutralists of history's greatest conflict between good and evil, but rather its rightful place, its natural place in the front rank of those who are fighting against the gravest threat to our faith and our freedom that the world has yet seen.

I am sure that Mr. Aiken, the Irish Minister for External Affairs, who is here seated beside me, understands that my comments and observations tonight are made with regret and only because at this fateful hour in history we must face facts and tell truths and do all we can to help others to join full strength in this desperate struggle for freedom.

I say these things not in a spirit of rancor or hostility but in one of hope and affection. We Americans of Irish descent are helping our country to carry the mighty burden of defending freedom for ourselves and for all men. And we instinctively want Ireland, the other house of our family, at our side, not as a subordinate, nor yet as an estranged and distant onlooker of our struggles; but as a friend and a companion, a partner in the greatest enterprise of our history.

It will perhaps be a significant factor in history that millions of displaced Irishmen and their descendants, who but for chance circumstance would have lived out their lives in a small land, far from the storm center of world events, today are a prominent and influential force in America at a time when the actions of our country may well de-

termine the outcome of 30 centuries of recorded struggle between tyranny and freedom.

I think we may be pardoned for taking pride in the fact that a man of Irish descent today sits in the chair of the President of the United States, and in the chair of the majority leader of the U.S. Senate, and in that of the majority leader of the House of Representatives.

It is here in America that whatever is of worth in our race has been given a chance to develop and flower. It is here that the ancient Irish yearning for liberty and religious freedom was first satisfied. It is here that the hope and the fate of man is centered. And it is here that Irishmen can best justify their heritage by strengthening America in its determination to do the painful things that must be done if we are to gain and preserve for all men what we have here.

To the United States, our great Republic, "the last best hope of earth," we give our toast this day as we give our prayers in all the days ahead.

Hon. William L. Dawson

EXTENSION OF REMARKS
OF
HON. BARRATT O'HARA
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. O'HARA of Illinois. Mr. Speaker, for the beloved dean of the Illinois delegation, the Honorable THOMAS J. O'BRIEN, and his colleagues from Chicago, I am extending my remarks to include the text of a telegram from President John F. Kennedy to Edward B. Toles, president of the Cook County Bar Association, on the occasion of a dinner conferring awards of merit on Congressman William L. Dawson, Judge Ervin Charles Mollison, judge of the U.S. Customs Court, Judge Scovel Richardson, also judge of the U.S. Customs Court, and the Honorable Herman Emmons Moore, retired judge of the U.S. District Court in the Virgin Islands.

It is doubtful that ever a President of the United States has paid a higher tribute to a Member of the Congress than these words of President Kennedy referring to Congressman DAWSON:

> Your giving well-deserved recognition to a man who, through selfless dedication to principle and devoted service to his profession, his community, and the Nation has achieved a position of unique distinction in the life and the political institutions of the United States.

The full text of the President's telegram follows:

THE WHITE HOUSE,
Washington, D.C., February 16, 1961.

EDWARD B. TOLES,
President, Cook County Bar Association, Chicago:

I extend greetings and felicitations to the incoming officers, members, and guests in attendance at the 47th annual installation banquet of the Cook County Bar Association. In honoring Congressman WILLIAM L. DAWSON, you are giving well-deserved recognition to a man who, through selfless dedication to principle and devoted service to his profession, his community, and the Nation, has achieved a position of unique distinction in the life and the political insttutions of the United States. On this auspicious occasion I extend my sincere congratulations and best wishes to him and to your other honorees—Judges Irvin C. Mollison and Scovel Richardson, of the U.S. Customs Court, and Judge Herman E. More, retired, of the U.S. District Court for the Virgin Islands.

JOHN F. KENNEDY.

Washington Report

EXTENSION OF REMARKS
OF
HON. BRUCE ALGER
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. ALGER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following newsletter of March 25, 1961:

WASHINGTON REPORT
(By Congressman BRUCE ALGER, Fifth District, Texas)

MARCH 25, 1961.

The New Frontier legislative program has everyone's attention. The leaders endeavor to meet an Easter deadline to get out legislation—whatever can be passed to show performance before the anticipated April upturn of business. The Ways and Means Committee has temporarily postponed the highway tax in favor of a study of social security changes and the reduction of the tourists imports of duty-free foreign purchases (from $500 to $100). Everything is urgent, whether the legislation would take effect soon or in the distant future.

The temporary unemployment compensation House-Senate conference report was passed handily. I joined debate to emphasize the inequity of the financing which most legislators, I am sure, did not intend. The employers of 40 States are forced to pay in more than they can get back, 3 States break even, and 9 States get back more than they pay in—all of this not intended but the result of the mandatory tax increase in violation of existing State law and procedures. In protesting this new forced taxation, I fail to see why Texas employers should pay for New York, New Jersey, Ohio, and other wealthy States costs of unemployment, not forgetting either that the States have vast reserves of $6.6 billion, particularly since the inequity results from local and States problems and program administration. The overriding danger is the Federal encroachment and breakdown of present State law, replaced by Federal standards. Time will show even more closely that the 31 of us opposing this bill are right.

Minimum wage legislation and debate, to increase minimum wages to $1.25 per hour and expand coverage under the Fair Labor Standards Act, dominated floor action this week. The 51-page bill, the 77-page report, the 637 pages of hearings, and the 2½ days of debate spell out one overpowering fact—minimum wage setting by the Federal law is unconstitutional. Infrequently is this mentioned. On the contrary, hours of technical and complicated amendments and differing solutions were the concern of the Members. The dilemma facing a constitutionalist is to listen, learn, and vote to bring out the least obnoxious bill—least endangering freedom of the individual and all the time realizing that every revision is unconstitutional, so that the final vote, no matter how refined the bill is "No." As to the merits of the bill—whether $1 an hour, $1.15 an hour, or $1.25 per hour is the right amount, and how much coverage and exemption should be embraced—the evaluation of each side of the argument was almost impossible—first to reach an agreement of understanding when basic disagreements are so many and then decide the least undesirable solution, was an exercise in futility. Why? Because Government cannot equitably manage private enterprise without fully controlling all facets of enterprise, including price. In other words—business is either free or Government controlled—a solution embracing and endorsing both is inequitable and self defeating. Mainly, wage setting hurts people, the wage earners, because it results in unemployment, business failure, and higher prices.

Some of the inequities and unreal features are: (1) Minimum wages go to the unskilled, poorly educated, handicapped, young person, older person and these, all too frequently, will lose their jobs—no pay is hardly a better solution. (2) Interstate Commerce as the constitutional reason for Federal minimum wage setting has been discarded for an annual dollar volume of sales of not less the $1 million. (This figure can be reduced in the future until all business is covered.) (3) The escalator of $1.15 to $1.25, the latter to be imposed 2 years hence binds a later Congress which can take action on its own. (4) Some small merchants and services are exempt. Discrimination between businesses is arbitrary. The reasons for exempting some businesses apply to many of those not exempt. The bill finally passed raised minimum wages to $1.15 per hour and retained Interstate Commerce as the grounds for the increase rather than the arbitrary dollar volume proposed by the Democrat leadership.

Once again the emotional plea of substandard housing, clothing, food, and living conditions is used to demagogically show that higher pay is deserved. The plain fact is people must be paid what their services are worth, an agreement between employer-employee, not as a result of bureaucratic decision of Federal Government.

The four pillars of our national economic health (1) Federal budget, (2) fiscal policy, (3) debt management and (4) wage productivity need to be analyzed in the light of the New Frontier's radical spending and taxing plan. Then our people must realize where this course is taking us. In this connection a realization of the dedicated beliefs of men around the President advising him and administering the law should be known. Do the people and Members of Congress know the beliefs of these men: Goldberg, Schlesinger, Galbraith, Heller, Cohen, Bowles, Udall, Williams? The President's statement of foreign aid and fiscal policy received this week should be understood by everyone.

Centennial Anniversary of the Civil War

EXTENSION OF REMARKS
OF
HON. JOHN V. LINDSAY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. LINDSAY. Mr. Speaker, in this year of the centennial anniversary of the Civil War, many admirable ceremonies, publications, and other forms of commemoration are being conducted to remind our citizens of the great tragedy of a century ago out of which our forebears

forged in blood and pain the more perfect union of which we are the beneficiaries.

One of the most notable of the centennial events is the publication of Newspaper Americana's Civil War papers. It was recently my privilege to be presented with Newspaper Americana's copy of the New York Herald headlining the inauguration of Abraham Lincoln as President of the United States.

Newspaper Americana's Civil War papers, published by Mr. Robert Miller, of New York City, are a significant set of historical documents which constitute a worthy contribution to the centennial commemoration while contributing to the knowledge and edification of all who read them.

Highways in New York

EXTENSION OF REMARKS
OF
HON. EUGENE J. KEOGH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. KEOGH. Mr. Speaker, in the hearings before the Committee on Ways and Means on the highway trust fund reference was made by a witness to a letter addressed to the President by Governor Rockefeller. In order that the exchange of correspondence might be completely available, it is my privilege to include herein the reply to that letter sent by the President. It follows:

MARCH 14, 1961.

Hon. NELSON A. ROCKEFELLER,
Governor of the State of New York,
Executive Chamber, Albany, N.Y.

DEAR GOVERNOR: I want to thank you for your letter of March 5 in response to my telegram of February 15 urging action to stimulate employment and invigorate the economy.

In my special message of February 28, I recommend to Congress a fiscally sound method of completing the 41,000-mile Federal Interstate Highway System on time by 1972 without violating the pay-as-you-go principle, with which you have often stated your agreement. To meet this completion date set by the 1956 act requires additional authorizations of $11,560 million and additional revenues to the trust fund of $9,740 million. The legislation I have recommended accomplishes this goal.

In your letter you indicate that New York is able to proceed even faster and suggest Congress "authorize individual States to draw on their Federal highway fund allocations as rapidly as they can provide matching funds." This would involve repeal of the Byrd amendment and open-ended deficit financing, or, in the alternative, greatly increasing proposed highway user taxes.

The acceleration program I have proposed will increase the Federal highway expenditures by almost $1 billion per year and reaches the full extent fiscally sound at this time. If New York wishes to go even faster, the Highway Act (23 U.S.C. 115) allows you to do so. A State may finance total projects costs currently and be reimbursed from its Federal allocation for a subsequent fiscal year. I understand that Connecticut and several other States have already accelerated their Federal highway programs under this procedure.

You also can further increase your share of Federal highway funds by complying with the Federal standards for control of outdoor advertising along the Interstate System. I hope you will urge the current session of the New York Legislature to take such action—and also join me in urging Congress to extend the billboard control provision (as U.S.C. 131) for another 4 years and increase the incentive bonus from one-half to 1 percent of a State's allotment.

In closing, may I thank you again for having expressed such an interest in our vital Federal highway program and solicit your support for the sound method of financing I have recommended which I believe is the best for the country.

Sincerely,

JOHN F. KENNEDY.

Crash Program Needed To Save Waterfowl Wetlands

EXTENSION OF REMARKS
OF
HON. LESTER R. JOHNSON
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. JOHNSON of Wisconsin. Mr. Speaker, if our dwindling duck population is to be saved, Congress must act soon to speed up the purchase of lands for migratory bird refuges and waterfowl nesting areas. In 1954, I exposed the diversion of the bulk of income from Federal duck stamp fees to purposes other than wetlands acquisition, for which purpose hunters had voluntarily accepted the fee in the first place. During the next 4 years, I battled for legislation to insure that all income from the stamps would go to provide more refuges for migratory waterfowl. This legislation was enacted into law in 1958.

However, even though all duck stamp money is now earmarked for the purchase of wetlands, it will take years for the program to reach the anticipated goal of 4,500,000 acres. Meanwhile, many areas marked for acquisition will have been drained or converted to other uses, and land prices will most likely have become prohibitively high. The next 10 years are the critical period. Wetlands must be acquired now, or it will be too late to save continental flights of waterfowl.

As every duck hunter knows, waterfowl hunting has grown poorer in recent years, and fewer hunters have taken to the field. As a result, duck stamp sales have lagged. During the 1960 fiscal year, only 1,628,365 Federal duck stamps were sold. This figure is 741,575 below the number sold during the peak year of 1955.

Mr. Speaker, with fewer duck stamps being sold, less money has been available for purchase of new refuges. This, in turn, has resulted in poorer hunting, fewer hunters, smaller duck stamp receipts and a further lag in the acquisition program.

In order to break this vicious circle, I have joined my colleagues, Congressmen HENRY REUSS and JOHN DINGELL, in introducing a crash program for wetlands acquisitions. The measure authorizes a loan of $150 million over the next 10 years to purchase the needed property. Starting in 1971, the money would be repaid to the U.S. Treasury from duck stamp revenues.

This buy-now, pay-later plan will enable the Nation to safeguard its valuable wetland resources during the critical decade of the 1960's. Thereafter, full repayment of the loan will be made from funds contributed by the duck hunters themselves. By creating the wetlands, we shall also be creating the means to repay the purchase-loan money.

Correlation of Federal Activities in Combating Juvenile Delinquency and Cooperation With State and Local Groups—A Constructive Suggestion From the Metropolitan Youth Commission of St. Louis and the Encouraging Response of the Department of Justice

EXTENSION OF REMARKS
OF
HON. LEONOR K. SULLIVAN
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mrs. SULLIVAN. Mr. Speaker, the Congress periodically—and enthusiastically—votes for additional Federal funds to help in combating the alarming extent of juvenile delinquency in this country, although, of course, this is and must be primarily a problem for localities. But Federal assistance and cooperation and leadership, particularly in the fields of research and vocational education, encouraging the training of teachers with special skills in teaching disturbed children—such as called for in my bill H.R. 15, dealing generally with all types of exceptional children—and in other ways can be most useful.

There is a strong feeling, however, that various Federal agencies engaged in activities intended to help combat juvenile delinquency have been operating in something of a vacuum, isolated and insulated from each other, and without much regard to or knowledge of the work being done on the local level in communities which are trying to face up to this great problem and challenge.

Because of that widespread feeling, I am delighted to include in the CONGRESSIONAL RECORD some correspondence indicating that the Department of Justice under Attorney General Robert Kennedy is aware of the situation and is disposed to try to work closely with other Federal agencies and with groups such as the outstanding Metropolitan Youth Commission of St. Louis and St. Louis County. The executive director of that organization, Mr. Eugene P. Schwartz, recently made some very constructive suggestions and some provocative comments to the Attorney General bearing on this issue, and was thoughtful enough to send me a copy of his letter. It stimulated me to write also to Attorney General Kennedy.

This correspondence will, I believe, be of great interest to other Members of Congress and to all Americans who are intensely concerned over juvenile delinquency and over the extent of cooperation among Federal agencies with each other and with State and local agencies in combating it.

This correspondence, including Mr. Schwartz' letter of March 10 to Attorney General Kennedy, my followup inquiry to the Attorney General of March 14, my reply to Mr. Schwartz of the same date, the Attorney General's reply to me and his response to Mr. Schwartz, and also a letter to Mr. Schwartz from David L. Hackett, Assistant to the Attorney General, all dated March 23, 1961, follows:

METROPOLITAN YOUTH COMMISSION, OF ST. LOUIS AND ST. LOUIS COUNTY,
St. Louis, Mo., March 10, 1961.

The Honorable ROBERT F. KENNEDY,
Attorney General of the United States,
Washington, D.C.

MY DEAR MR. ATTORNEY GENERAL: It was with much interest that I read of the request by President Kennedy for an additional $1,158,000 to "battle two phases of crime: organized syndicates of hoodlums and juvenile delinquency."

There are some serious questions I would like to raise in inquiry for information about any plans, particularly as they might relate to the problems of juvenile delinquency.

The statement, as it appeared in our local newspaper, indicated that $618,000 would pay for a program aimed at wiping out juvenile delinquency. There is so much confusion already as to who is doing what in this field of delinquency that I wish there might be a top level conference on this matter before any plan goes ahead.

For example, we already have a little-supported Juvenile Delinquency Section of the U.S. Children's Bureau, a program of delinquency research through the National Institute of Mental Health and, of course, the repeated "expert" announcements from the FBI about what should be done about delinquency. The public, as well as agencies, are so confused as to who should take the lead that I hope the Juvenile Delinquency Section of the U.S. Children's Bureau will at least be consulted.

One of the great problems in our field has been the lack of coordination and interagency planning. The FBI as a law enforcement agency, certainly ought to work cooperatively with social agencies at the national level. Here in St. Louis we have an excellent example of how the law enforcement agencies, social workers and juvenile courts and Metropolitan Youth Commission work together and not against each other. There has been too much professional jealousy and criticisms of other professional disciplines from each other at the national level to keep the public informed as to what should be done.

It is my personal belief that whatever should be done at the national level, as well as at the local level, must be on a coordinated basis. On May 11 and 12 there will be a meeting of local municipal and State youth commissions, youth boards and other public agencies with the responsibility for delinquency control in their respective communities. This will also be a meeting for the formation of a National Association of Public Agencies for Delinquency Control. It is my fervent hope that you will consult with representatives of this group before any plan, either by the FBI or individual agencies, is presented and supported.

Needless to say, I am very grateful for your personal interest in this matter, and we at the local level, who have the responsibility for controlling delinquency in our communities, look for some Federal help. However, this should be on a well planned and coordinated basis. There is much to be questioned as to the role of the FBI with relation to juvenile delinquency. Their responsibilities and activities should be clearly defined in relation to the roles of other agencies working in the same field.

Could we not discuss this matter before we again get the public aroused with misinformation and unsound plans for delinquency control which has already confused our citizens who are anxious to help. There must be a great deal more teamwork by all professional disciplines, and I believe you can give us the leadership to facilitate this.

With sincere best wishes,

Respectfully yours,

EUGENE P. SCHWARTZ,
Executive Director.

MARCH 14, 1961.

Hon. ROBERT F. KENNEDY,
Attorney General United States,
Washington, D.C.

DEAR MR. KENNEDY: I have read a great deal of interest a copy I have received of a thoughtful and provocative letter written to you on March 10 by Mr. Eugene P. Schwartz, executive director of the Metropolitan Youth Commission of St. Louis and St. Louis County on the various Federal programs, funds, efforts, studies, and demonstration projects relating to juvenile delinquency and the seeming lack of coordination or meshing efforts and findings. I would be extremely interested in having your comments on Mr. Schwartz's discussion of this issue, and would appreciate receiving a copy of your reply to him and any other comments you might care to make—or legislative suggestions.

With kindest regards, I am,

Sincerely yours,

LEONOR K. (Mrs. JOHN B.) SULLIVAN.

MARCH 14, 1961.

Mr. EUGENE P. SCHWARTZ,
Executive Director, Metropolitan Youth Commission of St. Louis and St. Louis County, St. Louis, Mo.

DEAR MR. SCHWARTZ: Thank you for keying me in on your letter to the Attorney General. I am enclosing a copy of my followup letter to him, one which is intended not only to reflect my interest in what you have written but also to expedite the course of your letter "through channels" at Justice. I will certainly be interested in his comments.

Sincerely yours,

LEONOR K. (Mrs. JOHN B.) SULLIVAN.

MARCH 23, 1961.

Mr. EUGENE P. SCHWARTZ,
Executive Director, Metropolitan Youth Commission of St. Louis and St. Louis County, St. Louis, Mo.

DEAR MR. SCHWARTZ: Your letter to the Attorney General regarding juvenile delinquency has been referred to me, and I am looking forward to discussing this matter with you in person.

I find that I will be in the St. Louis area in the not too distant future, and hope that I may call your office for an appointment.

Very truly yours,

DAVID L. HACKETT,
Assistant to the Attorney General.

MARCH 23, 1961.

Mr. EUGENE P. SCHWARTZ,
Executive Director, Metropolitan Youth Commission of St. Louis and St. Louis County, St. Louis, Mo.

DEAR MR. SCHWARTZ: Many thanks for your good letter of March 10 regarding juvenile delinquency.

As you know, this administration is very interested in this problem, and for the past 2 months the Labor, Health, Education, and Welfare and Justice Departments have been working together on a program which we hope to be able to announce very shortly. In the meantime, the $618,000 requested for the Bureau of Prisons would be used in the following manner: $300,000 would be spent for demonstration release guidance centers (half-way houses); the remaining $318,000 would be spent on demonstration vocational, counseling and correctional education programs as well as training manuals and institutes for correctional personnel and a statistical program.

I have referred your letter to Mr. David Hackett of my staff who is particularly concerned with this project and have asked him to contact you when he is next in the St. Louis area.

We welcome any further views you may have on this very serious problem.

Sincerely,

———— ————,
Attorney General.

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C., March 23, 1961.

Hon. LEONOR K. SULLIVAN,
Congress of the United States,
Washington, D.C.

DEAR MRS. SULLIVAN: Thank you very much for your letter of March 14 regarding correspondence received from Mr. Eugene P. Schwartz, executive director of the Metropolitan Youth Commission of St. Louis and St. Louis County on the subject of juvenile delinquency.

As you know, this administration is trying very hard to coordinate the activities in this field and for the past 2 months the Labor, Health, Education, and Welfare and Justice Departments, have been working together on a program that we hope we will be able to announce very shortly.

The attached copies of letters to Mr. Schwartz will indicate that Mr. David L. Hackett, of my staff, is already making plans to call on Mr. Schwartz in the near future. We are most interested in his views on this problem and look forward to discussing this matter with him further.

Your interest in this serious problem is greatly appreciated.

Sincerely,

ROBERT F. KENNEDY,
Attorney General.

Broadcasters' Responsibility for Improved Programing

EXTENSION OF REMARKS
OF
HON. OREN HARRIS
OF ARKANSAS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. HARRIS. Mr. Speaker, Gov. LeRoy Collins, the new president of the National Association of Broadcasters, has made important proposals looking to the elimination of excessive violence on television programs and the increase of outstanding drama, fine music, public information and educational programs during prime evening hours. In an effort to support Governor Collins' drive for improved programing, I have written a letter to him and I would like to use this way of informing other members of Congress and the public of the support which the Committee on Interstate and Foreign Commerce hopes to give in this connection to the National Association

of Broadcasters. The exchange of correspondence with Governor Collins is as follows:

MARCH 20, 1961.

Hon. LEROY COLLINS,
President, National Association of Broadcasters, Washington, D.C.

DEAR GOVERNOR COLLINS: In the past, whenever this committee has received complaints with regard to television or radio programs from viewers or listeners, or had referred to it by individual Members of Congress, complaints received by them from viewers or listeners, it has been the policy of this committee to transmit such complaints to the Federal Communications Commission with a request that such complaints be placed in the file of the particular station to be given attention at license renewal time.

The committee has always advised complainants and Members of Congress that the primary responsibility for programing rests with the licensees, that the Communications Act of 1934 specifically prohibits censorship by the Federal Communications Commission, and that the Commission's responsibility with regard to programing is limited (except in cases where a program violates specific criminal statutory provisions) to an overall review of programing at license renewal time in the light of promises made by licensees in their license applications.

In view of the strong stand which you as the new president of the National Association of Broadcasters have taken with regard to the responsibility of broadcasters in connection with programing, especially with regard to the need for eliminating excessive violence and for increasing "blue ribbon" programing, the committee will be glad to assist you in your efforts by furnishing you with copies of communications received by it or referred to it which deal with radio and television programing.

It has always been my conviction which I have expressed in speeches before broadcasters that the licensees and not the Government must assume the primary responsibility for improved programing, and I share your feeling that the National Association of Broadcasters can greatly assist in bringing this about—be it through the formulation of improved codes of good conduct or through other methods such as the plan which you suggested aiming at increased high level television network programs during prime evening hours.

I trust that our close cooperation with your organization in these matters will produce the results which we are seeking.

With kindest regards,
Sincerely yours,

OREN HARRIS,
Member of Congress.

NATIONAL ASSOCIATION
OF BROADCASTERS,
Washington, D.C., March 23, 1961.

Hon. OREN HARRIS,
Chairman, Committee on Interstate and Foreign Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I want to thank you for your letter of March 20, in which you extended the offer to furnish to me copies of complaints received by your committee which deal with radio and television programing.

Your sharing the conviction that the licensees and not the Government have the primary responsibility for programing is another indication of your dedicated and informed interest in broadcasting and its service to the American people.

I gratefully accept your offer. I feel confident this information will prove helpful in administering the self-regulatory efforts of the radio and television codes. You are aware, of course, that favorable comments as well as complaints will assist in making the necessary assessments for carrying out our program. Will you also forward copies of these?

With appreciation and high regards, I am,
Sincerely,

LEROY COLLINS,
President.

MARCH 24, 1961.

Hon. LEROY COLLINS,
President, National Association of Broadcasters, Washington, D.C.

DEAR GOVERNOR COLLINS: I have your letter of March 23, 1961, replying to my letter of March 20, 1961. I am glad you feel that the transmission of comments received by the committee with regard to radio and television programs will be helpful to the broadcasting industry's self-regulatory efforts.

Of course, the committee will include any favorable comments which it might receive along with any complaints which reach the committee. As a former Governor of the great State of Florida you will appreciate, however, that constituents usually are more ready to reach for the pen to express dissatisfaction with some occurrence than they are to convey their pleasure over a job well done.

With kindest regards,
Sincerely yours,

OREN HARRIS,
Member of Congress.

Address by Senator John O. Pastore, of Rhode Island, Before the American Cotton Manufacturers Institute

EXTENSION OF REMARKS
OF
HON. B. EVERETT JORDAN
OF NORTH CAROLINA
IN THE SENATE OF THE UNITED STATES
Monday, March 27, 1961

Mr. JORDAN. Mr. President, a few days ago the distinguished Senator from Rhode Island [Mr. PASTORE] and approximately 26 other Senators took part in debate in regard to the plight of the textile industry and the effect of imports on that industry. At that time the Senator from Rhode Island did a magnificent job, as did all the other Senators who participated in that debate.

On Saturday, March 25, the Senator from Rhode Island addressed the American Cotton Manufacturers Institute, at its meeting at Miami Beach, Fla. The Senator from Rhode Island was received there extremely well, and made a magnificent speech. I ask unanimous consent to have the full text of his speech printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE JOHN O. PASTORE, U.S. SENATOR FROM RHODE ISLAND, GIVEN BEFORE THE AMERICAN COTTON MANUFACTURERS INSTITUTE, INC., AT MIAMI BEACH, FLA., MARCH 25, 1961

My good friend Seabury Stanton and fellow Americans, first of all, I should like to thank you for your cordiality and your hospitality. I am very appreciative of how pleasant you have made my stay here in Miami for the last several hours. I think I speak the appreciation also of Prof. William Miernyk, whom our committee was so fortunate to obtain, even at a very, very busy time for him, to assist and to counsel our endeavors in the investigation that we made pertaining to the decline of the textile industry in America.

Yesterday I met many of you personally. Your compliments were rather universal. Many of you said "Thank you for what you have done for me and thank you for what you have done for the textile industry."

Frankly speaking, and I would be less than honest if I did not admonish you to this, that was not my interest. I am not interested in the plight of the textile industry because an individual may be looking to his profit or to his losses. I am only interested in the textile industry because I think it is absolutely necessary to the economic stability of America. [Applause.]

My interest and my knowledge of the textile industry is not academic. I do not read many books on the subject, but I, in full modesty, will say that my interest is somewhat profound.

I have lived in an atmosphere where the textile industry flourished for many, many years. I have been closely associated with men and women who have managed mills, and I have traveled my daily chores with men and women who have worked at the loom.

Ten years ago in my own beloved State of Rhode Island there were 62,900 people employed in the textile industry. Today there are 27,900. There has been a decline in the textile industry of more than 55 percent in the last dozen years.

When I was Governor of my State between 1945 and 1950, our revenue from textiles alone was 45 percent of our gross. Today I daresay it is less than 15 percent.

Now, it is true that many of the jobs that have been lost in the textile industry have resulted from an increase in productivity, and I dare say that in the textile industry you bear favorable comparison with the acceleration of productivity in any industry in the United States of America.

It is true that we lost much of our employment because of the exodus of some of our mills to a region of our country south of the Mason-Dixon line. We did not like that too much. We do not enjoy it to any extent today, but we accept it as the facts of life; but be that as it may, we today have 27,900 of our working population engaged in the textile industry in the State of Rhode Island, and it is the interest, the concern, and I hope the devotion of the senior Senator of the State of Rhode Island to see to it that these jobs are saved, protected, and made to endure in my State of Rhode Island. [Applause.]

Now, that does not mean that I am a protectionist. I am certainly not a protectionist. Some mention was made here that the Reciprocal Trade Agreements Act will come up for renewal in 1962. I voted for the extension in 1958. We were told at that time by President Eisenhower that he needed an extension of the Reciprocal Trade Act if he was to maintain the peace of the world and the security of our people. I believed him, and I voted for it, and I say to you of the textile industry that if in 1962 Mr. John Kennedy rises before the American people and says "For the peace of the world and the security of our people I implore you to again continue the Reciprocal Trade Act" I shall do so again as an American.

But that does not mean that our problem does not cry out for solution. The one mistake that is being made all along the line, and I do not know whether this has been already mentioned to you, is the fact that on two occasions our subcommittee made this investigation, and on each occasion we were very explicit in our declaration, that we were not urging, we were not appealing for, we were not recommending a change in our traditional foreign policy.

When we instituted quotas on agricultural products in the United States of America we did not alienate the rest of the world. We did so for economic reasons. We have a surplus that was cluttering up our agricultural storage, and it would have been next to folly if we increased that surplus astronomically, and for that reason we invoked quotas. These quotas are accepted by the American people, they are accepted in good grace, I am happy to say, by the rest of the world, and this idea that the word "quota" has become so obnoxious is so surprising to me.

Now, the facts of life in the textile industry are very, very simple.

I applaud and appreciate very much what the Secretary of Commerce had to say in commendation of our subcommittee. I am so happy, and I had Bob Jackson get his speech for me. When he said, "A national administration cannot settle the textile problem in a vacuum or without regard to other matters." I say no one is pretending that we do, no one is asking that we do.

He went on, "But I think I can promise that you will get a decision * * * you will get action." That, to me, is the core of the presentation that he made yesterday.

Now, I am happy to see that upon the recommendation of our subcommittee the President of the United States has appointed a Cabinet-level committee. They have conducted investigations, they are in the process, as Mr. Hodges said yesterday, of analyzing that report, and they, in turn, will report to the President of the United States, and he in turn will report to the people of the country.

I quite agree with Bob Jackson that there is enough power in existing law, there is enough power in the Presidency of the United States to ameliorate the situation in the textile industry in the United States of America and to do so quickly. No further legislation, in my humble opinion, is required.

Two years ago we were quite disturbed over the number of imports that were coming into this country from Japan. Our committee cautioned the country and the world that this was only the beginning.

Since 1959, when our report was made, and within the past 2 years, imports generally have risen 2½ times more. Japan in 1958 exported to the United States of America, as the greatest exporter, about 60 percent of the entire imports in cotton that were coming into this country. Her quantity has gone up 8 percent in the last 2 years, but her overall share is down to 28 percent, which means that other nations have come into the field.

Now, I heard a man say on the floor of the Senate last Tuesday morning that we must not price ourselves out of the foreign market, and I say "Amen" to that, but how in the world is America ever going to price itself into the Hong Kong market. It is a fallacy that blinks its eyes to the truth and to the realism of the moment.

We of our committee feel that our recommendation of flexible, expandable quotas is a fair and reasonable compromise of a very knotty problem. We feel that the law can be administered and be administered effectively. We feel that this law will not only have a salutary effect upon our own American textile economy, but, indeed, will have a salutary effect upon our friends, who are exporting to us from abroad. For the worst thing that can ever happen to America is to lull the rest of the world into the notion that they can produce and produce and produce their textiles and sell them to the American consumer, and then one day, when the goose that has laid the golden egg dies, to wake up and find out that they must begin to close down their own mills. We will end up with more enemies in the end than friends we made in the beginning.

This matter must be discussed on an international level. Our friends must be made to understand that the American market still welcomes them, but we must convince them, as diplomatically as we can, that the American consumer is not inexhaustible. He is alive and kicking only in so long as he has a job, and what we are talking about today, my friends, involves the jobs of 2 million Americans, be it in the textile, broadwoven, manmade, wilton and carpet, and made-up apparel—2 million American jobholders are concerned with this problem.

We can absorb, as we have been able to, what has already come in. What concerns us most is the trend. If imports have gone up 2½ times in 2 years, what will they be in 5 years? What will the cure be in 10 years, and where will the textile industry be in 15 years? The one industry that is second only to steel in our national security.

I have heard so much about sacrifice. There is not an individual in this room who, this morning, would not be willing to sacrifice his plant and his fortune if he or she thought for 1 minute that the doing of it would mean to remain free and not become slave. But where did we ever get this idea that the American textile domestic industry must vanish in order to preserve the peace of the world?

You have been most helpful to our committee, but I daresay, in sounding this clarion here this morning, we have achieved no results. We have been complimented to the extent that we are dizzy with flattery, but flattery is not flexible, expandable quotas.

The job must be done, the responsibility must be met judicially and wisely.

I know it is not simple. I know that we have problems, but look at wilton and carpet—3 percent of our entire production in 1948, 10 percent of our entire production in 1956, and 26 percent of our production in 1960—how long will it take? You can take category by category and the story is all the same.

Now, we do not mind, in giving foreign aid to our friends, we do not mind in helping them to build their factories. I have fought for it. In philosophy I am an internationalists and not a protectionist.

We do not even mind the two-price cotton system, provided that when our friends make it into cloth they put it on the backs of their own people. [Applause.]

But to send it back to us in competition with us is again turning your backs to the facts of life.

Now, I know that what we have suggested is not universally popular. I know that it must be studied and studied seriously. In our first report we advocated that in the offshore procurement program a certain amount of those American dollars be expended to buy American-made products. We were flatly told that we could not interfere with the machinations of a foreign government. We could not tell it where to spend our aid because that would not be right, yet we have lived to see, in recent months, that that policy has been reversed.

If, 2 years ago, someone rose on the floor of the Senate and said, "$500 duty-free is too much to bring into America from abroad by an American tourist" they would have called him an isolationist, and within weeks we have seen that drop from $500 to $100.

All I am saying to this administration, please make textiles part of the New Frontier. [Applause.]

I say this to you, that if our cause does not receive a welcome reception at the hands of a Luther Hodges, who knows the textile industry even better than I do—if our cause is not received favorably by Mr. John Kennedy, who lived in the environment and the atmosphere of the textile industry and saw it decline in his own beloved State of Massachusetts, then I daresay, and I say this frankly and as honestly as I can, we either have no cause or our cause is destined to die on the vine.

This is the time; this is the place. These are the facts. We are saying to the administration, look at them realistically. It is not enough that you recognize how badly off we are unless you bring to us some kind of a reasonable remedy. If, in our recommendations, we have gone too far and, for the national interest we must retreat a little bit, show us where our patriotic duty lies and we will accept it, but whatever you do, please look at the textile industry, understand its plight and save it, not only for America but for the rest of the entire world. Thank you. [Applause.]

Needed: Blueprints for Freedom

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES
Monday, March 27, 1961

Mr. WILEY. Mr. President, today the free world is confronted with an ever-growing threat to its survival. All around the globe the Reds are thrusting forward to gain control of more lands and people. The ultimate objective—repeated again and again from Lenin to Khrushchev—is world domination.

In Laos, for example, we are witnessing one more effort of the Communists to penetrate and stir up trouble, arm and train a rebellious force, and then attempt to take over the country.

This must be stopped.

To more effectively combat the expansionist efforts of the Reds—not only in Laos, but elsewhere in the world—however, we need a more effective counter-offensive.

Yesterday, I was privileged to make an address over radio station WIND of Chicago. In the address I made some recommendations which I feel could well help to deal with such situation.

I request unanimous consent to have the text of this address printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR ALEXANDER WILEY, OF WISCONSIN

Friends, the Nation today faces greater, more complex problems to its progress, security, and survival than ever before in history. However, this is no cause for defeatism. Why? Because the world of the 1960's also offers us better, more effective tools to find solutions to these challenges.

As a nation, we have the highest standards of living in history; the greatest defense military force in the world for our security; the most advanced scientific-technological program; the most productive agricultural-industrial systems; the greatest opportunity—within a climate of freedom—to attain our goals as individuals, and as a nation.

Now, admittedly, we face serious problems: At home, we have too much unemployment—still estimated over 5½ million—and regrettable lags in industry, business, and other segments of the economy. Naturally, we must undertake strong, effective measures to cure these ills and further improve the outlook.

To keep the picture in perspective, however, we must remember that we also have a high rate of employment—estimated at about 65 million—and a gigantic gross national product of $503.5 billion.

In spite of our difficult problems, then, we must not allow—as some would encourage—"curtains of gloom" to descend over the Nation. In my judgment, falling prey to such an attitude of pessimism would cause the country far greater harm than the present economic problems.

Rather, we must go forward—confident in our ability to solve the problems; to provide for our defense; and ultimately to make—as I believe history will record we are now making—a constructive contribution to peace in the world, and a better life not only for our own people but for all mankind.

In a world shrunken by the ingenuity of man, controlling more of the forces of nature, our Nation cannot be isolated—an "island unto itself." Rather, the design of U.S. policies must consider universal as well as domestic factors in the overall picture. In this space age, events—economic, military, political, and scientific—elsewhere in the world—affect, sometimes dramatically, our domestic as well as foreign programs.

PEACE—NO. 1 CHALLENGE

Now let's take a look at some of the major trouble spots on the globe: Headlines of newspapers across the country and around the world continue to spotlight the difficulties in Africa, particularly in the Congo. In that troubled nation, the UN—supported by the United States and other countries—is attempting to create stability and a climate in which the Congolese people can emerge as an independent, self-governing nation.

Unfortunately, the Communists are opposed to such a goal. Rather, they continue to attempt (a) to meddle in the internal affairs of the Congo; (b) and to defy, denounce and, as possible obstruct the efforts of the U.N.; overall, however, the U.N. continues to be the most promising hope for blocking a Red takeover and ultimately establishing stability in that troubled land.

The Congolese people themselves, however, need to demonstrate a greater sense of responsibility. The wanton killing, rape, and other atrocities, for example, reflect unfavorably upon the capability of the Africans to act humanely in relation to their fellow man or to govern themselves and their country.

COMMUNIST EFFORTS TO DESTROY THE UNITED NATIONS

For the future, however, we can expect that the Reds will continue to attempt—not only to stir up trouble in the Congo, Laos, South America, and elsewhere, but also to influence, control, or destroy the United Nations. In attempting to cope with the growing threat to freedom in the world, there is a real need to review our policies. For too long, for example, the West has allowed Mr. Khrushchev to get away with the policy of considering the land and people behind the Iron and Bamboo Curtains as taboo to the West, or sacred property for the Reds. By contrast, the Communists consider all areas outside the Red orbit to be open hunting grounds.

With these ground rules for power-ideological-economic struggles, the West, then, finds that it can only be stalemated, or else lose ground. However, the Reds in each such contest have everything to gain and only a little to lose. The free world, I believe, needs to develop a more effective action program to counter the Red offensive. This could involve more creative and effective efforts to penetrate behind the Iron and Bamboo Curtains.

NEEDED: BLUEPRINT FOR FREEDOM

Globally, to attain their goals, the Communists design master plans that include (1) tactics for taking over a country; (2) techniques for transforming it into a Communist state; and (3) once controlled, establishing it as a subsidiary branch of the world conspiracy.

By contrast, the free world—although engaging vigorously in efforts to protect freedom—unfortunately has no master blueprint for the ultimate triumph of liberty. Why? Because liberty implies an inherent right of people to be self-determining. Consequently, we often feel a little conscience-stricken about efforts to influence them, even though we ourselves are dedicated to freedom.

In the face of a militant effort by the Communists to mobilize more people and resources to bury us, however, we need—indeed we must—design, and put into action, blueprints of freedom for the world. The efforts would include creation of plans for free self-government tailored for each country; educating a cadre of leaders within that country to carry the banner of liberty; insofar as possible, educate the people on the meaning of freedom, including the ways in which free institutions can serve them in attaining their personal and national goals; providing technical assistance, guidance, and support—along the lines now being done—to help these countries establish a firmer foundation for attaining and perpetuating a free self-governing system.

The creating of such "blueprints" should, in my judgment, provide a greater sense of direction to our national and international efforts for winning more people for the ultimate triumph of freedom and for defeating communism.

CHAOS IN LAOS

Internationally, also, the spotlight is now on Laos. As this crisis is shaping up, it threatens to be a major contest between East-West forces. The Reds are supplying arms and ammunition to local Communists. Increasingly, these threaten the stability of the country and the survival of freedom for the Laotian people. The United States has taken a firm stand against aggressive policies of the Soviet Union. The Communists will not—I hope—turn the conflict into a Korea-type situation. The crisis, however, represents one more area in which the Reds are ready and willing to threaten world peace to further their aim of world conquest.

Currently, a meeting of the Southeast Asia Treaty Organization is underway. I am hopeful that from the conference will come some realistic action to help halt the Communist tide in that area of the world.

UNITED STATES-UNION OF SOVIET SOCIALIST REPUBLICS: DEFINITIONS OF COEXISTENCE

Despite Red-created warring in Laos, however, Mr. Khrushchev deceptively still endorses a policy of so-called peaceful coexistence. In Western understanding, coexistence is an inherent right of nations to live and progress together in the world. As possible, the United States has adhered to a philosophy of not only "live and let live," but also "live and help live."

By contrast, the Communists define coexistence as a period in which the Reds attempt by nonmilitary means—political, economic, ideological—to extend the influence and control of communism over more land and people. The result: a so-called "cold war."

For the future, the battle against communism will be fought on the production line, around the conference table, through trade channels, on the ideological plateau for the minds of men—all of these conflicts under the shadow of poised, ready-to-fire, pushbutton nuclear-warhead missiles. The free world can—and must—win the cold war. What is at stake? Our survival.

NEEDED: A STRONG U.S. DEFENSE

The "missile-muscle" of the United States—now and in the foreseeable future—will continue to serve as a major deterrent to military expansion by the Communists.

For fiscal year 1962, over $47 billion are earmarked for national defense programs. This includes production of advanced aircraft, missiles, guns, bombs, and other arsenal-for-defense materials for land, sea, air, and space forces; maintenance of trained personnel; research and development for new weapons; and cooperating with other nations in common defense through the mutual security program.

As a leader of the free world, we need to maintain a strong, forward-moving economy, with full employment, for meeting the domestic needs of our citizens, as well as to retain a good, healthy lead over the Communists' challenge on the agricultural-industrial-consumer goods production line; further strengthen our jet-nuclear-missile-space defense—second to none—to guard the ramparts of freedom and to deter would-be aggressors elsewhere in the world; pace our scientific-technological programs to stay well ahead of competition; and carry forward a realistic foreign policy, designed to obstruct the expansionist efforts of Communists; accommodate, or negotiate, conflicts of interest among nations or blocs of nations; prevent a third world war; and, to promote the cause of peace.

Testimonial to William F. Casey

EXTENSION OF REMARKS
OF
HON. SILVIO O. CONTE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Monday, March 27, 1961

Mr. CONTE. Mr. Speaker, I consider it an honor to place this speech, which was my privilege to deliver Saturday night, March 25, 1961, in Greenfield, Mass., in honor of a great American citizen, William "Bill" Casey, in the CONGRESSIONAL RECORD:

SPEECH BY THE HONORABLE SILVIO O. CONTE, GIVEN IN HONOR OF WILLIAM F. CASEY AT THE TESTIMONIAL BANQUET HELD IN GREENFIELD, MASS., SATURDAY NIGHT, MARCH 25, 1961

It gives me great pleasure to be here this evening. Above all, I consider my presence here a distinct honor. It is not often that praise can be aired in public, nor is it often that tribute is made until a man is gone. But this evening, we are going to honor a man who is very much alive and who is with us. We are going to say those things we have carried in our hearts—things we have known so long but kept within ourselves or shared them in the confidence of others—our sincere feelings about Bill Casey.

I know that we have often heard it said, that this person or that one, has restored our faith in humanity. I believe that our consideration should be over the key word "humanity." By having lost faith in our fellow men we are opening the doors to an attitude toward life of cynicism, suspicion, pettiness, and even hate. There are those humans who have stalked through history to bring misery and suffering to their fellow men. Yet, despite these black moments in the chronicle of man's time on earth, we find those bright lights who restore our faith in the good * * * and that the eternal things of value must have their foundations in virtue alone. Along with the Judases, Hitlers, and Stalins, who have portrayed the baseness to which humans can descend, let us never forget that we have the greater balance on the scale of humanity represented

by such men as a St. Francis, an Abraham Lincoln, and just recently in our time, a Dr. Dooley.

Of this group who spend their lives restoring man's faith in himself in his power to do good, to leave everlasting traces of the time spent on this earth displaying the values which have the eternal stamp of this group, Bill Casey certainly belongs.

If I may, I would like to review Bill's life to date. He is a native of our great Commonwealth, and came from Peabody, his birthplace, here to Greenfield in 1907. Before World War I he enlisted in the Navy and served aboard the U.S.S. *Nebraska*. Long before we ever heard of amphibious operations, Bill Casey participated in the landings at Vera Cruz, Mexico, in that famous expedition. During the Great War, he served aboard the armored cruiser U.S.S. *Seattle*, and he was in convoy with the first contingent of American troops to France.

Interestingly enough, Bill transferred to the infant submarine service and saw duty in the Atlantic on submarine hunting. After the war, he worked for the Lake Torpedo Boat Co., testing submarines for delivery to the Navy. I understand that these tests consisted of dives to test the hull strength of the craft. It was men like Bill, early pioneers in submarines, who led the way to the great fleet we have today.

After being hospitalized for war injuries, Bill returned here to Greenfield. This was the best move he ever made. I am sure that everyone in Greenfield feels the importance of that decision.

He opened an automobile electrical shop which, from 1931 to 1952, was located on Main Street. In 1952 he assumed the post of veterans agent for Greenfield. But during the years I have spanned so briefly in my biographical sketch, Bill Casey was not by any means inactive in many civic activities. He was commander of the John F. Harrington Post of the Veterans of Foreign Wars in 1926 and 1927, and he was also first county commander for that organization. Since 1933, he is president of the Greenfield Patriotic Societies, and has served Greenfield on many committees like the Fourth of July, Armistice Day, and the February anniversaries. He was a Cubmaster of the Newton School Cub Scouts from 1940 to 1944. As if these activities were not enough to wear down any man, Bill has given of himself to even more. Board of the Registrar of Voters, secretary of the Greenfield Finance Committee, Military Manpower Committee during World War II, and since 1951, director of civil defenses for Greenfield. There are so many more things he has done, and is currently undertaking, that he seems like a "one man" city of Greenfield. It would take many people to do all the things he has, and in the manner he has, over the years. I know that Bill has done all of these things, and will continue to do them, because he has faith in his fellow men and he derives that lasting merit which comes from dedication to his service.

What emerges so clearly from his biography, is not the quantity of activities, organizations, or endeavors—for they in themselves, could be unimportant and valueless—no, what has made a great impact on us, is the quality of the motivation which Bill Casey has constantly kept as his ideal.

For I know, as do all of us here, that he seeks no reward, needs no praise, nor does he want a public display of his works. For indeed, Bill Casey is one of the great examples of what men should be, of what men want to be, and of what men can do. His humility would prevent hollow praise, and his sacrifices do not demand vocal approval.

To reassure you, Bill, that we are grateful, let me say that what you have done rests deep in our hearts, spirits, and minds—there, like a seed, your deeds prompt our sincere thanks and set before us the great examples of those values which have virtue as their basis and eternity as their objective. Because of you, we have once again come to understand the immortal fact that man can be a power for good. That good in itself, is sufficient. In us, Bill, you have cast living monuments, and you have set up again within us all, the faith and hope in humanity, in man himself, which we all need.

I know that in the years ahead, we shall have the unique benefits of your virtues to continually guide us, to lead us, and to refresh our dampened spirits.

For these reasons, we speak without shame or embarrassment—and I am positive that everyone here, in their hearts and minds, join me in saying that we are profoundly grateful for not only what you have done and will do, but because you came to live among us and with us you shall remain forever.

DISA Delegates Hear About National Milk Sanitation Legislation

EXTENSION OF REMARKS
OF
HON. LESTER R. JOHNSON
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, March 27, 1961

Mr. JOHNSON of Wisconsin. Mr. Speaker, on March 10, I had the pleasure of meeting with the delegates to the 42d annual meeting of the Dairy Industries Supply Association and telling them of the work that is being done to enact my proposed national milk sanitation legislation and take the interstate marketing of milk out of the horse-and-buggy era.

As I observed in my speech, these dairy equipment suppliers have a large stake in this type of legislation to permit the free flow of high quality milk from State to State. At the present time, they must go to the added expense of custom-making dairy equipment to meet the varying State and local sanitation regulations. Naturally, the extra expense must be passed along to the purchasers of the equipment and eventually to the consumers of milk.

Under leave to extend my remarks, I would like to include my speech to the DISA delegates in the RECORD:

VARYING MILK REGULATIONS ADD TO COST OF DAIRY EQUIPMENT

Thank you, Mr. Chairman. I was very pleased to accept the invitation to speak to you delegates to the 42d annual meeting of the Dairy Industries Supply Association on a subject that is close to all of us, national milk sanitation legislation.

As a Representative of a dairy district in the dairy State of Wisconsin, I have a longtime and deep-seated interest in the many phases of the dairy industry. This interest has led me into a 4-year fight to correct one of the most unfair and costly milk marketing situations which confronts the dairy industry today. I am referring to the use by all too many States and municipalities of varying, arbitrary, and frequently outdated health standards as trade barriers against the free flow of high quality milk in interstate trade.

As dairy equipment suppliers, you are unhappily familiar with the confusion and unnecessary expense which results from the difference of opinion among many State and local sanitarians about construction requirements for equipment used in handling milk. Dairy equipment is manufactured for sale and installation all over the United States. In the interest of efficiency and economy, it is essential that once an effective standard for a piece of dairy equipment has been established, this standard be universally accepted.

You can well be proud that your organization was a pioneer in the effort to establish a set of sanitary standards for dairy equipment which would provide adequate protection for the public health. As early as the 1920's, the Dairy Industries Supply Association, then known as the Dairy and Ice Cream Machinery and Supplies Association, was working with city, State, and Federal sanitarians in developing what are now known as our 3–A sanitary standards for dairy equipment.

The first rough equivalent of a 3–A sanitary standard was developed in 1929, and applied to sanitary fittings used in milk plants. Throughout the 1930's the work on standards was slowly broadened. Following World War II, the sanitarians, the users, and the manufacturers of equipment began to formulate and publish the standards in the manner in which we know them today.

DISA has continued to make a vital contribution to this program through its task committees, which conduct the initial investigation on any request that a standard be developed for a certain type of equipment. That request may come from a sanitarian, the U.S. Public Health Service, representatives of users or an equipment company. As you know, a proposed standard must undergo thorough examination and considerable revision before it is signed by the chairman of the Committee on Sanitary Procedure of the International Association of Milk and Food Sanitarians, by the Chief of the Milk and Food Branch of the U.S. Public Health Service, by the chairman of the sanitary standards subcommittee of the dairy industry committee, and by the chairman of the DISA technical committee. With all of this study by all interested parties, including the watchdogs of our public health, a 3–A standard is certainly a valid standard for dairy equipment.

However, even though these 3–A standards are recognized as valid and in the public interest, they are not accepted in many areas by local sanitarians who are enforcing that area's particular and frequently peculiar set of milk regulations. As a result, equipment must be custom made to conform with varying standards, and this adds to the cost of the equipment. Naturally, the extra expense must be passed along to the purchasers of the equipment and eventually to the consumers of milk.

In discussing this problem with a Wisconsin manufacturer of bulk milk tanks, I learned his company has to manufacture a special tank for the State of Louisiana, which requires that a pipeline milk hole be added in the bridge of each tank and that a special valve be used on Louisiana installations. The States of New York and Georgia require a special type dipstick, and this means additional manufacturing steps and increased inventory for farm tank manufacturers. One county in Pennsylvania insists upon a stainless steel drip shield around the agitator shaft, even though all other areas accept a neoprene or hard rubber shield for this purpose.

In the course of my work with national milk sanitation legislation, I have made an extensive study of milk regulations in different areas, particularly those which appear to be using their health rules to create a milk monopoly for local producers. For the life of me, I cannot see what some of those regulations contribute to the production of wholesome sanitary milk.

Take, for instance, the regulation calling for longer legs than the accepted standard

length on bulk milk tanks. I can't imagine what benefits can come from an extra 2 inches of leg on a bulk tank, unless perhaps the local health officials feel the farmers need the additional exercise that is involved in lifting the pails of milk the extra 2 inches. Now I am familiar with the amount of physical labor involved in farming, and I can assure you a farmer really doesn't need any extra exercise. Matter of fact, he could do with less.

Another ridiculous regulation which is used in some areas calls for a mirrorlike finish on the exteriors of bulk milk tanks, which never come in contact with the milk at all. One sanitarian insists that he will not approve a tank unless he can see his reflection when he looks at the equipment. I would suggest that he invest in a pocket mirror for that purpose.

One of our Southern States requires the bulk-milk pickup trucks to have refrigeration capacity to cool the pump compartment as well as the milk tank. Inasmuch as the pump compartment has to be opened at each farm on the trucker's route, you can imagine how much good is derived from this extra refrigeration equipment, which adds an additional $1,700 to the cost of each truck. I might add that only one State has this requirement. All of the other States have found such a regulation to be unnecessary and useless.

Milk is one of our most basic foods. It is also the only one of our major food products which is not allowed to more freely from State to State. In this day and age of modern transportation and refrigeration methods, we are still hampered by a horse-and-buggy type of interstate milk marketing. This works to the disadvantage of you dairy equipment suppliers, the bulk of dairy producers, and last but not least, to the disadvantage of consumers, who eventually have to foot the bill for the costs of custom-made equipment and duplicate inspections of milk.

Under the provisions of my proposed National Milk Sanitation Act, the U.S. Public Health Service's proven Milk Ordinance and Code would be established as the quality yardstick for milk shipped in interstate trade. Fluid milk and fluid milk products meeting the standards of this code could not be kept out of interstate trade because of varying local health rules.

My bill is designed to avoid adding another layer of expensive milk inspections to the existing system. Under the provisions of this measure, dairy plant inspections would continue to be carried on by State and local health officials. The results of their inspections would be certified by the U.S. Public Health Service. Milk from certified plants could move freely from State to State.

Fortunately, we did not have to start from scratch to formulate a good, sound set of uniform standards for quality milk. We already have a proven set of health regulations in the U.S. milk code. Designed as a model for the industry, the code is the work of top technical experts in both the health and dairy fields. Since the first code was published in 1924, it has been revised 12 times to keep pace with the rapid improvements in milk processing, handling and shipment. The code has already been voluntarily adopted as the basis for milk sanitation regulations by 36 States and 2,000 cities and municipalities.

However, we still have the hold-outs who are not about to give up their pet theories on milk sanitation to voluntarily accept the Public Health Service's milk code. These holdouts are the ones who are causing you to custom-make dairy equipment rather than produce it all on an efficient assembly-line basis.

I might add that the U.S. Milk Code recognizes the validity of your 3–A sanitary standards. The section relating to these standards reads as follows: "Health officers should accept new dairy equipment which complies with the 3–A sanitary standards promulgated jointly by the sanitary standards subcommittee of the dairy industry committee, the committee on sanitary procedure of the International Association of Milk and Food Sanitarians, and the milk and food program, Division of Sanitary Engineering Services, Public Health Service, Department of Health, Education, and Welfare. Equipment manufactured in conformity with 3–A sanitary standards complies with the sanitary design and construction standards of this ordinance and code."

Actually, the introduction of my national milk sanitation bill, H.R. 50, on the opening day of the 87th Congress was act three in my fight for this type of legislation. I had introduced my first milk sanitation bill, H.R. 7794, during the 85th Congress, and hearings were held on the measure before the Health and Science Subcommittee of the House Interstate and Foreign Commerce Committee. The subcommittee did not report the bill to the full committee, and the measure died at the close of the 85th Congress.

However, testimony at those hearings proved very useful to me in pointing out a number of weak spots in the legislation, and I set to work with public health officials to iron out those difficulties. By the time that the 86th Congress opened in 1959, I was ready with an improved milk sanitation bill, the much discussed H.R. 3840. This measure used a new approach to the problem and satisfied the major objections raised to my first milk sanitation measure.

I might add that H.R. 50, my national milk sanitation bill now before the 87th Congress, is almost identical to H.R. 3840. Only a few minor technical changes have been made in order to clarify the wording of several provisions relating to the State milk sanitation rating agency. Therefore, any references which I make to the provisions of H.R. 3840 also apply to H.R. 50.

Objections had been raised to the tendency of my first bill to force all milk up to the standards of the U.S. milk code. Many sanitarians were also of the opinion that this bill took away their rights to control the quality of milk shipped within their state or locality.

The new version does not require any State or municipality to adopt the U.S. milk code, nor must all milk shipped in interstate commerce conform to the code. However, milk which meets the high standards of the code cannot be excluded from any interstate market on health grounds.

My bill also contains many safeguards for areas receiving milk shipped from certified plants. Local health authorities would retain the right to inspect the milk upon arrival to make sure it had not deteriorated or been mishandled in transit. From there on, the handling, processing and sale of the interstate milk would have to meet the requirements applied to milk entering the market from sources inside the State.

This concept of Federal legislation to eliminate the misuse of milk sanitation regulations was proposed and developed by a committee of the Association of State and Territorial Health Officers. Following the introduction of my original milk sanitation bill, the association set up a committee to study the matter of Federal milk sanitation legislation. A year later, the Committee issued an official report titled "Need and Recommended Principles for Federal Milk Sanitation Legislation."

My bill is in full agreement with the principles set forth by the Association of State and Territorial Health Officers. And when hearings were held on H.R. 3840 in April of last year before the Health and Safety Subcommittee of the House Interstate and Foreign Commerce Committee, the association sent Dr. Russell E. Teague, commissioner of health of Kentucky, to present a strong statement in support of the legislation.

The revised national milk sanitation measure drew much stronger and more varied support than the original bill. When I introduced the first bill, I was joined by two of my colleagues in the House of Representatives, Minnesota Congressmen FRED MARSHALL and EUGENE MCCARTHY, who is now Senator MCCARTHY. On the Senate side, the measure was sponsored by Senator HUBERT HUMPHREY, of Minnesota.

But when I introduced my revised milk sanitation bill, H.R. 3840, 19 other Congressmen introduced identical measures, and the bill had four sponsors in the Senate. To date, my current bill, H.R. 50, has been introduced by 13 Congressmen and has 4 sponsors in the Senate.

When hearings were held on H.R. 3840, so many witnesses appeared that the subcommittee was hard put to hear them all in the 3 days allotted to study of the measure. The list of supporters is an impressive one. In addition to the Association of State and Territorial Health Officers, we had favorable testimony from the National Association of Dairy Equipment Manufacturers; the U.S. Department of Health, Education, and Welfare; the International Association of Milk and Food Sanitarians; the Dairymen's League Cooperative Association of New York; the General Federation of Women's Clubs; the National Consumer's League; the Connecticut Milk Consumers Association, Inc.; the National Creameries Association; the Pure Milk Association of Chicago; the State Farmers Unions and Farm Bureau of Wisconsin and Minnesota; the Wisconsin Association of Cooperatives; the Wisconsin Council of Agricultural Cooperatives; the Governors of Wisconsin and Minnesota; the sanitary engineers from the North Carolina State Board of Health, and many other interested groups and individuals.

The bill received a favorable report from the U.S. Department of Health, Education, and Welfare, the Department of Commerce and the Bureau of the Budget. The Department of Agriculture remained uncommitted on the measure. When asked if Agriculture opposed the bill, a USDA witness replied: "No, but neither do we favor it."

However, when H.R. 50 comes up for hearings, I am hopeful that the Department of Agriculture will join the ranks of active supporters. Our new Secretary of Agriculture, former Minnesota Governor Orville Freeman, has always supported this type of legislation, and testified strongly in its behalf during the hearings on H.R. 3840.

President Kennedy endorsed the principles of national milk sanitation legislation at a midwestern farm meeting held in Des Moines, Iowa, last August. He noted that our constitutional convention was originally formed in order to promote interstate commerce and provide for its free flow. He added that he didn't believe any unnecessary or artificial standard should be used in any area in any part of American life to block the flow of commerce.

Incidentally, the 1960 Republican Party platform endorsed the National Milk Sanitation proposal, so both parties are on record in favor of the legislation.

Shortly after I introduced H.R. 50, I was pleased to learn that the American Public Health Association had gone on record in favor of the National Milk Sanitation measure. This action was taken by the association's governing council, which passed a resolution calling for enactment of legislation to permit the free flow of high quality milk from State to State. The association is the major organization of public health officials in the United States, having over 13,400 members. Significantly enough, this association seldom takes a position on pro-

posed national legislation. National milk sanitation and Federal water pollution control are two of the few exceptions made to this rule by the association.

I understand that we are going to have a question and answer session following my talk. The question I hear most frequently is: What are the chances for passage of national milk sanitation legislation during the 87th Congress? Lacking a crystal ball, I can only assess the progress which has been made in this direction since I introduced my first milk sanitation bill and note the steadily snowballing support for this type of legislation.

As I mentioned before, my original milk sanitation bill received hearings but was not reported out by the subcommittee. My revised measure, H.R. 3840, had hearings and was favorably reported by the Health and Safety Subcommittee to the House Interstate and Foreign Commerce Committee. However, the full committee took no action on the bill, so it never reached the floor of the House for a vote. This year, I am pressing for early hearings before the full Interstate and Foreign Commerce Committee, and I am optimistic about the possibility of getting them.

Eventually, Federal legislation must come in this field, and the sooner it does, the better for the general welfare of the citizens of this country. Our present system of Balkanized milk markets benefits only the small minority of milk producers who are protected by these local milk monopolies. The perverted use by some States and municipalities of sanitary regulations as trade barriers against high-quality milk from other areas, works a hardship on you as dairy equipment suppliers. It works a hardship on your customers in the dairy industry. And it works a hardship on all of us as consumers.

Sanitary regulations should be used only to protect the public health, not for the protection of local monopolies. No one can question the fact that the U.S. Public Health Service has always been and always will be a zealous watchdog of our public health. For this reason, my national milk sanitation legislation calls for the use of the Public Health Service's milk code as the quality yardstick for milk moving in interstate trade and provides that the program be administered by the Public Health Service. I strongly feel that this is good, sound legislation and should be enacted into law as soon as possible.

Thank you for asking me to take part in your meeting. It has been a pleasure for me to be here.

Woodrow Wilson and President Kennedy

EXTENSION OF REMARKS

OF

HON. THOMAS J. DODD

OF CONNECTICUT

IN THE SENATE OF THE UNITED STATES

Monday, March 27, 1961

Mr. DODD. Mr. President, on March 19, my good friend and colleague, Senator ROBERT C. BYRD, of West Virginia, made a speech before the Knox County Democratic Women's Club, in Knoxville, Tenn. Like every speech my esteemed colleague makes, this one was filled with provocative thinking—especially with regard to our foreign aid programs and our import policies. Because I think Senator BYRD's remarks deserve the widest possible circulation, I ask unanimous consent to have them printed in the CONGRESSIONAL RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS OF U.S. SENATOR ROBERT C. BYRD, OF WEST VIRGINIA, AT KNOXVILLE, TENN., MARCH 18, 1961

One of the fringe benefits of serving in the Senate is the pleasure which comes from working with your two fine Senators from Tennessee—ESTES KEFAUVER and ALBERT GORE. No Members are more highly respected by their colleagues on both sides of the aisle, or by so many persons in all branches of the Government.

If there is one characteristic that sets Senator KEFAUVER apart, it is courage. It took courage to challenge the power of the big criminal syndicates, as he did during his first term. It took courage to question whether so-called administered prices in the steel, bread, automobile, and, now, the prescription drug industry, are good for the consumer or for our total national economy.

In all of these battles, and in others in which Senator KEFAUVER has been engaged, the people have been the victors. Turning the spotlight on hoodlums and racketeers has brought a public awareness about crime that has made our communities safer for ourselves and our children. And in going to bat against monopolistic practices and concentration in some of our major industries, Senator KEFAUVER has applied the brakes on price inflation in many areas.

Your senior Senator has been no less a man of courage in international affairs. As much as 10 years ago, he took the risk of being called a dreamy-eyed internationalist by battling for an organization of Atlantic Community nations, which would give attention to common economic and political, as well as military problems. Only now is the wisdom of this viewpoint being realized in Washington.

For all of his activities in national and international statesmanship, Senator KEFAUVER is constantly attuned to the problems and needs of his constituents in Tennessee. He gets—and answers—probably as much mail and as many telephone calls from individuals as any Senator. And his office is one of the busiest on Capitol Hill. I know you are proud of ESTES KEFAUVER, and you have every right to be.

Your junior Senator, ALBERT GORE, is now in his 22d year of service in the Congress. This period includes service both in the House and Senate.

ALBERT GORE'S record has been marked by support of progressive legislation. As you know, among his major legislative accomplishments, since coming to the Senate, is the Highway Act of 1956, of which he was coauthor. It has been largely as a result of his leadership that the Nation is now engaged in a mammoth program to bring into being adequate highways to serve the needs of an expanding economy and a growing population.

As a member of the Joint Committee on Atomic Energy, and before that, as a member of the Appropriations Committee of the House, Senator GORE has played a leading role in making nearby Oak Ridge the atomic capital of the world. The wealth of scientific resources developed at Oak Ridge constitutes an asset not only to Tennessee, but also to the Nation.

But ALBERT GORE'S activities have not been limited to his support of specific legislative proposals. His has been an influential voice in the shaping of policies of the Democratic Party. He has the perception to understand that the policies which guide the Democratic Party are grounded in the best interests of all the people, and he has the courage to speak out about the things in which he believes.

The courage of Estes Kefauver, and Albert Gore, are in the tradition of Woodrow Wilson, that great Democrat whom we remember tonight. I might add, parenthetically, that they are also in the tradition of Franklin D. Roosevelt, Harry S. Truman, and John F. Kennedy.

Courage, I might say, is synonymous with the name of Woodrow Wilson. And because he had courage, we have inherited, through his actions, a tremendous legacy of democratic tradition and national purpose.

The debt this country owes to Woodrow Wilson is immeasurable. His contributions to the strength and growth of America are too long to enumerate. But his determined fight for passage of the 19th amendment—the right to vote given to the women of the United States—will always be one of the things which assure Woodrow Wilson, throughout all time, a place among the greatest of our Presidents. Not only was his fight a recognition of the role of women through the generations—in war and peace, in prosperity and poverty, in crowded cities and in sparsely populated villages—it also was an affirmation that America needed the political participation of the homemaker for a more responsible development of the human aspects of our national life.

The strength of America today was founded in our homes yesterday, and the strength of America tomorrow is founded in our homes today. For it is in the home that each generation of Americans learns to live and work with other people—learns to understand and appreciate the precious quality of the American way of life. This is what Woodrow Wilson so keenly comprehended when he waged his fight for woman suffrage.

While Wilson was waging a fight for political emancipation of our women, he was also seeking to emancipate American political thinking from its narrow provincialism—from its concept that the broad oceans would keep us free and clear of the political ferment in other countries. He was a visionary, and he foresaw the day when great distances would be erased by scientific achievement, when economic and social upheavals in some far-off foreign country would directly affect the peace and equanimity of the United States. To protect America from the contagion of such foreign afflictions, he fathered a League of Nations—but a Republican Congress never allowed the United States to sustain his brainchild.

Today, the Wilsonian concept of American participation in a society of nations is an accepted role for our country. And we have even gone beyond the Wilsonian dream by a show of brotherhood with the free nations of the world—through a program of almost unstinting aid in the form of grants of moneys, loans for economic and industrial developments, and wholesale shipments of food.

Perhaps Woodrow Wilson would not have gone so far and so fast in the program of brotherhood with which we have indulged ourselves. Certainly, I think, he would have guided our course with more caution—the way President Kennedy is doing today with respect to aiding our sister republics to the south. Certainly, too, like President Kennedy today, Wilson would have sought to revitalize our own areas of economic sickness through a domestic aid program, while helping other nations to rehabilitate their economies.

In some instances, our reckless indulgence in international aid has cost our Nation a pathetic toll in unemployment and underemployment. Yes, in some instances, prosperous communities have suffered economic decline because of our rush to accommodate the needs of other nations. We sent the very latest and the very best kinds of machinery and equipment abroad, and kept for ourselves at home the old and wornout and antiquated machinery and equipment of yesteryears.

With cheap labor, and with the very latest and very best of manufacturing machinery and equipment, foreign producers have been able to undersell similar American produced products in our own home markets. Today, in my own State of West Virginia, there are islands of unemployment and underemployment in many cities and towns because the growing level of imports has adversely affected our previously healthy glassware, clay, and pottery industries. In New England and in the South, our textile industries are suffering because of the flood of cheaper produced textiles from abroad. Our coal mining industries are also being severely harmed by imports of foreign residual fuel oil—a waste product of foreign refining processes.

My State of West Virginia ranks second in the Nation as a glass producer. The world's largest plate glass factory is located in our capital city of Charleston. But because of the upward creeping tide of flat glass imports, this vital West Virginia industry is economically sick. In the Morgantown area alone, one of the leading glass-producing regions in my State, three glass manufacturing plants have shut down in the past several years due to the unequal competition of foreign produced glass imports.

In effect, through the years since World War II, we have hoisted ourselves by our own petard through foreign aid programs without any thought to our domestic economic needs. Even today, as we contemplate a program of aid to our own depressed areas, we hand the whole loaf of bread to our foreign friends and grudgingly reserve some crumbs for ourselves.

As late as March 1, the House Foreign Affairs Subcommittee on Appropriations advised me that the total moneys available for expenditure by the foreign aid Development Loan Fund—including unexpended, unobligated, and new funds—amounted to $1,721,296,000—more than four times the total amount being requested in the Douglas area redevelopment bill for our own economically depressed areas.

Since our country is regarded by the entire world—including Russia and Red China—as the greatest and most powerful bulwark against Communist aggression, it is imperative that we not let a single fiber of our domestic strength erode through lack of proper economic nourishment.

Fortunately, President Kennedy sees the whole picture in its proper perspective. While he has proposed to the Congress a soundly based program of aid to our Latin American friends—and we can expect a revamping of our other foreign aid programs on the same terms—he has also proposed an encompassing program for domestic recovery. His program of aid to depressed areas is not solely and wholely in the Douglas bill. It also is in his programs for urban renewal and low-cost housing at lower interest rates; it can be found in his program for better education for our children through the construction of more classrooms and through the higher pay for teachers; and it can also be found in his determination to aid our elderly citizens through a realistic medical care program.

And there will be more Kennedy programs to strengthen the fiber of America—programs for the conservation and development of our natural resources, programs for the employment of our jobless youth, and programs for industrial growth.

It is through such programs, based on the plaform of the Democratic Party, that this country will overcome the effects of foreign competition with our own industries. The ingenuity of America has never been found wanting. If we can revitalize our economy through the Area Redevelopment Act and through President Kennedy's other progressive programs, there will be but few or no competitors who will be able to outdo us in the competition for markets at home and abroad.

Every today becomes a yesterday, and every yesterday becomes a prolog for tomorrow. The yesterday of Wilson is the President Kennedy of today—a leader carrying forward the progressive principles of the Democratic Party—a shirtsleeve leader who spends most of his time working behind a desk instead of on a golf course banging a small white ball. The lights burn late in the White House now—and not for the purpose of viewing western gun sagas on television.

We have a working President now—not a detached father image. We have a President who is in touch with the people—and not just in touch with the elite of big business. We have a President who sees the long lines of the unemployed, not one who ignores them and hopefully wishes they would somehow vanish. We have a President who wants social progress to go hand in hand with economic progress—a President who wants equality of opportunity for all, and for all a more abundant and meaningful life—a President in the true tradition of the truly great Democratic Presidents such as Jefferson, Jackson, Roosevelt, Truman, and Woodrow Wilson.

SENATE

TUESDAY, MARCH 28, 1961

The Senate met at 12 o'clock meridian, and was called to order by the President pro tempore.

Rev. William H. Foster, D.D., of the Presbyterian Church in the United States, Sherman, Tex., offered the following prayer:

Almighty God, our Heavenly Father, by whose grace and wisdom we have been led to this good hour, we thank Thee for all Thy blessings to us as a nation; and by Thy providence Thou hast helped us to know Thee as the "Giver of every good and perfect gift."

In the troubles and dangers of the world in which we live, we sense the need for wisdom and strength greater than any of us can have. Thou art wise; give us Thy wisdom. Thou art strong; give us Thy strength.

We believe in Thee as the Prince of Peace who desires peace in the world. We pray earnestly for peace in our time; we pray for it in our own hearts, in our Nation, and in all the world.

In the Redeemer's name we offer our prayer. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Monday, March 27, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 5188) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. THOMAS, Mr. KIRWAN, Mr. CANNON, Mr. JENSEN, and Mr. TABER were appointed managers on the part of the House at the conference.

The message also announced that the House had passed a bill (H.R. 258) to amend the District of Columbia Sales Tax Act to increase the rate of tax imposed on certain gross receipts, to amend the District of Columbia Motor Vehicle Parking Facility Act of 1942 to transfer certain parking fees and other moneys to the highway fund, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

H.R. 3980. An act to amend the transitional provisions of the act approved September 6, 1958, entitled "An act to protect the public health by amending the Federal Food, Drug, and Cosmetic Act to prohibit the use in food of additives which have not been adequately tested to establish their safety," and for other purposes; and

H.R. 4363. An act to amend Public Law 86-272 relating to State taxation of interstate commerce.

HOUSE BILL REFERRED

The bill (H.R. 258) to amend the District of Columbia Sales Tax Act to increase the rate of tax imposed on certain gross receipts, to amend the District of Columbia Motor Vehicle Parking Facility Act of 1942 to transfer certain parking fees and other moneys to the highway fund, and for other purposes, was read twice by its title and referred to the Committee on the District of Columbia.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business, to consider various nominations on the Executive Calendar, with the exception of those for the Department of Health, Education, and Welfare and the Department of the Interior, which will be taken up later.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting several nominations, which were referred to the Committee on Foreign Relations.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. ELLENDER, from the Committee on Agriculture and Forestry:

Charles S. Murphy, of Maryland, John P. Duncan, Jr., of Georgia, Frank J. Welch, of Kentucky, James T. Ralph, of California, Horace Godfrey, of North Carolina, and Willard Cochrane, of Minnesota, to be members of the Board of Directors of the Commodity Credit Corporation; and

John C. Bagwell, of South Carolina, to be General Counsel of the Department of Agriculture.

By Mr. HILL, from the Committee on Labor and Public Welfare:

William E. Simkin, of Pennsylvania, to be Federal Mediation and Conciliation Director.

By Mr. MORSE, from the Committee on Labor and Public Welfare:

Sterling M. McMurrin, of Utah, to be Commissioner of Education.

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

J. Kenneth Galbraith, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary to India;

Edward G. Stockdale, of Florida, to be Ambassador Extraordinary and Plenipotentiary to Ireland;

William McCormick Blair, Jr., of Illinois, to be Ambassador Extraordinary and Plenipotentiary to Denmark;

John S. Rice, of Pennsylvania, to be Ambassador Extraordinary and Plenipotentiary to the Kingdom of the Netherlands;

Kenneth Todd Young, of New York, to be Ambassador Extraordinary and Plenipotentiary to Thailand;

Edwin O. Reischauer, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary to Japan;

William Attwood, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary to the Republic of Guinea;

Anthony J. Drexel Biddle, of Pennsylvania, to be Ambassador Extraordinary and Plenipotentiary to Spain; and

Aaron S. Brown, of New Hampshire, a Foreign Service Officer of class 1, to be Ambassador Extraordinary and Plenipotentiary to Nicaragua.

By Mr. CHAVEZ, from the Committee on Public Works:

Joseph H. McCann, of Michigan, to be Deputy Administrator of the Saint Lawrence Seaway Development Corporation; and

Martin W. Oettershagen, of Illinois, to be Administrator of the Saint Lawrence Seaway Development Corporation.

By Mr. EASTLAND, from the Committee on the Judiciary:

Edward D. Re, of New York, to be a member of the Foreign Claims Settlement Commission; and

Theodore Jaffe, of Rhode Island, to be a member of the Foreign Claims Settlement Commission.

The PRESIDENT pro tempore. If there be no further reports of committees, the nominations as specified will be stated.

U.S. ATTORNEYS

The Chief Clerk proceeded to read sundry nominations of United States attorneys.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that these nominations be considered en bloc.

The PRESIDENT pro tempore. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

ASSISTANT ATTORNEY GENERAL

The Chief Clerk read the nomination of Burke Marshall, of Maryland, to be an Assistant Attorney General.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, as I understand, the Senate has just now confirmed two nominations of United States attorneys and the nomination of an Assistant Attorney General.

The PRESIDENT pro tempore. That is correct.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

CONSIDERATION OF CERTAIN NOMINATIONS

Mr. DIRKSEN. Mr. President, at this point will the majority leader yield?

Mr. MANSFIELD. Certainly.

Mr. DIRKSEN. This morning the Committee on Labor and Public Welfare considered two nominations. There was no objection to them; and I advised the chairman that if at any time the nominations were brought up today, there would be no objection. So I intrude only to inform the majority leader that if sometime later in the day those nominations are called up, that will be quite agreeable.

Mr. MANSFIELD. If those nominations are now at the desk, we can bring them up.

Mr. DIRKSEN. I believe it might be well to wait until a little later.

Mr. MANSFIELD. Very well. I assure the minority leader that his suggestion will be followed, and we shall try to bring up those nominations later today.

Mr. LAUSCHE. Let me ask which nominations they are.

Mr. DIRKSEN. One is for the Mediation Service, and the other is for the Department of Health, Education, and Welfare.

Mr. LAUSCHE. Very well.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the following committees and subcommittees were authorized to meet during the session of the Senate today:

The Public Lands Subcommittee of the Committee on Interior and Insular Affairs.

The Committee on Finance.

The Freedom of Communication Subcommittee of the Committee on Interstate and Foreign Commerce.

The Constitutional Rights Subcommittee of the Committee on the Judiciary.

ORDER FOR CALL OF THE CALENDAR TOMORROW

Mr. MANSFIELD. Mr. President, after conferring with the distinguished minority leader, I ask unanimous consent of the Senate that the calendar be called tomorrow, at the conclusion of the morning hour, and that all measures to which there is no objection be considered at that time.

The PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

CONSIDERATION OF EXTENSION OF THE SUGAR ACT

Mr. MANSFIELD. Mr. President, at the conclusion of the call of the calendar, the next item of business, we hope, will be the measure extending the Sugar Act.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

AUDIT REPORT ON DEVELOPMENT LOAN FUND

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Development Loan Fund, fiscal year 1960 (with an accompanying report); to the Committee on Government Operations.

PROPOSED CONCESSION CONTRACT AT LAKE MEAD NATIONAL RECREATION AREA, NEV.

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed concession contract at the Temple Bar site, Lake Mead National Recreation

Area, Nev. (with accompanying papers); to the Committee on Interior and Insular Affairs.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of Washington; to the Committee on Interior and Insular Affairs:

"HOUSE JOINT MEMORIAL 40

"To the Honorable John F. Kennedy, President of the United States, the President of the Senate and Speaker of the House of Representatives, and to the Senate and House of Representatives of the United States of America, in Congress Assembled:

"We, your memorialists, the House of Representatives and the Senate of the State of Washington, in legislative session assembled, represent and petition as follows:

"Whereas the Treaty of Washington of June 15, 1846, established the boundary between Canada and the United States, thus ending a long dispute between Great Britain and the United States over sovereignty in the Pacific Northwest; and

"Whereas this boundary was surveyed over 100 years ago and marked with suitable monuments; and

"Whereas the first of these boundary monuments was erected in 1861 on the 49th parallel at Point Roberts overlooking the Straits of Georgia; and

"Whereas this monument is a tourist attraction having great historical significance; and

"Whereas the Federal Government owns approximately 7½ acres of unimproved land located in the northwest corner of Government lot 2, section 33, township 41 north, range 3 west, Willamette meridian in the State of Washington, which is adjacent to this historical site and suitable for a national monument: Now, therefore, be it

"Resolved, That we, your memorialists, the 37th Legislature of the State of Washington, urge the President of the United States to encourage and the Congress of the United States to enact, legislation establishing such a national monument; and be it further

"Resolved, That copies of this memorial be transmitted by the chief clerk of the house of representatives to the President of the United States, the President of the U.S. Senate, the Speaker of the House of Representatives of the United States, and to each Senator and Representative in the Congress from the State of Washington.

"Passed the house February 18, 1961.

"JOHN L. O'BRIEN,
"Speaker of the House.

"Passed the senate February 20, 1961.

"JOHN A. CHERBERG,
"President of the Senate."

A joint resolution of the Legislature of the State of Washington; to the Committee on Interstate and Foreign Commerce:

"HOUSE JOINT MEMORIAL 21

"To the Honorable John F. Kennedy, President of the United States, and to the Senate and House of Representatives of the United States of America, in Congress Assembled:

"We, your memoralists, the House of Representatives and Senate of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas there has been introduced into the 87th Congress H.R. 213, the purpose of which is to repeal the 6-percent construction bid differential for Pacific coast shipbuilders; and

"Whereas said differential is still essential and necessary to offset the freight differential which Pacific coast shipyards must pay in transporting steel from the east coast; and

"Whereas the Pacific coast shipyards have a wartime production record of which they are justifiably proud; and

"Whereas we cannot risk the loss of the highly skilled labor pool of shipbuilders on the west coast in case their services are again needed in time of war or national emergency: Now, therefore, be it

"Resolved, That we, the Senate and House of Representatives of the State of Washington, do hereby respectfully memorialize and petition the President of the United States, the U.S. Senate, and the U.S. House of Representatives, and each member of the State of Washington congressional delegation to do all in their power to defeat H.R. 213 and any other bills or action that would deprive the Pacific coast of this justifiable and necessary 6-percent construction bid differential on shipbuilding; and be it further

"Resolved, That copies of this memorial be transmitted immediately to the Honorable John F. Kennedy, President of the United States, the Secretary of the U.S. Senate, the Clerk of the U.S. House of Representatives, Senator WARREN G. MAGNUSON, Senator HENRY M. JACKSON, each Member of the U.S. Congress from the State of Washington, and to the Legislatures of the States of Alaska, California, and Oregon.

"Passed the house February 2, 1961.

"JOHN L. O'BRIEN,
"Speaker of the House.

"Passed the senate February 22, 1961.

"JOHN A. CHERBERG,
"President of the Senate."

Two joint resolutions of the Legislature of the State of Washington; to the Committee on Labor and Public Welfare:

"HOUSE JOINT MEMORIAL 7

To the Honorable John F. Kennedy, President of the United States and to the Senate and House of Representatives of the United States of America, in Congress Assembled:

"We, your memorialists, the House of Representatives and the Senate of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas section 14b of the Taft-Hartley Act, as now constituted, is a detriment and great deterrent to the progress of labor; and

"Whereas the American laborer has struggled and suffered untold setbacks and hardships to attain his rightful position in the Nation's economy; and

"Whereas section 14b of the Taft-Hartley Act does not guarantee job protection and true collective bargaining; and

"Whereas the voters of the State of Washington by their defeat of two initiatives in two general elections have indicated their objection to State legislation in this field: Now, therefore, be it

"Resolved, That we the House of Representatives and the Senate of the State of Washington, do hereby respectfully memorialize and petition the President of the United States of America and the Congress of the United States of America to repeal section 14b of the Taft-Hartley Act.

"Passed the house February 2, 1961.

"JOHN L. O'BRIEN,
"Speaker of the House.

"Passed the senate February 8, 1961.

"JOHN A. CHERBERG,
"President of the Senate."

"HOUSE JOINT MEMORIAL 20

"To the Senate and House of Representatives of the United States, in Congress Assembled:

"We, your memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas Federal employee unions are not officially recognized by law and are only given cognizance and consideration as each Federal department or agency head may choose to decide; and

"Whereas the success of our entire governmental operation depends to a major extent on the morale and efficiency of the two and one-half million civil service personnel who make up the governmental employee force and that the future efficiency of governmental operation depends on the caliber of people who can be recruited into civil service careers; and

"Whereas several bills have been introduced in the United States Congress by Members of both parties providing for the recognition of Federal employee unions; and

"Whereas this principle has been indorsed by the AFL–CIO, the National Civil Service League, the Hoover Commission, and several of the Washington State Members of Congress: Now, therefore, be it

"Resolved, That we, the Senate and the House of Representatives of the State of Washington do respectfully memorialize and petition the Congress of the United States to enact legislation calling for the recognition of Federal employee unions; and be it further

"Resolved, That copies of this memorial be transmitted by the secretary of state to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives of the United States, and to each Senator and Representative in Congress from the State of Washington.

"Passed the house March 9, 1961.

"JOHN L. O'BRIEN,
"Speaker of the House.

"Passed the senate March 9, 1961.

"JOHN A. CHERBERG,
"President of the Senate."

A joint resolution of the Legislature of the State of Washington; to the Committee on Post Office and Civil Service:

"HOUSE JOINT MEMORIAL 2

"To the Senate and House of Representatives of the United States, in Congress Assembled:

"We, your memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas the 150th anniversary of the establishment of Fort Okanogan occurs in 1961; and

"Whereas Fort Okanogan was the first American settlement in the State of Washington; and

"Whereas the State of Washington has recently completed a museum at Fort Okanogan; and

"Whereas the dedication of such museum by the Governor last summer was attended by persons from various parts of the United States and from foreign lands as it was an occasion of international good will: Now, therefore, be it

"Resolved, That we, the Senate and House of Representatives of the State of Washington, do hereby respectfully memorialize and petition the Congress of the United States to cause a stamp to be issued commemorating the 150th anniversary of the establishment of Fort Okanogan; and be it

"Resolved, That copies of this memorial be transmitted to the President of the U.S. Senate, the Speaker of the House of Representatives of the United States, and to each Senator and Representative in Congress from the State of Washington.

"Passed the house January 26, 1961.

"JOHN L. O'BRIEN,
"Speaker of the House.

"Passed the senate February 15, 1961.

"JOHN A. CHERBERG,
"President of the Senate."

A legislative bill (N. 491) enacted by the Legislature of the State of Nebraska; to the Committee on the Judiciary:

"ENGROSSED LEGISLATIVE BILL 491

"A bill for an act to ratify an amendment to the Constitution of the United States authorizing the District of Columbia to appoint such number of electors of President and Vice President as prescribed and to provide for forwarding of certified copies as prescribed

"Be it enacted by the people of the State of Nebraska,

"SECTION 1. That the joint resolution proposing an amendment to the Constitution of the United States as adopted by the 86th Congress of the United States at its 2d session in the following words, to wit:

"'Joint resolution—

"'*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein),* That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within 7 years from the date of its submission by the Congress:

"'"ARTICLE —

"'"SECTION 1. The District constituting the seat of government of the United States shall appoint in such manner as the Congress may direct:

"'"A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the 12th article of amendment.

"'"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation."' be and the same is hereby ratified.

"SEC. 2. That copies of this bill duly certified by the secretary of state with the great seal of Nebraska attached thereto shall be forwarded by the secretary of state to the Administrator of General Services, Washington, D.C., and to the President of the Senate and to the Speaker of the House of Representatives of the Congress of the United States.

"DWIGHT W. BURNEY,
"President of the Legislature.
"HUGO F. SRB,
"Clerk of the Legislature.

"Approved March 22, 1961.

"FRANK B. MORRISON,
"Governor."

Two resolutions adopted by the Dallas, Tex., Chamber of Commerce, relating to a balanced budget and foreign aid; to the Committee on Appropriations.

A resolution adopted by the annual meeting of the National Telephone Cooperative Association, Washington, D.C., relating to the use of commercial facilities in transmitting military communications; to the Committee on Interstate and Foreign Commerce.

RESOLUTION OF COMMON COUNCIL OF CITY OF MOUNT VERNON, N.Y.

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Common Council of the City of Mount Vernon, N.Y., relating to a new life insurance plan for veterans of World War II.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the House of Representatives of the United States has by bill No. 856 passed unanimously a new life insurance plan for 3 million World War II veterans, who still hold Federal term policies on their lives; and

Whereas under the new proposed enactment passed by the House, the premiums for term policies would become fixed instead of ascending as the age of a policyholder increases; and

Whereas this proposal permits a more equitable method of payment for such term insurance; Now, therefore, be it

Resolved, That this common council does petition the Senate of the United States and its representatives in the Senate to facilitate and urge the passage of such legislation in the Senate of the United States as quickly as possible.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations, with an amendment:

S. 644. A bill to amend the Foreign Service Act of 1946, as amended, concerning reemployment of officers or employees (Rept. No. 127).

EXTENSION OF LOAN GUARANTY AUTHORITY OF INTERSTATE COMMERCE COMMISSION—REPORT OF A COMMITTEE—SEPARATE AND INDIVIDUAL VIEWS (S. REPT. NO. 126)

Mr. SMATHERS. Mr. President, from the Committee on Interstate and Foreign Commerce, I report favorably, with amendments, House bill 1163, to amend section 510 of the Interstate Commerce Act, so as to extend for 15 months the loan guaranty authority of the Interstate Commerce Commission; and I submit a report thereon. I ask unanimous consent that the report be printed, together with the separate views of the Senator from California [Mr. ENGLE] and the Senator from Oklahoma [Mr. MONRONEY] and the individual views of the Senator from Texas [Mr. YARBOROUGH].

The PRESIDING OFFICER. (Mr. HICKEY in the chair). The report will be received and printed, and the bill will be placed on the calendar.

REPORT ENTITLED "ACTION FOR THE AGED AND AGING" (S. REPT. NO. 128)

Mr. MCNAMARA. Mr. President, the Committee on Labor and Public Welfare today approved a motion to file with the Senate the report of the Senate Subcommittee on Problems of the Aged and Aging. As chairman of the subcommittee and on behalf of the Committee on Labor and Public Welfare, I ask unanimous consent to file this report with the Senate, and that it be printed. This completes the work of the subcommittee for the year 1960, pursuant to Senate Resolution 266, 86th Congress, 2d session.

The PRESIDING OFFICER. The report will be received and printed as requested by the Senator from Michigan.

AUTHORIZATION FOR FINANCE COMMITTEE TO FILE REPORT ON THE SUGAR ACT EXTENSION BILL—INDIVIDUAL VIEWS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Finance Committee be permitted to file, up to 12 o'clock tonight, a report on the Sugar Act extension bill, H.R. 5463, and that individual views of the Senator from Illinois [Mr. DOUGLAS] and the Senator from Arkansas [Mr. FULBRIGHT] may be received and printed with the report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Subsequently, from the Committee on Finance, Mr. BYRD of Virginia reported the bill (H.R. 5463) to amend and extend the Sugar Act of 1948, as amended, with amendments, and submitted a report (No. 125) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SCOTT:

S. 1451. A bill for the relief of Karbis Balta; to the Committee on the Judiciary.

By Mr. SPARKMAN (by request):

S. 1452. A bill to amend the Home Owners' Loan Act of 1933 to provide specific authority for the participation of Federal savings and loan associations in the national effort to provide adequate housing facilities for the aging;

S. 1453. A bill to amend the Home Owners' Loan Act of 1933 to broaden the investment powers of Federal savings and loan associations to include the specific power to invest in certificates of beneficial interest issued by urban renewal investment trusts; and

S. 1454. A bill to amend the Home Owners' Loan Act of 1933 to redefine the lending powers of Federal savings and loan associations to facilitate the trade-in financing of homes; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above bills, which appear under a separate heading.)

By Mr. MOSS:

S. 1455. A bill for the relief of Joaquinn Gil-Carrasco; to the Committee on the Judiciary.

By Mr. MAGNUSON (by request):

S. 1456. A bill to authorize an additional Assistant Secretary of Commerce; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. McNAMARA:

S. 1457. A bill to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. McNAMARA when he introduced the above bill, which appear under a separate hearing.)

By Mr. JOHNSTON:

S. 1458. A bill to amend the act of July 8, 1940, relating to the transportation of the remains, families, and effects of Federal employees dying abroad, so as to restore the benefits of such act to employees dying in Alaska and Hawaii, and for other purposes; and

S. 1459. A bill to amend the provisions of law relating to longevity step increases for postal employees; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. JOHNSTON when he introduced the above bills, which appear under separate headings.)

By Mr. MAGNUSON:

S. 1460. A bill for the relief of Andrew J. Metcalf; to the Committee on the Judiciary.

By Mr. DOUGLAS:

S. 1461. A bill for the relief of Krystyna Rataj; to the Committee on the Judiciary.

By Mr. KEATING (for himself and Mr. JAVITS):

S.J. Res. 70. Joint resolution designating July 25 of each year as "Puerto Rican Day in the United States of America"; to the Committee on the Judiciary.

(See the remarks of Mr. KEATING when he introduced the above joint resolution, which appear under a separate heading.)

PROPOSED LEGISLATION PERTAINING TO FEDERAL BUILDING AND LOAN ASSOCIATIONS

Mr. SPARKMAN. Mr. President, by request, I introduce three bills, for appropriate reference.

The PRESIDING OFFICER. The bills will be received and appropriately referred.

The bills, introduced by Mr. SPARKMAN, were received, read twice by their titles, and referred to the Committee on Banking and Currency, as follows:

S. 1452. A bill to amend the Home Owners' Loan Act of 1933 to provide specific authority for the participation of Federal savings and loan associations in the national effort to provide adequate housing facilities for the aging;

S. 1453. A bill to amend the Home Owners' Loan Act of 1933 to broaden the investment powers of Federal savings and loan associations to include the specific power to invest in certificates of beneficial interest issued by urban renewal investment trusts; and

S. 1454. A bill to amend the Home Owners' Loan Act of 1933 to redefine the lending powers of Federal savings and loan associations to facilitate the trade-in financing of homes.

Mr. SPARKMAN. Mr. President, I should like to make a brief statement in regard to the bills which I have introduced for study and consideration.

These bills would authorize Federal savings and loan associations to make limited loans for the construction and financing of homes for the elderly, for savings and loan participation in urban renewal projects, and special loans by savings and loan associations to facilitate trade-in housing. Savings and loan associations finance about 40 percent of all home purchases. These bills would enable these institutions to take a more active part in financing housing for the elderly and urban renewal programs, and would help facilitate the sale of existing houses, as well as new homes, through a special trade-in housing loan.

Recently, I notice that savings and loan leaders are calling on all savings and loan associations to help reduce interest rates on home mortgages. The same leaders are actively interested in these three bills, and also are interested in working with the Federal Home Loan Bank Board to devise changes in their rules and regulations which will further facilitate the flow of mortgage credit into the housing market. This is the type of leadership which I believe businessmen should exercise within their own industry, and I congratulate the leaders of the savings and loan business on trying to assist in solving the problems of high interest rates and financing homes for the elderly and urban renewal.

I believe these bills will afford an opportunity for study and discussion; and it may very well be that some good programs can be worked out by means of them.

ADDITIONAL ASSISTANT TO SECRETARY OF COMMERCE

Mr. MAGNUSON. Mr. President, by request of the Secretary of Commerce, I introduce, for appropriate reference, a bill to authorize an additional Assistant Secretary of Commerce. I ask unanimous consent that the letter from the Secretary of Commerce, requesting the proposed legislation, be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 1456) to authorize an additional Assistant Secretary of Commerce, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

THE SECRETARY OF COMMERCE,
Washington, D.C., March 21, 1961.

The Honorable the PRESIDENT OF THE SENATE,
U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith is a draft bill "to authorize an additional Assistant Secretary of Commerce."

Enactment of this legislation is necessary to carry out a major recommendation of the Special Advisory Committee of the National Academy of Sciences and to assure that the important scientific and technical functions and responsibilities of the Department of Commerce are effectively directed by the Secretary assisted by an officer of high rank.

Today, more than ever before in our history, science and technology are playing an ever-increasing role in the industrial and business activities of our Nation. Included within the Department of Commerce, and importantly related to our basic mission of fostering and promoting industry, commerce, and transportation are such outstanding scientific agencies as the National Bureau of Standards, the Weather Bureau, and the Coast and Geodetic Survey. Also contributing to the scientific and technical needs of our expanding economy are such agencies as the Patent Office and the Office of Technical Services. In addition, the fulfillment of the responsibilities of the Bureau of Public Roads and the Maritime Administration require extensive research and development activities in a number of scientific and technical fields. These agencies and the activities they conduct are of immeasurable importance not only to our economy, but to our national defense and the general welfare of our people as well. The scientific and technical functions conducted within the Department of Commerce are important links in the overall scientific efforts being conducted by other agencies of our Government in the areas of national defense, atomic energy, space technology, oceanography, meteorology, and others. The scope and importance of these functions and the part which agencies of the Department of Commerce must assume are constantly increasing.

It is of vital importance that there be competent direction and administration of our scientific and technical programs and that they be adequately coordinated with other related activities throughout the Government to assure the maximum effectiveness of our national efforts.

It is intended that this additional Assistant Secretary of Commerce will serve as the principal adviser to the Secretary on all scientific and technological matters of concern to the Department.

The incumbent in this new position will provide vital assistance to the Secretary in:

1. The coordination and evaluation of existing programs of the Department in the fields of science and technology;

2. The expansion of such programs where deemed desirable to meet our national needs;

3. The development and implementation of new research and development programs in furtherance of the Department's objectives;

4. Representing the Department on top policy level scientific committees and groups, including the Federal Council for Science and Technology.

Authorization for the appointment of an additional Assistant Secretary of Commerce will make it possible to provide the most effective review of the expanding science activities of the Department of Commerce by a highly qualified science administrator. The increasing importance of the scientific and technological agencies of the Department of Commerce require an officer with the rank of Assistant Secretary to assure that our responsibilities and programs are adequately carried out in the interests of our economy, national defense, and public welfare.

We strongly urge prompt favorable consideration of this proposed bill by Congress.

It is estimated that enactment of this legislation will involve the expenditure of approximately $100,000 per year.

We have been advised by the Bureau of the Budget that it would interpose no objection to the submission of this proposed legislation from the standpoint of the administration's program.

Sincerely yours,

LUTHER H. HODGES,
Secretary of Commerce.

AMENDMENT OF FAIR LABOR STANDARDS ACT

Mr. McNAMARA. Mr. President, I introduce, for appropriate referral, a bill to amend the Fair Labor Standards Act.

The bill contains the basic provisions of the administration measures introduced earlier.

It would raise the minimum wage to $1.25 an hour—for presently covered workers over a 2-year period.

Approximately 4 million additional workers would be covered—beginning at $1 an hour—and rising to $1.25 after 3 years.

The newly covered workers would be given overtime protection—as originally proposed by the administration.

The bill was drafted in consultation with the administration—and has its approval.

The bill I have introduced is intended only as a means—to speed both Labor Committee and Senate action on minimum wages.

During our hearings—and House consideration of the minimum wage bill—it was apparent that some problems had to be solved before a strong minimum wage bill could be enacted.

The bills now before the Senate Labor and Public Welfare Committee—would have to be amended substantially to meet those problems.

That amending process would be time consuming—and consequently this bill has been prepared as a substitute to avoid such delays.

The attached summary details the coverage and impact of the new bill.

I ask unanimous consent that the summary, together with the bill, be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and summary will be printed in the RECORD.

The bill (S. 1457) to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes, introduced by Mr. MCNAMARA, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fair Labor Standards Amendments of 1961".

DEFINITIONS

SEC. 2. (a) Paragraph (m) of section 3 of such Act, defining the term "wage", is amended by inserting before the period at the end thereof a colon and the following: "*Provided,* That the cost of board, lodging, or other facilities shall not be included as a part of the wage paid to any employee to the extent it is excluded therefrom under the terms of a bona fide collective-bargaining agreement applicable to the particular employee: *Provided further,* That the Secretary is authorized to determine the fair value of such board, lodging, or other facilities for defined classes of employees and in defined areas, based on average cost to the employer or to groups of employers similarly situated, or average value to groups of employees, or other appropriate measures of fair value. Such evaluations, where applicable and pertinent, shall be used in lieu of actual measure of cost in determining the wage paid to any employee".

(b) Section 3 of such Act is further amended by adding at the end thereof the following new paragraphs:

"(p) 'American vessel' includes any vessel which is documented or numbered under the laws of the United States.

"(q) 'Secretary' means the Secretary of Labor.

"(r) 'Enterprise' means the related activities performed (either through unified operation or common control) by any person or persons for a common business purpose, and includes all such activities whether performed in one or more establishments or by one or more corporate or other organizational units but shall not include the related activities performed for such enterprise by an independent contractor: *Provided,* That, within the meaning of this subsection, a local retail or service establishment which is under independent ownership and control shall not be deemed to be other than a separate and distinct enterprise by reason of any arrangement, which includes, but is not limited to, an agreement (1) that it will sell, or sell only, certain goods specified by a particular manufacturer, distributor, or advertiser, or (2) that it will join with other such local establishments in the same industry for the purpose of collective purchasing, or (3) that it will have the exclusive right to sell the goods or use the brand name of a manufacturer, distributor, or advertiser within a specified area, or by reason of the fact that it occupies premises leased to it by a person who also leases premises to other retail or service establishments.

"(s) 'Enterprise engaged in commerce or in the production of goods for commerce' means any of the following in the activities of which employees are so engaged, including employees handling, selling, or otherwise working on goods that have been moved in or produced for commerce by any person, if not less than 25 per centum of the annual gross dollar volume of business (exclusive of excise taxes at the retail level which are separately stated) of such enterprise is made from sales or services which require, or depend on, shipments of goods in commerce or engagement by employees in commerce or in the production of goods for commerce:

"(1) any such enterprise which has one or more retail or service establishments if the annual gross volume of sales of such enterprise is not less than $1,000,000, exclusive of excise taxes at the retail level which are separately stated;

"(2) any such enterprise which has one or more establishments engaged in laundering, cleaning, or repairing clothing or fabrics if the annual gross volume of sales of such enterprise is not less than $1,000,000, exclusive of excise taxes at the retail level which are separately stated;

"(3) any such enterprise which is engaged in the business of operating a street, suburban or interurban electric railway, or local trolley or motorbus carrier;

"(4) any establishment of any such enterprise, except establishments and enterprises referred to in other paragraphs of this subsection, which has employees engaged in commerce or in the production of goods for commerce if the annual gross volume of sales of such enterprise is not less than $1,000,000;

"(5) any such enterprise which is engaged in the business of construction or reconstruction, or both, if the annual gross volume from the business of such enterprise is not less than $350,000;

"(6) any gasoline service establishment if the annual gross volume of sales of such establishment is not less than $250,000, exclusive of excise taxes at the retail level which are separately stated:

Provided, That an establishment shall not be considered to be an enterprise engaged in commerce or in the production of goods for commerce, or a part of an enterprise engaged in commerce or in the production of goods for commerce, and the sales of such establishment shall not be included for the purpose of determining the annual gross volume of sales of any enterprise for the purpose of this subsection, if the only employees of such establishment are the owner thereof or persons standing in the relationship of parent, spouse, or child of such owner."

INVESTIGATIONS OF EFFECTS ON EMPLOYMENT OF FOREIGN COMPETITION

SEC. 3. Section 4 of such Act is amended by adding at the end thereof the following new subsection:

"(e) Whenever the Secretary has reason to believe that in any industry under this Act the competition of foreign producers in United States markets or in markets abroad, or both, has resulted, or is likely to result, in increased unemployment in the United States, he shall undertake an investigation to gain full information with respect to the matter. If he determines such increased unemployment has in fact resulted, or is in fact likely to result, from such competition, he shall make a full and complete report of his findings and determinations to the President and to the Congress."

SPECIAL INDUSTRY COMMITTEES FOR PUERTO RICO AND THE VIRGIN ISLANDS

SEC. 4. Subsection (a) of section 5 of such Act is amended by inserting after the words "production of goods for commerce" wherever they appear, the following: "or employed in any enterprise engaged in commerce or in the production of goods for commerce".

MINIMUM WAGES

SEC. 5. (a) (1) Section 6(a) of such Act is amended by inserting after the word "who" in the portion thereof preceding paragraph (1), the words "in any workweek".

(2) Paragraph (1) of section 6(a) of such Act is amended to read as follows:

"(1) not less than $1.15 an hour during the first two years from the effective date of the Fair Labor Standards Amendments of 1961, and not less than $1.25 an hour thereafter, except as otherwise provided in this section."

(3) The first sentence of paragraph (3) of section 6(a) of such Act is amended to read as follows:

"(3) if such employee is employed in American Samoa, in lieu of the rate or rates provided by this subsection or subsection (b), not less than the applicable rate established by the Secretary of Labor in accordance with recommendations of a special industry committee or committees which he shall appoint in the same manner and pursuant to the same provisions as are applicable to the special industry committees provided for Puerto Rico and the Virgin Islands by this Act as amended from time to time."

(b) Subsection (b) of section 6 of such Act is amended to read as follows:

"(b) Every employer shall pay to each of his employees who in any workweek (i) is employed in an enterprise engaged in commerce or in the production of goods for commerce, as defined in section 3(s) (1), (2), (3), or (5) or by an establishment described in section 3(s) (4) or (6), and who, except for the enactment of the Fair Labor Standards Amendments of 1961, would not be within the purview of this section, or (ii) is brought within the purview of this section by the amendments made to section 13(a) of this Act by the Fair Labor Standards Amendments of 1961, wages at rates—

"(1) not less than $1 an hour during the first year from the effective date of such amendments; not less than $1.05 an hour during the second year from such date; not less than $1.15 an hour during the third year from such date; and not less than the rate effective under paragraph (1) of subsection (a) thereafter;

"(2) if such employee is employed as a seaman on an American vessel, wages at not less than the rate which will provide to the employee, for the period covered by the wage payment, wages equal to compensation at the hourly rate prescribed by paragraph (1) of this subsection for all hours during such period when he was actually on duty (including periods aboard ship when the employee was on watch or was, at the direction of a superior officer, performing work or standing by, but not including off-duty periods which are provided pursuant to the employment agreement)."

(c) Subsection (c) of section 6 of such Act is amended to read as follows:

"(c) The rate or rates provided by subsections (a) and (b) of this section shall be superseded in the case of any employee in Puerto Rico or the Virgin Islands only for so long as and insofar as such employee is covered by a wage order heretofore or hereafter issued by the Secretary pursuant to the recommendations of a special industry committee appointed pursuant to section 5: *Provided*, That (1) the following rates shall apply to any such employee to whom the rate or rates prescribed by subsection (a) would otherwise apply:

"(A) The rate or rates applicable under the most recent wage order issued by the Secretary prior to the effective date of the Fair Labor Standards Amendments of 1961, increased by 15 per centum, unless such rate or rates are superseded by the rate or rates prescribed in a wage order issued by the Secretary pursuant to the recommendations of a review committee appointed under paragraph (C). Such rate or rates shall become effective sixty days after the effective date of the Fair Labor Standards Amendments of 1961 or one year from the effective date of the most recent wage order applicable to such employee theretofore issued by the Secretary pursuant to the recommendations of a special industry committee appointed under section 5, whichever is later.

"(B) Beginning two years after the applicable effective date under paragraph (A), not less than the rate or rates prescribed by paragraph (A), increased by an amount equal to 10 per centum of the rate or rates applicable under the most recent wage order issued by the Secretary prior to the effective date of the Fair Labor Standards Amendments of 1961, unless such rate or rates are superseded by the rate or rates prescribed in a wage order issued by the Secretary pursuant to the recommendations of a review committee appointed under paragraph (C).

"(C) Any employer, or group of employers, employing a majority of the employees in an industry in Puerto Rico or the Virgin Islands, may apply to the Secretary in writing for the appointment of a review committee to recommend the minimum rate or rates to be paid such employees in lieu of the rate or rates provided by paragraph (A) or (B). Any such application with respect to any rate or rates provided for under paragraph (A) shall be filed within sixty days following the enactment of the Fair Labor Standards Amendments of 1961 and any such application with respect to any rate or rates provided for under paragraph (B) shall be filed not more than one hundred and twenty days and not less than sixty days prior to the effective date of the applicable rate or rates under paragraph (B). The Secretary shall promptly consider such application and may appoint a review committee if he has reasonable cause to believe, on the basis of financial and other information contained in the application, that compliance with any applicable rate or rates prescribed by paragraph (A) or (B) will substantially curtail employment in such industry. The Secretary's decision upon any such application shall be final. Any wage order issued pursuant to the recommendations of a review committee appointed under this paragraph shall take effect on the applicable effective date provided in paragraph (A) or (B).

"(D) In the event a wage order has not been issued pursuant to the recommendation of a review committee prior to the applicable effective date under paragraph (A) or (B), the applicable percentage increase provided by any such paragraph shall take effect on the effective date prescribed therein, except with respect to the employees of an employer who filed an application under paragraph (C) and who files with the Secretary an undertaking with a surety or sureties satisfactory to the Secretary for payment to his employees of an amount sufficient to compensate such employees for the difference between the wages they actually receive and the wages to which they are entitled under this subsection. The Secretary shall be empowered to enforce such undertaking and any sums recovered by him shall be held in a special deposit account and shall be paid, on order of the Secretary, directly to the employee or employees affected. Any such sum not paid to an employee because of inability to do so within a period of three years shall be covered into the Treasury of the United States as miscellaneous receipts.

"(2) In the case of any such employee to whom subsection (b) would otherwise apply, the Secretary shall within sixty days after the enactment of the Fair Labor Standards Amendments of 1961 appoint a special industry committee in accordance with section 5 to recommend the highest minimum wage rate or rates in accordance with the standards prescribed by section 8, not in excess of the applicable rate provided by subsection (b), to be applicable to such employee in lieu of the rate or rates prescribed by subsection (b). The rate or rates recommended by the special industry committee shall be effective with respect to such employee upon the effective date of the wage order issued pursuant to such recommendation but not before sixty days after the effective date of the Fair Labor Standards Amendments of 1961.

"(3) The provisions of section 5 and section 8, relating to special industry committees, shall be applicable to review committees appointed under this subsection. The appointment of a review committee shall be in addition to and not in lieu of any special industry committee required to be appointed pursuant to the provisions of subsection (a) of section 8, except that no special industry committee shall hold any hearing within one year after a minimum wage rate or rates for industry shall have been recommended to the Secretary by a review committee to be paid in lieu of the rate or rates provided for under paragraph (A) or (B). The minimum wage rate or rates prescribed by this subsection shall be in effect only for so long as and insofar as such minimum wage rate or rates have not been superseded by a wage order fixing a higher minimum wage rate or rates (but not in excess of the applicable rate prescribed in subsection (a) or subsection (b)) hereafter issued by the Secretary pursuant to the recommendation of a special industry committee."

MAXIMUM HOURS

SEC. 6. (a) Subsection (a) of section 7 of such Act is amended by designating such subsection as subsection (a) (1), by inserting after the word "who" the words "in any workweek", and by striking out the period at the end thereof and inserting a semicolon and the word "and" in lieu thereof and adding the following new paragraph (2):

"(2) No employer shall employ any of his employees who in any workweek (i) is employed in an enterprise engaged in commerce or in the production of goods for commerce, as defined in section 3(s) (1), (2), or (5), or by an establishment described in section 3(s)(4), and who, except for the enactment of the Fair Labor Standards Amendments of 1961, would not be within the purview of this subsection, or (ii) is brought within the purview of this subsection by the amendments made to section 13 of this Act by the Fair Labor Standards Amendments of 1961—

"(A) for a workweek longer than forty-four hours during the second year from the effective date of the Fair Labor Standards Amendments of 1961,

"(B) for a workweek longer than forty-two hours during the third year from such date,

"(C) for a workweek longer than forty hours after the expiration of the third year from such date,

unless such employee receives compensation for his employment in excess of the hours above specified at a rate not less than one and one-half times the regular rate at which he is employed."

(b) (1) Subsection (b) of section 7 of such Act is amended by striking out "in excess of forty hours in the workweek" in paragraph (2) and inserting in lieu thereof the following: "in excess of the maximum workweek applicable to such employee under subsection (a)".

(2) Such subsection is further amended by striking out clause (3) thereof and the portion of such subsection which follows clause (3) and inserting in lieu thereof the following:

"(3) for a period or periods of not more than fourteen workweeks in the aggregate in any calendar year in an industry found by the Secretary of Labor to be (i) of a seasonal nature, or (ii) an industry engaged in the first processing of, or in canning or packing perishable or seasonal fresh fruits or vegetables, or in the first processing, within the area of production (as defined by the Secretary), of any agricultural or horicultural commodity during seasonal operations: *Provided*, That in any industry to which both clauses (i) and (ii) apply, such period shall not exceed ten workweeks in the aggregate in any calendar year,

and if such employee receives compensation for employment in excess of twelve hours in any workday, or for employment in excess of fifty-six hours in any workweek, as the case may be, at a rate not less than one and one-half times the regular rate at which he is employed. In the case of any employee employed in an industry to which both (i) and (ii) of clause (3) apply, the provisions of subsection (a) shall not apply during a period or periods of not more than ten workweeks in the aggregate in any calendar year, which shall be in addition to the period or periods provided with respect to such employee in clause (3)."

(c) Subsection (c) of section 7 of such Act is amended to read as follows:

"(c) In the case of an employer engaged in the first processing of milk, buttermilk, whey, skimmed milk, or cream into dairy products, or in the ginning and compressing of cotton, or in the processing of cottonseed, or in the processing of sugar beets, sugarbeet molasses, sugarcane, or maple sap, into sugar (but not refined sugar) or into sirup, the provisions of subsection (a) shall not apply to his employees in any place of employment where he is so engaged; and in the case of an employer engaged in handling, slaughtering, or dressing poultry or livestock, the provisions of subsection (a), during a period or periods of not more than fourteen workweeks in the aggregate in any calendar year, shall not apply to his employees in any place of employment where he is so engaged."

(d) Paragraph (5) of subsection (d) of section 7 of such Act is amended by striking out "forty in a workweek" and inserting in lieu thereof the following: "in excess

of the maximum workweek applicable to such employee under subsection (a)".

(e) Paragraph (7) of subsection (d) of section 7 of such Act is amended by striking out "forty hours" and inserting in lieu thereof the following: "the maximum workweek applicable to such employee under subsection (a)".

(f) Subsection (e) of section 7 of such Act is amended (1) by striking out "forty hours" and inserting in lieu thereof "the maximum workweek applicable to such employee under subsection (a)", (2) by striking out "section 6(a)" and inserting in lieu thereof "subsection (a) or (b) of section 6 (whichever may be applicable)", and (3) by striking out "forty in any" and inserting in lieu thereof "such maximum".

(g) Subsection (f) of section 7 of such Act is amended by striking out "forty hours" both times it appears therein and inserting in lieu thereof the following: "the maximum workweek applicable to such employee under such subsection".

(h) Section 7 of such Act is amended by adding at the end thereof the following new subsection:

"(h) No employer shall be deemed to have violated subsection (a) by employing any employee of a retail or service establishment for a workweek in excess of the applicable workweek specified therein, if (1) the regular rate of pay of such employee is in excess of one and one-half times the minimum hourly rate applicable to him under section 6, and (2) more than half his compensation for a representative period (not less than one month) represents commissions on goods or services."

WAGE ORDERS IN PUERTO RICO AND THE VIRGIN ISLANDS

SEC. 7. Subsection (a) of section 8 of such Act is amended by inserting after the word "industries" where it appears in the first sentence the words "or enterprise"; and by inserting after the words "production of goods for commerce" where they appear in the second sentence the following: "or in any enterprise engaged in commerce or in the production of goods for commerce".

CHILD LABOR PROVISIONS

SEC. 8. Subsection (c) of section 12 of such Act is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "or in any enterprise engaged in commerce or in the production of goods for commerce."

EXEMPTIONS

SEC. 9. Subsections (a) and (b) of section 13 of such Act are amended to read as follows:

"(a) The provisions of sections 6 and 7 shall not apply with respect to—

"(1) any employee employed in a bona fide executive, administrative, or professional capacity, or in the capacity of outside salesman (as such terms are defined and delimited from time to time by regulations of the Secretary, subject to the provisions of the Administrative Procedure Act, except that an employee of a retail or service establishment shall not be excluded from the definition of employee employed in a bona fide executive or administrative capacity because of the number of hours in his workweek which he devotes to activities not directly or closely related to the performance of executive or administrative activities, if less than 40 per centum of his hours worked in the workweek are devoted to such activities); or

"(2) any employee employed by any retail or service establishment, more than 50 per centum of which establishment's annual dollar volume of sales of goods or services is made within the State in which the establishment is located, if such establishment—

"(i) is not in an enterprise described in section 3(s)(1), or

"(ii) is in such an enterprise and is a hotel, motel, restaurant, motion picture theater, or an amusement or recreational establishment that operates on a seasonal basis, or

"(iii) is in such an enterprise and is a hospital, or an institution which is primarily engaged in the care of the sick, the aged, the mentally ill or defective, residing on the premises of such institution, or a school for physically or mentally handicapped or gifted children, or

"(iv) is in such an enterprise and has an annual dollar volume of sales (exclusive of excise taxes at the retail level which are separately stated) which is less than $250,000.

A 'retail or service establishment' shall mean an establishment 75 per centum of whose annual dollar volume of sales of goods or services (or of both) is not for resale and is recognized as retail sales or services in the particular industry; or

"(3) any employee employed by any establishment (except an establishment in an enterprise described in section 3(s)(2)) engaged in laundering, cleaning, or repairing clothing or fabrics, more than 50 per centum of which establishment's annual dollar volume of sales of such services is made within the State in which the establishment is located: *Provided*, That 75 per centum of such establishment's annual dollar volume of sales of such services is made to customers who are not engaged in a mining, manufacturing, transportation, commercial, or communications business: *Provided further*, That neither the exemption in this paragraph nor in paragraph (2) shall apply to any employee of a hotel, motel, or restaurant who is engaged in laundering, cleaning, or repairing clothing or fabrics where such services are not performed exclusively for such hotel, motel, or restaurant: *Provided further*, That this exemption shall not apply to any employee of any such establishment which has an annual dollar volume of sales of such services of $250,000 or more and which is engaged in substantial competition in the same metropolitan area with an establishment less than 50 per centum of whose annual dollar volume of sales of such services is made within the State in which it is located; or

"(4) any employee employed by an establishment which qualifies as an exempt retail establishment under clause (2) of this subsection and is recognized as a retail establishment in the particular industry notwithstanding that such establishment makes or processes at the retail establishment the goods that it sells: *Provided*, That more than 85 per centum of such establishment's annual dollar volume of sales of goods so made or processed is made within the State in which the establishment is located; or

"(5) any employee employed in the catching, taking, propagating, harvesting, cultivating, or farming of any kind of fish, shellfish, crustacea, sponges, seaweeds, or other aquatic forms of animal and vegetable life, or in the first processing, canning or packing such marine products at sea as an incident to, or in conjunction with, such fishing operations, including the going to and returning from work and loading and unloading when performed by any such employee; or

"(6) any employee employed in agriculture or in connection with the operation or maintenance of ditches, canals, reservoirs, or waterways, not owned or operated for profit or operated on a share-crop basis, and which are used exclusively for supply and storing of water for agricultural purposes; or

"(7) any employee to the extent that such employee is exempted by regulations or orders of the Secretary issued under section 14; or

"(8) any employee employed in connection with the publication of any weekly, semiweekly, or daily newspaper with a circulation of less than four thousand the major part of which circulation is within the county where printed and published or counties contiguous thereto; or

"(9) any employee of a retail or service establishment who is employed in connection with the preparation or offering of food or beverages for human consumption on the premises, or by such services as catering, banquet, box lunch, or curb or counter service, to the public, to employees, or to members or guests of members of clubs; or

"(10) any individual employed within the area of production (as defined by the Secretary), engaged in handling, packing, storing, ginning, compressing, pasteurizing, drying, preparing in their raw or natural state, or canning of agricultural or horticultural commodities for market, or in making cheese or butter or other dairy products; or

"(11) any switchboard operator employed by an independently owned public telephone company which has not more than seven hundred and fifty stations; or

"(12) any employee of an employer engaged in the business of operating taxicabs; or

"(13) any employee or proprietor in a retail or service establishment which qualifies as an exempt retail or service establishment under clause (2) of this subsection with respect to whom the provisions of sections 6 and 7 would not otherwise apply, engaged in handling telegraphic messages for the public under an agency or contract arrangement with a telegraph company where the telegraph message revenue of such agency does not exceed $500 a month; or

"(14) any employee employed as a seaman on a vessel other than an American vessel; or

"(15) any employee employed in planting or tending trees, cruising, surveying, or felling timber, or in preparing or transporting logs or other forestry products to the mill, processing plant, railroad, or other transportation terminal, if the number of employees employed by his employer in such forestry or lumbering operations does not exceed twelve.

"(b) The provisions of section 7 shall not apply with respect to—

"(1) any employee with respect to whom the Interstate Commerce Commission has power to establish qualifications and maximum hours of service pursuant to the provisions of section 204 of the Motor Carrier Act, 1935; or

"(2) any employee of an employer subject to the provisions of part I of the Interstate Commerce Act; or

"(3) any employee of a carrier by air subject to the provisions of title II of the Railway Labor Act; or

"(4) any employee employed in the canning, processing, marketing, freezing, curing, storing, packing for shipment, or distributing of any kind of fish, shell-fish, or other aquatic forms of animal or vegetable life, or any byproduct thereof; or

"(5) any individual employed as an outside buyer of poultry, eggs, cream, or milk, in their raw or natural state; or

"(6) any employee employed as a seaman; or

"(7) any employee of a street, suburban or interurban electric railway, or local trolley or motorbus carrier, not included in other exemptions contained in this section; or

"(8) any employee of a gasoline service station; or

"(9) any employee employed as an announcer, news editor, or chief engineer by a radio or television station the major studio of which is located in a city or town of fifty thousand population or less, according to the latest available decennial census figures as compiled by the United States Bureau of Census, except where such city or town is part of a standard metropolitan area as defined and designated by the Bureau of

Census, which has a total population in excess of fifty thousand; or

"(10) any employee of an independently owned and controlled local enterprise (including an enterprise with more than one bulk storage establishment) engaged in the wholesale or bulk distribution of petroleum products if (A) the annual gross volume of sales of such enterprise is not more than $1,000,000 exclusive of excise taxes, and (B) more than 75 per centum of such enterprise's annual dollar volume of sales is made within the State in which such enterprise is located, and (C) not more than 25 per centum of the annual dollar volume of sales of such enterprise is to customers who are engaged in the bulk distribution of such products for resale; or

"(11) any employee of a retail or service establishment primarily engaged in the business of selling automobiles, trucks, or farm implements."

EMPLOYMENT OF STUDENTS

SEC. 10. Clause (1) of section 14 of such Act is amended by striking out "and" after "apprentices," and by inserting after "messages," the following: "and of full-time students outside of their school hours in any retail or service establishment: *Provided*, That such employment is not of the type ordinarily given to a full-time employee,".

PENALTIES AND INJUNCTION PROCEEDINGS

SEC. 11. (a) Section 16(b) of such Act is amended by adding at the end thereof a new sentence as follows: "The right provided by this subsection to bring an action by or on behalf of any employee, and the right of any employee to become a party plaintiff to any such action, shall terminate upon the filing of a complaint by the Secretary of Labor in an action under section 17 in which restraint is sought of any further delay in the payment of unpaid minimum wages, or the amount of unpaid overtime compensation as the case may be, owing to such employee under section 6 or section 7 of this Act by an employer liable therefor under the provisions of this subsection."

(b) Section 17 of such Act is amended to read as follows:

"INJUNCTION PROCEEDINGS

"SEC. 17. The district courts, together with the United States District Court for the District of the Canal Zone, the District Court of the Virgin Islands, and the District Court of Guam shall have jurisdiction, for cause shown, to restrain violations of section 15, including in the case of violations of section 15(a)(2) the restraint of any withholding of payment of minimum wages or overtime compensation found by the court to be due to employees under this Act (except sums which employees are barred from recovering, at the time of the commencement of the action to restrain the violations, by virtue of the provisions of section 6 of the Portal-to-Portal Act of 1947)."

STUDY OF AGRICULTURAL HANDLING AND PROCESSING EXEMPTIONS

SEC. 12. The Secretary of Labor shall study the complicated system of exemptions now available for the handling and processing of agricultural products under such Act and particularly sections 7(c), 13(a)(10) and 7(b)(3), and shall submit to the second session of the Eighty-seventh Congress at the time of his report under section 4(d) of such Act a special report containing the results of such study and information, data and recommendations for further legislation designed to simplify and remove the inequities in the application of such exemptions.

EFFECTIVE DATE

SEC. 13. The amendments made by this Act shall take effect upon the expiration of one hundred and twenty days after the date of its enactment, except as otherwise provided in such amendments and except that the authority to promulgate necessary rules, regulations, or orders with regard to amendments made by this Act, under the Fair Labor Standards Act of 1938 and amendments thereto, including amendments made by this Act, may be exercised by the Secretary on and after the date of enactment of this Act.

The summary presented by Mr. MCNAMARA is as follows:

SUMMARY OF PROPOSED SUBSTITUTE FOR S. 895

1. For presently covered employees the minimum wage is increased to $1.15 an hour for the first 2 years after the effective date and $1.25 an hour beginning 28 months after the effective date (23,900,000 covered).

2. For newly covered employees, the minimum wage will be: $1, first year; $1.05, second year; $1.15, third year; $1.25, fourth year.

3. Overtime compensation for the newly covered will be as follows: First year, no limitation; second year, 44 hours; third year, 42 hours; fourth year, 40 hours.

4. Retail trade (2,500,000, estimated). The bill covers retail and service enterprises which have a million dollars or more in annual sales (exclusive of excise taxes) provided that at least 25 percent of their receipts are derived from goods, materials, or supplies which have been moved in commerce or produced for interstate commerce.

From this coverage in the retail trade the bill excludes the following:

(a) Hotels.
(b) Motels.
(c) Restaurants.
(d) Hospitals.
(e) Nursing homes.
(f) Schools for handicapped or gifted children.
(g) Motion picture theaters.
(h) Amusement or recreational establishments operating on a seasonal basis.
(i) Any establishment which has less than $250,000 in annual sales even if it is in an enterprise that has more than $1 million in annual sales.

In addition, the bill makes the following special provisions for particular problems in the retail and service trades:

(a) Gasoline service stations which are covered for minimum wage if they have $250,000 (exclusive of excise taxes at the retail level) or more in annual sales, are exempt from the overtime requirements.

(b) Auto dealers and farm implement dealers are exempt from the overtime requirements.

(c) Assistant managers of retail stores will be exempt even if they perform up to 40 percent nonexecutive and nonadministrative work.

(d) Commission employees will be exempt from overtime if more than half their pay is from commissions and if they earn at least time and one-half the minimum rate.

(e) Student workers may be employed in retail trades at subminimum rates under certificates granted by the Secretary in occupations not ordinarily given to full-time employees.

5. Laundries (140,000): Laundry enterprises are covered if they have a million dollars or more in annual sales (exclusive of excise taxes) for minimum wage and overtime. Further, the existing exemption for such laundries is limited so that it will not apply to any laundry which does more than 25 percent commercial work or to any laundry which has $250,000 in annual sales and is in competition in the same metropolitan area with a laundry which does more than half of its work across State lines. Finally, laundry workers in hotels and restaurants are exempt only if they work in a laundry of their own establishment.

6. Local transit companies (110,000): Covered for minimum wage but not for overtime.

7. Establishments which already have some covered employees under the act (100,000) are covered for all their employees if they are in an enterprise which has a million dollars or more in annual sales.

8. Construction (1 million): Construction companies which have at least $350,000 in annual business are also covered for minimum wage and overtime.

9. Seamen (100,000): Seamen of American-flag vessels are covered for minimum wage but not for overtime.

10. Telephone operators (30,000): The exemption for telephone operators is limited to those employed by an independently owned telephone company which has not more than 750 telephones.

Fish processing (33,000): Seafood processing employees are covered for minimum wage but not for overtime (seafood canners are treated in this way under the present law).

12. Processing and canning of agricultural commodities: The 28-week overtime exemption for such activities is reduced to 20 weeks—10 unlimited and 10 limited to 12 hours a day and 56 hours a week.

13. Puerto Rico: The minimum wage in Puerto Rico is increased by the same percentage as the mainland minimum, subject to review by industry committees in hardship cases.

14. Broadcasters: Announcers, news editors and chief engineers of broadcasting companies located in cities of 50,000 or less population are exempt from overtime.

15. Bulk petroleum dealers: Independently owned and controlled local bulk petroleum distributors are exempt from overtime if their annual sales are less than $1 million (exclusive of excise taxes).

16. Other provisions: (a) Board and lodging may be included as wages on a basis of a fair value calculation made by the Secretary. Also, such perquisites may be excluded from wages to the extent excluded under a collective bargaining agreement.

(b) The Secretary is authorized to study the employment effects of foreign competition in industries covered by the act and to report such studies to the President and to the Congress.

(c) The Secretary is required to study the complicated system of exemptions in the act for handling and processing agricultural products and to report the results and recommendations to the next session of this Congress.

Total newly covered employees, 4,013,000.

AMENDMENT OF ACT RELATING TO TRANSPORTATION OF REMAINS, FAMILIES, AND EFFECTS OF FEDERAL EMPLOYEES DYING ABROAD

Mr. JOHNSTON. Mr. President, the Comptroller General, in a letter to me dated December 16, 1960, has pointed out certain inconsistencies in existing law with regard to Federal employees serving in Alaska and Hawaii. At my direction, conferences were held by staff members and representatives of the General Accounting Office; and a bill to remove these inconsistencies has been prepared.

This measure, which I am now introducing, restores to the Federal agency involved authority to pay the transportation costs in the following cases involving Federal employees serving in Alaska and Hawaii:

First. The cost of transporting to his home or official station the remains of

an employee who dies on duty in Alaska or Hawaii.

Second. The cost of transporting to his home the remains of employees' dependents who die in Alaska or Hawaii.

Third. The cost of transporting to their home a deceased employee's dependents and his household effects.

These benefits were authorized prior to the admission of Alaska and Hawaii as States. When they became States, however, an inconsistency arose out of the language of applicable law, so that: first, the cost of transporting the remains of employees dying in Alaska or Hawaii is not authorized; second, the cost of transporting the remains of employees' dependents is authorized; and third, the cost of transporting to their homes of deceased employees' dependents and household effects is allowed, but only upon the basis of a liberal interpretation of existing law.

This bill in plain language authorizes the Government to pay the transportation costs in each of the three cases.

This measure has no effect upon existing legislation which permits the return to his home or official station of the remains of an employee who dies while in a travel status.

Mr. President, I send to the desk for appropriate reference a bill to accomplish these objectives.

Inasmuch as Alaska and Hawaii are now States, it is necessary to amend the law so as to apply the coverage to Federal employees in these two new States.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1458) to amend the act of July 8, 1940, relating to the transportation of the remains, families, and effects of Federal employees dying abroad, so as to restore the benefits of such act to employees dying in Alaska and Hawaii, and for other purposes, introduced by Mr. JOHNSTON, was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

LONGEVITY STEP INCREASES FOR POSTAL EMPLOYEES

Mr. JOHNSTON. Mr. President, during recent years an effort has been made to treat all Federal employees alike with regard to fringe benefits and conditions of employment. To this end, inequities have been removed wherever found and whenver noted.

The bill I am about to introduce is but another step in this direction. It relates to longevity step increases for employees subject to the Postal Pay Act.

Mr. President, employees in other departments and agencies of the Government who are compensated under the Classification Act receive longevity increases after fixed intervals in an amount equal to the regular within-step increase of the position to which assigned. This is as it should be. However, that is not true in the case of postal employees.

The amount of their longevity step increases was established many years ago, and at that time it was fixed at a flat amount of $100. It has remained fixed at this amount ever since.

In other words, our postal employees are treated unjustly as the result of an antiquated law. An employee in the Postal Department receives a periodic increase each year after entering the service until he reaches the top of his grade. The amount of the increase bears a relationship to the level of his work. In level one, it is $130. In level four, it is $160—this is the level to which the bulk of postal employees are assigned. The increase is somewhat greater in the higher levels.

However, when he becomes eligible for a longevity increase, he gets only the fixed amount of $100.

Mr. President, I send to the desk for appropriate reference a bill that fixes longevity increases for postal workers at an amount equal to the within-step increase of the various grade levels. Also, the bill provides that longevity increases shall become effective at the end of 10, 13, and 16 years of service so as to more nearly correspond with the Classification Act.

I want our postal workers to know that I expect this bill to be given early attention by the committee and I am hopeful that it will be reported favorably to the Senate for action at an early date.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1459) to amend the provisions of law relating to longevity step increases for postal employees, introduced by Mr. JOHNSTON, was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

DESIGNATION OF JULY 25 OF EACH YEAR AS PUERTO RICAN DAY

Mr. KEATING. Mr. President, on behalf of my distinguished colleague from New York [Mr. JAVITS] and myself, I introduce for appropriate reference a joint resolution designating July 25 of each year as Puerto Rican Day in the United States of America. It is fitting that we focus the attention of the Congress and the people of our Nation on the many contributions of Americans from Puerto Rico on the occasion of the Commonwealth's coming into being.

Since the early 1900's the Puerto Rican population on the mainland has grown from 500 to nearly 1 million. These citizens help to strengthen the strong ties between the mainland and the island. The United States is in a particularly unique position with respect to our island examples of democracy—the State of Hawaii and the Commonwealth of Puerto Rico. Both are, in a sense, an extension of the hand of the United States in sincere friendship to the peoples of the Orient and Latin America. In this capacity the Commonwealth and the people of Puerto Rico are making a great contribution to intra-hemisphere understanding. Puerto Rico's bonds of common language and cultural background with so much of South and Central America provide a bridge between the aspirations and achievements of the people of the Americas.

In addition to the contribution of Puerto Rico to the foreign affairs of our own Nation, we must not lose sight of the domestic impact migration from the island has had on many of our States.

Over 700,000 Puerto Ricans in New York have contributed much to the life of the city and State. With an earning power in New York City alone of $1 billion, these people have added greatly to the overall economy. The hopes and desires of the Puerto Ricans have to an extent been held back by barriers of distrust and discrimination. Puerto Ricans as well as all Americans are entitled to adequate housing, equal educational facilities, and employment commensurate with ability—not place of birth.

As these people come to master English, as their capabilities become more recognized and as their innate talents come to the forefront, their contributions in fields of national endeavor will increase. We can look for great results, but every effort must be made to speed that progress.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD immediately following my remarks.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD.

The joint resolution (S.J. Res. 70) designating July 25 of each year as "Puerto Rican Day in the United States of America," introduced by Mr. KEATING (for himself and Mr. JAVITS), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That July 25 of each year is hereby designated as "Puerto Rican Day in the United States of America," and the President of the United States is authorized and requested to issue annually a proclamation calling upon the people of the United States to observe this day with appropriate ceremonies.

EXTENSION FOR 2 YEARS TEMPORARY PROVISIONS OF PUBLIC LAWS 815 AND 874, 81ST CONGRESS—ADDITIONAL COSPONSOR OF BILL

Mr. KUCHEL. Mr. President, I ask unanimous consent that at the next printing of the bill (S. 1109) to extend for 2 years the temporary provisions of Public Laws 815 and 874, 81st Congress, relating to Federal assistance in the construction and operation of schools in areas affected by Federal activities, the name of the distinguished Senator from Maryland [Mr. BEALL] may be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

AWARD POSTHUMOUSLY OF MEDAL TO DR. THOMAS A. DOOLEY III—ADDITIONAL COSPONSOR OF BILL

Mr. BRIDGES. Mr. President, I ask unanimous consent that the name of the senior Senator from Connecticut [Mr. BUSH] may be added as a cosponsor of the bill (S. 1377) to authorize the award posthumously of an appropriate medal to Dr. Thomas A. Dooley III, and that his name so appear on any further printings of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL TURKEY MARKETING ACT—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of March 21, 1961, the names of Mr. MOSS, Mr. SYMINGTON, Mr. LONG of Missouri, and Mr. MAGNUSON were added as additional cosponsors of the bill (S. 1389) to enable producers to provide a supply of turkeys adequate to meet the needs of consumers, to maintain orderly marketing conditions and to promote and expand the consumption of turkeys and turkey products, introduced by Mr. MCCARTHY (for himself and Mr. HUMPHREY) on March 21, 1961.

NATIONAL SECURITY — MESSAGE FROM THE PRESIDENT (H. DOC. NO. 123)

Mr. MANSFIELD. Mr. President, today the President has sent to Congress the defense message, and I understand the message is being read in the House of Representatives. I ask unanimous consent that the message be referred to the appropriate committee, without reading, and that the message be printed in the RECORD.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

The message was referred to the Committee on Appropriations, as follows:

To the Congress of the United States:

In my role as Commander in Chief of the American Armed Forces, and with my concern over the security of this Nation now and in the future, no single question of policy has concerned me more since entering upon these responsibilities than the adequacy of our present and planned military forces to accomplish our major national security objectives.

In January, while ordering certain immediately needed changes, I instructed the Secretary of Defense to reappraise our entire defense strategy, capacity, commitments, and needs in the light of present and future dangers. The Secretary of State and others have been consulted in this reappraisal, and I have myself carefully reviewed their reports and advice.

Such a review is obviously a tremendous task and it still continues. But circumstances do not permit a postponement of all further action during the many additional months that a full reappraisal will require. Consequently we are now able to present the most urgent and obvious recommendations for inclusion in the fiscal 1962 budget.

Meaningful defense budget decisions, however, are not possible without preliminary decisions on defense policy, reflecting both current strategic assumptions and certain fundamental principles. These basic policies or principles, as stated below, will constitute the essential guidelines and standards to be followed by all civilian and military personnel who work on behalf of our Nation's security. The budget which follows, if enacted by the Congress under its own solemn duty "to provide for the common defense," is designed to implement these assumptions as we now see them, and to chart a fresh, clear course for our security in a time of rising dangers and persistent hope.

I. BASIC DEFENSE POLICIES

1. The primary purpose of our arms is peace, not war—to make certain that they will never have to be used—to deter all wars, general or limited, nuclear or conventional, large or small; to convince all potential aggressors that any attack would be futile; to provide backing for diplomatic settlement of disputes; to insure the adequacy of our bargaining power for an end to the arms race. The basic problems facing the world today are not susceptible to a military solution. Neither our strategy nor our psychology as a nation—and certainly not our economy—must become dependent upon the permanent maintenance of a large military establishment. Our military posture must be sufficiently flexible and under control to be consistent with our efforts to explore all possibilities and to take every step to lessen tensions, to obtain peaceful solutions, and to secure arms limitations. Diplomacy and defense are no longer distinct alternatives, one to be used where the other fails—both must complement each other.

Disarmament, so difficult and so urgent, has been much discussed since 1945, but progress has not been made. Recrimination in such matters is seldom useful, and we for our part are determined to try again. In so doing, we note that, in the public position of both sides in recent years, the determination to be strong has been coupled with announced willingness to negotiate. For our part, we know there can be dialectical truth in such a position, and we shall do all we can to prove it in action. This budget is wholly consistent with our earnest desire for serious conversation with the other side on disarmament. If genuine progress is made, then as tension is reduced, so will be our arms.

2. Our arms will never be used to strike the first blow in any attack. This is not a confession of weakness but a statement of strength. It is our national tradition. We must offset whatever advantage this may appear to hand an aggressor by so increasing the capability of our forces to respond swiftly and effectively to any aggressive move as to convince any would-be aggressor that such a movement would be too futile and costly to undertake. In the area of general war, this doctrine means that such capability must rest with that portion of our forces which would survive the initial attack. We are not creating forces for a first strike against any other nation. We shall never threaten, provoke, or initiate aggression—but if aggression should come, our response will be swift and effective.

3. Our arms must be adequate to meet our commitments and insure our security, without being bound by arbitrary budget ceilings. This Nation can afford to be strong—it cannot afford to be weak. We shall do what is needed to make and to keep us strong. We must, of course, take advantage of every opportunity to reduce military outlays as a result of scientific or managerial progress, new strategic concepts, a more efficient, manageable and thus more effective Defense Establishment, or international agreements for the control and limitation of arms. But we must not shrink from additional costs where they are necessary. The additional $650 million in expenditures for fiscal 1962 which I am recommending today, while relatively small, are too urgent to be governed by a budget largely decided before our defense review had been completed. Indeed, in the long run the net effect of all the changes I am recommending will be to provide a more economical budget. But I cannot promise that in later years we need not be prepared to spend still more for what is indispensable. Much depends on the course followed by other nations. As a proportion of gross national product, as a share of our total budget, and in comparison with our national effort in earlier times of war, this increase in defense expenditures is still substantially below what our citizens have been willing and are now able to support as insurance on their security—insurance we hope is never needed—but insurance we must nevertheless purchase.

4. Our arms must be subject to ultimate civilian control and command at all times, in war as well as peace. The basic decisions on our participation in any conflict and our response to any threat—including all decisions relating to the use of nuclear weapons, or the escalation of a small war into a large one—will be made by the regularly constituted civilian authorities. This requires effective and protected organization, procedures, facilities, and communication in the event of attack directed toward this objective, as well as defensive measures designed to insure thoughtful and selective decisions by the civilian authorities. This message and budget also reflect that basic principle. The Secretary of Defense and I have had the earnest counsel of our senior military advisers and many others—and in fact they support the great majority of the decisions reflected in this budget. But I have not delegated to anyone else the responsibilities for decision which are imposed upon me by the Constitution.

5. Our strategic arms and defenses must be adequate to deter any deliberate nuclear attack on the United States or our allies by making clear to any potential aggressor that sufficient retaliatory

forces will be able to survive a first strike and penetrate his defenses in order to inflict unacceptable losses upon him. As I indicated in an address to the Senate some 31 months ago, this deterrence does not depend upon a simple comparison of missiles on hand before an attack. It has been publicly acknowledged for several years that this Nation has not led the world in missile strength. Moreover, we will not strike first in any conflict. But what we have and must continue to have is the ability to survive a first blow and respond with devastating power. This deterrent power depends not only on the number of our missiles and bombers, but on their state of readiness, their ability to survive attack, and the flexibility and sureness with which we can control them to achieve our national purpose and strategic objectives.

6. The strength and deployment of our forces in combination with those of our allies should be sufficiently powerful and mobile to prevent the steady erosion of the free world through limited wars; and it is this role that should constitute the primary mission of our oversea forces. Nonnuclear wars, and sublimited or guerrilla warfare, have since 1945 constituted the most active and constant threat to free world security. Those units of our forces which are stationed overseas, or designed to fight overseas, can be most usefully oriented toward deterring or confining those conflicts which do not justify and must not lead to a general nuclear attack. In the event of a major aggression that could not be repulsed by conventional forces, we must be prepared to take whatever action with whatever weapons are appropriate. But our objective now is to increase our ability to confine our response to nonnuclear weapons, and to lessen the incentive for any limited aggression by making clear what our response will accomplish. In most areas of the world, the main burden of local defense against overt attack, subversion, and guerrilla warfare must rest on local populations and forces. But given the great likelihood and seriousness of this threat, we must be prepared to make a substantial contribution in the form of strong, highly mobile forces trained in this type of warfare, some of which must be deployed in forward areas, with a substantial airlift and sealift capacity and prestocked oversea bases.

7. Our defense posture must be both flexible and determined. Any potential aggressor contemplating an attack on any part of the free world with any kind of weapons, conventional or nuclear, must know that our response will be suitable, selective, swift, and effective. While he may be uncertain of its exact nature and location, there must be no uncertainty about our determination and capacity to take whatever steps are necessary to meet our obligations. We must be able to make deliberate choices in weapons and strategy, shift the tempo of our production and alter the direction of our forces to meet rapidly changing conditions or objectives at very short notice and under any circumstances. Our weapon systems must be usable in a manner permitting deliberation and discrimination as to timing, scope, and targets in response to civilian authority; and our defenses must be secure against prolonged reattack as well as a surprise first strike. To purchase productive capacity and to initiate development programs that may never need to be used—as this budget proposes—adopts an insurance policy of buying alternative future options.

8. Our defense posture must be designed to reduce the danger of irrational or unpremeditated general war—the danger of an unnecessary escalation of a small war into a large one, or of miscalculation or misinterpretation of an incident or enemy intention. Our diplomatic efforts to reach agreements on the prevention of surprise attack, an end to the spread of nuclear weapons—indeed all our efforts to end the arms race—are aimed at this objective. We shall strive for improved communication among all nations, to make clear our own intentions and resolution, and to prevent any nation from underestimating the response of any other, as has too often happened in the past. In addition our own military activities must be safeguarded against the possibility of inadvertent triggering incidents. But even more importantly, we must make certain that our retaliatory power does not rest on decisions made in ambiguous circumstances, or permit a catastrophic mistake.

It would not be appropriate at this time or in this message to either boast of our strength or dwell upon our needs and dangers. It is sufficient to say that the budgetary recommendations which follow, together with other policy, organizational and related changes, and studies now underway administratively, are designed to provide for an increased strength, flexibility, and control in our Defense Establishment in accordance with the above policies.

II. STRENGTHENING AND PROTECTING OUR STRATEGIC DETERRENT AND DEFENSES

A. Improving our missile deterrent: As a power which will never strike first, our hopes for anything close to an absolute deterrent must rest on weapons which come from hidden, moving, or invulnerable bases which will not be wiped out by a surprise attack. A retaliatory capacity based on adequate numbers of these weapons would deter any aggressor from launching or even threatening an attack—an attack he knew could not find or destroy enough of our force to prevent his own destruction.

1. Polaris: The ability of the nuclear-powered Polaris submarine to operate deep below the surface of the seas for long periods and to launch its ballistic, solid-fuel, nuclear-armed missiles while submerged gives this weapons system a very high degree of mobility and concealment, making it virtually immune to ballistic missile attack.

In the light of the high degree of success attained to date in its development, production, and operation, I strongly recommend that the Polaris program be greatly expanded and accelerated. I have earlier directed the Department of Defense, as stated in my state of the Union message, to increase the fiscal year 1961 program from 5 submarine starts to 10, and to accelerate the delivery of these and other Polaris submarines still under construction. This action will provide 5 more operational submarines about 9 months earlier than previously planned.

For fiscal year 1962, I recommend the construction of 10 more Polaris submarines, making a total of 29, plus 1 additional tender. These 10 submarines, together with the 10 programed for fiscal year 1961, are scheduled to be delivered at the rate of 1 a month or 12 a year, beginning in June 1963, compared with the previous rate of 5 a year. Under this schedule, a force of 29 Polaris submarines can be completed and at sea 2 months before the present program called for 19 boats, and 2 years earlier than would be possible under the old 5-a-year rate. These 29 submarines, each with a full complement of missiles, will be a formidable deterrent force. The sooner they are on station, the safer we will be. And our emphasis upon a weapon distinguished primarily for its invulnerability is another demonstration of the fact that our posture as a nation is defensive and not aggressive.

I also recommend that the development of the long-range Polaris A–3 be accelerated in order to become available a year earlier, at an eventual savings in the procurement of the A–2 system.

This longer range missile with improved penetration capability will greatly enhance the operational flexibility of the Polaris force and reduce its exposure to shore-based antisubmarine warfare measures. Finally, we must increase the allowance of Polaris missiles for practice firing to provide systematic "proving ground" data for determining and improving operational reliability.

The increases in this program, including $15 million in new obligational authority for additional crews, constitute the bulk of the budget increases—$1.34 billion in new obligational authority on a full funded basis, over a 4-year period though only $270 million in expenditures in fiscal 1962. I consider this a wise investment in our future.

2. Minuteman: Another strategic missile system which will play a major role in our deterrent force, with a high degree of survivability under ballistic missile attack, is the solid fuel Minuteman. This system is planned to be deployed in well-dispersed hardened sites and, eventually, in a mobile mode on railroad cars. On the basis of the success of tests conducted to date and the importance of this system to our overall strategy, I recommend the following steps:

1. Certain design changes to improve the reliability, guidance accuracy, range, and reentry of this missile should be incorporated earlier than previously planned, by additional funding for research and development.

2. A more generous allotment of missiles for practice firing should, as in the case of the Polaris, be provided to furnish more operational data sooner.

3. The three mobile Minuteman squadrons funded in the January budget should be deferred for the time being and replaced by three more fixed-base squadrons (thus increasing the total

number of missiles added by some two-thirds). Development work on the mobile version will continue.

4. Minuteman capacity production should be doubled to enable us to move to still higher levels of strength more swiftly should future conditions warrant doubling our production. There are great uncertainties as to the future capabilities of others; as to the ultimate outcome of struggles now going on in many of the world's trouble spots; and as to future technological breakthroughs either by us or any other nation. In view of these major uncertainties, it is essential that, here again, we adopt an insurance philosophy and hedge our risks by buying options on alternative courses of action. We can reduce lead-time by providing, now, additional standby production capacity that may never need to be used, or used only in part, and by constructing additional bases which events may prove could safely have been postponed to the next fiscal year. But that option is well worth the added cost.

Together, these recommendations for Minuteman will require the addition of $96 million in new obligational authority to the January budget estimate.

3. Skybolt: Another type of missile less likely to be completely eliminated by enemy attack is the air-to-ground missile carried by a plane that can be off the ground before an attack commences. Skybolt is a long-range (1,000-mile) air-launched, solid-fuel nuclear-warhead ballistic missile designed to be carried by the B–52 and the British V-bombers. Its successful development and production may extend the useful life of our bombers into the missile age—and its range is far superior to the present Hound Dog missiles.

I recommend that an additional $50 million in new obligational authority be added to the 1962 budget to enable this program to go forward at an orderly rate.

B. Protecting our bomber deterrent. The considerably more rapid growth projected for our ballistic missile force does not eliminate the need for manned bombers—although no funds were included in the January budget for the further procurement of B–52 heavy bombers and B–58 medium bombers, and I do not propose any. Our existing bomber forces constitute our chief hope for deterring attack during this period prior to the completion of our missile expansion. However, only those planes that would not be destroyed on the ground in the event of a surprise attack striking their base can be considered sufficiently invulnerable to deter an aggressor.

I therefore recommend the following steps to protect our bomber deterrent:

1. Airborne alert capacity: That portion of our force which is constantly in the air is clearly the least vulnerable portion. I am asking for the funds to continue the present level of indoctrination training flights, and to complete the standby capacity and materials needed to place one-eighth of our entire heavy bomber force on airborne alert at any time. I also strongly urge the reenactment of section 512(b) of the Department of Defense Appropriation Act for 1961, which authorizes the Secretary of Defense, if the President determines it is necessary, to provide for the cost of a full airborne alert as a deficiency expense approved by the Congress.

2. Increased ground alert force and bomb alarms: Strategic bombers standing by on a ground alert of 15 minutes can also have a high degree of survivability provided adequate and timely warning is available. I therefore recommend that the proportion of our B–52 and B–47 forces on ground alert should be increased until about half of our total force is on alert. In addition, bomb alarm detectors and bomb alarm signals should be installed at key warning and communication points and all SAC bases, to make certain that a dependable notification of any surprise attack cannot be eliminated. Forty-five million dollars in new obligational authority will pay for all of these measures.

C. Improving our continental defense and warning systems: Because of the speed and destructiveness of the intercontinental ballistic missile and the secrecy with which it can be launched, timely warning of any potential attack is of crucial importance not only for preserving our population but also for preserving a sufficient portion of our military forces—thus deterring such an attack before it is launched. For any attacker knows that every additional minute gained means that a larger part of our retaliatory force can be launched before it can be destroyed on the ground. We must assure ourselves, therefore, that every feasible action is being taken to provide such warning.

To supplement the ballistic missile early warning system (BMEWS), on which construction is now proceeding as fast as is practical, the satellite-borne Midas system, now under development, is designed to provide about 30 minutes of warning by detecting missiles immediately after launching. Together with BMEWS, Midas would greatly increase the assurance and reliability of timely warning. I recommend that an additional $60 million in new obligational authority be added to the 1962 budget to accelerate completion of the development phase of the Midas program, with the goal of achieving an operational system at an earlier date.

For the next several years at least, however, we shall have to continue to provide a defense against manned bomber attack. Such an attack is most likely to coincide with, or follow, a ballistic missile attack seeking to incapacitate our antibomber defense system. Measures must, therefore, be taken to enhance the ability of the air defense system to cope with a combined attack. I recommend $23 million in new obligational authority be added to the 1962 budget for this purpose.

D. Improving the command and control of our strategic deterrent: The basic policies stated at the beginning of this message lay new emphasis on improved command and control—more flexible, more selective, more deliberate, better protected and under ultimate civilian authority at all times. This requires not only the development and installation of new equipment and facilities, but, even more importantly, increased attention to all organizational and procedural arrangements for the President and others. The invulnerable and continuous command posts and communications centers provided in these recommendations (requiring an additional $16 million in new obligational authority) are only the beginning of a major but absolutely vital effort to achieve a truly unified, nationwide, indestructible system to insure high-level command communication and control and a properly authorized response under any conditions.

E. There are a number of other space and research programs related to our strategic and continental air defense forces which I find require additional support. These include missile defense and penetration aids, Dynasoar, Advent, Defender, Discoverer, and certain other programs. An additional $226 million in new obligational authority is requested to finance them.

III. STRENGTHENING OUR ABILITY TO DETER OR CONFINE LIMITED WARS

The free world's security can be endangered not only by a nuclear attack, but also by being slowly nibbled away at the periphery, regardless of our strategic power, by forces of subversion, infiltration, intimidation, indirect or nonovert aggression, internal revolution, diplomatic blackmail, guerrilla warfare, or a series of limited wars.

In this area of local wars, we must inevitably count on the cooperative efforts of other peoples and nations who share our concern. Indeed, their interests are more often directly engaged in such conflicts. The self-reliant are also those whom it is easiest to help—and for these reasons we must continue and reshape the military assistance program which I have discussed earlier in my special message on foreign aid.

But to meet our own extensive commitments and needed improvements in conventional forces, I recommend the following:

A. Strengthened capacity to meet limited and guerrilla warfare—limited military adventures and threats to the security of the free world that are not large enough to justify the label of "limited war." We need a greater ability to deal with guerrilla forces, insurrections, and subversion. Much of our effort to create guerrilla and antiguerrilla capabilities has in the past been aimed at general war. We must be ready now to deal with any size of force, including small externally supported bands of men; and we must help train local forces to be equally effective.

B. Expanded research on nonnuclear weapons: A few selected high-priority areas—strategic systems, air defense, and space—have received the overwhelming proportion of our defense research effort. Yet, technology promises great improvements in nonnuclear armaments as well; and it is important that we be in the forefront of these developments. What is needed are entirely new types of nonnuclear weapons and equipment—with increased firepower, mobility, and communications, and more

suited to the kind of tasks our limited war forces will most likely be required to perform. I include here antisubmarine warfare as well as land and air operations. I recommend, therefore, an additional $122 million in new obligational authority to speed up current limited warfare research and development programs and to provide for the initiation of entirely new programs.

C. Increased flexibility of conventional forces: Our capacity to move forces in sizable numbers on short notice and to be able to support them in one or more crisis areas could avoid the need for a much larger commitment later. Following my earlier direction, the Secretary of Defense has taken steps both to accelerate and increase the production of airlift aircraft. A total of 129 new, longer range, modern airlift aircraft will be procured thrcugh fiscal year 1962, compared with the 50 previously programed. An additional $172 million new obligational authority will be required in the 1962 budget to finance this expanded program.

These additional aircraft will help to meet our airlift requirements until the new specially designed, long-range, jet-powered C–141 transport becomes available. A contractor for this program has been selected and active development work will soon be started. Adequate funds are already included in the January budget to finance this program through the coming fiscal year.

I am also recommending in this message $40 million in new obligational authority for the construction of an additional amphibious transport of a new type, increasing both the speed and the capability of Marine Corps sealift capacity; and $84 million in new obligational authority for an increase in the Navy's ship rehabilitation and modernization program, making possible an increase in the number of ship overhauls (as well as a higher level of naval aircraft maintenance).

But additional transport is not enough for quick flexibility. I am recommending $230 million in new obligational authority for increased procurement of such items as helicopters, rifles, modern nonnuclear weapons, electronics and communications equipment, improved ammunition for artillery and infantry weapons, and torpedoes. Some important new advances in ammunition and bombs can make a sizable qualitative jump in our limited war capabilities.

D. Increased nonnuclear capacities of fighter aircraft: Manned aircraft will be needed even during the 1965–75 missile era for various limited war missions. Target recognition, destruction of all types of targets when extreme accuracy is required, and the control of airspace over enemy territory will all continue to be tasks best performed by manned aircraft.

Expected phaseout of Navy and Air Force fighters by 1965, together with reduced numbers and increasing obsolescence of the remaining aircraft, make necessary the development of an advanced tactical fighter emphasizing nonnuclear capabilities. I am requesting $45 million in new obligational authority for this purpose.

Meanwhile, I am recommending $25 million in new obligational authority for the modification of the F–105 tactical fighter to improve its capability to handle conventionally armed ordnance items, and to increase its suitability for airstrips of all types of areas.

E. Increased personnel, training, and readiness for conventional forces: I am recommending $39 million in new obligational authority for increases in Army personnel strength to expand guerrilla warfare units and round out other existing units, and an increase in the Marine Corps to bring it up closer to authorized strength levels. (In addition, personnel is being added to the Navy for Polaris crews, and to the Air Force for the ground alert expansion.) The sum of these personnel additions is 13,000 men. I am also recommending $25 million additional in new obligational authority for pay of retired personnel of the military forces.

But more personnel alone is not enough. I am recommending an additional $65 million in new obligational authority for increased readiness training of Army and Air Force units. These funds will provide for additional field training and mobility exercises for the Army and test exercises for the composite airstrike forces and MATS unit. We recognize the role of exercises and deployments in demonstrating to our friends and opponents our ability to deploy forces rapidly in a crisis.

IV. SAVINGS MADE POSSIBLE BY PROGRESS

The elimination of waste, duplication, and outmoded or unjustifiable expenditure items from the defense budget is a long and arduous undertaking, resisted by special arguments and interests from economic, military, technical, and other special groups. There are hundreds of ways, most of them with some merit, for spending billions of dollars on defense; and it is understandable that every critic of this budget will have a strong preference for economy on some expenditures other than those that affect his branch of the service, or his plant, or his community.

But hard decisions must be made. Unneeded facilities or projects must be phased out. The Defense Establishment must be lean and fit, efficient and effective, always adjusting to new opportunities and advances, and planning for the future. The national interest must be weighed against special or local interests; and it is the national interest that calls upon us to cut our losses and cut back those programs in which a very dim promise no longer justifies a very large cost.

Specifically:

1. Our decision to acquire a very substantial increase in second-generation solid-fuel missiles of increased invulnerability (Polaris and Minuteman) enables us to eliminate safely the last two squadrons of Titan originally contemplated. These would not have become operational until 1964, and at a cost of $270 million—a cost several times that of the Minuteman missiles we are purchasing for the same period and could increase with our standby facility. One hundred million dollars in the 1962 budget can be saved by this adjustment.

2. The phaseout of a number of B–47 medium bomber wings already planned will be accelerated to provide promptly the trained crews required for the expanded ground alert program. (Fiscal 1962 savings: $35 million.)

3. Additional personnel will also be made available by the immediate phaseout of the subsonic Snark airbreathing long-range missile, which is now considered obsolete and of marginal military value in view of ICBM developments, the Snark's low reliability and penetrability, the lack of positive control over its launchings, and the location of the entire wing at an unprotected site. (Fiscal 1962 savings: $7 million.)

4. The acquired missile capability programed by this message also makes unnecessary and economically unjustifiable the development of the B–70 mach 3 manned bomber as a full weapons system at this time. The B–70 would not become available in operational numbers until well beyond 1965. By that time we expect to have a large number of intercontinental ballistic missiles, fully tested and in place, as well as a substantial manned bomber force mostly equipped with air-to-ground missiles. In view of the extremely high cost of the B–70 system, its lesser survivability as a ground-based system, and its greater vulnerability in the air compared to missiles, its capabilities as a second strike system do not appear to have sufficient advantages over a much less expensive missile, or even a B–52 or successor bomber equipped with Skybolt, to justify a request in fiscal 1962 for $358 million.

We recognize, however, that there are still uncertainties with respect to the operational characteristics of our planned missile force. We also recognize that there are certain advantages inherent in a controlled force of manned bombers. To preserve the option of developing this manned bomber weapon system, if we should later determine such a system is required, I recommend that the B–70 program be carried forward essentially to explore the problems of flying at three times the speed of sound with an airframe potentially useful as a bomber, with the development of a small number of prototype aircraft and related bomb-navigation systems. We should also explore the possibility of developing a manned bomber system specifically designed to operate in an environment in which both sides have large ICBM forces.

Even on this more limited basis, the B–70 project will cost $1.3 billion before it is completed in 1967. Approximately $800 million has already been provided, $220 million is now requested for 1962—$138 million less than the amount included in the January budget—and the balance will be required in subsequent years. The total development program which I am recommending will cost $1.4 billion less than that previously planned.

5. Nearly 15 years and about $1 billion have been devoted to the attempted development of a nuclear-powered aircraft; but the possibility of achieving a

militarily useful aircraft in the foreseeable future is still very remote. The January budget already recommended a severe curtailment of this project, cutting the level of effort in half by limiting the scope to only one of the two different engines under development, although not indicating which one. We believe the time has come to reach a clean-cut decision in this matter. Transferring the entire subject matter to the Atomic Energy Commission budget where it belongs, as a nondefense research item, we propose to terminate development effort on both approaches on the nuclear powerplant, comprising reactor and engine, and on the airframe; but to carry forward scientific research and development in the fields of high temperature materials and high performance reactors, which is related to AEC's broad objectives in atomic reactor development including some work at the present plants, making use of their scientific teams. This will save an additional $35 million in the Defense budget for fiscal 1962 below the figure previously reduced in January, and will avoid a future expenditure of at least $1 billion, which would have been necessary to achieve first experimental flight.

6. The January budget did not include funds for the continued development of the Navy's "Missileer" fleet defense aircraft, but funds were included for the continued development of the Eagle missile—designed for use by the Missileer—in the hope that it could be adapted for use by some other aircraft. I am now advised that no such alternative use is in prospect; and I have directed the cancellation of that project, with a saving estimated at almost $57 million in 1961 and 1962.

7. The plan to install Polaris missiles on the cruiser *Long Beach* has been canceled. For effectiveness in a nuclear war, the money would be better spent on the far less vulnerable Polaris submarines. In a limited war, the cruiser's utility would be reduced by the presence of the missiles. (Savings in fiscal 1962: $58 million.)

8. Finally, technological progress causes obsolescence not only in military hardware but also in the facilities constructed for their deployment. We must continually review our nearly 7,000 military installations in the light of our needs now and in the event of emergency. Those bases and installations which are no longer required must be inactivated, and disposed of where feasible, and I have so directed the Secretary of Defense. He has already taken steps to have 73 domestic and foreign installations discontinued as excess to our needs now and at any time in the future; and studies are continuing now to identify additional facilities which are surplus to our requirements.

I am well aware that in many cases these actions will cause hardships to the communities and individuals involved. We cannot permit these actions to be deferred; but the Government will make every practicable effort to alleviate these hardships, and I have directed the Secretary of Defense to take every possible step to ease the difficulties for those displaced. But it is difficult, with so many defense and other budgetary demands, to justify support of military installations, with high operating and payroll costs and property values, which are no longer required for the defense of the Nation. The closing of excess installations overseas will in many cases help alleviate our balance-of-payments deficit.

No net savings are expected to be realized in 1962 from these inactivations because of the added costs involved in closing, and no reductions in the 1962 budget are proposed on that account. Substantial savings, approximately $220 million per year, will be realized, however, in subsequent years.

(I am also proposing that $320 million of the obligational authority required be provided by transfer from the current balances of working capital funds in the Defense Department.)

CONCLUSION

Our military position today is strong. But positive action must be taken now if we are to have the kind of forces we will need for our security in the future. Our preparation against danger is our hope of safety. The changes in the defense program which I have recommended will greatly enhance the security of this Nation in the perilous years which lie ahead. It is not pleasant to request additional funds at this time for national security. Our interest, as I have emphasized, lies in peaceful solutions, in reducing tension, in settling disputes at the conference table and not on the battlefield. I am hopeful that these policies will help secure these ends. I commend them to the Congress and to the Nation.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 28, 1961.*

APPOINTMENTS BY THE VICE PRESIDENT

SENATE OFFICE BUILDING COMMISSION

The PRESIDING OFFICER. The Chair announces the appointment by the Vice President of the Senator from Maine [Mr. MUSKIE] and the Senator from Ohio [Mr. YOUNG] to be members of the Senate Office Building Commission created by the act of April 28, 1904, as amended, vice former Senator Green, of Rhode Island, and former Senator JOHNSON, of Texas.

SPECIAL COMMITTEE ON AGING

The PRESIDING OFFICER. On behalf of the Vice President, the Chair announces the appointment of Senator JACOB JAVITS, of New York, to be a member of the Special Committee on Aging, in place of Senator KEATING, of New York.

NOTICE CONCERNING CERTAIN NOMINATIONS BEFORE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Francis C. Whelan, of California, to be U.S. attorney for the southern district of California, for a term of 4 years, vice Laughlin E. Waters;

Miles W. Lord, of Minnesota, to be U.S. attorney for the district of Minnesota, for a term of 4 years, vice Fallon Kelly, resigned;

William H. Craig, Jr., of New Hampshire, to be U.S. attorney for the district of New Hampshire, for a term of 4 years, vice Maurice Bois;

Harry A. Sieben, of Minnesota, to be U.S. marshal for the district of Minnesota, for a term of 4 years, vice C. Enard Erickson;

Royal Dion, of New Hampshire, to be U.S. marshal for the district of New Hampshire, for a term of 4 years, vice George A. Colbath;

Dave Fresquez, of New Mexico, to be U.S. marshal for the district of New Mexico, for a term of 4 years, vice George W. Beach

George A. Bayer, of Alaska, to be U.S. marshal for the district of Alaska, for a term of 4 years, vice Fred S. Williamson.

Francis M. Wilson, of Missouri, to be U.S. marshal for the western district of Missouri, for a term of 4 years, vice Burke Dennis; and

Covell H. Meek, of Iowa, to be U.S. marshal for the northern district of Iowa, for a term of 4 years, vice Clement W. Craham.

On behalf of the Committee of the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Tuesday, April 4, 1961, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearings which may be scheduled.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD as follows:

By Mr. JORDAN:

Address entitled "The Textile Industry and National Economic Growth," delivered by the Hon. Luther H. Hodges, Secretary of Commerce, at the annual meeting of the American Cotton Manufacturers Institute, at Miami Beach, Fla., on March 24, 1961.

By Mr. HUMPHREY:

Article entitled "Civil Rights Plan Perking," written by Senator LONG, of Hawaii, and published in the Honolulu Advertiser of March 12, 1961.

THE JOHN BIRCH SOCIETY

Mr. YOUNG of North Dakota. Mr. President, until recently there has been little publicity on the John Birch Society, a comparatively new and secret organization. I have received many communications requesting information, and some even suggest an investigation by Congress. The proposals for investigations come from both those opposed to the John Birch Society and from society

members themselves, such as J. Blaine Miller, the recognized head of the John Birch Society in North Dakota.

Many newspapers have been conducting their own investigations and compiling information, which has been published in a number of articles and editorials. Because of public interest, I have inserted in the RECORD some of this material that has come to my attention. One of the best articles on the subject of the John Birch Society was written by a young journalist, Dick Dobson, associated with the Minot Daily News, published at Minot, N. Dak. The Minot Daily News is recognized as a conservative Republican newspaper. I ask unanimous consent to have his article, together with another clipping from the Minot Daily News, printed in the RECORD as part of my remarks.

Mr. President, I also ask unanimous consent to have printed in the RECORD as part of my remarks an article written by James E. Clayton, published in the March 26 issue of the Washington Post; an article by the well-known writer, Marquis Childs, appearing in the March 28 issue of the Washington Post; an article by Ralph McGill, appearing in the March 22 issue of the Evening Star; an article, appearing in the March 25 issue of the Washington Post, written by George E. Sokolsky, a recognized conservative; and an editorial written by Duane C. Indergaard, appearing in the March 23 issue of the Belfield News and Badlands Settler, published in Belfield, N. Dak.

There being no objection, the articles and the editorial were ordered to be printed in the RECORD, as follows:

[From the Minot (N. Dak.) Daily News, Mar. 25, 1961]

JOHN BIRCH SOCIETY EMERGES AS AN EXPLOSIVE ISSUE—CRITICS LASH AT VICIOUS CHARGES

(By Dick Dobson)

BISMARCK.—What is the John Birch Society? Why was it organized? What are its methods of operation?

These are questions that are being asked today by thousands, if not millions, of Americans.

Formed in late 1958, the society worked in semisecrecy for about 2 years, until rocketing to national prominence almost overnight.

The issue exploded when it was revealed that the society's founder had, in 1954, accused former President Dwight D. Eisenhower of being a Communist.

Robert Welch, a retired Belmont, Mass., businessman, and boss of the Birchians, made the allegation against Eisenhower.

He also said that ex-President Franklin D. Roosevelt and Harry S. Truman were used by the Reds for their purposes.

The upshot, in the last month, has been a flood of newspaper editorials, magazine articles, and congressional statements angrily denouncing the John Birch Society.

Senator MILTON R. YOUNG of North Dakota, replied to the vicious charges by remarking. "To label some of our most loyal and dedicated people as Communists plays right into the hands of the Communist movement."

Two North Dakota members of the society deplore the "national effort to discredit it."

They are J. Blaine Miller, Bismarck geologist, and Martin Vaaler, president of the State public service commission.

"The most vehement criticism," commented Miller, "is coming from those who are least informed."

Vaaler described the organization as a "patriotic group whose central idea is for less government interference and more individuality."

First, explains Miller, the charge that Ike is a Communist "has nothing to do whatsoever with the society."

The accusation was contained in a so-called book entitled "The Politician," which was written by Welch 4 years before he started organizing the John Birch Society.

Actually, the book is a voluminous letter sent by Welch to a few "intimate friends."

It was eventually expanded to 302 pages, but never published or distributed, according to Miller.

Members of the anti-Communist brotherhood may, at their individual discretion, accept or reject the premises of "The Politician," stated Miller.

"It is a misunderstanding," contends Miller, to confuse "The Politician" of 1954 with the John Birch Society of 1961.

"Our critics have not taken the time to learn our objectives and principles," said Miller.

Welch organized the John Birch Society on Dec. 8–9, 1958, at Indianapolis, Ind.

He called together 11 "patriotic and public-spirited" men and lectured them for 2 days on the threat of the "international Communist conspiracy."

Welch, 61, is a retired candy manufacturer. He was a member of the board of directors of the National Association, of Manufacturers for 7 years.

His biography reads, "Educated at the University of North Carolina (4 years), U.S. Naval Academy (2 years), Harvard Law School (2 years), and school of hard knocks (about 40 years)."

According to his admirers, he is a persuasive speaker and a prolific writer.

At the conclusion of the Indianapolis session, Welch suggested the formation of a society dedicated first to destroying the Communist tyranny and then driving on toward an era of less Government and more responsibility, in which we can create a better world.

Welch proposed naming the new society in honor of John Birch, an Army captain murdered by Chinese Communists on August 25, 1945.

Birch was a young Christian missionary, who voluntarily joined Gen. Claire Chennault's forces in China on July 4, 1942.

Ten days after V-J Day, he became "probably the first American casualty in that third world war, between the Communists and the ever-shrinking 'free world,' which is still being waged.

The text of Welch's address has been reproduced in the Blue Book, a document of about 20 pages which is a guide to the society's actions.

The Birchians call themselves "Americanists," a word defined as the antithesis of "Communists."

In 28 months, the John Birch Society has acquired members in every State. Its goal is to enroll a million members.

The group has organized local chapters, usually consisting of 10 to 20 members each, in 34 States and the District of Columbia.

Except for a few leaders, the number and names of members are held in strict secrecy because, said Miller, "It would serve no useful purpose to reveal them."

(Miller did say that Representative R. Fay Brown of Bismarck, Speaker of the North Dakota House of Representatives, "is not now nor has he ever been a John Birch Society member," as charged in a Jamestown Sun article.)

However, the society-sponsored publications, including the blue book, the Life of John Birch, and American Opinion magazine, are available to anyone, noted Miller.

A dozen chapters have been set up in North Dakota since last September, according to Miller.

There are four in Bismarck, three in Williston, and one each in Fargo, Braddock, Washburn, Watford City, and rural McKenzie County.

Members include businessmen, doctors, dentists, geologists, public officials, lawyers, farmers, and housewives, said Miller.

Senator YOUNG observed that the society "has among its members some of the most able and influential people in each community."

On April 13–14, Don Rueber of Milwaukee, a major coordinator for the society, will visit North Dakota in search of more memberships.

Rueber, a salaried Birch employee, will be showing a 2-hour movie of a Welch speech to select audiences in various cities.

Annual society dues are $24 for men and $12 for women. Life memberships cost $1,000.

Time magazine reported that the Birch cells (or chapters), "take orders from society headquarters and promote Communist-style front organizations that do not use the John Birch name.

"Carefully avoiding normal channels of political action, the society accepts the hard-boiled, dictatorial direction of one man."

Miller's and Vaaler's description differs with Time's.

The basic unit of organization, the chapter, meets about once a month, usually in a private home, to discuss "suggested coordinated action" proposed in bulletins mailed periodically from society headquarters, located in Belmont, Mass.

"There always are some disagreements among individual members," maintained Miller.

However, the advantage of the John Birch Society over a proliferation of other anti-Communist organizations, he said, "is that it is an action group, and not a debating club."

"That is why I joined the society," intoned Vaaler.

Other anti-Red groups, such as the Cardinal Mindszenty Foundation, the Christian Anti-Communist Crusade, and Moral Rearmament "publicize the problem, but offer no solution," claimed Miller.

"Khrushchev was not kidding when he said our children would live under socialism," commented Miller, who believes the United States may reach the "point of no return in 2 or 3 years."

Communist forces are on the march around the globe. In addition, he thinks the country is socializing itself from within.

Welch has mapped a 10-point action program for the defeat of the Communist conspiracy:

1. Dissemination of Americanist books and pamphlets, such as J. Edgar Hoover's "Masters of Deceit," as widely as possible.

2. Increasing the readership of Americanist periodicals, such as American Opinion, National Review, Human Events, and Dan Smoot Report.

3. Enlarging the audiences of Americanist commentators and newscasters, like Fulton Lewis, Jr. and Dean Clarence Manion.

4. Making some effective use of the weapon of letterwriting.

5. Organizing Americanist fronts, such as the Movement To Impeach Earl Warren and the Committee Against Summit Entanglements.

6. Waking up the American people to the seriousness of the danger of exposing, wherever possible, pro-Communist activities.

7. Making it more difficult for "dozens of slimy characters" to appear before unsuspecting audiences.

8. Making Americanist speakers available.

9. Supplying encouragement to anti-Communist refugee groups throughout the country.

10. Carrying on an educational campaign on the political front.

One of the foremost projects undertaken by the Birchians has been the demand for the impeachment of Earl Warren, Chief Justice of the U.S. Supreme Court.

(Impeachment does not constitute removal from office. It is the arraignment of a public officer for malfeasance.)

Welch charges that the Supreme Court has "become one of the most important agencies of the Communist global conquest."

Warren, he said, "is powerfully entrenched at the very heart of the establishment that has been running the Roosevelt-Truman-Eisenhower-Kennedy administrations."

Welch concedes that "dislodging Warren from Washington could be as difficult as kicking Khrushchev out of the Kremlin."

Another society project is to support a proposed amendment to the U.S. Constitution to repeal the 16th amendment (individual income tax) and to force the Federal Government to dispose of all its holdings, except as constitutionally specified.

The Birchians also back up the House Committee on Un-American Activities against Representative JAMES ROOSEVELT, Democrat, of California, and others who want to abolish it.

A fourth major project is the "continuing drive against the sale in this country of goods made by slave labor in Communist nations."

These items, mostly made in Eastern Europe, range from wooden coathangers to canned hams.

In the political sphere, the Birch "partisans have made their anonymous and unsettling presence felt in scores of U.S. communities," reported Time.

According to Welch, "In the 1960 campaign the John Birch Society, as an organization, took no part. Our official job was to supply our members more information about, and a better understanding of, both men and issues."

Each individual Birchian "then worked and voted entirely according to his own judgment and conscience," said Welch, who "personally supported Goldwater for the Republican nomination."

However, reports that Birchians were using various arm-bending tactics, such as economic coercion, came from Wichita, Kans., and elsewhere.

Senator YOUNG claimed, "They have accused me of being about every kind of a scoundrel, including a Communist or pro-Communist."

Miller emphatically denied that any underhanded methods were used by North Dakota members last fall.

He also said it was insane and absolutely not true to assume that the society considers all its opponents to be pro-Communists.

In North Dakota, society members are simply urged to play an active role, as individuals, in political affairs, he maintained.

As Welch is the self-anointed leader of the Birchians, his opinions presumably reflect the general thinking of the members, although there may exist shades or outright disagreements.

In the Blue Book, Welch left little or no room for dissent by saying, "We are not going to have factions developing on the two-sides-to-every-question theme."

Later, however, in a monthly bulletin, he wrote that it was not necessary or desirable that all members always think alike.

"One of the very things we are trying to prevent is the conversion of our civilization into a collection of standardized robots," Welch pointed out.

What does Welch believe?

Many of his current ideas are found in a booklet called "A World Gone Crazy," in which he surveys the degree of Communist influence in each of 107 countries.

From his "scoreboard," he concludes "that the Communists have now covered well over two-thirds of the total distance to their final goal of worldwide dominion."

The United States, he figured, was 40-to-60 percent Communist controlled, as of June 1, 1960, compared with 20-to-40 in 1958 and 30-to-50 in 1959.

Only five countries are "relatively safe," with 0-to-20 percent Communist control. They are Australia, Ireland, New Zealand, Portugal, and Spain.

Welch listed 29 countries "in danger" (but still less than 50 percent); 13 "teetering on the edge" (40-to-60); 28 "sliding into the abyss" (definitely over 50); and 32 "under Communist slavery."

The boxscore on some other nations are: Canada, 40-to-60; France, 30-to-50; Great Britain, 50-to-70; India, 60-to-80; Israel, 40-to-60; Sweden, 20-to-40; Thailand, 50-to-70; United Arab Republic, 80-to-100; and South Vietnam, 70-to-90.

Welch also contended that "all available evidence" indicates that U-2 pilot Gary Powers "must have purposely landed his plane in Russia" last May 1.

The "objectives of those who planned the incident," said Welch, "must have been: (1) to give the Soviet a model to duplicate; (2) to provide the American Communists with an excuse for getting reconnaissance over Russia suspended; and (3) to postpone the Summit Conference with a maximum of public disgrace to the United States."

Other Welchian statements, appearing in the Blue Book, are just as provocative. For example, Welch also believes:

1. The so-called International Communist Conspiracy now reaches "into all of the legislative halls, all of the union labor meetings, a majority of the religious gatherings, and most of the schools of the whole world."

2. Indian Prime Minister Nehru and Egyptian President Nasser are puppets of the Kremlin.

3. The United States foreign aid program was planned by Communists to weaken our economy.

4. Stalin, an amoral man, was "infinitely worse" than Hitler, an immoral man, because when they liquidated people, Hitler's conscience bothered him, while Stalin "simply wiped out his conscience."

5. President Franklin D. Roosevelt and Gen. George C. Marshall were responsible for getting the United States into World War II.

6. "Democracy is merely a deceptive phrase, a weapon of demagoguery and a perennial fraud." (Welch favors a republic form of government.)

7. Cuban Premier Fidel Castro is a Communist. (Welch wrote this a month before Castro overthrew the regime of Fulgencio Bastista.)

Anyone who expresses opinions as strongly as Welch does is certain to eventually create a storm of controversy about himself and the society he organized.

Senator YOUNG remarked, "My mail is heavy but I am pleased to note that about 95 percent of the letters are favorable" (to the stand taken by YOUNG).

Senator MIKE MANSFIELD of Montana, Democratic floor leader, said "something is wrong somewhere" when "any organization accuses a President of the United States" of being a Communist.

The Chicago Daily News termed the John Birch Society a "strange threat to democracy."

Former Vice President Richard M. Nixon warned Americans against adopting Communist tactics to fight subversives in this country.

"It may at times seem unrealistic and naive to follow the rules of the game when our opponents are so unscrupulous and completely devoid of morality," said Nixon.

"But, in the end, refusing to resort to methods that are wrong not only is right, but in the long run it is the most effective way to combat an evil doctrine like communism."

Dr. Eugene Carson Blake, chief executive officer of the United Presbyterian Church, stated the society is waging "campaigns of falsehoods" against the church.

Hans Engh of the Santa Barbara News-Press, writing in the Nation magazine, said the Birchians represent "that regressive force which, under one guise or another, seems to pop up whenever the country as a whole seems destined to move into a more progressive era."

A front-page editorial in the Los Angeles Times called the Birch group a "peril to conservatives."

"If the John Birchers follow the program of their leader," the Times said, "they will sow distrust, and aggravate disputes, and they will weaken the very strong case for conservatism."

Otis Chandler, publisher of the Times, concludes, "Subversion, whether of the left or the right, is still subversion." Senator YOUNG said he agreed with this viewpoint.

Conservative columnist George Sokolsky noted the "country is developing a large number of peculiar and subversive organizations, many of them in the guise of anti-communistic, some representing a pseudo-conservatism, some pursuing purposes which, if carried through, could damage this country."

Sokolsky suggested that a congressional investigation of "these new efforts to mobilize persons in activities designed to unsettle and disturb this country" might be warranted.

"That would be welcome," observed Miller, "because nothing could be more beneficial to the John Birch Society."

Miller also flatly rejected accusations that the society was "neofascist" and "would substitute a Fuehrer principle for our free society."

Most of the criticism of the society, Miller contended, is based on "misunderstanding" and the "distortions" in Time's article.

He pointed out that the Cardinal Mindszenty Foundation lists one of the Communist objectives for 1961 as "infiltration and smearing of anti-Communist groups by paid crackpots and hired disseminators of 'hate' literature."

Vaaler said if Senator YOUNG visited a chapter meeting, he would "never find a more dedicated and sincere group of Americans."

Richard Cardinal Cushing, archbishop of Boston, endorsed the society a year ago. In answer to an inquiry, he replied, "I do not know of any more dedicated anti-Communist in the country than Robert Welch. I unhesitatingly recommend him to you and endorse his John Birch Society."

George Todt, columnist for the Los Angeles Herald-Express, wrote he was "impressed" with the "dedication to anti-Communism and constitutional Americanism" of the Birchians.

The Arizona Republic, published in Phoenix, labeled the Birch group as "freedom's missionaries."

Most Rev. Mark K. Carroll, bishop of Wichita, decided the principles describing the philosophy of the society are nothing more than the Ten Commandments of God in modern language.

Welch presides over the 25-man national council of the John Birch Society, much as a president with his cabinet.

Council members include William J. Grede, Cola G. Parker and Ernest G. Swigert, all past presidents of the National Association of Manufacturers.

Others are Thomas J. Anderson, publisher of Farm and Ranch paper; T. Coleman Andrews, former Commissioner of Internal Revenue; Spruille Braden, former Assistant Secretary of State; Col. Laurence E. Bunker, former personal aide to Gen. Douglas MacArthur; Clarence Manion, former dean of

the Notre Dame Law School; and Lt. Gen. Charles B. Stone, III, retired Air Force officer.

Whether one joins the John Birch Society or not depends to a great extent on the individual's estimation of the seriousness and imminence of the threat from the International Communist criminal conspiracy, noted Miller.

Truman Wold, chapter leader in Fargo, remarked, "Anyone who attempts to do anything positive against communism is accused of being an under-the-bed looker."

Said Wold, "You don't have to look under the bed, just look around and they (the Communists) are all over the place."

[From the Minot (N. Dak.) Daily News, Mar. 25, 1961]

NOT BACKING BIRCH GROUP, HOOVER SAYS

FBI director J. Edgar Hoover has informed U.S. Senator MILTON R. YOUNG that he does not endorse the John Birch Society, a right-wing political action group, the North Dakota Senator disclosed today.

Hoover's letter to YOUNG read:

"I have been advised of your call to my office regarding the John Birch Society, and in response to your inquiry regarding this organization, I wish to advise that I have not endorsed this group or its activities in any fashion whatsoever.

"You also made inquiry regarding a statement which has been erroneously attributed to me to the effect that up to 80 percent of the top officials of the Department of Health, Education, and Welfare are Communists or are under Communist influence. This is, of course, a completely ridiculous assertion and when a report of this matter was brought to my attention recently it was promptly and emphatically denied as a fabrication.

"Your interest in contacting me regarding this situation is very much appreciated, and I assure you we are always happy to be of any possible service or assistance."

Young has exchanged broadsides recently with members of the society and has termed "vicious" charges of the society's founder against former President Eisenhower.

[From the Washington Post, Mar. 26, 1961]

JOHN BIRCH "ANTIS" POINT UNWELCOME SPOTLIGHT

(By James E. Clayton)

Three months ago, the John Birch Society had been heard of only in a few scattered areas of the country. Its desire to operate quietly and behind the scenes was generally being fulfilled.

But almost overnight, the society has become an organization of national interest. Newspapers on both coasts have denounced it. Two U.S. Senators have spoken against it on the Senate floor. Former Vice President Nixon has joined the protests. Time magazine has given the society a critical analysis.

The society has attracted this attention because of:

Its strong views on many topics. It thinks that everything from increased spending for defense to Federal aid to education is part of a Communist plot.

The attacks made by its leader, Robert Welch, on the loyalty of America's leaders. These include former President Eisenhower, Chief Justice Warren, former Secretary of State Dulles, and CIA Director Allen Dulles, all of whom Welch says are Communist agents or sympathizers.

The secrecy which surrounds the society and the amount of money which it apparently has to spend.

CONSERVATIVE COMPLAINTS

Two weeks ago, the Los Angeles Times, a conservative newspaper, said editorially: "If the John Birchers follow the program of their leader, they will bring our institutions into question exactly as the Communists try to do. They will sow distrust, and aggravate disputes, and they will weaken the very strong case for conservatism."

The same day, the Rev. Dr. Eugene Carson Blake, chief executive officer of the United Presbyterian Church in the United States, told a church group in Santa Barbara that the society was waging a "campaign of falsehoods" against that church.

On March 8, on the Senate floor, Senator MILTON J. YOUNG, Republican, of North Dakota, said, "It is unbelievable that any sane person would make such accusations" (as the society's leader has made against former President Eisenhower).

Other Senators have also expressed concern about the power of the society. Senator YOUNG, a conservative Republican, says he has been attacked as being a helper of the Communists. The same attack has been mounted against Senator MIKE MANSFIELD, a liberal Democrat from Montana, and Senator THOMAS C. KUCHEL, a liberal Republican from California. The attack against KUCHEL and YOUNG has been particularly vigorous, apparently because they are up for reelection in 1962.

But not a great deal is known here about the society. It has not been particularly active in the Washington area although it apparently has at least one chapter here. Senator MANSFIELD said that he had been unable to find out much about it although he tried to get information from "various committees (on Capitol Hill) or the agencies downtown."

On March 20, the United Press International reported that the Senate Internal Security Subcommittee is telling inquirers that the society "seems to be, from our records, a patriotic organization." The Los Angeles Times, however, implied that the group was subversive—from the right instead of from the left.

Last Tuesday Representative L. MENDEL RIVERS, Democrat, of South Carolina, came to the society's defense. "It is a nationwide organization of patriotic Americans," he said in a statement in the CONGRESSIONAL RECORD. "The source of the charges which smear the organization," he said, "is a publication of the Communist Party."

This is a report on the society and what it believes and does.

THE FOUNDING DOZEN

What is the society? How is it organized?

The John Birch Society is the creation of Robert Welch, 61, a former candy company executive who lives in Belmont, Mass. It was organized in Indianapolis in December, 1958, at a meeting of 12 men who have never been publicly identified.

That meeting was a 2-day affair devoted largely to speeches by Welch. Most of what he said was later published in the blue book of the society, copyrighted by Welch.

That book says the society is to have small local chapters, usually of 10 to 20 "dedicated patriots." Each chapter should have a leader appointed by Welch or one of his officers. Senator YOUNG called these groups "cells" but received a heated protest from the society. Cells is the term applied to similar units of the Communist Party organization.

The society is "a monolithic body" operating under "complete authoritarian control at all levels." A republican form of government or organization has advantages, the book says, under favorable circumstances. "But under less happy circumstances," it goes on, "it lends itself too readily to infiltration, distortion, and disruption. And democracy, of course, in government or organization, as the Greeks and Romans both found out, and as I believe every man in this room recognizes—democracy is merely a deceptive phrase, a weapon of demagoguery and a perennial fraud."

Newspapers which have written about the society have quoted these statements to show that it is ruled by Welch and is opposed to democracy.

In a letter printed in the CONGRESSIONAL RECORD last week, Robert D. Love, a Wichita businessman and society member, said, "These statements have been pulled completely out of context and made to smear something which could help to inform people of the true dangers of communism."

"BELIEVE IN ME"

Welch also told the Indianapolis meeting that those who join the society "are going to be doing so primarily because they believe in me and what I am doing and are willing to accept my leadership. And we are going to use that loyalty, like any other resource, to the fullest possible advantage that we can * * * Those members who cease to feel the necessary degree of loyalty can either resign or will be put out."

Welch said then that he hoped to have 30,000 members by the end of 1959. Interviewed last summer by Stanley Eames of the Boston Herald, Welch said there were chapters in 20 States, including 25 chapters near Boston.

Gene Blake of the Los Angeles Times reported early this month that Paul H. (Tex) Talbert, a Beverly Hills insurance executive and a member of the society's national council, said there were several thousand members in scores of chapters in California. Blake says there are chapters in 34 States and members in all 50 States.

As of last summer, the society had 52 employees, Eames reported. He added that Welch told him there was an effort to get several chapters in each city. In one Texas city, Welch said, there are three chapters—one for financial people, one for carpenters and one for Negroes.

Membership costs at least $24 a year for men and $12 for women. Fund-raising outside of dues has apparently been successful since the society appears to spend large sums on staff and publications. Some of the members are wealthy conservatives who apparently believe in the society's goals if not in all of Welch's personal ideas.

A list of members of the Society's national council was put into the CONGRESSIONAL RECORD by Representative RIVERS. It contains 25 names, many of those of leading businessmen. Among them:

Cola G. Parker and William J. Grede, Wisconsin industrialists, and Ernest G. Swigert, Oregon manufacturer, all past presidents of the National Association of Manuafcturers; T. Coleman Andrews, former Commissioner of Internal Revenue; Spruille Braden, former diplomat; Clarence Manion, former dean of the Notre Dame Law School; M. T. Phelps, former Chief Justice of the Arizona Supreme Court; F. Gano Chance, former president of the Missouri Chamber of Commerce; Louis Ruthenburg, former president of Servel, Inc., and Fred C. Koch, president of the Rock Island Oil & Refining Co.

Welch has given these men the job of showing the stature of the organization, of advising him and of selecting "a successor to myself as head * * * if and when an accident, 'suicide' or anything sufficiently fatal is arranged for me by the Communists—or I simply die in bed."

COMMUNIST LINE

What does the John Birch Society stand for? It's objective, Welch told the Indianapolis meeting, is simply "less government and more responsibility."

This, however, is tied closely with a drive against international communism. The Communists are rapidly taking over the United States, the society thinks, and must be stopped. The Communist method of taking over, it says, is to increase government.

Thus, the things which international communism wants the United States to do are these:

Increase defense and foreign aid spending, making higher taxes, an unbalanced budget and inflation possible.

Increase governmental controls over prices, wages and material so that power will be centralized in Washington.

Worry about the horror of modern warfare so that the beauties of peace become attractive and lead the Nation to appeasement of the Communists.

Those who favor these ideas are either Communists or dupes of the Communists, the society says. Into these categories it puts most recent Secretaries of State and Defense. This is where Welch's personal views come into play, particularly since he is the absolute master of the society.

At the Indianapolis meeting, he attacked both President Kennedy and former Vice President Nixon. Never naming Mr. Kennedy, Welch made it clear that he thinks the President is an "amoral man" who can do "a tremendous amount of ball carrying on the behalf of the Communist aims here in the United States."

Nixon, Welch said, would be a patriotic anti-Communist only if it fit his political career. Nixon pulled off "the dirtiest deal in American political history," Welch said, by upsetting the Taft bandwagon in the 1952 Republican convention. If Taft had been President, Welch said, the Communists would have been routed from Government and the Nation would not be in "this mess" today.

In a book called "The Politician," circulated to only a few selected leaders of the society, Welch really lets down his views. When Jack Mabley of the Chicago Daily News came across a copy last summer, he asked a chapter leader if it was given to all society members.

Mabley says the response was that giving the book to members before they became qualified would be like telling a first-year medical student to go out and cure cancer.

In the book, Welch accuses former President Eisenhower, most of his chief aides and many other Government leaders of being a part of the international Communist conspiracy.

"While I too think that Milton Eisenhower is a Communist and has been for 30 years, this opinion is based largely on general circumstances of his conduct," it says. "But my firm belief that Dwight Eisenhower is a dedicated, conscious agent of the Communist conspiracy is based on an accumulation of detailed evidence so extensive and so palpable that it seems to me to put this conviction beyond any reasonable doubt."

When asked about this book by reporter Eames, Welch said, "Four-fifths of our members never have seen it and most of those who have don't agree with it."

When he asked Welch flatly if former President Eisenhower was a Communist, Eames reports that Welch said, "I never felt that way enough to say it in print. Now I don't know what I think. Eisenhower may be too dumb to be a Communist."

Eames notes that a January 1, 1960, footnote to "The Politician" says, "A huge majority of Eisenhower's appointments during the past year make no sense whatever except as a part of a plan to help the Communists."

Welch also runs a yearly chart in "American Opinion," a magazine he edits, on how much of the world is Communist controlled. He listed the United States as 20 to 40 percent Communist controlled in 1958 and 30 to 50 percent by mid-1959.

On other topics, Welch has said:

American churches: "One-third of the ministers are not true believers in the divine names or the divine history and divine teachings to which they give lipservice * * *." Some, he says, preach communism from their pulpits.

The Marshall plan: "A brilliant scheme of the Communists to get the United States to do exactly what the Communists wanted us to do."

Desegregation: "The trouble in our Southern States has been fomented almost entirely by the Communists for this purpose (civil war) * * * The whole slogan of 'civil,' as used to make trouble in the South today, is an exact parallel to the slogan of 'agrarian reform' which they used in China."

The United Nations: Part of a plan to "induce the gradual surrender of American sovereignty."

His own movement: "We are not beginning any revolution, nor even a counterrevolution, in any technical sense, because we are opposing a conspiracy, yet we are not ourselves making use of conspiratorial methods. Yet our determination to overthrow an entrenched tyranny is the very stuff out of which revolutions are made."

How does the John Birch Society work? Its problem in Indianapolis was to select a leader. Welch rejected Nixon and Senator Barry Goldwater, Republican, of Arizona.

He said he thought GOLDWATER was totally loyal and would make a fine President. But, he added, "Does anybody in this room think there is any slightest chance of BARRY GOLDWATER supplying the dynamic overall leadership needed to save this country for anybody to be President of? If so, I think he is still not fully aware of the nature and totality of the forces at work. For GOLDWATER * * * will inevitably think and move in terms of political warfare."

Then Welch suggested himself:

"It is not because I want so frightening a responsibility and it is certainly not because I think that you gentlemen recognize any such quality of leadership in me as would make me a happy choice for the role.

"It's just that I don't know where you, or all of us, are going to find anybody else to undertake the job."

With that out of the way, Welch outlined the action program for the society.

First, he said, it must set up reading rooms in as many cities and towns as possible. It now has such rooms in, at least, California and Florida.

Second, it must get the truth about recent history and current events into as many hands and heads as possible. It should put the "National Review" into college libraries, the "Dan Smoot Review" into doctors' and dentists' offices and "Human Events" and "American Opinion" into barbershops.

Third, it should help increase the audience of such radio programs as those of Fulton Lewis, Jr., and Clarence Manion.

Fourth, it should organize letterwriting campaigns. Some Senators think they are now receiving some of this mail.

Fifth, it should organize fronts—little fronts, big fronts, temporary fronts, permanent fronts, all kinds of fronts. He suggested a petition to impeach Earl Warren (this is now being circulated), a petition headed, "Please, Mr. President, Don't Go" (this was circulated just before last spring's abortive summit meeting), and a committee to investigate Communist influences at Vassar College.

Sixth, other suggestions included exposing why the Communists just had to get rid of McCarthy, and went to such extreme lengths to do so; heckling speakers who urge programs the society disagrees with (this happened in Cincinnati recently); lining up speakers all over the country, and getting into political action.

Eric Sevareid recently wrote what all this means in a small Midwestern city he visited:

"On a street in Kansas, my host stopped his car to point to a new office building. 'He owns that, and a lot else besides,' my host explained. 'He's got money and influence. He couldn't tell a Communist from Robert A. Taft, but he's trying to get his crackpots onto the school board and a lot of us are worried.'

"He is the local boss of the John Birch Society. 'They organize in task forces,' my host went on. 'They call school teachers and local college professors in the middle of the night and denounce them as Communists. They recruit kids as spies to take down classroom remarks of their teachers.

" 'They plant people in public lectures to ask loaded questions. They try to get their idiotic films and maps used in high schools. Maybe it's hard these days to get a man smeared in Washington or even in Hollywood, but in a small city like this * * * it can still be done.' "

Who was John Birch? A native of Georgia, Birch was a missionary to China who joined Gen. Clare Chennault's forces there in 1942. He was killed 10 days after V-J Day by, Welch says, the Chinese Communists.

His death, Welch says, was "the first casualty in the third world war, between the Communists and the evershrinking free world."

RIGHTISTS THREATEN "SILENCE OF FEAR"

(By Marquis Childs)

How dangerous to the well-being of this Nation and to America's position as leader of the free world are the radicals of the right?

This is a question being asked here seriously today as these radicals increasingly resort to the tactics of the Communists and the crypto-Communists of the 1930's. They practice character assassination without regard for the truth. They spread fear, hatred and suspicion. They advocate infiltration of nonpolitical organizations such as the Parent-Teacher Association and the taking over of those organizations.

In some respects these radicals on the extreme right more nearly resemble the fanatical subverters of Germany and Italy who brought nazism and fascism into being. They are often allied with the White Citizens Councils, identifying integration with communism. And at the extreme end of the spectrum they are openly anti-Semitic, often referring in propaganda leaflets to the "Jewish-Communist conspiracy."

A few years ago this would have been dismissed as merely another manifestation of what Theodore Roosevelt so aptly called the lunatic fringe—this time on the right rather than the left. But with the rise of the John Birch Society and its intrusion into politics that is not so easy to do. Founded by Robert Welch, a former Massachusetts candy manufacturer, the Birch Society now claims nearly a hundred thousand members with chapters in most States.

Welch's secretly circulated book, "The Politician"—now reportedly withdrawn because it alarmed some members—has been compared to "Mein Kampf" if only in the Hitlerian view that the greater the lie the more likely that simple minds will fall victim to it. He calls every President beginning with Franklin Roosevelt a Communist. Of the Eisenhower brothers he writes:

"While I, too, think that Milton Eisenhower is a Communist and has been for 30 years, this opinion is based largely on general circumstances of his conduct.

"But my firm belief that Dwight Eisenhower is a dedicated, conscious agent of the Communist conspiracy is based on an accumulation of detailed evidence so extensive and so palpable that it seems to put this conviction beyond any reasonable doubt."

Both the late John Foster Dulles and his brother Allen, head of the Central Intelligence Agency, are called Communists, with the latter ranking next to former President Eisenhower in the power of concealment. A signed editorial following a

series of articles revealing the activities of the John Birch Society in one of the most conservative newspapers in the country concluded:

"Subversion, whether of the left or the right, is still subversion."

One of the recent political targets of the organization was Senator MILTON YOUNG, Republican of North Dakota. Members of the four Birch societies in Bismarck, the state capital, were pushing in the legislature a proposal for a constitutional convention to act on an amendment abolishing the Federal income tax, liquidating 700 Government agencies and greatly restricting the Government's treaty-making power.

The House had already approved the proposal when Senator YOUNG sent a telegram urging the Senate to defeat it and pointing out that it would mean killing the Garrison dam irrigation diversion project in North Dakota. Thereupon the Birchists came down on YOUNG with their letterwriting and telephone technique seeking to put the Communist label on one whose record has on the whole been conservative.

Senator THOMAS KUCHEL, of California, a moderate Republican, has also been under fire. One of the main goals of the Birch letterwriting blitz is to bring about the impeachment of Chief Justice Earl Warren who was KUCHEL'S sponsor in politics. Asked about this at a press conference, he called it a contemptible and vicious thing to suggest the impeachment of one of the great men of our time.

Birch Society members have used their pressure techniques to force the showing of the House Un-American Activities film, "Operation Abolition." And they have denounced as Communists anyone questioning its accuracy or daring to suggest that the committee may have exceeded its rights.

For popular officeholders such as KUCHEL and YOUNG this is perhaps no more than a nuisance, even though they are both up for reelection next year. But for citizens—professors, clergymen, and others—with a conviction of their right to speak critical and unpopular views, it can mean community distrust, a small business harmed or even a job lost. The silence of fear is the alternate penalty the radicals of the right try to impose.

[From the Washington (D.C.) Evening Star, Mar. 22, 1961]

TIME FOR BELIEF IN AMERICANISM

(By Ralph McGill)

A lady in Memphis, Tenn., has been granted a divorce from her husband after she testified that, among other things, he spent $900 on cablegrams denouncing Nikita Khrushchev and Fidel Castro, but used only candles and a kerosene lamp and heater to light and heat their home for her and three children.

There perhaps is a moral in this.

There are a great many persons and a number of organizations in this country who keep up such a clamor and outcry against what they, in anger, fear or prejudice, call communism, that they dim the light and fervor of Americanism.

No less an expert than J. Edgar Hoover of the Federal Bureau of Investigation has warned against those who make reckless, unsustained charges without justification. They make his job more difficult.

HATE GROUPS

There are hate groups which label as a Communist any person who speaks out against racial injustice. A person who declares he or she accepts the Supreme Court school decision as law is certain to be harassed with attacks from some hate or fringe group which charges communism. Ministers angrily are condemned for the same position.

Is this good for Americanism?

The men on the U.S. Supreme Court, whose loyalty to their country, its Constitution and its Bill of Rights is one of the heartening things in our lives, have for years been subjected to abuse as dupes of communism.

There are still other organizations which send out literature which charges that the Jews of the world are behind a Communist conspiracy. An out-and-out Nazi organization has just been incorporated in Virginia which believes in Hitler and calls Jews Communists.

Are these things good for Americanism?

The late Senator Robert A. Taft was publicly accused, by a real estate official, of being communistic for supporting public housing legislation. Is it good Americanism to defend slums?

There are Americans who believe the Negroes in America, particularly those in the South, are happy and content with discrimination. Attempts by Negroes to bring an end to injustice are therefore condemned as Communist-inspired. That the Communists have been trying for 40 years to make inroads in Negro communities is true. That the Communists always attach, or seek to attach, themselves to every movement which might benefit them is a part of a long record. But the facts are available. Communism has made less penetration among Negroes, on a percentage basis, than among white persons. J. Edgar Hoover, in his book, "Masters of Deceit," pays tribute to the NAACP for having carried on a continuing fight to prevent Communist infiltration.

There are doctors who are sure that Communists are behind the proposed legislation to aid old people.

Even fluoridation is denounced by some as a Communist plan to poison America's water supply.

The story runs on and on. A sincerely distressed father has written in to say that his teen-aged daughter, when refused permission to go to a dance, lost her temper and shouted, "You must be a Communist."

UNAWARE OF REDS' NATURE

Most of those who make preposterous and unsustained charges do not know what communism is or how it operates. The danger of it is ever present and must be exposed. But those who, with unsupported scattergun charges, are making the Americans fear one another, are doing communism a service. A helpful book for those who want to inform themselves is "What We Must Know About Communism" by Harry and Bonaro Overstreet.

Now is a time for belief in our country and its institutions, a time to do all we can to make it strong and great. That is the surest defense against communism. We will be sick nationally if we permit Nazis, Communists, or hate groups to divide us.

[From the Washington Post, Mar. 25, 1961]

THE CONSERVATIVE GROUND SWELL

(By George E. Sokolsky)

Numerous organizations appear all over the country which have a conservative tinge. Not all of them are philosophically or politically oriented, but what is interesting is that there are so many of them; that they range from college groups to adults, and that while they do not yet show up in labor unions or women's clubs, they form their own associations which take on appreciable sizes.

Some day someone will appear who will mobilize this conservative force politically and produce a third party of great strength and large numbers. In fact, such an element is developing in the Republican Party under the leadership of Senator BARRY GOLDWATER, who will undoubtedly be a Republican candidate for the Presidency at the 1964 convention. Senator GOLDWATER represents the increasing conservative strength among intellectuals. Richard Nixon would surely have been elected had he recognized the conservative ground swell.

This trend is serious and sincere. It does not matter that some of its expressions are absurd. Again, the day is not far distant when a philosophic leader will appear among them, a 20th century Alexander Hamilton, who can state the conservative cause in terms that are understandable and pertinent and relate themselves to the course of events. This kind of thinking is developing in the National Review and in Human Events.

The focus is still on criticism rather than upon a constructive program. Criticism is not sufficient to generate enthusiasm for a cause; there must be positive thinking, and that will come, too. It will come principally out of younger people who are rejecting the frozen terminology of the New Deal and of Keynesian economics and are asking the pertinent questions relating to the greatness of the United States in 1917 and 1941 and its meekness today when the most it can beg for is neutralism. These younger people ask whether Soviet Russia is really so strong and the United States so weak.

President Kennedy seems to be missing the strength and potency of this groundswell. His second and third echelon appointments give the impression of an alliance with the ADA.

One cannot expect a Democrat to be as conservative as, say, Herbert Hoover, but it is not to be expected that, in 1961, the concepts of 1933 will be popular with the Nation. This never happens. Each generation uses its own idiom and speaks its own language and most often resents the immediate past against which it rebels. The present younger generation in this country is very critical of the failures of recent administrations. The questions they ask will have to be answered before the 1964 election.

The voters were not cognizant of the political life of the Franklin D. Roosevelt regime. Tehran, Yalta, and Potsdam, the monuments of America's diplomatic failures, are only names in books, and indistinct ones at that. They compare John Hay's "open-door policy," of which they read, with General Eisenhower's retreat before the Red Chinese in Korea and wonder what has happened to their country.

Politicians are not always mindful of the next generation; they become set in their ways. It is particularly difficult for those who believe that the New Deal was a revolutionary movement in American life to discover that their grandchildren regard them not only as old fogies but as reactionaries.

The lively, excited grandchildren think that way; others adopt a lackadaisical attitude, an attitude of the very tired, beaten, useless human being who cares nothing about what is happening or why, who does not know more about Khrushchev than Kasavubu; who whistles wearisome tunes and reads broken rhymes and works as little as his small life will tolerate. These are the beatniks, the generation that has gone to hell as a reaction to the progressivism of their elders.

[From the Belfield (N. Dak.) News and Badlands Settler, Mar. 23, 1961]

Many new and some not so new organizations purporting to be anti-Communist have come to the forefront of the news lately. I do not know how many of these organizations are actually anti-Communist or pro-Communist, but it is a fact that the international Communist conspiracy have in the past lurked behind many high sounding and patriotic names, and have succeeded in getting loyal Americans to join and participate

in these organizations which are actually controlled and operated by those who wish to destroy us as a free Nation.

Before you join any organization, the name of which you are not familiar, better take a close look, in fact best not join any of these Johnny-come-lately organizations.

Chances are, if you are a Christian you belong to a church. Most of the Christian churches are strongly anti-Communist, and your membership in the church is a thorn in the side of the atheistic Communist. Secondly, if you are a veteran, you may belong to one of the strongest and most forceful anti-Communist organizations in the world—the American Legion, VFW, or any number of other American Vets organizations.

There are countless other organizations for farmers, businessmen, and service organizations of longstanding reputation who are dedicated to preserving our freedom.

If you already belong to one or more reputable societies or organizations and want to actively join the fight against the enemy—then step up your interest and enthusiasm and attendance in these existing institutions.

We have a list at the News office of Communist or Communist-front organizations—the list is shockingly long and our readers are welcome to come in and look over the list. Some of the more recent organizations are not listed, however, so when in doubt just don't join.

Mr. McGEE. Mr. President, this is a subject about which I have received considerable correspondence from all over the United States. These are sincere inquiries from responsible American citizens about the John Birch Society, and because this society has operated for some time under a measure of secrecy, and because there has been a history in the past of the consequences of similar secret societies operating for political purposes in our ranks, I believe it important that the John Birch Society receive even more publicity than it has to date.

The Senator from North Dakota [Mr. YOUNG] has already had something to say on this subject, and has requested unanimous consent to have printed in the RECORD the Outlook section of the Washington Post on Sunday, March 26.

The Senator from North Dakota [Mr. YOUNG] has also invited the attention of Senators to a column in this morning's Washington Post by Marquis Childs entitled "Rightists Threaten 'Silence of Fear.'"

I was in the city of Phoenix, Ariz., a week ago and found there a city torn badly within because of agitations and whisperings stirred up in the name of the John Birch Society. Some of the agitation had to do with the location of a tennis court. Some of it had to do with books that were being adopted in the second and third grades in the public school system. But the burden of the charges was that there were Communists behind all these local community decisions. The weight that community was carrying was in the aura of fear that had been generated around it. I say that it is time for the searchlight of truth and the daylight of publicity to be brought to bear on the John Birch Society.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Missouri.

Mr. SYMINGTON. I commend the able Senator from Wyoming for his statement. I read the column by Marquis Childs.

Whatever it is these people have on their mind, especially with respect to this book, the more the American people know about it now, the better for the country.

Mr. McGEE. I thank my colleague from Missouri. I think it is imperative that we not be afraid to know what is going on. I have confidence in the judgment of people if only we protect their right to know, and that they not be permitted to operate under the cloak of secrecy in this area.

REPORT BY SELECT COMMITTEE ON NATIONAL WATER RESOURCES

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD a very penetrating editorial from the Commercial Appeal of Memphis, Tenn., relating to the water study made by the committee headed by Oklahoma's distinguished senior Senator [Mr. KERR].

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WATER REPORT NOTABLE

Three remarkable events occurred in Congress last week.

A special Senate committee turned in the report on the study it had been assigned without asking an extension of time. The committee reported it had spent only about $90,000 of the $325,000 the Senate had provided for the study. And the committee immediately was dissolved.

The committee was the Select Committee on National Water Resources, established in April 1959, with orders to report its findings by January 1961. Chairman of the committee was Senator ROBERT S. KERR, of Oklahoma.

The importance of the committee's work can be judged by the fact that the citizens of California last November approved a bond issue for $1.75 billion to assure the cities of the southern part of that State sufficient water resources in the years ahead. This is but one indication of how desperate the water problem already is becoming in some parts of the Nation. Water, long considered our most expendable resource, is fast becoming the most serious deterrent to expansion of our economy.

It is, of course, a major project in the National Association of Soil Conservation Districts meeting in Memphis this week.

The select committee's report on the problem and its challenges to the Nation already is being hailed by members of both parties in Congress as the most significant contribution ever made in this field. Senator ALBERT GORE, of Tennessee, has proposed making it available to other nations as a guide to water resources planning wherever water problems exist.

How was it possible for this committee to accomplish so much in such a brief time and at so little cost? Senator KERR, in presenting his 2,000-page report, explained it was simple. Instead of hiring large staffs, the committee enlisted the assistance of specialists already on the Federal Government payroll. Such assistance was obtained from every agency which has any concern whatsoever with water. When outside experts were needed, they were retained on a when-actually-employed basis.

The Library of Congress was called upon for staff leadership and it readily provided not only that but also special research work to assist the committee. Resources For the Future, Inc., a privately endowed research foundation, provided staff help and carried part of the cost of issuing the report. State agencies contributed valuable information and in some cases there even was help from private industry.

In short, the committee planned its work to be done in the most efficient manner at the lowest possible cost to the taxpayers.

There are many in Washington who talk at length about cutting the cost of Government and balancing the budget. Senator KERR's select committee has provided an excellent example of how this goal can be achieved. Other Members of Congress would do well to study the select committee's methods and follow its example.

THE DEFENSE BUDGET

Mr. MANSFIELD. Mr. President, if there is one characteristic which stands out above all others in the special message on the defense budget, it is the President's sure grasp of the position of the Defense Establishment within our society, its role in our relations with the rest of the world and in the maintenance of peace.

This problem is many sided and enormously complex. Intimately involved with it are our freedom, our well-being and, in the last analysis, our very existence. In the President's basic approach to this problem there is both vision and realism. There is the vision to see that the accumulation of military strength is not an end in itself and must at all times be subordinated to civilian purposes. There is the realism to see that a powerful military defense is a national essential in the world and because it is that, there must be no stinting on essential expenditures. Equally, because it is fantastically costly, every effort must be made to prune it of the nonessential.

This special budget, Mr. President, will call for an additional $650 million in expenditures during the next fiscal year. That is a great deal of money but I believe the President makes a most persuasive case for its authorization as interim insurance in the light of the uncertain international situation today.

I remind the Senate that the President and the Secretary of Defense have had but a very short time to delve into this problem. This message clearly indicates, however, that the President and Secretary know where they are going and in the months and years ahead will act to bring about savings through courageous and effective management of the Defense Establishment. Indeed, they have already begun this process in connection with a number of specific military undertakings. They have cut out some research and development projects and have begun to shut down surplus establishments. Given an improvement in the international situation, which the President is striving to bring about through his foreign policy, there is reason to hope that a significant portion of the enormous expenditure of resources which now goes for military purposes will become available for the immense peaceful needs of our Nation.

EXTENSION OF THE SUGAR ACT

Mr. CHURCH. Mr. President, the House has already passed and the Senate will shortly consider legislation extending the Sugar Act of 1948 for 21 months.

This short-term extension buys for us the time necessary to write satisfactory long-term sugar legislation.

Senator FRANK E. MOSS recently made an excellent speech before the Cache County Sugar Beet Growers Association at Smithfield, Utah, which outlines how extensively sugar has become embroiled in international relations, and suggests some of the problems which must be considered in drafting the new long-term bill. I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS OF SENATOR FRANK E. MOSS AT CACHE COUNTY BEET GROWERS ASSOCIATION, SMITHFIELD STAKE HOUSE, SMITHFIELD, UTAH, MARCH 10, 1961

Mr. Chairman, ladies, and gentlemen, it is always an unusual and rich experience for me to come again to Cache Valley. If this valley were to be renamed, I would call it Peaceful Valley—for there are few places where I have the feeling of peace and repose that I find here. This is a place apart. The mountains which surround you seem to protect you from the turmoil and conflicts and ceaseless strife of the world outside. Here I find refreshing nourishment for my soul.

Yet even in this place of peace you are not shut out from the world. In the world of today, no place is truly remote. You are embroiled in the worldwide conflict of good versus evil, of democratic freedom versus communistic slavery, as surely as are those unfortunate people in the Congo. No place on earth is remote from this struggle.

The peaceful monks in the lamaseries on the high plateaus of far-off Tibet thought they were safe—remote from the conflicts of the day—until the Communist hordes of Mao invaded with fire and sword and machine gun and mortar, driving the monks from their prayers and sending thousands upon thousands of their people fleeing and seeking asylum in India.

No place is remote. No man is an island. Every man, woman, and child is embroiled in this conflict.

You who produce sugarbeets are in the thick of it. The crop that brings you together tonight with a common interest, here in this peaceful valley, yields a product that today is inextricably involved in international diplomacy and the struggle of nations—a product with complicated ramifications extending from the Caribbean and the rest of Latin America to the far-off islands of the Pacific and the collective farms of the Russian Ukraine. The Communists have made sugar a potential weapon in the cold war.

We all know what has happened in Cuba, upon which we in the United States formerly relied for about one-third of our sugar supplies. Fidel Castro came to power, and ruthlessly sold out his people to the Communists, added another 10 percent of all the world's sugar production to the already vast Communist control of this vital commodity. One-third—one-third, mind you—of all the sugar production in the entire world is now under Communist control.

The able director of the U.S. Department of Agriculture's Sugar Division, Mr. Lawrence Myers, pointed out in an address in New York earlier this year that "the Communist takeover in Cuba, added to communism's earlier subjugation of the beet exporting countries of Eastern Europe, poses a number of threatening problems to sugar producers, consumers and markets throughout the world."

"Huge quantities of sugar have been sold by Cuba to the Soviet Union and Red China at fictional prices under barter agreements," Mr. Myers said, adding that "only the Bear and the Red Dragon know" whether or how or where this sugar will be used as another weapon in the arsenal of international communism.

For more than a quarter century, consumers in the United States have had no cause to worry about either sugar supplies or sugar prices. The Sugar Act, first enacted in 1934 as the Jones-Costigan Act, has protected American consumers—assured them of adequate supplies at fair prices. At the same time, the Sugar Act has helped to stabilize your industry, and by resolutely applying good management practices, you have obtained reasonably fair returns for your sugarbeets. The prices for your sugarbeets have not risen as much as prices of some other crops—for several years, other crops were much more profitable. But neither have prices for sugarbeets followed the downward slide of farm prices. Sugarbeets have been stable. Year in and year out, you have found them a firm brickwork on which to plan and build the operation of your farms.

The Sugar Act, under which both consumers and producers have fared equitably, is due to expire at the end of this month. In the past, sugar acts have usually been renewed for terms of 4 or 5 full calendar years, and they have been extended, with appropriate amendments from time to time, usually during the year before the expiration date. But the act which would have expired on December 31, 1960, was extended at the last session of Congress for a period of only 3 months, to the end of March 1961. Why? Because sugar, then as now, was embroiled in international politics, and the Senate and the House of Representatives could not agree on the terms of an extension at least to the end of 1961. So the act was extended for only 3 months.

The Sugar Act involves raising revenue—this small processing tax which supports the entire sugar program and in addition provides a net profit to the Treasury of the United States. Because of this small tax, which you help pay, sugar legislation must originate in the House of Representatives rather than in the Senate. This is a constitutional requirement.

A good many sugar bills have been introduced in the House in the current session of Congress. The Kennedy administration has asked the House to extend the present law for a period of 21 months, with one amendment. The amendment would give the President of the United States authority to bar sugar from the Dominican Republic as replacement for sugar which, if it were not for Castro, we would be getting from Cuba.

The reasons for this one amendment are sound. The Dominican Republic, under Dictator Trujillo, is a menace to the peace of Latin America. Last year, a committee of the Council of the Organization of American States—A United Nations regional body—found after investigation that the Dominican Republic was implicated in the attempted assassination of President Betancourt of Venezuela. The Government of Venezuela has formally protested that to permit the Dominican dictator, Trujillo, to benefit from Cuban sugar windfall for the balance of this year would be in conflict with the letter and spirit of the resolution of the American States adopted at San Jose.

This is an illustration of the extent to which sugar is now involved in international affairs.

Your industry officially has decided not to take a position on the Dominican issue. Along with representatives of the other domestic sugar producing groups and the domestic cane refiners, representatives of the beet sugar industry have said that they do not feel qualified to pass judgment on international relations. I believe this is a logical position for the domestic sugar industry to take. The Dominican issue is an issue of great delicacy in our foreign relations—and sugar is merely a commodity which, along with other products, happens to be involved.

But as a United States Senator, I must take a stand on this issue as on many others involving our relations with other nations. I firmly support the administration's position and will vote to give the President of the United States the authority he has requested to decide on the amount of sugar that Dictator Trujillo may send to the United States.

The bill embodying this authority is now in the House of Representatives. When I left Washington, the administration's sugar bill was in the Agriculture Committee of the House. When I return to Washington next week, I hope it will have reached the Senate, and there I shall give it my full support.

I know that your primary interest concerning this short-term legislation is to get the bill—a bill—passed in the next few days which will extend the law beyond March 31, at least to the end of 1961, and preferably into the first part of 1962. This short-term extension buys time, provides the hours which simply have not been available before the March 31 deadline, to write satisfactory long-range sugar legislation. As soon as the short-term measure is enacted, I shall urge that work begin on provisions of a long-range sugar law.

Working out the provisions of a long-range sugar law will be difficult.

Many questions must be answered, and they must be answered wisely. I shall enumerate only a few.

1. If Castro falls in Cuba—I should say when Castro falls in Cuba—and a government friendly to the United States succeeds him, shouldn't we be in a position to aid that government by again permitting the importation of Cuban sugar? If the answer to that is "Yes," and I believe it is, how much of Cuba's former share of the U.S. market should we keep uncommitted to others, so we may give substantial assistance to a friendly Cuban government? This is a difficult question to answer because it involves both the foreign nations who are now filling substantial amounts of the gap in our sugar supplies and our domestic producers, including you sugarbeet growers of Cache County, Utah. And it raises other questions.

2. Should we ever again depend for such a large percentage of our sugar supplies on a foreign country, no matter how friendly the current government may appear? We should remember that until 1959, Cuba was a country friendly to the United States. Even for several weeks after Batista was overthrown, we thought—we expected, we hoped—that Cuba would continue to be friendly to the United States. Our ties of friendship with the Cuban people were close. The period of disillusionment has been painful for us, as I am sure it has been for the people of Cuba. Yet in this unsettled world, a world of unrest, a world in which far-reaching social and economic adjustments are taking place, governments rise and fall with astonishing speed. How can we be sure that all governments friendly to us today will adjust their internal affairs with enough speed to meet desirable social and economic change? Or will their people be misled by the false promises of communism, and by revolution suddenly supplant friendly

governments with governments antagonistic toward us?

The forces of communism work in devious and diabolical ways. We should never forget the harsh lesson of Cuba. I, for one, believe that in our own national interest we should never again rely on a single foreign nation for such a large percentage of our sugar supplies as we did in the case of Cuba.

3. Which countries then should be given sizable sugar quotas in future long-range sugar legislation? Here we enter deeply into the field of foreign relations, economic interests both foreign and domestic, production ability, and the welfare of American consumers. I am sure that when foreign quotas are being developed for long-range legislation, some of the nations that helped fill the Cuban gap in our market will ask for consideration on the basis that they sold us sugar when we needed it. Some of those requests may be entirely valid. Some foreign sugar producers went to great trouble to rush sugar to us so our supplies would hold out. On the other hand, I think it should be recognized that such efforts, tremendous though they may have been, were not activated solely by altruism. The American sugar market is an attractive market. One reason the Sugar Act worked so effectively is because the American sugar market has been maintained as an attractive market—not subject to the uncertain and wide price fluctuations of the so-called world market. Yet the price to American sugar consumers has been and is no higher than the average price to consumers in other nations around the world.

4. Perhaps one of the most pertinent questions that must be answered in drafting long-range sugar legislation, most pertinent for you tonight because it involves you directly, is how large a share of the future American sugar market should be allocated to domestic producers, and particularly to American sugarbeet producers. The present situation presents an opportunity, a challenge, and a responsibility for your industry. On this point I should like to dwell for just a few moments.

In Washington we are very much aware that certain groups are attempting to seize this situation and use it for a great and rapid expansion of the beet sugar industry. There are many emotional and some economic arguments in their favor. With the prices of many other farm crops now low, and with acreages of those crops curtailed, sugarbeets are an attractive crop because of the price stability which I mentioned. Thousands of American farmers who do not now produce sugarbeets would like to do so. They point to the outflow of gold involved in imports of foreign sugar—and that is a subject much on the minds of many people today. Greater production here, they say, would help our balance of payments, and also help many people in a distressed agriculture.

Yet your industry has, in the past, found that gradual rather than sudden growth has been preferable. You have found that production is only one of the factors in the sugar business—and that markets, transportation to markets, and competition with other sugar are also tremendously important factors. They all must be weighed in determining how far and how fast it is practical for the beet sugar industry to grow now and in the future.

At the same time, I know you recognize that the industry has certain responsibilities in serving consumers and in serving the Nation. Under past sugar acts, most of those responsibilities have been restrictive. You have been restricted in the number of acres you could plant. You have had to meet certain minimum requirements in the wages and working conditions of the people you employ on your farms—and certain restrictions in the ages of the people you employ. The beet sugar companies have had restrictions in the amount of sugar, produced from your restricted acres, they could sell.

This year your acres are not restricted by the Government. It is entirely possible that the amount of sugar the companies may sell this year will not be restricted by marketing allotments. You have been acclimated to operating under restrictions—you have become mentally adjusted to those restrictions—and now, suddenly, the restrictions have been removed.

I wonder whether your responsibilities have been given a different complexion by the disturbances which have occurred in the sugar world and by the disturbances and dangers which exist in the worldwide political picture. I merely suggest that this may be something you will wish to consider as you consider what shape future long-range sugar legislation may take.

I want to make it clear, however, that I am not attempting to dictate to you the details of that legislation. In the past, Members of the Congress have asked representatives of the sugar industry—your competitors in the cane sugar business, including the cane refiners, as well as your own representatives—to reconcile your differences among yourselves, and together with your friends in Congress and in the executive branch of Government, to develop workable legislation that is acceptable to all. This should be done again.

Your industry has able people representing it. Your good friend and mine, Art Benning, is on your industrywide negotiating committee—and so is Dick Blake, who represents the growers' point of view on the committee.

What answers you will come up with, I do not know. I do know that they will represent compromises. In the beet sugar industry, both the growers who have helped to maintain the industry through the years and the farmers who do not now produce but want to produce will have to reconcile differences.

And whatever proposals are presented will have to recognize the kind of world we live in today. They will have to recognize that with one-third of all the world's sugar in Communist hands, the long-range sugar law may require some major changes from the old pattern.

In these trying times, more than our own immediate well-being may be in the balance. Sugar legislation involves more than sugar today—as we have seen in the case of the Dominican Republic. In developing a long-range sugar law, our Nation's future is, in larger measure than ever before, deeply involved. It will require prayerful wisdom to develop the right kind of law.

Here, in this peaceful Cache Valley, we may well set the example of the attitude that is needed in these turbulent times. Here in this pleasant valley, let us lift up our eyes unto the hills—with the assurance that guidance and help will come.

ANNUAL REPORT, NATIONAL CULTURAL CENTER, 1960

Mr. SALTONSTALL. Mr. President, recently the Board of Trustees of the National Cultural Center submitted, in accordance with law, a report to the Smithsonian Institution of which it is a part. It is a report on the actions taken to date by the Board to carry out its responsibilities under the landmark legislation entitled, "An act to provide for a National Cultural Center which will be constructed, with funds raised by voluntary contributions, on a site made available to the District of Columbia."

The National Cultural Center Act of 1958 presents a most interesting challenge to the American people. In broad strokes, the act calls for the creation of a national center for the performing arts to serve as a showcase for the finest talents which can be produced and encouraged in America or which can be brought to America from other countries.

While the planning effort looking to the creation of a center has faced difficult and novel problems, it is clear that significant progress has been made. The plans for the center envision a center designed to meet the cultural needs of a growing America. These needs will continue to expand in the decades ahead during which the center will serve our people. The plans look to an era in which miracles of communication will place events occurring in the center before the eyes of hundreds of millions of TV viewers throughout the land, and an even vaster audience beyond the seas.

In addition to its intended role as a national center for the performing arts, the structure of the center itself will be a magnificent addition to the fine buildings in our Nation's Capital.

The trustees of the center desire to continue the task of creating the center. After extensive interviews with experts across the country, the trustees have concluded that such a National Cultural Center is needed as a symbol of a vigorous and effective nationwide effort to elevate the performing arts to a more meaningful level in our national life and to demonstrate to the whole world that free artistic expression is encouraged in our Nation and is a vital part of our way of life.

As one of the 30 trustees of the center, I share their view that the creation of a National Cultural Center will be a tangible symbol of America's official interest in the performing arts and that such a step will have a profound effect on improving the image of America in the eyes of the whole world.

The report of the Board of Trustees is a document which can be of interest to all Americans. I commend it to their reading and I ask unanimous consent that the report of the Board of Trustees of the National Cultural Center be printed at this point in the RECORD.

I also ask unanimous consent that a letter from President Kennedy to the Speaker of the House and the President of the Senate concerning the National Cultural Center and a statement by the Acting Chairman of the center be included at this point in the RECORD.

There being no objection, the report, statement, and letter, were ordered to be printed in the RECORD, as follows:

JANUARY 19, 1961.

Dr. LEONARD CARMICHAEL,
Secretary, Smithsonian Institution,
Washington, D.C.

DEAR DR. CARMICHAEL: It is my pleasure to submit herewith the annual report of the Board of Trustees of the National Cultural Center.

As required by law, the report includes a detailed statement of all public and private moneys received and disbursed by the Board and its officers from the beginning of the Board's existence to January 1961. The report also reviews the chief planning and developmental activities undertaken by order of the Board in the same period.

As the report will show, much solid work has been done to carry out the mission assigned to the Board in the authorizing legislation. The creation of a National Cultural Center presents both difficult and novel problems, but it also presents to the Nation a great opportunity to meet a long unified need. All those directly associated with this project have sensed the unusual character of their mission and the great opportunity this legislation offers. They have freely devoted much time and energy to its realization. We can all take great satisfaction from this demonstration of devotion to our purpose.

I am also proud to report that the Board has received wonderful cooperation from other agencies concerned with our project, including the National Capital Planning Commission, the Commission of Fine Arts, the Commissioners of the District of Columbia, the National Park Service, the U.S. Army Corps of Engineers, the Lands Division of the Department of Justice, and the Bureau of the Budget. They have helped us on our way and have given us support at critical times.

Certainly, the biggest part of our task lies ahead. But we have gone through some of the worst of the period of trial and error which might be expected to characterize the early stages of such a large and unusual project. We have made what we believe to be sound plans for the full range of functions of the National Cultural Center contemplated in the legislation and for the ultimate structure in which to house these functions. We have made plans for securing from the public the funds necessary to carry out all these purposes.

Our objective is to bring the National Cultural Center's functions and facilities into being as soon as possible. For this reason the trustees have approved a plan for creating certain basic facilities as soon as sufficient funds have been raised for such a start. These plans for the first stage are to be tested in 1961. Planning for fundraising to complete the structure in later states will continue without interruption.

On behalf of the Board of Trustees and personnel, I wish to thank you for your warm cooperation and counsel during the period of the last 2 years. We are confident that the National Cultural Center will become a major national asset and one which eventually may be appropriately associated with the other distinguished units of the Smithsonian Institution.

Sincerely yours,

ARTHUR S. FLEMMING,
Chairman.

ANNUAL REPORT BY THE BOARD OF TRUSTEES OF THE NATIONAL CULTURAL CENTER FOR THE YEAR ENDING DECEMBER 31, 1960

I. BACKGROUND

A. The National Cultural Center Act

On September 2, 1958, the President signed into law an act which created in the Smithsonian Institution a Board of Trustees of the National Cultural Center.

Unlike the District Auditorium Commission, which was responsible only for planning the development of a large cultural and civic facility, the new Cultural Center Board of Trustees must develop cultural programs, design an appropriate facility, raise the necessary funds, construct the building, and then conduct the cultural programs and operate the facility.

The National Cultural Center Act states that the trustees shall—

1. Present classical and contemporary music, opera, drama, dance, and poetry from this and other countries;

2. Present lectures and other programs;

3. Develop programs for children and youth and the elderly (and for other age groups as well) in such arts designed specifically for their participation, education, and recreation; and

4. Provide facilities for other civic activities at the Cultural Center.

The Board of Trustees is by law composed of 30 trustees, 6 of whom are certain designated officials of the Federal executive branch, 3 are Senators, 3 are Members of the House of Representatives, 1 is Librarian of Congress, and 2 are from the District of Columbia government. The remaining 15 trustees are appointed from private life by the President and serve 10-year overlapping terms.

The law also provides for the establishment of an Advisory Committee on the Arts which is to (1) advise and make recommendations to the Board on all cultural activities to be carried on in the National Cultural Center, and (2) assist the Board in its fundraising task.

The law requires that the President name the Chairman and members of the Advisory Committee, who serve at his pleasure.

In early 1959, the President completed the necessary appointments, and the first organizational meeting of the Board of Trustees was held at the White House on March 31, 1959. The center's officers and an executive committee were chosen, the Advisory Committee was convened, and planning was commenced to supply the answers to three broad questions:

1. What functions and programs should be carried on in the center?

2. What kind of a building should be developed for the variety of functions specified or contemplated in the law?

3. What would be the cost of such programs and the necessary facilities, and how could this sum be raised by voluntary public subscription?

The report below deals with the progress made by the trustees in answering these questions. They are discussed in the order in which they are raised.

1. Functions and Programs of the National Cultural Center

The structure of the National Cultural Center Act is simple. It creates a Board and directs it to find funds sufficient to build and operate a facility in which it shall then present all types of the performing arts. This much of the charge is specific, but the act goes on and directs in broad terms that the Board also "develop programs" in these arts designed for the "participation, education, and recreation" of all age groups. In equally general terms, the law states that the trustees shall "provide facilities for other civic activities at the Cultural Center."

Since the law does not contain a statement of national cultural, educational, recreational, and civic objectives to be served by the creation and operation of the National Cultural Center, the Board and its staff have spent much time and thought trying to evolve a suitable, yet practical range of activities to be conducted in the center.

Consultation with national cultural leaders

Faced with this sweeping and unprecedented responsibility, the Trustees and their staff consulted widely throughout the country with cultural and other leaders during 1960 as to how the proposed center could best serve the Nation. It would be wrong to state that a consensus was reached, yet several lines of thought emerged quite clearly from our extensive consultations—

First, the creation of a center for the performing arts in the Nation's Capital is long overdue. Such a center would become a major national cultural asset. The absence of such a facility in our capital is a disappointment to the millions who visit or serve in the Capital, it is inexplicable to foreigners who see that their lives are being influenced every day by what happens in Washington, yet both internationally and domestically Washington is rarely a dateline or a backdrop for activities in the performing arts. To many, this seems to confirm the notion that the performing arts have no official standing in the United States—and this despite the fact that the performing arts furnish one of the most immediate vehicles of communication between peoples.

Second, the National Cultural Center must be far more than a building in the Nation's Capital. It must become a real national center for the performing arts—a showcase for the finest talents that America can develop. Its activities must be conveyed into all of the States and across the oceans. It must provide services which help foster the performing arts in many of the Nation's improve the image of America both at home and abroad.

Third, the center can serve as a symbol of the interest of our Nation and our Government in the rich cultural traditions and experience of America. Also, functioning as a point of entry, the center can be used as the official place for the Nation to greet outstanding orchestras, ballet and opera companies, and singers who visit our country. If the center's program is carried out with imagination, it can do much to improve the image of America both at home and abroad.

Smith report

During 1960, the Board of Trustees employed Dr. Carleton Sprague Smith, musicologist and consultant to the New York Public Library to develop recommendations on a workable and feasible national program of activities for the National Cultural Center. Dr. Smith's recommendations, which were developed on the basis of broad consultations and study were approved in October 1960, as a general indication of the intentions of the trustees.[1] The chief recommendations are as follows:

1. The center should be a showcase for the performing arts in America. Its scope must be nationwide and its projects national in fact as well as in name. It should sponsor outstanding performing arts groups and educational programs, invite them to Washington and arrange to have them tour the country insofar as it is financially feasible.

2. The center must supply leadership; it should furnish direction and guidance and establish national goals. The center will be a catalytic agency to foster the development and appreciation of the performing arts. With proper planning it should be possible to "stir the pot" and help us better to understand ourselves and others and give individual identity in a time of mounting tensions and confusion.

3. It is not suggested that the center found a national conservatory, dramatic academy or school of the dance. There are many fine performing arts schools in the country and this is not one of our major needs. Moreover, general education and recreation, rather than technical instruction, are the prime responsibilities of the center. Again, it does not seem advisable at the present time to establish an official national theater, ballet or opera. The consensus of those consulted is that groups formed as "official companies" would have heavy responsibilities, and one or two nondescript productions could do years of damage. It is therefore recommended that the center encourage and assist the best music, theater and dance groups but refrain from setting up companies of its own. This does not mean that the center should not plan activities on a local and national scale by commissioning symphonies, plays and ballets; encouraging the formation of new companies; urging already existing organizations to present certain works; and sponsoring a variety of undertakings. It does assume the position, however, that production is not one of its primary responsibilities.

---

[1] The Smith report was released to the public on Jan. 15, 1961.

The center's role as sponsor would be analogous to that of the Music Division of the Library of Congress. In other words, it should present but not produce.

4. The National Cultural Center ought to be more than a facility. It should be an institution. Its auditorium events are vital but in the last analysis the caliber of its staff and program, and the extent and depth of its influence will give it institutional status. By sponsoring quality and raising standards it can prove itself to be a worthy bureau of the Smithsonian Institution. It would not duplicate any existing facilities in Washington.

5. The education program furnishes the key to the National Cultural Center. It opens up the world of the performing arts. The Education Division is the coordinating brain uniting music, theater, lyric drama, dance, poetry, film, radio, and television. From morning to evening its activities animate the performing arts into a cohesive unit and prevents the whole complex from being merely a renting operation. The National Cultural Center cannot expect visitors simply to look at buildings during the hours when no performances are scheduled. There should be nothing static about the Center; it must be a world of stages, and, with the audiovisual techniques of our time brought into play in a new type of museum, both on- and off-stage worlds will assume new dimensions.

(a) The center will serve as a national clearinghouse for information about the arts and be active in education extension.

(b) A museum of the performing arts equipped with the most modern techniques to display materials illustrating various of the innumerable aspects of these arts would give visitors a better chance to understand their elusive and ephemeral character. It would exhibit such things as dioramas, costumes, manuscripts and scene designs, and a small collection of musical instruments would be demonstrated several times a day. Film showings, recordings, and tapes of symphonies, operas, folk songs, popular music, poetry and plays would vie for the attention of visitors. Loan exhibitions—a number perhaps assembled by the museum of the performing arts at Lincoln Center—could furnish fascinating variety. The center's own traveling exhibitions would have wide national impact.

(c) A library with a small collection of basic books, plays and scores pertaining to music, theater, poetry, and dance would be invaluable to the artists performing at the center, to staff members and to visitors curious to know more about the arts. Some Washingtonians have suggested that a performing arts branch of the District of Columbia Public Library be included in the Center. A national circulating collection of scores, scripts, recordings and films is long overdue and would have the unqualified support of performing arts organizations and libraries throughout the country.

(d) Radio and television studios are essential parts of the center. Audio and visual broadcasting would both extend its influence and attract visitors. The programs developed by both units should be made nation-wide by securing national transmission through commercial and educational networks. The Educational Radio and Television center, with headquarters in New York, is extremely anxious to cooperate with the National Cultural Center and has already made overtures in this direction. Motion pictures are in a sense the most characteristic performing art. There should be showings of films related to music, theatre and dance and an active cinema program synchronized with the activities of the center.

Title VII of the National Defense Education Act authorized the Commissioner of Education, through grants or contracts to conduct, assist, and foster research and experimentation in the use of television, radio, motion pictures and related media for educational purposes. It is herewith suggested that a request be made to the Commissioner asking that a project be drawn up to investigate the several courses which the National Cultural Center might follow. It would be important to bear in mind both the local and national scene.

(e) Workshops periodically concerned with educational extension can increase public participation by guiding and directing people to societies and experts who will advise them how to develop professional and amateur performing arts activities in local communities.

(f) A close relationship with schools and colleges and conservatories and academies throughout the country should be continuously fostered. This will answer a need which has long been felt; for the lack of a national performing arts agency has frequently been mentioned in congressional hearings by our educators.

(g) While education creates interest and supplies training in the performing arts, the pursuit of music, theatre and dance, at least for the amateur, belongs primarily to the field of recreation. Leadership and guidance regarding standards and appropriate repertory are greatly needed. The movement which Fritz Joede developed in Germany after World War I shows what an extraordinary influence a well-planned program can have. The battle for men's minds is paralleled in this country by the competition for men's leisure time. During the next few years Americans are expected to have more free hours per week than ever before. The performing arts are among the most satisfying avocations available to mankind. By guidance and emphasis on the finer aspects of the arts, the National Cultural Center can help people of all ages to a richer and fuller life.

6. The National Cultural Center should seek out and sponsor contemporary creative artists—composers, dramatists, poets and choreographers—as well as performing artists. This is a basic policy necessary to keep the center in the vanguard of our cultural life. Programs would vary from electronic music and theater in-the-round to abstract dance and progressive jazz, quality being the main criterion. Some would be given without comment, others as part of educational forums. They should preserve our rich national tradition and enable our heritage to be better known. We should make Americans aware of their regional diversity, from the ballads of the northern lumberjacks to the chanteys of Cape Cod fishermen, the songs of Pennsylvania coal miners and the laments of Texas cowboys. Country dancing and singing groups should be recognized, national and regional festivals of folk, popular, classical and contemporary art forms organized, and consideration given to nationality groups and their fast-vanishing musical and folk traditions. Finally, the music and dance of the American Indian should receive special attention.

7. One of the main purposes of the act, as explained in preliminary hearings, "is to strengthen the ties which unite the United States and other nations, and to assist in the further growth and development of friendly, sympathetic, and peaceful relations between our country and the rest of the world by demonstrating our sincere interest in the performing arts." The center should assume an international role. Washington can be an artistic port of entry to the United States where foreign performing artists may make their debuts; it can be the point of embarkation for some of our performing artists about to go overseas. In short, we can officially give the former a warm welcome and the latter a rousing sendoff.

8. The new auditoriums can have a marked influence on national taste, strengthen and augment our cultural resources by arranging educational and recreational programs of quality and distinction. Presenting music, opera, drama, dance and poetry to paying audiences is a challenging assignment requiring training and experience, imagination and taste. It is a delicate task since most Government agencies do not charge for public events. As a public service, the Center wishes to reach as many people as possible, at democratic prices. Obviously, an endowment and other sources of revenue must be sought. It is recommended that the National Cultural Center may rent the auditoriums to appropriate civic and community groups and assemblies and congresses of a noncommercial character providing that they do not interfere with the center's primary cultural function.

Acceptance of the Smith report is just a starting point. Obviously, the conduct of education and recreation functions in the performing arts on a national scale will establish both cost and space requirements which must be related to and balanced against the cost and space requirements of other functions contemplated for the center.

The trustees have directed that careful staff work be undertaken in order to develop firmer estimates of the costs and space requirements of each of the contemplated functions and activities. These estimates will be used as a guide for the trustees in deciding on the program of the center.

Participation of national organizations

Another development during 1960 deserves special mention. From the very beginning of the center project, the trustees contemplated that the leading national organizations concerned with the performing arts and their educational and recreational aspects should be closely associated with the effort to create the center and its program. As a means of bringing the resources of these organizations to bear on the center's problems and in order to assure direct participation of their representatives in the planning for the center, the trustees recommended that representatives of the following national organizations be invited by the President of the United States to serve ex officio on the Advisory Committee on the Arts.

List of participating national organizations: the Academy of American Poets, American Academy of Arts and Letters, American Educational Theater Association, American National Theater and Academy, American Symphony Orchestra League, National Federation of Music Clubs, the National Institute of Arts and Letters, National Music Council, National Recreation Association, the Poetry Society of America, Theater Library Association.

Acceptances were received from all the organizations. As members of the advisory committee, the representatives of these organizations can attend all meetings of the advisory committee, including joint sessions with the trustees. Also, they are sent all of the official policy papers, staff papers, progress reports, financial statements, and minutes of the executive committee meetings. They have been asked to comment on policy and program proposals.

During 1961, it is the intention of the trustees to develop closer collaboration with the members of the advisory committee and with these national organizations in order to assure the fullest use of their experience in formulating and perfecting the program, architectural and fund-raising plans for the center.

B. Architectural planning

The task of designing a building for all the performing arts and suitable for civic activities in the Nation's Capital was a prodigious one indeed. From the first, the trustees realized that such facilities must be of the

highest technical quality, suitable as the showcase for the finest talent of America and the world. In addition to these exacting requirements, the building had to be of the monumental type entirely fitting for the historic Capital City.

Appointment of Edward Durell Stone

Within a few weeks after the Board of Trustees was organized in 1959, Edward Durell Stone, a world famous architect, was retained as architect-adviser to the trustees. He was asked to examine the building requirements in the light of the land area assigned to the center project in the authorizing legislation. This land area consisted of a narrow, somewhat tongue-shaped plot of land, inland from the Potomac River and wedged in between and surrounded by the contemplated Inner Loop Highway, and New Hampshire Avenue on the east and north, and Rock Creek Parkway and the approaches to the planned Theodore Roosevelt Memorial Bridge on the west and south. Planning for the highway and bridge approaches was at that time incomplete. Hence, the common boundaries between these projects and the National Cultural Center were as yet undefined; and the actual acreage left over for the center was unknown.

In the fact of these limitations, Mr. Stone attempted a plan for a series of small cultural buildings grouped tightly together in the assigned land area. He quickly concluded, after consultation with members of the executive committee and officials of various governmental agencies, that such an arrangement would not produce structures adequate for the Nation's Capital. The small buildings would be relatively inefficient and unimposing, the movement of traffic in and around the buildings would be difficult, and very little land would be left over for the creation of a park setting for the area.

Mr. Stone also considered the possibility of a large multipurpose hall. Such a building would have used up most of the available land area but would have been relatively less expensive to build and operate than would be the cost of a series of special-purpose halls.

Consultations with numerous experts and others interested in the performing arts led Mr. Stone to conclude that the purposes of the National Cultural Center Act could not be best served by the creation of a multipurpose hall. Too many compromises would have to be made in the structural, acoustical, staging and other characteristics of the building if it were to serve the purposes of all the performing arts. Sentiment favored creation of specialized halls for the various performing arts in order that the finest quality performances in each of the arts might be made possible in the Nation's Capital.

The Stone concept

Mr. Stone then consulted with Mr. Conrad Wirth, Director of the National Park Service. From these discussions, an idea was developed to shift the National Cultural Center building several hundred feet south and west so that it might occupy a direct setting on the Potomac River. This shift, which would be accomplished by an exchange of lands with the National Park Service, would make it possible to design a more impressive structure and place it in a park setting. It also would make possible an easier movement of traffic in and around the center.

With the tentative approval of the executive committee, Mr. Stone developed the basic concept for the center which was approved by the Advisory Committee on the Arts and the Board of Trustees and was made public in September 1959.

In connection with this release, enthusiastic approval of the design was obtained from the Commission of Fine Arts, and the National Capital Planning Commission approved the plan for use of the land.

Presentations of the concept were also made to the President and the Cabinet, the District of Columbia Commissioners, and to many civic and private groups. In all cases, the plan evoked enthusiastic responses, both for the originality of the design and for the beauty and appropriateness of the structure in terms of its role and setting in the Nation's Capital.

Further architectural planning

During 1960, a number of consultations and exchanges of information have taken place with a view to integrating the architectural plans for the center with public works and other plans for the Foggy Bottom area of the Nation's Capital. The approximate dimensions and other characteristics of the center building have been supplied to the traffic and sanitation divisions of the District of Columbia, thus setting the basis for the coordination of the center plans with large-scale sewer and highway projects planned in the same area.

A formal application was developed and submitted to the U.S. Army Corps of Engineers for approval of the river terrace intended for the center's Potomac River entrance. This application is now being considered by the Engineers.

Arrangements are also being made to secure the necessary information concerning soil conditions underlying the National Cultural Center land. The information thus obtained will have a direct bearing on the costs and characteristics of the foundation work necessary for the center building.

At the present time, the architect-adviser is studying the various internal facilities for the center and is developing more detailed cost estimates for each facility. This information is useful for both cost planning and for guidance to persons wishing to make large memorial-type contributions to the center. Additional work is being done to develop information on the type of qualities necessary in the great hall in order that they be the finest of their kind. The architect-adviser is considering a plan in which certain basic features of the stage and behind stage facilities in the great halls will be standardized with the measurements of comparable facilities in other U.S. and world cities. Such a step would, of course, greatly facilitate the interchange of large-scale cultural events between these various cultural facilities.

Land acquisition

The adoption of the architectural plan developed by Mr. Stone necessitates the addition to the National Cultural Center site of three small parcels of land. In the main, this additional land is needed to permit the rerouting of Rock Creek and Potomac Parkway so that the center building can be located directly on the Potomac River. In order to permit construction of the center on the present parkland and parkway as well as to incorporate the small plots of additional land, a change must be made in the site boundaries described for the center in the authorizing legislation. In the spring of 1960, draft legislation was developed and cleared within the executive branch of the Government to revise the site boundaries in accordance with the building plan approved by the Commission of Fine Arts and the land use plan approved by the National Capital Planning Commission. In the press of legislative business, however, the legislation was not acted upon by the Congress.

When it became clear that boundary change legislation would not be enacted as early as hoped, the executive committee concluded that steps should be taken to develop a plan for the center which would permit its construction solely on land already owned by the Government or on land within the site for the center as described in the authorizing legislation.

In response to this need, the architect-adviser developed an interim plan which preserved the basic building plan but reduced its overall dimensions by a small amount and shifted the structure a few yards to the south. This change was accomplished by narrowing the width of the main arcades leading into the building rather than by reducing the size of the great halls. The interim plan would also require a slightly different flow of traffic around the center and its New Hampshire Avenue plaza in order to avoid the parcels of privately held land immediately to the north of the center.

The interim plan was approved by the National Capital Planning Commission in the fall of 1960, with the understanding that both the Commission and the trustees prefer and would continue to work for the original plan which provides for a park setting rather than private buildings on the center's northern perimeter.

At a joint meeting of the Board of Trustees and the Advisory Committee on the Arts in October 1960, a resolution was passed directing the executive committee to proceed with the interim plan for all fund-raising purposes. However, the officers were directed to seek once again enactment of the legislation which would enlarge the boundaries in accordance with the original plan. Unless the trustees are successful in obtaining the necessary boundary revision, the northern view of the center will be blocked by a series of commercial establishments, sheds and other miscellaneous structures.

Proceeding by direction of the trustees, the officers have moved to secure all the land necessary to construct the interim plan. This includes lands required for the relocation of Rock Creek and Potomac Parkway. Pursuant to the National Cultural Center Act, funds collected from contributions were paid over to the National Capital Planning Commission in order that it might purchase by agreement or condemnation sufficient lands from two private owners for this purpose. Condemnation proceeded in both cases but one owner settled out of court and made a voluntary conveyance of the land. The value of the other parcel will be determined by a jury. Title to both parcels of land has passed to the Government.

Legislation to revise the boundaries in accordance with the original plan has been developed and will be introduced in the first session of the 87th Congress. On January 18, 1961, President Eisenhower addressed a letter to all the congressional leaders strongly urging passage of the boundary revision.

Construction of the center by stages

Mindful of a broad sentiment for bringing into existence the facilities of the National Cultural Center at the earliest date possible, the Board of Trustees approved in October 1960, a plan for constructing the National Cultural Center in stages. The trustees concluded that building should commence as soon as funds are available to construct one of the great halls.

Accordingly, at the trustees' request, the architect-adviser developed a plan which will permit the construction of the entire outer shell of the center building, the completion of the opera house and the completion of parking facilities. All this work would commence as soon as the trustees have pledges of approximately $30 million. Selection of the opera house as the first hall to be completed rested on the fact that it would have stage and backstage capacities and acoustical qualities adequate enough to permit its temporary use for ballet, theater, and concerts, in addition to its basic opera mission. Neither the proposed symphony hall nor the theater would have the qualities to permit it to be used as flexibly for the other performing arts as could the opera hall.

The architect-adviser is now perfecting more detailed plans for the first stage construction plans. It is hoped by this advanced planning to reduce the overall lead time between the date when the necessary funds are in sight and the date when the facilities can be opened for public use. Completion of the symphony hall, theater, central rotunda, and the office and studio space above the great halls would be undertaken as additional funds became available.

Completion of the outer shell of the whole center building at one time will produce a number of advantages. Mr. Stone had considered the alternatives of finishing various parts of the center building at different times with, for example, the opera hall standing in a temporarily completed form, but with the rest of the building constructed only through the foundation level. Such a structure would have two disadvantages. In the first place, it would be an eyesore. Structural materials would be lying about, and the landscape would be torn up for many years. Also if the opera hall structure were completed by itself, the temporary outer walls and roof would be unattractive. Furthermore, when funds were raised to complete the other wings and the top of the building, the noise and upheaval incident to the type of heavy structural work necessary to complete the building and rotunda might actually impair the usefulness of the opera house for a long period of time.

If, as an alternative, the whole shell of the building were created at one time, the task of completing within the shell, the interior facilities and the rotunda could be accomplished with far less upheaval, noise, and trouble. Also, the architect-adviser believed that construction of the entire shell at the outset would probably save substantial sums of money both as a result of the economies of doing the basic structural and foundation work at one time and because of the probable continued inflation of building costs.

C. Fundraising plans

As has been noted above, the program and architectural requirements of the National Cultural Center Act were unprecedented. The problem of financing the type of facilities contemplated in the act are even more unusual. Never before has a body of Americans been given the task of raising funds for, and then operating, a national cultural center. The whole legislative history of the act clearly supported the view that the center was intended to be an institution which would serve the whole Nation rather than merely the Nation's Capital. Congress recognized that the funds to construct the center could not be raised from the contributions of only those private citizens living in the National Capital area. Fundraising was to be national in scope.

The magnitude and novelty of this task required professional counsel. The Board of Trustees first retained the firm of Tamblyn & Brown, Inc., and later George A. Brakeley & Co., Inc., as professional fundraising counsel. Considerable work has been done by the latter fundraising firm to ascertain the reactions of national leaders from all over the country, both as to the idea of the center and as to the methods of raising the necessary funds from private contributions.

The fundraising counsel concluded, on the basis of broad consultations, that the fundraising mission was feasible. It is believed that the American people will make contributions toward the construction of a national cultural center, provided the project is given strong national leadership, including the full support of the President of the United States.

The fundraising counsel recommended to the Board of Trustees that an initial effort be made to secure approximately $30 million in the first 2 years of national fundraising. This amount would finance the first-stage construction plan approved by the trustees. Later fundraising drives would be undertaken to complete the entire National Cultural Center project.

Ultimately, the overall cost of all the facilities, exclusive of land, is estimated in the vicinity of $75 million. The land area donated by the Federal Government has an asset value of approximately $8 million at 1960 prices. Part of the funds to pay for the nongovernmental land will be forthcoming from the District of Columbia government which has made three-quarters of a million dollars available toward the purchase of some of these lands. This money is loaned to the District of Columbia government by the Federal Government pursuant to the Capper-Cramton Act, but must be repaid to the Federal Government from funds collected from District of Columbia taxpayers.

In October 1960, the Board of Trustees approved the basic fundraising plan and efforts are now underway to enlist the services of a leading national figure to serve as national campaign chairman. Commencement of the national fundraising drive will take place as soon as the national campaign chairman has been chosen.

In general, the approved fundraising plan contemplates the commencement of solicitation of funds from potentially large contributors. Solicitation will begin first in the Nation's Capital and will spread quickly to the other areas in the country. The final phase of the first-stage campaign will culminate in a drive to secure contributions of both small and large amounts from all Americans. The fullest cooperation will be sought in this endeavor from the Advisory Committee on the Arts and from the chief national organizations concerned with the performing arts, which all together represent some 20 million persons.

II. CONCLUSIONS

The Board of Trustees has been deeply mindful of the great opportunity to the Nation presented in the National Cultural Center legislation. All those directly associated with the center project have sensed the unusual character of their mission and have freely devoted much time and energy to its realization.

The trustees are proud of the fine cooperation they have received from the National Capital Planning Commission, the Commission of Fine Arts, the Commissioners of the District of Columbia, the National Park Service, the U.S. Army Corps of Engineers, the Lands Division of the Department of Justice, and the Bureau of the Budget. They have helped us on our way and have given us support at critical times.

Certainly, the biggest part of our task lies ahead. We have made what we believe to be sound architectural plans for the full range of functions contemplated for the National Cultural Center. We have also made plans for securing from the public the funds necessary to carry out all of the purposes of the center. We do not minimize the fundraising task, but we believe it is a workable goal.

We could not conclude this report of our stewardship during the first years without giving special mention to the courage and firmness of purpose demonstrated by some of our colleagues and by private citizens who, without even awaiting the commencement of public fundraising, have furnished or pledged $1,280,000 to the center project.

In passing the National Cultural Center Act, no appropriations were provided to finance all of the extensive planning work that has been done. Clearly, without the contributions of these citizens, none of this important planning could have been undertaken in any serious way. The Nation, therefore, owes a special debt to these early contributors who have demonstrated their faith and given of their fortunes toward the ultimate realization of this wonderful project.

We are impatient to continue our work. The National Cultural Center is needed as a symbol of a vigorous and effective nationwide effort to elevate the performing arts to a more meaningful level in our national life and to demonstrate to the whole world that free artistic expression is encouraged in our Nation and is a vital part of our way of life.

We have all seen how the performing arts can break down barriers to understanding between human beings and between countries. The creation of a tangible symbol of America's official interest in the performing arts will have, in our opinion, a profound effect on improving the image of America in the eyes of the whole world. We are anxious to give the American people the opportunity of demonstrating by their full support of our campaign that they comprehend the timeliness of this project and grasp its essential value in shaping the future of this Nation and its way of life.

III. REPORT ON RECEIPTS AND EXPENDITURES REQUIRED PURSUANT TO LAW

Pursuant to the National Cultural Center Act, there follows a report on receipts and expenditures for the years 1950 and 1960.

Apr. 1 through Dec. 31, 1959

Receipts:	
Pledges	$108,525.90
Contributions	40,868.28
Loans from bank	90,000.00
Total	239,394.18
Expenditures	130,384.74
Balance	109,009.44

MEMBERSHIP OF NATIONAL CULTURAL CENTER DURING 1960

Officers: Arthur S. Flemming, Chairman; L. Corrin Strong, Executive Vice Chairman; Robert W. Dowling, Chairman, Advisory Committee on the Arts; Daniel W. Bell, treasurer; Ralph E. Becker, general coun-

sel; Jarold A. Kieffer, secretary; Paul J. Seltzer, assistant treasurer; Mrs. J. C. Cantrell, Jr., assistant secretary.

Board of Trustees: Floyd D. Akers; Winthrop W. Aldrich, Ralph E. Becker; Daniel W. Bell; Andrew H. Berding,[1] Assistant Secretary of State for Public Affairs; John Nicholas Brown; Ralph J. Bunche; Leonard Carmichael,[1] Secretary, the Smithsonian Institution; Joseph S. Clark, U.S. Senator from Pennsylvania; Lawrence G. Derthick,[1] Commissioner of U.S. Office of Education; John J. Emery; David E. Finley,[1] Chairman of Commission on Fine Arts; Arthur S. Flemming,[1] Secretary of Health, Education, and Welfare; J. W. Fulbright,[2] U.S. Senator from Arkansas; Mrs. George A. Garrett; Carroll D. Kearns,[3] U.S. Representative from Pennsylvania; Robert E. McLaughlin,[1] President, Board of Commissioners, District of Columbia; L. Quincy Mumford,[1] Librarian of Congress; Frank H. Ricketson, Jr.; Leverett Saltonstall,[2] U.S. Senator from Massachusetts; Mrs. Jouett Shouse; L. Corrin Strong; Philip M. Talbott; Frank Thompson, Jr.,[3] U.S. Representative from New Jersey; William H. Waters, Jr.,[1] Chairman, District of Columbia, Recreation Board; Conrad L. Wirth,[1] Director of National Park Service; Robert L. Wood; Jim Wright,[3] U.S. Representative from Texas; and 2 vacancies.

Advisory Committee on the Arts: Robert W. Dowling, Chairman; Reginald Allen, Marian Anderson, Mrs. Robert Low Bacon, Col. Earl Henry Blaik, John Brownlee, Paul Callaway, Albert Christ-Janer, Katharine Cornell, Donald Kirk David, Lowell Davies, Walter E. Disney, Mrs. James H. Douglas, Jr., Richard Eberhart, Rev. Edward L. R. Elson, Karl D. Ernst, Richard E. Fuller, Rabbi Norman Gerstenfeld, Leonard H. Goldenson, Martha Graham, Richard J. Gray, H. Hamilton Hackney, Daniel A. Harris, Huntington Hartford, Rev. Gilbert V. Hartke, Helen Hayes, Ima Hogg, Mary Howe, Sol Hurok, Garfield Kass, Herman D. Kenin, Warner Lawson, Howard Lindsay, Stuart F. Louchheim, Mrs. Herbert A. May, Howard Mitchell, Robert Montgomery, Earl V. Moore, George L. Murphy, Joseph Prendergast, Robert M. Richman, Richard Rodgers, Robert W. Sarnoff, Very Rev. Francis B. Sayre, Jr., David S. Smith, Frank Stanton, Fred M. Waring, Kurt Weinhold, Pierre Bedard, secretary.

Associated organizations: the Academy of American Poets, Mrs. Hugh Bullock, president; the American Academy of Arts and Letters, Douglas Moore, president; American Educational Theater Association, Norman Philbrick, president; American National Theatre and Academy, Miss Peggy Wood, president; American Symphony Orchestra League, John S. Edwards, president; National Federation of Music Clubs, Mrs. C. Arthur Bullock, president; the National Institute of Arts and Letters, Glenway Wescott, president; National Music Council, Howard Hanson, president; National Recreation Association, James H. Evans, chairman of board; the Poetry Society of America, Gustav Davidson, secretary; Theater Library Association, George Freedly, president.

THE WHITE HOUSE,
January 18, 1961.

DEAR ———: [4] The National Cultural Center Act, signed in 1958, provided for the establishment of a national center for the performing ats. Organizationally, the center is a bureau of the Smithsonian Institution. Its trustees are broadly representative of Government agencies and include appointments from the general public.

This statute set aside a parcel of land in the Foggy Bottom area in the Nation's Capital as a site for the National Cultural Center.

Over a period of many months of discussion and planning, the Board of Trustees of the center concluded that the somewhat awkwardly shaped site described in the law was not adequate for the type of facilities contemplated by the Congress in the National Cultural Center Act.

Consequently, the architect-adviser to the Board of Trustees, Mr. Edward D. Stone, in cooperation with the head of the National Park Service and other officials, developed a plan involving a small addition to the site which would establish the center in a more convenient and useful location immediately upon the Potomac River. This change in plans permitted Mr. Stone to develop the beautiful design for the structure that has received enthusiastic support from the Commission of Fine Arts, the National Capital Planning Commission, and the District of Columbia Commissioners. It has been my impression that the public's response to the plans also has been very favorable and, at my invitation, 11 of the chief national organizations concerned with the performing arts have become associated with the project.

If plans are to be carried forward for constructing the center in accordance with the approved site plan, it will be necessary to acquire three small parcels of land just outside the boundaries now described in the National Cultural Center Act. In addition to redescribing the boundaries to include these parcels, the boundaries need to be changed in order to permit construction of the center in part on park land which the Park Service is willing to substitute in order to create the new enlarged site. This exchange of land with the Park Service will make possible the establishment of the center in a beautiful river front setting, surrounded by parks and with adequate traffic approaches, as befits an important building in the Nation's Capital.

Last spring, legislation was introduced by Senators DIRKSEN and CHAVEZ, Representative JONES of Alabama, and others to enlarge the boundaries of the site in accordance with the approved plan. Executive branch clearance was given these bills, but in the press of the business in the last session no action was taken. The trustees earnestly hope, of course, that these bills will be reintroduced in the 87th Congress.

It is apparent to me that the whole national fundraising effort for the center may be jeopardized if the trustees are not given a clear title to the land necessary to accomplish the approved plan.

The National Cultural Center project, if brought to realization, would be a tremendous national asset, one which could do a great deal to strengthen the arts in America and thereby improve our cultural image at home and throughout the world.

I hope it will be possible for you to advance this undertaking by supporting the needed legislation early in the session.

Because these matters I have discussed above concern a project in which I believe all of us should have a deep interest, I am sending similar letters to other members of the Senate and House leadership on both sides of the aisle.

Sincerely,

DWIGHT D. EISENHOWER.

THE WHITE HOUSE,
March 9, 1961.

HON. SAM RAYBURN,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER:

DEAR MR. PRESIDENT:

Earlier this year President Eisenhower sent to the leadership of the House and the Senate a message urging the enactment of legislation to enlarge the site of the proposed National Cultural Center in Washington. Under the National Cultural Center Act, the site for the center is to be provided by the Federal Government. As the President pointed out on January 18, it is necessary that three parcels of land not now included within the description of the site be added in order to permit construction of the center in accordance with the approved architectural plan.

I want to renew this recommendation. The National Cultural Center is the most significant cultural undertaking in the history of this city and has enormous importance to the cultural life of the Nation as a whole. There is a real and promising opportunity to establish new horizons for the performing arts in this city. There have been many public-spirited citizens participating in the work and planning of the cultural center, and I believe that the Federal Government should take these small additional steps in order to provide a suitable setting and environment for the center. Moreover, this is an enterprise which has earned the support of membership of both parties in the Congress.

I urge the early enactment of this legislation so that the plans for the National Cultural Center may proceed promptly. This can be an important step in recognizing the vital role of culture in the vigorous development of our country.

Sincerely,

JOHN F. KENNEDY.

STATEMENT BY L. CORRIN STRONG, ACTING CHAIRMAN OF THE BOARD OF TRUSTEES OF THE NATIONAL CULTURAL CENTER

NATIONAL CULTURAL CENTER,
March 9, 1961.

The trustees are pleased and gratified at the full measure of President Kennedy's support for the National Cultural Center project.

We hope that with continued bipartisan support, the legislation to round out the site for the National Cultural Center will be passed by the Congress as soon as possible. This will help prepare the way for fundraising on a national scale and will insure a suitable area and proper park setting for this great national cultural institution.

MAPLE SIRUP PRODUCTION IN MARYLAND

Mr. BEALL. Mr. President, in the March 14, 1961, issue of the Washington Star, my good friend, George Kennedy, in his popular column, "The Rambler," told of his interesting visit to Garrett County, Md., to observe first hand the production of the famous Garrett County maple sap sirup. The columnist, accompanied by Tom Hoy, Washington Star staff photographer, saw the maple sap being gathered from 100-year-old trees, transported by horse-drawn tanks to an evaporating plant, and there put through the process of evaporation. Our friends were especially impressed by the fact that the final and delectable table product was arrived at by evaporating 40 gallons of sap to every 1 gallon of sap sirup.

We residents of Maryland are particularly proud of the high quality of our Garrett County maple sap sirup.

The interesting story by "The Rambler" brought to my mind nostalgic memories of my boyhood in western Maryland when one of the annual delights was visiting farms where the fine maple sirup was being prepared for

---

[1] Indicate ex officio member. (A number of ex officio members have resigned public office as of January 20. Their successors are now ex officio trustees).

[2] Appointed by the President of the Senate.

[3] Appointed by the Speaker of the House.

[4] This letter was sent to the leaders of both Houses of Congress and of both parties.

market. The story prompted me to go to western Maryland and get a supply of first run sirup so that I might share the joy of this product with my colleagues in the Senate. Each of the Members of this body has been handed a container of this sirup, and I am sure that each of you, after having savored it, will share my enthusiasm for Garrett County maple sap sirup.

Mr. President, I ask unanimous consent to have printed in the RECORD, as part of these remarks, the column, "The Rambler," by George Kennedy, as it appeared in the March 14, 1961, issue of the Washington Star.

There being no objection the column was ordered to be printed in the RECORD, as follows:

THE RAMBLER FINDS THE SAP ALSO RISES

(By George Kennedy)

When it comes to maple sirup or maple sugar one thinks of Vermont.

But there is considerable production of both south of the Mason-Dixon line in Garrett, the westernmost of the Maryland counties.

Yesterday the Rambler hied himself out there with Photographer Tom Hoy. He had never seen maple sirup produced on a big scale.

We went through Cumberland and Frostburg to Grantsville where we turned to left, proceeded exactly a mile as directed and turned to the right on a dirt road.

This is hill country but not backwoods. It is mostly grazing land for beef cattle and sheep.

It is a region where it takes a good deal of ingenuity for the countryman to make a living.

Yet many of the houses seemed to be made according to the plans presented by the Ladies Home Journal in the 1920's.

We were on the right road. All about stood huge hard maples with two or three wooden pails hanging from them waist high.

At the house Mrs. Guy L. Stanton, a big friendly woman with rimmed spectacles, said:

"He's operating today. You'll find him down in the shed tending the evaporator."

We passed many more big sugar maples with many more wooden buckets. We walked. The road down the hill was very muddy.

Despite the rain and the mud and the chill in the air it was fun to hear chickens cackling over their egg production and smell the cattle manure newly spread on the wet ground and hear the baaing of sheep and see fuzzy little lambs with black ears and feet—baby lambs that had been dropped less than a month ago, skipping around the ewes.

On the way we passed many more forest giants with many more pails.

We checked some of them. The sap, or "water" as they call it in a sugar bush, was flowing all right. The warm Sunday had started it upward.

There were only old maple trees in this pastureland. Some of them with shattered tops, but flowing. They stood well apart. It was evident that years and years ago someone had removed all other trees from the forest and left only the maples standing. Most of them were about 100 years old.

On the bottom of the dale was a large shed of boards weathered black with steam issuing from every pore and cranny. It looked as though it housed a still—and what a still that would have been.

Inside we met Guy Stanton, a little man, tapping the finished maple sirup from the last tray of the big evaporator. It was heated by gas.

Here we learned why we were so disappointed in stolen maple sap when we were kids—it hardly tasted sweet.

It takes 40 gallons of sap or "water" to make 1 gallon of sirup. The 39 gallons is evaporated off as steam. When the temperature in the last tray becomes 217 degrees or 5 above the boiling point of water, he knows it's sirup.

He has made sirup there 39 years; his father 41 years before him and someone before that. No wonder the trees are old.

He uses a small tank truck to bring the "water" to the evaporator.

In a good year he produces as much as 1,100 gallons of sirup. He hopes this will be a good year—it's been good so far. Last year he got only 350 gallons. The average is between 500 and 600.

He has checked the weather carefully for almost four decades but he still doesn't know what makes a good year.

He said that 10 years ago there were 100 producers of sirup and sugar in Garrett Count . Now he thinks there are only 75.

He sells sugar by the pound and maple sirup by the gallon or half gallon by mail. His post office is Grantsville.

But most of his production is sold in bulk in big metal drums that must hold 50 gallons. They are labeled:

"Burke Mountain Maple Co., Vermont."

As everybody knows, the best maple sirup comes from the Green Mountain State.

KIWANIS: AMBASSADORS OF INTERNATIONAL GOOD WILL

Mr. WILEY. Mr. President, over the years progress in the United States has depended upon, and benefited from, enterprising, forward-looking efforts of citizens acting individually and through their organizations to attain laudable ideals and goals.

At this time, I refer to one such splendid organization, the Kiwanis Club. By adoption of constructive, creative programs designed to serve their fellowmen and their country, the Kiwanian goals have included:

Improving the domestic life of our people;

Building a stronger character in our citizens, particularly our youth;

Contributing to better government, schools, public and community services;

Encouraging greater understanding and cooperation between the people at home and abroad.

These are only a few highlights of "Kiwanis in action," making such a notable contribution to betterment of life for mankind around the globe.

Recently, a Canadian-United States international good will banquet was held at West Allis, Wis. For the occasion, representatives from our good neighbor, Canada, were invited to participate in the program.

The event was a splendid example of how people of neighboring countries—dedicated to common goals and ideals—can get together to reaffirm our mutual interests and rededicate themselves to attain such laudable objectives.

The occasion—an event preliminary to the international convention, to be held in Toronto in July 1961—splendidly reflected the way in which such organizations as Kiwanis, by reaching the hands of friendship and understanding across international boundaries, can do much to improve relations in this shrinking world.

At the banquet, a splendid address was delivered by Charles F. Wilson, consul general of Canada. The speech—a lucid analysis of positive and problematic aspects of United States-Canadian relations—deserves, I believe, the consideration of Congress.

Reflecting upon this fine occasion in which the Kiwanis have spearheaded efforts to promote good will and understanding, I ask unanimous consent to have printed in the RECORD first, an editorial from the West Allis Star; second, a message of greetings from John G. Diefenbaker, Prime Minister of Canada; third, a good will telegram from Nathan Phillips, mayor of the city of Toronto, Canada; and, fourth, the address by Charles F. Wilson, entitled "Building Bridges of International Understanding."

There being no objection, the editorial, message, telegram, and address were ordered to be printed in the RECORD, as follows:

[From the West Allis Star]

KIWANIS EVENT SUCCESS

An international atmosphere hung over city hall briefly Thursday when consul general of Canada, Charles Wilson, paid a visit to Mayor Arnold Klentz.

A guest of the Kiwanis Club, the consul general was on a tour of the area prior to appearing at the Kiwanis Club dinner meeting at the Allis-Chalmers clubhouse where he spoke on "Building Bridges of International Good Will."

While visiting informally with the mayor, he also met many West Allis city officials, and spoke briefly to newsmen.

The flag-lined entrance to the city hall and the screaming sirens of cars in the entourage gave a festive air to the occasion.

Next stop for the Canadian consul general on leaving West Allis was the county courthouse where he conferred with Gov. Gaylord Nelson and County Executive John Doyne.

The West Allis Kiwanis Club is taking part in a Canada-United States Good-Will Week observance on the part of the service group in both the United States and Canada.

"Credit is due Kiwanis International which has been stressing the friendship between Canada and the United States for many years," Wilson commented in his speech to the Kiwanis.

"While there have been differences between our countries, our two Governments have never been as closely linked. The friendly ties that developed between Ottawa and Washington during the Eisenhower administration have been continued with the Kennedy administration.

"Trade between Canada and the United States is the greatest between any two countries in the world and represents a quarter of the trade you do with all the rest of the world put together," he added.

Many messages were received by the West Allis Kiwanis Club from dignitaries expressing their appreciation of the Canadian-United States Good-Will Week and extending good wishes. Included in the messages were those from President John F. Kennedy; Senators, Alexander Wiley and William Proxmire; Congressman Clement Zablocki; the Prime Minister of Canada, John G. Diefenbaker; the mayor of Toronto; and many others.

The good-will week is a prelude to the annual convention of Kiwanis International which will be held at Toronto July 2–7. At this convention, I. R. Witthuhn, president-elect will become international president of Kiwanis.

OTTAWA, CANADA, *February 28, 1961.*

MR. WM. E. VAN TAAY,
General Chairman, Canadian-United States International Good-Will Week, Kiwanis Club of West Allis, Milwaukee, Wis.

DEAR MR. VAN TAAY: I wish to thank you for your recent letter, advising me of the forthcoming observance throughout the United States and Canada of International Good-Will Week, sponsored by the Kiwanis Clubs.

May I assure you that I join most warmly with my fellow members of Kiwanis in the spirit of this week which focuses attention on the long record of Canadian-American friendship.

I look forward to extending my greetings personally to the delegates from Kiwanis Clubs who will assemble in international convention in Toronto, next July, when I shall have the honor of addressing the "international night" gathering, and in the meantime, I would ask you to extend to one and all my warmest good wishes.

I am,

Yours sincerely,

JOHN G. DIEFENBAKER.

TORONTO, ONTARIO.

DR. WILLIAM E. VAN TAAY,
General Chairman, Milwaukee District, Kiwanis International Good Will Banquet, West Allis, Wis.:

Greetings and good wishes to United States-Canadian international good will banquet being sponsored by Milwaukee district Kiwanians. Looking forward to receiving many of you at Kiwanis Convention in Toronto next July where a very warm welcome awaits you. The freedom of the city will be yours.

NATHAN PHILLIPS,
Mayor of the City of Toronto.

BUILDING BRIDGES OF INTERNATIONAL GOOD WILL

(Address by Charles P. Wilson, consul general of Canada, to the Kiwanis Club of West Allis, Wis., Thursday, Mar. 9, 1961)

On behalf of the Government I represent, I wish to thank the Kiwanis Clubs attending this dinner and Kiwanis International for the declaration of this week as Canada-United States Good Will Week. I am also grateful to Mayor Kientz of West Allis for his proclamation in this connection. I am honored and pleased to be present on such an occasion. Your committee has suggested that I speak to you on the general theme of "Building Bridges of International Good Will." I like this subject because it suggests action in a good cause. Someone must do the building. Also, it suggests problems; otherwise there would be no need for bridges. Accordingly, during the course of my remarks tonight I shall refer to some of the groups of people who are to be counted among the builders, and to mention some of the difficulties they are working to surmount.

Before becoming too seriously involved, however, I should like to refer to the message you have received from Mayor Phillips of Toronto and to add that Canadians are hard at work preparing to welcome the largest group of Kiwanians ever gathered in one city in my country. In fact, I appear tonight as an advance agent to tell you how welcome you will be in Toronto in July and to express the hope that this meeting will be well represented in the army of 15,000 at the convention.

"You're from Milwaukee and you ought to know" something about Toronto. Beer undoubtedly made Milwaukee famous, but in Toronto it did something more—it built a $12 million theater, opened last year and as modern as you can find. It is called the O'Keefe Center, named after the oldest brew in the city. I detected a rather jealous note in a recent editorial in the Milwaukee Journal about the theater that beer had built in a place that never has been called the beer capital of the world.

You will definitely be taken to the O'Keefe Center and you are sure to see Casa Loma, the only castle in the world operated by Kiwanians. It has almost everything you associate with medieval castles and some touches of its own like golden faucets in the main bathrooms. No one, of course, will call them faucets in Toronto because in Canada we stick to the older and shorter word—taps. The castle is on the brow of a hill overlooking the city and from the top of the tower on a clear day you can look all the way across Lake Ontario to Niagara Falls.

The castle was built by Sir Henry Pellat, a Toronto millionaire who went broke before he had time to enjoy modern baronial living. Casa Loma remained empty for a time and, when the city hall proposed to tear it down and sell the land for unpaid taxes, the Kiwanians stepped in. It is now one of the favorite dance spots in Toronto and the revenue it provides has been most useful in extending the boys' work of the club. So what was once known as Pellat's folly, and which literally cost its builder a fortune, has been turned into a Toronto showplace by imaginative Kiwanians.

There is, however, something not so visible that interests American newspapers and American city governments much more than the castle does and that is Toronto's system of government. The sprawling suburbs, which are now bigger than the city itself, have been united with Toronto under a metropolitan council, which handles all common problems but leaves local affairs to each community and allows each community to retain its name.

One water system serves 1,500,000 people. Metro looks after town planning, the sewerage system, all roads, police, and transportation. Other metro functions are gradually being added. Millions of dollars have been saved by central financing. It has been found that the credit of metro is sounder than the individual credit of each community. There is a big annual saving in the marketing of bonds. There is a pronounced but harder to demonstrate saving that comes from more comprehensive planning and engineering. These skills have been very much needed, for Toronto has averaged an annual increase in population of 50,000 over the last 12 years. The claim has been made that this growth is the fastest on the continent.

The Frederick Gardiner Expressway, which speeds traffic across the city, is named for the chairman of the Metropolitan Council who has been the driving force from the outset. At times there have been objections from the suburbs to the high expenditures required for expressways and subways, but it now seems to be generally accepted that traffic improvements in the most congested areas save time for everybody. Toronto is particularly proud of its fast, clean subway and you will realize only too well that it is being extended as you repeatedly run into construction work.

I am delighted to learn that many of you who are present tonight will be going to Toronto. You are to be counted among the builders. I am sure that you have observed, as I have done, that the little frictions that arise between nations are mostly generated in the abstract; friendships and understanding grow through individual contacts. Credit is due to all of you who take the trouble to make them.

Credit is also due to Kiwanis International which has been stressing the friendship between Canada and the United States for many years. It is 35 years since the first of your international markers was dedicated in Vancouver. In those days relations between our two countries were easy and automatic. We had few common problems even if we were then getting impatient about the delay in building the seaway. Canada had no Embassy in Washington and certainly there was then no consul general in the Midwestern States to accept your invitation to speak to this club.

Now it is all very pleasant to dwell nostalgically on the notion that there was a time when Canada and the United States had almost no problems between them. Problems there were but we have happily forgotten most of the old ones.

But I would suggest that circumstances are different today from what they were in the 1920's because of the fact that the United States has taken up the heavy burden and has assumed the full responsibilities of world leadership in the defense of freedom, and in the promotion of the welfare of the peoples of the world. Canada, in its turn, has acquired the role of a middle power, and it takes a proportionate part in world affairs.

You know, of course, that we have given our full support to NATO, and that we maintain our infantry brigade group and our own air division under NATO command in Western Europe, just as you contribute to the strength of NATO in a much larger way. You know, too, that we are active supporters of the United Nations, in word, in contribution, and in deed. We have participated in the United Nations mediation efforts in Kashmir, Indonesia, and Palestine. Our troops were among the United Nations force in Korea. They have also participated in the Gaza patrol, and in the United Nations force during the Middle East crisis of 1956. Prime Minister Diefenbaker has advocated the formation of a permanent United Nations Emergency Force, and toward that end we hold in reserve an especially trained battalion transportable by air and earmarked for such service. Last summer we promptly answered the request of the United Nations for specially qualified personnel in signals, communications, air transport, and emergency food provisions, for service in the Congo. Our Canadian unit is there with the United Nations force today.

Like you, we have taken an active interest in the welfare of the underdeveloped countries. Because of our association with the Commonwealth, we have concentrated our aid through the Colombo plan on Commonwealth countries such as India, Pakistan, and Ceylon. I underline these activities on the part of Canada because they illustrate our understanding and appreciation of the much greater responsibilities you people in the United States have assumed and to indicate that within the means of our smaller population, we are trying to carry our share of the load in the common cause.

We know that the preoccupations of the American people are with the world, and in particular with the troubled spots of the world, which means that you don't have much time left over for following Canadian affairs. On the other hand, with our 18 million people alongside your 180 million, you can understand that our economy is much more directly affected by your economy than yours is by ours. That is why Canadians are diligent students of your politics, your policies, your business indices and your employment figures. Just as you are doing, we are pursuing our own domestic programs for the reduction of unemployment, and it is appropriate that I should refer to the current economic position in Canada from which some of our problems arise.

Trade between Canada and the United States is the greatest between any two countries in the world and represents a quarter of the trade you do with all the rest of the world put together. Our present deficit on current account with you is greater than our total trade with the world was when Kiwanis dedicated the Vancouver Monument in 1926. In the last 4 years this deficit has run annually between $1 billion and $1.5 billion. Your Government is concerned about your

balance of payments and an outflow of gold. If we translate our deficit figures into your population figures 10 times as great as ours and your volume of production, 14 times ours, you would then visualize that our deficit in our trade with you is the equivalent of an American deficit in international accounts of between $10 billion and $20 billion. Your actual deficit is now approximately $3 billion. Under these circumstances you can see why we are concerned when steps taken to improve your position cut into our trade with you and threaten to increase this huge deficit of ours.

I know that tossing around billions the way I have been doing is not only confusing, but boring. So instead of saying that 18 million Canadians last year bought $660 million more goods from you than 180 million Americans bought from us, let me try simpler totals. In 1960, every Canadian spent $205 for American goods, while you reciprocated by each buying $17 from Canada. The Canadian figure would have to be upped sharply if we included our $100 million deficit in the tourist flow between our countries. We have borrowed a lot of money from you and our interest payments are running close to $500 million a year. Fortunately, a good deal of this is reinvested. But our total deficit with you, counting in all the totals, is, as I said before, over a billion dollars a year.

In Canada we well understand your concern over your balance of payments with the world, because it is only 10 or 12 years ago that we had a similar experience. In the aftermath of the war we made substantial loans to other countries to assist in their rehabilitation, to the point that we became overextended and had to adjust, to live within our means. We had to depreciate our dollar and that was when you received a bonus of 10 percent when you came over to see us and changed your money into Canadian dollars.

With many adjustments and an improvement in our economy, we were able later on to free our dollar from exchange control. In recent years we have not been losing gold, as you have been losing gold, because investments made by Americans in Canada have not only offset our trade deficit, but have kept the Canadian dollar higher than the American dollar. The Canadian dollar, to the great joy of our Government and our exports, has been dropping and no one can say where it will be when you visit Canada in July. A high dollar makes it easier for you to increase your sales in Canada and harder for us to sell to you. The value of the dollar is not fixed in Canada, but in the exchanges of New York and if you find your dollar only worth 99 cents in Canada, don't blame the Canadians. And remember also that if a Canadian should try to cash a dollar in Milwaukee, he would be lucky to get par and almost certainly Canadian silver would not be accepted at any price.

While you have been trying to stop the outflow of gold, we have been doing our best to increase our exports and narrow the gap that exists in our trade with you. Incidentally, no part of the United States sells more to Canada than the Milwaukee-Chicago area which gets more than a quarter of the biggest export business the world has ever known.

We, for instance, are trying to increase our oil exports to you in the Pacific Coast area and in sections of the Midwest lying near the border. We are now providing 1 percent of your total oil consumption. If we reach our goal, our total would still be under 2 percent and would be replacing crude coming from other countries.

In the period of rapid expansion, our industrial plant has been temporarily overbuilt and there is not the same reason to encourage foreign investment to come to Canada. For this reason, our Government acted in December to remove the inducements for outsiders to invest in Canada. Foreign capital is now in exactly the same position as Canadian capital. In some areas in the United States, this action was first interpreted as an attack on American investment. This is now much better understood. Your able new Ambassador to Canada, Mr. Livingston Merchant, recently assured the Senate Foreign Relations Committee that the Canadian legislation simply meant the removal of previous incentives to attract foreign capital. Likewise, our Minister of Finance, the Honorable Donald Fleming, who spoke in Chicago just a few weeks ago, clarified this point and stressed as strongly as he could that there is no desire on Canada's part to interfere with the creative investment of American or other outside capital in Canadian industry and commerce.

For some years the Canadian-American Committee, a group of more than 40 businessmen from both countries, has been operating in the spirit of Kiwanis, to dispel some of the misconceptions which lead to bad feeling on both sides of the border. They finance research teams from both countries, who, after detailed investigation, present factual reports which are given wide distribution in pamphlet form. The last report issued under the title, "Policies and Practices of U.S. Subsidiaries in Canada," gave American companies, on the whole, a good bill of health as Canadian citizens. They found that only a few U.S. firms were bad actors in Canada. On the matter of contributions to charity and to education, they reported that subsidiary firms contributed, but they also reported that the custom of industry supporting charitable drives was more common in Canada than in the United States.

Another report, issued recently by the Canadian-American Committee, gave Canada a clean bill of health in trade dealings with Cuba. The Committee found that "the Cuban Government and the Cuban press have tried to create the impression that trade with Canada will expand greatly and to exploit frictions in Canadian-American relations. The Committee added: "This impression is false and this propaganda must be recognized for what it is."

Stories from Havana have led to a number of editorials in a good many U.S. newspapers, criticizing the Canadian position. The report noted that Canada had changed its export system to prevent the transshipment or bootlegging of United States goods through Canada to Cuba.

The final conclusion of the businessmen was: "No serious conflict of views currently exists between the Canadian and United States Governments with respect to present differences in trading relationships with Cuba. To avoid any such conflicts in the future and to minimize the danger of any serious frictions in Canadian-American relationships over Cuba, close consultation between the two Governments is necessary, and the fullest possible understanding by the people of both countries is essential."

As an eager reader of American newspapers, I am happy to note the prevailing friendliness of comment about Canada. I have found this to be particularly true of the Milwaukee Journal, and the Milwaukee Sentinel, which have done a splendid job in interpreting Canadian affairs. Once in a while a critical note appears in other places and sometimes this is based on incomplete reports of what is happening in Canada. I am thinking at the moment of comments on the Commission which is examining complaints that the whole Canadian magazine industry faces extinction because of competition from American magazines. I have seen this described as an attempt by Canadian magazines to put a tariff barrier against American publications and described as a manifestation of Canadian nationalism.

When faced with criticism of the United States at one of the hearings, the chairman of the commission, Mr. Grattan O'Leary, editor of the Ottawa Journal, interjected that Canadians should get down on their knees daily to thank God that they had the United States as a neighbor.

The Commission is dealing with methods of competition. The main complaint has been about a couple of American magazines who import their American editorial content, label the edition Canadian and then sell advertising in Canada at a rate lower than Canadian magazines can offer. This has been referred to by witnesses as dumping. There has, as yet, been no report by the investigating commission. Throughout the hearings, there has been no suggestion of Canada erecting any kind of barrier to the free flow of thought across the border.

I have been talking for some time about difficulties that have cropped up in the more complicated relations which have developed between our two countries in the years since Kiwanis on both sides of the border placed such emphasis on friendship. Most of these problems would cease to irritate if the whole story were told in understandable language.

Difficulties are always newsworthy, but a friendly handshake scarcely makes a photograph that has reproducible value. While there have been differences between our countries, our two Governments have never been as closely linked. The friendly ties that developed between Ottawa and Washington during the Eisenhower administration have been continued with the Kennedy administration. The Columbia River Treaty, which opens an international power development greater than the seaway, was the last treaty of the old administration and President Eisenhower invited Prime Minister Diefenbaker to come to Washington and sign it with him. It is indicative of the amount of business between our two countries that the first treaty signed by the Kennedy administration was signed with Canada.

Canadian and American parliamentarians have just met in Ottawa in the only Committee of the kind Congress has ever set up. There was a frank exchange of views.

Canadians from coast to coast welcomed the appointment of Livingston Merchant as your Ambassador to Ottawa. No American diplomat is more familiar with Canada and his nomination was cheered by press and government leaders alike. Before the end of March, three of your new Cabinet members will sit down with three of our cabinet to discuss economic problems. You have no similar consultation machinery with any other country.

In the midst of the pressures of his first month in office, President Kennedy invited Prime Minister Diefenbaker to come down to Washington for lunch and a chat, the first invitation extended to the head of another government. The Prime Minister had nearly 3 hours with the President and was back in Ottawa for dinner. No bands, no parade, no fuss was involved. A new and comfortable pattern was created of a business talk with only six people sitting in and no protocol considerations to waste time. This is something that can only be done by friendly neighbors.

There you have it, gentlemen. Who are the bridgebuilders? I have already suggested that Kiwanians and others who take the trouble to make individual acquaintances and friendships with their counterparts on either side of the border are in the front ranks of the builders. Many of you have been doing this for years. But when you go to Toronto in July or on any other occasion, I hope you won't be content to settle for the easiest forms of expression of international good will. Talk to your

Canadian counterparts and if you look for it you will find among Canadians a strength of loyalty to their country equaled only by the strength of your devotion to the United States. You will find they cherish their independence just as you cherish yours. Like you, they debate vigorously among themselves what is in the best interests of their country and it is only natural that their expressions of opinion are at variance among themselves from time to time, just as they may differ occasionally from yours. That is why the bridges that have already been built will continue to need maintenance and repair.

In this work a great responsibility falls upon the press for objective reporting and editorial interpretation in the field of international relations. Theirs is the task of admonishment when things go wrong and of encouragement when all goes well. It is not a light responsibility. Those who achieve it hold a unique position among the bridgebuilders.

Likewise our businessmen. Their role in trade, investment, and in their company operations abroad gives them the power to make or to destroy the image of their country. I have found businessmen as a class to be acutely conscious of their international, as distinct from their corporate, responsibilities. What better illustration could you ask than that of the Canadian-American Committee to which I have already referred. These are bridgebuilders indeed.

I have already mentioned the contacts among our political leaders. President Kennedy will soon be making his first visit to Ottawa to continue the talks with our Prime Minister that started in Washington. Today, Prime Minister Diefenbaker is in London representing Canada at a meeting of the Commonwealth Prime Ministers. There the other Prime Ministers and he will be received by our Queen. I don't believe that those of you who saw and heard her in Chicago, nor Her Majesty, would consider it lese majesty if we count her among the bridgebuilders too.

PROPOSED AMENDMENTS TO THE WILDERNESS BILL

Mr. CHURCH. Mr. President, again this year, the Senate Interior and Insular Affairs Committee has held hearings on the proposed wilderness bill. The measure now before the committee, S. 174, is a significantly modified version of legislation which has heretofore been proposed on this subject. I believe, however, that further amendments to the bill are advisable, and it is my purpose today to introduce for printing and reference to the committee three amendments which seem to me to be desirable if wilderness legislation is to deal realistically with the problems of Idaho and of other Western States, where extensive areas of public domain are proposed for inclusion in the wilderness system.

Before discussing these specific amendments, I wish to make some general comments on the basic concept of wilderness legislation. I think there is general agreement that some form of wilderness preservation legislation will be enacted—if not this year, then one year soon; if not by this Congress, then perhaps by the next. There is, however, great concern in my State about proposals to lock up in a wilderness system some three million acres of public land presently classified as primitive area. This concern is certainly understandable, when it is noted that three of our most basic industries—grazing, mining, and lumbering—depend, for their continued vitality, upon the wise use of the resources of the public domain.

Viewed from the perspective of the Western States, wilderness legislation is desirable only on the condition that it does not unwisely stifle these basic industries, upon which the prosperity and economic growth of our States and region depend.

It should be noted in this connection that under present law, primitive areas can be designated as wilderness by a purely administrative decision. The Forest Service has recently concluded a series of hearings in Idaho on a proposal to do precisely this in the Selway-Bitterroot region. One virtue of the wilderness bill is that it would require a review by the Congress of all proposals to add new lands to the wilderness system. There are ambiguities, however, in those provisions of the bill which establish these procedures for congressional review. And it is to these, in part, that the amendments I am proposing will be directed.

FIRST AMENDMENT

As presently drafted, S. 174 would incorporate into the wilderness system all of those areas within the national forests now classified as primitive areas. The bill would require an administrative review of these lands, followed, within 15 years, by a Presidential recommendation as to whether they should be permanently retained within the wilderness system. Provision is made for the Congress to disapprove any such Presidential recommendation. The bill, however, leaves such lands in the wilderness system even though a Presidential recommendation concerning them is disapproved by the Congress. Thus, as presently drawn, the provision for congressional review is little more than a mockery.

In the course of the hearings, recently concluded, I asked officials of the Forest Service to draft language which would spell out the service's understanding and intent with respect to this precise situation. In response to this request, the Forest Service has submitted amendatory language which would make it clear that the President may resubmit a recommendation within 2 years after it has been disapproved by the Congress, with appropriate modifications. The amendment further specifies that land covered by any Presidential recommendation, which is disapproved by the Congress, without a resubmission in modified form, or again disapproved by the Congress after being resubmitted in modified form, shall cease to be part of the wilderness system, and shall then revert to ordinary national forest land. It also specifies that any lands presently classified as primitive areas, although included in the wilderness system by the terms of the bill, will cease to be a part of it at the end of 15 years, if a Presidential recommendation for permanent inclusion has not been submitted to the Congress within that time.

This amendment has, I think, two distinct advantages over the present language of the bill. First, it would broaden the scope, flexibility, and discretion of congressional review over the process by which primitive areas can be accorded permanent wilderness classification, since it is to be presumed that the Congress, if it disapproves a given Presidential recommendation, will furnish guide lines to be used by the President in modifying the proposal for resubmission.

Second, this amendment would insure that no primitive area would become a permanent part of the wilderness system without prior review and approval of the Congress. Under the amendment, any land now designated as primitive area which is finally rejected by Congress, or not submitted for congressional review within the review period, would revert to ordinary national forest.

SECOND AMENDMENT

The second amendment deals with the procedure by which congressional disapproval of a Presidential recommendation for making an area a permanent part of the wilderness system may be registered. As presently drafted, S. 174 requires a concurrent resolution approved by both Houses of Congress in order to prevent a Presidential recommendation from taking effect. This represents, it seems to me, an unwarranted curtailment of congressional authority. In the usual situation, both Houses of Congress must concur in enacting legislation, which then must be signed by the President, before the status quo may be changed in any area subject to congressional jurisdiction. This means, in net effect, that either the House of Representatives or the Senate can separately veto ordinary legislative proposals. It is apparent, however, that neither House, under the terms of S. 174, could separately veto a Presidential proposal to permanently add new land to the wilderness system. This could be accomplished only by a concurrent resolution—that is, by the joint action of both Houses. Obviously, this procedure seriously dilutes the congressional power. My second amendment, therefore, would restore to each House its intended authority by providing that a Presidential recommendation would not be effective if either House of Congress, by a simple resolution, expressed its disapproval within the time allowed.

It is interesting to note that this amendment incorporates the President's own proposal for congressional review and disapproval of farm programs, as outlined in his recent message to the Congress on this subject, and was the formula contained in the first wilderness bill, introduced several years ago.

THIRD AMENDMENT

The third amendment has to do with the special problem of mineral exploration within established wilderness areas. The bill prohibits any commercial activity within the wilderness system. Much of the land now classified as "primitive," but which would be incorporated into the wilderness system, pending congressional review, has not been exposed to even the most rudimentary exploration for mineral resources. The bill provides, it is true, that the President may grant special permits whenever, in his judgment, the national interest will be

served thereby, for either mineral exploration or for actual mining activities within the wilderness system. It closes the door, however, on the kind of prospecting apt to be needed to develop information on which the President could base a sound judgment as to where ore deposits may exist within wilderness areas, to justify further exploration leading to actual mining, when the national interest so requires.

Testimony at the hearings developed a strong case for allowing geological mapping and certain kinds of mineral prospecting in wilderness areas, so that intelligent estimates could be made as to the likelihood of success, if defense requirements, or other overriding considerations, indicated the advisability of full-scale prospecting or mining.

Accordingly, I have drafted an amendment designed to permit those kinds of mineral prospecting, within the wilderness system, which would not, in fact, do violence to the wilderness concept.

The PRESIDING OFFICER. The time of the Senator from Idaho has expired.

Mr. MANSFIELD. Mr. President, I yield 2 more minutes to the Senator from Idaho.

The PRESIDING OFFICER. The Senator from Idaho is recognized for 2 minutes.

Mr. CHURCH. Mr. President, in proposing these amendments, I do not foreclose judgment on other amendments which may be offered in the committee. But I believe these three amendments would do much to adapt S. 174 to the reasonable requirements of our Western economy. I think they would extend a further measure of protection to the legitimate interests of the Western States, while leaving intact effective procedures for creating a wilderness preserve, which is the laudable objective the bill is intended to serve.

Therefore, Mr. President, I send to the desk three amendments to S. 174, and ask that they be printed and appropriately referred. I also ask unanimous consent that the text of each amendment be published in the RECORD immediately following these remarks.

The PRESIDING OFFICER. The amendments will be received, printed, appropriately referred; and, without objection, the amendments will be printed in the RECORD.

The amendments were referred to the Committee on Interior and Insular Affairs, as follows:

On page 4, line 19, insert the following: after "section.": "The President may modify any recommendation as to which the Congress has declared its opposition in accordance with subsection (f) of this section and resubmit his modified recommendation within two years after the approval of the concurrent resolution of opposition. Such modified recommendation shall become effective subject to the provisions of subsection (f) of this section. Any area covered by a recommendation of the President that has been opposed as provided in subsection (f) of this section concerning which no modified recommendation is submitted by the President within two years, or as to which a modified recommendation is opposed as provided in subsection (f) of this section, shall cease to be a part of the wilderness system and shall be administered as other national-forest lands. Any area with respect to which no recommendation for its continued inclusion within the wilderness system is submitted to the United States Senate and House of Representatives by the President within fifteen years following the enactment of this Act shall cease to be a part of the wilderness system and shall be administered as other national-forest lands."

On page 8, delete line 24 beginning with "the", delete line 25, and on page 9, line 1, delete "posed to such recommendation."

On page 8, line 24, immediately after "adjournment" insert the following: "neither the Senate nor the House of Representatives shall have approved a resolution declaring it is opposed to such recommendation."

On page 9, line 1, delete "concurrent".

On page 14, insert the following after line 15:

"(8) Nothing in this Act shall be construed to prevent, within the wilderness system, any activity for the purpose of gathering information about mineral resources which is not incompatible with the preservation of the wilderness environment."

RAMPART CANYON DAM ON THE YUKON

Mr. GRUENING. Mr. President, this morning's New York Times carries an excellent dispatch from Anchorage, Alaska, dealing with the progress of the studies for the great hydroelectric dam at Rampart on the Yukon.

This is the largest hydroelectric site on the North American Continent. Construction of the dam there will go far to advance the development of Alaska by making available tremendous quantities of low-cost hydroelectric power.

The preliminary estimate of the Corps of Engineers is that this cost will be as low as 2 mills a kilowatt-hour at the bus bar and with modern methods of transmission should be available at tidewater at about 3 mills.

As the article in the New York Times correctly states: "Alaska is power hungry." Light and power needs for home users alone have increased vastly in the last 10 years, and almost every area now is in imminent danger of power shortages. Much more will be needed for industry.

Even assuming the most rapid studies, which are bound to be extensive and should be for an undertaking of such scope, and assuming thereafter, authorization and appropriation by the Congress of a project which has had the endorsement of this administration, other lesser power projects will be needed to take care of widespread local Alaska power needs. They are all having intensive study, and appropriate action will be sought for them.

The studies for Rampart will, of course, include the basic engineering studies which are now underway, at the Rampart Canyon, the important economic studies for the carrying out of which negotiations are now in progress between the Corps of Engineers and nationally known firms of consultants, particularly experienced in power development, the wildlife and fisheries studies which will involve both the anadromous fish—the salmon—now going up the Yukon, and the enormous possibilities for the stocking of new species of fish in the 10,000-square-mile lake which will be created back of the dam.

In addition to that, there are the problems of relocation, although I think we are fortunate that with the exception of perhaps three small communities, this area is largely uninhabited and it will not face the heavy relocation costs incurred by dams and power projects in the 48 older States, where land values, because of long time settlement, have greatly increased and where railroads and highways have to be relocated. There are no railways and highways in this area of Alaska.

In addition to the great potential fisheries resource of the lake to be created are its recreational possibilities. It is an interesting fact that over 20 million people a year are thronging to the reservoirs and lakes created by the Bureau of Reclamation in the 17 Western States. They include fishermen, hunters, and water sport enthusiasts who take advantage of over 150 manmade lakes and storage reservoirs, some small and some of vast extent. The potentials of this large lake back of Rampart stagger the imagination. It has been estimated by climatologists that it will raise the winter temperatures of this subarctic region substantially, extend the growing season, and indeed vegetable raising, with long days of more than 20 hours of sunlight is a real potential.

These studies bid fair now to be adequately financed. The revised budget of the Kennedy administration, which has tripled in this one item the estimate of the Eisenhower administration—from $100,000 to $300,000, if this latter figure is approved by the Congress—now, with the $273,750 previously appropriated, will permit these studies to go ahead with all energy.

An excellent eight-person advisory board has been appointed by the Corps of Engineers. This Board will counsel Col. Christian Hanburger, the Alaska district engineer, on the development and review of economic studies for the Rampart Canyon project. Those on the Advisory Board are: Dr. William R. Wood, president of the University of Alaska; Mr. William T. Kegley, president of the First National Bank of Juneau; Mrs. Irene Ryan, mining engineer and geologist; Stanley McCutcheon, attorney and former speaker of the House of Representatives of Alaska; Frank Mapleton, mechanical engineer of Fairbanks; Dr. Edward Steve Shaw, economist, Stanford University; Mr. Samuel B. Morris, consulting engineer of Los Angeles, and Mr. Gus Norwood, executive secretary of the Northwest Public Power Association.

No one project will be more beneficial for Alaska than this and likewise it will be helpful to the entire Nation. It will equal the largest dams already constructed and others being constructed by the Soviet Government in European Russia and Siberia, which a committee of Senators, of whom I was one, had the opportunity of seeing a year and a half ago. This project when completed will deliver a body blow at the high cost of living in Alaska, which has presented, and continues to present, a serious ob-

stacle to industrial development and settlement. Abundant low-cost power is the answer.

I ask unanimous consent that the article from this morning's New York Times, to which I referred previously, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From The New York Times, Mar. 28, 1961]

ALASKA TO WEIGH BIG DAM PROJECT—SURVEY SET ON HARNESSING YUKON RIVER TO PROVIDE MUCH-NEEDED POWER

ANCHORAGE, ALASKA.—Work is to start this year on an economic study of Rampart Canyon, the proposed site on the Yukon River for what may become North America's greatest hydroelectric power project.

An eight-man advisory board, comprising personnel from Alaska and other Western States, has been set up and a survey will be made by a company experienced in the economic analysis of both domestic and foreign markets.

Congress has appropriated $225,000 for this fiscal year for investigation of the Rampart project. Former President Dwight D. Eisenhower's budget would add $100,000 by July 1.

The study will be divided into three principal phases: the economic or market study, the study of dam structure and investigation of the reservoir.

The U.S. Fish and Wildlife Service will assist in the reservoir study.

THREE DAMS PROPOSED

Engineers say that hydoelectric power is Alaska's inexhaustible resource, and that of the Yukon. Their combined capacity is estimated at 9,700,000 kilowatts.

Three strategic spots have been investigated by Federal survey teams. And while Kaltag, Alaska, at mile 483 on the Yukon River, and Woodchopper Creek, at mile 1149, could together have a potential output of 5 million kilowatts, it is the site at Rampart Canyon that appears to offer the most immediate promise.

Rampart Canyon is at mile 756 from the Yukon's mouth. It has a drainage area of about 200,000 square miles and an average annual runoff of 85,500,000 acre-feet, or a controlled flow of some 118,000 cubic feet per second.

At the proposed site, a dam 290 feet high would block the mouth of the Yukon flats and hold back the water in a great man-made lake covering an area of 10,000 square miles.

The controlled flow from this would generate an industrial power capacity of 4,700,000 kilowatts.

DEMAND FOR POWER RISES

Alaska is power hungry. Light and power needs for home users alone have increased in ratio to the 76 percent population increase in the last 10 years. Many of Alaska's more important minerals require large amounts of electrical energy for the electrolytic processes used in preparing them for the market.

Harnessing the Yukon could develop Alaska into a low-cost power State, which would invite the expansion of industry, new seafood cannery operations, small industries, woodworking and pulp plants and exploitation of more natural resources would probably follow the availability of electrical power.

Another benefit derived from the construction of the dam itself would be the control of the annual floods along the Yukon River.

On the other hand, a solution would have to be found to the problem of the migratory salmon. Personnel of the Fish and Wildlife Service are already at work on this in collaboration with their Canadian colleagues.

EAST-WEST CULTURAL AND TECHNICAL CENTER

Mr. FONG. Mr. President, the 86th Congress of the United States appropriated funds for the establishment of the East-West Cultural and Technical Center at the University of Hawaii in the State of Hawaii. The primary objective of the East-West Center, as it is popularly known, is the increase and development of mutual understanding between the peoples of the countries of the Pacific area. The East-West Center program was inaugurated in February of this year with 100 scholars—9 Americans and 91 students from 15 Asian and Pacific nations. The University of Hawaii has just published a progress report on the East-West Center and I ask unanimous consent to have it printed in the body of the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT ON PROGRESS OF THE CENTER FOR CULTURAL AND TECHNICAL INTERCHANGE BETWEEN EAST AND WEST

INTRODUCTION

The Mutual Security Act of 1959, Public Law 86–108, in chapter 6, declared that it is the purpose of the Congress to establish in Hawaii a Center for Cultural and Technical Interchange Between East and West, and that the Secretary of State should submit a plan and program for this purpose. On December 31, 1959, the Secretary of State submitted his report. Chapter 7 of the Mutual Security Act of 1960, Public Law 86–472, which was signed into law on May 14, 1960, authorized the establishment and operation of the center, and the appropriation of funds therefor. By Public Law 86–678, dated August 31, 1960, $10 million was appropriated to enable the Secretary of State to initiate the center, the money to be expended "by grant to any appropriate agency of the State of Hawaii."

Prior to the appropriation of August 31, extensive plans for the organization and operation of the center had been prepared by the University of Hawaii and a committee appointed by the Governor of Hawaii. The sum appropriated in 1960 was designed to provide for the first year of the center's operation in accordance with these plans, and they were incorporated as a part of the grant-in-aid agreement between the University of Hawaii and the Department of State, which placed responsibility in the university to carry out the establishment and operation of the center. This agreement became effective as of October 25, 1960, and pursuant thereto, the first installment of funds was received by the university on November 8, 1960.

With the grant-in-aid agreement between the University of Hawaii and the Department of State, the Center for Cultural and Technical Interchange Between East and West became a reality as an official and integral part of the university, and the center's various institutes and divisions were placed in operation.

OBJECTIVES OF THE CENTER, AND THEIR RELATION TO THE UNIQUENESS OF HAWAII

Of all of the natural resources upon which the world depends for its survival and its sustenance, none is so important as its people. Of all of the means for making possible the fullest and wisest realization of the potentialities of this basic resource, none offers such promise as the free interchange of information and ideas which will encourage mutual understanding between peoples. Wherever men can face one another as peers and exchange their considered views on the vital issues of their lives, the constructive potentialities for cooperative peace increase dramatically. Whenever people can share knowledge and information basic to these issues, they establish sound foundations upon which such interchanges can occur most fruitfully, and at the same time provide the means for effective thought and action.

It is to accomplish these ends that the Congress has provided for the establishment of the Center for Cultural and Technical Interchange. As its primary objective, the center seeks to increase and develop mutual understanding between the peoples of the countries of the Pacific area. As a parallel objective, the center seeks the betterment of American relationships with foreign peoples, an objective consistent with and, in fact, dependent upon the first. These are to be effected primarily through two major groups: one, consisting of young people of high intellectual ability who possess leadership potentialities, and two, those mature men and women who are already making significant contributions to their communities in various fields.

Hawaii stands as a brilliant symbol of the day by day success of the democratic processes as they respond to the creative impact of varied cultural and racial groups. Our newest State provides a tangible demonstration of the cooperative accomplishments of peoples of diverse origins, working together as freemen, with mutual respect and consideration. It represents the reality of the American dream, not as a bland assimilation of differences, but as a fulfilled promise in the useful employment of diversities for mutual good. Indeed, Hawaii's people constitute a visible proof that men can live together in harmony. Against this background, and with the knowledge that contact under propitious circumstances between people of different nationalities aids in bringing about understanding, Hawaii has been designated as uniquely appropriate to the site of a center to facilitate the interchange of ideas between the countries of the Pacific area and the United States. This establishment of the center in the Hawaiian Islands, permits utilizing for the benefit of the entire Nation, the unusual resources of the University of Hawaii, the several agencies of the State, the schools, museums, private institutions, and the innumerable services of an alert, informed, and active citizenry.

The promise of the Center for Cultural and Technical Interchange Between East and West is not formed on idle speculation or casual good will, but grows naturally out of Hawaii's geographic location, its refreshing climate and beauteous vistas, its combination of an innately friendly people and an extraordinary social mixture of several nationalities. In this setting, the State University has taken advantage of challenges and opportunities provided by its living community laboratory to play an active role in the development of the democratic society which is its base and its support.

When the Mutual Security Act of 1959 directed the Secretary of State to prepare a program for a Center for Cultural and Technical Interchange Between East and West, the University was ready, on the strength of its experience and the enthusiasm of its interests, to assist in the planning of a series of proposals to achieve the purposes of the act, and subsequently to effectuate them by assuming responsibility for the State of Hawaii to carry out the establishment and operation of the center.

ORGANIZATION OF THE CENTER

The center consists of two principal units: one, an International Training Facility, and the other, an International College. Auxiliary to these, a number of other agencies assist in the carrying out of the purposes of the center.

The first major unit constitutes an on-the-job or in-service training agency, designed to expand and expedite the extensive training programs which Hawaii already has in operation in the educational facilities, industries, and governmental agencies of the State. Through the services of its International Cooperation Center, the State now offers over 100 courses especially designed for foreign participants. These include programs in agricultural extension methods, coffee production, livestock nutrition, pest control, soil conservation, home economics, land use, urban redevelopment, water resources, highway construction, telecommunications, economic planning, industrial administrative practices, business policies, tourism, personnel administration, public health nursing, sanitary engineering, vocational education, school planning and administration, traffic safety, delinquency control, and rehabilitation of the handicapped. As of March 1, 1961, the center awaited the transfer to it of the contract existing between the International Cooperation Administration and the State's International Cooperation Center. In the previous 4 years the State assisted over 3,000 foreign participants from 30 different countries; with the transfer of the ICA contract and the entering into additional arrangements for the sponsoring of participants by other agencies such as the World Health Organization, the United Nations, and the Food and Agricultural Organization, it is planned to provide for an increase in numbers of trainees to as many as 1,000 participants a year, an extension in their duration of stay, and the addition of various new programs and in-service courses.

The second division of the Center for Cultural and Technical Interchange Between East and West consists of an International College, concerned principally with affairs pertaining to higher education. This unit deals both with students and mature individuals who occupy positions of leadership in their home countries.

The International College enables the administration of scholarship grants for students from Asia and the Pacific to undertake studies in the regular courses of the university for which they are fitted. Most of these selected young people will be graduate students concentrating upon disciplines of greatest need in their own countries, but the ratio of graduate to undergraduate students will be adjusted according to such need. A much smaller, but significant number of similar fellowships are also available for American students concentrating on Asian studies. Essential to the learning experience provided by these scholarships is the opportunity of both groups to share study and living experiences in a situation where barriers to friendship and communications are minimal or easily removed. By 1966 plans provide for handling 2,000 scholarship students in residence at the center, all enrolled in regular academic programs of the university.

In addition to the normal curricula of the university available to these scholarship students, several special services and programs, with content specifically devised for their benefit, have been developed in their support. These are integral parts of the center's program and essential to its success. First is an English Language Institute to assure competent training and assistance in the use of English to facilitate the studies and the social contacts of all participating students so that language difficulties will not bar able students from learning in the areas of their interest or becoming isolated without easy means of communication. The International College also includes an American Studies Institute to bring together an already substantial amount of research and a number of courses dealing with American traditions and institutions, and to focus attention on the history and character of American life. The Asian studies program and the overseas operations program of the university, established prior to the creation of the center, have been transferred to the college, and their activities integrated with those of other center agencies. Finally, the college is assisted by the foreign student counseling, testing and guidance, health, and housing services of the university in dealing with problems of immigration, health, recreation, and personal well-being, all to insure the general welfare of the students at the university under center scholarship.

The center is not alone designed to spread knowledge among student leaders, but has been devised to capitalize on past experience in providing opportunities for mature scholars and leaders to consider together the results of their research and thought. This part of the International College's responsibility is lodged in the Institute of Advanced Projects. Under this program a number of scholars, leaders, and specialists from the Asian and Pacific countries and from the United States will be brought together at the university to participate in joint research efforts, special conferences, seminars, and discussion meetings. The university's success in sponsoring the East-West Philosophers' Conferences provides an example of the contribution to mutual understanding which will flow from the institute's activities. A translation bureau to assist in the preparation of material in scholarly journals and to open avenues for communication between the people most deeply concerned with basic issues and problems, will operate as a necessary adjunct to this institute.

The organization of the center is sufficiently flexible to accommodate other possible programs as needs arise. The Center is designed to offer an ideal organization and locale for studies and experiments in the education of Asian students which will be of value to all educational institutions.

INTEGRATION OF CENTER WITH UNIVERSITY OF HAWAII

After careful study of several alternatives, and upon consideration of the extensive resources and plans of the university, both the Department of State and the committee appointed by Governor Quinn concluded and recommended that the center be established as an integral part of the University of Hawaii. All recommendations for conduct of the center, and all actions taken to implement them, have been developed with this basic concept in mind.

The university has had long experience and serious interest in Asian affairs and in subject areas applicable to Asia. It introduced its first courses having to do wholly with Asia 40 years ago, and in the intervening years has expanded those in number beyond 80, in addition to many more which deal in part with Asia.

The university has developed a good oriental library, and has, over the years, conducted numerous institutes and conferences representing its interest in Asian affairs. Most noteworthy of these include an International Race Relations Conference held in 1954, and three successive East-West Philosophers' Conferences held at 10-year intervals during the last 20 years.

Over one-fourth of the faculty of the university is made up of men and women of Asian extraction, and the remainder includes a large number of scholars and teachers who have conducted research pertaining to Asia, plus many others who have traveled in Asia on grants and in various kinds of service to the university. The university has conducted within recent years a most successful program of technical teacher training in Thailand through a contract with ICA.

In addition to such matters as these, the university has developed a number of teaching and research programs which are of special appropriateness for Asian students, including marine biology, entomology, tropical agriculture, and various social studies. The Agricultural Extension Service and the agricultural experiment station of the university provide experience with terrain, soil, crops, climate, and other natural conditions which parallel those to be found in many parts of Asia. This is equally true of various other programs of study in the university.

Of equal importance are numerous courses and extensive research pertaining to the history, culture, traditions, government, and economics of the United States, plus significant programs in the arts and humanities and the natural and social sciences, as well as various technological training courses such as engineering. The university is about to construct a Health Research Institute, partially assisted by a grant from the National Institutes of Health, and has just received a grant from the National Science Foundation for the completion of plans for an Institute of Geophysics.

The university thus provides a competent faculty and staff of diverse abilities, a large physical plant of libraries, classrooms, laboratories, and offices, a land area for basic housing units of the center, and a useful and operable educational and administrative framework which could be duplicated only at inordinate cost. Furthermore, integration with the university assures immediate and continual interchange of information and ideas, provides necessary educational prestige, and makes possible the closest liaison between the center and its activities and the educational institutions of the United States and other Pacific countries.

While the university and the community it represents are offering their resources in the national interest for the development of the center and assistance in the furtherance of the center's programs, the center requires some new physical facilities for its operation in addition to those now available, and substantial funds for scholarships and operations. Chiefly, structural needs consist of dormitories and food services, with some space for library, classroom, research, conference, and administrative units. Planning for facilities has proceeded on the basic premise of enabling and encouraging the integration of international students with the regular student body and the community.

FINANCIAL SUPPORT OF THE CENTER

The State of Hawaii has appropriated through its legislature $803,000 for a dormitory facility, a sum of $124,000 for administrative expenditures in connection with planning the center during 1960–61, $54,000 for the Asian studies program and oversea operations program, which are integral parts of the center, plus smaller sums already employed for the operation of an interim administrative staff. It has also provided funds for studies of campus development and preliminary site plans and architectural studies for the center. The University of Hawaii is contributing its multiple physical facilities as well as the services of its library and its faculty and staff, and is providing a land area of 21 acres valued at about $2,740,000 on its main campus for the special housing and administrative facilities of the center. The university is also undertaking necessary rearrangements of its campus, as by removing faculty housing so as to permit the construction of access roads to the center site, so that an additional $195,000 in land value is being made available.

Under the Department of State Appropriation Act, 1961 (Public Law 86–678, 86th Cong.), the Federal Government has appropriated $10 million to initiate the establishment of the center and to provide for the first year of the center's operation. The

funds made available to the University of Hawaii under grant from the Department of State will be expended as follows:

1. Operational costs of the center	$449,025
2. Scholarships and grants	1,390,000
3. Capital improvements	8,160,975
Total	10,000,000

The original "Recommendations for the Organization and Operation in the Center for Cultural and Technical Interchange Between East and West in Hawaii" contemplated a full fiscal year's operations, but as provision had to be made for the time required to recruit the initial staff for the center after the agreement between the Department of State and the University of Hawaii became effective in late fall, 1960, expenditures in fiscal year 1961 for operations had to be scaled down proportionately. With the exception of the International Training Facility, on which the center was awaiting transfer of the contract between ICA and the State of Hawaii, by March 1, 1961, all agencies of the center had been activated, interim directors and staff appointed, and all programs of the center were in operation.

The statistics of financial support do not disclose the financial equivalent of the many contributions of Hawaii's citizens organized to aid in the successful conduct of the center. The Friends of the East-West Center, with a central secretariat, has established the following committees: Center needs' committee, community projects coordinating committee, membership committee, budget committee, hospitality clearinghouse committee, professional organizations interests committee, career interests committee, special activities committee, public relations assistance committee, and community education committee. The Friends' central secretariate alone has budgeted $15,000 for the balance of fiscal year 1961. Services provided to students and scholars resident of the center and to visitors concerned with the center and in Hawaii for short periods, services which will run the gamut from mere hospitality extended through greeting to extended student-foster family relationships; facilitation of observation placement in Hawaii's business, industrial, professional, and fraternal organizations; provision of funds for entertainment, an item not included in the center's appropriation, and other supplementation of appropriated moneys; and comparable activities designed to integrate center scholarship students and grantees in the unique life of Hawaii, will conservatively cost the equivalent of several hundred thousand dollars a year upon the full implementation of the center's program.

The various governmental agencies of the State already operate training programs for the International Cooperation Center under ICA contracts, and will provide expanded resources for such inservice training for the center when the International Cooperation Center is transferred. It is estimated that the Government, and the numerous private and corporate businesses and industries in the State, as well as private individuals, are now contributing over $225,000 yearly, and this will be increased when training programs are augmented under center aegis. This estimate is based upon approximately $210,000 for value of free services supplied in currently training 302 persons a year, with the balance representing the estimated value of free transportation provided in training activities, and entertainment accorded participants exclusive of the hosts' time.

SCHOLARSHIP GRANTS

Scholarships are granted to both Asian and American students to undertake courses of study within the curriculums of the University of Hawaii. Most such grants are for graduate studies, although awards are also made to well-qualified undergraduates. These scholarships provide for transportation to and from the student's home, tuition, housing, food, books, insurance, incidental fees, and small personal allowances.

Students are selected on the basis of their intellectual capacity and scholastic ability and upon their capacity or potentiality for leadership. Students from Asia are permitted to enter any of the programs of the university for which they are qualified. Students from the United States are granted scholarships to undertake studies in the Asian studies program, the overseas operations program, or any curriculum which has special reference to Asia or the Pacific, such as Asian languages, geography, history, art, comparative philosophy, and comparative government.

Scholarships are normally granted for 21 months, although some awards may be made for shorter or longer periods of time. The scholarships to Asian students for 21 months or longer include, in addition to resident studies of the university, an expense-paid study tour on the mainland of the United States, and grants to American students include an expense-paid study tour of the area of Asia or the country in Asia of particular concern in their studies. The awarding of grants is made by the University of Hawaii, and all scholarships are subject to withdrawal for reasons of health, academic failure, or misconduct.

Students must be willing to assist in various ways to provide for exchange of information about their countries through occasional lectures, class meetings, use as language informants, and in other comparable programs.

Graduate students are admitted by and to the International College as unclassified graduate students and transferred to the graduate school upon satisfactory completion of a qualifying examination admitting them to candidacy for a degree. Undergraduate students are admitted in the same fashion and transferred to one of the undergraduate academic colleges of the university after one semester and upon the showing of adequate English fluency.

At the present time, the university is assisted in preliminary screening of applications by the U.S. educational foundations and American officials abroad. Applications are delivered directly to such agents in most countries, where language tests and first evaluations are made. This cooperation by overseas officials is essential to the success of the center, although the university intends to supplement such services with its own representatives abroad as the program grows.

Applications passed by these overseas committees are forwarded to the International College at the university. The fact that an application is approved for submission to the college does not assure the award of a scholarship. Upon receipt, all applications are analyzed by the admissions staff of the college and sent to the proper instructional departments for evaluation. Each department returns the application to the dean of the International College with a report on the apparent quality of the student, an estimate of his ability to carry on studies in the department, and an indication of the capacity of the department to accommodate the student, plus a rating of the applicant in comparison with others.

Upon completion, such evaluations are presented to an all-university faculty screening committee, where final recommendations for awards are made. The dean of the International College supervises the process of screening and selection, and determines the final allocation of grants according to the objectives of the programs and the overall pattern of studies offered by the university.

Each student attending the university on an extended study grant is expected to incorporate a study trip in his program, financed by his grant. Most such trips will be for a summer, a few for a semester. The purpose is twofold: First, to provide for special studies in another university, special research in another library, or for fieldwork of importance to the individual in his studies; and second, to provide an opportunity for a study of institutions and traditions, and an acquaintance with the people and character of the country. Such travel is not mere sightseeing, and each tour is based on a substantial study program for which the student is responsible to his instructors.

While all scholarships are competitive, the university is fully cognizant of the special problems posed in countries which have developing systems of higher education, where insufficient opportunities for prerequisite education have been available. Every effort is made to include students from these areas, where competition lies between abilities rather than between levels of achievement. In some cases, this will assure the inclusion of scholarships for technical training below the advanced level customary to a university. Such training, where offered, does not of course lead to a degree of any kind.

As of March 1, 1961, 108 Asian and Pacific students had been offered scholarships commencing in February 1961, and 91 had accepted and were in residence at the center, attending classes at the University of Hawaii. The remainder had requested deferrals or for other reasons were unable to accept.

Center scholarship awards as of Mar. 1, 1961 (all February awards in residence)

	February award	September award
Australia		1
Cambodia	3	
Ceylon	2	
Fiji	3	
India	14	1
Indonesia	8	
Japan	20	1
Korea	2	
Laos	5	
Nepal	1	2
Pakistan	4	
Philippines	11	3
Singapore		1
Taiwan	12	2
Thailand	6	
Total	91	11
United States	9	3
Total	100	14

Of this total group of 100 center scholarship students in residence in the spring of 1961, 74 were men and 26 women. Division between those engaged in graduate studies and those enrolled as undergraduates was 84 and 16, respectively. For fiscal year 1962, enrollment of scholarship students (including those who started in February 1961) has been projected to increase to 375, with 300 from Asian and Pacific countries, and 75 U.S. citizens in residence under center scholarship grant, and the screening and selection procedure is well underway.

CAPITAL IMPROVEMENTS

The construction of the physical facilities is coordinated with the projected enrollment. The appropriation of $8,160,975 provides for site improvements, housing for 600 students, transient quarters and apartments, administration and food service facilities, an auditorium, and classrooms and laboratories.

Plans and specifications have been prepared for access to the site, utilities, and site improvements. Competitive bids were received on February 23, 1961, and a contract for this phase of the project has been

awarded to Hawaiian Dredging & Construction Co., Ltd. This contract will provide access to the site by June 1, 1961.

Plans and specifications for the building units are proceeding on schedule. They will be advertised for competitive bids in May, bids received, and construction contracts awarded by July 1, 1961. Not more than 12 months will be allowed for construction, so that the buildings can be completed, furnished, and ready to be occupied in August 1962 or earlier.

CONCLUSION

The Center for Cultural and Technical Interchange Between East and West has been conceived as a service to the Nation, and all plans have been prepared to encourage the use of State and National resources in fulfilling such purposes.

The following principles serve as the basis for the organization and operation of the Center:

(a) The center shall have as its primary objective the increase and development of mutual understanding between the peoples of the countries of the Pacific area. The term "interchange" in the title of the Center shall carry the greatest possible weight and be of the utmost significance in the formulation and carrying out of basic policies and operations.

(b) The center shall have as a parallel objective the betterment of American relationships with foreign peoples. This objective should be understood as consistent with and in fact dependent upon the first objective (a).

(c) The center shall encourage and solicit, indeed make paramount, the fullest mutual cooperation and participation of foreign countries and institutions as well as mainland American universities and other institutions in fulfilling its objectives.

(d) Plans for the organization and operation of the Center shall be flexible enough to be adaptable to multiple, diverse, and changing needs of the countries, students, and senior scholars and leaders involved.

(e) The Center shall actively seek, at home and abroad, foundation and private financial support for its programs and enterprises, along with assistance from existing governmental agencies and legislation. The ultimate aim shall be to reduce special governmental support and increase support from nongovernmental organizations.

(f) All awards, grants, and expenditures made through, for, or on behalf of the Center, shall be devised to acknowledge and develop the highest standards of intellectual achievement and community service in the course of human welfare.

(g) The Center shall seek to fulfill its objectives through two different kinds of people: first, young men and women who are potential leaders in their own communities; and second, men and women of established reputation and achievement.

(h) Grants to individuals shall be made to men and women of promise and ability who may be expected to make or are making a significant contribution to life in their own countries. Such people from abroad should be selected on the understanding that they will return to their own countries upon completion of studies or other assignments pertaining to the operation of the Center.

(i) Expenditures for conferences, research, and other special programs of the Center shall be planned to promote and facilitate the free passage of information and ideas, and be based on the acknowledgements of the mutual capacity and potential of participating individuals and countries.

While high academic standards are imperative, the Center has been planned to examine and utilize nontraditional or unusual, as well as traditional, educational methods and techniques in carrying out its objectives. It has been conceived in relation to and based upon the sound academic structure of the University of Hawaii, but not bound by forms inappropriate to its purposes. The Center will encourage flexibility in method and actively seek to develop new means of education and training of greatest direct benefit to people from Asia, the Pacific, and the United States, consistent with the national purpose of the Center.

ISSUES INVOLVED IN FOREIGN AID

Mr. BRIDGES. Mr. President, the President sent to Congress his message on foreign aid on March 22. He asks for a consolidation of many of the foreign aid agencies and billions of dollars in backdoor spending to carry on a foreign aid program for the next 5 years.

While I have generally supported foreign aid, I have questioned and opposed some foreign aid, particularly to nations avowedly Communist or to nations calling themselves neutral but, in reality, blackmailing us into giving them our taxpayers' hard-earned money by threatening to go Communist.

Mr. President, I believe it is time that the American people take a good, hard, long look at some of this foreign aid.

We, among the major nations, are the only one with a national debt of around $285 billion. We have operated under a surplus only a few times in the last 20 years, and I might add, those surpluses were either under a Republican administration or with a Republican Congress in control. Many of those nations we aided have surpluses in their treasuries.

It is time we ask ourselves, Can we really afford to be as generous as we might like to be?

It is also time we asked ourselves some other questions concerning the return to us for our assistance.

This question has been in the minds of others, also. In the March 22 issue of the Evening Star, of Washington, D.C., Columnist David Lawrence states:

> The time is approaching, however, for a showdown on just how far the United States should go in extending foreign aid and what it should expect in return from the countries aided.

Mr. President, Mr. Lawrence then gets to what I consider the crux of the problem. He writes:

> The biggest single factor that calls for full and thorough exposure is what may be termed "official blackmail." Government after government takes money from both sides. The moment the United States slows down its aid, there is a noticeable manifestation of interest in what the Communists may have to offer. High officials of such a government promptly arrange to visit Moscow, or threaten to do so. This is perhaps the favorite of all the tricks to impress America.

He brings out the fact, to which I agree, as to why any government would want to be neutral between communism and freedom—that there was a time when the difference between freedom and tyranny was clearly understood.

Mr. President, because of the timeliness of this subject and because it is most important to the American people, I ask unanimous consent that the article by Mr. Lawrence, entitled "Issues Involved in Foreign Aid" be placed in the body of the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Evening Star (Washington, D.C.), Mar. 22, 1961]

ISSUES INVOLVED IN FOREIGN AID—FULL EXPOSURE OF "OFFICIAL BLACKMAIL" AGAINST UNITED STATES BY AIDED NATIONS URGED

(By David Lawrence)

When are the people of the United States really going to be informed about the issues involved in spending billions of dollars for foreign aid?

President Kennedy is planning to pursue the same formula, with some minor modifications, that was used by the Republican and Democratic administrations preceding him. The idea is to grant funds and lend money on the theory that the United States has a humanitarian obligation to the poverty-stricken countries of the world. There is also an implication that, unless the United States helps these various countries, Soviet Russia will move in and take over.

The time is approaching, however, for a showdown on just how far the United States should go in extending foreign aid and what it should expect in return from the countries aided.

The biggest single factor that calls for full and thorough exposure is what may be termed "official blackmail." Government after government takes money from both sides. The moment the United States slows down its aid, there is a noticeable manifestation of interest in what the Communists may have to offer. High officials of such a government promptly arrange to visit Moscow, or threaten to do so. This is perhaps the favorite of all the tricks to impress America.

Just why any government would want to be neutral as between communism and democracy is difficult to understand, but the word "neutralist" has suddenly become a most respectable term. There was a time when the difference between freedom and tyranny was clearly understood, and no persuasive reason was offered why any country should be neutral as between the two.

The fact is, moreover, that many countries in Latin America, as well as in Asia and Africa and even in Europe, today are convinced that, if they adopt a neutral position, the United States will come through with large sums of money.

Congress has been bewildered by the growing scope of America's foreign aid program. It is recognized, of course, that some appropriations should be made to strengthen the military position of the United States and of the Western countries in the so-called uncommitted areas. In certain instances money spent to help a national economy or to build up local military forces is a good investment in security for the United States. But when the program reaches into the broader aspects of culture and education, it becomes far more controversial.

If America did not have a national debt of nearly $300 billion and were operating under a balanced budget, and if there were no recession in America with more than 5 million persons unemployed, it might sound reasonable for a part of the surplus bounty of the American people to be given away. But the question now is whether the United States can afford to be as generous in its foreign aid program as it has been in the past.

Undoubtedly the Marshall plan paid off. It gave the nations of Europe needed support in recovering after the war. But this was, in a large sense, a military proposition.

It was important for the United States to build allies in Europe. There is no such justification for the building up of neutrals, for instance, in Africa among countries who never will ally themselves with the United States or the West.

Under the circumstances, America may well be paying out funds to countries which will soon be strong enough to become important adjuncts of the Communist apparatus. This is the chance which the American people are taking. The idea now is being advanced that the Washington Government should exact some assurances as to how the money will be spent and as to whether the countries will put their military forces at the disposal of the United States in the event of serious trouble with the Communists.

Unless the taxpayers' money is being spent for the defense of the people of the United States, it is difficult to see how, in the long run, huge expenditures to countries which are playing both ends against the middle can be justified. There are countries like Egypt, for example, which permit the Communist apparatus to function inside their borders, and yet who want financial assistance from this country. The real question is whether the countries that are being assisted are truly friends of the United States or whether they are now or may later become a part of the Communist apparatus.

It is upon these fundamental issues in the foreign aid problem that Congress is being urged to require a great deal of information before embarking upon the programs being recommended to it by the Kennedy administration.

PROBLEMS OF THE TEXTILE INDUSTRY

Mr. BRIDGES. Mr. President, while reading a booklet entitled "Danger Clear and Present," published by the National Association of Wool Manufacturers, I noted an excerpt dealing with the problems of the textile and apparel industries which I think is particularly timely and revealing. This brief statement focuses the spotlight of attention on the dire need for a flexible quota system on textile imports in order to save this basic domestic industry from bankruptcy.

I ask unanimous consent that the excerpt be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF WOOL MANUFACTURERS

The U.S. textile industry and its chief customer, the apparel industry, are big—in combination or alone. Together they employ over 2 million production workers—more than any single U.S. manufacturing industry—and have an annual payroll of about $7 billion. Textiles and clothing are basic necessities and the two industries have made Americans, civilian and military, the best clothed people in the world.

The textile industry also supplies a vast array of household products and industrial goods. It is the primary consumer of U.S. cotton, wool, and manmade fibers, and huge amounts of other materials and services.

The importance of the industries to the owners, employees and the economy is evident. But there is still another even more vital factor—national security—which in today's perilous world, means national survival. Concerning defense essentiality, the Office of Civil and Defense Mobilization said as recently as January 30, 1959: "On this point there need be no equivocation. The OCDM regards the textile industry as an essential industry and considers it an essential part of the Nation's mobilization base."

You may ask, "So what?" Just this: The essential textile industry has been seriously damaged by rapidly rising imports. Now imports of apparel are mounting, compounding the injury to textile mills and posing a serious threat to U.S. clothing producers. The two industries and their 2.2 million employees are fighting for survival and they generally believe the Government, in the national interest, must establish textile and apparel quotas for each country exporting these products to the United States, with the quotas divided into product categories to prevent concentration in any particular type of goods.

EXPORT PROMOTION — MACHINE TOOLS

Mr. JAVITS. Mr. President, I ask unananimous consent to have printed in the RECORD at the end of my remarks an article from the New York Times of March 28, demonstrating the leading role of exports to the economic well-being of one of this Nation's most vital industries, the machine tool industry.

A large share of the drop in machine tool orders during the month of February, causing the industry to operate at about 60 percent of capacity, is attributable to a lag in foreign orders. As the executive vice president of the National Machine Tool Builders Association points out, a major impetus towards the rapid revitalization of the industry can be given through an expansion of governmental export services.

Such an expansion is the purpose of S. 1379, the National Export Policy Act of 1961, introduced by Senator SPARKMAN, myself and 17 other cosponsors on March 20. Although President Kennedy has over the weekend made clear his intention to implement some of the proposals contained in the National Export Policy Act, there is no doubt in my mind that the effective implementation of an export promotion program—vital not only to our domestic economy, as demonstrated by the experience of the machine tool industry, but also of the greatest importance to our international economic position—will require early and positive action by the Congress.

Mr. President, it is significant that not only the report of the Committee on Small Business, "Small Business Exports and the World Market," presented yesterday by the distinguished chairman of the committee, but also the final staff report by the Committee on Interstate and Foreign Commerce." The United States and World Trade," emphasize the need for large scale action in the field of export promotion. These reports are a direct reflection of the increasing awareness on the part of U.S. businessmen that exports are a vital element in their profit picture. It is also a reflection of the increasing awareness by Congress and by the executive branch that U.S. trade is the primary tool of our foreign economic policy.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MACHINE TOOL ORDERS PLUMMET—INDUSTRY CALLS FOR FEDERAL ACTION TO REVIVE BUSINESS

Orders for machine tools, the machines used to make machinery, dropped sharply again last month, the National Machine Tool Builders Association reported yesterday.

The organization, through Ludlow King, its executive vice president, made public at the same time an appeal for legislative and administrative changes to arrest the downward trend and revitalize the industry.

In Springfield, Vt., known as Precision Valley because it is the home of Jones & Lamson Machine Co., Bryant Chucking Grinder Co., and Fellows Gear Shaper Co., among others, a committee of local citizens called on Congress for changes in depreciation laws to halt what it called a dangerous drift toward deterioration of the Nation's industrial equipment.

The latest figures, made public in Washington yesterday, indicated the seriousness of the situation. Cutting tools rose in net new orders from $35,750,000 to $39,300,000 from January to February, but forming tools plummeted in the same period from $20,350,000 to $6,700,000. The total dropped from $56,100,000 to $46 million, a decrease of 18 percent.

The changes in foreign net orders pointed up the trend even more sharply. Cutting tools dropped from $14,800,000 to $11,750,000 and forming tools fell from $3,650,000 to $1,150,000. The total fell by 30.1 percent from $18,450,000 to $12,900,000. This was taken to indicate that it is not only domestic orders that are dropping; it is also the foreign orders, which have given the manufacturers here the few plus signs they have had in recent years.

Mr. King, speaking for the producers, had this to say:

"Machine tool industries in practically all foreign countries are working at full capacity with order backlogs of 18 to 24 months. The U.S. industry is producing at about 60 percent capacity with a small backlog. Because of the lively demand for capital goods overseas, together with our ability to make quick delivery, our export business increased substantially in 1960 in spite of the tremendous wage differential between the United States and foreign countries.

"If the Administration and Congress, working together, can develop and put into operation effective legislation and related administrative changes to encourage immediate investment in metalworking equipment, expand credit and insurance for export business and reduce barriers to foreign sales, the U.S. machine tool industry could be rapidly revitalized, its output raised to match existing productive capabilities, with the possible development of a backlog of orders comparable to that in other countries."

The Springfield town committee—a dairy farmer, a manufacturer, a merchant, a labor union chief, a journalist and a machine tool financial executive—called attention to the fact that the machine tool output in the Springfield area, Windsor County, came to fully 10 percent of the Nation's output.

Norman T. Harris, treasurer of Jones & Lamson and a member of the committee, said that the prosperity of the Springfield companies had a profound effect on the community's welfare and that "the level of operations of capital goods throughout the country is looked on as a bellwether for the entire economy."
